**VILLAGE OF PALM SPRINGS GENERAL EMPLOYEES' PENSION FUND  
MINUTES OF SPECIAL MEETING HELD  
October 13, 2020**

An electronic meeting was called to order at 2:00 P.M. Those persons present were:

**TRUSTEES**

Patti Waller  
Ed Horton  
Richard Reade

**OTHERS**

Bonni Jensen, Fund Counsel  
Margie Adcock, Administrator  
William Davis, Participant  
Craig Boudreau, Attorney for William Davis  
David Miller, Village Attorney  
Jane Worth, Village Clerk

**MINUTES**

The Board reviewed the minutes of the meeting held August 4, 2020. It was noted that on page 3 David Miller was incorrectly listed as Dan Miller. A motion was made, seconded and carried 3-0 to approve the minutes of the meeting held August 4, 2020 as corrected.

**APPROVAL OF AGENDA**

Ms. Waller stated that she would like to move item 6c Election of Vice-Chairperson and Secretary under Other Business to the November meeting. She stated that she would like to add the Notice of Candidacy to Other Business. A motion was made, seconded and carried 3-0 to amend the Agenda.

**APPROVAL OF THE GENERAL EMPLOYEES' PENSION FUND MOTIONS  
FROM AUGUST 4, 2020 MEETING**

Ms. Jensen noted that at the August 4, 2020 Board meeting there was an issue raised about the process by which the Ordinance was passed by the Village. The Village Attorney opined that the Ordinance was passed appropriately on first consideration, but in an abundance of caution the Village redid the passage of the Ordinance. She stated that there were sufficient members voting at the August 4<sup>th</sup> meeting to make valid actions. As such, even in the absence of Mr. Reade all the actions were appropriate. However, in an abundance of caution and in reliance on the actions taken by the Village, she is recommending that the Board approve the actions made at the August 4<sup>th</sup> meeting.

- a. Minutes of May 5, 2020 Meeting  
A motion was made, seconded and carried 3-0 to approve the minutes of the meeting held May 5, 2020.
- b. Discussion & Action of Benefit Forfeiture - William F. Davis, Jr.

The Board asked Mr. Davis if he would like to speak, Mr. Davis stated that his attorney was not present, and he did not have much to say. He stated that he did not do anything wrong. He apologized to the Board for all of this.

1. Motion to find Mr. Davis' Rights and Privileges to be Forfeited Under the Pension Plan  
A motion was made, seconded and carried 3-0 to find reason to believe Mr. Davis' rights and privileges are required to be forfeited under the Pension Plan.
2. Motion to have DOAH Handle the Hearing in this Matter  
A motion was made, seconded and carried 3-0 to have DOAH handle the hearing in this matter.
- c. Motion to raise \$250,000 in Cash for the Payment of Fund Benefits and Expenses  
A motion was made, seconded and carried 3-0 to raise \$250,000 in cash for the payment of Fund benefits and expenses.
- d. Amendment to the Ordinance Required by the SECURE Act. Motion to Send Ordinance to the Village.  
A motion was made, seconded and carried 3-0 to send the proposed Ordinance to the Village.
- e. Motion to Pay All Disbursements  
A motion was made, seconded and carried 3-0 to pay all listed disbursements.
  1. Motion to Renew the Fiduciary Liability Insurance with the Cost not to Exceed \$2,500  
A motion was made, seconded and carried 3-0 to renew the Fiduciary Liability Insurance with the cost not to exceed \$2,500.

### **ATTORNEY REPORT**

Ms. Jensen discussed the selection of the Attorney for the Fund for the matter involving Mr. Davis. She stated that by consensus, the Board asked her to locate attorneys to represent the Board in the matter of Mr. Davis. She provided the Board with background information regarding the four attorneys that would be making presentations.

### **Richelle Levy, Rice Pugatch Robinson Storfer & Cohen**

Richelle Levy appeared before the Board. She stated that she is a member of a three-person team that is part of a larger firm. She stated that she has worked with the team for 15 years and they merged with the larger firm 7 years ago. She stated that her team has maintained autonomy. They are based in Ft. Lauderdale. She stated that she has been an attorney in Florida for 25 years. She has spent 23 years representing pension plans, the last 15 exclusively being public pension boards. She stated that she has a unique perspective as she is familiar with all appropriate chapters of Florida Statutes related to public pension plans. She stated that her area of expertise is public pension boards. She has been special advocate for pension boards for disabilities, forfeitures and appeals. She explained what she would do for the Board if engaged. She gave a background of the process. She stated that the process tends to be the same regardless of whether it is a disability, forfeiture or appeal. She stated that she would obtain the file, review it, and make a plan. She stated

that pension boards usually keep the process in front of themselves and not go to DOAH. She would do discovery, conduct depositions, and discuss the matter with the Board. It would be set for hearing and progress through those steps.

Richelle Levy departed the meeting.

**Gregg Rossman, Rossman Legal**

Gregg Rossman appeared before the Board. He stated that he has worked with Ms. Jensen in forfeiture cases previously. He has a background in criminal law. He has been a lawyer for 26 years, 20 years as an Assistant State Attorney. He went into private practice and started to advise police departments on the operational side. He stated that due process matters in every proceeding. He reviewed his prior experience of arguing before pension boards, and DOAH. He stated that all of his cases have been upheld on appeal. He stated that he has had three forfeiture cases go to trial. He stated that he has a four-person firm with three attorneys. He handles everything himself. He stated that he is used to working with government agencies and believes his rates are reasonable.

Gregg Rossman departed the meeting.

**Jim Linn and Glenn Thomas, Lewis Longman Walker**

Jim Linn and Glenn Thomas appeared before the Board. Mr. Linn stated that he has been a lawyer for 33 years. Their firm has four offices with the West Palm Beach office being their largest office. He stated that they work out of their Tallahassee office. He stated that he grew up in Palm Beach County and moved to Palm Springs for junior high. He has spent most of his legal career doing pension work. He stated that they represent quite a few local governments and a fair number of boards. He stated that they are pretty much devoted to all things pension. They have a good understanding of the laws and how they effect the local pension boards and the forfeiture provisions. He introduced Mr. Thomas, noting that he has had a number for forfeiture proceedings at all levels.

Mr. Thomas stated that he was from Broward County. He retired from BSO and has been doing pension law for 18 years. He is Board Certified in local government law. He stated that he was experienced with evidentiary rules. He served briefly as a hearing officer and heard cases. He has been on every side of the issue on behalf of employers and boards. Mr. Thomas stated that he would be the lead attorney. He has handled 10 forfeiture hearings and one was appealed and upheld. There was discussion on fees and travel costs. Mr. Linn stated that they would handle the travel from the West Palm Beach office.

Jim Linn and Glenn Thomas departed the meeting.

It was noted that Jeffrey Pheterson was not yet available so the Board would continue with Other Business.

## **OTHER BUSINESS**

It was noted that Mariana Ortega resigned from the Board. The Board was provided with a proposed Notice of Election. The Notice will be sent to the active members in the Plan to begin the process for a replacement.

There was discussion on the vacant position of the 5<sup>th</sup> Trustee. Mr. Reade stated that he spoke with the Clerk's Office regarding advertising for the position. It was noted that a notice could not be put in with the water bill but they would see where else they might be able to post a notice.

Ms. Jensen stated that when the Governor entered his last Executive Order suspending the requirement to meet in public through November 1, he stated that it would be the last extension. As such, the next meeting will most likely need to be in person.

Ms. Jensen stated that she finalized the contact with DOAH. The rate is \$155 an hour. DOAH has been holding hearings remotely so she expects the same for the Davis hearing.

### **I. Jeffrey Pheterson, Ward Damon**

Jeffrey Pheterson appeared before the Board. He stated that he has been involved in labor and employment law since 1976. He has represented employees, public employers, and pension plans on the widest spectrum of issues. He stated that he fully understands that a forfeiture proceeding is a very sensitive matter. The Board needs to protect the rights of the participants in the Plan and the matters may involve long time employees. He discussed the cases that he has worked on. He stated that he does not have as much experience on the pension plan side as he does on the defendant side. He has represented 4 or 5 cases. He stated that he was an Administrative Hearing Officer at PERC for a while.

## **DISCUSSION ON THE SELECTION OF AN ATTORNEY**

Ms. Jensen stated that the Board has heard from four attorneys. They each have a different perspective, and all have a good background. The Board reviewed each of the attorneys and their qualifications. There was a lengthy discussion. A motion was made, seconded and carried 3-0 to hire Lewis Longman Walker subject to travel being resolved.

## **PUBLIC COMMENTS**

There were no public comments

There being no further business, the meeting was adjourned.

Respectfully submitted,

Patti Waller, Chair

# The Race for a Vaccine

The World Health Organization (WHO) has estimated that there are over 190 candidates who all hope to develop a vaccine to fight against SARS-CoV-2, COVID-19. The pandemic has created unprecedented public/private partnerships that are binding with one another to come up with their individual conception of a vaccine.

**Operation Warp Speed (OWS)** is a collaboration of several US federal government departments including Health and Human Services. Within OWS, the US National Institutes of Health (NIH) has partnered with 20 biopharmaceutical companies to accelerate development of drug and vaccine candidates for COVID-19.

**The historical success rate** of an infectious disease vaccine in a phase-three trial is 85% according to a 2018 study published in *Biostatistics*.\*

## Bloomberg Barclays US Int. Aggregate

# 3rd Quarter 2020 Fixed Income Market Commentary

September 30, 2020

- The economy maintained its track to recovery with stronger than expected data. Nonfarm payrolls increased 1.37 million, marking the fourth consecutive monthly gain of more than one million new jobs. The unemployment rate fell more than expected to 8.4%. The biggest event in bond markets in August was the Fed's shift toward a regime of average inflation targeting. Federal Reserve chair Powell reiterated this at the September FOMC meeting. As expected, the Fed kept the overnight target rate unchanged at 0 - 0.25% and pledged that policy will remain "accommodative" until they feel we have reached full employment and once 2% "average" inflation has been reached.
- The Consumer Price Index rose 0.4%, the third large monthly increase in a row as the economy is reopening and the massive price declines that occurred in March and April are snapping back into massive price increases. Positive contributions from unemployment claims, ISM new orders, consumer sentiment, leading indicators, and stock prices signal that the economy is rebounding, but the path forward will be based on keeping the virus under control and fiscal support from all levels of the government.
- For the quarter, the 10-year Treasury yield increased 2 basis points to 0.67%. The 2-year yield finished the quarter 3 basis points lower at 0.12% while the yield of the 30-year Treasury rose 4 basis points to 1.45%. These moves caused the 2-30 year yield spread to steepen by 7 basis points to 133 basis points.
- The bond market posted a positive return this quarter with a return of 0.62% for the Bloomberg Barclays U.S. Aggregate Index.
- Three of the four spread sectors posted positive excess returns with the corporate sector continuing to lead the way with 140 basis points of excess return. The asset-backed sector and agency sector delivered excess returns of 65 basis points and 37 basis points, respectively. After a volatile first half of the year, the mortgage-backed sector traded in a narrower range this quarter to deliver -4 basis points of excess return. Thus, the Bloomberg Barclays U.S. Aggregate Index recorded an excess return of 46 basis points this quarter.
- Our outlook remains the same. We expect a rise in yields with increased fiscal stimulus or the likelihood of a vaccine. Further, as the presidential election draws near, it is expected that the yield curve will steepen substantially due to the realization that the U.S. deficit may skyrocket in 2021. Therefore, we are maintaining our defensive positioning as we have seen rates move higher off the extreme lows as the economy reaccelerates.

# Fixed Income Market Factors

September 30, 2020

| Factor                                                                                                                                                                                                                                                                                                                                                                                        | Position |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Sentiment</b><br><br>Institutional investors have established a more balanced risk positioning with the majority indicated to be neutral or maintaining a modest long duration bias verses their benchmarks as the economic statistics continue to indicate a strong recovery off the historic lows of the 1st quarter of 2020 and managers adjust ahead of a contentious election season. | Negative |
| <b>Monetary</b><br><br>The Fed has shifted toward a regime of average inflation targeting and pledged that policy will remain “accommodative” until they feel a 2% “average” inflation has been reached. This goal of higher inflation is negative for bonds in this low rate environment.                                                                                                    | Negative |
| <b>Valuation</b><br><br>We see intermediate and longer-term rates as extremely overvalued. We expect rates to generally move higher, particularly on the long end, as Treasury issuance continues to increase, and the economy continues to recover.                                                                                                                                          | Negative |
| <b>Economic</b><br><br>The economy maintained its track to recovery with stronger than expected data. Nonfarm payrolls increased 1.37 million, marking the fourth consecutive monthly gain of more than one million new jobs. The unemployment rate fell more than expected to 8.4%.                                                                                                          | Negative |
| <b>Inflation</b><br><br>The Consumer Price Index has been rising even though the economy has not fully reopened. Once the economy is on the other side of the virus, inflationary pressures will be even greater given the massive stimulus it has received.                                                                                                                                  | Negative |

# Client Report Disclosures

## PERFORMANCE DATA

Performance data represents historically achieved results for a client's portfolio(s), and is no guarantee of future performance. The market or economic conditions during this period may or may not be repeated. There may be differences between the performance shown and the performance results achieved by any other client retaining Garcia Hamilton for the same investment strategy. Benchmark results are shown for comparison purposes only. The benchmark represents an unmanaged portfolio with characteristics which are similar to the portfolio(s). The returns of the benchmark do not include any transaction costs, management fees or other costs. The holdings in the client's portfolio(s) may differ significantly from the securities that comprise the benchmark shown. The benchmark has been selected by the client as an appropriate benchmark with which to compare the performance of the portfolio(s).

Definition and Characteristics

The Multisector Credit fixed income category is defined as having the flexibility to invest in the widest range of opportunities across sectors, credit ratings, term structures, geography and currencies. Unlike traditional fixed income strategies, where interest rate sensitivity tends to be a dominant source of returns, multisector credit strategies tend to be less sensitive to interest rate volatility and more exposed to credit risk.

Role within a Portfolio

The Multisector Credit fixed income category can play an important role in a diversified fixed income portfolio. These strategies offer investors attractive risk/return trade-offs across a wide opportunity set of credit with the added benefit of allowing managers to tactically rotate through sectors when perceived relative value diminishes or when risks are deemed high. As a result of the approach, the category generally has a low correlation to traditional fixed income categories while offering the added advantage of potentially limiting drawdowns.

Benchmark and Peer Group

This Multisector Credit fixed income search report will use the following benchmark and peer group:

**Index – Bloomberg Barclays Multiverse Index:** Represents the union of the Global Aggregate Index and Global High-Yield Index. The index consists of over 23,000 securities that are fixed-rate, taxable bonds meeting basic criteria on term to maturity and minimum amount outstanding. Foreign currencies must be freely tradable and hedgeable.

**Morningstar Category – Multisector Bond:** Multisector bond portfolios seek income by diversifying their assets among several fixed-income sectors, usually U.S. government obligations, U.S. corporate bonds, foreign bonds, and high-yield U.S. debt securities. These funds typically hold 35% to 65% of bond assets in securities that are not rated or are rated by a major agency such as Standard & Poor's or Moody's at the level of BB (considered speculative for taxable bonds) and below.

# Investment Option Narratives

## Firm Overview

Loomis Sayles & Company, was founded in 1926 and is a wholly-owned subsidiary of Natixis Global Asset Management, L.P., the US-based subsidiary of Natixis which is based in Paris, France. Headquartered in Boston, Massachusetts, Loomis Sayles maintains offices in San Francisco, Detroit, London and Singapore and employs more than 675 professionals. The firm manages in excess of \$310 billion in AUM across a variety of equity, fixed income and multi-asset strategies.

## Team Overview

Dan Fuss, Matt Eagan and Elaine Stokes manage the strategy. Fuss has over 55 years of experience in the investment industry and has been with Loomis since 1976. He is vice chairman of the firm's Board of Directors and manages multiple fixed income strategies at the firm. Eagan has been with Loomis since 1997 and has over 25 years of experience as either portfolio manager or analyst. Stokes joined Loomis in 1998 and has over 25 years of investment industry experience. All three co-manage Loomis' flagship Bond Fund, which was awarded the 2009 Morningstar Fund Manager of the Year award in the fixed income category.

## Strategy Overview

The Multisector Full Discretion (MFSD) strategy seeks to achieve high total return through individual security selection using fundamental credit analysis from its fixed income research department, as well as input from various sector and macro teams. MSFD employs an opportunistic style, focusing on out of favor sectors of the fixed income markets to generate ideas. The strategy emphasizes a long-term view of market developments, with the intention being to hold securities through a cycle, as they improve fundamentally. MSFD does not focus on the benchmark as a starting point for portfolio construction. Instead, Loomis views the entire spectrum of fixed income markets as a global opportunity set from which to choose the most attractive total return opportunities, regardless of market sector. The performance objective of Loomis Sayles' Multisector Full Discretion strategy is to maximize total return while managing downside risk. In order to achieve this goal, the strategy utilizes a value-driven, opportunistic style that will buy securities across a broad universe, including Emerging Markets, Non-US dollar, Convertibles, Structured Finance, and High Yield. The investment process is comprised of top-down analysis and bottom-up research as they seek to identify attractive sectors and securities. This strategy will typically look much different from any global bond benchmark due to its benchmark agnostic style. The Fund may invest up to 35% of its assets in below investment-grade fixed-income securities (commonly known as "junk bonds") and up to 20% of its assets in equity securities, such as common stocks and preferred stocks. The Fund's fixed-income securities investments may include unrated securities (securities that are not rated by a rating agency) if Loomis Sayles determines that the securities are of comparable quality to rated securities that the Fund may purchase. The Fund may invest in fixed-income securities of any maturity.

## Expectations

By and large, as credit goes, so goes this strategy. When credit spreads widen, this strategy will suffer. We take heart in the experience of the team to navigate spread movements as they've seen this story before. Further comforting is the fact that the team will grow conservative when markets dictate that they do so. They aren't credit perma-bulls. In 2014, the strategy briefly built a 16% stake in short-term Treasuries before quickly putting that money back into high yield when spreads widened. That trade hasn't played out in the strategy's favor as the subsequent Energy collapse hit high yield issuers the hardest, but the team has shown the ability to deftly navigate these waters before. This was evidenced by the strong winning position in Ford debt in 2009 when many pundits were predicting bankruptcy for the company that did not end up playing out as expected.

## Points to Consider

Investors may not realize that the strategy can hold up to 20% equities and typically maintains a healthy allocation to dividend-paying equities. This can result in higher equity sensitivity than the investor may prefer, especially one investing with the mindset that this allocation will fill a dedicated fixed income slot in the portfolio.

Dan Fuss' age might be of a concern to some investors. Fuss is 86 years old. This is less a concern to us given the succession plan that was put in place many years ago with the ascension of Stokes and Eagan. We also do not believe that Fuss's retirement is imminent, despite his advanced age.

## Recommendation Summary

The Loomis Sayles Multisector Full Discretion portfolio continues to hold a sizable overweight to Corporate Bonds (IG & HY in aggregate), including Convertible Bonds and Preferreds. This is consistent with the portfolio's style and the culture at Loomis. The short-and near-term performance will be heavily influenced by the direction of credit spreads.

The strategy is recommended for clients in search of yield who are OK with credit exposure. The strategy will maintain a volatility profile higher than peers given its credit, preferred, convertible bond and equity exposures.

The strategy should be viewed as a carve out within a dedicated asset allocation framework. Given the credit and equity sensitivity, the strategy will correlate much higher to equity benchmarks than it will to the Barclays Multiverse or Citigroup World Government Bond Indices. As a result, we believe clients should view this strategy as an opportunistic carve out within the plan structure as opposed to a stand alone fixed income allocation.

## Firm Overview

Pacific Investment Management Company (PIMCO) was founded in Newport Beach, CA in 1971. PIMCO is one of the world's largest fixed income managers, with a presence in every major bond market. PIMCO started as a subsidiary of Pacific Life Insurance Company to manage separate accounts for institutional clients. Today, PIMCO has offices in Newport Beach and 16 other global locations. In 2000, PIMCO was acquired by Allianz. PIMCO operates as a separate and autonomous subsidiary of Allianz. The firm manages over \$1.9T in AUM.

## Team Overview

PIMCO's Diversified Income strategy is headed by Group CIO Dan Ivascyn who works alongside PMs Alfred Murata, Sonali Pier and Eve Tournier. The four senior PMs can draw upon PIMCO's global team consisting of 230 portfolio managers and 114 research analysts. Additionally, PIMCO's sector specialists are primarily responsible for determining the relative attractiveness of opportunities. Idea generation is a collaborative effort and with the senior PMs meeting formally each week to discuss global credit markets, portfolio positioning and potential investment opportunities. Consensus on the team is typically necessary in order to move forward with an investment decision. However, in the event consensus is not reached, Ivascyn retains final investment authority.

## Strategy Overview

The DI strategy is designed to provide investors with a comprehensive global credit solution. It is a multi-sector strategy that invests across a broad spectrum of global credit market sectors, including investment grade and high yield, corporate debt as well as emerging market debt. The allocation among each of these markets will vary based on PIMCO's assessment of global trends and relative valuations. This active and dynamic approach allows for increased responsiveness in asset allocation to changing economic and market conditions while remaining anchored by PIMCO's investment process and longer-term orientation.

PIMCO's investment process starts with an annual Secular Forum at which PIMCO investment professionals from around the world gather with industry experts for a three-day discussion about the future of the global economy and financial markets. The goal of this forum is to look beyond the current business cycle and determine how secular forces will play out over the next three-to-five years. The Diversified Income team is responsible for implementing top down strategies developed at the Forum, as well as for developing bottom-up strategy by maintaining constant contact with the PIMCO specialist teams responsible for the sectors in the Diversified Income strategy's opportunity set. New investment ideas are sourced by individual team members and discussed in regularly scheduled strategy meetings. In evaluating new investment ideas, the team applies a number of qualitative and quantitative screens. The team also makes a full assessment of the fundamental credit factors underpinning an investment idea, incorporating the relevant credit analysis team into the discussion as needed.

## Expectations

PIMCO's investment philosophy seeks to add value in all market environments and circumstances. The philosophy of measured risk-taking across multiple concurrent strategies may deliver stable excess returns across different market conditions. At any one time, one or several of their strategies may be working to provide excess return. The disciplined style works to limit the likelihood that any single strategy that falls out of favor would negate the positive returns from other strategies.

During periods of extreme volatility, PIMCO's investment philosophy may be deemed out of favor. During these periods, certain managers may accurately predict large movements in prices and subject the portfolio to more risk than PIMCO would. This would result in substantially higher returns than PIMCO could be expected to achieve. However, in volatile periods, large amounts of risk can also lead to substantial underperformance, which PIMCO's approach seeks to mitigate.

## Points to Consider

As with most PIMCO strategies, assets under management and capacity are always considerations. With over \$30B in AUM, the strategy will employ liberal use of derivatives to manage portfolio exposures as it is often difficult, and sometimes impossible, for PIMCO to manage exposures in this fashion via the cash market. Therefore, clients need to be comfortable with the use of derivatives. In addition, accurately assessing what the strategy is invested in is problematic because the use of derivatives will often showcase unique and confusing portfolio exposures, such as negative cash balances and leverage (per 40 Act regulations, the strategy can be up to 30% levered). These are considerations clients need to assess to determine suitability.

## Recommendation Summary

Clients considering a diversified approach to fixed income should give strong consideration to PIMCO's Diversified Income strategy. PIMCO's primary advantage is the firm's global credit resources which compare favorably with best in class peers. The firm employs global team of 230 portfolio managers and 114 research analysts located around the globe. These analysts internally rate every credit held across PIMCO portfolios. While this is a practice utilized by many peers, the depth and experience of the team give PIMCO a competitive advantage in this area. Furthermore, PIMCO benefits from scale which is a significant advantage when sourcing allocations to new issuance. In oversubscribed situations, PIMCO typically gets a sizeable allocation where smaller managers would be forced to source in the secondary market. Finally, PIMCO's capabilities within emerging markets are also a differentiator. The team operates out of multiple locations including Singapore, Munich, and Newport Beach. Analysts travel extensively to investigate opportunities around the globe. This "boots on the ground" orientation provides unique insights that less global firms are unable to secure.

We believe that PIMCO DI strategy is suitable for clients seeking a higher yielding alternative to core fixed income with diversified exposures to global interest rates and credit. The approach looks to benefit from PIMCO's macroeconomic views on credit trends, global interest rates, duration, currencies, and curve positioning. This diversified approach aims to provide the potential for consistent outperformance over the long-term through relative value trades, especially compared to approaches that focus on a single asset class.

**Alpha** - A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta.

**Batting Average** – A measure of a manager's ability to consistently beat the market. It is calculated by dividing the number of months in which the manager beat or matched an index by the total number of months in the period.

**Best Quarter**- This is the highest quarterly (3 month) return of the investment since its inception.

**Beta** - A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of the portfolio's systematic risk.

**Down Period Percent** - Number of months below 0 divided by the total number of months.

**Downmarket Capture Ratio** - The ratio of average portfolio performance over the designated benchmark during periods of negative returns. A lower value indicates better product performance.

**Downside Std Dev** - This measures only deviations below a specified benchmark.

**Excess Return**- This is a measure of an investment's return in excess of a benchmark.

**Information Ratio** - This calculates the value-added contribution of the manager and is derived by dividing the excess rate of return of the portfolio by the tracking error. The higher the Information Ratio, the more the manager has added value to the portfolio.

**Longest Down-Streak Return** - Return for the longest series of negative monthly returns.

**Longest Down-Streak # of Periods** - Longest series of negative monthly returns.

**Longest Up-Streak Return** - Return for the longest series of positive monthly returns.

**Longest Up-Streak** - Longest series of positive monthly returns.

**Kurtosis** - Kurtosis indicates the peakedness of a distribution. For normal distribution, Kurtosis is 3.

**Max Drawdown** - The peak to trough decline during a specific record period of an investment or fund. It is usually quoted as the percentage between the peak to the trough.

**Max Drawdown # of Periods** - This is the number of months that encompasses the max drawdown for an investment.

**R-Squared** - The percentage of a portfolio's performance that can be explained by the behavior of the appropriate benchmark. A high R-Squared means the portfolio's performance has historically moved in the same direction as the appropriate benchmark.

**Return** - Compounded rate of return for the period.

**Sharpe Ratio** - Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is an absolute rate of return per unit of risk. A higher value demonstrates better historical risk-adjusted performance.

**Skewness** - Skewness reflects the degree of asymmetry of a distribution. If the distribution has a longer left tail, the function has negative skewness. Otherwise, it has positive skewness. A normal distribution

is symmetric with skewness 0.

**Sortino Ratio** - The Sortino Ratio is similar to Sharpe Ratio except it uses downside risk (Downside Deviation) in the denominator. It was developed in early 1980's by Frank Sortino. Since upside variability is not necessarily a bad thing, Sortino ratio is sometimes more preferable than Sharpe ratio.

**Standard Deviation** - A statistical measure of the range of a portfolio's performance. It represents the variability of returns around the average return over a specified time period.

**Tracking Error** - This is a measure of the standard deviation of a portfolio's excess returns versus its designated market benchmark.

**Treynor Ratio** - Similar to Sharpe Ratio, Treynor Ratio is a measurement of efficiency utilizing the relationship between annualized risk-adjusted return and risk. Unlike Sharpe Ratio, Treynor Ratio utilizes "market" risk (beta) instead of total risk (standard deviation). Good performance efficiency is measured by a high ratio.

**Up period Percent** - Number of months above 0 divided by the total number of months.

**Upmarket Capture Ratio** - The ratio of average portfolio performance over the designated benchmark during periods of positive returns. A higher value indicates better product performance.

**Worst Quarter** - This is the lowest quarterly (3 month) return of the investment since its inception.

## **IMPORTANT DISCLOSURE INFORMATION**

This material is confidential and not intended for distribution to the public. AndCo Consulting ("AndCo") compiled this report for the sole use of the client for which it was prepared. AndCo uses the material contained in this evaluation to make observations and recommendations to the client, however the strategies listed may not be suitable for all investors and there is no guarantee that the strategies listed will be successful. Any information contained in this report is for informational purposes only and should not be construed to be an offer to buy or sell any securities for investment consulting, or investment management analysis services. Additionally, the analysis provided, while generally comprehensive, is not intended to provide complete information on each of the management organizations or their underlying strategies. Please refer to their respective prospectus for complete terms, including risks and expenses.

Performance data is provided for historical and informational purposes only. Where applicable, results shown represent past performance and do not represent expected future performance or experience. Past performance does not guarantee future results. Returns are typically stated net of fees, which may include: investment advisory fees, taxes and other expenses. There may be instances where certain returns are shown gross of fees (i.e., before the aforementioned fees are deducted) and would be noted as such. Generally, there are two instances where returns may be shown as gross figures. In the case of separate accounts, typically returns are demonstrated as gross of fees due to the fact that the fee structure would generally vary widely depending on the client's size and circumstances. Additionally, there are instances where a strategy vehicle is relatively new and does not have a sufficiently long track record to represent a viable comparison relative to other strategies. Accordingly, the returns for the separate account version of such a strategy could be used as demonstrative of the performance for a similar vehicle; separate account returns are generally shown as gross of fees. It is important to note that any such separate accounts being used as a "proxy" are strictly for illustrative purposes. An investor should not expect the same results from the actual strategy(ies) under consideration. When client-specific performance is shown, AndCo uses time-weighted calculations, which are founded on standards recommended by the CFA Institute. In these cases, the performance-related data shown are based on information that is received from custodians. As a result, this provides AndCo with a reasonable basis that the investment information presented is free from material misstatement.

## **RISK FACTORS**

**The risks outlined herein do not purport to cover all risks or underlying factors associated with investing in fixed income products. Please refer to the respective offering documents for complete information.**

Prospective investors should be aware that investing in fixed income products may not be suitable for all investors and involves a degree of risk. The primary risk factors which affect fixed income strategies are interest rate risk and credit risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Interest rate risk is the risk that a bond's value will decline due to an increase in market interest rates. The price of bonds with longer maturities is typically affected more by rising interest rates than the price of bonds with shorter maturities. Credit risk is the risk that the issuer of a bond will fail to repay principal and interest on the security when due, as well as the potential downgrading on individual bonds. Potential investors should also consider other associated risks with these products, such as: inflation risk, income risk and liquidity risk.

Investment Performance Review  
Period Ending September 30, 2020

## **Village of Palm Springs General Employees' Pension Plan**

---

## 3rd Quarter 2020 Market Environment

### Quarter Performance

### 1-Year Performance

Broad asset class returns were positive in the 3rd quarter continuing their rebound from the 2nd quarter. In general, US monetary policy remains supportive as the Federal Reserve Bank (Fed) continues to hold interest rates near zero with the goal of providing the markets with liquidity. Importantly, the Fed indicated that interest rates in the US would remain low for an extended period as GDP growth and business activity remains subdued as the COVID-19 pandemic lingers. The Fed also commented that it was comfortable allowing inflation to exceed its 2% target in the near-term with the goal of averaging its target over the long-term. The final reading of US GDP growth in the 2nd quarter showed the economy contracted by -31.4%. While expectations for growth in the 3rd quarter vary widely, the general outlook is for a strong positive reading. Within domestic equity markets, we saw a reversal during the quarter with large cap stocks outperforming small cap stocks with the S&P 500 returning 8.9% compared to 4.9% for the Russell 2000 Index. Over the trailing 1-year period, large cap stocks significantly outperformed both small and mid-cap stocks with the S&P 500 returning 15.1% while small and mid-cap stocks returned 0.4% and 4.6%, respectively.

Similar to US markets, international markets posted strong returns for the period despite concerns about a potential "second wave" of the pandemic flowing through Europe. While neither the European Central Bank nor the Bank of England changed their policies, global central banks remain accommodative and prepared to provide additional support if required. International investors also benefited from a weakening USD which declined against most major currencies during the period. Emerging market economies continued to outperform relative to developed markets during the period with China showing signs of improvement. For the quarter, the MSCI Emerging Market Index returned 9.6% compared to 4.8% for the MSCI EAFE Index. Following the strong quarter, both developed and emerging market indices turned positive over the 1-year trailing period with the developed market index returning 0.5% and the emerging market index returning 10.5%.

Fixed income returns were mixed during the 3rd quarter as interest rates remained relatively stable. For the quarter, the BB US Aggregate Index returned 0.6% while the BB Corporate Investment Grade Index returned 1.5%. TIPS were an area of strength during the quarter, benefiting from higher inflation expectations. For the trailing 1-year period, fixed income returns were solid with the BB US Aggregate Index returning 7.0%, while corporate bonds returned 7.9%. TIPS outperformed nominal bonds by posting a respectable 10.1% return over the trailing 1-year period as investors' inflation expectations rose.

Source: Investment Metrics

Continuing their recent trend, US equities posted their second straight quarter of positive returns across the style and market capitalization spectrum. During the quarter, large cap stocks resumed their leadership, outpacing both mid and small-cap stocks as investors gravitated toward large companies for their relatively attractive profitability profile, lower leverage, and diversified business models. The Russell 1000 Index returned 9.5% compared with 7.5% and 4.9% for the Russell MidCap and Russell 2000 indices, respectively. While small cap stocks have historically performed well in periods following a recession, the relative uncertainty surrounding the path of global economic growth and the upcoming US Presidential election pushed investors toward the relative safety of large cap stocks.

Growth stocks maintained their dominance relative to value-oriented stocks across all market capitalizations for the 3rd quarter. The Russell 1000 Growth Index returned 13.2% and was the best performing index across style and market capitalization for the period. The index benefitted from favorable relative weightings to consumer discretionary, materials and technology-related companies, which powered large cap returns during the period. Small cap value stocks trailed their index peers during the quarter with the Russell 2000 Value Index returning 2.6%. Exposures to financial-related companies and real estate acted as a headwind as those sectors lagged during the period.

When viewed over the trailing 1-year period, the performance dispersion between large cap and small cap stocks across styles is glaring. While some of the difference in relative performance between market capitalizations can be attributed to the drawdown experienced during the 1st quarter, large cap stocks have benefited from investors favoring companies with healthier financial profiles that can weather a protracted period of weak growth due to the pandemic. Additionally, the sector weights within the respective indices and a tilt towards growth-oriented, higher P/E companies in large caps has acted as a tailwind for growth index performance.

Results over the trailing 1-year reflect the continued strength of growth compared to value benchmarks with each growth index earning double digit gains while each value index posted negative results for the period. The widest performance gap was in the large cap space with the Russell 1000 Growth Index returning 37.5%, which outpaced the large cap value benchmark by more than 40% for the year. The dispersion between both mid and small cap growth benchmarks was also substantial relative to their value counterparts with each growth index outpacing its respective value benchmark by more than 30% for the year.

Quarter Performance - Russell Style Series

1-Year Performance - Russell Style Series

Ten of eleven economic sectors within the large cap Russell 1000 Index were positive for the 3rd quarter with only the energy sector posting a negative return. Five sectors outpaced the return of the broad index during the period. Growth-oriented sectors such as consumer discretionary, materials and technology were some of the best performers for the quarter returning 19.0%, 12.4%, and 12.1%, respectively. The energy sector continues to lag due to reduced consumption and the threat of bankruptcies resulting from stubbornly low oil prices. While the sectors were positive, financials and real estate were laggards relative to the broad index results, posting returns of 4.0% and 1.5% respectively. With the Fed indicating that interest rates will remain lower for longer, both sectors faced headwinds due to their sensitivity to US interest rates.

Over the trailing 1-year period, technology-related and consumer discretionary stocks were the best performers returning 47.8% and 37.4% respectively. For the full-year, five sectors exceeded the return of the broad benchmark: technology, consumer discretionary, health care, communication services, and materials. In contrast, traditional value sectors such as energy, financials, real estate and utilities posted returns of -45.0%, -13.1%, -11.1%, and -6.1%, respectively, for the trailing 1-year period. This sector performance shows a staggering dispersion of more than 90% from best to worst performing sector in the large cap benchmark.

Five of eleven small cap sectors posted returns greater than the Russell 2000 Index for the 3rd quarter. Similar to large cap stocks, sectors sensitive to the consumer and improving economic conditions were the primary drivers of return during the quarter. That said, only the consumer discretionary sector outpaced its large cap counterpart during the period, returning 19.2% compared to 19.0%.

As previously noted, small cap stocks have significantly trailed large caps over the previous 1-year period. Specifically, energy-related companies have faced significant headwinds due primarily to low oil prices while interest rate sensitive sectors such as financials and real estate have failed to produce gains as a result of historically low US interest rates. The lone bright spot has been health care stocks which outperformed their large cap equivalents by more than 14% over the period (37.5% versus 22.9%).

Source: Morninastar Direct

- Nearly all broad international equity indices posted positive returns in both USD and local currency terms for the 3rd quarter. Similar to US markets, international markets continued to benefit from sustained monetary and fiscal stimulus in addition to economic recovery following the onset of the pandemic. Importantly, US investors benefited from the foreign exchange element of investing internationally as the USD declined relative to most developed market currencies during the quarter.
- For the 3rd quarter, emerging markets outperformed developed markets by nearly 5%. The MSCI Emerging Markets Index gained 9.6% in USD and 8.7% in local currency terms for the period. Emerging markets were led higher by China (12.5% for the quarter) which showed signs of accelerating economic growth during the quarter and represents more than 10% of 26 country emerging market benchmark. Developed international markets also delivered solid returns during the period with the MSCI EAFE Index rising by 4.8% in USD and 1.2% in local currency returns.

### Quarter Performance

### 1-Year Performance

- Trailing 1-year returns for international developed markets were mixed both in terms of USD and local currency returns. In contrast, emerging market returns were broadly positive during the period despite both EMEA and Latin America posting negative returns in both USD and local currency terms. For the year, the MSCI EAFE Index returned 0.5% in USD and -4.7% in local currency returns while the MSCI Emerging Markets Index returned 10.5% and 12.5%, respectively.
- During the trailing 1-year period, the USD weakened against most major international developed and emerging market currencies which positively contributed to returns in USD terms. Despite this, emerging markets in Latin America were adversely affected as a result of the decisions by Argentina and Ecuador to restructure their sovereign debt which resulted in local currency weakness and declining asset values.

Source: Morningstar Direct, MSCI Global Index Monitor (Returns are Net in USD)  
As a result of the GICS classification changes on 9/28/2018 and certain associated reporting limitations, sector performance represents backward looking performance for the prior year of each sector's current constituency, post creation of the Communication Services sector.

During the 3rd quarter, each fixed income benchmark posted positive results and returns were led by lower quality high yield bonds, international bonds and TIPS. During the period, US interest rates were roughly unchanged as investors vacillated between concerns related to the pandemic and a positive outlook on future economic growth. Despite declining during the month of September, US high yield bonds delivered strong returns for the quarter with the Bloomberg Barclays (BB) US High Yield Index returning 4.6%. High quality global bonds outperformed US bonds during the period largely due to a declining USD.

During the quarter, the broad Bloomberg Barclays (BB) US Aggregate Index returned 0.6%. The primary contributor of performance to the index during the period were US Corporate IG bonds which delivered 1.5%. Despite near-record issuance, investors continue to gravitate towards corporate credit for its higher return potential as US interest rates look to remain low for some time. US TIPS also performed well during the quarter with the BB US TIPS Index returning 3.0% as investors remained concerned about the potential for rising US inflation as a result of the fiscal and monetary stimulus provided to combat the pandemic.

Over the trailing 1-year period, each of the domestic and international fixed income indices delivered positive absolute returns. Longer duration, higher quality investment grade bonds outperformed lower quality, shorter duration high yield bonds as global interest rates fell while investors looked for less volatile assets. US TIPS were the best performing bonds with the BB US TIPS Index returning 10.1% followed by US Treasury bonds which returned 8.0%. High Yield bonds performed worst, returning 3.3% during the period as they continued to recover from the spread-widening drawdown during the 1st quarter.

For the full year, both domestic and global bonds performed well. The US BB Aggregate Bond Index returned 7.0% compared to 5.5% for the BB Global Aggregate ex-US Index. Despite lower interest rates in both Europe and Japan, global bonds delivered solid returns primarily due to a decline in the USD compared to most major developed currencies.

### Quarter Performance

### 1-Year Performance

Source: Bloomberg

- Much of the index performance detailed in the bar graphs on the previous page is visible on a time series basis by reviewing the yield graph to the right. The '1-Year Trailing Market Rates' chart illustrates that over the last year, the 10-year Treasury yield (green line) fell from yields of greater than 1.5%, to a low of roughly 0.5% before ending the quarter at roughly 0.7%. A decline in yields acts as a tailwind for bond performance. The blue line illustrates changes in the BAA OAS (Option Adjusted Spread). This measure quantifies the additional yield premium that investors require to purchase and hold non-Treasury investment grade issues. This line illustrates the dramatic increase in credit spreads in early 2020 as investors required additional compensation to hold riskier credit assets following the onset of the pandemic. Since that time, spreads have steadily declined as markets have largely normalized following the aggressive actions taken by the Treasury and Fed. During the quarter, the BB US High Yield OAS spread fell by roughly 1.1% but is still wider than pre-pandemic levels. Similar to Treasury yield declines, spread tightening in corporate bonds is equivalent to an interest rate decrease, which causes bond prices to rise. The green band across the graph illustrates the Fed Funds Rate. Following the onset of the pandemic, the Fed began aggressively cutting interest rates during the 1st quarter to between 0.0% to 0.25%, where it has remained since then.

1-Year Trailing Market Rates

Treasury Yield Curve

- The lower graph provides a snapshot of the US Treasury yield curve at the end of each of the last four calendar quarters. US interest rates were broadly higher at the end of 2019. Following the onset of the pandemic, interest rates fell dramatically as the Fed took unprecedented action to stimulate the economy. While short-term interest rates have remained anchored near 0.0%, intermediate-term interest rates between 2-years and 7-years declined as concerns over future US economic growth increased. Additionally, the Fed has indicated that US interest rates will remain low for the foreseeable future in an effort to provide the market with liquidity. Longer-term US Treasury interest rates moved slightly higher during the most recent quarter as investors balanced the Fed's statements with the need to increase the amount of US Treasury bond issuance to fund both the annual budget deficit and additional stimulus.

- Returns prior to 3/31/2010 for Anchor All Cap Value are the equity returns from the Anchor balanced account.
- Village cash flows represent Plan expenses paid from accounts external to the Pension Plan's investment portfolios.
- Neither AndCo, nor any covered associates, have made political contributions to any official associated with the Palm Springs General Employees' Pension Plan in excess of the permitted amount.

|                                       |                                                                                                                                                                                                                                                                                                                                                             |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Active Return</b>                  | - Arithmetic difference between the manager's performance and the designated benchmark return over a specified time period.                                                                                                                                                                                                                                 |
| <b>Alpha</b>                          | - A measure of the difference between a portfolio's actual performance and its expected return based on its level of risk as determined by beta. It determines the portfolio's non-systemic return, or its historical performance not explained by movements of the market.                                                                                 |
| <b>Beta</b>                           | - A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of the portfolio's systematic risk.                                                                                                                                                                                                                           |
| <b>Consistency</b>                    | - The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. Higher consistency indicates the manager has contributed more to the product's performance.                                                                                                                                                        |
| <b>Distributed to Paid In (DPI)</b>   | - The ratio of money distributed to Limited Partners by the fund, relative to contributions. It is calculated by dividing cumulative distributions by paid in capital. This multiple shows the investor how much money they got back. It is a good measure for evaluating a fund later in its life because there are more distributions to measure against. |
| <b>Down Market Capture</b>            | - The ratio of average portfolio performance over the designated benchmark during periods of negative returns. A lower value indicates better product performance                                                                                                                                                                                           |
| <b>Downside Risk</b>                  | - A measure similar to standard deviation that utilizes only the negative movements of the return series. It is calculated by taking the standard deviation of the negative quarterly set of returns. A higher factor is indicative of a riskier product.                                                                                                   |
| <b>Excess Return</b>                  | - Arithmetic difference between the manager's performance and the risk-free return over a specified time period.                                                                                                                                                                                                                                            |
| <b>Excess Risk</b>                    | - A measure of the standard deviation of a portfolio's performance relative to the risk free return.                                                                                                                                                                                                                                                        |
| <b>Information Ratio</b>              | - This calculates the value-added contribution of the manager and is derived by dividing the active rate of return of the portfolio by the tracking error. The higher the Information Ratio, the more the manager has added value to the portfolio.                                                                                                         |
| <b>Public Market Equivalent (PME)</b> | - Designs a set of analyses used in the Private Equity Industry to evaluate the performance of a Private Equity Fund against a public benchmark or index.                                                                                                                                                                                                   |
| <b>R-Squared</b>                      | - The percentage of a portfolio's performance that can be explained by the behavior of the appropriate benchmark. A high R-Squared means the portfolio's performance has historically moved in the same direction as the appropriate benchmark.                                                                                                             |
| <b>Return</b>                         | - Compounded rate of return for the period.                                                                                                                                                                                                                                                                                                                 |
| <b>Sharpe Ratio</b>                   | - Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is an absolute rate of return per unit of risk. A higher value demonstrates better historical risk-adjusted performance.                                                                                                |
| <b>Standard Deviation</b>             | - A statistical measure of the range of a portfolio's performance. It represents the variability of returns around the average return over a specified time period.                                                                                                                                                                                         |
| <b>Total Value to Paid In (TVPI)</b>  | - The ratio of the current value of remaining investments within a fund, plus the total value of all distributions to date, relative to the total amount of capital paid into the fund to date. It is a good measure of performance before the end of a fund's life                                                                                         |
| <b>Tracking Error</b>                 | - This is a measure of the standard deviation of a portfolio's returns in relation to the performance of its designated market benchmark.                                                                                                                                                                                                                   |
| <b>Treynor Ratio</b>                  | - Similar to Sharpe ratio but utilizes beta rather than excess risk as determined by standard deviation. It is calculated by taking the excess rate of return above the risk free rate divided by beta to derive the absolute rate of return per unit of risk. A higher value indicates a product has achieved better historical risk-adjusted performance. |
| <b>Up Market Capture</b>              | - The ratio of average portfolio performance over the designated benchmark during periods of positive returns. A higher value indicates better product performance.                                                                                                                                                                                         |

AndCo compiled this report for the sole use of the client for which it was prepared. AndCo is responsible for evaluating the performance results of the Total Fund along with the investment advisors by comparing their performance with indices and other related peer universe data that is deemed appropriate. AndCo uses the results from this evaluation to make observations and recommendations to the client.

AndCo uses time-weighted calculations which are founded on standards recommended by the CFA Institute. The calculations and values shown are based on information that is received from custodians. AndCo analyzes transactions as indicated on the custodian statements and reviews the custodial market values of the portfolio. As a result, this provides AndCo with a reasonable basis that the investment information presented is free from material misstatement. This methodology of evaluating and measuring performance provides AndCo with a practical foundation for our observations and recommendations. Nothing came to our attention that would cause AndCo to believe that the information presented is significantly misstated.

This performance report is based on data obtained by the client's custodian(s), investment fund administrator, or other sources believed to be reliable. While these sources are believed to be reliable, the data providers are responsible for the accuracy and completeness of their statements. Clients are encouraged to compare the records of their custodian(s) to ensure this report fairly and accurately reflects their various asset positions.

The strategies listed may not be suitable for all investors. We believe the information provided here is reliable, but do not warrant its accuracy or completeness. Past performance is not an indication of future performance. Any information contained in this report is for informational purposes only and should not be construed to be an offer to buy or sell any securities, investment consulting, or investment management services.

# Custodial Duties

- Hold securities in safekeeping in an appropriate location: Bank vault, Federal Reserve System, DTC, or other sub-custodian
- Accept instructions for security purchases and sales
- Accomplish delivery versus payment settlement of security transactions
- Collect income and dividends payable on securities
- Handle capital actions, such as bond calls, puts, conversions, stock splits, and spin-offs
- Handle corporate class action filings
- Reinvest dividend, income and capital gains on mutual funds and collective funds as directed by client
- Forward proxy voting material to appropriate parties
- Interface with investment advisors or other third-party vendors
- Ensure that income received or other cash is swept into a short-term investment

## Custodial Duties

- Process monthly pension payments as directed by client
- Process lump sum payments or other one time disbursements as directed by client
- Issue tax reporting forms to each benefit recipient
- Handle IRS tax reporting responsibilities
- Receive and send wire transfers of cash as directed by client
- Pay authorized expenses as directed by client
- Provide GASB 40 reporting where appropriate
- Provide securities lending services where appropriate to qualified accounts
- Provide detailed statements, itemizing all transactions and listing all trust assets – showing cost, market value, and accrued income receivable
- Provide online account access to authorized parties to view transactions and account assets

## **General Disclosure:**

The Institutional Services Group is part of Comerica's Wealth Management team which consists of various divisions and affiliates of Comerica Bank, including Comerica Bank & Trust, National Association; World Asset Management, Inc.; Comerica Securities, Inc.; and Comerica Insurance Services, Inc. and its affiliated insurance agencies. World Asset Management, Inc. and Comerica Securities, Inc. are federally registered investment advisors. Registrations do not imply a certain level of skill or training.

Comerica Bank and its affiliates do not provide tax or legal advice. Please consult with your tax and legal advisors regarding your specific situation.

Non deposit Investment products are not insured by the FDIC; are not deposits or other obligations of, or guaranteed by Comerica Bank or any of its affiliates; and are subject to investment risks, including possible loss of the principal invested.
