G. Construct a tight fit between the Work and pipes, sleeves, ducts, conduit, and other penetrations through surfaces.

H. Refinish surfaces to match adjacent finishes. For continuous surfaces, refinish to nearest intersection; for an assembly, refinish entire unit.

I. Identify any hazardous substance or condition exposed during the Work to the ENGINEER.

SECTION 01780

CONTRACT CLOSEOUT

PART 1 - GENERAL

1.01 SUBMITTALS

A. Informational Submittals:

1. Submit prior to application for final payment.

a. Written certification that Contract Documents have been reviewed, Work has been inspected, and that the Work is complete in accordance with the Contract Documents and ready for ENGINEER's inspection.

b. Record Documents: As required in General Conditions.

c. Approved Shop Drawings and Samples: As required in General Conditions.

d. Special Bonds, Special Guarantees, and Service Agreements.

e. Consent of Surety to Final Payment: As required in General Conditions.

f. Releases of Waivers of Liens and Claims: As required in General Conditions.

g. Releases from Agreements.

h. Final Application for Payment: Submit in accordance with procedures and requirements stated in **Section 01200 – Measurement and Payment.**

i. Extra Materials: As required by individual specification Sections.

1.02 RECORD DOCUMENTS

A. Quality Assurance.

1. Furnish qualified and experienced person, whose duty and responsibility shall be to maintain record documents.

2. Accuracy of Records:

   a. Coordinate changes within record documents, making legible and accurate entries on each sheet of Drawings and other documents where such entry is required to show change.

   b. Purpose of Project record documents is to document factual information regarding aspects of the Work. Both concealed and visible, to enable future modification of the Work to proceed without lengthy and expensive site measurement, investigation, and examination.

3. Make entries within 24 hours after receipt of information that a change in the Work has occurred.

4. Prior to submitting each request for progress payment, request ENGINEER's review and approval of current status of record documents. Failure to properly maintain, update, and submit record documents may result in a deferral by ENGINEER to recommend whole or any part of CONTRACTOR's Application for Payment, either partial or final.

1.03 RELEASES FROM AGREEMENTS

A. Furnish OWNER written releases from property owners or public agencies where side agreements or special easements have been made, or where CONTRACTOR's operations have not been kept within the OWNER's construction right-of-way.

B. In the event CONTRACTOR is unable to secure written releases:

1. Inform OWNER of the reasons.

2. OWNER or its representatives will examine the site, and OWNER will direct CONTRACTOR to complete the WORK that may be necessary to satisfy terms of the side agreement or special easement.

3. Should CONTRACTOR refuse to perform this Work, OWNER reserves right to have it done by separate contract and deduct cost of same from Contract Price, or require CONTRACTOR to furnish a satisfactory Bond in a sum to cover legal claims for damages.

4. When OWNER is satisfied that the Work has been complete in agreement with Contract Documents and terms of side agreement or special easement, right is reserved to waive requirement for written release if: (i) CONTRACTOR's failure to obtain such statement is due to grantor's

refusal to sign, and this refusal is not based upon any legitimate claims that CONTRACTOR has failed to fulfill terms of side agreement or special easement, or (ii) CONTRACTOR is unable to contact or has had undue hardship in contacting grantor.

1.04 WARRANTIES

A. Provide duplicate notarized copies.

B. Execute and assemble documents from Subcontractors, suppliers and manufacturers.

C. Provide table of contents and assemble in binder with durable plastic cover.

D. Submit prior to the final Application for Payment.

E. For items of work delayed beyond date of Substantial Completion, provide updated submittal within ten days after acceptance, listing date of acceptance as start of warranty period.

F. Provide operation and maintenance documentation.

G. CONTRACTOR shall attend a One-Year Warranty walkthrough and resolve any issues at his own expense.

PART 2 – PRODUCTS

NOT USED

PART 3 - EXECUTION

3.01 MAINTENANCE OF RECORD DOCUMENTS

A. General:

1. Promptly following commencement of Contract Times, secure from ENGINEER at no cost to CONTRACTOR, one complete set of Contract Documents. Drawings will be full size.

2. Delete ENGINEER title block and seal all documents.

3. Label or stamp record document with title, “RECORD DOCUMENTS,” in neat large printed letters.

4. Record information concurrently with construction progress and within 24 hours after receipt of information that change has occurred. Do not cover or conceal Work until required information is recorded.

5. Submit final Record Drawings in accordance with **Section 01720 – Record Documents**.

B. Preservation:

1. Maintain documents in a clean, dry, legible condition and in good order. Do not use record documents for construction purposes.

2. Make documents and samples available at all times for observation by ENGINEER.

C. Making Entries on Drawings:

1. Using an erasable colored pencil (not ink or indelible pencil), clearly describe change by graphic line and note as required.

   a. Color Coding:
      i. Green when showing information deleted from Drawings.
      ii. Red when showing information added to Drawings.
      iii. Blue and circled in blue to show notes.

2. Date entries.

3. Call attention to entry by "cloud" drawn around area or areas affected.

4. Legibly mark to record actual changes made during construction, including but not limited to:

   a. Depths of various elements of foundation in relation to finished first floor data if not shown or where depth differs from that shown.

   b. Horizontal and vertical locations of existing and new Underground Facilities and appurtenances, and other underground structures, equipment, or Work. Reference to at least two (2) measurements to permanent surface improvements.

   c. Location of internal utilities and appurtenances concealed in the construction referenced to visible and accessible features of the structure.

d. Locate existing facilities, piping, equipment, and items critical to the interface between existing physical conditions or construction and new construction.

e. Changes made by Addenda and Field Orders, Work Change Directive, Change Order, Written Amendment, and ENGINEER's written interpretation and clarification using consistent symbols for each and showing appropriate document tracking number.

5. Dimensions on Schematic Layouts: Show on record drawings, by dimension, the centerline of each run of items such as are described in previous subparagraph above.

a. Clearly identify the item by accurate note such as "cast-iron drain," "galvanized water," and the like.

b. How by symbol or note, vertical location of item ("under slab," "in ceiling plenum," "exposed," and the like).

c. Make identifications so descriptive that it may be related reliably to Specifications.

3.02 FINAL CLEANING

A. At completion of the Work or of a part thereof and immediately prior to CONTRACTOR's request for certificate of Substantial Completion; or if no certificate is issued, immediately prior to CONTRACTOR's notice of completion, clean entire site or parts thereof, as applicable.

1. Leave the Work and adjacent areas affected in a cleaned condition satisfactory to OWNER.

2. Remove grease, dirt, dust, paint or plaster splatter, stains, labels, fingerprints, and other foreign materials from exposed surfaces.

3. Repair, patch, and touch up marred surfaces to specified finish and match adjacent surfaces.

4. Clean all windows.

5. Clean and wax wood, vinyl, or painted floors.

6. Broom clean exterior paved driveways and parking areas.

7. Hose clean sidewalks, loading areas, and other areas contiguous with principal structures.

8. Rake clean all other surfaces.

9. Replace air-handling filters and clean ducts, blowers, and coils of ventilation units operated during construction.

10. Leave water courses, gutters, and ditches open and clean.

B. Use only cleaning materials recommended by manufacturer of surfaces to be cleaned.

C. Adjust operating products and equipment to ensure smooth and unhindered operation.

END OF SECTION

SECTION 01810

EQUIPMENT TESTING AND FACILITY STARTUP

PART 1- GENERAL

1.01 DEFINITIONS

A. Facility: Entire project, or an agreed-upon portion of the project, including all of its unit processes.

B. Functional Test: Test or tests in presence of the ENGINEER and the OWNER to demonstrate that installed equipment meets manufacturer's installation, calibration, and adjustment requirements and other requirements as specified.

C. Performance Test: Test or tests performed after any required functional tests and in the presence of the ENGINEER and the OWNER to demonstrate and confirm individual equipment meets performance requirements specified in the individual specification sections.

D. Unit Process: as used in this Section, a unit process is a portion of the facility that performs a specific process function, such as pumping or treatment.

E. Facility Performance Demonstration:

1. A demonstration, conducted by the CONTRACTOR, with assistance of the OWNER, to demonstrate and document the performance of the entire operating facility, both manually automatically, if required, based on criteria developed in conjunction with the OWNER and as accepted by the ENGINEER.

2. Such a demonstration is for the purposes of (i) verifying to the OWNER the entire facility performs as a whole, and (ii) documenting performance characteristics of complete facility for OWNER's records. Neither the demonstration nor the evaluation is intended in any way to make performance of a unit process or entire facility the responsibility of the CONTRACTOR, unless such performance is otherwise specified.

1.02 SUBMITTALS

A. Information Submittals:

1. Facility startup and performance demonstration plan.

2. Functional and performance test results.

3. Start-up check-list and report for approval prior to start-up services are conducted.

4. Completed start-up check-list and report.

1.03 FACILITY STARTUP AND PERFORMANCE DEMONSTRATION PLAN

A. Develop a written plan, in conjunction with the OWNER's operating personnel, to include the following:

1. Step-by-step instructions for startup of each unit process and the complete facility.

2. Start-up form to minimally include the following:

a. Description of the unit process, including equipment numbers/nomenclature of each item of equipment and all included devices.

b. Detailed procedure for startup of the unit process, including valves to be opened/closed, order of equipment startup, etc.

c. Startup requirements for each unit process, including water, power, controls, chemicals, etc.

d. Space for evaluation comments.

e. Sequence of unit process startup to achieve facility startup.

f. CONTRACTOR certification that the facility is capable of performing its intended function(s), including fully automatic operations

g. Signature spaces for the CONTRACTOR and the ENGINEER.

PART 2 - PRODUCTS

NOT USED

PART 3 - EXECUTION

3.01 GENERAL

A. Facility Startup Meetings: Schedule, in accordance with the requirements of **Section 01039 - Coordination and Meetings**, to discuss test schedules, test methods, materials, chemicals and liquids required, facilities operations interface, and OWNER involvement.

B. CONTRACTOR's Testing and Startup Representative:

1. Designate and furnish one or more personnel to coordinate and expedite testing and facility startup.

2. Representative(s) shall be present during startup meetings and shall be available at all times during testing and startup.

C. Provide temporary valves, gauges, piping, test equipment, water, power, fuel, chemicals, laboratory analysis, and other materials and equipment required for testing and startup.

D. Provide adequate subcontract and equipment manufacturer's staff to prevent delays. Schedule ongoing work so as not to interfere with or delay testing and startup.

E. OWNER will:

1. Operate process units and facility with support of CONTRACTOR.

3.02 EQUIPMENT TESTING

A. Preparation:

1. Complete installation before testing.

2. Furnish qualified manufacturer's representatives, when required by individual specification sections.

3. Obtain and submit from equipment manufacturer's representative Manufacturer's Certification of Proper Installation Form.

4. Equipment Test Report Form: Provide written test report for each item of equipment to be tested, to include the minimum information:

a. OWNER/Project Name.

b. Equipment or item tested.

c. Date and time of test.

d. Type of test performed (functional or performance).

e. Test method.

f. Test conditions.

g. Test results.

h. Signature spaces for CONTRACTOR and ENGINEER as witness.

5. Cleaning and Checking: Prior to beginning functional testing:

a. Calibrate testing equipment in accordance with manufacturer's instructions.

b. Inspect and clean equipment, devices, connected piping, and structures to ensure they are free of foreign material.

c. Lubricate equipment in accordance with manufacturer's instructions.

d. Turn rotating equipment by hand when possible to confirm that equipment is not bound.

e. Open and close valves by hand and operate other devices to check for binding, interference, or improper functioning.

f. Check power supply to electric-powered equipment for correct voltage.

g. Adjust clearances and torque.

h. Test piping for leaks.

6. Ready-to-test determination will be by ENGINEER based at least on the following:

a. Acceptable Operation and Maintenance Data.

b. Notification by CONTRACTOR of equipment readiness for testing.

c. Receipt of Manufacturer's Certificate of Proper Installation.

d. Receipt and approval of start-up check-list and from.

e. Adequate completion of work adjacent to, or interfacing with, equipment to be tested, including items to be furnished by the OWNER, if any.

f. Availability and acceptability of manufacturer's representative, when specified, to assist in testing of respective equipment.

g. Satisfactory fulfillment of other specified manufacturer's responsibilities.

h. Equipment and electrical tagging complete.

i. Delivery of all spare parts and special tools.

B. Functional Testing:

1. Conduct as specified in individual specification Sections.

2. Notify OWNER and ENGINEER in writing at least 10 days prior to scheduled date of testing.

3. Prepare Equipment Test Report summarizing test method and results.

4. When, in ENGINEER's opinion, equipment meets functional requirements specified, such equipment will be accepted for purposes of advancing to performance testing phase, if so required by individual Specification sections. Such acceptance will be evidenced by ENGINEER/OWNER's signature as witness on Equipment Test Report.

C. Performance Testing:

1. Conduct as specified in individual specification Sections.

2. Notify ENGINEER and OWNER in writing at least 10 days prior to scheduled test date.

3. Performance testing shall not commence until equipment has been accepted by ENGINEER as having satisfied functional test requirements specified.

4. Type of fluid, gas, or solid for testing shall be as specified.

5. Unless otherwise indicated, furnish labor, materials, and supplies for conducting the test and taking samples and performance measurements.

6. Prepare Equipment Test Report summarizing test method and results.

7. When, in ENGINEER's opinion, equipment meets performance requirements specified, such equipment will be accepted as to conforming to Contract requirements. Such acceptance will be evidenced by ENGINEER's signature on Equipment Test Report.

3.03 STARTUP OF UNIT PROCESSES

A. Prior to unit process startup, equipment within unit processes shall be accepted by ENGINEER as having met functional and performance testing requirements specified.

B. Startup sequencing of unit processes shall be as chosen by the CONTRACTOR to meet schedule requirements.

C. Make adjustments, repairs, and corrections necessary to complete unit process startup.

D. Startup shall be considered complete when, in the opinion of the ENGINEER, the unit process has operated in the manner intended for five (5) continuous days without significant interruption. This period is in addition to functional or performance test periods specified elsewhere.

E. Significant Interruption: May include any of the following events:

1. Failure of CONTRACTOR to provide and maintain qualified onsite startup personnel as scheduled.

2. Failure to meet specified functional operation for more than two (2) consecutive hours.

3. Failure of any critical equipment or unit process that is not satisfactorily corrected within five (5) hours after failure.

4. Failure of any noncritical equipment or unit process that is not satisfactorily corrected within eight (8) hours after failure.

5. As determined by the ENGINEER.

F. A significant interruption will require startup then in progress to be stopped. After corrections are made, startup test period to start from the beginning again.

3.04 FACILITY PERFORMANCE DEMONSTRATION

A. When, in the opinion of the ENGINEER, startup of all unit processes has been achieved, sequence each unit process to the point that the facility is operational.

B. Demonstrate proper operation of required interfaces within and between individual unit processes.

C. After facility is operational, complete performance testing of equipment and system not previously tested.

END OF SECTION

DIVISION 2

SITEWORK

SECTION 02270

EROSION, SEDIMENTATION AND DUST CONTROL

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. Work consists of control measures as required during the life of the Contract to control erosion, sedimentation and dust.

B. The CONTRACTOR shall establish, construct and maintain erosion and sediment control measures. The erosion control programs shall be maintained during the entire period of construction, including any extensions in Contract time.

C. Temporary erosion and pollution control shall include construction work off-site where such work is necessary as a result of borrow pit operations, haul roads or equipment storage sites, etc.

D. Preparation of the Stormwater Pollution Prevention Plan (SWPPP), including modifications and updates.

E. Obtain and comply with all provisions of the State of Florida, Department of Environmental Protection, Permit for Stormwater Discharge from Large and Small Construction Activities (NPDES Construction Site Permit Program)

1.02 REFERENCES

A. Rule 62-40.432, F.A.C.

B. The Florida Development Manual: A Guide to Sound Land and Water Management (DEP, 1988) and any subsequent amendments.

C. 40 CFR Part 122.

D. Chapter 403.0885, F.S.

E. FDOT Standard Specifications for Road and Bridge Construction, Section 104, Latest Edition.

F. State of Florida Department of Environmental Protection Generic permit for Stormwater Discharge from Large and Small Construction Activities – Notice of Termination of Generic Permit Coverage immediately following this Section.

PART 2 - PRODUCTS

NOT USED

PART 3 - EXECUTION

3.01 PREVENTION, CONTROL AND ABATEMENT OF EROSION AND WATER POLLUTION

A. All work shall be in accordance with the requirements of the State of Florida Department of Environmental Protection under Chapter 62-621, F.A.C. or Chapter 62-620, F.A.C.

B. The CONTRACTOR shall provide for and be responsible for the prevention, control and abatement of erosion and water pollution until completion and acceptance of the Project. The CONTRACTOR shall provide all temporary erosion control features necessary to prevent, control and abate erosion and water pollution, and shall prepare and submit as the operator and permittee, along with the applicable application fee, the "Notice of Intent to Use Generic Permit for Stormwater Discharge from Large and Small Construction Activities" (NOI) prior to commencing construction and the "Notice of Termination" (NOT) upon final completion of construction. The CONTRACTOR, as required by the NPDES permit program, shall prepare a stormwater pollution prevention plan (SWPPP). This SWPPP shall be modified and updated by the CONTRACTOR as necessary, to meet the requirements of the NPDES permit issued, at no additional cost to the OWNER. The CONTRACTOR shall also comply with the inspections, maintenance, reporting and all other provisions of the NPDES permitting program, and the cost for the compliance with this program is to be included in the CONTRACTOR bid price for the work.

C. During the construction of the Project, the CONTRACTOR shall comply with the Water Quality Standards of the EPA and the State of Florida.

D. The CONTRACTOR shall meet and be responsible for the requirements of all applicable governing agencies regarding prevention, control and abatement of erosion and water pollution.

3.02 DAMAGE TO WATER DETENTION AND DRAINAGE AREAS

A. The CONTRACTOR shall be responsible for the prevention of damage to detention ponds, holding areas, drainage canals or natural waterways, and wetlands (both on and off site).

B. The CONTRACTOR shall act as directed to correct said damage as quickly as possible and take necessary steps to prevent future damage. The CONTRACTOR

shall notify the ENGINEER of said damage.

C. The cost of correction of damage shall be at no cost to the OWNER or his agents.

3.03 DUST CONTROL

A. The CONTRACTOR shall exercise precautionary measures to minimize dust emissions as necessary, which may include, but shall not be limited to, periodic sprinkling or wetting of the site, and shall modify measures to be implemented, as necessary, to satisfy jurisdictional agency requirements including but not limited to Palm Beach County and the Palm Beach County Health Department (Air Pollution Division) at no additional expense to the OWNER.

END OF SECTION

This page intentionally left blank.

SECTION 02820

CHAIN LINK FENCE

PART 1 - GENERAL

1.01 DESCRIPTION

This work consists of all labor, materials, and equipment necessary for furnishing and installing chain link fence, gates, temporary fencing and screening, and accessories in conformance with the specifications, drawings, and details.

1.02 RELATED SECTIONS

A. All of Division 1.

B. **Section 02210 – Grading.**

C. **Section 03700 – Concrete Work**.

1.03 REFERENCES

A. ASTM F668, Standard Specification for PVC-Coated Steel Chain Link Fence Fabric.

B. ASTM F900, Standard Specification for Industrial and commercial Swing Gates.

C. ASTM F1083, Standard Specification for Pipe, Steel, Hot-Dipped Zinc-Coated .Welded for Fence Structures.

D. ASTM F567, Standard Practice for Installation of Chain-Link Fences.

E. ASTM F626 Standard Specification for Fence Fittings.

1.04 SUBMITTALS

A. Submit manufacturer's data for fabric, posts, gates, and all other materials, finishes, and appurtenances.

B. Submit shop drawing showing dimensions of materials and layout of posts and gates.

C. Submit temporary fencing and screening plan.

PART 2 - PRODUCTS

2.01 GENERAL

A. Match, style, finish, and color of each fence component with that of other fence components. All fence components shall be black, PVC coated.

2.02 CHAIN LINK FENCE FABRIC

A. Fence fabric shall be black, PVC coated galvanized fabric conforming to STM F668, Class 1 or 2a with a minimum thickness of five (5) mm.

B. Fence height shall be 96 inches.

C. Core wire gauge shall be No. 9 prior to vinyl coating.

D. Link patter shall be two (2) inch diamond mesh.

E. Loops of knuckled selvages shall be closed or nearly closed with space not exceeding diameter of wire

F. Wires of twisted selvages shall be twisted in a closed helix three full turns and cut at an angle to provide sharp barbs that extend a minimum of ¼-inch beyond the twist.

G. Fencing shall be slatted.

2.03 POSTS

A. Strength and stiffness requirements shall meet ASTM F1043, except as modified in this section. The steel shall meet the requirements of ASTM F1083.

B. The post length shall be the manufacturer's standard with an allowance for a minimum of 36 inches of embedment below finished grade.

C. Protective coating shall be a zinc coating applied to the internal and external portions of the post meeting the requirements of ASTM F1043, Type A.

D. Color coating shall be applied over the zinc coating a minimum of 10 mils in thickness and matching the color of the chain link fabric.

E. Line posts shall have an outside diameter of 2½-inches and a minimum weight of 2.96 pounds per foot.

F. End, corner, angle, and pull posts shall have an outside diameter of three (3) inches and a minimum weight of 4.69 pounds per foot.

G. Gates posts shall have an outside diameter of four (4) inches and a minimum weight of 4.85 pounds per foot.

2.04 TOP RAILS AND BRACE RAILS

A. Rails shall be manufactured from galvanized steel pipe.

B. The protective coating and color coating shall match the coating applied to the posts.

C. The rails shall have an outside diameter of 1⅝ and a minimum weight of 2.27 pounds per foot.

2.05 FENCE FITTINGS

A. Post and line caps shall be designed to accommodate passage of top rail through cap.

B. The protective coating and color coating shall match the coating applied to the posts.

C. Tension and brace bands shall be vinyl clad.

D. Truss rods assemblies shall be ⅜-inches in diameter.

2.06 TENSION WIRE

A. Tension wire shall be zinc-coated steel marcelled tension wire confirming to ASTM A824, Type II, Class 2.

B. The protective coating and color coating shall match the coating applied to the posts.

2.07 GATES

A. Gates shall have welded steel joints with coated with zinc-based paint.

B. The protective coating and color coating shall match the coating applied to the posts.

C. The chain link fabric shall be attached to the gate frame a maximum of every 15 inches.

2.08 PVC VERTICAL SLATS

A. The slats shall be black in color, made of UV-resistant PVC, and installed vertically the entire height of the fence.

2.08 TEMPORARY FENCING AND SCREENING

A. Fence height shall be 72 inches.

B. Temporary screening shall be provided with temporary fencing and may consist of non-transparent fabric or PVC vertical slats which provide a visual barrier of all fenced area.

C. Signage shall be provided and attached to temporary fencing and shall include project emergency contact information.

PART 3 - EXECUTION

3.01 GENERAL

A. Install chain link fences and gates in accordance with ASTM F567, except as modified in this Section.

B. Provide necessary hardware for a complete fence and gate system.

3.02 POST SETTING

A. Driven posts are not acceptable.

B. Post hole depth shall be a minimum of three feet below finished grade.

C. Post holes shall be backfilled with concrete to two (2) inches above finished grade. The concrete shall have a crown to divert water away from the post. Where posts come in contact with concrete, they shall be coated with Koppers 300M or approved equal.

3.03 GATE INSTALLATION

A. Hang gates and adjust hardware so gates operate satisfactorily from both the open and closed positions and all latches operate freely.

3.04 FIELD QUALITY CONTROL

A. Demonstrate to the ENGINEER proper operation of the gates from both the open and closed position prior to final acceptance.

END OF SECTION

SECTION 02936

SODDING

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise indicated for the following:

1. Preparation of subsoil.

2. Placing topsoil.

3. Fertilizing.

4. Sod installation.

5. Maintenance.

1.02 RELATED SECTIONS

A. All of Division 1.

B. **Section 02210 – Grading.**

1.03 REFERENCES

A. FDOT - Florida Department of Transportation - Standard Specifications for Road and Bridge, Latest Edition.

1.04 QUALITY ASSURANCE

A. Sod Producer: Company specializing in sod production and harvesting with a minimum five (5) years of experience and certified by the State of Florida.

B. Installer: Company approved by the sod producer.

C. Sod: Minimum age of 18 months, with root development that will support its own weight, without tearing, when suspended vertically by holding the upper two (2) corners.

D. Submit sod certification for grass species and location of sod source.

E. The ENGINEER reserves the right to test, reject or approve all materials before application.

1.05 REGULATORY REQUIREMENTS

A. Comply with regulatory agencies for fertilizer.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Deliver products to site under provisions of **Section 01600 – Material and Equipment.**

B. Store and protect products under provisions of **Section 01600 – Material and Equipment.**

C. Deliver sod on pallets. Protect exposed roots from dehydration.

D. Do not deliver more sod than can be laid within 48 hours.

E. Deliver fertilizer in waterproof bags showing weight, chemical analysis, and name of manufacturer.

F. The CONTRACTOR shall furnish the ENGINEER invoices of all materials received in order that the minimum application rate of materials may be determined.

1.07 MAINTENANCE SERVICE

A. Maintain sodded areas immediately after placement until grass is well established and exhibits a vigorous growing condition.

PART 2 - PRODUCTS

2.01 MATERIALS

A. Sod:

1. Sod shall be ASPA approved grade, Argentine Bahia, Tifton Bermuda, Floritam, or St. Augustine to match existing or better as directed, with firm texture having a compacted growth and good root development.

2. Sod shall be absolutely true to varietal type, and free from weeds or other objectionable vegetation, fungus, insects and disease of any kind.

3. Cut sod in area not exceeding 24 inches by 24 inches with minimum one inch and maximum three inch of topsoil base.

4. The sod shall be planted as soon as possible after being harvested and shall be shaded and kept moist from the time of harvesting to the time it is planted.

B. Topsoil:

1. Excavated from site and free of weeds.

2. Topsoil to be minimum three (3) inches thick.

C. Fertilizer:

1. In accordance with FDOT 982-1.

D. Water:

1. Clean, fresh, and free of substances or matter, which could inhibit vigorous growth of grass.

PART 3 - EXECUTION

3.01 INSPECTION

A. Verify that prepared subsoil is ready to receive the work of this Section.

3.02 FERTILIZING

A. Apply fertilizer in accordance with manufacturer's instructions.

B. Apply after smooth raking of topsoil and prior to installation of sod.

C. Apply fertilizer no more than 48 hours before laying sod.

D. Mix thoroughly into upper two (2) inches of topsoil.

E. Lightly water to aid the dissipation of fertilizer.

3.03 LAYING SOD

A. Moisten prepared surface immediately prior to laying sod.

B. Lay sod tight with no open joints visible, and no overlapping; stagger end joints 12 inches minimum. Do not stretch or overlap sod pieces.

C. Stake sod with 1x2 stakes on all areas with slopes greater than one (1) vertical to five (5) horizontal.

D. Coordinate sod installation with irrigation system components.

3.04 MAINTENANCE

A. Water to prevent grass and soil from drying out.

B. Immediately replace sod in areas, which show deterioration or bare spots.

3.05 APPROXIMATE AREA TO BE SODDED

A. All construction areas disturbed by construction of the project except those areas receiving pavement or rock. CONTRACTOR is to take into account his anticipated ditch width and pit sizes at the surface when accounting for the cost of this work.

END OF SECTION

DIVISION 3

WELL CONSTRUCTION AND CONCRETE WORK

SECTION 03700

CONCRETE WORK

PART 1 - GENERAL

1.01 DESCRIPTION OF WORK

A. This section includes all cast-in-place, steel reinforced and pre-cast concrete work as shown on the drawings and described within these specifications.

B. The CONTRACTOR shall furnish all labor, materials, equipment and incidentals required to perform all cast-in-place concrete work, complete and in place.

C. The CONTRACTOR shall be responsible for providing a steel reinforced concrete pad design for the generator(s) which has been signed and sealed by a Professional Engineer licensed in the state of Florida. Design shall include the anchors for the generator to the concrete pad and shall meet the requirements of the Florida Building Code (2017). Refer to Section 16203.

1.02 QUALITY ASSURANCE

A. Codes and Standards: Comply with the provisions of the following codes, specifications and standards, except where more stringent requirements are shown or specified:

B. ACI 301 "Specifications for Structural Concrete for Buildings".

C. ACI 318 "Building Code Requirements for Reinforced Concrete".

D. ACI 347 "Recommended Practice for Concrete Formwork".

E. Concrete Reinforcing Steel Institute, "Manual of Standard Practice".

F. Workmanship: The CONTRACTOR is responsible for correction of concrete work which does not conform to the specified requirements, including strength, tolerances, and finishes. Correct deficient concrete as directed by the ENGINEER.

G. Concrete Testing Service: CONTRACTOR shall employ a testing laboratory for material evaluation tests and to perform sampling and testing of concrete during placement.

H. Tests, not specifically indicated to be done at the OWNER's expense, including the retesting of rejected materials and installed work, shall be done at the CONTRACTOR's expense.

I. Quality Control Testing During Construction:

1. Testing laboratory shall sample and test concrete for quality control during the placement of concrete as required by the drawings and specifications.

2. Test results will be reported in writing to the ENGINEER and the CONTRACTOR on the same day that tests are made.

3. Additional Tests: The testing service will make additional tests of in-place concrete when test results indicate the specified concrete strengths and other characteristics have not been attained in the structure, as directed by the ENGINEER. The testing service may conduct tests to determine adequacy of concrete by cored cylinders complying with ASTM C-42, or by other methods as directed. CONTRACTOR shall pay for such tests conducted, and any other additional testing as may be required, when unacceptable concrete is verified.

PART 2 - PRODUCTS

2.01 FORM MATERIALS

A. Forms: Unless otherwise shown or specified, construct formwork for exposed concrete surfaces with plywood, metal, metal-framed plywood faced or other acceptable panel type materials, to provide continuous, straight, smooth, exposed surfaces.

B. For Coatings: Provide commercial formulation form coating compounds that will not bond with, stain nor adversely affect concrete surfaces, and will not impair subsequent treatments of concrete surfaces to be cured with water or curing compound.

2.02 REINFORCING MATERIALS

A. Reinforcing Bar: ASTM A-615, Grade 60 deformed, free from oil, scale and rust and placed in accordance with the typical bending diagram and placing details of ACI standards and specifications.

B. Steel Wire: ASTM A-82, plain, cold-drawn steel, free from oil, scale and rust and placed in accordance with the typical placing details of ACI standards and specifications. Minimum lap shall be one space plus two (2) inches.

C. Welded Wire Fabric: ASTM A-185, flat mat welded steel wire fabric.

D. Supports for Reinforcement: Use wire bar type supports complying with CRSI recommendations, unless otherwise indicated. Wood, brick and other devices will not be acceptable.

2.03 CONCRETE MATERIALS

A. Portland Cement: ASTM C-150, Type I/II unless otherwise acceptable to ENGINEER.

B. Normal Weight Aggregates: ASTM C-33, and as herein specified. Provide aggregates from a single source for all exposed concrete.

C. Fine Aggregate: Clean, sharp, natural sand free from loam, clay, lumps or other deleterious substances.

D. Maximum Aggregate Size: Not larger than one (1) inches, nor ¾ of the minimum clear spacing between individual reinforcing bars or bundles of bars, except when approved otherwise by ENGINEER.

E. Water: Clean, fresh, and potable.

F. Air-Entraining Admixture: ASTM C-260.

G. Calcium Chloride: Calcium chloride for admixtures shall not be permitted.

H. Moisture Barrier: Polyethylene sheet not less than six (6) mils thick, ASTM E-154.

I. Moisture Retaining Cover: One (1) of the following complying with ASTM C-171.

1. Waterproof paper.

2. Polyethylene film.

3. Polyethylene coated burlap.

J. Membrane Forming Curing Compound: ASTM C-309 clear, unless other type acceptable to the ENGINEER.

K. Curing and Sealing Type: (For Horizontal Surfaces).

1. Dress and Seal: L & M Construction Chemicals.

2. Super Floor Coat: The Euclid Chemical Co.

3. Masterseal 66: Master Builders

4. DeKote 800: W.R. Grace & Co.

5. Kure-N-Seal 0800: Sonneborn/Contech.

L. Moisture Barrier: Provide six (6) mil polyethylene sheet, resistant to decay when tested in accordance with ASTM E-154.

2.04 PROPORTIONING AND DESIGN OF MIXES

A. Concrete shall be an approved mix design proportions to achieve a strength at 28 days of 4,000 psi with a plastic and workable mix. Water to cement ratio shall be 0.45 max. and slump range shall be 3.5" to 5".

B. Prepare design mixes for each type and strength of concrete in accordance with applicable provisions of ASTM C-94.

C. Proportion mixes by either laboratory trial batch or field experience methods, using materials to be employed on the project for each class of concrete required, complying with ACI 211.1.

D. Submit written reports to the ENGINEER of each proposed mix for each class of concrete at least 15 days prior to start of work. A number or code unique to that mix shall identify each mix design.

E. Design mixes to provide normal weight concrete with the 28 day psi compressive strength as indicated on drawings and within these specifications.

F. Admixtures: Use air entraining admixture in all exterior exposed concrete, unless otherwise indicated. Add air entraining admixture at the Manufacturer's prescribed rate to result in concrete at the point of placement having air content within the following limits:

1. All concrete three (3) percent to five (5) percent unless otherwise approved by ENGINEER.

G. Use admixtures for water reducing and set control (with written permission of ENGINEER).

2.05 CONCRETE MIXING

A. Ready-Mix Concrete: Comply with the requirements of ASTM C-94 and as herein specified.

2.06 CONCRETE TESTING

A. An independent testing laboratory shall perform the following tests on cast-in-place concrete.

1. Standard Test Method for slump of Portland cement concrete in accordance to ASTM C143.

2. Standard Test Method for compressive strength of cylindrical concrete specimens in accordance to ASTM C39.

B. A separate test shall be conducted for each class of concrete and for every 50 cubic yards (or fraction thereof), placed per day.

C. Required cylinder(s) quantities and test age are as follows:

1. 1 at 7 days.

2. 2 at 28 days.

3. 1 hold cylinder.

2.07 CHEMICAL ANCHORS

A. Chemical anchors shall be an epoxy polymer injection system, installed in accordance with the Manufacturer's instructions. Installers shall be trained by the Manufacturer's representative.

2.08 PRE-MOLDED EXPANSION JOINT MATERIAL AND SEALANT

A. Sealant material shall be Sonolastic NP-1 or Sikaflex-15 LM, or approved equal. Apply in strict conformance to manufacturer's instructions. Maximum depth, ½-inch.

B. Expansion joint material shall be resilient, non-extruding type premolded impregnated fiberboard complying with ASTM D-1751, FSHN-F-341, Type I and AASHTO M213.

C. Plumbing sleeves: Minimum sleeve spacing shall be two diameters, center to center of the larger sleeve or six (6) inches clear between sleeves, whichever is greater.

PART 3 - EXECUTION

3.01 GENERAL

A. Construct forms complying with ACI 347 to sizes, shapes, lines, and dimensions shown and to obtain accurate alignment, location, grades, level, and plumb work in finished structures.

B. Unless otherwise shown, Chamfer exposed corners and edges ¾-inches, using wood, metal, PVC, or rubber chamfer strips fabricated to produce uniform smooth lines and tight edge joints.

C. Form Ties: Factory fabricated, adjustable length, removable or snap off metal form ties, designed to prevent form deflection, and to prevent spalling concrete surfaces upon removal.

3.02 PLACING REINFORCEMENT

A. Accurately position, support and secure reinforcement against displacement by formwork, construction, or concrete placement operations. Locate and support reinforcing by metal chairs, runners, bolsters, spacers, and hangers, as required. Comply with ACI 301 and 318.

3.03 JOINTS

A. Construction Joints: Locate and install construction joints, which are not shown on the drawings, so as not to impair the strength and appearance of the structure, as acceptable to the ENGINEER.

B. Place construction joints as indicated on the structural drawings.

C. Isolation Joints in Slabs-On-Grade: Construct isolation joints at all points of contact between slabs on ground and vertical surfaces where shown on the structural drawings.

D. Control Joints in Slabs-on-Grade: Construct control joints in slabs-on-ground to form panels of patterns as shown. See typical detail on structural drawings.

E. Saw cuts shall be made as soon as possible after final troweling without dislodging aggregate, normally 12 hours.

F. Expansion Joints: Provide expansion joints as shown. Install premolded filler as specified.

3.04 INSTALLATION OF EMBEDDED ITEMS

A. General: Set and build into the work anchorage devices and other embedded items required for other work that is attached to, or supported by, cast-in-place concrete. Use setting drawings, diagrams, instructions, and directions provided by suppliers of the items to be attached thereto.

B. No penetrations shall be made in any structural members other than those located on these drawings without previous approval of the ENGINEER.

3.05 PREPARATION OF FORM SURFACES

A. Coat the contact surfaces of forms with a non-staining form coating compound before reinforcement is placed.

3.06 CONCRETE PLACEMENT

A. General: Comply with ACI 304 and as herein specified. Subgrades shall be inspected and approved before concrete is placed for concrete poured on grade. Forms and reinforcing shall be inspected and approved prior to concrete placement.

B. Consolidate placed concrete by mechanical vibrating equipment supplemented by hand spading, rodding or tamping. Use equipment and procedures for consolidation of concrete in accordance with the recommended practices of ACI 309, to suit the type of concrete and project conditions. The use of vibrators or other mechanical devices to move the concrete in the forms is not permitted. Concrete shall be deposited as near its final location as practical.

C. Hot Weather Placing: When hot weather conditions exist that would seriously impair the quality and strength of concrete, place concrete in compliance with ACI 305.

3.07 FINISH OF FORMED SURFACES

A. Rough Form Finish: For formed concrete surfaces not exposed to view in the finish work or by other construction, unless otherwise indicated. This is the concrete surface having the texture imparted by the form facing material used, with tie holes and defective areas repaired and patched and fins and other projections exceeding ¼-inches in height chipped off, defective areas, honeycomb and tie holes filled and repaired with cement grout.

B. Smooth Form Finish: For formed concrete surfaces exposed to view, or that area to be covered with a coating material applied directly to the concrete, or a covering material bonded to the concrete, such as waterproofing, damp-proofing, painting, or other similar system, to have the as-cast concrete surface obtained with selected form facing material, arranged orderly and symmetrically with a minimum of

seams. Repair and patch defective areas with all fins or other projections completely removed and smoothed, and all tie rod holes grouted flush, all honeycomb cut out and patched with grout.

C. Related Unformed Surfaces: At tops of walls, horizontal offsets and similar unformed surfaces occurring adjacent to formed surfaces, strike-off smooth and finish with a texture matching adjacent formed surfaces. Continue final surface treatment of formed surfaces uniformly across adjacent unformed surfaces, unless otherwise shown.

3.08 MONOLITHIC SLAB FINISHES

A. General: Comply with ACI 301 for the specified finish specification and methods. The use of jitterbugs for finishing slabs will not be permitted.

3.09 TYPE OF FINISHES AND TOLERANCES

A. Trowel Finish: For floors intended as walking surfaces or for reception of floor coverings. Class by tolerance 5/16 inches in 10'-0", ⅜-inches in 20'-0", and +/- ¾-inches total building.

B. Broom or Belt Finish: For sidewalks, steps, platforms, and ramps. Class by tolerance (5/16 inches 10'-0").

3.10 MOISTURE BARRIER

A. Where a moisture barrier is shown under concrete slabs on grade, install six (6) mil thick polyethylene sheets, with joints lapped and taped. Place moisture barrier three (3) inches below bottom elevation of slab, and place a three (3) inches thick, clean, sand bed over moisture barrier for slab placement.

3.11 CONCRETE CURING, SEALING AND PROTECTION

A. Start initial curing as soon as free water has disappeared from concrete surface after placing and finishing. Weather permitting, keep continuously moist for not less than 72 hours.

B. Begin final curing procedures immediately following initial curing and before concrete has dried. Continue final curing for at least seven (7) days in accordance with ACI 301 procedures. Avoid rapid drying through the end of final curing period.

C. Curing Methods: Perform curing of concrete by moisture retaining cover curing, by membrane curing, and by combinations thereof, as herein specified.

1. Provide Moisture Cover Curing as follows: Cover concrete surfaces with moisture retaining cover for curing concrete, placed in widest practicable width with sides and ends lapped at least three (3) inches and sealed by waterproof tape or adhesive. Immediately repair any holes or tears during curing period using cover material and waterproof tape.

2. Provide Membrane Curing to Slabs as Follows:

   a. Apply membrane forming curing compound to concrete surfaces as soon as final finishing operations are complete (within two [2] hours). Apply uniformly in continuous operation by power spray or roller in accordance with manufacturer's directions. Recoat areas, which are subjected to heavy rainfall within three (3) hours after initial application. Maintain continuity of coating and repair damage during curing period.

   b. Curing Formed Surfaces: Cure formed concrete surfaces by moist curing with forms in place for full curing period or until forms are removed. If forms are removed, continue curing by methods specified above, as applicable.

   c. Sealing Concrete Floors: Clean surfaces of all foreign material, oil and grease. Apply an additional coat of cure and seal material, same as used to cure concrete surfaces to all floors not receiving other finish. Apply at rate recommended by manufacturer.

3.12 REMOVAL OF FORMS

A. Comply with ACI 301 and 318 and structural notes for removal of forms.

3.13 CONCRETE SURFACE REPAIRS

A. Patching Defective Areas: Repair and patch defective areas with cement mortar immediately after removal of forms, but only when acceptable to ENGINEER.

DIVISION 16

ELECTRICAL

SECTION 16000

ELECTRICAL GENERAL REQUIREMENTS

PART 1 GENERAL

1.01 RELATED DOCUMENTS

A. The general provisions of the Contract, including General Conditions, apply to all the Work specified in the Electrical 16000 Sections.

1.02 LAWS, PERMITS, FEES AND NOTICES

A. Secure and pay all permits, fees and licenses necessary for the proper execution of the Work. Submit all notices and comply with all laws, ordinances, rules and regulations of any public agency bearing on the Work. CONTRACTOR shall be licensed Electrical CONTRACTOR in the county of construction.

1.03 DEPARTURES

A. If any departures from the Contract drawings or specifications are deemed necessary, details of such departures and the reasons therefore shall be submitted to the ENGINEER for advance written approval, prior to departure.

1.04 GUARANTEES

A. Furnish written guarantee covering all materials, workmanship, labor and equipment for a period of one (1) year from the date of acceptance as described in the Contract General Conditions.

B. The OWNER reserves the right to operate and use all materials and equipment failing to meet the requirements of the Contract documents until such unacceptable materials and equipment are replaced or repaired to the satisfaction of the ENGINEER.

1.05 AS-BUILT INFORMATION

A. A set of “red-lined” electrical drawings shall be carefully maintained at the job site. Actual conditions are to be put on the drawings in red on a daily basis so the drawings will continuously show locations and routes of cable trays, conduits, pull-boxes, circuit numbers, and other information required by the ENGINEER.

1.06 JOB SITE VISIT

A. Visit the project site before submitting a bid. Verify all dimensions shown and determine the characteristics of existing facilities which will affect performance of the Work, but which may not be shown on drawings or described within these specifications.

1.07 CLEANUP

A. Maintain a continuous cleanup during the progress of the Work and use appointed storage areas for supplies. The premises shall be kept free from accumulations of waste materials and rubbish.

1.08 CUTTING AND PATCHING

A. Cut and prepare all openings, chases and trenches required for the installation of equipment and materials. Repair, remodel and finish in strict conformance with the quality of workmanship and materials in the surroundings. Obtain written permission from the ENGINEER for any alterations to structural members before proceeding.

1.09 MAINTENANCE

A. Render all necessary measures to ensure complete protection and maintenance of all systems, materials and equipment prior to final acceptance. Any materials or equipment not properly maintained or protected to assure a factory new condition at the time of final acceptance shall be replaced immediately at no additional cost to the OWNER.

1.10 WATERPROOFING

A. Whenever any Work penetrates any waterproofing, seal and render the Work waterproof. All Work shall be accomplished so as not to void or diminish any waterproofing bond or guarantee.

1.11 TESTS

A. Conduct an operating test of equipment prior to the ENGINEER's approval. The equipment shall be demonstrated to operate in accordance with the requirements of these specifications. The tests shall be performed in the presence of the ENGINEER or an authorized representative. The electrical CONTRACTOR shall furnish all instruments, electricity and personnel required for the tests.

1.12 POWER SHUT DOWNS COORDINATION

A. CONTRACTOR shall coordinate at well sites and especially at lift station site any power shut downs to the station and control panel. All power shut downs shall be kept to a minimum, and in the case of the lift station bypass pumping may be necessary during any extended power outage.

1.13 SUMMARY OF ELECTRICAL WORK

A. Provide all labor, materials, tools, supplies, equipment and temporary utilities to complete the Work shown on the drawings and specified herein. All systems are to be completely installed and fully operational. Specifically, the Work includes, but is not necessarily limited to:

1. Provide demolition of existing raceway and wires from main disconnect to the existing control panel. Reuse the existing service, meter, main, control panel, raceways, pipe stand, and the like, see drawings and other specifications for other information.

2. Coordinate demolition work with the Owner.

3. Provide new raceway, wireway with Polaris taps, and conductors as called out on drawings.

4. Provide and install all the electrical equipment, equipment racks, panels, step down transformer, raceways, terminal boxes, power and control wiring.

5. Provide and install outdoor generator on generator pad, and ATS equipment. Generator with sub-base fuel tank. Generator shall be properly bolted down into generator concrete slab and isolation rubber pads, 1/2” thick minimum shall be used at each tiedown or bolting point to isolate the generator bottom (fuel tank) from slab and humidity and water to prevent corrosion of tank.

6. Provide grounding of the equipment.

7. Provide testing and startup of the pump station equipment, including the ATS and generator.

8. At lift station and well sites equipped with RTU equipment, provide raceway and wiring for status and alarms of proposed ATS switch and generator equipment from existing RTU equipment. See drawings. Coordinate with Owner’s RTU programmer to add these signals to RTU.

9. Provide all as-built to the drawings and closing documents.

1.14 CODES AND STANDARDS

A. General Applicable provisions of the following codes and standards and other codes and standards required by the State of Florida and local jurisdictions are hereby imposed on a general basis for electrical Work (in addition to specific applications specified by individual Work sections of these specifications):

1. U.L.: Electrical materials shall be approved by Underwriters' Laboratories, Inc. This applies to materials which are covered by U.L. standards. Factory applied labels are required.

2. National Electrical Code.

3. OSHA: Standards of the Occupational Safety and Health Administration are to be complied with.

4. NEMA: National Electrical Manufacturers Association Standards are to be met wherever standards have been established by that agency and proof is specifically required with material submittals for switchboards, motor control centers, panelboards, cable trays, motors, switches, circuit breakers and fuses.

5. ANSI: America National Standards Institute

6. NESC: National Electrical Safety Code

7. Any and all local codes.

1.15 ELECTRICAL TEMPORARY FACILITIES

A. The electrical CONTRACTOR shall include in his bid the cost of furnishing, installing, maintaining and removing all materials and equipment required to provide temporary light and power to perform his Work during construction and until Work is completed.

B. Safety

1. All reasonable safety requirements shall be observed to protect workers and the public from shock and fire hazards. Ground fault interrupters shall be employed in accordance with codes.

2. Ground wires are required in all circuits. Ground poles are required on all outlets. All metallic cases shall be grounded.

3. Raintight cabinets shall be used for all equipment employed in wet areas.

1.16 EXCAVATING FOR ELECTRICAL WORK

A. General – Not needed

1.17 ELECTRICAL SUBMITTALS

A. Submittals for Approval

1. Refer to Contract General Conditions for additional instructions on the General Conditions and this section, the more stringent requirements shall apply.

2. Shop Drawings and Manufacturer's data sheets are required for all electrical materials.

3. Submittals will not be accepted for partial systems. Submit all materials for each specification section at one time. Submittals must be arranged, correlated, indexed and bound in orderly sets for ease of review.

4. Samples are to be supplied for any substitute as requested by the ENGINEER.

5. The following numbers of copies are required:

Shop drawings	6 sets
Samples	1 each
Manufacturer's data	6 sets
Certifications	6 sets
Test reports	6 sets
Warranties/Guarantees	6 sets

6. Submit shop drawings, Manufacturer's data and certifications on all items of electrical Work prior to the time such equipment and materials are to be ordered. Order no equipment or materials without approval from the ENGINEER. Submittals will not be accepted for partial system submittals; submit all data at one time. Submittals will be promptly returned, approved, approved as noted, or not approved. Items "approved as noted" must be changed to comply with the ENGINEER's comments and need not be resubmitted for "approved" status.

Items “not approved” are not suitable, requiring complete new submittals.

7. Time delays caused by rejection of submittals are not cause for extra charges to OWNER or time extensions. CONTRACTOR shall be responsible for investigating existing systems or shop drawings in order to fully integrate the new equipment into the system. Adequate shop drawings may or may not exist for all existing systems.

B. Operation and Maintenance Manuals

1. Submit to the ENGINEER five (5) copies of all Manufacturer’s service installation and operation manuals, instructions and bulletins. These manuals shall be subject to review of the ENGINEER. If acceptable they shall be forwarded to the OWNER. If not acceptable they shall be returned to the CONTRACTOR for revision and resubmittal. Manuals shall contain, but not be limited to, the following:

a. Brief description of system and basic features.

b. Manufacturer’s name and model number for all components in the system.

c. List of local factory authorized service companies.

d. Operating instructions.

e. Maintenance instructions

f. Trouble shooting instructions

g. Manufacturer’s literature describing each piece of equipment.

h. Power and control wiring diagrams

i. Parts lists

1.18 ELECTRICAL PRODUCTS

A. Standards Products

1. Unless otherwise indicated in writing by the ENGINEER, the products to be furnished under this specification shall be the Manufacturer’s latest design. Units of equipment and components of the same purpose and rating shall be

interchangeable throughout the project. All products shall be newly manufactured. Defective equipment or equipment damaged in the course of installation or test, shall be replaced or repaired in a manner meeting with the approval of the ENGINEER at no additional expense to the OWNER.

B. Delivery, Storage and Handling

1. Deliver products to project properly identified with names, model numbers, types, grades, compliance labels and similar information needed for distinct identification; adequately packaged or protected to prevent deterioration during shipment, storage and handling. Store in a dry, well ventilated, indoor space, except where prepared and protected by the Manufacturer specifically for exterior instructions for storage locations.

C. Substitutions

1. Comply with instructions in the Contract General Conditions and Special Conditions and obtain pre-approval of the ENGINEER regarding substitutions.

1.19 SKILLED ELECTRICAL CRAFTSMEN

A. CONTRACTOR shall employ and staff the project with skilled Craftsmen experienced in the project requirements.

B. As a minimum, a Licensed Journeyman Electrician shall be present on the project at all times.

C. Other skilled persons shall be present as the project requirements dictate including Manufacturers representatives, start-up technicians, ENGINEERs, etc.

1.20 DRAWINGS AND SPECIFICATIONS

A. Refer to the drawings for additional requirements. There are requirements indicated on the drawings which are not indicated in the specification.

B. Bidders, suppliers, equipment vendors, General CONTRACTOR, Sub Contractors and other similar entities are required to read all the Contract documents including drawings and specifications.

1.21 SCHEMATIC NATURE

A. Plan views are schematic in nature and meant to show the schematic arrangement of equipment and conduit.

B. CONTRACTOR shall provide the OWNER/ENGINEER with an 11 x 17 (min) drawing (to scale) of the final layout of the equipment and conduit routing for approval. This drawing shall include measurements for all NEC required clearances and separations for equipment and conduit. Refer to other spec sections for conduit routing requirements.

1.22 APPROVED SHOP DRAWINGS

A. Use approved shop drawings for lay out of equipment. The Contract documents will vary from the shop drawings. Inform the ENGINEER immediately if there are lay out issues or inadequate space for equipment or clearances. Land conduits in openings of enclosures per the approved shop drawings, do not use the Contract drawings.

B. Housekeeping pads, equipment racks and the like shall be based on the approved shop drawings.

1.23 CLEARANCES

A. It shall be the CONTRACTOR's responsibility to meet N.E.C. clearances about equipment.

1.24 ROUTING

A. Conduit routing is schematic in nature. Conduit routing is shown for clarity on the Contract drawings. See other spec sections for additional conduit routing requirements.

1.25 FUTURE FACILITIES

A. Where future facilities are indicated, conduit routing shall account for such facilities.

B. Where conduits are installed as spares or for future equipment, these conduits shall include pull string, any conduits installed exposed along a concrete pad or slab, shall be capped .

1.26 DRAWINGS FURNISHED BY CONTRACTOR

A. OWNER shall be provided all CONTRACTOR furnished drawings. Such drawings include, but are not limited to: Control panels, MCC.s, switch boards, instrumentation details, redline mark-up of the Contract drawing and the like.

B. Drawings shall be furnished for review and approval. No materials shall be provided without the ENGINEER's approval.

C. Final drawings shall be furnished or as field modified accounting for any changes made during start up.

1.27 HOMERUNS

A. CONTRACTOR shall coordinate home runs between plan views. Where any conduit is shown in any plan view it shall be installed the entire length may be required.

PART 2 PRODUCTS (NOT USED)

PART 3 EXECUTION (NOT USED)

END OF SECTION

This page intentionally left blank.

SECTION 16050

BASIC MATERIALS AND METHODS

PART 1 GENERAL

1.01 SUBMITTALS

A. Submit data sheets on all items per Section 16000.

1.02 CODES AND STANDARDS

A. General applicable provisions of the following codes and standards and other codes and standards required by the State of Florida and local jurisdictions are hereby imposed on a general basis for electrical Work (in addition to specific applications specified by individual Work sections of these specifications):

1. U.L.: Electrical materials shall be approved by the Underwriters' Laboratories, Inc. This applies to materials which are covered by U.L. standards. Factory applied labels are required.

2. NEC: National Electrical Code

3. OSHA: Standard of the Occupational Safety and Health Administration are to be complied with.

4. NEMA: National Electrical Manufacturers Association Standards are to be met wherever standards have been established by that agency, and proof is specifically required with material submittals for switchboards, motor control centers, panelboards, cable trays, motors, switches, circuit breakers, and fuses.

5. ANSI: American National Standards Institute

6. NESC: National Electrical Safety Code

PART 2 PRODUCTS

2.01 GROUNDING MATERIALS

A. All ground rods shall be 20 foot 5/8" copperclad, unless otherwise indicated.

B. Around wires shall be soft drawn copper sized per National Electrical Code, unless otherwise indicated.

2.02 CONDUIT

A. PVC Conduit

1. PVC conduit shall be Schedule 80 or Schedule 40 unless otherwise noted and shall be U.L. approved. Comply with Federal Spec WC-1094 and NEMA TC-1.

B. Flexible Conduit

1. All flexible conduits shall be liquidtight, made of corrosion resistant plated steel with extruded polyvinyl covering and watertight connectors.

C. Refer to schedule in drawing for location requirements.

2.03 CABLE, WIRE AND CONNECTORS

A. 600 Volt Power Wiring

1. Individual conductors shall be rated for 600 volts and shall meet the requirements below:

a. Conductors shall be stranded.

b. All wire shall be brought to the job in unbroken packages and shall bear the date of manufacturing; not older than 12 months.

c. Type of wire shall be THWN except where required otherwise by the Contract drawings.

d. No wire smaller than No. 12 gauge shall be used unless specifically indicated.

e. Conductor metal shall be copper.

f. All conductors shall be meggered after installation. Megger testing shall exceed 50 mega ohms.

2. Multi-conductor cables shall be type TC UL 1277 THWN, PVC jacketed 600V with conductor and quantities as indicated.

B. Instrumentation and Control Cable

1. Process instrumentation wire shall be 16 gauge twisted pair, 600 V., aluminum tape shielded, polyvinyl chloride jacketed, as manufactured by the American Insulated Wire Co., Eaton Corp., or equal. Multiconductor cables with individually shielded twisted pairs shall be installed where indicated.

2. Multiconductor control cable shall be stranded 14 gauge, 600 V. THWN insulated overall shielded with PVC jacket, as manufactured by the American Insulated Wire Co., Eaton Corp., or equal.

2.04 TERMINATIONS AND SPLICES (600 VOLTS AND LESS)

A. Terminations of power cable shall be by means of U.L. approved connectors. All connectors shall meet U.L. 486B and shall be compatible with the conductor material.

B. Terminate all control and instrumentation cable with screw-clamp type terminal blocks.

C. Splicing of power, control, or instrumentation wiring will not be allowed except by written approval of the ENGINEER. Where splicing is allowed, splices shall be made with approved compression connectors, and splices shall be made waterproof regardless of location.

2.05 BOXES

A. Boxes for wiring devices, switches and receptacles installed outdoors shall be weatherproof fiberglass with polycarbonate cover plates, or stainless steel 316.

2.06 PULL BOXES AND SPLICE BOXES

A. Location

1. Units used outdoor or in a damp or corrosive environment shall be 316 ss or fiberglass unless otherwise indicated on plans.

2. Units used indoors in dry and clean A/C environments shall be NEMA 1.

B. Size

1. Units shall be sized per NEC as minimum.

C. Required Units

1. Plans depict minimum requirements. Additional units shall be provided as may be required to complete raceway systems.

2.07 MOUNTING AND SUPPORTING ELECTRICAL EQUIPMENT

A. Furnish and install all supports, hangers, and inserts required to mount fixtures, conduits, cables, pull boxes, and other equipment.

B. Support system used indoors in clean, dry and air conditioned areas shall be galvanized steel. All other areas shall be 316 ss with ss fasteners.

C. Perforated straps and wires are not permitted for supporting electrical devices. Anchors shall be of approved types.

D. All supports, hangers, hardware, etc. used outdoors or in in non-air-conditioned indoor areas or in hazardous areas shall be non-ferrous, corrosion resistant or 316 stainless steel. Supports shall be selected to avoid galvanic reactions. Support devices shall be submitted for approval.

E. Provide trapeze, bridge systems or wall bracketed cantilevered system to support the raceway system.

F. Spacing of support systems shall be per NEC. Provide spacing of conduits according to the NEC and the materials used. For PVC conduit, refer to NEC table 347-8.

G. Plans depict minimum requirements. Provide additional units as required to complete raceway system.

2.08 DUCT SEAL

A. Provide Garvin Industries' duct seal or an approved equal

B. Provide and install duct seal at all conduit ends for all new conduit installations, including wetwell and valve vault.

C. Duct seal shall be used to seal all penetrations at junction boxes, control panels, RTU enclosures, terminal boxes, starter enclosures, timers, MCC equipment, panelboards and the like, It shall be a permanently soft, non toxic compound. It shall also not affect other plastic materials or corrode metals.

PART 3 EXECUTION

3.01 GROUNDING

A. Provide ground system as indicated on the drawings and as required by the National Electrical Code.

B. All raceways require grounding conductors. Metallic raceways are not adequate grounding paths. Bonding conductors through the raceway systems shall be continuous from main switch ground buses to panel ground bars of the panelboards, and from panel grounding bars of panelboards and motor control centers to branch circuit outlets, motors, lights, etc. THESE GROUND CONDUCTORS ARE REQUIRED THROUGHOUT THE PROJECT REGARDLESS OF WHETHER CONDUIT RUNS SHOW GROUND CONDUCTORS ON THE DRAWINGS.

C. All connections made below grade shall be of the exothermic type.

D. The grounding system test shall not exceed a 48 hour span dry resistance of 10 ohms. Additional grounding to meet this requirement shall be installed at no extra cost. Grounding and bonding connections shall not be painted.

3.02 CONDUIT

A. Locations:

Conduits shall be used as follows:

1. Refer to schedule on drawings.

B. Installation

1. Conduits subjected to rough handling or usage shall be removed from the premises.

2. Conduits must be kept dry and free of water or debris with approved pipe plugs or caps. Care shall be given that plugs or caps be installed before pouring of concrete.

3. Where conduits pass through exterior concrete walls or fittings below grade, the entrances shall be made watertight.

4. Infurred ceilings, conduit runs shall be supported from structure, not furring.

5. Conduits entering panelboards, pull boxes, or outlet boxes shall be secured in place by galvanized locknuts and bushings, one (1) locknut outside and one (1) locknut inside of box with bushing on conduit end. The locknuts shall be tightened against the box without deforming the box. Bushings shall be of the insulating type.

6. Field conduit bends shall be made with standard tools and equipment manufactured especially for conduit bending.

7. Where embedded conduits cross expansion joints, furnish and install offset expansion joints or sliding expansion joints. Sliding expansion joints shall be made with straps and clamps.

8. Exposed runs of conduits shall be installed with runs parallel or perpendicular to walls, structural members or intersections of vertical planes and ceilings, with right angle turns consisting of symmetrical bends. No attempts are made in plans to show required pull boxes, gutters, etc. necessary for the construction of the raceway system but the CONTRACTOR shall provide these raceways as may be required.

9. Conduits in structural slabs shall be placed between the upper and the lower layers of reinforcing steel, requiring careful bending of conduits. Conduits embedded in concrete slabs shall be spaced not less than eight (8) inches on centers or as widely spaced as possible where they converge at panels or junction boxes. Conduits running parallel to slab supports, such as beams, columns and structural walls shall be installed not less than 12 inches from such supporting elements. To prevent displacement during concrete pour, saddle supports for conduit, outlet boxes, junction boxes, inserts, etc., shall be secured.

10. Conduit runs shall always be concealed except where indicated on plans.

11. Pull lines shall be installed in all empty conduits. All pull wires shall be identified with conduit number at each end.

12. Where conduits are run individually, they shall be supported by approved pipe straps secured by means of toggle bolts or tapcons on hollow masonry; tapcons on concrete or solid masonry; machine screws or bolts on metal surfaces and wood screws on wood construction. The use of perforated straps or wires will not be permitted.

13. Wire shall not be installed until all Work of any nature that may cause damage is completed, including pouring of concrete. Mechanical means shall not be used in pulling in wires No. 8 or smaller.

14. Underground conduits not under concrete slabs are to be buried at least two (2) feet below finished grade for circuits rated 600 volts or less, except under traffic areas where motor vehicles may cross. Under traffic areas, conduits are to be buried at least three (3) feet below finished grade.

15. All conduits shall be cleaned by pulling a brush swab through before installing cables.

16. All conduits shall be sealed at each end with electrical putty. Special care shall be taken at all equipment where entrance of moisture could be detrimental to equipment. Approved backing gauze is required prior to the installation of conduit putty.

17. A maximum of two (2) feet of flexible conduit shall be used at connections of all motors, transformers, motor operated valve and gates, instruments and other items of equipment where vibration is present. It shall be supported where required with stainless steel bands.

20. PVC conduit shall be supported to walls and slabs using carlon snap strap conduit wall hangers. Two hole PVC conduit clamps shall not be permitted.

3.03 WIRES, CABLES AND CONNECTIONS

A. Cables pulled into conduits shall be pulled using pulling eyes attached to conductors.

B. Shields shall be grounded at only one termination point.

3.04 BOXES

A. Installation of boxes shall be in accordance with the National Electrical Code requirements.

B. Boxes shall be mounted plumb and level in accessible locations and mounting shall be secure, vibration resistant and galvanically compatible. Hardware shall be used that is specifically intended for the purpose. When mounted in corrosive, damp or wet locations, stainless steel hardware shall be utilized.

3.05 WIRING DEVICES

A. Wiring devices shall be installed in device boxes approved for the application. All connections shall be made with screw terminals. Wiring devices shall be Leviton or approved equal.

B. Wire devices on UPS systems shall be isolated ground, colored orange.

C. Cover plates shall be provided as follows except as otherwise noted.

1. Interior finished area – brushed aluminum

2. Wet areas – gasketed plastic with flip cover.

D. Receptacles installed outdoors, below grade, or in areas other than clean and dry environments shall be GFI and weatherproof. Receptacles shall be weatherproof with cords plugged in.

E. All receptacles shall be GFI protected.

3.06 SUPPORTING DEVICES

A. All items shall be supported from the structural portion of the building and studs, except standard ceiling mounted lighting fixtures and small devices may be supported from ceiling system where permitted by the ENGINEER. However, no sagging of the ceiling will be permitted. Supports and hangers shall be types approved by Underwriters' Laboratories.

B. All floor-mounted devices (switchboards, large control panels, motor control centers, transformers, etc.) shall be securely anchored to the floors. Where recommendations are made by Manufacturer, these recommendations shall be followed.

3.07 CLEANING

A. All electrical equipment enclosures shall be thoroughly cleaned before acceptable by the OWNER. As a minimum, CONTRACTOR shall remove all debris including stripped wire insulation, dirt, and debris.

END OF SECTION

SECTION 16203

GENERATOR, WEATHER PROOF ENCLOSED, WITH SUB BASE TANK REACH-IN

GENERATOR SPECIFICATIONS

A. Work included:

1. All of the equipment described in this section shall be supplied by a single equipment Supplier regularly engaged in that business. The CONTRACTOR shall provide and install the Generator and ATS switch as provided by an approved Generator Vendor. The Contractor shall be responsible for coordinating with the Equipment Supplier for the delivery, storage and release of equipment.

2. The Contractor shall provide all connections, electrical terminations, installation, piping, fuel, liquids, and all other mechanical and electrical equipment necessary for a complete emergency power system. This installation shall include the proper tie down and bolting of the generator package with the sub-base fuel tank onto the concrete slab. All necessary equipment and accessories as specified shall be provided and any additional equipment required for a completely functional system shall be supplied.

3. The Supplier shall provide the unit completely assembled. The Contractor shall handle, store, install and make all connections to the equipment.

4. Generator vendor shall supply generator unit in a weatherproof and sound attenuated enclosure with a 500 gallon diesel sub-base fuel tank that meets UL-142 double wall tank requirements.

6. The Contractor shall conduct start up testing and commissioning of the unit. Include a 4 hour 100% generator load bank test.

7. The generator vendor shall be Tradewinds Corporation.

8. The outdoor rated unit shall be a Tier 3, standby emergency use power generator with digital controller, sound attenuated enclosure

CODES

A. All equipment shall be provided per the requirements of the following codes as applicable for the intended use and installation.

1. NFPA 70, latest edition (National Electrical Code).

2. NFPA 110, Emergency and Standby Power Systems, latest edition.

3. UL2200, the complete generator set shall be UL listed.

4. BOCA, Building Officials and Code Administration.

5. The Florida Building Code (2017 edition).

SUBMITTALS

A. Provide 6 copies of shop drawings. As a minimum include:

1. Engine manufacturer, model number, power output parameters, plans and elevations of the units, entrance points for power, control and fuel, storage and foundation requirements.

2. Engine Generator/Exciter control cubical.

3. Fuel consumption rate curves at ¼, 2/4, ¾, 4/4 loads.

4. Exhaust mufflers and vibration isolators.

5. Battery charger, batteries and battery racks.

6. Dual fuel piping with regulator and diaphragm as required.

7. Cooling water requirements of radiator.

8. Engine cooling air requirements and radiator fan capacity.

9. Electrical diagrams including schematic and interconnection wiring diagrams for all equipment to be provided.

10. Legends for all devices on all diagrams.

11. Sequence of operation, explanations of all portions of schematic wiring diagrams.

12. Provide load calculations including starting and running kVA.

13. Transient voltage response calculation, no voltage transient shall dip below 25%.

14. Enclosure.

15. Registered Engineer's designed steel reinforced concrete pad.

16. Provide installation instruction and details.

17. Provide signed and sealed drawings by a Florida registered engineer verifying that the generator set and its enclosure meet the wind loading requirements of ASCE 7.

18. Three sets of O&M manuals shall be provided.

WARRANTY

A. Equipment furnished under this section shall be guaranteed against defective parts and workmanship under terms of the manufacturer's and dealer's standard warranty. But, in no event shall it be for a period of less than two (2) years from the date of the Owner's acceptance of the unit.

ALTERNATOR

A. The AC generator shall be synchronous, four pole, 2/3 pitch, revolving field, drip-proof construction, single pre-lubricated sealed bearing, air cooled by a direct drive centrifugal blower fan, and directly connected to the engine with flexible drive disc. All insulation system components shall meet NEMA MG1 temperature limits for Class H insulation system. Actual temperature rise measured by resistance method at full load shall not exceed 105 degrees Centrigrade.

B. The generator shall be capable of delivering rated output (kVA) at rated frequency and power factor at any voltage not more than 5 percent above or below rated voltage.

C. A permanent magnet generator (PMG) shall be included to provide a reliable source of excitation power for optimum motor starting and short circuit performance. The PMG and controls shall be capable of sustaining circuit performance. The PMG and controls shall be capable of sustaining and regulating current supplied to a single phase or three phase fault at approximately 300% of rated current for not more than 10 seconds.

D. The subtransient reactance of the alternator shall not exceed 12 percent based on the standby rating of the generator set.

E. Space Heater – Alternator shall be provided with 120V, 200W max. space heater interlocked with generator run relay.

F. Alternator shall be random wound.

G. Provide lightning arrestor and surge capacitor for the generator.

COOLING SYSTEM

A. Radiator – An engine mounted radiator with blower type fan shall be sized to maintain safe operation at 122 degrees Fahrenheit maximum ambient temperature.

B. The engine cooling system shall be pretreated by the engine supplier for the inhibiting of internal corrosion.

C. The radiator shall exhaust through the enclosure.

EXHAUST SILENCER

A. Exhaust Silencer – Critical type critical grade silencer, muffler companion flanges, and flexible braided stainless steel exhaust fittings properly sized shall be furnished according to the manufacturer's recommendations. A silencer rain cap with counter weight shall be provided.

B. Silencer shall be located within the enclosure.

C. Exhaust silencer and flex shall have insulation blankets installed.

AUTOMATIC STARTING SYSTEM

A. Starting Motor – A DC electric starting system with positive engagement drive shall be provided. The motor voltage shall be as recommended by the engine manufacturer.

B. Automatic control – Fully automatic generator start/stop controls in the generator control panel shall be provided. Controls shall provide shutdowns for alarm conditions listed in this specification. Controls shall include a 30 second cranking cycle with lock out.

C. Batteries – A lead acid storage battery set of the heavy duty special starting type shall be provided. Battery voltage shall be compatible with the starting system. Battery set shall be rated for no less than 172 amp hours. Free standing corrosion resistant battery racks and necessary cables shall be provided. Batteries shall be unit mounted.

D. Battery Charger – Current limiting battery charger shall be furnished to automatically recharge the batteries. Charger shall be the float charging type furnished to properly charge the batteries. It shall include overload protection, silicone diode full wave rectifiers, voltage surge suppressor, DC ampmeter, DC voltmeter, fused AC input. Input power shall be 120V single phase. A battery charger fail alarm contact shall be provided. Charger shall be unit mounted.

GENERATOR CONTROL PANEL

A. Generator Set Control

1. The generator set shall be provided with a microprocessor-based control system that is designed to provide automatic starting, monitoring and control functions for the generator set. The control system shall also be designed to allow local monitoring and control of the generator set.

2. Provide form "A" contacts for each alarm and shutdown signal.

B. Unit shall work with ATS. All labor and material shall be provided to coordinate the installation with the ATS, refer to ATS specifications.

GENERATOR RATINGS

A. The generators shall be a minimum kW rating as called out on the drawings, For Well 11, Well 15 and Cresthaven Lift Station provide a 277/480V 3-phase, 0.8 PF. The Generator unit shall start and operate the following loads with a maximum voltage dip of 25%. Supplier shall submit load calculations showing the starting and running of the following generator load, approval of shop drawing on generator unit will depend on this information being included also.

LOAD	START METHOD	HP/KW	STEP
Cresthaven Lift Station 9 Generator Loads			
LS Cresthaven controls	NA	7.5	1
LS Cresthaven pump 1	VFD Starter	30	1
LS Cresthaven Pump 2	VFD Starter	30	2
LS Cresthaven Pump 3	VFD Starter	30	3

Note: Pump loads for pumps 1, 2 and 3 shall be started staggered/sequentially.

Well 11 Generator Loads			
Well 11 controls	NA	7.5	1
Well 11 Pump	VFD Starter	75	2

Well 15 Generator Loads

Well 15 controls	NA	7.5	1
Well 15 Pump VFD Starter		40	2

MAIN CIRCUIT BREAKER

A. Unit shall be provided with a main line circuit breaker molded case, interrupting rating exceeding the generator output. Circuit Breakers shall be rated per NEC for fire pump application.

B. The generator breaker shall be located inside the generator enclosure and the access door shall allow for the full NEC clearance requirements of the breaker and its removable cover.

FLUIDS

A. Unit shall be provided with all fluids, fully fuelled and ready for immediate use.

GENERATOR ENCLOSURE

A. A weather resistant, sound attenuated, pre-painted, maintenance free steel enclosure designed as a reach-in to mount to sub-base tank shall be provided to house the engine/generator and accessories. It shall consist of a roof, side walls, and end walls of one-piece, stressed skin, semi-monocoque construction. Enclosure shall be as manufactured by Tradewinds Corporation or an approved equal.

B. The system shall include a cooling and combustion air inlet silencer system, an equipment enclosure section, and a cooling air discharge silencer section. It shall be sound attenuated with a max of 70 dba at 7 meters.

D. Insulation in walls and roof shall be semi-rigid, thermo-acoustic, thickness as required to meet the noise criteria specified. Lining shall be perforated, mill-finish aluminum. Self-adhesive foam and loose or bat-type insulating materials will not be accepted.

E. Lifting provisions shall be provided at or near the enclosure roof, with capacity suitable for rigging the enclosure. Estimated enclosure weight shall be provided on submittal drawings.

F. Personnel access doors shall be fabricated of the same materials as the enclosure walls. They shall be reinforced for rigidity, gasketed, and set in a welded frame to ensure proper operation. Handles shall be key lockable, all doors keyed alike.

Doors and/or hinged louver panels should be provided in sufficient quantity to allow access for all necessary maintenance and operation, coordinated with generator set manufacturer. All handles, hinges and hardware shall be stainless steel.

G. Air handling shall be as follows: Air will enter through removable hood(s) or a vertical plenum. Intake openings shall be screened to prevent the entrance of rodents and bugs. Radiator discharge will be through a gravity operated damper and into a hood or vertical plenum, as dictated by airflow. The system shall be designed for 0.5" w.c. static pressure drop maximum through enclosure.

H. Enclosure manufacturer shall provide all necessary hardware to internally mount the specified exhaust silencer(s) and maintain the weather resistant integrity of the system.

J. LED interior lighting shall be provided, lighting shall be protected mesh/plastic globe lens; lights shall operate from weather proof type toggle switches; the light switch shall be located at each door location, powered from batteries.

CLEARANCES

A. The manufacturer shall locate equipment inside enclosure so all NEC required clearances shall be met in front of the generator main circuit breaker, panelboard, and battery charger.

WIND LOAD REQUIREMENTS

A. The Contractor shall provide signed and sealed drawings from a Registered Florida engineer confirming that the generator set and its enclosure meets the wind load requirements of the Florida Building Code, and ASCE 7.

GENERATOR CONCRETE PAD

A. The Contractor shall provide signed and sealed drawings from a Registered Florida engineer detailing the steel reinforced concrete pad for the generator. The drawings show the minimum dimensions of this concrete pad.

TESTS

A. The unit shall be tested at rated frequency and voltage.

B. Following installation, the following tests shall be performed by the system manufacturer's local dealer representative(s) in the presence of the Owner's Engineer or designated appointee:

1. Pre-start checks:

    a. Oil level

    b. Water level

    c. fuel pressure from gas line/regulator

    d. Battery connection and charge condition

    e. Engine to control interconnects

    f. Engine generator intake/exhaust obstructions

C. Supplier shall provide onsite operation tests

1. Load – One hour operation at 80% of full load rating. Two hours of operation at 100% of full load rating. After the first half hour stabilization period at full load, the following shall be recorded at fifteen minute intervals:

    a. Voltage, amps and frequency.

    b. Fuel pressure, oil pressure and water temperature.

    c. Exhaust gas temperature at engine exhaust outlet.

    d. Ambient temperature

    e. Kilowatts

    f. Power factor

    g. kVARS

    h. Generator temperature

2. Test shall utilize resistive load banks for the full load. Minimum load shall be equal to the nameplate rating of the engine/generator set in kW. Generator supplier shall supply all load banks equipment necessary for connecting generator to load banks. Supplier shall provide all labor and material to perform test.

3. Proper operation of controls, engine shutdown and safety devices shall be demonstrated to the Owner and its personnel. Provide a minimum of 2 hours training.

SECTION 16250

AUTOMATIC TRANSFER SWITCH

PART 1 GENERAL

1.01 Section includes

A. Automatic transfer switches (ATS) with delayed transition. This section is provided for the Contractor to provide and install the ATS switch and related raceways and controls along with mounting hardware.

1.02 References

A. Transfer switches shall be designed and manufactured to the latest revision of UL-1008 and shall be provided with a UL label.

1.03 Submittals

A. Submittals shall be provided in accordance with the general conditions but not less than six (6) copies.

B. Detailed fully engineered drawings shall be provided. Standard product data sheet will be rejected.

1.04 Qualifications

A. To be considered for approval, a manufacturer shall be specialized in manufacturing products specified in this Section with a minimum of ten (10) years documented experience.

1.05 Warranty

A. Manufacturer shall warrant specified equipment to be free from defects in materials and workmanship for one (1) year from date of installation.

1.06 Integration

A. Units shall be provided to fully integrate with the standby generator system. Coordination shall be required of the generator vendor.

B. See the drawings for additional requirements.

PART 2 PRODUCTS

2.01 Model

A. Model shall be Eaton, Tradewinds, Cutler Hammer, Asco, Lake Shore or an approved equal.

B. The switch shall be of the automatic power sensing, delayed transition type. The switch shall be UL approved standard 1008, rated to carry full name plate current at all times. A manual handle shall be provided for emergency operation from the deadfront inner panel.

C. Provide pilot devices or pilot LED.s.

D. Unit shall have dead front inner panel for manual operation.

E. Units shall be rated NEMA 4X 316 SS. ATS Minimum Features:

1. Voltage sensing on all three phases on normal and emergency sources with automatic low voltage and phase loss detection. Adjustable over/under frequency sensor shall be provided on the emergency source.

2. Adjustable time delay after line failure before engine start, 0-5 minutes.

3. Automatic transfer to generator when voltage is present.

4. Adjustable time delay on retransfer when normal power is available, 2-30 minutes. Push button to cancel time delay on return to normal.

5. Adjustable time delay for engine running unloaded after transfer to normal source, 2-30 minutes.

6. 4-Pilot lights or LED.s

a. Green for switch in normal position.

b. Red for switch in emergency position.

c. Green for normal power available.

d. Red for emergency power available.

7. 4-Position selector switch, maintained, front door mounted on outside or keypad

    a. Off – Switch position remains constant; generator shall not crank.

    b. Auto – Normal automatic control.

    c. Test – Test operation of the transfer system and standby generator by simulating line power loss. System shall remain in the test mode until selector switch in returned to the auto mode which will allow normal retransfer, logic and/or time delays shall be provided to allow switch mode change without undesired actions.

    d. Engine test – start engine without ATS transfer.

8. Status contacts (form A) wired to terminals for inputs to station RTU/PLC equipment:

    a. Switch in normal position.

    b. Switch in emergency position.

    c. Normal voltage present.

    d. Emergency voltage present.

9. Engine start contact (Form A) wired to terminals for engine start.

10. Short circuit withstand rating shall be 42,000 amps, unless otherwise noted.

11. Provide adjustable time delay for transition period in the neutral position with the pole of the switch de-energized.

12. Unit shall be front accessible only and wall mounted.

13. Provide lugs for cable connections.

14. Unit shall be U.L. labeled.

15. Installation Contractor shall be responsible for all field power and control wiring.

16. Provide sunshield on the top.

17. Provide digital multi-meter Cutler Hammer IQ 200 Series (or equal) with front panel display volts, amps, kWD etc. or equal. Provide potential and current transformers as may be required.

18. Provide electronic control.

19. Provide keypad and sunlight use display.

PART 3 EXECUTION

3.01 INSTALLATION

A. Install ATS in accordance with manufacturers written instructions and the National Electrical Code.

3.02 FIELD QUALITY CONTROL

A. Inspect ATS visually.

B. Perform several manual operations.

C. Verify circuit continuity and megger each conductor. Minimum megger valve shall be 50 mega-ohms.

D. Check tightness of all connections using calibrated torque wrench per manufacturers recommended torque values.

3.03 ADJUSTING

A. Adjust time delay setting to values as required for proper operation of the power system. Provide settings per Owner's instructions.

3.04 TESTING

A. Test manual operation of the unit under load. Test all automatic features of ATS including transfer from normal to emergency and from emergency to normal, remote generator start control. Provide testing in the presence of the Owner and Engineer.

3.05 TRAINING

A. Provide a minimum of four (2) hours training.

3.06 PROGRAMMING

A. Program switch features per Engineer/Owner requirements.

B. Provide typewritten listing of final parameter setting with O&M manuals.

QUESTIONS FROM BIDDERS

1. Question: What I/O signals are requested?

Answer: 4 discrete signals including Generator Running, Generator Fault, Generator Low fuel Alert, ATS in Normal Position

2. Question: Will other manufacturers besides Tradewinds will be considered for the generator?

Answer: Yes. Cummins, CAT, and Generac will be considered as equal.

3. Question: The concrete slab on site 9 is to be repainted and the new concrete painted to match. Do you want the other sites #11 and 15 to have the slabs painted?

Answer: No, the other sites do not have to have the concrete painted.

4. Question: On drawing E-8 the panelboards are all listed as Nema 3 R enclosures. All the other new equipment (CPT, Disconnect and ATS) are to be nema 4 X. Do you want the panelboards to be nema 4X?

Answer: Provide either 3R 316SS or 4X 316 SS

5. Question: Tradewinds is shown as specified generator manufacturer. Drawings show ATS's mounted on H frame, Tradewinds tends to include the ATS's internally in generator enclosure. Please clarify intent to have them separate from generator or if they can be internal in enclosure will they still need to be 4X316SS?

Answer: Provide separate ATS per plans and ATS spec.

6. Question: Can Cummins be used as an equal or superior generator supplier if submittals are sent in with the bid?

Answer: Yes. Cummins, CAT, and Generac will be considered as equal.

7. Question: How long can the control panels be without power before pumps or mobile generators are required?

Answer: The control panels can be without permanent FPL power for up to 2 hours. During the 2-hour period, the Owner will provide temporary power via portable generators or temporary bypass pumping. The Contractor will be required to schedule and coordinate with Engineer and Owner.

8. Question: Ground rod specs state all to be 20' X 5/8" however detail on E-9 Pipestand shows 10' X 5/8". Please clarify.

Answer: Provide 20’ long (two 10’ with coupler for 20’ long 5/8” electrodes).

9. Question: Specification section 01400, 1.04, items F & G, I understand the concrete testing (#3), please confirm that the other items listed do not apply to this project.

Answer: Density testing and concrete cylinder testing for the concrete slabs is the only testing required under this section.

10. Question: Generator specifications, 16203-3, item G. Is this meant for the manufacturer of the generator to include or the contractor to add after receipt. If contractor to supply, please clarify manufacturer and model and where they are to be placed in the unit.

Answer: Generator Vendor needs to provide this, if shipped loose they need to instruct electrical contractor where and how to connect this to unit.

11. Question: Who is responsible for programing of the RTU I/O inputs?
Answer: The Contractor is responsible for landing the I/O wires in the existing RTUs. The Owner will be responsible for the programming.

12. Question: Will the low bid evaluation be done on a per site basis or cumulatively?

Answer: The low bid will be calculated by the cumulative total of all the work at all three sites.

13. Question: All electrical conduit above ground is acceptable with PVC schedule 80 or is metal conduit required.
Answer: Schedule 80 PVC is acceptable.

14. Question: Is Owner responsible for hiring RTU contractor to tie generators into RTU System or is contractor responsible? If so provide RTU contractor contact.

Answer: The Contractor is responsible for landing the I/O wires in the existing RTUs. The Owner will be responsible for the programming.

15. Question: Per virtual pre-bid meeting it was mentioned that additional generator manufactures would be accepted and not just Tradewinds.

Answer: Yes. Cummins, CAT, and Generac will be considered as equal.

16. Question: Is project FEMA funded? Are there any special payment disclosures?

Answer: There are no grant funds or special payment disclosures included in this project.

17. Question: With major equipment long lead times in excess of 180 days, when will the notice to proceed be issued?

Answer: Additional contract time will be added if the Contractor can provide documentation on the long lead time of equipment beyond the Contractor's control.

IN THE SPECIFICATIONS

1. Bid due date has changed from 2:00 PM local time on March 18, 2021 to 2:00 PM local time on March 25, 2021.

VILLAGE OF PALM SPRINGS
PRELIMINARY CAPITAL IMPROVEMENT PROJECT DETAIL

TASK #

Project Name: Fixed Generator at Lift Station 9
Department: Utilities
Location: Utilities - Lift Stations- LS 9

Project Manager: Paul Ward
Date Requested: 9/25/19
Date Approved: 10/1/20

DESCRIPTION / JUSTIFICATION:

Three of the largest lift stations (PS No. 1, PS No. 9, PS No. 11) within the Village watewater collection system lack an on-site emergency power supply. As a result, during power outages staff must deliver a portable generator to the stations which serve large service areas and often flow from other lift stations. Installing permanent emergency power to these critical lift stations is important to the risk management of the Village during emergency situations such as a hurricane. Pump Station No. 9 (Big Cresthaven) is the first station planned for a fixed diesel-powered emergency generator.

PROJECT EXPENDITURES / FUNDING SOURCES:

PROJECT COSTS:	FY1	FY2	FY3	FY4	FY5	FY6	TOTAL
Land/Easement Acquisition							$ 0.00
Site Preparation (clearing,soil testing,permitting,survey)							$ 0.00

TASK #

Project Name: Well No. 11 Emergency Generator
Department: Utilities
Location: Utilities - Eastern/Main Wellfield
Project Manager: Paul Ward
Date Requested: 9/25/19
Date Approved: 10/1/20

DESCRIPTION / JUSTIFICATION:

Water wells supply all of the water for the two (2) water treatment plants operated by the Village. Currently the only wells connected to emergency power are those located at or immediately adjacent to the water treatment plants. This project will add a diesel powered permanent emergency generator at Well No. 11 improving the reliability of the water supply for the Village during emergency events.

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Library

ITEM 7.1: Presentation - Joseph L. Fallon Scholarship Awards - Five (5) Scholarship Awards

SUMMARY:

Each year, the Village of Palm Springs awards scholarships to selected high school seniors who live within the Village. In 1996, the annual Village scholarship was named in memoriam for Palm Springs resident and library volunteer Joseph Fallon, who died suddenly during his senior year at John I. Leonard High School.

This year, the Village Council is expected to present five (5) Joseph L. Fallon Scholarship awards to applicants based financial need, grades, experience and personal appraisal. The recommended 2021 Fallon Scholarship winners include:

- **Elizabeth Anderson:** Elizabeth is a student at Greenacres Christian Academy and plans to attend Palm Beach State College in Lake Worth, FL. Her major is Elementary Education.
- **Natalya Gertner:** Natalya is a student at G-Star of the Arts and plans to attend Florida Atlantic University in Boca Raton, FL. Her major is English.
- **Natalie Gutierrez:** Natalie is a student at Forest Hill Community High School and plans to attend The University of Miami in Coral Gables, FL or The University of Central Florida in Orlando, FL. Her major is Information Technology/Computer Science.
- **Andre Noble:** Andre is a student at John I. Leonard High School and plans to attend Florida A&M University in Tallahassee, FL. or Palm Beach State in Lake Worth, FL. His major is Emergency Services.
- **Humberto Sigler:** Humberto is a student at Forest Hill Community High School and plans to attend Palm Beach State College in Lake Worth, FL. His major is Psychology.

The Fallon Scholarship Committee met on April 22, 2021, and recommended approval of five

(5) scholarship awards to local, Village high school students to assist with their plans to attend college.

The Village Council is expected to approve this recommendation on May 13, 2021 and, if approved, will present each scholarship recipient with a check during the May 13, 2021 Village Council Meeting.

FISCAL IMPACT:

Funding to support the proposed awards is available within the FY 2021 Budget - General Fund

Village of Palm Springs, Florida

Proclamation

WHEREAS, the Congress and President of the United States of America has designated the week of May 9 through May 15, 2021 as ***"Police Week"*** and May 15, 2021 as ***"Peace Officers Memorial Day"***; and

WHEREAS, Law Enforcement Officers are our guardians of life and property, defenders of the individual right to be free, and dedicated to the preservation of life, liberty and the pursuit of happiness; and

WHEREAS, it is important that all citizens know and understand the duties, responsibilities, hazards and sacrifices of their police department, and know that members of our police department recognize their duty to serve the people by safeguarding life and property, by protecting them against violence or disorder, and by protecting the innocent against deception and the weak against oppression or intimidation; and

WHEREAS, the members of the Palm Springs Police Department play an essential role in safeguarding the rights and freedoms of the citizens and visitors to Palm Springs; and the Village of Palm Springs wishes to honor our own warriors in the war against crime for their valor, service and dedication, and for unceasingly providing a vital public service; and

WHEREAS, all citizens in this community are urged to honor and show sincere appreciation for the police officers of this Village by deed, remark and attitude and show thanks to all the police officers who make it possible for us to leave our homes and family in safety each day and to return to our homes knowing they are protected by officers willing to sacrifice their lives, if necessary, to guard against all who would violate the law.

NOW, THEREFORE, I, BEV SMITH, Mayor of the Village of Palm Springs, Florida, do hereby proclaim the week of **May 9 through May 15, 2021** as

"Police Week in Palm Springs"

and **May 15, 2021** as:

"Peace Officers Memorial Day in Palm Springs"

In witness whereof I have herunto set my hand and caused the seal of this city to be affixed

ITEM 7.3: Hepatitis Month Proclamation - May 2021

SUMMARY:

FISCAL IMPACT:

ATTACHMENTS:
Proclamation Hepatitis Month.pdf

Office of the Mayor

Village of Palm Springs, Florida

Proclamation

WHEREAS, the Village of Palm Springs recognizes Hepatitis C as a major public health issue. Many who become infected are unaware of their diagnosis unless accurately diagnosed through testing. Hepatitis C is a liver disease caused by the hepatitis C virus (HCV) that typically produces no symptoms. Over decades, it can lead to severe liver disease, including cirrhosis and liver cancer. Most of those infected are unaware that they have the disease. HCV is the most common chronic blood-borne infection in the United States, with an estimated 4.1 million Americans (1.8 percent of the population) being infected; and

WHEREAS, Palm Beach County ranked 3rd for Hepatitis C for the state of Florida in 2017, posing increased public health challenges to our community; and

WHEREAS, in 2016, Florida reported 29,757 cases of hepatitis C. Forty-seven percent of chronic hepatitis C cases are in individuals aged over 50 years, whereas 19 percent of chronic hepatitis C cases are in individuals aged under 30 years. However, 37 percent of acute, or newly infected, hepatitis C cases are in individual under 30 years in age; this is due in part to increasing rates of injection drug use related to the opioid epidemic; and

WHEREAS, Village of Palm Springs recognizes Hepatitis C is transmitted via blood, most commonly by injection drug use, and, before 1992, by blood transfusion. No vaccine is available, and no medications have proven effective in preventing infection after exposure however, it can be preventable through prevention education, risk-reduction education, and community outreach; and

WHEREAS, Hepatitis Awareness Month provides an opportunity for Monarch Health Services, in partnership with The Florida Department of Health in Palm Beach County and the Village of Palm Springs to raise public awareness about the impact of Hepatitis C in our communities and to promote the importance of prevention, risk-reduction education, testing for, and treating Hepatitis C.

NOW, THEREFORE, I, BEV SMITH, Mayor of the Village of Palm Springs, do hereby proclaim the recognition of, do hereby proclaim May 2021 as **HEPATITIS DISEASE AWARENESS MONTH**

ITEM 7.4: Building Safety Month Proclamation - May 2021

SUMMARY:

FISCAL IMPACT:

ATTACHMENTS:
Proclamation Building Safety Month - May 2021

Office of the Mayor

Village of Palm Springs, Florida

Proclamation

Whereas, the Village of Palm Springs is committed to recognizing that our growth and strength depends on the safety and economic value of the homes, buildings and infrastructure that serve our citizens, both in everyday life and in times of natural disaster, and;

Whereas, our confidence in the structural integrity of these buildings that make up our community is achieved through the devotion of vigilant guardians - building safety and fire prevention officials, architects, engineers, builders, tradespeople, design professionals, laborers, and others in the construction industry - who work year-round to ensure the safe construction of buildings, and;

Whereas, these guardians are dedicated members of the International Code Council, a U.S. based organization, that brings together local, state, and federal officials that are experts in the built environment to create and implement the highest-quality codes to protect us in the buildings where we live, learn, work, worship, play, and;

Whereas, our nation benefits economically and technologically from using the International Codes® that are developed by a national, voluntary consensus codes and standards developing organization, our government is able to avoid the high cost and complexity of developing and maintaining these codes, which are the most widely adopted building safety and fire prevention codes in the nation; these modern building codes include safeguards to protect the public from natural disasters such as hurricanes, snowstorms, tornadoes, wildland fires, floods and earthquake; and;

Whereas, Building Safety Month is sponsored by the International Code Council to remind the public about the critical role of our communities' largely unknown guardians of public safety - our local code officials - who assure us of safe, efficient, and livable buildings that are essential to keep America great, and;

Whereas, Building Safety Month 2021 encourages appropriate steps everyone can take to ensure that the places where we live, learn, work, worship and play are safe, and recognizes that countless lives have been saved due to the implementation of safety codes by local and state agencies, and;

Whereas, each year, in observance of Building Safety Month, Americans are asked to consider the commitment to improve building safety and economic investment at home and in the community, and to acknowledge the essential service provided to all of us by local and state building departments, fire prevention bureaus and federal agencies in protecting lives and property.

NOW, THEREFORE, I, Bev Smith, Mayor of the Village of Palm Springs, Florida, do hereby proclaim the month of May 2021 as:

"Building Safety Month"

In witness whereof I have herunto set my hand and caused the seal of this city to be affixed

Proclamation Public Service Recognition - May 2 - 8, 2021

Office of the Mayor

Village of Palm Springs, Florida

Proclamation

WHEREAS, the week of May 2nd through May 8th, 2021, has been designated as "Public Service Recognition Week" to honor all the employees of the Village of Palm Springs; and

WHEREAS, public service is a noble calling involving a variety of challenging and rewarding professions; and

WHEREAS, millions of individuals work in government service and as members of the uniformed services, in every State, county, and city across the United States and in hundreds of cities abroad; and

WHEREAS, the United States is a great and prosperous country, and public service employees contribute significantly to that greatness and prosperity; and

WHEREAS, Public Service Recognition Week provides an opportunity to recognize and promote the important contributions of all our Village of Palm Springs employees and to honor the diverse men and women who meet the needs of our community; and

WHEREAS, all the Village's public servants have worked and continue to work to help our Village, Palm Beach County, the State of Florida and the United States to overcome the challenges from the COVID–19 pandemic; and

WHEREAS, the Village of Palm Springs benefits daily from the knowledge and skills of the highly trained individuals who work within our local, municipal government; and

WHEREAS, the ability of the Village's employees enables our community to be responsive, innovative and effective and is a result of the outstanding performance of our dedicated public servants; and

WHEREAS, members of the Village of Palm Springs' uniformed services and civilian employees make significant daily contributions to our community and help to continuously grow and make our Village a better place to live, work and play.

Now, therefore, I, Bev Smith, Mayor for the Village of Palm Springs, and the entire Village Council and our community supports the designation of the week of **May 2nd through May 8th, 2021, as "Public Service Recognition Week"** and we commend all Village employees for their outstanding contributions to the Village of Palm Springs, including their unyielding dedication to, and enthusiasm for, the Village of Palm Springs.

ITEM 7.6: Approve/Accept the Village of Palm Springs Comprehensive Annual Financial Report (CAFR) - FY 2020

SUMMARY:

Staff is requesting that the Village Council accept/approve the recently submitted 2019 Comprehensive Annual Financial Report (CAFR).

Mr. Scott Porter, with the audit firm of Caler, Donten, Levine, Cohen, Porter & Veil, P.A. will provide the Council with a detailed presentation on the 2020 Comprehensive Annual Financial Report (CAFR) and the Village's financial statements.

Additionally, Mr. Porter will distribute the updated "Communication With Those Charged with Governance" and the Financial Highlights brochure.

Note: A digital copy of the Village's FY 2020 CAFR will be posted to the Village's website in advance of the Council meeting.

Comprehensive Annual Financial Report

Fiscal Year Ended
September 30, 2020

The cover photo this year is capturing Foxtail Palm Park, the newest addition to our neighborhood parks. Foxtail Palm Park was funded utilizing Community Development Block Grant funds, Palm Beach County Park funds, the Solid Waste Authority of Palm Beach County funding and Village funds.

This park includes a lake, walking path, playground, gazebo, picnic area, parking lot and landscaping. It will become part of our Pathway Connector Park as the Village continues the extension of that project linking a popular walking pathway to numerous Village parks.

This picture was taken by our Project Manager, Walter Sanchez. Walter joined the Village in 2019 and is actively involved in helping to keep our projects like Foxtail Palm Park on track to completion. Thank you, Walter!

Village of Palm Springs
Department of Finance
226 Cypress Lane,
Palm Springs, Fl. 33461-1699
(561) 965-4013 Fax (561) 304-4615

April 26, 2021

The Honorable Mayor, Members of the Village Council and Residents of the Village of Palm Springs

The Finance Department is pleased to present the Village's Comprehensive Annual Financial Report (CAFR) for the fiscal year ended September 30, 2020, which also includes the Independent Auditors' Report. The CAFR has been prepared in accordance with the Village Charter, Florida State Statutes and U.S. generally accepted accounting principles (GAAP) for governments. All disclosures necessary to enable the reader to gain an understanding of the Village's financial condition and activities have been included.

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the Village. The Village's financial operations are designed with a comprehensive system of internal controls established to safeguard assets from loss, theft or misuse. The Village's internal control system is designed to provide reasonable, reliable financial records for use in preparing financial statements in accordance with U.S. generally accepted accounting principles. To the best of our knowledge and belief the presented data is accurate in all material respects, and is organized in a manner designed to fairly present the financial position and results of operations of the Village as measured by the financial activity of its various funds and the Village as a whole.

Florida Statutes require an annual audit by independent certified public accountants. Caler, Donten, Levine, Cohen, Porter & Veil, P.A. Certified Public Accountants, have issued an unmodified ("clean") opinion on the Village of Palm Springs' financial statements for the year ended September 30, 2020. The independent auditor's report on the basic financial statements and combining fund financial statements and debt schedules is located at page 1 in the financial section of this report.

Report format

This report has been prepared and organized to meet the requirements of the Government Finance Officers Association (GFOA) Certificate of Achievement for Excellence in Financial Reporting Program. By following the guidelines of this program, the report's format facilitates understanding by the residents as well as providing information needed by financial professionals.

The report is presented in four sections; Introductory, Financial, Statistical and Compliance. The Management's Discussion and Analysis (MD&A) located in the Financial Section following the independent auditor's report, together with this transmittal letter contain valuable information for the user of the financial statements and should be read in conjunction with them.

Village profile

The Village of Palm Springs was incorporated in 1957 and is centrally located in Palm Beach County. As part of South Florida's Gold Coast, Palm Beach County is well recognized for its unique lifestyle with a comfortable average year-round temperature of 76 degrees, 45 miles of beaches, 160 challenging golf courses and many cultural attractions. These elements and many more combine to create an unequaled quality of life that has attracted a diverse population from retirees to young professionals.

Palm Springs is an attractive, affordable community offering a mix of single family homes, townhomes and condominiums combined with all the services working families and retirees look for. As a full-service municipality, the Village strives to meet the needs and desires of the entire spectrum of residents by providing law enforcement, a public library, parks and recreation facilities and activities, sanitation and recycling services, water and sewer services, road and street maintenance and beautification as well as general government support services.

The Village's water treatment operations consist of two water treatment plants. The first plant, located within the Village, is a 6 million gallon treatment facility. The second plant, dedicated to former Public Service Director Robert L. Pratt, is located in unincorporated Palm Beach County and is a 3 million gallon treatment facility with expansion capabilities to 4 million gallons.

The Village's sewer treatment is handled through two connections to the East Central Regional Wastewater Treatment Facilities. The Village has agreements with Palm Beach County for one connection and with the City of Lake Worth for the second. As of September 30, 2020, our utility system had 20,300 water customers and 19,239 sewer customers. Approximately 60% of total connections serve our residents; the other 40% of our connections are in the unincorporated area.

The Village operates under a Council-Manager form of government. Four Council members are elected at large each representing a district in which they must reside. The Mayor is elected at large and may reside in any of the four districts. The Mayor and four council members are elected to serve four year overlapping terms. Day to day operation of the Village is under the direction of the Village Manager who is appointed by the Village Council.

Economic outlook and financial planning

The Village's population has increased 24%, from 18,928 in 2011 to the current estimate of 23,448. Over the same ten-year period the Village's assessed taxable value grew from $610,730,119 in 2011 to a new high of over $1.3 billion this year an increase of $714,085,755 or 169%. The taxable values increased by $103 million or 8.5% over fiscal year 2019. We believe the taxable values are back on the rise reflecting the stronger economy, on-going redevelopment and annexation efforts.

The Village was successful in our bid to create two community redevelopment districts (CRA); one for the Lake Worth Road area and the second for Congress Avenue north of Forest Hill Boulevard. The Village expects to spur re-development and new developments in these areas using tax increment financing. The tax increment financing (TIF) will be active for our fiscal year beginning October 1, 2020.

As of September 30, 2020, the General Fund had a total fund balance of $18,021,100. The components of fund balance, in accordance with GASB 54, are detailed as follows.

Total fund balance	$	18,021,100
Nonspendable - Inventory		70,539
Restricted for sales tax capital projects		4,172,367
Assigned to:		
Disaster recovery		3,000,000
Capital projects		1,500,000
Subsequent year's budget		1,183,000
Unassigned fund balance	$	8,095,194

Fortunately, the Village has been very conservatively managed; the Village has assigned $3.0 million for disaster recovery and together with the $1.5 million assigned for large capital acquisitions or replacements prudently providing for the on-going operations of the Village and preparing for potential disasters or economic downturn.

The General Fund's unassigned fund balance represents 32% of the General Fund budget for fiscal year 2021. Our goal is to maintain this unassigned fund balance in the 20-25% range. The Village's purpose for building our fund balance to this level is to have adequate resources during the "rainy days." The Village will always seek to balance the budget with current resources, but we have prudently provided funds for potential economic fluctuations, as well as a financial hedge for the protection for our community.

The Village's 5-Year Capital Improvement Budget includes updates for the proposed years through FY 2024 and new capital items were added for FY 2025.

The Village evaluates one third of our roads and streets annually using a pavement rating system, based on this evaluation the Village budgets funds to maintain the roads and street network with at least 80% of the system rated at a good or better condition based on the pavement rating system. A schedule showing the annual expenditures for the last ten years to maintain this network is located on page 77 of this report.

The Village Council legally adopts a formal budget for the General Fund. The Village maintains budgetary control at the department level of expenditure. All expenditures in excess of $5,000 or more require the Village Manager's authorization, and expenditures over $25,000 require approval by the Village Council and/or competitive bid. Budget transfers within a department are handled administratively. The Village Council must approve budget transfers between departments or budget amendments, which increase or decrease the total fund. A schedule comparing the original budget, revised budget and actual revenues and expenditures is located on pages 72 – 76 of this report.

Major initiatives

In December, the police department held its 9th annual "Stuff-A-Cruiser" toy drive. The event was held to collect new, unused and unwrapped toys to benefit local and needy families during the holidays and was held on the Village's ballfields. This event showcased many of the department's resources and incorporated several external organizations and businesses. Several members represented the department including individuals from the Community Policing Unit, the Criminal Investigation Division, the Support Services Division, Reserve Officers, the Police Explorers and our Volunteer Coordinator. Over 1,000 people attended and more than $10,000 was raised to donate to the Salvation Army and Adopt-A-Family organizations. In addition, several hundred toys were donated and given to the Salvation Army for needy families. This was an event that required a great deal of preparation, organization and coordination of numerous people and resources. It was by far our most successful year yet.

Parks and Recreation renovated Sabal Palm Park installing new sidewalks, and a new restroom building and upgrading the parking lot and signage. The Village added Foxtail Palm Park utilizing Community Development Block Grant funding, Palm Beach County funding and Village funding. This new neighborhood park includes a lake, walking path, playground, picnic area, parking lot and landscaping. It will become connected to other parks throughout the Village as we continue the extension of our Pathway Connector Park linking a popular walking pathway to numerous Village parks.

In response to COVID, the Parks and Recreation department implemented an employee dependent Back to School Program from August 31 to November 7, 2020. This program was set up in order to provide Village staff members an on-site location for their children to perform distance learning activity. The Library took advantage of the COVID shutdown and used that time to upgrade fixtures to touchless, install plexiglass partitions around the front desk area and made other improvements to help protect and promote a safe Library environment for our staff and patrons. New hurricane shutters and replacement air conditioning units were purchased and installed this year.

Our Public Works department quickly geared up and became the COVID safety heroes. They installed numerous plexiglass partitions throughout the Village facilities, they installed multiple hand sanitizer solutions, touchless faucets, placed social distancing stickers in our public areas, kept the Village stocked with hand sanitizer, facial masks, gloves and all COVID safety supplies. They also purchased sanitizing fogger equipment, trained to use properly and then took on the new responsibility of routinely disinfecting all Village facilities.

To promote economic development, the Village continued its popular Property Improvement Grant Program. This is a matching grant of up to 50% (up to $5,000) for improvements to residential and commercial property structures. The improvement project must include construction/renovation of the street facing façade of the building or driveway. Now in its sixth year, the Village granted 12 awards totaling $117,960 in improvements and $48,954 was distributed as the Village match.

The Village Council was successful in creating a Community Redevelopment Agency (CRA) in 2020. To administer the activities and programs that can be offered within community redevelopment areas pursuant to Chapter 163, Part III, Florida Statutes, the Village adopted Finding of Necessity reports for two proposed CRA districts on March 28, 2019. On September 16, 2019, the Palm Beach County Board of County Commissioners delegated redevelopment powers conferred by these statutes to the Palm Springs Village Council, with conditions that are outlined in an interlocal agreement. On November 14, 2019, the Village Council created a CRA with two districts (Congress Avenue and Lake Worth Road) via Ordinance 2019-19. The CRA, as a dependent special district, will be included in the Village's budget as a major fund beginning in 2021. The first tax increment revenues will not be received by the CRA until January 2021. The Village Council approved the CRA's request to fund initial expenses, such as the annual special district fee.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Village of Palm Springs for its Comprehensive Annual Financial Report for the fiscal year ended September 30, 2019.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report, the contents of which conform to program standards. Such reports must satisfy both U.S. generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for one year only. The Village of Palm Springs has received a Certificate of Achievement for the last thirty-two consecutive years (fiscal years ended 1988-2019). We believe our current report continues to conform to the Certificate of Achievement program requirements, and we are submitting it to GFOA.

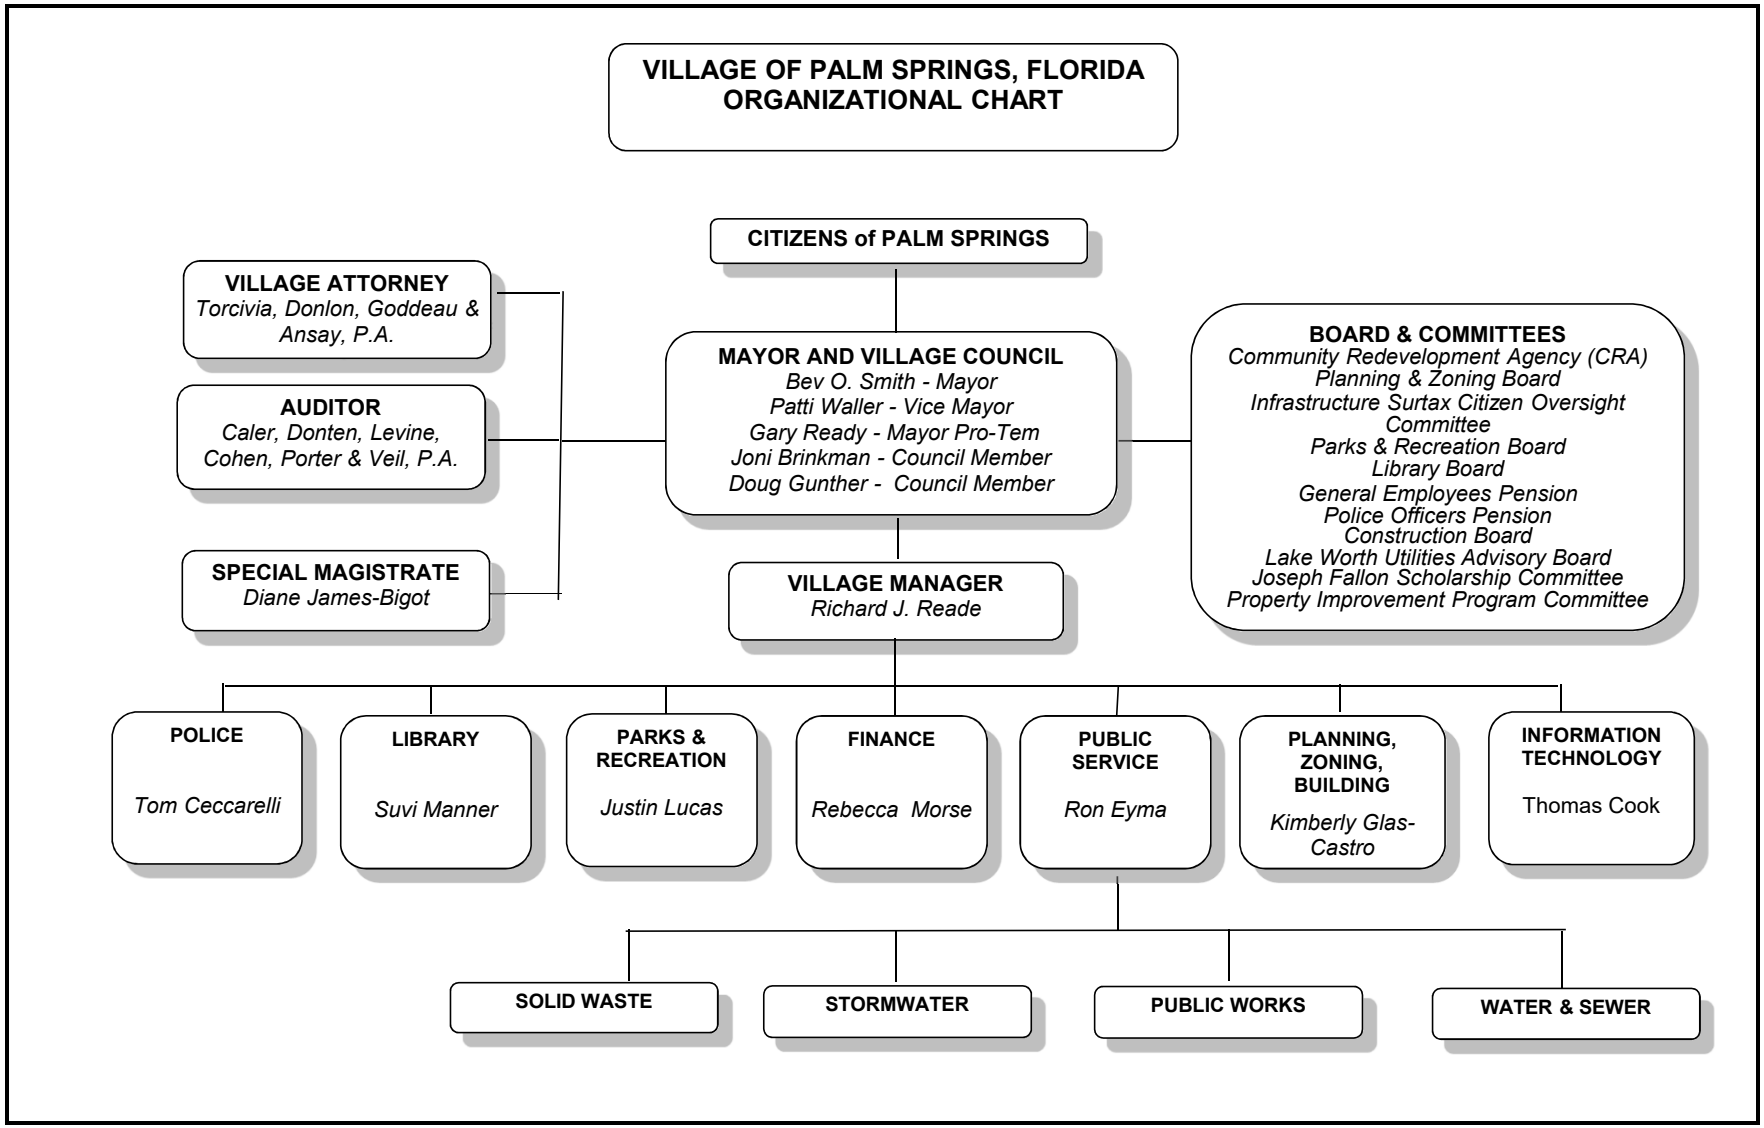
Acknowledgements

No one will forget how our lives were impacted by COVID-19, schools and businesses shut-down, social and recreational activities were canceled, we were shut out of loved one's lives and we lost loved ones and friends.

What I am proud of is how the Village responded. We kept our Village services running, we adapted and found new ways to provide our services and we geared up to disinfect, sanitize and protect our employees, and our residents. We became innovators and offered space to enable our employees to work safely and keep their children actively participating in remote learning. The Village Council did not shut down our operations but enabled every employee to be able to work and maintain their financial stability during all the COVID uncertainty. This is just another example of why we call Palm Springs "A Great Place to Call Home".

My amazing Finance staff, Mariana Ortega, Sylvia Ward, Nataly Cintron and Pisurki Rodriguez continued to give their best every day in every situation and adapted to find new ways to rise to the new challenges COVID presented utilizing more paperless processing and making many decisions professionally and personally to be champions of Finance in a safe work environment. They are a special group of talented, devoted individuals that serve the Village with honor and integrity.

Respectfully submitted,



Rebecca L. Morse, CGFO, CPFO

Independent Auditor's Report

The Honorable Mayor and
Village Council
Village of Palm Springs, Florida

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, business-type activities, each major fund and the aggregate remaining fund information of the Village of Palm Springs, Florida, as of and for the year ended September 30, 2020, and the related notes to the financial statements, which collectively comprise the Village's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of the Village of Palm Springs, Florida, as of September 30, 2020, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with U.S. generally accepted accounting principles.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the management's discussion and analysis on pages 4 through 15, the budgetary comparison information on pages 72 to 76, the condition rating of the Village's street system on page 77, the pension information on pages 78 through 90, and the other postemployment benefits information on page 91, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with U.S. generally accepted auditing standards, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Village's basic financial statements. The introductory section, the combining fund financial statements and debt schedules, and the statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements. The Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*, and is also not a required part of the basic financial statements.

The combining fund financial statements, debt schedules and the Schedule of Expenditures of Federal Awards are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with U.S. generally accepted auditing standards. In our opinion, the combining fund financial statements, debt schedules and the Schedule of Expenditures of Federal Awards are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated April 26, 2021, on our consideration of the internal control over financial reporting of the Village of Palm Springs, Florida, and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Village's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Village's internal control over financial reporting and compliance.

VILLAGE OF PALM SPRINGS, FLORIDA

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the Village of Palm Springs, we are presenting this discussion and analysis (MD&A) to provide a narrative overview and analysis of the financial activities of the Village for the fiscal year ended September 30, 2020. Please read it in conjunction with the accompanying transmittal letter beginning on page i and the accompanying basic financial statements.

FINANCIAL HIGHLIGHTS

- The Village's total net position at September 30, 2020 is $94.6 million. Of this amount, $38.3 million (unrestricted net position) may be used to meet the Village's ongoing obligations to residents and creditors.
- Governmental net position is $24.4 million, a net increase of $4.0 million from 2020 operations.
- Business-type net position was $70.2 million, a net increase of $3.9 million from 2020 operations.
- The total revenues from all sources were $41.0 million, a decrease of $1.3 million.
- The total cost of all Village programs was $33.1 million, a decrease of $0.5 million.
- For 2020, the Village's governmental funds revenues and other financing sources exceeded expenditures by $1,266,680.
- Revenues and other financing sources in the General Fund exceeded expenditures by $1,264,467.
- At the end of the current fiscal year, unassigned fund balance for the General Fund was $8,095,194, or 40.9% of total General Fund expenditures.
- The Village's total noncurrent liabilities decreased by $777,000 during the current fiscal year. The Village governmental activities long-term liabilities increased by $160,000 and the business activities long-term liabilities decreased by $937,000. The decreases are primarily attributable to principal payments on notes.
- The total OPEB liability increased $103,941 to $578,459 at September 30, 2020.

OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of a series of financial statements including four components which are:

1. Government-wide financial statements which include the Statement of Net Position and the Statement of Activities. These statements provide information about the activities of the Village as a whole.
2. Fund financial statements tell how services were financed in the short term, as well as what remains for future spending. Fund financial statements also report the Village's operations in more detail than the government-wide statements by providing information about the Village's most significant funds.
3. Notes to the financial statements.
4. Other information.

Government-wide Financial Statements

A frequently asked question regarding the Village's financial health is whether the year's activities contributed positively to the overall financial well-being. The Statement of Net Position and the Statement of Activities report information about the Village as a whole and about its activities in a way that helps answer this question. These statements include all assets and liabilities using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account, regardless of when cash is received or paid.

These two statements report the Village's net position and changes therein. Net Position is the result of assets plus deferred outflows of resources minus liabilities and deferred inflows of resources. Net Position is one way

to measure the Village's financial health, or financial position. Over time, increases or decreases in net position are an indicator of whether the financial health is improving or deteriorating. The Statement of Net Position and the Statement of Activities present information about the following:

- Governmental activities - All of the Village's basic services are considered to be governmental activities, including the Village Council, Village Manager, Village Clerk, Finance, Information Technology, Planning, Zoning and Building, Police, Sanitation and Recycling, Public Works (road and street maintenance), Library and Parks and Recreation Services. The Village's capital assets and general obligation debt are also included in the governmental activities.
- Business type activities/Enterprise Fund activities - The Village charges a fee to customers to cover all of the cost of the services provided. The Village's Water and Sewer Utility and Stormwater Utility are reported in this category.

Fund Financial Statements

The fund financial statements provide detailed information about the most significant funds - not the Village as a whole. Some funds are required to be established by State law. However, management establishes other funds, which aid in the management of money for particular purposes or meet legal responsibilities associated with the usage of certain taxes, grants and other money. The Village's three kinds of funds, *governmental, proprietary and fiduciary* use different accounting approaches as explained below.

- ***Governmental funds*** - Most of the Village's basic services are reported in the governmental funds. Governmental funds focus on how resources flow in and out, with the balances remaining at year-end that are available for spending. These funds are reported using an accounting method called the modified accrual accounting method, which measures cash and all other financial assets that can be readily converted to cash. The governmental fund statements provide a detailed short-term view of the Village's general governmental operations and the basic services it provides. Governmental fund information shows whether there are more or fewer financial resources that can be spent in the near future to finance the Village's programs. The Village of Palm Springs has three individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund. Data for the other two governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements on pages 92-93 of this report. The basic governmental fund financial statements can be found on pages 19-22 of this report.

- ***Proprietary funds*** - The Village has two enterprise funds: the Water and Sewer Utility Fund and the Stormwater Utility Fund, which was established in the prior year. The Water and Sewer Utility Fund and the Stormwater Utility Fund account for the operations of the water and wastewater utility and stormwater utility, respectively, and charge customers for the services it provides. Enterprise funds are reported on the full accrual basis of accounting in the same way that all activities are reported in the Statement of Net Position and the Statement of Activities. The basic enterprise fund financial statements can be found on pages 23-26 of this report.

- ***Fiduciary funds*** - Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the Village's own programs. The Village maintains two fiduciary funds; the General Employees Pension Fund and the Police Officers Pension Fund. The accounting used for fiduciary funds is much like that used for enterprise funds. The basic fiduciary fund financial statements can be found on pages 27-28 of this report. Individual fund data for each of the pension funds is provided in the form of combining statements on pages 94-95 of this report.

Notes to the Financial Statements

The notes to the financial statements are provided to communicate additional information that is essential to obtaining a comprehensive understanding of the data contained in the government-wide and fund financial statements. The notes to the financial statements are located on pages 29-71 of this report.

Other Information

In addition to the basic financial statements and notes, this annual report also presents certain required supplementary information which includes a budgetary comparison schedule for the General Fund together with notes pertaining to the budget schedule. The Village also presents information in this section concerning the condition rating of its streets, progress in funding its obligation to provide pension benefits to its employees and its other postemployment benefits. Required supplementary information can be found on pages 72-91.

The combining fund financial statements of the nonmajor governmental funds and the combining fund financial statements of the fiduciary funds are presented on pages 92-95 of this report. Immediately following the combining fund financial statements, the Village includes schedules of long-term debt. These schedules detail the principal and interest payments due by issue and fiscal year through maturity. These schedules are located on pages 96-98 of this report.

The statistical section located on pages 99-129 of this report presents schedules providing details about the financial trends, revenue capacity, debt capacity, demographic, economic and operating information to assist the user in understanding the Village's financial statements and overall financial health.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the Village, assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by $94.6 million, approximately $7.9 million more than fiscal year 2019. The net position of the Village at September 30, 2020 and 2019 are summarized as follows:

Village of Palm Springs
Net Position Summary

	Governmental Activities		Business-type Activities		Total Primary Government	
	2020	2019	2020	2019	2020	2019
Assets:

Deferred Inflows of Resources:						
Deferred amount on refunding	$ -	$ -	$ 89,466	$ 96,576	$ 89,466	$ 96,576
Deferred amount related to pensions	1,790,226	1,645,145	607,756	730,659	2,397,982	2,375,804
Deferred amount related to OPEB	2,066	-	869	-	2,935	-
Total deferred inflows of resources	**$ 1,792,292**	**$ 1,645,145**	**$ 698,091**	**$ 827,235**	**$ 2,490,383**	**$ 2,472,380**
Net Position:						
Net investment in capital assets	$ 14,490,482	$ 12,007,314	$ 37,408,106	$ 36,936,597	$ 51,898,588	$ 48,943,911
Restricted for law enforcement	54,669	54,669	-	-	54,669	54,669
Restricted for debt service	249,462	247,249	-	-	249,462	247,249
Restricted for sales tax capital projects	4,172,367	3,488,534	-	-	4,172,367	3,488,534
Unrestricted	5,442,274	4,593,586	32,816,459	29,391,851	38,258,733	33,985,437
Total net position	**$ 24,409,254**	**$ 20,391,352**	**$ 70,224,565**	**$ 66,328,448**	**$ 94,633,819**	**$ 86,719,800**

The largest portion of the Village's net position (54.9%) reflects its investment in capital assets (land, buildings, machinery and equipment), net of related debt used to acquire these assets. The Village uses these capital assets to provide services to citizens; therefore these assets are not available for future spending. Although the Village's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the Village's net position ($4.5 million or 4.7%) represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position ($38.3 million or 40.4%) may be used to meet the government's ongoing obligations to citizens and creditors.

At the end of the fiscal year, the Village has positive balances in all categories of net position, both for the government as a whole, as well as for its separate governmental and business-type activities.

The changes in net position of the Village for the years ended September 30, 2020 and 2019 are summarized as follows:

Village of Palm Springs
Changes in Net Position

	Governmental Activities		Business-type Activities		Total Primary Government	
	2020	2019	2020	2019	2020	2019
Revenues:

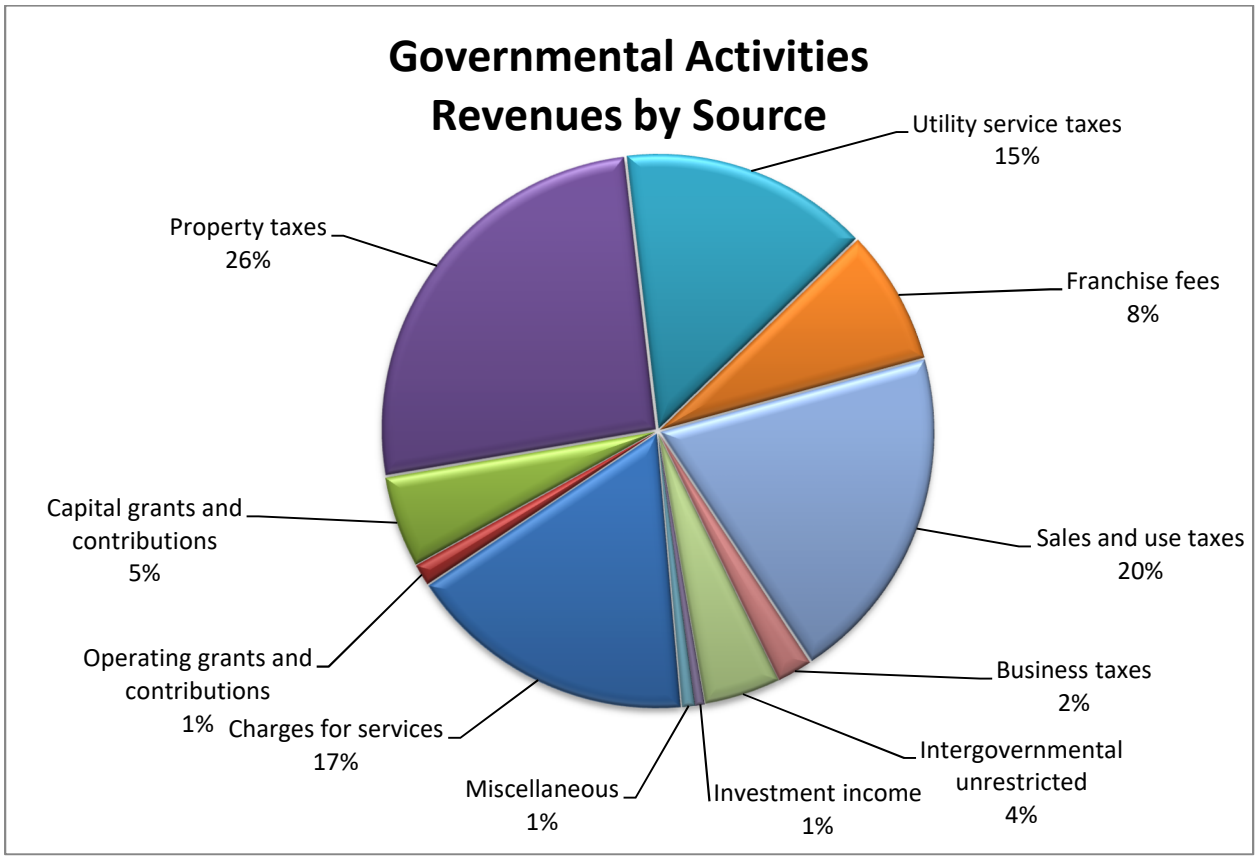
Governmental Activities

Revenues: Governmental activities increased the Village's net position by $4,017,902. Charges for Services decreased by $1,039,424 over fiscal year 2019. The largest decreases were in Public Safety, police outside details decreased by $308,499 due to discontinued details for the school board and diminished details for



businesses that were closed due to COVID. Building permit activity declined by $647,248 primarily due to the impact COVID had on construction and improvements. Recreation fees went down by $149,440 due to cancelled sporting activities and smaller camp programs all due to COVID.

Operating grants and contributions decreased $301,742, compared to fiscal year 2019 due to final distributions from FEMA and State Aid grant funds received for Hurricane Irma that hit in August 2017 (fiscal year 2017) and Hurricane Dorian that hit in September 2019 (fiscal year 2019).

Capital grants and contributions totaled $1,019,323 in fiscal year 2020, an increase of $637,057 compared to fiscal year 2019. This year the Village received $697,588 in Community Development Block Grant (CDBG) funds for park development, $113,350 from Palm Beach County for the development of Foxtail Palm Park and $71,864 from the Solid Waste Authority for beautification. Both the Palm Beach County and the Solid Waste Authority grants are new funding sources not received in fiscal year 2019.

Property taxes increased by $311,766, or 6.8% over fiscal year 2019 due to the Village's taxable value increasing by $103,436,750 or 8.5% over fiscal year 2019 and the Village decided to maintain the same operating millage rate of 3.50 mills. Other taxes (utility, franchise, sales and use and business taxes) decreased $288,716 or 3.3% primarily due to the effects of the COVID-19 pandemic on the economy.

The Village's governmental activities revenues by source are summarized in the chart below showing the relative percentage of each revenue source to total governmental revenues.

Ad valorem property taxes represented 26% of total governmental activity revenues this fiscal year which is 3% more than fiscal year 2019. Likewise, utility service taxes increased by 1% in fiscal year 2020, while franchise fees, and sales and use taxes were all the same percentage of total revenue as the prior year.

Revenues from capital grants and contributions increased by 3%, while operating grants and contributions and charges for service decreased 2% and 4%, respectively, over fiscal year 2019.

Expenses: The Village's programs include General Government, Public Safety, Physical Environment (sanitation and recycling), Transportation, and Culture/Recreation. General Government includes the legislative, executive, financial, information technology and other general operations of the Village. Public Safety includes police, and planning, building, zoning, licensing and code enforcement operations. Transportation includes our street maintenance and public works operations. Culture/Recreation includes our library, parks and recreation and special events.

General Government expenses increased $43,929 reflecting additional costs related to our expanded Information Technology department and expanded services needed to set up for remote working and virtual meetings.

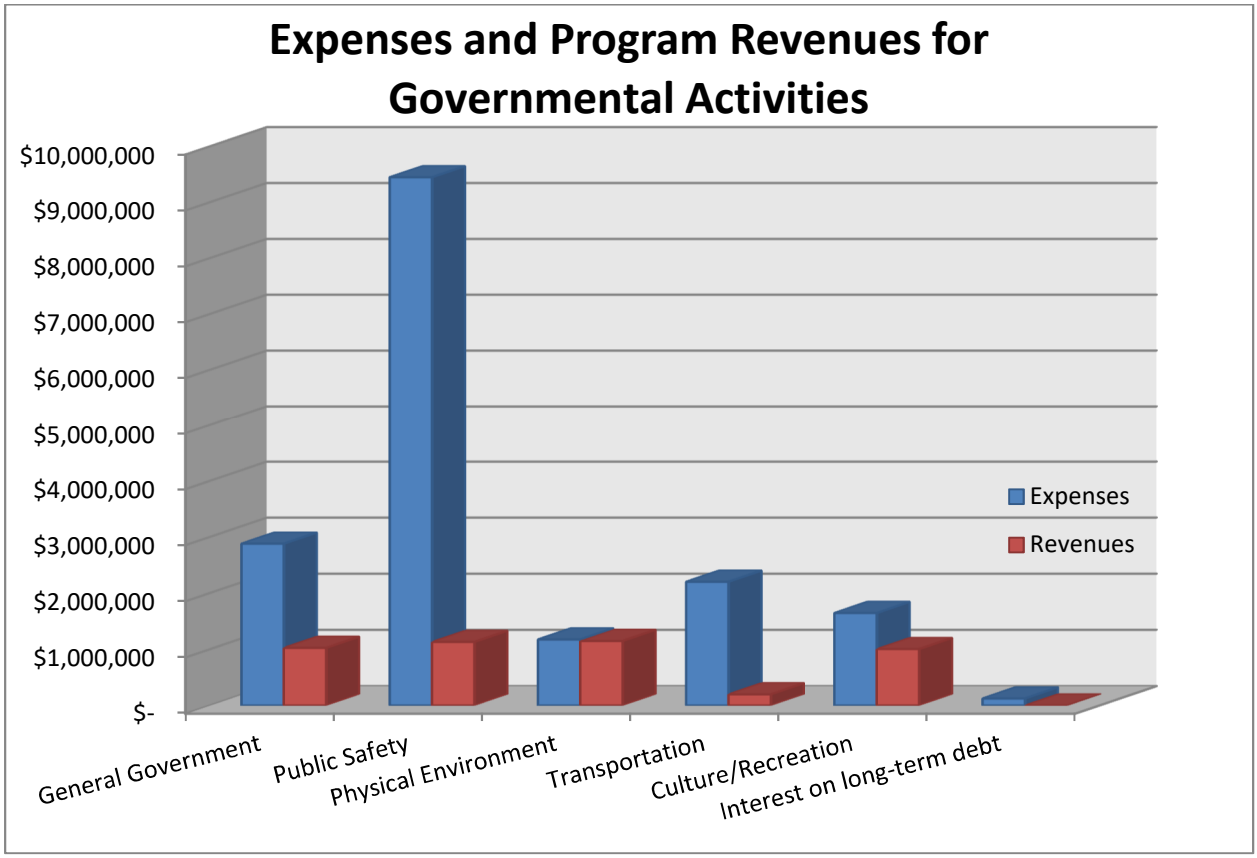
Public Safety expenses decreased $523,636. Planning, Zoning and Building experienced decreased contractual services for inspections with the impact COVID had on construction projects. The Police details decreased significantly as businesses were shut down or operating fewer hours and the need for police details diminished accordingly. Also, the pension costs for the Village's Hazardous Employee pension decreased significantly with improved plan performance and vehicle repair and maintenance decreased as the Village's program to update the police vehicle fleet is reaping the benefit of reduced repair costs with a newer fleet.

Physical Environment expenses increased $98,593 reflecting increased costs for waste disposal.

Transportation expenses increased $107,811 for fiscal year 2020 compared to fiscal year 2019, which reflects increased expenditures for maintenance as the department had increased personnel costs with additional overtime hours for the routine disinfecting of the Village facilities. The Village has a policy to maintain at least 80% of our street system at a good or better condition as determined by the annual payment ratings. More information on the Village's Street System and condition rating can be found on page 77 of this report.

Culture and recreation experienced a decrease in expenses of $341,783 for fiscal year 2020 compared to fiscal year 2019, due to reduced staffing costs for camp activities and contractual services for sports officials and recreation activities that were all cancelled or significantly reduced due to the impacts of COVID on all activities.

Below is a schedule presenting the net cost of each program (total cost, less revenues generated by the activities). The net cost shows the extent to which the Village's general revenues support each of the Village's programs.



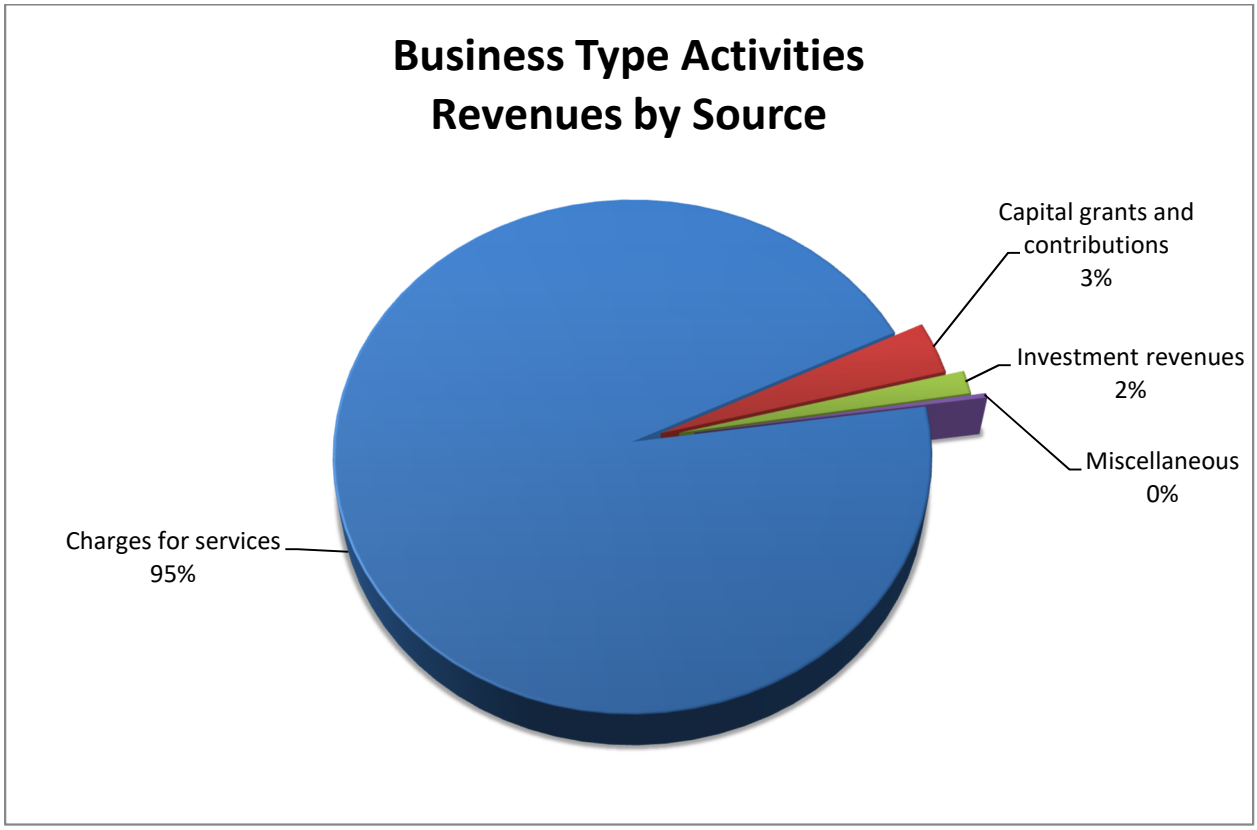
Village of Palm Springs

Governmental Activities - Net Cost of Services

	Total Cost of Services		Program Revenues		Net Cost of Services	
	2020	2019	2020	2019	2020	2019
General Government	$ 2,879,926	$ 2,835,997	$ (1,024,636)	$ (1,241,747)	$ 1,855,290	$ 1,594,250
Public Safety	9,446,884	9,970,520	(1,130,318)	(2,063,287)	8,316,566	7,907,233
Physical Environment	1,173,626	1,075,033	(1,147,478)	(1,135,863)	26,148	(60,830)
Transportation	2,201,178	2,093,367	(198,607)	(208,473)	2,002,571	1,884,894
Culture/Recreation	1,644,442	1,986,225	(1,002,757)	(558,535)	641,685	1,427,690
Interest on long-term debt	124,680	133,416	-	-	124,680	133,416
Totals	**$ 17,470,736**	**$ 18,094,558**	**$ (4,503,796)**	**$ (5,207,905)**	**$ 12,966,940**	**$ 12,886,653**

The total cost of all governmental activities this year was $17.5 million, representing a decrease of $624,000 or 3.4%. The previous schedule shows that $4.5 million of the cost of services was paid by those who directly benefited from the programs and the remainder of $13.0 million was financed through general revenues.

Expenses and the related program revenues are compared below:



Business-type Activities

The net position of the proprietary funds (Water and Sewer Utility and Stormwater Utility) at September 30, 2020 was $70.2 million. The cost of providing proprietary (business-type) activities this year was $15.6 million, as shown in the Statement of Activities, this is an increase of $136,404 compared to fiscal year 2019, which includes $314,500 in increased wastewater treatment/disposal fees paid to the City of Lake Worth and Palm Beach County for our two connections to the East Central Regional Sewage Treatment Plant, less savings in professional fees of $104,454 from reduced fees related to the rate study and other professional studies that were done in fiscal year 2019. The Village last year expended over $64,000 in refunds to customers for mis-read meters, that did not occur in FY2020 adding to the reduced expenses.

The Village Stormwater Utility was established in 2017 and ended the current year with a net position of $1,321,760 or $513,342 over fiscal year 2019. This increase reflects the stormwater fees collected via non-ad valorem assessment of $519,265 and net operating expenses of $12,885

.

Net position increased $3,896,117 for the two enterprise funds combined. The following graph shows the source of revenues for the Water and Sewer Utility and the Stormwater Utility for the current fiscal year. Revenues derived from charges for services increased by $277,500 or 1.3%, reflecting slight increase in usage compared to fiscal year 2019, possibly related to more time in the home related to COVID shutdowns. Operating grants and contributions increased $6,902 reflecting a hazard mitigation grant received from the State. Capital Grants and Contributions decreased $597,914 reflecting a decrease in new service connections primarily due to the effects of the COVID-19 pandemic on local construction.

FINANCIAL ANALYSIS OF THE VILLAGE'S FUNDS

The Village uses fund accounting to ensure and demonstrate compliance with finance related legal requirements.

Governmental Funds

The governmental funds report on the same functions as the governmental activities in the government-wide statements but the focus of the governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources available at fiscal year-end. This information is useful in evaluating the Village's financing requirements. The unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the Village's governmental funds reported combined ending fund balances of $18,325,231, an increase of $1,266,680 in comparison with the prior year. The increase in fund balance was approximately half the prior year increase of $2,529,857 which was due primarily to the effects of the COVID pandemic on the Village. Revenues decreased $948,676. Property tax revenue increased $311,766 due to the increased taxable value, and franchise, sales and utility taxes decreased due to lower economic activity resulting from the COVID-19 pandemic. Building permit revenues decreased by $648,543 as new building projects declined significantly during the pandemic. Intergovernmental revenues decreased $65,510, due to an increase of $450,066 primarily due to reimbursements from FEMA for Hurricane Irma expenses, less decreases in State revenue (revenue sharing, half cent sales tax) of $217,000, a decrease in one cent surtax revenue of $87,000 and local option gas taxes also decreased by $49,000, all reflecting the impact of the pandemic. Charges for services decreased by $257,658 primarily due to police outside details decreasing $308,499 due to discontinued details for the school board and diminished details for businesses that were closed due to COVID, also, Parks and Recreation fees decreased by $149,440 because of reduced or cancelled

recreational and camp activities. These decreases were offset slightly by an increase of $119,276 in IT service fees with an expanded IT department and user fees charged to the Water and Sewer Enterprise Fund, building plan review fees also increased slightly or $66,701.

In fiscal year 2020 expenditures for the governmental funds increased by $402,879 compared to fiscal year 2019. General Government expenditures increased $221,822 or 9.4%, primarily due to increases in contractual services for new and increased services for software including, Neogov HR software, new messaging archive software, CISCO security umbrella, and monthly usage fees for NOVAtime electronic timekeeping software. Public Safety experienced a decrease of $732,870 or 7.5% which reflects the reduction in employer contribution required for the Village's Hazardous Pension due to improved plan performance. Physical Environment costs increased by $98,593 due to increased rates charged by the Village's contractual garbage hauler. Expenditures for Transportation increased $152,042 compared to fiscal year 2019 reflecting the increased funds expended in the current fiscal year for purchases of personal protection supplies, including masks, hand sanitizer and disinfecting supplies needed to keep the Village employees and facilities protected from the pandemic. Culture/Recreation experienced a decrease in expenditures of $189,631 reflecting the cancellation of Village recreation programs due to the COVID-19 pandemic.

The governmental funds had a total fund balance of $18,325,231 comprised of non-spendable fund balance of $70,539 for inventory; restricted fund balance of $4,476,498 ($54,669 for law enforcement, $249,462 for debt service, and $4,172,367 for infrastructure capital projects financed by the one-cent sales tax); assigned fund balances of $3,000,000 for disaster recovery; $1,500,000 assigned for future capital projects; and, $1,183,000 for the 2020/2021 budget. The balance of $8,095,194 is unassigned.

The primary operating fund for the Village is the General Fund. At the end of the current fiscal year, in accordance with GASB statement 54 the unassigned fund balance of the General Fund was $8,095,194, while the total fund balance was $18,021,100. The unassigned fund balance in the General Fund represents 31.9% of the fiscal year 2021 budgeted expenditures. The unassigned fund balance at fiscal year-end 2019 represented 28.6% of the 2020 final budget. The Village's target balance range for unassigned fund balance is 20-25%.

Proprietary Funds

The Village has two proprietary funds, which are both enterprise funds. Enterprise funds present the same functions presented as business-type activities in the government-wide financial statements, but in more detail. The Village of Palm Springs uses an enterprise fund to account for its Water and Sewer Utility operations and its Stormwater Utility operations.

Unrestricted net position for the Water and Sewer Enterprise Fund was $32.1 million at fiscal year-end, an increase of $3,153,021 over the prior fiscal year. Charges for services revenues increased $140,488 reflecting a slight increase in consumption.

Revenues from capital contributions decreased from $732,102 in 2019 to $134,188 in 2020 reflecting the significant decline in construction of new residential and commercial developments due to the COVID-19 pandemic. Operating expenses increased $154,643 which reflects increased utility costs paid to Palm Beach County and Lake Worth for the treatment and disposal of wastewater. Total net position for the Water and Sewer Enterprise Fund was $68.9 million at fiscal year-end, an increase of $3,382,775 from the prior fiscal year. The increase in net position from operations was $5,793,838 (operating income).

The Stormwater Utility is now in its third year of operations and had operating revenues of $519,265 and operating expenses of $12,885 for 2020. The Stormwater Utility net position increased by $513,342 and ended the fiscal year at $1,321,760.

GENERAL FUND BUDGETARY HIGHLIGHTS

There were no differences between the total original budget and the final amended budget of $28,347,038 for the current fiscal year, however there were changes in various departmental revenues and expenditures as follows:

- General Fund revenues were under budget by $1,671,104. Revenues from taxes exceeded the budget by $8,935 with increased property tax revenues from rising property values, new development, and annexations. Franchise fees and business taxes decreased and were under budget by $24,251 and $7,331, respectively, due to the effects of the pandemic on the economy. Permits generated $642,186 less than anticipated as projects came to a halt during the pandemic. Intergovernmental revenues were less than budget by $641,587 due to reductions in State shared revenues form sales taxes, gas taxes and other revenues affected by the pandemic. Charges for services were less than budget by $275,264 primarily due to the cancellation of recreation activities due to the pandemic. Fines and forfeitures were less than budgeted revenues by $145,292 due to a reduction in fines related to local ordinance violations. Miscellaneous income exceeded the budget by $28,688 reflecting lower than expected interest income ($109,466) due to lower market interest rates net higher other miscellaneous revenues ($151,759) attributable to sales of capital assets utilizing a new auction company and insurance reimbursements.
- General Fund expenditures were $8,554,832 less than the budget for fiscal year 2020. General government departments in total expended $691,001 less than budgeted due to staffing vacancies, and unexpended capital outlay. Public Safety (Police department and the Planning, Zoning and Building Department) expended $3,601,263 less than expected due to staffing vacancies and unexpended capital outlay. Expenditures in Transportation were $1,023,258 less than anticipated with savings in operating costs and unexpended capital outlay. Culture and Recreation expenditures were $3,234,051 less than budgeted primarily due to capital projects that were not completed.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets: The Village of Palm Springs' investment in capital assets for its governmental and business type activities as of September 30, 2020, amounts to $66,217,695 (net of accumulated depreciation). This investment in capital assets includes land, buildings, improvements, machinery and equipment, library books, software, roads, sidewalks, bridges, drainage and intangible assets. The governmental activities investment in capital assets increased by $2,177,672, or 13.3% compared to fiscal year 2019. The net change includes an increase in assets of $2,773,169 less an increase of $595,497 in accumulated depreciation.

Buildings increased $236,492 including a new roof on the VFW, Library renovations, and a new restroom building for Sabal Palm Park.

Improvements other than buildings increased $897,116 for the conversion of tennis courts to pickleball courts and futsal courts, a new shade structure for Royal Palm Park, and the new Foxtail Palm Park.

Machinery and equipment increased $1,204,285 less disposals for a net increase of $495,648, including $586,044 in police vehicles, $60,379 for Public Works vehicles and $93,303 for library furnishings. The Village added a larger number of laptops to address the increased need for remote capabilities due to the pandemic and the remaining purchases represent replacement items including desktops, laptops, and security access equipment.

Infrastructure increased $875,641 including paving costs for paving of Canal 11 road, improving it from a shell rock roadway when it was annexed from Palm Beach County.

Construction in progress increased $223,589, including park improvements, planning and design costs to expand the existing Police Department and a storage building for Maintenance equipment. A total of 6 projects were in progress at fiscal year-end.

The Village uses the modified approach for infrastructure reporting of its street system. The Village's policy is to maintain at least 80% of its street system in *good* or *better* condition using the Asphalt Pavement Rating categories of the Asphalt Institute. The rating completed through the most recent year continues to meet or exceed Village policy. For 2020 the estimated maintenance costs were $425,000 and the actual were $257,990. More information on the Village's Street System and condition rating can be found on page 77 of this report.

Business-type activities net investment in capital assets decreased by $169,412 or 0.4% from fiscal year 2019. This amount is net of an increase of $2,568,849 in accumulated depreciation. The increase includes $344,169 in radio read meters installed to upgrade our meter reading system from touch read meters to radio read meters, $147,230 spent to rehabilitate 3 raw water wells, two spiractors at our Pratt Water Treatment plant were replaced at a cost of $947,446, $254,180 in wastewater lining to prevent infiltration, $129,875 in vehicle replacements, $155,995 for a front-end loader, and $330,732 for three stormwater improvement projects. Construction in progress decreased $617,502 or 39.5% with 25 projects in progress at fiscal year-end.

Additional detailed information on capital assets is presented in Note 4 to the financial statements. Capital assets at September 30, 2020 and 2019 are summarized as follows:

Village of Palm Springs
Capital Assets Net of Depreciation

	Governmental Activities		Business-type Activities		Total Primary Government	
	2020	2019	2020	2019	2020	2019

Net pension liability	10,403,366	10,173,652	2,599,216	2,983,665	13,002,582	13,157,317
Total	**$ 15,791,987**	**$ 15,631,314**	**$ 13,181,023**	**$ 14,118,263**	**$ 28,973,010**	**$ 29,749,577**

The water and sewer 2003 revenue bonds were refinanced in April 2013 with a 20-year bank loan that also provided additional funds of $5 million for expansion of our wastewater lines. The interest rates on the 2003 revenue bonds ranged from 4.5% to 5.25% compared to the 2013 bank loan interest rate of 2.905%. Additional information on the Village's noncurrent liabilities can be found in Note 5, beginning on page 48 of this report.

In accordance with GASB Statement No. 68 the Village reported a net pension liability of $13,002,582, of which $10,403,366 is related to governmental activities and $2,599,216 is for business-type activities. For additional information on the Village's pension plans see Note 9, beginning on page 53 of this report.

The liability for other postemployment benefits (OPEB) increased $103,941 in 2020 to a total of $578,459, and represents the implicit rate subsidy in retiree health insurance rates. The increase reflects the latest actuarial valuation dated October 1, 2019 performed in accordance with GASB Statement No. 75. Additional information on other postemployment benefits can be found in Note 10, beginning on page 67 of this report.

NEXT YEAR'S BUDGET AND ECONOMIC FACTORS

The Village's assessed taxable value increased for the seventh consecutive year since the fiscal year 2008 recession. In fiscal year 2011 the total taxable value was $610,730,119 and declined each year thereafter reaching a low of $579,568,060 in fiscal year 2013. This fiscal year our taxable value increased $103,436,750 or 8.5% over fiscal year 2019 for a total assessed value of $1,324,815,874 and now surpassing our record high value obtained in 2008 prior to the recession. We expect this trend to continue, but at a slower rate.

The Village Council maintained the 2019 operating millage rate of 3.50 mills for 2020 and lowered the debt service millage rate by 10.5%. Property tax collections increased $311,766 or 6.8% over fiscal year 2019, while the taxable value increased 8.5%.

For 2020, property taxes increased from 23% to 26% as a percentage of total revenue due to a decline in total revenue resulting from the COVID-19 pandemic. Similarly, revenue from utility service taxes increased by 1% of total revenue while franchise fees, sales and gas taxes all decreased in amount for 2020, but remained the same percentage of total revenue as fiscal year 2019. Overall, the revenue growth for the Village is expected to turn-around in 2021 as the economy recovers after the pandemic and is expected to increase sufficiently to keep pace with Village expenditure growth.

Effective October 1, 2009 (fiscal year 2010) the Village transferred fire rescue services to Palm Beach County Fire Rescue. Palm Beach County Fire Rescue MSTU (municipal services taxing unit) now taxes Village property owners 3.4581 mills per $1,000 of taxable value. This millage rate is deducted from the Village's legal millage rate limit of 10 mills, limiting our millage rate to $6.5419.

The General Fund's unassigned fund balance of $8,095,194 at September 30, 2020 represents 31.9% of the 2021 adopted budget of $25,368,987 which is above our target range of 20-25%. The Village Council has prudently assigned $3.0 million dollars of the General Fund's fund balance for disaster recovery and $1.5 million for future capital needs.

CONTACTING THE VILLAGE'S FINANCIAL MANAGEMENT

This financial report is designed to provide our citizens, taxpayers, customers, investors and creditors with a general overview of the Village's finances and to show the Village's accountability for the money it receives. VILLAGE OF PALM SPRINGS, FLORIDA
Reconciliation of the Governmental Funds Balance Sheet
to the Statement of Net Position
September 30, 2020

Total governmental fund balances (page 19)		$ 18,325,231
Amounts reported for governmental activities in the statement of net position are different because:		
Net pension assets of defined benefit pension plans are not available, spendable resources and therefore are not reported in governmental funds.		1,512,005
Capital assets used in governmental activities are not available, spendable resources and therefore are not reported in governmental funds:		
Cost of assets	$ 29,087,592	
Accumulated depreciation	(10,508,919)	
		18,578,673
Deferred outflows/inflows of resources related to defined benefit pension and OPEB plans are reported in the statement of net position but are not reported in the governmental funds.		
Deferred outflows of resources related to pensions	$ 3,529,065	
Deferred inflows of resources related to pensions	(1,790,226)	
Deferred outflows of resources related to OPEB	58,455	
Deferred inflows of resources related to OPEB	(2,066)	
		1,795,228
Long-term liabilities, including notes payable, are not due and payable in the current period and therefore are not reported in the governmental funds. Long-term liabilities at year-end consist of:		
Note payable	$ (4,088,191)	
Accrued interest payable on long-term debt	(9,896)	
Compensated absences payable	(901,978)	
Other postemployment benefits payable	(398,452)	
Net pension liability	(10,403,366)	
		(15,801,883)
Total net position (page 16)		**$ 24,409,254**

See notes to financial statements.

Fund balances, beginning of year	16,756,633	301,918	17,058,551
Fund balances, end of year	**$ 18,021,100**	**$ 304,131**	**$ 18,325,231**

See notes to financial statements.

VILLAGE OF PALM SPRINGS, FLORIDA

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities
Year Ended September 30, 2020

Net change in fund balances - total governmental funds (page 21)		$ 1,266,680
Amounts reported for governmental activities in the statement of activities are different because:		
Governmental funds report capital outlays as expenditures, however, in the statement of activities the cost of those assets is depreciated over their estimated useful lives:		
Expenditures for capital assets	$ 3,484,721	
Less current year depreciation expense	(1,305,885)	
		2,178,836
In the statement of activities, only the gain or loss on the sale of capital assets is reported, whereas in the governmental funds the proceeds from the sale increases financial resources. The change in net position differs from the change in fund balance by the net book value of the assets retired.		(1,164)
Some expenses reported in the statement of activities are not reported in the governmental funds because they have no effect on current financial resources:		
Compensated absences	$ (163,256)	
Other postemployment benefits	(18,048)	
Pension expense	448,618	
		267,314
Net effect of accrued interest on long-term debt (difference between amount accrued in prior year and current year accrual)		740
Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net position. In the current year, these amounts consist of:		
Principal payments on long-term debt		305,496
Change in net position of governmental activities (pages 17-18)		**$ 4,017,902**

See notes to financial statements.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Village of Palm Springs, Florida (the "Village"), was incorporated in 1957 pursuant to Chapter 57-1698, Laws of Florida and is located in central Palm Beach County, Florida. The Village operates under the Council-Manager form of government and provides a wide range of community services including public safety, planning and zoning, water, wastewater and stormwater systems, sanitation, streets and roads, parks, recreation, and library. The Village Council ("The Council") is responsible for legislative and fiscal control of the Village.

The basic financial statements of the Village have been prepared in conformity with U.S. generally accepted accounting principles ("GAAP") as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for establishing governmental accounting and financial reporting principles.

The significant Village accounting policies are described below.

Financial Reporting Entity

As required by U.S. generally accepted accounting principles, the basic financial statements present the primary government and its component units. Component units are legally separate entities for which the primary government is considered to be financially accountable and for which the nature and significance of their relationship with the primary government are such that exclusion would cause the Village's financial statements to be misleading or incomplete. The primary government is considered financially accountable if it appoints a voting majority of an organization's governing body and imposes its will on that organization. The primary government may also be financially accountable if an organization is fiscally dependent on the primary government, regardless of the authority of the organization's governing board.

The Village has one dependent special district, created pursuant to Florida Statutes, that is considered a component unit.

The *Palm Springs Community Redevelopment Agency* (the "CRA") is a dependent special district established by the Village under authority granted by Florida Statutes Chapter 163, Section III. The CRA is a legally separate entity established by Ordinance No. 2019-19 of the Palm Springs Village Council on November 14, 2019. The purpose of the CRA is to promote and guide the physical and economic redevelopment of approximately 512 acres in two districts within the Village. The CRA is governed by a seven member Governing Board that includes the five members of the Village Council and two additional members appointed by the Village Council representing the two CRA districts. The Mayor of the Village serves as the Chair of the CRA Governing Board. The Village Council approves the CRA's annual budget and all debt obligations of the CRA. Accordingly, the CRA is considered a blended component unit of the Village. The CRA's first year of operations will be for the year ending September 30, 2021.

Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the Village. *Governmental activities*, which are normally supported by taxes and intergovernmental revenues, are reported separately from *Business-type activities*, which rely to a significant extent on user fees and charges for support.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Government-Wide and Fund Financial Statements (Continued)

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, enterprise funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. The major governmental fund and the major enterprise fund are reported as separate columns in the fund financial statements.

Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the enterprise fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the grantor are met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Village considers revenues to be available if they are collected within 60 days of the end of the current fiscal year. Franchise taxes, utility service taxes, business taxes, and interest revenues associated with the current fiscal year are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal year. All other revenue items are considered to be measurable and available only when cash is received by the Village, except for grant revenue, which is recorded when the related expenditures/ expenses are incurred and the time and purpose restrictions have been met.

Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, are recorded only when payment is due.

For purposes of measuring the net pension liability, deferred inflows/outflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Village's defined benefit pension plans and Florida Retirement System (FRS) and the additions to/deductions from the fiduciary net position, have been determined on the same basis as they are reported by the Village's defined benefit pension plans and FRS. For purposes of measuring the total OPEB liability, deferred inflows/outflows of resources related to OPEB, and OPEB expense, have been determined on the same basis as reported by the Village. For this purpose, pension and OPEB benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Measurement Focus, Basis of Accounting and Financial Statement Presentation (Continued)

The Village reports one major governmental fund as follows:

General Fund

The General Fund is the primary operating fund of the Village. All general revenues and other receipts that are not allocated by law or contractual agreement to another fund are accounted for in this fund. The general operating expenditures and capital improvement costs that are not paid through other funds are paid from the General Fund.

The Village reports one major enterprise fund as follows:

Water and Sewer Utility Fund

This fund is used to account for operations that provide a service to citizens, financed primarily by a user charge, and where the periodic measurement of net income is deemed appropriate for capital maintenance, public policy, management control, accountability or other purposes. The Water and Sewer Utility Fund is used to account for water and sewer services provided by the Village to residents and other users.

Additionally, the Village reports the following fund types:

Nonmajor Governmental Funds

Special Revenue Fund

Special revenue funds are used to account for the proceeds of specific revenue sources (other than major capital projects) requiring separate accounting because of legal or regulatory provisions or administrative action. The special revenue fund used by the Village is the *Law Enforcement Fund* which accounts for proceeds from law enforcement forfeitures. Expenditures from this fund are legally restricted for law enforcement.

Debt Service Fund

The Village has one debt service fund used to account for assets held for the repayment of principal and interest on general obligation debt.

Nonmajor Enterprise Fund

The Village has one nonmajor enterprise fund, the *Stormwater Fund*, that is used to account for stormwater fees and related expenses for stormwater management.

Fiduciary Funds

Pension trust funds are used to account for assets held in a trustee capacity for retirement pensions. Pension trust funds are fiduciary funds. The Village has two defined benefit pension funds; one for General Employees and one for Police Officers.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are charges between the Village's utility functions and various other functions of the Village. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Measurement Focus, Basis of Accounting and Financial Statement Presentation (Continued)

Enterprise funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the enterprise funds' principal ongoing operations. The principal operating revenues of the Village's Water and Sewer and Stormwater Utility Funds are charges to customers for services. Operating expenses for enterprise funds include the cost of services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances

a. Pooled Cash, Cash Equivalents and Investments

Pooled cash, cash equivalents and investments consist of cash on hand, interest-bearing cash accounts and investments with Florida Prime, a local government investment pool administered by the Florida State Board of Administration ("SBA"). Cash balances and the requirements of all funds are considered in determining the amount to be invested.

Investments are reported at fair value, which is determined by using various third party pricing sources. The Florida Prime investment pool is operated as a "2a-7 like" pool and the fair value of this investment is considered to be the same as the Village's account balance (amortized cost) in the pool. The SBA administers the Florida Prime investments pursuant to Chapter 19-7 of the Florida Administrative Code which provides guidance and establishes the general operating procedures for the administration of Florida Prime.

Cash and cash equivalents, for purposes of the statement of cash flows, include pooled cash and investments which are defined as short-term, highly liquid investments with original maturities of three months or less.

b. Inventory

Inventory consists of materials and supplies which are carried at cost in the governmental funds and at the lower of cost (first-in, first-out) or market in the enterprise fund. The Village uses the consumption method, wherein all inventories are maintained by perpetual records, expensed when used, and adjusted by an annual physical count.

c. Unbilled Service Receivables

The Water and Sewer Utility Fund recognizes revenue on the basis of monthly cycle billings to customers for services provided. As a result of this cycle billing method, there are unbilled receivables at the end of each fiscal year with respect to services provided but not billed at such date. It is the policy of the Village to accrue these amounts at year end.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

d. Concentration of Credit Risk

The Village requires customer deposits for water and sewer service and maintains an allowance for doubtful accounts at a level which management believes is sufficient to cover potential credit losses.

e. Capital Assets

Capital assets, which include property, plant, and equipment, intangible assets and infrastructure assets (e.g., roads, bridges, sidewalks, drainage, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the Village as assets with an initial individual cost of $1,000 or more and an estimated life in excess of one year.

Purchased or constructed assets are recorded at actual cost or estimated historical cost if actual cost is unavailable. Donated capital assets are recorded at acquisition value, which is the price that would be paid to acquire an asset with equivalent service potential in an orderly market transaction at the date of acquisition. General governmental infrastructure assets acquired or constructed since incorporation in 1957 have been capitalized.

The accounting and reporting treatment applied to the capital assets associated with a fund are determined by its measurement focus. General capital assets are the assets of the Village as a whole. When purchased, such assets are recorded as expenditures in the governmental funds and capitalized as assets in the government-wide statement of net position. General capital assets are carried at historical cost. Where cost cannot be determined from the available records, estimated historical cost has been used to record the estimated value of the assets. The street network was valued based on current construction costs discounted by consumer price indices for highway construction.

Capital assets of the enterprise fund are capitalized in the fund and in the government-wide statement of net position. The valuation basis for enterprise fund capital assets is the same as that used for general capital assets. Interest cost was capitalized on enterprise fund capital assets during the construction period prior to adoption of GASB Statement No. 89 in 2018. Additions, improvements, and other capital outlay that significantly extend the useful life of an asset are capitalized. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

In the government-wide financial statements and in the enterprise fund financial statements, the cost of property sold or retired, together with the related accumulated depreciation, is removed from the appropriate accounts and any resulting gain or loss is included in the change in net position.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

e. Capital Assets (Continued)

Capital assets of the Village are depreciated using the straight-line method over the following estimated useful lives:

Buildings	30-50 years
Improvements	10-50 years
Intangible assets	22-40 years
Software / library materials	3-5 years
Equipment and vehicles	3-20 years

The street network (pavement, drainage, sidewalks, and curbs) is not depreciated. The Village has elected to use the modified approach in accounting for its streets. The modified approach allows governments to report as expenses in lieu of depreciation, infrastructure expenditures which maintain the asset but do not add to or improve the asset. Additions and improvements to the street network are capitalized. The Village uses a pavement rating system to rate street condition and quantify the results of maintenance efforts. The condition rating of the Village's street system may be found on page 77.

f. Unearned / Unavailable Revenue

Unearned revenue in the Governmental Activities and unavailable revenue in the Governmental Funds includes amounts received in advance by the Village for business taxes applicable to the following fiscal year. Unavailable revenue in the Governmental Funds also includes amounts due in future years that were not available to pay current period expenditures under the modified accrual basis of accounting.

g. Compensated Absences

The Village's employees earn personal leave time based on their years of continuous service as follows: 160 hours after 1 year; 200 hours after 6 years; 240 hours after 11 years; and 280 hours after 21 years. Personal leave may be used for vacation, illness and other time off as approved by the employee's supervisor. Employees may accumulate personal leave time up to a maximum number of hours based on years of service, but never more than 600 hours. Employees are also required to use a minimum number of hours of personal leave time annually based upon years of service, or forfeit the unused hours up to the minimum required to be used, however, employees may be compensated for unused personal leave, up to a maximum of 80 hours annually, if their unscheduled leave does not exceed certain limits each year. Upon termination, employees are compensated for accumulated personal leave at their rate of pay at termination, up to the maximum of 600 hours. A liability for compensated absences is accrued when incurred in the government-wide and enterprise fund financial statements. In the governmental funds, a liability is recorded for compensated absences only if they have matured, for example, as a result of employee resignations and retirements, and the amount, if any, is reported with accounts payable and accrued liabilities in the governmental funds' balance sheet.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

h. Noncurrent Obligations

In the government-wide financial statements and enterprise fund financial statements, long-term debt and other noncurrent obligations are reported as liabilities in the applicable governmental activities, business-type activities, or enterprise fund statement of net position. Long-term debt is reported net of applicable premium or discount. Debt discount, premium and deferred amount on debt refunding in the government-wide financial statements and enterprise fund are amortized using the straight-line method, which approximates the interest method, and are charged against operations over the term of the related debt issues.

In the fund financial statements, governmental fund types recognize debt premiums and discounts during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs are reported as debt service expenditures.

i. Deferred Outflows / Inflows of Resources

In addition to assets and liabilities, the government-wide and Enterprise Fund Statements of Net Position and the governmental funds Balance Sheet report a separate section for deferred outflows or deferred inflows of resources. The separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until that time. The Village's deferred outflows of resources are related to its pension and other postemployment benefits (OPEB) liabilities.

The separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenues) until that time. The Village's deferred inflows are related to its pension obligations, OPEB liabilities and a deferred amount on debt refunding, which are reported as deferred inflows of resources on the government-wide Statement of Net Position. The deferred amount on debt refunding was a gain resulting from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. In addition, the Village has another item, unavailable revenues, which arises only under the modified accrual basis of accounting and is reported as a deferred inflow of resources on the governmental funds Balance Sheet. The unavailable revenues result from business taxes received by the Village in advance of the year for which they were levied. These amounts are deferred and recognized as an inflow of resources in the year that the amounts become available.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

j. Fund Balances

Nature and Purpose of Fund Equity Classifications: In the fund financial statements, governmental funds report fund equity classifications that comprise a hierarchy based primarily on the extent to which the Village is legally bound to honor the specific purposes for which amounts in fund balance may be spent. The fund balance classifications are summarized as follows:

- Nonspendable - Nonspendable fund balances include amounts that cannot be spent because they are either 1) not in spendable form; or, 2) legally or contractually required to be maintained intact.
- Restricted - Restricted fund balances include amounts that are restricted to specific purposes either by 1) constraints placed on the use of resources by creditors, grantors, contributors, or laws or regulations of other governments; or, 2) imposed by law through constitutional provisions or enabling legislation.
- Committed - Committed fund balances include amounts that can only be used for specific purposes pursuant to constraints imposed by the Village Council through an Ordinance. The Village had no committed fund balances.
- Assigned - Assigned fund balances include amounts that are constrained by the Village's intent to be used for specific purposes but are neither restricted nor committed. Assignments of fund balance are made by Village management based upon a Resolution adopted by the Village Council or in the Village's annual budget.
- Unassigned - Unassigned fund balance includes the General Fund amount that is spendable and has not been restricted, committed, or assigned to specific purposes.

The Village considers restricted fund balances to be spent when an expenditure is incurred for the restricted purpose. The Village considers committed, assigned or unassigned fund balances to be spent when an expenditure is incurred for purposes for which amounts in any of those fund balance classifications could be used.

Minimum Fund Balance Policy: The Village Council has not adopted a formal minimum fund balance policy. Generally, the Village strives to maintain sufficient General Fund fund balance to provide liquidity in the event of a budget shortfall or natural disaster.

k. Interfund Transactions

During the course of normal operations, it is necessary for the Village to enter into transactions among its various funds. These transactions consist of one or more of the following types:

- Reimbursements to a fund, which are generally reflected through the allocation of pooled cash accounts, for expenditures or expenses initially made from it that are properly applicable to another fund.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

k. Interfund Transactions (Continued)

- Transfers in and out, as appropriate, for all other interfund transactions, which are shown as other financing sources or uses.
- Outstanding balances between funds, including noncurrent advances, are reported as "due to/from other funds". Any such balances outstanding between governmental activities and business-type activities in the government-wide financial statements are classified as "internal balances" and are subject to elimination in the government-wide financial statements.

l. Property Taxes

Under Florida law, the assessment of all properties and the collection of all county, municipal and school board property taxes are consolidated in the offices of the County Property Appraiser and County Tax Collector, respectively. All property is reassessed according to its fair market value on January 1 of each year and each assessment roll is submitted to the State Department of Revenue for review to determine if the assessment roll meets the appropriate requirements of State law. The assessed value of property within the corporate limits of the Village at January 1, 2019, upon which the 2019/2020 levy was based, was approximately $1.325 billion. State Statutes permit municipalities to levy property taxes at a rate of up to 10 mills (1 mill equals $1.00 for each $1,000 of assessed value). Effective October 1, 2009 (fiscal year 2010), the Village transferred fire rescue services to Palm Beach County and the Palm Beach County Fire Rescue MSTU (municipal services taxing unit) taxes Village property owners 3.4581 mills. This millage rate is deducted from the Village's legal millage rate limit of 10 mills, thereby limiting the 2019/2020 Village millage rate to 6.5419.

The tax levy of the Village is established by the Village Council prior to October 1 of each year during the budget process. The Palm Beach County Property Appraiser incorporates the Village's millage into the total tax levy, which includes the County, County School Board, and Special District tax requirements. The operating millage rate assessed by the Village for the year ended September 30, 2020, was 3.5000 and the debt service millage was 0.3381, for a total millage of 3.8381. Taxes may be paid less a 4% discount in November or at a discount declining 1% each month through February. All unpaid taxes become delinquent on April 1 following the year in which they are assessed. Delinquent taxes on real property bear interest at 18% per year. On or prior to June 1 following the tax year, certificates are offered for sale for all delinquent taxes on real property. After sale, tax certificates bear interest at 18% per year or at any lower rate bid by the buyer. Application for a tax deed on any unredeemed tax certificates may be made by the certificate holder after a period of two years. Unsold certificates are held by the County. Delinquent taxes on personal property bear interest at 18% per year until the tax is satisfied either by seizure and sale of the property or by the five-year statute of limitations. All property taxes are collected by Palm Beach County and remitted to the Village. Property tax revenue is recognized at the time monies are received from Palm Beach County.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

l. Property Taxes (Continued)

During 2007 the Florida Legislature passed property tax reform legislation limiting the property tax levies of local governments in the State of Florida. Local governments that adopt a property tax levy in excess of the limit under State law will lose their Half-Cent Sales Tax distribution from the State for the succeeding twelve months. For the fiscal year ending September 30, 2020, the maximum tax levy allowed by a majority vote of the governing body is generally based on a percentage change applied to the prior year (2018/2019) property tax revenue. The percentage change is calculated based on the compound annual growth rate in the per capita property taxes levied for five preceding fiscal years. The State law allows local governments to adopt a higher millage rate based on the following approval of the governing body: 1) a majority vote to adopt a rate equal to the adjusted current year rolled-back millage rate plus an adjustment for growth in per capita Florida personal income; 2) a two-thirds vote to adopt a rate equal to the adjusted current year roll back millage rate plus 10%; or, 3) any millage rate approved by unanimous vote or referendum. For the fiscal year ending September 30, 2020, the Village adopted an operating millage rate of 3.5000, resulting in a total operating tax levy of $5,085,728 for 2020, an increase of approximately 7.4% from the operating property tax levy for 2019.

Future legislation could have a significant impact on the future tax revenues of the Village and the current services provided to Village residents.

m. On-behalf Payments

The Village received on-behalf payments of $153,120 from the State of Florida for the Police Officers Pension Plan for the year ended September 30, 2020. The on-behalf payments are recorded as intergovernmental revenue and public safety expenses/ expenditures in the government-wide and General Fund financial statements.

n. Use of Estimates

The financial statements and related disclosures are prepared in conformity with GAAP. Management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, deferred inflows/outflows of resources, the disclosure of contingent assets and liabilities at the date of the financial statements, and revenue and expenses/expenditures during the period reported. These estimates include assessing the collectability of receivables, the fair value of investments, and useful lives and possible impairment of tangible and intangible assets, among others. Estimates and assumptions are reviewed periodically and the revisions are reflected in the financial statements in the period they are determined to be necessary. Actual results could differ from the estimates.

o. Implementation of GASB Statements

There were no new GASB Statements effective for the Village for the fiscal year ended September 30, 2020.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

o. Implementation of GASB Statements (Continued)

The Governmental Accounting Standards Board has issued new Statements effective in future years that may apply to the Village. Management has not completed its analysis of the effects, if any, of these GASB statements on the financial statements of the Village:

- GASB Statement No. 84, *Fiduciary Activities*, establishes guidance regarding what constitutes fiduciary activities for accounting and financial reporting purposes, the recognition of liabilities to beneficiaries, and how fiduciary activities should be reported. The requirements of this Statement will be effective for the Village for the fiscal year ending September 30, 2021.
- GASB Statement No. 87, *Leases*, addresses accounting and financial reporting for leases by governments. The statement requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. The requirements of this Statement will be effective for the Village for the fiscal year ending September 30, 2022.
- GASB Statement No. 90, *Majority Equity Interests, an amendment of GASB Statement No. 14 and No. 61,* establishes guidance regarding the reporting of a government's majority equity interest in a legally separate organization and the disclosure of financial statement information for certain component units. This Statement will be effective for the Village for the fiscal year ending September 30, 2021.
- GASB Statement No. 91, *Conduit Debt Obligations*, provides a single method of reporting conduit debt obligations by issuers and eliminates diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. This Statement will be effective for the Village for the fiscal year ending September 30, 2023.
- GASB Statement No. 92, *Omnibus 2020*, addresses certain practice issues identified during implementation and application of certain GASB Statements, including 1) the effective date of GASB Statement No. 87 and Implementation Guide 2019-3 related to *Leases* for interim reports; 2) reporting of intra-entity transfers between a primary government employer and component unit defined benefit pension plan; 3) the applicability of GASB Statement No. 73 to reporting assets accumulated for OPEB; 4) applicability of GASB Statement No. 84 to postemployment benefit arrangements; 5) measurement of assets and liabilities related to asset retirement obligations; 6) reporting for amounts recoverable by public entity risk pools from reinsurers or excess insurers; and 7) certain terminology references. The requirements of this Statement related to items 1) and 7) are effective for the fiscal year ending September 30, 2021 and the remaining requirements will be effective for the Village for the fiscal year ending September 30, 2022.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Assets, Liabilities, Deferred Outflows / Inflows of Resources, and Net Position / Fund Balances (Continued)

o. Implementation of GASB Statements (Continued)

- GASB Statement No. 93, *Replacement of Interbank Offered Rates,* addresses the replacement of an Interbank Offered Rate (IBOR) with other reference interest rates and modifies the existing provisions for hedge accounting termination and lease modifications. This Statement will be effective for the Village for the fiscal year ending September 30, 2022.
- GASB Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements,* addresses issues related to public-private and public-public partnerships (PPP) and provides guidance for accounting and financial reporting for availability payment arrangements (APA). The Statement provides specific guidance on the accounting and financial reporting for PPP and APA transactions. This Statement will be effective for the Village for the fiscal year ending September 30, 2023.
- GASB Statement No. 96, *Subscription-Based Information Technology Arrangements* provides guidance on the accounting and financial reporting for subscription-based information technology arrangements. This Statement will be effective for the Village for the fiscal year ending September 30, 2023.
- GASB Statement No. 97, *Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans,* addresses the reporting of fiduciary component units without a governing board, requires that the financial burden criteria of Statement No. 84 apply only to defined benefit plans and requires Statement No. 84 to be applied to all Section 457 plans to determine whether those plans should be reported as fiduciary activities. The requirements of this Statement will be effective for the Village for the fiscal year ending September 30, 2022.

NOTE 2. DEPOSITS AND INVESTMENTS

A summary of deposits and investments as shown on the statement of net position and statement of fiduciary net position for the Village is as follows:

	Cash and Cash Equivalents	Investments	Total
Governmental activities	$ 17,947,593	$ -	$ 17,947,593
Business-type activities	33,445,149	-	33,445,149
Total statement of net position	**51,392,742**	**-**	**51,392,742**
Fiduciary Funds	1,830,229	62,456,619	64,286,848
Total deposits and investments	**$ 53,222,971**	**$ 62,456,619**	**$ 115,679,590**

NOTE 2. DEPOSITS AND INVESTMENTS (Continued)

Deposits

In addition to insurance provided by the Federal Depository Insurance Corporation, deposits are held in banking institutions approved by the State Treasurer of the State of Florida to hold public funds as qualified public depositories. Under Florida Statutes Chapter 280, Florida Security for Public Deposits Act, the State Treasurer requires all Florida qualified public depositories to deposit eligible collateral with the State Treasurer or another banking institution. In the event of failure of a qualified public depository, all claims for government deposits would be satisfied by the State Treasurer from the proceeds of federal deposit insurance, pledged collateral of the public depository in default and, if necessary, a pro rata assessment to the other qualified public depositories participating in the collateral pool. Accordingly, the Village's deposits at year end are considered to be fully insured.

Investments

The Village has adopted an investment policy to establish guidelines for the efficient management of its cash reserves. Section VI of the investment policy identifies permitted instruments as follows:

a. The State Board of Administration Florida Prime Fund;

b. U.S. Government obligations and U.S. Government Agency obligations;

c. Securities of, or other interests in any open-end or closed-end management type investment company or investment trust registered under the Investment Company Act of 1940, provided the portfolio of such investment company or investment trust is limited to United States Government obligations and to repurchase agreements fully collateralized by such United States Government obligations, and provided such investment company or investment trust takes delivery of such collateral either directly or through an authorized custodian;

d. Certificates of deposit and savings accounts in state-certified qualified public depositories; and,

e. Repurchase agreements.

Investments of the General Employees Pension Fund and the Police Officers Pension Fund are limited to:

a. Money Market - Money market mutual funds or short-term investment funds ("STIF") provided by the Plan's custodian must have a minimum rating of Standard & Poor's A1 or Moody's P1.

b. Equities - Equities must be traded on a national exchange or electronic network; and not more than 5% of the Plans' assets, at the time of purchase, can be invested in the common stock, capital stock or convertible stock of any one issuing company, nor can the aggregate investment in any one issuing company exceed 5% of the outstanding capital stock of the company (this restriction does not apply to any single holding within a diversified pooled fund).

NOTE 2. DEPOSITS AND INVESTMENTS (Continued)

Investments (Continued)

c. Fixed Income - Fixed income investments shall have a minimum rating of investment grade or higher as reported by any Nationally Recognized Statistical Rating Organization (NRSRO) at the time of purchase; and the value of bonds issued by any single corporation cannot exceed 10% of the total fund (excluding issues from the U.S. government, or agency thereof; and this restriction does not apply to any single holding within a diversified pooled fund).

d. Pooled Funds - Pooled funds may include mutual funds, commingled funds, and exchange-traded funds.

Fair Value of Investments

The fair value of the Village's cash and cash equivalents at September 30, 2020 are as follows:

	Unrestricted	Pension
Cash and cash equivalents:		
Petty cash	$ 3,848	$ -
Deposits with financial institutions	32,529,168	547,829
Investment in State Board of Administration Florida Prime Fund	18,859,726	-
Money market mutual funds	-	1,282,400
Total cash and cash equivalents	**$ 51,392,742**	**$ 1,830,229**

The Village follows the provisions of GASB Statement No. 72, *Fair Value Measurement and Application*, which establishes a framework for measuring the fair value of investments in a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under GASB Statement No. 72 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets in active markets that the Village has the ability to access at the measurement date.

Level 2: Inputs to the valuation methodology include the following:

- Quoted prices for similar assets in active markets.
- Quoted prices for identical or similar assets in inactive markets.
- Inputs other than quoted prices that are observable for the assets.
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset has a specified contractual term, the Level 2 input must be observable for substantially the full term of the asset.

NOTE 2. DEPOSITS AND INVESTMENTS (Continued)

Fair Value of Investments (Continued)

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement. These unobservable inputs reflect the entity's own estimates for assumptions that market participants would use in pricing the asset or liability. Valuation techniques would typically include discounted cash flow models and similar techniques, but may also include the use of market prices of assets that are not directly comparable to the subject asset.

The fair value measurement of an asset within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs. The categorization of an investment within the fair value hierarchy is based upon the pricing transparency of the investment and does not necessarily correspond to the Village's perceived risk of that investment.

Valuation Methodologies: The following valuation methods and assumptions were used by the Village in estimating the fair value of financial instruments that are measured at fair value on a recurring basis under GASB Statement No. 72.

Domestic and foreign equity securities: Valued at the closing price reported on the active exchange on which the individual securities are traded.

International fixed income mutual fund and equity mutual funds: Valued at the closing net asset value reported on the active exchange on which the investment fund is actively traded.

U.S. Treasury, U.S. Government Agency, mortgage and asset-backed securities, and corporate bonds: Valued at the closing price reported on the active exchange on which the individual securities are actively traded (Level 1). Securities that are not actively traded are valued by the independent investment custodian using a matrix-pricing technique based on the securities' relationship to quoted benchmark prices (Level 2).

Investment measured at net asset value (NAV): The real estate investment account consists of units in the U.S. Property Separate Account (the "Account") sponsored by the Principal Life Insurance Company and managed by Principal Real Estate Investors. The account is an open end, commingled real estate account valued at the unadjusted NAV per unit at September 30, 2020, based on the fair value of the underlying Account investments as determined by the Account manager. Real estate values are generally based upon periodic independent appraisals performed for assets held by the Account. The fair value of real estate is the price that would be received if the asset was sold to a market participant assuming the highest and best use of each asset at the measurement date. At September 30, 2020, the real estate investment account had no future funding commitments or lock-up periods and was redeemable with 90 days' notice, subject to approval of the fund manager and fund liquidity.

The methods and assumptions described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Village believes its valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. There were no changes in the methods and assumptions used for the year ended September 30, 2020.

NOTE 2. DEPOSITS AND INVESTMENTS (Continued)

Fair Value of Investments (Continued)

The financial assets measured at fair value on a recurring basis include the Village's pension funds' investments. There were no liabilities measured at fair value on a recurring basis at September 30, 2020. The fair value of the Village's investments at September 30, 2020 is summarized as follows:

	Level 1	Level 2	Level 3	Total
Equity investments				
Domestic equity securities and mutual fund	$ 34,661,163	$ -	$ -	$ 34,661,163
Foreign equity securities and mutual fund	6,643,750	-	-	6,643,750
Total equity securities	41,304,913	-	-	41,304,913
Fixed Income investments				
U.S. Treasury	-	1,105,153	-	1,105,153
U.S. Government Agency	-	5,964,839	-	5,964,839
Mortgage and asset-backed	-	532,121	-	532,121
Corporate bonds	-	5,696,905	-	5,696,905
International fixed income mutual fund	-	2,302,727	-	2,302,727
Total fixed income securities	-	15,601,745	-	15,601,745
Total investments by level	$ 41,304,913	$ 15,601,745	$ -	56,906,658
Investment measured at NAV				
Real estate investment account				5,549,961
Total fair value				$ 62,456,619

Credit Risk: Credit risk is the risk that a debt issuer will not fulfill its obligations. The Village investment policy requires that pension investments in fixed income securities must be rated as investment grade (BBB or better) by a Nationally Recognized Statistical Rating Organization (NRSRO). The money market mutual funds and fixed income mutual fund are not rated. The Village utilizes ratings from Standard and Poor's and Moody's Investor Services for its investments. The NRSRO ratings for the Village's investments at September 30, 2020 are summarized as follows:

Investment Type	NRSRO Rating	Fair Value
State Board of Administration Florida Prime Fund	AAAm	$ 18,859,726
Pension fund investments:		
U.S. Treasury	AAA	1,105,153
U.S. Government Agency	AAA	5,449,963
U.S. Government Agency	Not Rated	514,876
Mortgage and asset-backed securities	Not Rated	532,121
Domestic corporate bonds	A	5,696,905
Total		**$ 32,158,744**

NOTE 2. DEPOSITS AND INVESTMENTS (Continued)

Fair Value of Investments (Continued)

Interest Rate Risk: Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment in debt securities. Generally, the longer the time to maturity, the greater the exposure to interest rate risk. The Village does not have a formal policy that limits the maturities of its investments. The Village pension funds' investment in mortgage and asset-backed securities consist of mortgage pass-through securities based on pools of residential home mortgage loans which are subject to prepayments and therefore highly sensitive to changes in interest rates. The table below summarizes the scheduled maturities of fixed income investment securities at September 30, 2020.

	Fair Value of Investment Maturities			
Investment Type	**Less Than One Year**	**One to Five Years**	**Six to Ten Years**	**More Than Ten Years**
Pension fund investments:				
U.S. Treasury	$ -	$ 85,139	$ 1,020,014	$ -
U.S. Government Agency	3,299,795	2,665,044	-	-
Mortgage and asset-backed securities	-	16,009	67,257	448,855
Corporate bonds	-	2,419,223	2,325,271	952,411
Total	**$ 3,299,795**	**$ 5,185,415**	**$ 3,412,542**	**$ 1,401,266**

The SBA Florida Prime Fund had a weighted average maturity of 48 days at September 30, 2020. The fair value and weighted average maturity of the international fixed income mutual fund were $2,302,727 and 2.3 years, respectively, at September 30, 2020.

Custodial Credit Risk: Custodial credit risk is defined as the risk that the Village may not recover cash and investments held by another party in the event of a financial failure. The Village investment policy requires cash and investments to be fully insured or collateralized, or held in independent custodial safekeeping accounts in the name of the Village. At September 30, 2020, all investments were held by an independent custodian in the name of the Village, except the State Board of Administration Florida Prime Fund and money market mutual funds which are considered *unclassified* pursuant to GASB Statement No. 3.

Concentration of Credit Risk: Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. For investments other than the Village pension funds, there is no specific policy for concentration of credit risk. In the Village pension funds, securities of a single issuer are limited to no more than 5% of the Plan's net position invested in common stocks and debt securities. At September 30, 2020, four mutual fund investments of the Police Officers Pension Fund represented approximately 27.6%, 15.7%, 14.9% and 9.5% of that Plan's net position and four mutual fund investments of the General Employees Pension Fund represented approximately 25.2%, 9.6%, 7.5% and 6.1% of that Plan's net position. Securities of a single issuer owned by each mutual fund are less than 5% of each Plan's net position.

NOTE 2. DEPOSITS AND INVESTMENTS (Continued)

Fair Value of Investments (Continued)

Market Risk: The value, liquidity, and related income of certain investments in real estate and securities with contractual cash flows, such as mortgage and asset-backed securities, collateralized mortgage obligations and mutual funds investing in these securities or entities, are particularly sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates and financial markets.

The U.S. financial markets experienced significant market fluctuations in 2020 due to the global coronavirus pandemic (COVID-19). While these market fluctuations were temporary in nature and substantially recovered by September 30, 2020, the global financial markets and the Village's investments could experience increased volatility, losses in fair value and reduced earnings if the pandemic continues and such changes could be material.

Due to the foregoing risks associated with investments, it is at least reasonably possible that changes in the values of investments will occur in the near term and such changes could materially affect the amounts reported in the accompanying financial statements.

NOTE 3. RECEIVABLES

Receivables at September 30, 2020 are summarized as follows:

	Governmental Activities	Business-type Activities	Total
Receivables:			
Accounts and other receivables	$ 597,078	$ 3,510,510	$ 4,107,588
Intergovernmental and grants	835,079	-	835,079
Gross receivables	1,432,157	3,510,510	4,942,667
Less: allowance for uncollectible accounts	-	(92,897)	(92,897)
Net receivables	**$ 1,432,157**	**$ 3,417,613**	**$ 4,849,770**

NOTE 4. CAPITAL ASSETS

Capital assets activity for the year ended September 30, 2020 was as follows:

Governmental Activities	Beginning Balance	Additions	Deletions	Ending Balance
Capital assets not being depreciated:				
Land	$ 729,641	$ -	$ -	$ 729,641
Infrastructure	4,656,627	875,641	-	5,532,268
Construction in progress	856,122	902,053	(678,464)	1,079,711

NOTE 4. CAPITAL ASSETS (Continued)

Depreciation expense for the year ended September 30, 2020 was charged to functions as follows:

Governmental Activities:	
General government	$ 222,703
Public safety	655,045
Transportation	129,268
Culture/recreation	298,869
Total depreciation expense-Governmental activities	**$ 1,305,885**
Business-type activities:	
Water & Sewer	**$ 3,006,253**

NOTE 5. LONG-TERM DEBT

Changes in Long-Term Debt

Changes in long-term debt for the year ended September 30, 2020 are summarized as follows:

	Beginning Balance	Additions	Deletions	Ending Balance	Due Within One Year
Governmental Activities:					
General obligation note	$ 4,393,687	$ -	$ (305,496)	$ 4,088,191	$ 312,841
Compensated absences	738,722	547,672	(384,416)	901,978	95,990
Total Governmental Activities	**$ 5,132,409**	**$ 547,672**	**$ (689,912)**	**$ 4,990,169**	**$ 408,831**
Business-type Activities:					
Promissory note	$ 10,775,261	$ -	$ (633,811)	$ 10,141,450	$ 652,355
Compensated absences	210,072	247,049	(196,771)	260,350	24,548
Total Business-type Activities	**$ 10,985,333**	**$ 247,049**	**$ (830,582)**	**$ 10,401,800**	**$ 676,903**
Totals	**$ 16,117,742**	**$ 794,721**	**$ (1,520,494)**	**$ 15,391,969**	**$ 1,085,734**

NOTE 5. LONG-TERM DEBT (Continued)

Governmental Activities

The governmental activities long-term debt consisted of the following at September 30, 2020:

$6,477,462 General Obligation Note, Series 2012

The Series 2012 G.O. Note is a general obligation Promissory Note dated February 24, 2012 for an original principal amount of $6,477,462. From February 24, 2012 to December 31, 2017, the outstanding principal amount bears interest at 2.39%, and from January 1, 2018 to February 1, 2032, the outstanding principal amount bears interest at 2.905%. Payments are due in variable semi-annual installments, including interest, on each February 1st and August 1st. The Series 2012 G.O. Note is secured by the full faith, credit and taxing power of the Village. The proceeds of the Series 2012 G.O. Note were used to refund outstanding general obligation bonds of the Village. There was no gain or loss on the refunding. The refunding reduced the Village's debt service payments by approximately $2.2 million and resulted in an economic gain of approximately $100,000.

The 2012 G.O. Note includes a provision that in the event of a default under the Loan Agreement or Note, which includes any default in the due and punctual payment of an obligation in an amount in excess of $100,000 to any other obligee, the bank may declare all obligations of the Village under the Loan Agreement and Note to be immediately due and payable.

Annual debt service requirements on the Note are as follows:

Year Ending September 30,	Principal	Interest	Total
2021	$ 312,841	$ 116,494	$ 429,335
2022	320,362	107,352	427,714
2023	328,065	97,991	426,056
2024	335,953	88,405	424,358
2025	344,030	78,588	422,618
2026-2030	1,848,269	237,220	2,085,489
2031-2032	598,671	17,459	616,130
Total	**$ 4,088,191**	**$ 743,509**	**$ 4,831,700**

General obligation debt is generally liquidated by the Debt Service Fund. Compensated absences, pension liabilities and other postemployment benefit liabilities are generally liquidated by the General Fund.

Business-type Activities

The business-type activities long-term debt is secured by a pledge of and lien on the net revenues derived from the operations of the water and sewer system and consisted of the following for the year ended September 30, 2020:

NOTE 5. LONG-TERM DEBT (Continued)

Business-Type Activities (Continued)

$14,352,351 Promissory Note, Series 2013

The Series 2013 Note was issued April 15, 2013 for an original principal amount of $14,352,351. Semi-annual installments of $471,118, including interest at 2.905% are payable on each May 1st and November 1st through maturity on May 1, 2033. Principal and interest are payable from and secured solely by a pledge of and lien upon the net revenues of the water and sewer utility system of the Village. The proceeds of the Series 2013 Note were used for the advance refunding of the outstanding Series 2003A Revenue Bonds and provided approximately $5,000,000 for capital improvements to the water and sewer system. The advance refunding resulted in an economic gain of approximately $142,000.

The Series 2013 Note includes a provision that in the event of a default under the Loan Agreement or Note, which includes any default in the due and punctual payment of an obligation in an amount in excess of $100,000 to any other obligee, the bank may declare all obligations of the Village under the Loan Agreement and Note to be immediately due and payable.

Annual debt service requirements on the Note are as follows:

Year Ending September 30,	Principal	Interest	Total
2021	$ 652,355	$ 289,882	$ 942,237
2022	671,443	270,794	942,237
2023	691,088	251,149	942,237
2024	711,308	230,929	942,237
2025	732,120	210,117	942,237
2026-2030	3,994,724	716,461	4,711,185
2031-2033	2,688,412	138,303	2,826,715
Total	**$10,141,450**	**$ 2,107,635**	**$12,249,085**

The provisions of the Series 2013 Note generally provide for:

1. Establishment of utility rates that provide net revenues which are equal to at least 125% of the principal and interest scheduled to come due in each fiscal year.
2. Prompt payment of principal and interest when due.
3. Issuance of additional debt payable from pledged revenues only if pledged revenues for the two immediately preceding fiscal years equal at least 1.25 times the largest amount of principal and interest scheduled to come due on the outstanding debt and additional debt.
4. Maintenance of the utility system in good working order.
5. Maintenance of a depository account with the lender.

At September 30, 2020 the Village was in compliance with the debt covenants.

NOTE 5. LONG-TERM DEBT (Continued)

Business-Type Activities (Continued)

Utility Pledged Revenues

The Village has pledged the future net revenues (generally all revenues and capital contributions, less expenses, excluding depreciation and amortization) of the water and sewer utility to repay the Series 2013 Note. The Series 2013 Note is payable solely from the utility net revenues and is payable through 2033. Annual principal and interest payments on the Series 2013 Note are expected to require approximately 10 percent of utility net revenues. Total principal and interest remaining to be paid on the Series 2013 Note is $12,249,085 at September 30, 2020. Utility net revenues available for debt service (as defined by the Series 2013 Note debt resolution) were $9,148,219.

Interest Expense and Arbitrage

Total interest costs incurred and paid on all Village debt for the year ended September 30, 2020 were $124,680 and $125,420, respectively, for governmental activities and $293,645 and $308,426, respectively, for business-type activities. The Village is subject to the arbitrage restrictions imposed by the federal government for its outstanding debt issues. No events have occurred that would cause the outstanding debt to be subject to arbitrage within the meaning of Section 148 of the Internal Revenue Code.

NOTE 6. OBLIGATION UNDER UTILITY AGREEMENTS AND INTANGIBLE RIGHTS

The Village entered into two contracts dated January 1, 1978, with the City of Lake Worth (the "City"), providing that the City supply the Village's wastewater facilities for a period of 40 years. The City obtained Florida State Bond Loans, Series E and Series R, for the purpose of constructing, as well as improving, its existing water and wastewater facilities. The Village was obligated to pay the City its pro rata share (based on water and wastewater reserved capacity) of the debt service of these loans until October 31, 2006 when the loans were paid in full.

The Series E Loan was originally issued by the City on October 1, 1976, at a face value of $7,585,000. The loan matured in varying amounts through June 30, 2006. The Village's pro rata share of the loan was 20.712%. The present value (discounted at the same rate as the Series E Loan) of the Village's obligation to the City was $2,089,437 at issuance. Intangible water and wastewater usage rights were recorded at the same amount and were amortized over the 40-year contract period that the Village is entitled to use the City's water and wastewater facilities.

The Series R Loan was originally issued by the City on July 1, 1985, at a face value of $8,520,000. The loan matured in varying amounts through July 1, 2006. The Village's pro rata share of the loan was 37.04%. The present value (discounted at the same rate as the Series R Loan) of the Village's obligation to the City was $4,245,610 at issuance. Intangible water and wastewater rights were recorded at the same amount. On November 1, 1989, the City issued $10,300,000 Refunding Revenue Bonds, Series 1989, part of which was used to refund the Series R Loan and to improve the existing facilities. As a result of this refunding issue, the Village amended its original contract with the City whereby the outstanding obligation and intangible rights increased $494,876. The amendment also required the Village to pay 125% (previously 133%) of its pro rata share of the debt service payments. The intangible rights were amortized over 31 years (the remaining contract term).

NOTE 6. OBLIGATION UNDER UTILITY AGREEMENTS AND INTANGIBLE RIGHTS (Continued)

In February 1994, the City issued $15,680,000 Sewer System Refunding Revenue Bonds, Series 1994, part of which was used to refund both the Series E and Series R Loans. As a result of this refunding issue, the Village amended its contracts with the City and the combined outstanding obligation and intangible rights increased $353,610 and the maturity date was extended to October 31, 2006. The amendment required the Village to pay 120% (previously 133% and 125% for the Series E and Series R Loans, respectively) of its pro rata share of the debt service (20% of which was to fund renewal and replacement). The additional intangible rights were amortized over 22 years (the remaining term of the amended contract). All outstanding obligations under the utility agreements were paid at maturity on October 31, 2006. During 2015, the Village sold a portion of its wastewater usage rights and the intangible rights were reduced by $214,891. During 2018, the Village paid $205,421 to the City to purchase an additional service area, which was recorded as an indefinite life intangible asset. At September 30, 2020, the intangible rights had a net book value of $205,421 and were recorded with capital assets.

NOTE 7. INTERFUND TRANSACTIONS

Interfund transfers for the year ended September 30, 2020 were as follows:

	Transfers In	Transfers Out
Governmental Activities		
General Fund	$ 2,490,099	$ -
Business-type Activities		
Water and Sewer Utility Fund	-	2,490,099
Total	**$ 2,490,099**	**$ 2,490,099**

Transfers consist of payments in lieu of taxes of $2,490,099 that are not payments for services.

NOTE 8. RISK MANAGEMENT

The Village is exposed to various risks of loss related to torts; thefts of, damage to and destruction of assets; errors and omissions; and natural disasters for which the Village carries commercial insurance. Specifically, the Village purchases commercial insurance for property, medical benefits, worker's compensation, general liability, automobile liability, errors and omissions, and directors and officers liability. The Village is also covered by Florida Statutes under the Doctrine of Sovereign Immunity which effectively limits the amount of liability of municipalities to individual claims of $200,000 and $300,000 in the aggregate. There were no significant reductions in insurance coverage from the prior year. There were no settlements in excess of coverage in the years ended September 30, 2020, 2019, and 2018.

NOTE 9. EMPLOYEE RETIREMENT PLANS

The Village administers two single-employer, defined benefit pension plans, the Village of Palm Springs General Employees Pension Plan and the Village of Palm Springs Police Officers Pension Plan. The Village also participates in the Florida Retirement System (FRS) Pension Plan and the Retiree Health Insurance Subsidy (HIS) Trust Fund, both of which are multiple-employer, cost-sharing, defined benefit, public employee retirement plans administered by the State of Florida. The net pension liability (asset), deferred outflows and inflows of resources and pension expense related to these retirement plans at September 30, 2020 are summarized as follows:

	General Employees	Police Officers	FRS	HIS	Total
Net pension asset	$ (747,394)	$ (1,115,736)	$ -	$ -	$ (1,863,130)
Net pension liability	-	-	10,354,989	2,647,593	13,002,582
Deferred outflows/inflows of resources related to pensions					
Deferred outflows of resources	43,524	77,504	3,522,030	763,041	4,406,099
Deferred inflows of resources	1,121,037	871,276	249,680	155,989	2,397,982
Pension expense	(503,520)	(79,370)	2,328,818	335,150	2,081,078

Village Pension Plans

The Village sponsored two separate single-employer defined benefit plans for 2020: the Village of Palm Springs General Employees Pension Plan, covering substantially all other full-time Village employees hired prior to July 1, 2010; and, the Village of Palm Springs Police Officers Pension Plan covering all Village police officers hired prior to July 1, 2010. During 2010, the Village adopted ordinances closing both Plans to new members effective June 30, 2010. Participants in the Plans were given the option to remain in their respective Plan or to join the Florida Retirement System (FRS) effective July 1, 2010. Both closed Plans are reported as pension trust funds included in the Village's reporting entity. Employees hired after June 30, 2010 are required to participate in FRS.

Each Plan has its own Board of Trustees which acts as plan administrator and trustee. The Board of the General Employees Pension Plan consists of five members, two of which are elected by Village employees (excluding police officers) for a four year term, one member of the Village Council, the Village Manager and one resident chosen by a majority of the other four trustees and appointed by the Village Council. The Board of the Police Officers Pension Plan consists of five members, two of which are elected by police officers, two of which are residents of the Village appointed by the Village Council and one member chosen by a majority of the other four trustees and appointed by the Village Council. Each Trustee serves a two year term with no term limits.

Each Plan's assets may only be used for the payment of benefits to the members and beneficiaries of the Plan in accordance with the terms of each plan document. The costs of administering each Plan are paid by the pension fund. Plan provisions are established by and may be amended by the Village Council. Village contribution requirements are determined by each Plan's actuary and are paid by the General Fund and Water and Sewer Utility Fund. Employee contribution requirements are established by and may be amended by the Village Council. There are no legal or contractual maximum contribution rates. The Florida Constitution requires local governments to make the actuarially determined contribution. The Florida Division of Retirement reviews and approves each local government's actuarial report prior to its being approved for use for funding purposes.

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

Village Pension Plans (Continued)

The following summary of the significant provisions of each Plan was obtained from the respective actuarial reports and Village information for the two Village pension plans as of October 1, 2020 (the latest actuarial valuation date):

	General Employees	Police Officers		
Accounting Policies and Plan Assets:				
Authority	Village Ordinance	Village Ordinance/State Statute		
Basis of Accounting	Accrual	Accrual		
Asset Valuation				
Reporting	Fair Value	Fair Value		
Actuarial Valuation	5-year smoothed market	4-year smoothed market		
Plan Reserves	None	None		
Long-Term Receivables	None	None		
Membership and Plan Provisions:				
Members:				
Active Participants	31	15		
Retirees and Beneficiaries	53	27		
Terminated Vested	42	10		
Normal Retirement Benefits:		**Option 1**	**Option 2**	**Option 3**
Retirement Age	62	50	55	Any
Years of Service (minimum)	5	15	10	20
Accrual	2.5%	3.0%	3.0%	3.0%
Maximum	62.5%	None	None	None
Years to Vest	10	10	10	10
Actuarial Contributions (as a percentage of covered payroll):				
Village	50.6%	42.8%		
State	N/A	8.3%		
Participants	3.0%	5.9%		
Required contributions	$ 887,452	$ 758,756		
Contributions made	$ 933,633	$ 945,003		

Summary of Significant Accounting Policies

The financial statements of each Plan are prepared using the economic resources measurement focus and the accrual basis of accounting. Employee and employer contributions are recognized in the period in which employee services are performed. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan. Other expenses are recognized when the corresponding liabilities are incurred. Investment income is recognized as revenue when earned. Investments are reported at fair value and are managed by third party money managers.

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

Village Pension Plans (Continued)

Summary of Significant Accounting Policies (Continued)

The Village's independent custodians and money managers determine the fair value of securities, which is generally based upon the mean of the most recent bid and ask prices of each instrument using various third party pricing sources. The net appreciation (depreciation) in fair value of investments is recorded as an increase (decrease) to investment income based on the valuation of investments. Investment earnings are reduced for investment related expenses, such as management fees, portfolio evaluation and custodial services. Benefit payments, including refunds of employee contributions, are recognized when due and payable in accordance with the benefit terms.

Investments

Investment Policy: The policy in regard to the allocation of invested assets is established and may be amended by a majority vote of the Board of each pension plan. It is the policy of each pension plan Board to pursue an investment strategy that reduces risk through the prudent diversification of the investment portfolio across a broad selection of distinct asset classes. The investment policy of each pension plan discourages the use of cash equivalents, except for liquidity purposes, and aims to refrain from dramatically shifting asset class allocations over short time spans. There were no changes in the investment policy of either pension plan for the year ended September 30, 2020. The asset allocation policy adopted by each pension plans' Board at September 30, 2020 was as follows:

Asset Class	General Employees	Police Officers
Domestic equity	50%	55%
International equity	15	10
Domestic fixed income	20	20
International fixed income	5	5
Real estate	10	10
Total	**100%**	**100%**

Concentrations: At September 30, 2020, four mutual fund investments of the General Employees Pension Fund represented 25.2%, 9.6%, 7.5% and 6.1% of that Plan's net position and four mutual fund investments of the Police Officers Pension Fund represented approximately 27.6%, 15.7%, 14.9% and 9.5% of that Plan's net position.

Rate of Return: For the year ended September 30, 2020, the annual money-weighted rate of return on each pension plans' investments, net of investment expenses, was 5.86% and 10.05% for the General Employees Pension Plan and Police Officers Pension Plan, respectively. The money-weighted rate of return expresses investment performance, net of investment expenses, adjusted for the changing amounts actually invested.

Deferred Retirement Option Program (DROP)

The Police Officers Pension Plan members are eligible to participate in DROP upon attainment of normal retirement date. DROP allows Plan members to retire while continuing employment for up to 60 months and the member's retirement benefits accumulate in the Plan. The amount held in DROP at September 30, 2020 was $700,567. The General Employees Pension Plan has no DROP.

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

Village Pension Plans (Continued)

Net Pension Liability

The components of the net pension liability for the General Employees and Police Officers Pension Plans for the most recent valuation as of October 1, 2020, were as follows:

	General Employees	Police Officers
Total pension liability	$ 28,334,906	$ 34,101,285
Plan fiduciary net position	(29,082,300)	(35,217,021)
Net pension liability (asset)	$ (747,394)	$ (1,115,736)
Plan fiduciary net position as a percentage of the total pension liability	**102.6%**	**103.3%**

Actuarial Assumptions: The total pension liabilities for the General Employees and Police Officers Pension Plans were determined by actuarial valuations as of October 1, 2020, using the following actuarial assumptions, applied to all periods included in the measurement:

	General Employees	Police Officers
Actuarial Valuation:		
Frequency	Annual	Annual
Latest Valuation	10/1/2020	10/1/2020
Measurement date	9/30/2020	9/30/2020
Basis for Contribution	10/1/2018	10/1/2018
Cost Method	Entry age normal	Entry age normal
Assumptions:		
Investment Earnings (with inflation, net of expenses)	6.25% / year	6.75% / year
Salary Increases (with inflation)	4.6% - 8.3% / year	4.0% - 5.25% / year
Inflation	2.0% / year	2.75% / year
Cost of living adjustments	3.0%	3.0%
Mortality Rates	PUB-2010 base table with Scale MP-2018	PUB-2010 base table with Scale MP-2018
Amortization:		
Method	Level dollar	Level percent of payroll
Period	5 years	15 years for gains (losses) 15 years for assumption, plan and method changes
Open/Closed	Closed	Closed

The long-term expected rate of return on investments of the pension plans was determined using a building block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

Village Pension Plans (Continued)

Net Pension Liability (Continued)

weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plans' target allocation as of September 30, 2020 (see the discussion of each pension plan's investment policy) are summarized in the following table:

	Long-Term Expected Real Rate of Return	
	General Employees	**Police Officers**
Asset Class		
Domestic equity	7.5%	7.5%
International equity	8.5	8.5
Domestic fixed income	2.5	2.5
International fixed income	3.5	3.5
Real estate	4.5	4.5

Discount Rate: The discount rate used to measure the total pension liability of the General Employees Pension Plan was 6.25% (6.25% in 2019) and the Police Officers Pension Plan was 6.75% (7.25% in 2019). The discount rates were based on the expected rate of return on investments of each plan. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rates and that Village contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on those assumptions, the pension plans' fiduciary net positions were projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on investments of the pension plans was applied to all periods of projected benefit payments to determine the projected total pension liability.

Changes in the Net Pension Liability (Asset)

The changes in the net pension liability (asset) of the Village's General Employees Pension Plan were as follows for the year ended September 30, 2020:

	Increase (Decrease)		
General Employees Pension Plan	**Total Pension Liability**	**Plan Fiduciary Net Position**	**Net Pension Liability (Asset)**
Balances at October 1, 2019	$ 28,902,543	$ 27,075,734	$ 1,826,809
Changes for the Current Year			
Service cost	357,165	-	357,165
Interest	1,794,730	-	1,794,730
Difference between expected and actual experience	(877,264)	-	(877,264)
Change of assumptions	(745,073)	-	(745,073)

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

Village Pension Plans (Continued)

Changes in the Net Pension Liability (Asset) (Continued)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate: The following table presents the net pension liability (asset) of the General Employees Pension Plan and the Police Officers Pension Plan at September 30, 2020, calculated using the current discount rates of 6.25% and 6.75%, respectively, as well as what the net pension liability (asset) would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate:

	1.0% Decrease	Current Discount Rate	1.0% Increase
General Employees Pension Plan	$ 3,179,928	$ (747,394)	$ (3,981,011)
Police Officers Pension Plan	$ 3,351,051	$ (1,115,736)	$ (4,774,258)

Pension Expense and Deferred Inflows/Outflows of Resources Related to Pensions

General Employees Pension Plan: For the year ended September 30, 2020, the Village recognized pension expense of $(503,520). At September 30, 2020, the Village reported deferred inflows/outflows of resources related to General Employees pensions from the following sources:

General Employees Pension Plan	Deferred Outflows	Deferred Inflows
Differences between expected and actual experience	$ -	$ 442,304
Net difference between projected and actual investment earnings on pension plan investments	-	325,804
Change of assumptions	43,524	352,929
Balances at September 30, 2020	**$ 43,524**	**$ 1,121,037**

Police Officers Pension Plan: For the year ended September 30, 2020, the Village recognized pension expense of $(79,370). At September 30, 2020, the Village reported deferred inflows/outflows of resources related to Police Officers pensions from the following sources:

Police Officers Pension Plan	Deferred Outflows	Deferred Inflows
Differences between expected and actual experience	$ 77,504	$ -
Net difference between projected and actual investment earnings on pension plan investments	-	64,462
Change of assumptions	-	806,814
Balances at September 30, 2020	**$ 77,504**	**$ 871,276**

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

Village Pension Plans (Continued)

Pension Expense and Deferred Inflows/Outflows of Resources Related to Pensions (Continued)

The amounts reported as deferred inflows/outflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending September 30,	General Employees	Police Officers
2021	$ (1,021,789)	$ (393,782)
2022	(42,517)	(165,391)
2023	85,269	(45,839)
2024	(98,476)	(188,760)

Financial Statements

The General Employees Pension Plan and the Police Officers Pension Plan do not issue stand-alone GAAP financial reports. Financial statements for the General Employees Pension Plan and the Police Officers Pension Plan as of and for the year ended September 30, 2020, are as follows:

Statements of Fiduciary Net Position	General Employees	Police Officers
Assets		
Cash and cash equivalents	$ 1,273,633	$ 556,596

State of Florida Pension Plans

All regular, full-time employees of the Village, including police officers, hired after June 30, 2010 are required to participate in the Florida Retirement System (FRS) Pension Plan and the Retiree Health Insurance Subsidy (HIS) Trust Fund administered by the Florida Department of Management Services, Division of Retirement. FRS and HIS are cost-sharing, multiple-employer defined benefit pension plans with approximately 1,000 participating employers. FRS and HIS were established and are administered in accordance with Chapter 121 and Section 112.363, Florida Statutes, respectively.

FRS includes a Deferred Retirement Option Program (DROP) available for eligible employees. Retirees receive a lifetime pension benefit with joint and survivor payment options. FRS membership is compulsory for employees filling regularly established positions in a state agency, county agency, state university, state community college, or district school board, unless restricted from FRS membership under sections 121.053 and 121.122, Florida Statutes, or allowed to participate in a defined contribution plan in lieu of FRS membership. Participation is optional for cities, municipalities, special districts, charter schools and metropolitan planning organizations.

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

State of Florida Pension Plans (Continued)

HIS membership is optional and available to all retirees under a state-administered retirement system, provided the retiree provides proof of health insurance coverage, which can include Medicare. Participation is compulsory for cities, municipalities, special districts, charter schools and metropolitan planning organizations that participate in FRS.

Benefits Provided: FRS provides retirement, survivor and disability benefits to plan members and beneficiaries. Pension benefits of FRS are established by Florida Statutes, Chapter 121, and may be amended by the Florida Legislature. Retirement benefits are computed on the basis of age and/or years of service, average final compensation and service credit. Members initially enrolled prior to July 1, 2011, vest after six years of service. Members initially enrolled on or after July 1, 2011, vest after eight years of creditable service. HIS provides retirees and beneficiaries a monthly benefit equal to the number of years of creditable service completed at the time of retirement multiplied by $5. The monthly benefit payment is established by Section 112.363, Florida Statutes and is at least $30, but not more than $150.

Village Contributions: FRS members are required to contribute 3.0% and no contribution is required for HIS members. Participating governments, including the Village, contribute to FRS at actuarially determined rates for various classes of employees, which are presently 8.47% of annual covered payroll for employees covered in the regular class, 25.41% for senior management class, 25.48% for special risk class (police officers), 48.82% for elected officials and 14.60% for employees covered in the FRS DROP program. Participating governments, including the Village, contribute to HIS based on a percentage of gross compensation for all active FRS members, which is presently 1.66%. The Village's contributions to FRS and HIS for the year ended September 30, 2020 were $925,385, which was equal to 100% of the required contributions for the year.

Funding Policy: FRS funding policy provides for monthly employer contributions at actuarially determined rates that, expressed as percentages of annual covered payroll, are adequate to accumulate sufficient assets to pay benefits when due based upon plan assumptions. HIS uses a pay-as-you-go funding policy based on monthly employer contributions at a flat percentage of gross compensation for all active FRS members. Employer and employee contribution rates are established by State law as a level percentage of payroll. Employer contribution rates are determined using the entry-age actuarial cost method. The consulting actuary recommends rates based on the annual valuation, but actual contribution rates are established by the Florida Legislature.

Publicly Available Financial Report: The State of Florida issues a publicly available financial report for FRS and HIS that includes financial statements and required supplementary information. The complete financial report is available on the Publications page of the Division of Retirement's website at www.frs.myflorida.com or by writing to the Research and Education Section at P.O. Box 9000, Tallahassee, Florida, 32315-9000 or by calling toll free 877-377-1737 or 850-488-5706.

Summary of Significant Accounting Policies: The financial statements of FRS and HIS are prepared using the flow of economic resources measurement focus and the accrual basis of accounting. Employee contributions are recognized in the period of time for which the contributions are assessed. Employer contributions are recognized in the period in which employee services are performed. Benefit payments, including refunds of employee contributions, are recognized when due and payable in accordance with the terms of FRS and HIS. Other expenses are recognized when

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

State of Florida Pension Plans (Continued)

the corresponding liabilities are incurred. Investment income is recognized as revenue when earned. Investments are reported at fair value and are managed by external investment managers. The independent investment custodian for FRS and HIS determines the fair value of securities using various third party pricing sources. For private market investments, where no readily ascertainable market value exists, fair values are based on net asset value (capital account balance) provided by investment managers at the closest available reporting period and adjusted for subsequent contributions and distributions. The net appreciation (depreciation) in fair value of investments is recorded as an increase (decrease) to investment income based on the valuation of investments. Investment earnings are net of investment related expenses, such as management fees, portfolio evaluation and custodial services. For purposes of measuring the net pension liability, deferred inflows/outflows of resources related to pensions, and pension expense, information about the fiduciary net position of FRS and HIS and the additions to/deductions from the fiduciary net position have been determined on the same basis as they are reported by FRS and HIS.

Pension Liabilities, Pension Expense, and Deferred Inflows/Outflows of Resources Related to Pensions

At September 30, 2020, the Village reported a liability of $10,354,989 and $2,647,593 for its proportionate share of the net pension liability of FRS and HIS, respectively. The net pension liability of each plan was measured as of June 30, 2020, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of July 1, 2020 for FRS and HIS. The Village's proportion of the net pension liability was based on a projection of the Village's long-term share of contributions to the pension plan relative to the projected contributions of all participating governments, as actuarially determined. At June 30, 2020, the Village's FRS proportion was .023891640 percent, which was a decrease of .001180054 percent from its proportion measured as of June 30, 2019. The HIS proportion was .021684100 percent at June 30, 2020, which was an increase of .000651432 percent from its proportion measured as of June 30, 2019.

For the year ended September 30, 2020, the Village recognized pension expense of $2,663,968 for FRS and HIS. At September 30, 2020, the Village reported deferred outflows and inflows of resources related to FRS pensions from the following sources:

	Deferred Outflows	Deferred Inflows
Differences between expected and actual experience	$ 396,306	$ -
Changes in assumptions	1,874,582	-
Net difference between projected and actual investment earnings on pension plan investments	616,546	-
Changes in proportion and differences between Village contributions and proportionate share of contributions	427,520	249,680
Village contributions subsequent to the measurement date	207,076	-
Total	**$ 3,522,030**	**$ 249,680**

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

State of Florida Pension Plans (Continued)

Pension Liabilities, Pension Expense, and Deferred Inflows/Outflows of Resources Related to Pensions (Continued)

At September 30, 2020 the Village reported deferred outflows and inflows of resources related to HIS pensions from the following sources:

	Deferred Outflows	Deferred Inflows
Differences between expected and actual experience	$ 108,303	$ 2,042
Changes in assumptions	284,692	153,947
Net difference between projected and actual investment earnings on pension plan investments	2,114	-
Changes in proportion and differences between Village contributions and proportionate share of contributions	337,309	-
Village contributions subsequent to the measurement date	30,623	-
Total	**$ 763,041**	**$ 155,989**

Deferred outflows of resources related to FRS and HIS pensions of $237,699 resulting from Village contributions subsequent to the measurement date of June 30, 2020 will be recognized as a reduction of the net pension liability in the year ended September 30, 2020. Other amounts reported as deferred inflows and outflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending September 30,	FRS Amount	HIS Amount
2021	$ 631,679	$ 159,530
2022	983,803	118,335
2023	836,228	32,336
2024	499,901	75,086
2025	113,663	102,245
Thereafter	-	88,897

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

State of Florida Pension Plans (Continued)

Pension Liabilities, Pension Expense, and Deferred Inflows/Outflows of Resources Related to Pensions (Continued)

Actuarial Assumptions: The total pension liability for FRS and HIS in the most recent actuarial valuations was determined using the following actuarial assumptions, applied to all periods included in the measurement:

	FRS	HIS
Valuation date	July 1, 2020	July 1, 2020
Measurement date	June 30, 2020	June 30, 2020
Actuarial cost method	Individual Entry Age	Individual Entry Age
Amortization method	Level percent of pay, closed	Level percent of pay, closed
Equivalent single amortization period	30 years	30 years
Asset valuation method	5-year smoothed	Market value
Discount rate	6.8%	2.21%
Inflation	2.4%	2.4%
Salary increases, including inflation	3.25%	3.25%
Long-term expected rate of return, net of investment expenses	6.8%	N/A
Municipal bond rate	N/A	2.21%
Payroll growth	3.25%	3.25%
Cost of living adjustments	3.0% pre-July 2011 0% thereafter	N/A
Mortality rates	Mortality rates PUB-2010 base table with Scale MP-2018	Mortality rates PUB-2010 base table with Scale MP-2018

The actuarial assumptions used in the July 1, 2020 actuarial valuation were based on the results of an actuarial experience study for the period July 1, 2013 to June 30, 2018.

Changes in Actuarial Assumptions: The discount rate for FRS changed from 6.9% for 2019 to 6.8% for 2020. The discount rate for HIS changed from 3.50% for 2019 to 2.21% for 2020. The initial amortization period for assumption, method and plan changes was reduced from 30 years to 25 years effective July 1, 2020. The inflation assumption was reduced form 2.6% to 2.4% for 2020.

Long-term Expected Rate of Return: The long-term expected rate of return on FRS investments was determined using a building block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

State of Florida Pension Plans (Continued)

Pension Liabilities, Pension Expense, and Deferred Inflows/Outflows of Resources Related to Pensions (Continued)

rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of annual arithmetic real rates of return for each major asset class are as follows:

	Long-Term Expected Real Rate of Return
Asset Class	
Cash equivalents	2.2%
Fixed income	3.0
Global equity	8.0
Private equity	10.8
Real estate	6.4
Strategic investments	5.5

Discount Rate: The discount rate used to measure the total pension liability of FRS at June 30, 2020 was 6.8% for FRS and 2.21% for HIS. The FRS discount rate was based on the expected rate of return on FRS investments. The HIS discount rate was based on the municipal bond rate. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rates and that member contributions will be made at rates equal to the difference between actuarially determined contribution rates and the employee rate. Based on those assumptions, the fiduciary net position of FRS was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on investments of FRS was applied to all periods of projected benefit payments to determine the projected total pension liability. Because HIS uses a pay-as-you-go funding structure, a municipal bond rate of 2.21% was used to determine the total pension liability.

Sensitivity of the Village's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate: The following table presents the Village's proportionate share of the net pension liability of FRS and HIS at September 30, 2020, calculated using the current discount rate, as well as what the Village's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate:

FRS			HIS		
1.0% Decrease (5.8%)	Current Discount Rate (6.8%)	1.0% Increase (7.8%)	1.0% Decrease (1.21%)	Current Discount Rate (2.21%)	1.0% Increase (3.21%)
$ 16,535,177	$ 10,354,989	$ 5,193,269	$ 3,060,500	$ 2,647,593	$ 2,309,631

NOTE 9. EMPLOYEE RETIREMENT PLANS (Continued)

State of Florida Pension Plans (Continued)

Pension Liabilities, Pension Expense, and Deferred Inflows/Outflows of Resources Related to Pensions (Continued)

Pension Plan Fiduciary Net Position: Detailed information about the fiduciary net position of FRS and HIS is available in a separately issued financial report, which is available on the Publications page of the Division of Retirement's website at www.frs.myflorida.com or by writing to the Research and Education Section at P.O. Box 9000, Tallahassee, Florida, 32315-9000 or by calling toll free 877-377-1737 or 850-488-5706.

Payables to FRS

There were no amounts payable to FRS by the Village at September 30, 2020.

NOTE 10. POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS

Plan Description

The Village administers a single-employer defined benefit health care plan (the "Plan") that provides health care benefits to eligible retired employees and their beneficiaries. The Village Council has the authority to establish and amend the premiums for and the benefit provisions of the Plan. The Plan is financed on a "pay-as-you-go" basis and is not administered as a formal qualifying trust. The Plan does not issue a publicly available financial report.

Funding Policy

The Village is required by Florida Statute 112.0801 to allow retirees to buy healthcare coverage at the same *group insurance rates* that current employees are charged resulting in an *implicit* healthcare benefit. The State of Florida prohibits the Plan from separately rating retirees and active employees. The Plan therefore charges both groups an equal, blended rate premium. Although both groups are charged the same blended rate premium, GAAP requires the actuarial figures to be calculated using age adjusted premiums approximating claim costs for retirees separate from active employees. The use of age adjusted premiums results in the addition of the implicit rate subsidy into the actuarial accrued liability. Plan members receiving benefits contribute 100% of the monthly premium ranging from a minimum of $608 to a maximum of $1,830.

Plan Membership

Membership in the Plan was comprised of the following at October 1, 2017, the date of the latest actuarial valuation:

Active employees	167
Retirees and beneficiaries receiving benefits	5
Inactive employees	0
Total	172

NOTE 10. POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (Continued)

Total OPEB Liability

The Village's total OPEB liability of $578,459 was measured as of September 30, 2020, and was determined by an actuarial valuation as of October 1, 2019.

Actuarial Methods and Significant Assumptions: The actuarial methods and significant assumptions used to determine the Village's total OPEB liability for the current year are summarized as follows:

Actuarial Valuation:	
Valuation Date	10/1/2019 with 9/30/2020 measurement date
Actuarial Cost Method	Entry age normal, level percent of pay
Assumptions:	
Asset Valuation Method	N/A (1)
Discount Rate	2.14% (2)
Post-retirement Benefit Increases	None
Health Care Cost Trend Rate	8.0% per year initially, reduced annually by .5% to an ultimate rate of 5.0%
Inflation Rate	3.0%
Projected Salary Increases	3.0%
Mortality Rates	RP-2006 Mortality Table with MP2019 projection
Amortization:	
Method	Average of expected future working lifetime of the active group
Remaining Amortization Period	13 years

(1) The plan is funded on a pay-as-you-go basis and is not administered as a formal qualifying trust. There were no plan assets as of September 30, 2020.

(2) Since there are currently no invested plan assets held in trust to finance the OPEB obligation, the discount rate is the long-term expected rate of return on tax-exempt, high quality municipal bonds based on the S&P AA Municipal Bond 20-year High Grade Rate Index as of September 30, 2020.

Changes in the Total OPEB Liability

The changes in the total OPEB liability were as follows for the year ended September 30, 2020:

Total OPEB Liability at October 1, 2019	$	474,518
Changes for the Current Year		
Service cost		24,075
Interest		16,602
Difference between expected and actual experience		(3,180)
Changes in assumptions		88,007
Benefit payments		(21,563)
Net Changes		103,941
Balances at September 30, 2020	$	578,459

NOTE 10. POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (Continued)

Changes in the Total OPEB Liability (Continued)

Sensitivity of the Total OPEB Liability to Changes in the Discount Rate: The following table presents the total OPEB liability of the Village calculated using the current discount rate of 2.14%, as well as what the total OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (1.14%) or one percentage point higher (3.14%) than the current rate:

1.0% Decrease (1.14%)	Current Discount Rate (2.14%)	1.0% Increase (3.14%)
$ 639,574	$ 578,459	$ 517,343

Sensitivity of the Total OPEB Liability to Changes in the Healthcare Cost Trend Rate: The following table presents the total OPEB liability of the Village calculated using the current healthcare cost trend rate of 8.0%, as well as what the total OPEB liability would be if it were calculated using a healthcare cost trend rate that is one percentage point lower (7%) or one percentage point higher (9%) than the current rate:

1.0% Decrease (7.0%)	Current Discount Rate (8.0%)	1.0% Increase (9.0%)
$ 500,320	$ 578,459	$ 672,267

Changes in Actuarial Assumptions: The discount rate decreased from 3.64% for 2019 to 2.14% for 2020.

OPEB Expense and Deferred Inflows/Outflows of Resources Related to OPEB

For the year ended September 30, 2020, the Village recognized OPEB expense of $25,639. At September 30, 2020, the Village reported deferred inflows/outflows of resources related to OPEB from the following sources:

	Deferred Outflows	Deferred Inflows
Differences between expected and actual experience	$ 1,807	$ 2,935
Changes in assumptions	81,237	-
Balances at September 30, 2020	**$ 83,044**	**$ 2,935**

The amounts reported as deferred inflows/outflows of resources related to OPEB will be recognized in OPEB expense as follows:

NOTE 10. POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (Continued)

OPEB Expense and Deferred Inflows/Outflows of Resources Related to OPEB (Continued)

Year Ending September 30,	Amount
2021	$ 6,676
2022	6,676
2023	6,676
2024	6,676
2025	6,676
Thereafter	46,729

NOTE 11. COMMITMENTS AND CONTINGENCIES

Grants

Amounts received or receivable from grantor agencies are subject to audit and adjustment by those agencies. Any disallowed claims, including amounts already received, might constitute a liability of the Village for the return of those funds.

Contingencies

The Village is subject to a variety of lawsuits occurring in the normal course of business, the ultimate outcome of which is not presently determinable. In the opinion of management, after consultation with legal counsel, the resolution of any pending matters is not expected to have a significant impact on the financial condition of the Village.

Coronavirus Pandemic

During March 2020, a global pandemic was declared by the World Health Organization related to the rapidly growing outbreak of the coronavirus (COVID-19). The pandemic significantly affected economic conditions in the U.S. as federal, state and local governments reacted to the public health crisis by ordering the temporary closures of schools, public facilities and non-essential businesses and organizations, and imposing travel restrictions. To date, certain revenues of the Village, such as sales taxes, gas taxes and recreation program fees, have been negatively impacted by the decline in economic activity, although the Village has made corresponding budget adjustments. The duration of the business and economic disruptions, and the long-term impact on the Village's revenues and services cannot presently be determined. It is at least reasonably possible that the effects of the pandemic on the Village could be material in future periods.

NOTE 11. COMMITMENTS AND CONTINGENCIES (Continued)

Contract Commitments

Construction contracts consisted of the following at September 30, 2020:

	Total Project Authorization	Expended through September 30, 2020	Contract Retainage Payable at September 30, 2020	Balance to Complete

VILLAGE OF PALM SPRINGS, FLORIDA

NOTES TO BUDGETARY COMPARISON SCHEDULE

SEPTEMBER 30, 2020

NOTE 1. BUDGETARY ACCOUNTING

State of Florida Statutes require that all municipal governments establish budgetary systems and approve annual operating budgets. The Council annually adopts an operating budget and appropriates funds for the General Fund. The procedures for establishing the budget are as follows:

- Prior to September 1, the Village Manager submits to the Council a proposed operating budget prepared for the fiscal year commencing the following October 1. The operating budget includes proposed expenditures and the means of financing them.
- Public hearings are conducted to obtain taxpayer comments.
- The Village advises the County Property Appraiser of the proposed millage rate and the date, time and place of the public hearing for budget acceptance.
- The budget and related millage rate are legally enacted by ordinance.
- Changes or amendments to the budget of the Village or a department must be approved by the Council; however, changes within a department which do not affect the total departmental expenditures may be approved at the administrative level. Accordingly, the legal level of control is at the department level.

The adopted budgets are prepared on the modified accrual basis in accordance with U.S. generally accepted accounting principles. The reported budgetary data represents the final appropriated budget after amendments adopted by the Council. There were no supplemental appropriations adopted for the year ended September 30, 2020. Unexpended appropriations lapse at year end.

NOTE 2. ENCUMBRANCES

Encumbrance accounting, in which purchase orders, contracts and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is utilized by the Village during the year. However, all encumbrances outstanding at year end lapse and, accordingly, there is no fund balance assigned for encumbrances at September 30, 2020.

NOTE 3. BUDGET AND ACTUAL COMPARISON

The budgetary comparison schedule is prepared on the basis of accounting used in preparing the appropriated budget. For budgetary purposes, proceeds from the sale of capital assets are included in budgeted revenues, but are considered “other financing sources” for GAAP. As a result, the General Fund revenues reported in the budgetary comparison schedule are $58,947 more than the revenues reported on the basis of GAAP due to $58,947 of proceeds from the sale of capital assets reported as an other financing source under GAAP.

VILLAGE OF PALM SPRINGS, FLORIDA

CONDITION RATING OF THE VILLAGE'S STREET SYSTEM

SEPTEMBER 30, 2020

Percentage of lane miles in good or better condition: 100%

Percentage of lane miles in substandard condition: 0%

Comparison of needed-to-actual maintenance/preservation:

	Needed	Actual	Difference
2011	$ 125,000	$ 110,127	$ 14,873
2012	42,950	25,029	17,921
2013	124,000	122,145	1,855
2014	144,805	141,553	3,252
2015	170,000	151,463	18,537
2016	540,500	523,022	17,478
2017	845,822	611,980	233,842
2018	370,000	99,409	270,591
2019	474,600	308,997	165,603
2020	425,000	257,990	167,010
Total	**$ 3,262,677**	**$ 2,351,715**	**$ 910,962**

The condition of street pavement is rated using the Asphalt Pavement Rating Form as developed by the Asphalt Institute. The Asphalt Pavement Rating Form is based on a weighted average of thirteen defects found in pavement services. The form uses a measurement scale that is based on a condition index rating from zero for failed pavement to l00 for pavement in perfect condition. The condition index is used to classify roads in seven categories: excellent (100-85), very good (84-70), good (69-55), fair (54-40), poor (39-25), very poor (24-10), and failed (9-0). It is the Village's policy to maintain at least 80% of its street system at a good or better condition. Needed maintenance is calculated based upon inspections and the condition assessment index.

In accordance with GASB Statement No. 34, the Village was required to report at least one complete condition assessment at transition using the modified approach. The condition assessment was completed by the Village in 2003 and documented that eligible infrastructure assets are being preserved at or above the condition level established by the Village. The Village evaluates 1/3 of the network each year. In FY 2020, the Village is in year 2 of the sixth cycle of assessments. The assessments continue to indicate that the Village has maintained the network in accordance with Village policy.

The Village calculates needed maintenance of its street system annually. However, the scheduling of these street projects often crosses fiscal years. Also, many streets are restored as utility work is performed. Therefore, actual maintenance may be less than or greater than the calculated needed maintenance in any fiscal year.

Notes to Schedule:

Effective October 1, 2009, the Village contracted with Palm Beach County for fire protection and emergency medical services. As a result, the existing Hazardous Employees Pension Plan was renamed the Police Officers Pension Plan and was closed to new Firefighter members and the benefits of current Firefighter members were frozen. Effective June 30, 2010, the Police Officers Pension Plan was closed to new members and current employees were given the option to remain in the Plan or join the Florida Retirement System (FRS). Nine police officers elected to join FRS on July 1, 2010 and the remaining participants stayed in the Village plan. New police officers hired after June 30, 2010 are required to join FRS.

Information prior to adoption of GASB Statement No. 67 in fiscal year 2014 is not available.

Schedule of Investment Returns
Last Seven Fiscal Years

Fiscal Year Ended September 30,	Annual money-weighted rate of return, net of investment expenses: General Employees Pension Fund	Police Officers Pension Fund	Florida Retirement System (FRS)	Florida Retiree Health Insurance Subsidy (HIS) Trust Fund
2020	5.86 %	10.05 %	3.35%	0.00%
2019	2.86 %	4.84 %	5.98%	0.00%
2018	9.18 %	9.56 %	9.28%	0.00%
2017	11.99 %	12.51 %	13.59%	0.00%
2016	10.53 %	9.24 %	0.57%	0.00%
2015	(.87)%	(.47)%	3.77%	0.00%
2014	8.25 %	11.04 %	17.57%	0.00%

Note to Schedule:

The money-weighted rate of return considers the changing amounts estimated as invested during a period and weights the amount of pension plan investments by the proportion of time they are available to earn a return during that period. Cash flows are estimated on a monthly basis and are assumed to occur at the beginning of each month. Cash inflows are netted with cash outflows, resulting in a net cash flow in each month. The money-weighted rate of return is calculated net of investment expenses.

Information prior to adoption of GASB Statement No. 67 in fiscal year 2014 is not available.

Notes to Schedule:

Information prior to adoption of GASB Statement No. 75 in fiscal year 2018 is not available.

The plan is funded on a pay-as-you-go basis and is not administered as a formal qualifying trust. There were no plan assets as of the date of the most recent valuation. Since there are currently no invested plan assets held in trust to finance the OPEB liability, the discount rate is the long-term expected rate of return on tax-exempt, high quality municipal bonds based on the Standard & Poors Municipal Bond 20-year High Grade Rate Index.

Actuarial Assumption Changes	
Discount rate - 2020	2.14%
Discount rate - 2019 and 2018	3.64%

COMBINING FUND FINANCIAL STATEMENTS AND DEBT SCHEDULES

NONMAJOR GOVERNMENTAL FUNDS

Special Revenue Fund – Special revenue funds are used to account for specific revenues that are restricted to expenditure for particular purposes. The Village's only Special Revenue Fund is the Law Enforcement Fund.

Law Enforcement Fund – Accounts for proceeds from law enforcement forfeitures that are legally restricted to expenditures for law enforcement purposes.

Debt Service Fund – Debt service funds are used to account for assets held for the repayment of principal and interest on general obligation debt.

STATISTICAL SECTION

STATISTICAL SECTION

This part of the Village of Palm Springs' comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Village of Palm Springs' overall financial health.

Contents **Page**

Financial Trends 100

These schedules contain trend information to help the reader understand how the Village of Palm Springs' financial performance and well-being have changed over time.

Revenue Capacity 113

These schedules contain information to help the reader assess the Village of Palm Springs' most significant local revenue sources, the property tax and water and sewer revenue.

Debt Capacity 118

These schedules present information to help the reader assess the affordability of the Village of Palm Springs' current levels of outstanding debt and the Village of Palm Springs' ability to issue additional debt in the future.

Demographic and Economic Information 122

These schedules offer demographic and economic indicators to help the reader understand the environment within which the Village of Palm Springs' financial activities take place.

Operating Information 124

These schedules contain service and infrastructure data to help the reader understand how the information in the Village of Palm Springs' financial report relates to the services the Village of Palm Springs provides and the activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.

Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With *Government Auditing Standards*

The Honorable Mayor and
Village Council
Village of Palm Springs, Florida

We have audited, in accordance with U.S. generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the accompanying financial statements of the governmental activities, business-type activities, each major fund and the aggregate remaining fund information of the Village of Palm Springs, Florida, as of and for the year ended September 30, 2020, and the related notes to the financial statements, which collectively comprise the basic financial statements of the Village of Palm Springs, Florida, and have issued our report thereon dated April 26, 2021.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the internal control over financial reporting (internal control) of the Village of Palm Springs, Florida, as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Village of Palm Springs, Florida. Accordingly, we do not express an opinion on the effectiveness of the internal control of the Village of Palm Springs, Florida.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the financial statements of the Village of Palm Springs, Florida, are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

VILLAGE OF PALM SPRINGS, FLORIDA

NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

September 30, 2020

NOTE 1. BASIS OF PRESENTATION

The accompanying Schedule of Expenditures of Federal Awards (the "Schedule") includes the Federal grant activity of the Village of Palm Springs Florida (the "Village"), under programs of the Federal government for the year ended September 30, 2020. The information in the Schedule is presented in accordance with the requirements of Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the Village, it is not intended to and does not present the financial position or changes in net position, or cash flows of the Village. Expenditures of State financial assistance for the year ended September 30, 2020 did not exceed the $750,000 threshold for a State Single Audit.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Expenditures reported on the Schedule are reported on the modified accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Expenditures relating to U.S. Department of Homeland Security, Federal Emergency Management Agency ("FEMA"), CFDA 97.036 Disaster Grants – Public Assistance (Hurricane Irma and Hurricane Dorian) are reported when 1) FEMA has approved the project worksheet, and 2) eligible expenditures have been incurred in accordance with FEMA regulations (See Note 4).

b. Pass-through entity identifying numbers were not available for pass-through awards listed in the Schedule for the year ended September 30, 2020.

c. The Village made no payments to subrecipients from Federal awards for the year ended September 30, 2020.

NOTE 3. INDIRECT COST RATE

The Village did not elect to use the 10% de minimus indirect cost rate as allowed under the Uniform Guidance.

NOTE 4. EXPENDITURES INCURRED IN PRIOR YEARS

Amounts reported in the Schedule of Expenditures of Federal Awards for U.S. Department of Homeland Security, Federal Emergency Management Agency, CFDA 97.036 Disaster Grants - Public Assistance (Presidentially Declared Disasters) - Hurricane Irma and Hurricane Dorian includes expenditures of $161,031 incurred in a prior year.

NOTE 5. CONTINGENCY

Amounts received or receivable from grantor agencies are subject to audit and adjustment by those agencies. Any disallowed claims, including amounts already received, might constitute a liability of the Village for the return of those funds. In the opinion of management, all grant expenditures were in substantial compliance with the terms of the grant agreements and applicable Federal statutes and regulations.

Independent Auditor's Report on Compliance for Each Major Federal Program and on Internal Control Over Compliance Required by the Uniform Guidance

To the Honorable Mayor and
Village Council
Village of Palm Springs, Florida

Report on Compliance for Each Major Federal Program

We have audited the compliance of the Village of Palm Springs, Florida (the "Village"), with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of the Village's major Federal programs for the year ended September 30, 2020. The Village's major Federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs.

Management's Responsibility

Management is responsible for compliance with Federal statutes, regulations, and the terms and conditions of its Federal awards applicable to its Federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the Village's major Federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with U.S. generally accepted auditing standards; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major Federal program occurred. An audit includes examining, on a test basis, evidence about the Village's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major Federal program. However, our audit does not provide a legal determination of the Village's compliance.

Opinion on Each Major Federal Program

In our opinion, the Village complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major Federal programs for the year ended September 30, 2020.

Report on Internal Control Over Compliance

Management of the Village of Palm Springs, Florida, is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Village's internal control over compliance with the types of requirements that could have a direct and material effect on each major Federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major Federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Village's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a Federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a Federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a Federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Management Letter

The Honorable Mayor and
Village Council
Village of Palm Springs, Florida

Report on the Financial Statements

We have audited the financial statements of the Village of Palm Springs, Florida, as of and for the year ended September 30, 2020, and have issued our report thereon dated April 26, 2021.

Auditor's Responsibility

We conducted our audit in accordance with U.S. generally accepted auditing standards; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance); and Chapter 10.550, Rules of the Auditor General.

Other Reporting Requirements

We have issued our Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*; Independent Auditor's Report on Compliance for Each Major Federal Program and Report on Internal Control over Compliance Required by the Uniform Guidance; Schedule of Findings and Questioned Costs; and Independent Accountant's Report on Investment Compliance on an examination conducted in accordance with *AICPA Professional Standards*, AT-C Section 315, regarding compliance requirements in accordance with Chapter 10.550, Rules of the Auditor General. Disclosures in those reports and schedule, which are dated April 26, 2021, should be considered in conjunction with this management letter.

Prior Audit Findings

Section 10.554(1)(i)1., Rules of the Auditor General, requires that we determine whether or not corrective actions have been taken to address findings and recommendations made in the preceding annual financial audit report. There were no prior audit findings.

Official Title and Legal Authority

Section 10.554(1)(i)4., Rules of the Auditor General, requires that the name or official title and legal authority for the primary government and each component unit of the reporting entity be disclosed in this management letter, unless disclosed in the notes to the financial statements. This information is disclosed in Note 1 to the financial statements. Also, as discussed in Note 1, the Village included the Palm Springs Community Redevelopment Agency as a component unit of the Village.

Financial Condition and Management

Sections 10.554(1)(i)5.a. and 10.556(7), Rules of the Auditor General, require us to apply appropriate procedures and communicate the results of our determination as to whether or not the Village met one or more of the conditions described in Section 218.503(1), Florida Statutes, and to identify the specific condition(s) met. In connection with our audit, we determined that the Village did not meet any of the conditions described in Section 218.503(1), Florida Statutes, as of and for the year ended September 30, 2020.

Pursuant to Sections 10.554(1)(i)5.b. and 10.556(8), Rules of the Auditor General, we applied financial condition assessment procedures for the Village. It is management's responsibility to monitor the Village's financial condition, and our financial condition assessment was based in part on representations made by management and review of financial information provided by the Village. The results of our procedures disclosed no matters that are required to be reported.

Section 10.554(1)(i)2., Rules of the Auditor General, requires that we communicate any recommendations to improve financial management. In connection with our audit, we did not have any such recommendations.

Special District Component Units

Section 10.554(1)(i)5.c., Rules of the Auditor General, requires, if appropriate, that we communicate the failure of a special district that is a component unit of a county, municipality, or special district, to provide the financial information necessary for proper reporting of the component unit within the audited financial statements of the county, municipality, or special district in accordance with Section 218.39(3)(b), Florida Statutes. In connection with our audit, we did not note any special district component units that failed to provide the necessary information for proper reporting in accordance with Section 218.39(3)(b), Florida Statutes.

Additional Matters

Section 10.554(1)(i)3., Rules of the Auditor General, requires us to communicate noncompliance with provisions of contracts or grant agreements, or abuse, that have occurred, or are likely to have occurred, that have an effect on the financial statements that is less than material but warrants the attention of those charged with governance. In connection with our audit, we did not note any such findings.

Purpose of this Letter

Our management letter is intended solely for the information and use of the Legislative Auditing Committee, members of the Florida Senate and Florida House of Representatives, the Florida Auditor General, Federal and other granting agencies and the Village Council and management of the Village of Palm Springs, Florida, and is not intended to be and should not be used by anyone other than these specified parties.

Independent Accountant's Report on Investment Compliance

The Honorable Mayor and
Village Council
Village of Palm Springs, Florida

We have examined the Village of Palm Springs' compliance with Section 218.415, Florida Statutes, during the year ended September 30, 2020. Management of the Village of Palm Springs, Florida, (the "Village") is responsible for the Village's compliance with the specified requirements. Our responsibility is to express an opinion on the Village's compliance with the specified requirements based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the examination to obtain reasonable assurance about whether the Village complied, in all material respects, with the specified requirements referenced above. An examination involves performing procedures to obtain evidence about whether the Village complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risks of material noncompliance, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

Our examination does not provide a legal determination on the Village's compliance with the specified requirements.

In our opinion, the Village of Palm Springs, Florida, complied, in all material respects, with Section 218.415, Florida Statutes, during the year ended September 30, 2020.

This report is intended to describe our testing of compliance with Section 218.415, Florida Statutes, and is not suitable for any other purpose.

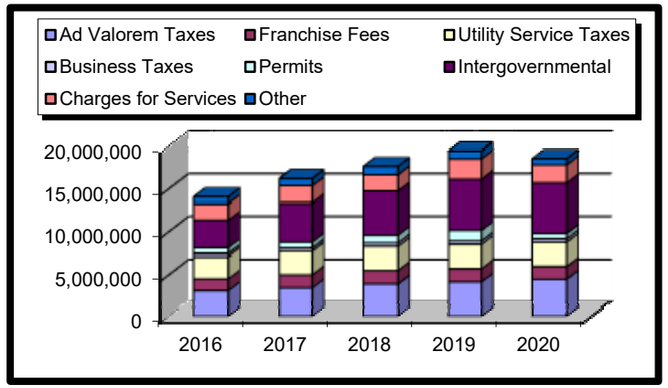
VILLAGE OF PALM SPRINGS, FLORIDA

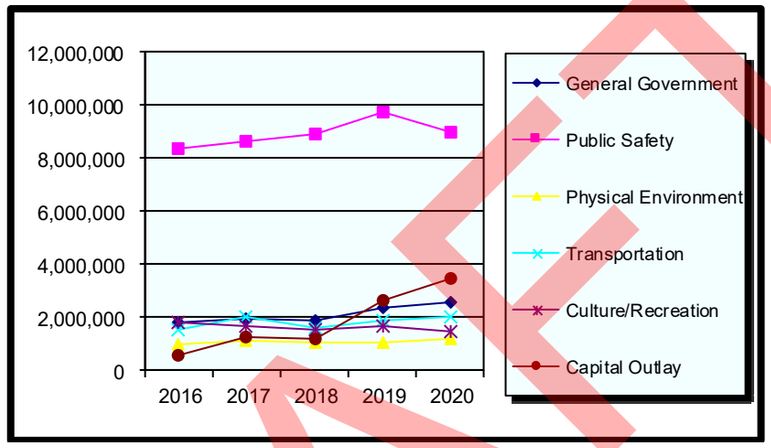


FINANCIAL HIGHLIGHTS

For the Year Ended September 30, 2020

Revenue and Expenditures

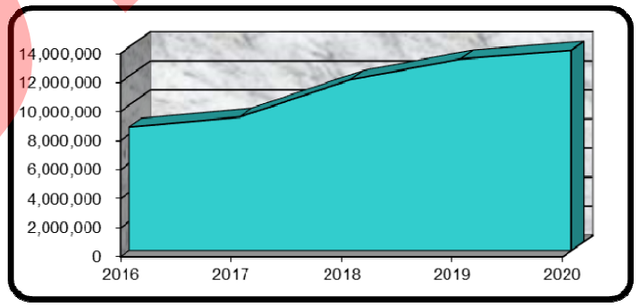
Revenue



The following graph presents General Fund revenues of the Village by source for the last five (5) years.

- Total General Fund revenues for the year ended September 30, 2020, were $18.6 million. This represents a decrease of $910,000, or 4.7%, when compared with the prior year.
- Total General Fund revenues have increased approximately $4.5 million, or 32.2%, since 2016. Increases in ad valorem taxes ($1,365,000), franchise fees ($119,000), utility service taxes ($200,000), business taxes ($51,000), intergovernmental ($2,656,000), and charges for services ($228,000), combined with decreases in permits ($49,000) and other revenues ($45,000), account for the overall increase in total revenues.
- The new local option sales tax for infrastructure improvements accounted for $1,620,000 of General Fund intergovernmental revenues for 2020.
- The assessed value of real and personal property was $1,325 million, an increase of $104 million (8.8%) over the prior year and an increase of $504 million (61.3%) since 2016.
- The General Fund millage rate adopted for the 2019/2020 fiscal year (3.50) has decreased 10.3% since 2016. The debt service millage rate decreased from .5484 in 2016 to .3381 in 2020.

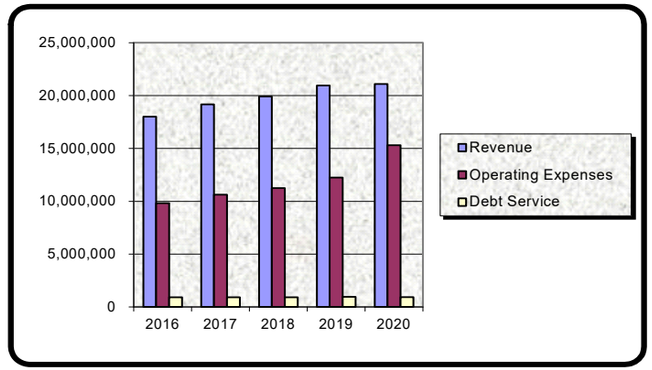
Expenditures



The following graph presents General Fund expenditures of the Village by function for the last five (5) years.

- Total General Fund expenditures for the year ended September 30, 2020, were approximately $19.8 million. This represents an increase of approximately $404,000, or 2.1%, when compared with 2019.
- Expenditures for all functions over the last five years have generally increased at an average annual rate of approximately 7.3%, compared to an average annual increase in the Village population of approximately 1.3%.
- Expenditures for debt service principal and interest were $430,916 or 2.1% of total governmental expenditures for 2020, which was slightly lower than the prior year total of $432,461 or 2.2%.

Fund Balance



The following graph presents the trend in assigned and unassigned fund balance of the General Fund for the last five years.

- Assigned and unassigned fund balance at September 30, 2020, was $13,778,194, including $3,000,000 assigned to disaster recovery, $1,500,000 assigned to capital projects, and $1,183,000 assigned to the 2021 budget.
- Unassigned fund balance was $8,095,194 and represents 40.9% of the 2020 actual expenditures (32.5% for 2019), or approximately 149 days of working capital (119 days in 2019).
- Unassigned fund balance increased by $1,787,601 in 2020 or 28.3% from the prior year unassigned fund balance.

Water and Sewer Operations

Operations of the water and sewer facilities are presented on a budgetary cash flow basis, which is operating income without depreciation or amortization, but after payment of debt service. The graph provided below compares water and sewer operations over the last five years.

- The net revenues of the water and sewer utility have consistently exceeded the required debt service by more than three times. Debt service coverage was 9.7 for 2020.
- Operating income was approximately $5.8 million for 2020 as compared to $5.9 million for 2019.
- The net cash provided by operations was approximately $8.9 million for 2020, as compared to $8.9 million for 2019.
- The utility received approximately $134,000 for new connections in 2020, a decrease of approximately $598,000.
- The investment in capital facilities was approximately $2.6 million in 2020, a decrease of approximately $775,000. The investment in capital facilities was financed by the net revenues of the utility system and capital contributions.

Communication With Those Charged With Governance

The Honorable Mayor and Members
of the Village Council
Village of Palm Springs
Palm Springs, Florida

We have audited the financial statements of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of the Village of Palm Springs, Florida, for the year ended September 30, 2020. Professional standards require that we provide you with information about our responsibilities under U.S. generally accepted auditing standards, the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (the "Uniform Guidance"), and Chapter 10.550, Rules of the Auditor General, as well as certain information related to the planned scope and timing of our audit. We have communicated such information to you in our engagement letter dated June 10, 2020. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Matters

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Village of Palm Springs, Florida, are described in Note 1 to the financial statements. There were no new pronouncements of the Governmental Accounting Standards Board (GASB) adopted by the Village for the fiscal year ended September 30, 2020. We noted no transactions entered into by the Village during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the Village's financial statements were:

- Management's estimate of the fair value of investments at September 30, 2020. We evaluated the key factors and assumptions used to estimate the fair value of investments and related investment earnings in determining that the amounts are reasonable in relation to the financial statements as a whole.

- Management's estimate of the net realizable value of accounts receivable at September 30, 2020. We evaluated the key factors and assumptions used to estimate the net realizable value of receivables and the related allowance for doubtful accounts in determining that the amounts are reasonable in relation to the financial statements as a whole.
- Management's estimate of the remaining service lives of capital assets at September 30, 2020. We evaluated the key factors and assumptions used to estimate the useful service lives and related depreciation expense in determining that the amounts are reasonable in relation to the financial statements as a whole.
- Management's estimate of the net pension liability, deferred inflows/outflows related to pensions and pension expense as of and for the year ended September 30, 2020. We evaluated the key factors and assumptions used to estimate the Village's net pension liability, deferred inflows/outflows related to pensions and pension expense in determining the amounts are reasonable in relation to the financial statements as a whole. We read and compared these estimates to the actuarial reports provided by the Village's actuary in determining that the amounts are reasonable in relation to the financial statements as a whole.
- Management's estimate of the other postemployment benefits (OPEB) liability, deferred inflows/outflows related to OPEB and OPEB expense as of and for the year ended September 30, 2020. We evaluated the key factors and assumptions used to estimate the Village's total OPEB liability, deferred inflows/outflows related to OPEB and OPEB expense. We read and compared these estimates to the actuarial report provided by the Village's actuary in determining that the amounts are reasonable in relation to the financial statements as a whole.

Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users. The most sensitive disclosures affecting the financial statements were:

- The disclosures related to deposits and investments in Note 2 to the financial statements.
- The disclosures related to the Village's long-term debt in Note 5 to the financial statements.
- The disclosures related to the Village's employee retirement plans in Note 9 to the financial statements.
- The disclosures related to the Village's other postemployment benefits (OPEB) plan in Note 10 to the financial statements.
- The disclosures related to commitments and contingencies in Note 11 to the financial statements.

The disclosures in the financial statements are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no difficulties in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. The attached summary of unadjusted audit differences summarizes the uncorrected misstatements of the financial statements. Management has determined that the effects are immaterial, both individually and in the aggregate, to the financial statements taken as a whole. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in the aggregate, to each opinion unit's financial statements taken as a whole.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated April 26, 2021.

Management Consultations with other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the Village's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Internal Control Related Matters

In planning and performing our audit, we considered the internal control over financial reporting (internal control) of the Village as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Village's internal control. Accordingly, we did not express an opinion on the effectiveness of the Village's internal control.

Our consideration of the Village's internal control was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control that we consider to be material weaknesses.

In planning and performing our audit of the Village's compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that are applicable to each of the Village's major Federal programs, we considered the Village's internal control over compliance with the types of requirements that could have a direct and material effect on each major Federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major Federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we did not express an opinion on the effectiveness of the Village's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses.

Compliance Related Matters

As part of obtaining reasonable assurance about whether the Village's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we did not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We also audited the compliance of the Village with the types of compliance requirements described in the *OMB Compliance Supplement* that are applicable to each of the Village's major Federal programs for the year ended September 30, 2020. The results of our auditing procedures disclosed no instances of noncompliance which are required to be reported in accordance with the Uniform Guidance.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the Village's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Other Matters

Other Information Included in the Comprehensive Annual Financial Report (CAFR)

We applied certain limited procedures to management's discussion and analysis, the budgetary comparison information, the condition rating of the Village's street system and certain pension and OPEB related information, which are required supplementary information (RSI) that supplements the basic financial statements. Our procedures consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

We were engaged to report on the combining fund financial statements, debt schedules and the Schedule of Expenditures of Federal Awards, which accompany the financial statements but are not RSI. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with U.S. generally accepted accounting principles, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves. In our opinion, the combining fund financial statements, debt schedules and the Schedule of Expenditures of Federal Awards, are fairly stated in all material respects in relation to the financial statements as a whole.

We were not engaged to report on the introductory section and statistical section, which accompany the financial statements but are not RSI. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

The Honorable Mayor and Members
of the Village Council
Village of Palm Springs

Restriction on Use

This report is intended solely for the information and use of the Village Council and management of the Village of Palm Springs, Florida, and is not intended to be and should not be used by anyone other than these specified parties.

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Administration

ITEM 9.1: Proposed Ordinance No. 2021-03 - Village Code Amendment - Chapter 34 - Law Enforcement and Parks & Recreation Impact Fees [**TO BE CONTINUED TO JUNE 10, 2021**]

SUMMARY:

The Planning, Zoning & Building Department is recommending an amendment to the Village Code - Chapter 34 to create a new Division 14 "Impact Fees" within Article VI "Land Use" to adopt by reference the "Village of Palm Springs Impact Fee Study" prepared by Tindale Oliver and to establish impact fee rates for Village law enforcement and Village parks and recreation facilities.

Impact fees are a one-time capital charge levied against new development to support the portion of Village capital costs (of infrastructure) that are expected to be needed/consumed as a result of the new development. Thus, ensuring that new development supports the cost of required infrastructure to meet expected levels of service and not place this cost exclusively on existing property owners.

Note: Legal requirements for impact fees have primarily been established through case law since the 1980's, but the Florida Legislature has also passed statutory procedural and methodological requirements and limitations (found in Chapter 163.31801, Florida Statutes).

The Village retained impact fee experts, Tindale Oliver, to prepare a technical study to recommend the calculation of new impact fees for law enforcement and parks and recreation in compliance with statutory and case law requirements.

Note: The Village has assessed law enforcement and parks and recreation impact fees since at least 2006, but a technical study outlining the methodology for the current rates has not been located in the archives. Additionally, the Village Code mentions impact fees, but does not currently contain the specificity of the proposed code amendments.

The proposed Ordinance includes:

1. Adoption of the impact fee study would provide a consumption-based methodology for calculating impact fee rates to be charged to new development based on the burden (demand) placed on law enforcement and parks and recreation services
2. Adoption of a schedule of rates established by land use category
3. Provisions for payment of impact fee at the time of issuance of building permits
4. Provisions for alternative fee calculations should an applicant desire to perform their own study to determine applicable rates for a proposed project
5. Allowances for developer-contribution credits
6. Allowances and restrictions on Village use of impact fees

The Consultant has developed recommended rates to be considered by the Village Council and are outlined within the attached schedule. A sample of these rates are as follows:

Land Use	Impact Unit	Current Law Enforcement Impact Fee	Proposed Law Enforcement Impact Fee	Current Parks & Recreation Impact Fee	Proposed Parks & Recreation Impact Fee
Single Family Residential	dwelling unit	$131.80	$274.44	$273.00	$659
Multi-Family Residential	dwelling unit	$131.80	$199.63	$273.00	$485
General Office	1,000 s.f.	$56.53	$139.20	$ 0	$0
Commercial Retail	1,000 s.f.	$44.45	$236.16	$ 0	$0
Fast Food Restaurant & drive-thru	1,000 s.f.	$44.45	$1,517.08	$ 0	$0

The Village Council may adopt rates that below the recommended rates and/or may may also "phase in" rates by adopting an impact fee schedule with planned increases each fiscal year that are within the maximum rates calculated by the methodology outlined in the Tindale Oliver impact fee study.

Note: Currently, the Florida Legislature is considering a proposed bill that would limit impact fee increases. As currently proposed, increases must be adopted in four equal installments, not exceed 50% of the current fee, and can only occur once every four years. If approved, this legislation would limit the Village's ability to pursue the "phase in" approach. Further, this proposed cap by the Legislature may change as this legislation is actively being considered and debated.

The Planning & Zoning Board considered the proposed ordinance during their meeting on April 13, 2021 and recommended approval.

The proposed ordinance was prepared by the Assistant Village Manager and reviewed by the Village Attorney, the Interim Planning, Zoning & Building Director, Police Chief, Parks and Recreation Director and the Finance Director.

The proposed ordinance was approved by the Village Council on April 8, 2021 and is being presented on 2nd and final reading.

If approved, the proposed, new impact fees will begin to be collected on new building permits that are issued after the effective date of the ordinance on June 21, 2021 (the required 90-day notice was published March 23, 2021).

FISCAL IMPACT:

The proposed, new impact fees would increase Village revenues to assist in supporting the requisite costs to provide the highest levels of policing and parks & recreation infrastructure and would be determined by the new growth that occurs within the Village.

Based on FY 2020 permit activity, the proposed, new impact fees are expected to generate approximately $7,537.12 and $18,304 for law enforcement and parks & recreation, respectively, within FY 2022.

Note: Previous years' revenues for both law enforcement and parks & recreation are provided below:

Fiscal Year (FY)	Law Enforcement Impact Fee	Parks & Recreation Impact Fee
2010	$ 4,936.53	$ 2,139.82
2011	$ 9,399.46	$ 1,710.80
2012	$ 621.19	$ 0
2013	$ 5,281.94	$ 5,320.97
2014	$ 3,145.59	$ 2,076.40
2015	$ 31,282.65	$ 5,119.60
2016	$ 3,435.58	$ 1,029.75
2017	$10,366.17	$10,903.00
2018	$ 9,747.23	$21,144.24
2019	$22,161.00	$30,202.63
2020	$ 1,213.14	$ 4,564.42

If approved, the proposed, new impact fees will begin to be collected on new building permits that are issued after the effective date of the ordinance on June 21, 2021 (the required 90-day notice was published March 23, 2021).

ATTACHMENTS:

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Planning, Zoning & Building

ITEM 9.2:

Ordinance No. 2021-04 - Village of Code Amendment - Chapter 34 - Special Events (*Second Reading*)

SUMMARY:

The Planning Zoning & Building Department is recommending an amendment to the Village Code - Chapter 34 Article VI "Land Use", Division 7 "Supplemental District Regulations" to clarify the definition of "special event."

In lieu of referencing the effective business license, which establishes the specific business use and limits of the premises, the amended language provides specific examples of activities that, if approved, would be considered as special events.

Note: The application requirements and process for consideration of a proposed special event are unchanged.

The Planning & Zoning Board considered the proposed ordinance at their meeting on April 13, 2021 and recommended approval.

The proposed ordinance was prepared by the Village Attorney and was reviewed by the Assistant Village Manager, Interim Planning, Zoning & Building Director and Police Chief.

The proposed ordinance was approved by the Village Council on April 8, 2021 and is being presented for consideration on 2nd and final reading.

FISCAL IMPACT:

The proposed ordinance does not have a direct fiscal impact to the Village.

Proposed Ordinance No. 2021-04 - Village Code - Chapter 34 - Special Events

ORDINANCE NO. 2021-04

AN ORDINANCE OF THE VILLAGE OF PALM SPRINGS, FLORIDA, AMENDING THE VILLAGE CODE OF ORDINANCES AT CHAPTER 34 "LAND DEVELOPMENT", ARTICLE VI, "LAND USE", DIVISION 7 "SUPPLEMENTAL DISTRICT REGULATIONS" BY AMENDING SECTION 34-896 TO CLARIFY THE DEFINITION OF "SPECIAL EVENT" FOR WHICH A SPECIAL EVENT PERMIT IS REQUIRED; PROVIDING FOR CODIFICATION; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY, AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Village of Palm Springs, Florida (the "Village") is a duly constituted municipality having such power and authority conferred upon it by the Florida Constitution and Chapter 166, Florida Statutes; and

WHEREAS, this proposed ordinance amends Section 34-896(a) of the Village Code of Ordinances to clarify the definition of "special event" for which a special event permit is required; and

WHEREAS, the Village Council has reviewed the recommended revisions and has determined that it is in the best interest of the public health, safety, and general welfare of the Village to adopt this ordinance.

NOW THEREFORE, BE IT ORDAINED BY THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA:

Section 1. The foregoing recitals are incorporated herein as true and correct findings of fact of the Village Council and serve as a basis for adoption of this Ordinance.

Section 2. Chapter 34 "Land Development", Article VI, "Land Use,", Division 7 "Supplemental District Regulations" is hereby amended by amending subsection (a) of Section 34-896 as follows:

Section 34-896 Special events.

(a) *Permit required.* Any person, corporation, or other entity of any kind who desires to conduct any type of special event ~~or temporary recreational event~~ within the village ~~and which is not covered under the regular business tax receipt and registration required by article IV, or that is held in whole or in part upon village-owned property and/or public right-of-way~~, must obtain a special event permit from the village in order that the village may adequately provide for the potential impacts created by the proposed event. The fee for such permit shall be set by resolution of the Village

Council. Outdoor sales, grand opening promotions, and other similar events, per section 34-884, are not subject to this section. For the purposes of this section, “special event” shall mean any occasion, including but not limited to exhibitions, celebrations, festivals, special sales events, shows, and other activities taking place on non-residential private property that involves, on a temporary basis, the occupation of land and/or construction of improvements not identified in an approved site plan or other development approval. Special events shall not include activities to be conducted entirely within public parks or on public right-of-way or vacant property. Factors indicative of a special event includes any one or more of the following:

(1) Closing of a public street, sidewalk, or alleyway;

(2) Blocking or restricting public property.

(3) Blocking or restricting access to private property of others.

(4) Use of pyrotechnics or special effects.

(5) Use of open flame, explosions, or other potentially dangerous displays or actions.

(6) Use or display of animals, aircraft, or watercraft.

(7) Sale or service of merchandise, food or nonalcoholic and alcoholic beverages on public and private property where otherwise prohibited by ordinance.

(8) Installation of a stage, band shell, vehicle(s), of any kind, trailer, van, portable building, booth, grandstand, or bleachers on public or private property where otherwise prohibited by ordinance.

(9) Placement of "No Parking" signs or barricades in a public right-of-way.

(10) Electronic amplification of music, voices, sounds, or activities

(11) Determination by village staff that the event will result in substantial impact on city resources, facilities, or public safety services in response thereto.

Examples of special events include, but are not limited to, the promotion of concerts, markets, seminars, expositions, community events, fairs, festivals, carnivals, filming, processions, parades, circuses, amusement rides, rodeos, fundraising, marathons and other running events, walkathons, block party, bicycle races and tours, sporting events, car shows, revivals, dances, assemblages, or any other similar organized activity, whether for profit or not for profit, and any other situations which are outside the normal scope of permitted activities for a location, or which may have some impact on the community-at-large.

Section 3. Codification. The sections of the ordinance shall be made a part of the Village Code of Laws and ordinances and may be re-numbered or re-lettered to accomplish such, and the word "ordinance" may be changed to "section", "division", or any other appropriate word.

Section 4. Repeal of Conflicting Ordinances. All Ordinances, Resolutions or parts of Ordinances and Resolutions in conflict herewith are hereby repealed.

Section 5. Severability. If any word, clause, sentence, paragraph, section, or part thereof contained in this Ordinance is declared to be unconstitutional, unenforceable, void or inoperative by a court of competent jurisdiction, such declaration shall not affect the validity of the remainder of this Ordinance.

Section 6. Effective Date. This Ordinance shall become effective immediately upon adoption.

Council Member _____, offered the foregoing Ordinance, and moved its adoption. The motion was seconded by Council Member _____, and upon being put to a vote, the vote was as follows:

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Planning, Zoning & Building

ITEM 9.3: Ordinance No. 2021-02 - Land Use and Rezoning (Small-Scale) Amendments - Fontana Townhomes - 4063 Davis Road & 4090 Coconut Road (Quasi-Judicial Hearing) (*Second Reading*)

SUMMARY:

Mr. Jerrod Purser, agent for Meritage Homes of Florida, Inc., is requesting a small-scale land use plan amendment and rezoning on 4.48 acres (comprised of two parcels) located at 4063 Davis Road and 4090 Coconut Road to facilitate a multi-family (townhome) development project.

The proposed small-scale land use and zoning changes would be from Palm Beach County designations to Palm Springs designations and the combined properties are less than 10 acres in size (4.48 acres total) and are planned for urban (residential) use:

Existing PBC Future Land Use	Proposed Village Future Land Use	Existing PBC Zoning	Proposed Village Zoning
Palm Beach County Urban Infill	High Density Residential (up to 19 du/ac)	Palm Beach County Urban Infill (UI)	Residential Multiple-Family (RM)

The Applicant is requesting that the property be designated with the Village's High-Density Residential future land use category (19 du/ac), which would allow up to a maximum intensity of 89 residential dwelling units. The property was annexed into the Village of Palm Springs in 2017 and 2019; however, Palm Beach County Future Land Use and Zoning designations were maintained until a specific use was proposed.

Note: The subject property is bound to the north and east by Commercial land use, to the south and west by Palm Beach County Medium Density Residential 5 (MR5) land use.

The Applicant is concurrently requesting site plan approval (SPR21-02) and four (4) waivers for residential planned development (RPD) to construct 59 two-story fee simple townhomes within 9 buildings. The proposed community would have access via Davis Road and Coconut Road. Amenities are expected to include playground equipment, a picnic table under shade structure and benches.

The Applicant is requesting four (4) waivers for the proposed RPD site plan:

1. Relief from Sec.34-1328 to allow a 20' wide drive aisle rather than 26' wide required.
2. Relief from Sec.34-1063(a)(1) to allow for one sidewalk on a street or primary driveway interconnected with other pedestrian ways instead of sidewalks on both sides of the main street.
3. Relief from Sec.34-766(1) to allow the construction of 59 residential dwelling units within 4.73 acres rather than 12.55 acres minimum required within the RM district.
4. Relief from Sec.34-1064(1)(b) to allow a 15' side setback rather than 20' minimum required.

The proposed site plan with waivers is presented (within this item) for informational purposes only (no action required at this time). If the proposed small-scale land use map and rezoning amendments are approved on the 2nd and final reading, the proposed site plan will be considered by the Village Council under a separate Resolution.

Note: The Village does not typically place conditions of approval on future land use map changes. The legislative decision as to the appropriateness of the land use, irrespective of potential development plans, is generally made with consideration on compatibility, impact on services and need for the land use to fulfill Village redevelopment and growth objectives.

The proposed request was submitted through the PBC Intergovernmental Plan Amendment Review Committee (IPARC) for intergovernmental review and no comments were received.

Note: IPARC is designated to provide coordination of proposed plan amendments, cooperation between affected local government and service providers and provides opportunities to resolve potential disputes only within the plan amendment process.

The Planning and Zoning Board considered this application during their March 9, 2021 meeting and recommended approval. The Local Planning Agency (LPA) considered this item during their April 8, 2021 meeting and recommended approval.

The proposed ordinance was approved by the Village Council on April 8, 2021 and is being presented for consideration on 2nd and final reading.

FISCAL IMPACT:

The proposed land use and rezoning amendments are not expected to provide a direct fiscal impact to the Village; however, it would facilitate development that will increase the Village's property valuation. Additionally, this project, if approved, would require various Village

services that will result in increased expenditures to the Village.

This property is located within the Palm Springs CRA - Lake Worth District and redevelopment would result in increased TIF revenue.

ORDINANCE NO. 2021-02

(SMALL SCALE LAND USE AMENDMENT & REZONING)

AN ORDINANCE OF THE VILLAGE OF PALM SPRINGS, FLORIDA, AMENDING THE COMPREHENSIVE LAND USE PLAN OF THE VILLAGE, PURSUANT TO THE "SMALL SCALE" COMPREHENSIVE LAND USE AMENDMENT LAWS OF THE STATE OF FLORIDA, FOR THE 4.73 GROSS ACRE PARCEL LOCATED AT 4063 DAVIS ROAD AND 4090 COCONUT ROAD, AND BEING MORE FULLY DESCRIBED IN EXHIBIT "A" ATTACHED HERETO, FROM A LAND USE DESIGNATION OF "URBAN INFILL" TO A VILLAGE FUTURE LAND USE DESIGNATION OF "HIGH DENSITY RESIDENTIAL"; FURTHER CHANGING THE ZONING DESIGNATION FROM "URBAN INFILL (UI)" TO PROVIDE FOR A ZONING DESIGNATION OF "RESIDENTIAL MULTI-FAMILY (RM)" AND A PLANNED DEVELOPMENT SITE DISTRICT ON THE VILLAGE OF PALM SPRINGS OFFICIAL ZONING MAP; PROVIDING DIRECTIONS TO THE VILLAGE CLERK; PROVIDING FOR REPEAL OF ALL ORDINANCES IN CONFLICT; PROVIDING FOR SEVERABILITY; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Village has determined the need to amend the land use and zoning designations for the 4.73 gross acre parcels located at 4063 Davis Road and 4090 Coconut Road; and

WHEREAS, on December 21, 2017, Resolution No. 2017-49 the property located at 4090 Coconut Road was voluntarily annexed in the Village of Palm Springs, and the property located at 4063 Davis Road, was annexed via Interlocal Agreement with Palm Beach County on the same date; and

WHEREAS, the Village will initiate the small-scale land use and zoning changes from the existing Palm Beach County designation. The subject properties are less than 10 acres in size; and

WHEREAS, the Village has adopted a Comprehensive Plan pursuant to the Local Government Comprehensive Planning and Land Development Regulation Act (the "Act"); and

WHEREAS, the Village Council, sitting as the Village's Local Planning Agency (the "LPA") will consider this item on April 8, 2021 and their recommendation will be provided to the Council prior to consideration; and

WHEREAS, the Village Council has considered the request of Village Staff for small-scale land use amendments and re-zoning designations; and

WHEREAS, the Village Council has determined that granting the request for land use amendments and rezoning serves a valid public purpose.

NOW THEREFORE, BE IT ORDAINED BY THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA:

Section 1. Findings. The Village Council finds the above statements are true and correct and serve as a basis for consideration of this ordinance.

Section 2. Future Land Use. The Future Land Use designation in the Village's Comprehensive Land Use Plan for the lands described herein, as more particularly designated in "**Exhibit A"** shall be established as "High Density Residential". Until such time as the appeal period expires, (if challenged, the new zoning is not effective until such time as the state land planning agency or the Administration Commission issues a final order of compliance) but not sooner than 31 days following the effective date of this ordinance, all development of said lands shall be subject to the requirement of the existing Village Land Use Plan, Zoning, and Subdivision regulations.

Section 3. Zoning. Concurrent with said small-scale land use amendments, the Land Development (Zoning) District designations on the official Village of Palm Springs Zoning Map shall be established as "Residential Multiple-Family (RM)" more particularly designated in **Exhibit "A"**, subject to the approval and appeal period stated in Section 2, above.

Section 4. Directions to the Village Clerk. The Village Clerk is hereby authorized and directed to forthwith cause the designations of the zoning of the properties described in the attached "**Exhibit A",** as set forth in Section 3 of this Ordinance, on the official Village of Palm Springs Zoning Map.

Section 5. Repeal of Conflicting Ordinances. All Ordinances, Resolutions or parts of Ordinances and Resolutions in conflict herewith are hereby repealed.

Section 6. Severability. If any word, clause, sentence, paragraph, section, or part thereof contained in this Ordinance is declared to be unconstitutional, unenforceable, void, or inoperative by a court of competent jurisdiction, such declaration shall not affect the validity of the remainder of this Ordinance.

Section 7. Effective Date. This Ordinance shall become effective immediately upon adoption.

Council Member _____, offered the foregoing Ordinance, and moved its adoption. The motion was seconded by Council Member _____, and upon being put to a vote, the vote was as follows:

	Aye	Nay	Absent

PLANNING, ZONING & BUILDING STAFF REPORT

SUBJECT: Small-Scale Land Use Amendment, Rezoning and Site Development Plan (Residential Planned Development Site Plan with Waivers) - Fontana Townhomes – 4063 Davis Road & 4090 Coconut Road.

Application Summary			
Applicant / Petitioner	Meritage Homes of Florida, Inc.	Submittal Date	10/20/2020
Reference Name	Fontana Townhomes	Case Number	SPR21-02
		Parcel Control No	70-42-44-24-00-000-6070 & 70-43-44-30-01-009-0040
Location	Assembly of the properties 4063 Davis Rd & 4090 Coconut Road	Site Area	±4.73 gross acres ±4.48 net acres
P&Z B Meeting	March 9, 2021	Local Planning Agency	April 8, 2021
Council Meeting (after LPA, 1st Reading)	April 8, 2021	Council Meeting (2nd Reading)	May 13, 2021

Requests	
Proposed Use(s)	Small-Scale Land Use Amendment of the Future Land Use Map to change the land use from Urban Infill to High Density Residential, concurrent with Rezoning from Urban Infill (UI) to Residential Multiple- Family and a Planned Development Site Plan for construction of 59 two-story townhomes within nine buildings.
Number of Buildings	9 Buildings (approximately 50,000 SF total)
Waivers	1. Requesting a waiver from Sec.34-1328 to allow a 20' drive aisle instead of 26' required. 2. Requesting a waiver from Sec.34-1063(a)(1) to allow for one sidewalk on a street or primary driveway interconnected with other pedestrian ways instead of sidewalks on both sides of the main street. 3. Requesting a waiver from Sec.34-766(1) to allow the construction of 59 residential dwelling units within 4.73 acres instead of 12.55 acres minimum required within the RM district. 4. Requesting a waiver from Sec.34-1064(1)(b) to allow a 15' side setback instead of 20' minimum required.

Parking			
Code	Required	Provided	Meets Requirement
Total Parking	Total of 185 parking needed 2.5/ DU + 25% for guest	185 spaces total 59 garages spaces 118 driveway spaces (2 per unit) 8 guest spaces	Yes

Setbacks			
Code	Required Minimum	Proposed	Meets Requirement
Front yard (East & West)	25'	25'	Yes
Rear yard (South)	20'	N/A (two frontage)	-
Side yard (North & South)	20'	15'	No* (waiver requested)

Site Characteristics			
Existing Use	Vacant lot & Single-Family Home	Proposed Use	Residential Multiple-family
Existing Zoning	Urban Infill (UI)	Proposed Zoning	Residential Multiple-Family (RM)
Existing Future Land Use	Urban Infill	Proposed Future Land Use	High Density Residential

Proposed Density	12.5 du/acres (Maximum permitted on High Density Residential is 19 du/acre)

Surrounding Existing Land Use, Future Land Use, and Zoning			
Direction	Existing Use	Future Land Use	Zoning District
North	Mobile home park & medical office building	Urban Infill & Commercial	Urban Infill (UI) & Commercial General (CG)
South	Single Family Home & Vacant lot	Unknown Unincorporated Palm Beach County	Unknown Unincorporated Palm Beach County
East	Drive in theater – Swap Shop	Commercial	Commercial General (CG)
West	PBC Governmental office	Unknown Unincorporated Palm Beach County	Unknown Unincorporated Palm Beach County

Recommendation
Planning, Zoning & Building Staff recommends conditional approval of the new residential high density planned development site plan, as depicted on the proposed site plan, based on consistency with the Village Comprehensive Plan, compatibility with surrounding uses and generally consistent with the CRA Lake Worth Road District objectives.

I. Site History

- Ordinance 2017-35: Annexation

The property located at 4090 Coconut Road, was voluntarily annexed into the Village of Palm Springs on December 21, 2017. Palm Beach County's Future Land Use and Zoning designations were maintained until today's date.

- Resolution 2017-49: Annexation

The property located at 4063 Davis Road, was annexed into the Village of Palm Springs via interlocal agreement with Palm Beach County, the agreement was executed by Palm Beach County on October 22, 2019, Village's Council approved the annexation on December 21, 2017. Palm Beach County's Future Land Use and Zoning designations were maintained until today's date.

II. Comprehensive Plan Consistency

- The subject property's Future Land Use designation and Zoning are Palm Beach County Urban Infill and Urban Infill (UI), respectively. The proposed small-scale land use amendment is to assign the Village's Future Land Use of High Density Residential. Concurrently, rezoning from the Palm Beach County zoning designation of Urban Infill to Residential Multiple-Family is requested, and is supported with a planned development site plan. All requests are consistent with goals, objectives and policies of the Village's Comprehensive Plan.

III. Waivers Requested

The applicant is seeking the following waivers:

Waiver #1: The applicant is requesting a waiver relief from Sec.34-1328 to allow a 20' wide drive aisle instead of 26' wide required.

Waiver #2: The applicant is requesting a waiver relief from Sec.34-1063(a)(1) to allow for one sidewalk on a street or primary driveway interconnected with other pedestrian ways instead of sidewalks on both sides of the main street.

Waiver #3: The applicant is requesting a waiver relief from Sec.34-766(1) to allow the construction of 59 residential dwelling units within 4.73 acres instead of 12.55 acres minimum required within the RM district.

Waiver #4: The applicant is requesting a waiver relief from Sec.34-1064(1)(b) to allow a 15' side setback instead of 20' minimum required.

The applicant's full justification to the waivers is attached hereto.

a. <u>The request is in harmony with and is consistent with the purpose and intent of the Village's Comprehensive Plan and Land Development Code and that such waiver will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare.</u>

Waiver 1: The request to allow a 20' wide drive aisle when adjacent to 90-degree parking is in harmony and is consistent with the purpose and intent of the Village's Comprehensive Plan and Land Development Code. The majority of the subject site is compliant with the required drive aisle dimensions, however there are even 90-degree parking spaces in a portion of the site which require a 26' wide drive aisle. This waiver will not be injurious to the area involved, as traffic can still safely maneuver into and out of the parking spaces.

Waiver 2: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian connectivity will be provided.

Waiver 3: The request to allow a reduced lot size from the required minimum lot requirements is outside of the Applicant's control and will not affect the public health safety, and welfare.

Waiver 4: The request to allow a reduced side setback is consistent with the purpose and intent of the Village's Comprehensive Plan and Land Development Code, and will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. The subject area of this request is specific to lot 52, which is along the northern portion of the site. It is screened by the adjacent northern property by a 10' landscape buffer and existing 6' concrete wall. The request also applies to lots 14 and 15, along the southern portion of the site, adjacent to the LWDD L-12 Canal. These lots are screened by a 10' landscape buffer with a 5' vinyl fence.

b. The request results from innovative design in which other minimum standards are exceeded.

Waiver 1: The request to allow a reduced drive aisle width when adjacent to 90-degree parking results from innovative design in which other minimum standards are exceeded. The subject site is compliant with the required drive aisle width in all other areas.

Waiver 2: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian continuity will be provided.

Waiver 3: The request to allow a reduced lot size is not the result of innovative design. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

Waiver 4: The request to allow a reduced side setback distance results from innovative design in which other minimum standards are exceeded. The areas of focus for the reduced side setback, currently propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

c. The request demonstrates that granting of the waiver will result in preservation of valuable natural resources, including drainage and recharge areas, natural areas, etc.

Waiver 1: The granting of the waiver request related to reduced drive aisle width will result in the preservation of valuable natural resources. A narrower street width equates to less impervious area, as a result this will help preserve valuable natural resources.

Waiver 2: The granting of the waiver request will result in the preservation of valuable natural resources, including drainage and recharge areas, and natural areas. As aforementioned, by negating the requirement for an extra sidewalk, this will allow for increased pervious areas throughout the subject site.

Waiver 3: The request to allow a reduced lot size will not result in preservation of valuable natural resources. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

Waiver 4: The reduced side setback will result in the preservation of valuable natural resources. This will be achieved, as the reduced setback will allow for greater design freedom and allow for more opportunity to preserve natural resources.

d. The request demonstrates public benefits to be derived, including but not limited to such benefits as dedication of rights-of-way, extensions of pedestrian linkages outside of the project boundaries, preservation of open areas and use of desirable architectural, building, and site design techniques.

Waiver 1: The request will demonstrate public benefits such as desirable site design techniques. By allowing for a narrower drive aisle adjacent to parking spaces, there is room for more pervious area and potential open spaces. This will create a more desirable community for future residents.

Waiver 2: The request will demonstrate public benefits such as extension of pedestrian linkages outside of the project boundaries. The subject site is located in an ideal area with close proximity (less than 300 feet) to the Lake Worth Road Corridor The proposed sidewalk network will connect to the existing Davis Road sidewalk and allow walkability to the surrounding areas and services.

Waiver 3: The request to allow a reduced lot size does not demonstrate public benefits to be derived. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

Waiver 4: The waiver request will demonstrate public benefits such as desirable site design techniques and right-of-way dedication to the LWDD L-12 Canal. By allowing for a reduced side setback, the subject site will have more design freedoms to provide increased open space and additional drainage.

e. The request provides sufficient screening and buffering to screen adjacent uses from adverse impacts caused by the granting of a waiver.

Waiver 1: The request will not jeopardize the screening of the subject site as it relates to a decreased drive aisle width in a specific portion of the site.

Waiver 2: This waiver request is specific to the pedestrian sidewalks within the subject site and would not adversely impact adjacent properties. However, appropriate landscape buffering and screening is provided.

Waiver 3: The waiver does not generate any adverse impacts related to adjacent properties; however, the applicant will sufficiently screen and buffer the property.

Waiver 4: The waiver request will provide sufficient screening and buffering to screen adjacent uses from any adverse impacts created by the reduced side setback This reduced setback is specific to two areas of the subject site, which propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

f. Economic issues may not be used to justify waivers.

Waiver 1, 2, 3 & 4: Economic issues are not used as a justification for these requests.

g. The request is compatible with existing and potential land uses adjacent to the development site.

Waiver 1, 2, 3 &4: The request is consistent with the existing and potential land uses adjacent to the development site. A majority of the surrounding uses are residential communities which either provide one sidewalk or no sidewalks. There is a sidewalk along Davis Road which the subject site's sidewalk system will connect to. Overall, a waiver request for a decreased street width, single sidewalk, and a reduced side setback will not generate compatibility issues.

Staff supports the applicant's request based on the intent of the applicant to maximize the utilization of the land reducing the amount of impervious surface and consistency with the Village Comprehensive Plan

allowing for innovative designs. Although the acreage is below the minimum required for 59 residential dwelling units, the property can still be developed in the proposed manner without any adverse impact to the surrounding properties.

IV. Neighborhood Compatibility

1) The proposed project is located on the south side of Lake Worth Road between Coconut Road and Davis Road.
2) Surrounding properties are a mix of residential and commercial uses.
3) The property is located within the Lake Worth Road District CRA.
4) The Village Center is located within 1.5 miles.
5) A mix of different uses like general retails, restaurants, grocery supermarket and professional offices are located on the proximities along Lake Worth Road.
6) Available public transportation on Lake Worth Road and South Military Trail are existing within less than 1 mile from the property.

V. Consistency with Palm Springs Lake Worth Road District CRA

1. Detailed Description of the Proposal's Consistency with Five (5) Key Goals of CRA

I. Improving Utilities and Infrastructure

The development proposal will extend new Utilities and install new site-serving Infrastructure to the site, as improvements are necessary in order to construct the Townhouses.

II. Expanding Job Development and Economic Growth

The development proposal does not directly fulfill the CRA's key goal to expand job development and economic growth, but it will provide additional residents to supply the workforce and economy of the Village.

III. Enhancing Public Safety

The development proposal will enhance public safety, as the subject site is currently abandoned and an ideal area for vagrancy, illegal dumping and other criminal activities to occur due to its location adjacent to the LWDD canal and separation from Lake Worth Road. The development of buffers, fencing, and additional landscape screening around the perimeter of the subject site will significantly decrease the chance of any crime occurring on this property in the future.

IV. Increasing and Maintaining Workforce Housing

While Workforce Housing is not a component of this development proposal, the overall nature of the development program will create an equal opportunity for all Village residents to increase homeownership. Townhouses offer an affordable entry level homeownership opportunity. More ideal than renting and more achievable than purchasing a single-family residential house, the development proposal will provide much needed home options for residents of the Village.

V. Advancing the Partnership with Palm Beach County

The development proposal will advance the partnership with Palm Beach County due to its location within the Hernden Park Countywide Community Revitalization Area (CCRT) neighborhood core area. The Countywide Community Revitalization Area's within Palm Beach County are overseen by the County's Office of Community Revitalization (OCR). This request will require the continued coordination with the County and surrounding Hernden Park residents to ensure the communities needs are met.

2. Proposal's effect on existing conditions (identified in CRA Community Redevelopment Plan) in the CRA District.

As evidenced by the Lake Worth Road subdistrict study, the Lake Worth Road subdistrict is currently subject to slum/and or blighted conditions. Some of the existing conditions include faulty lot layout in relation to usefulness, inadequate building density patterns, and incidence of crime in the area higher than in the remainder of the county or municipality. This proposal will improve all of the aforementioned negative existing conditions on the subject site and in turn have an effect on the immediately surrounding area.

3. Proposal's ability to assist in achieving strategies and objectives of the Palm Springs CRA.

The development proposal will assist in achieving strategies and objectives of the CRA as it addresses an existing blighted area within the Village. As evidenced by the subdistrict study, the Lake Worth Road subdistrict is subject to slum/and or blighted conditions. The subject site has sat abandoned for many years and allows for an incidence of crime in the area due to its ideal location next to the LWDD canal and separation from Lake Worth Road. Proposing a residential development such as the Fontana Townhomes development will assist in achieving the CRA's strategies to address blighted areas, by improving the area and discouraging criminal traffic.

VI. Regulatory Issues

- The site plan generally conforms to the property development standards of the Residential Planned Development.
  1) Proposed project plan generally meets required site development regulations.
  2) A High-Density Residential Land Use designation and rezoning to RM, shall be approved prior to consideration of the proposed Site Plan.
  3) The applicant is responsible to acquire all applicable permits from all regulatory agencies with jurisdiction over the project site, including but not limited to Palm Beach County, LWDD and the Village of Palm Springs.
  4) Civil/Utility plans shall be approved by the Village's Engineer.
  5) Proposed ROW dedications along the west, south and east shall be approved by PBC and LWDD respectively at time of Civil/Utility plan review.
  6) The project is located within the Airport Land Use Noise Zone (ALUNZ) for Palm Beach County Park Airport.
  7) The proposed development is located within the Airport Regulated area Zone 3 & Zone 1 for PBIA and Lantana Airport
  8) The 10' pipe easement (ORB. 2204PB. 1150) shall be abandoned at time of Civil/Utility review.
  9) Proposed Site Plan meets the Traffic Performance Standards of Palm Beach County.
  10) Property shall be platted.

VII. Environmental Issues:

There are no environmental (wetlands, floodplains, etc.) issues identified.

VIII. Community Outreach/ Notification

- The subject property was posted on February 26, 2021.
- Public Notification letters were mailed to all property owners within 300 feet radius of subject property on February 19, 2021.
- Legal advertisement was published in the paper on February 25, 2021 and will be re-advertise on March 25, 2021 and April 28, 2021.
- Staff has not received any inquiries or comments as a result of the notices.

IX. Proposed Development Plan Details

The petitioner's development plans dated received on October 20, 2020 depicts the following:

- Application for Small-Scale Land Use Amendment, Rezoning and Residential Planned Development Site Plan approval with 4 waivers for the construction of 59 two-story fee-simply townhomes within 9 buildings.
  1. Site Plan dated received October 20, 2020 revised and resubmitted on February 24, 2021.
  2. Landscape plans dated received October 20, 2020 revised and resubmitted on February 24,

2021.
3. Engineering plans dated received October 20, 2020 revised and resubmitted on January 15, 2021.
4. Architectural plans dated received October 20, 2020 revised and resubmitted on December 21, 2020.
5. Photometric plan dated received October 20, 2020 revised and resubmitted on December 21, 2020.
6. Boundary and topographic survey dated received October 20, 2020.
7. Traffic study.
8. Project narrative and Justification Statement of proposed use.
9. Drainage calculations dated received October 20, 2020 revised and resubmitted on December 21, 2020.
10. Common amenities detail plan.

X Recommendation

The applicant is proposing the development of the 4.73 acres parcel with the construction of 59 two-story fee-simple townhomes. The townhomes will be three-bedroom homes with a one car garage and a driveway with space for two cars. The buildings will be configured with five (5) 6-townhome units, three (3) 7-townhome units and one (1) 8-townhome units, for a total of nine (9) buildings. The community will have two access driveways via the existing Davis Road and Coconut Road right-of-way. Amenities include a tot lot with playground equipment, a shade structure, picnic table and sports field for lawn games.

Planning, Zoning & Building Staff has conducted a review of the application and found the proposed Residential Planned Development Site Plan to be consistent with goal, objectives and policies of the Village's Comprehensive Plan. The proposed project is generally consistent with the Land Development and zoning regulations and all other portions of the code. The proposed residential multi-family project provides internal sidewalk connections between the common amenities (tot lot with playground equipment, a shade structure, picnic table and sports field for lawn games) and the buildings, to facilitate pedestrian circulation and safety. The proposed project provides open spaces creating common areas for passive/leisure activities. The proposed use does not significantly reduce light and air on adjacent properties and would not be a deterrent to surrounding properties. The new project does not negatively impact natural systems.

A respectively 15' and 10' wide right-of-way, along Coconut Road and Davis Road, is required to be dedicated to Palm Beach County to comply with county standards.

In addition, the project exceeds some of the minimum requirement for a Planned Development as shown on the table below:

Land Development Regulations	Required	Proposed
35 percent of the gross land area for open space	68,302 sf (1.57 acres)	81,457 sf (1.87 acres)
40% maximum lot coverage	82,415 sf	50,000 sf

Planning, Zoning & Building Staff recommends approval of the Small-Scale Land Use Amendment and Rezoning. PZ&B Staff recommends conditional approval of the Residential Planned Development Site Plan with 4 waivers, for the construction of 59 two-story fee simple townhomes subject to the following forty-eight (48) conditions below and a suggestion for a voluntary monetary contribution, requested by the School District to mitigate school impacts:

1. Build out date December 31, 2025.
2. Notice of Actual Construction or Alteration form shall be filled out (form 7460) to determine if the project will be a hazard to air navigation, according to PBIA, and a final determination letter shall be provided to the Village at time of permitting.

3. Per Palm Beach Department of Airports request, each perspective tenant and/or purchaser within the ALUNZ must be informed that occasionally will observe aircraft arriving at and departing from Palm Beach County Park Airport, and shall be disclosed prior to a real estate contract. The condition will become inclusive in the contract's conditions and shall be noted in subsequent contracts. Condition shall be added into the HOA covenants/ deed restrictions document and provided to the Village at time of Platting.
4. The final plat shall be approved by the Village Council prior to issuance of a building permit.
5. The Final Plat shall be approved and recorded prior to any sales.
6. The common amenities (tot lot with playground equipment, a shade structure, picnic table and sports field for lawn games) shall be completed in their entirety, open for use and accessible to the residents, prior to the issuance of the 23rd Certificate of Occupancy (40% of the project)
7. The dedication of 10' and 15' along Davis Road and Coconut Road respectively via Right-of-way Deed to Palm Beach County free and clear of all encumbrances (to comply with county standards) shall be executed at time of platting.
8. An opaque fence shall be provided around the lift station supplemented with landscaping and details shall be provided at time of permitting.
9. A Utility/Civil Plan shall be approved by the Village Engineer and Palm Beach County Water Utility Department at time of permitting and shall be revised to match site plan.
10. Garages shall be used for parking only. The HOA covenants/ deed restrictions shall include prohibit the conversion of garages into habitable spaces or used as storage.
11. The HOA covenants/ deed restrictions shall prohibit the installation of any additional impervious or semi-impervious surface.
12. The HOA shall be responsible for all landscape maintenance, including, but not limited to, mowing of private yards and trimming the trees adjacent to L-12 Canal. Canopy trees adjacent to L-12 Canal shall not impede, under any circumstances, the access to the canal for maintenance. The HOA shall be responsible for the removal of the trash after the any lawn work concluded. (this shall be included in the HOA documents).
13. The HOA covenants/deed restrictions shall prohibit the installation of sheds, the parking of boats, commercial vehicles, or recreational vehicles anywhere inside the property. Parking of oversized vehicles that do not fit within the typical parking stall (9'x18.5') shall also be prohibited.
14. Any/all legal instrument recorded shall include deed restrictions on the lots as follows:
    a. Garages shall remain as garages and shall not be converted to habitable space.
    b. Only two vehicles shall be parked in the driveways overnight and shall not be permitted to park on or block any sidewalk or drive isles.
    c. There shall be no screen enclosures or additions permitted including screening the rear patios.
    d. There shall be no pools permitted.
    e. Boats, RV'S, or recreational vehicles shall only be permitted if parked in the garage.
    f. No additional impervious or semi-impervious surface.
15. Each perspective tenant and/or purchaser shall be advised of noise issued due to the Swap Shop.
16. The construction dumpster shall be only provided by Waste Pro USA who is under franchise Agreement with the Village.
17. Conditions of approval stated in Village Engineer's letter (Engenuity Group, Inc.) issued on January 11, 2021 shall be satisfied at time of Civil/Utility application review.
18. No parking shall be allowed, under any circumstances, along the drive isle. Residents and guest parking shall only occur within designated parking stalls, private driveways and private garages.
19. The 10' pipe easement shall be abandoned at time of platting.
20. At time of permitting, provide value of construction and number of construction jobs created to be included in CRA annual report.
21. A future signalized intersection at Davis Road and Lake Worth Road will facilitate access via the Davis Road project entrance – this entrance should be enhanced as the main ingress/egress for the project.
22. Any existing or proposed utility box/cabinet shall be screened from view, Staff recommends wrapping the cabinets/box with a match design accordingly with the existing/proposed location.

23. Any existing or proposed utility easement shall not overlap more than 5' the landscape buffer.
24. Proposed 6' Vinyl fence along Davis Road and Coconut Road ROW is not a preferrable material by the Village, Staff recommends providing more durable/resistant material to prevent unwanted pedestrian traffic.
25. The property owner shall post a notice of annual boundary school assignments for students from this development. The district will provide an 11' x 17' sign to be posted in a clear and visible location in all sales offices and models with the following:

"NOTICE TO HOMEBUYERS/TENANTS"

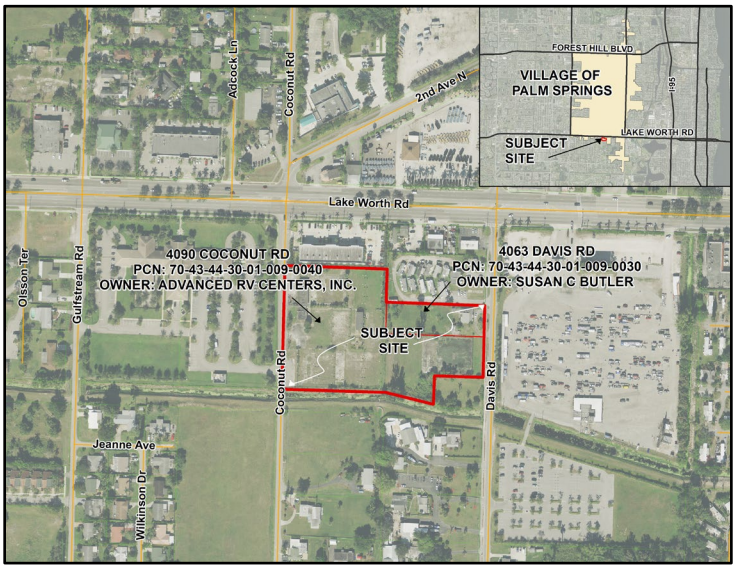
"school age children may not be assigned to the public school closest to their residences. School Board policies regarding overcrowding or other boundary policy decisions affect school boundaries. Please contact the Palm Beach School District Boundary Office at (561)434-8100 for the most current school assignment(s)".

26. Photometric plans shall be approved by the Planning, Zoning and Building Department at time of permitting.
27. Landscaped areas shall be irrigated including but not limited to buffer, islands, planter boxes, etc.
28. The mail pickup and delivery system shall be approved by the United States Postal Service.
29. Irrigation plans shall be provided at the time of permitting. Non-potable water shall be used for the irrigation system per Village code.
30. Provide permits from all applicable permitting agencies, including but not limited to, Lake Worth Drainage District, PBC and Village of Palm Springs at the time of permitting.
31. The property owner shall register an Agent of Record, prior to issuance of a permit, to establish a contact person responsible for compliance with this Development Order, including site plan/landscape plan details and conditions of approval.
32. A copy of the NPDES Notice of Intent for Generic Permit shall be submitted to the PZB Department at time of permitting.
33. A stabilized surface shall be provided at all time during construction for access by emergency vehicles.
34. All mechanical equipment's and above-ground infrastructure shall be screened from view.
35. The Applicant may be required to undertake additional security measures, based on the number of complaints or calls for service for incidents at the premises, as determined by the Police Chief. Such additional security measures, as approved by the Police Chief, may include increased on-site security at the operator's sole expense.
36. Verify utility and easement locations to ensure that there are no conflicts with landscaping, revise at time of permitting as needed.
37. All electric utilities shall be underground.
38. A pre-construction meeting shall be scheduled with the Village Planning, Zoning & Building Development Department prior to commencement of any construction activity. Permits are required from the Planning, Zoning & Building Department prior to commencing any construction or renovation. The project shall be constructed in accordance with the FBC edition in effect at the time of permitting.
39. A silt barrier shall be installed around the perimeter of the property (within the affected area for the site improvements and new building construction) prior to commencement of any site work or construction activity, and a track pad shall be installed at the construction entrance(s), both of which shall remain through substantial completion.
40. Any sidewalk broken or damaged during construction shall be replaced by the contractor prior to CO.
41. The Landscaping shall be certified by the Landscape Architect upon completion and prior to Certificate of Occupancy/Certificate of Completion of each improvement area.
42. Absolutely no occupancy, other than construction personnel, is permitted prior to TCO/CO.
43. Photometrics must be certified by an engineer prior to CO.
44. The civil engineer of record shall certify the site construction prior to Certificate of Occupancy.
45. The applicant may be required to provide a resident inspector for structural elements such as concrete pours in accordance with Section 109.1.3 FBC 2010 and F.S. 553.791. Determination shall be made at time of pre-construction conference with Planning Zoning and Building Director.
46. The General Contractor shall be on site during any and all construction activity in accordance with FS 489.1195.
47. The project shall receive approval from all Authorities Having Jurisdiction and submit copies of approvals to the Village of Palm Springs.

48. At the time of CO, the petitioner shall provide the Planning, Zoning and Building Department with electronic copies of as-builts.

49. The School District has requested the Applicant offer a voluntary commitment to make a contribution of $24,465.00 to the School District of Palm Beach County prior to issuance of a building permit, based on School Capacity Availability Determination letter issued on January 7, 2021.

JUSTIFICATION STATEMENT
FLU Map Amendment | Rezoning | Site Plan (Planned Development)
Fontana Townhomes
Initial Submittal: October 7, 2020
Resubmittal: November 23, 2020; December 21, 2020; January 15, 2021



REQUEST

On behalf of Meritage Homes of South Florida, the Applicant, WGI is requesting approval of the following:

1) **Future Land Use Map Amendment** from unincorporated Palm Beach County Urban Infill (UI) Future Land Use designation to the Village of Palm Springs High Density Residential Future Land Use.
2) **Rezoning** from unincorporated Palm Beach County UI zoning district to the Village of Palm Springs Residential Multifamily (RM) zoning district as a residential planned development.
3) **Site Plan (Planned Development)** to allow a 59 unit fee-simple townhouse residential planned development.
   - **Waivers** from the following development standards allowed as part of Planned Development Performance Standards:
     i. Drive aisle width adjacent to 90 degree parking.
     ii. Number of sidewalks along a street.
     iii. Minimum Lot Area
     iv. Side Setback

SITE CHARACTERISTICS

The 4.73 acre subject site, known as "Fontana Townhomes", is located approximately 0.1 miles south of the Davis Road and Lake Worth Road intersection on the west side of Davis Road. It is comprised of two parcels identified by Parcel Control Numbers (PCNs) 70-43-44-30-01-009-0030 and 70-43-44-30-01-009-0040. Both subject parcels retain an unincorporated Future Land Use (FLU) Designation of Urban Infill (UI) and are within the unincorporated UI Zoning district. While the parcels retain unincorporated FLU designations and zoning districts, they were recently annexed into the Village of Palm Springs and are thus under the jurisdiction of the Village of Palm Springs (herein referred to as "the Village"). The subject site is within the Palm Spring's Community Redevelopment Agency (CRA) district boundary and can be further categorized under the Village's Lake Worth Road CRA Subdistrict. The larger of the two parcels is a former recreational facility and is mostly vacant with numerous residual dilapidated facilities/structures remaining. The smaller of the two parcels is presently occupied by a single-family residential dwelling. A map has been provided below which identifies the subject sites location within the Village, as well as an adjacent parcels view which provides greater detail regarding the site characteristics and surrounding areas.

SURROUNDING PROPERTIES

The site is surrounded by a mix of uses, including a medical office, multifamily residential, single-family residential, and a flea-market/drive-in movie theater. The mix of surrounding uses adjacent to the subject site can generally be found to be consistent with the proposed development. A summary of the surrounding property information has been provided below.

	FLU Designation	Zoning District	Existing Use
North	CG (Village of Palm Springs)	CG (Village of Palm Springs)	Medical Office
	UI (Unincorporated)	UI (Unincorporated)	Mobile Home Park
South	MR-5 (Unincorporated)	RM (Unincorporated)	Vacant/Single-family Residential
East	CG (Village of Palm Springs)	CG (Village of Palm Springs)	Drive-in Movie Theater/Flea Market
West	MR-5 (Unincorporated)	PO (Unincorporated)	Government Center

DEVELOPMENT HISTORY

As previously mentioned, the subject site was recently annexed into the Village of Palm Springs. The annexation of the subject parcels was adopted in December 2017 and October 2019.

The largest of the two subject site parcels, is approximately four acres and was formerly a recreational facility. Palm Beach County (PBC) Petition Number 73-106, approved by Resolution No. 1973-429 by the PBC Board of County Commissioners (BCC) on August 7th, 1973 approved a Special Exception to allow a Tennis Recreation Facility. It is unclear how long the facility known as the *Lake Worth Racquet Club* was in operations and existed on the parcel, but aerial imagery and ownership information reflects that tennis facility site was no longer in operation by September 2000 as it was purchased by a Place of Worship entity, *Haitian Evangelical Crusade Association, Inc.* Subsequently, based on imagery, after the ownership change, many of the recreational facilities, such as tennis courts and a pool, were partially demolished but still remain on the site today in very poor condition.

According to PBC Planning & Zoning records, there were few inquiries to redevelop the tennis facility, but no formal requests were submitted.

The smaller of the two subject site parcels, is approximately 0.75 acres and presently accommodates a single family dwelling unit. No development history is associated with the single-family parcel other than the building information on file with the County, which indicates the home was built in 1946.

(This space is intentionally left blank.)

DISTRICT BOUNDARY CHANGES FUTURE LAND USE MAP AMENDMENT/REZONING

Pursuant to the review requirements provided in Section 34-602.-Land Development Board, the development proposal is consistent with said requirements as outlined below.

1. A statement of the petitioner's interest in the property to be rezoned, including a copy of the last recorded warranty deed. The following shall also be included, if applicable:

(a) If the interest is a joint and several ownership, a written consent to the rezoning petition by all parties of record.

(b) If the interest is a contract purchase, a copy of the purchase contract and written consent of the seller/owner.

(c) If an authorized agent is involved, a copy of the agency agreement or written consent of the principal/owner.

(d) If a lessee is involved, a copy of the lease agreement and written consent of the owner.

(e) If a corporation or other business entity is involved, the name of the officer or person responsible for the application and written proof that the representative has the delegated authority to represent the corporation or other business entity, or in lieu thereof, written proof that he is in fact an officer of the corporation.

Response: The Applicant has provided a copy of the Agency Agreement/written consent from the applicable property owners. A copy of the latest warranty deed applicable to each property owner has been provided for review.

2. A certified boundary survey by a surveyor registered in the state, at a scale prescribed by the village, containing the following:

(a) An accurate legal description of the property to be rezoned.

(b) A computation of the total acreage of the tract to the nearest one-tenth of an acre.

Response: A certified boundary survey by a surveyor registered in the state, at a scale prescribed by the Village has been provided as part of this land Use/district boundary change request. A legal description and computation of the total acreage of the tract to the nearest one-tenth of an acre have been provided within the survey.

3. The location of the subject parcel, plotted on an official base map, land development map or other acceptable map of the village.

Response: As identified on Page One of this Justification Statement, a location map of the subject site within the Village has been provided. Furthermore, a radius map and location maps have been included to further identify the location of the subject site.

4. A property owner's location drawing, showing all properties within 300 feet of the subject property and their relation to the subject parcel.

Response: As required by the Village to provide adjacent property owner information for Public Hearing applications/notices a location map showing all properties within 300 feet of the subject property and their relation to the subject site has been provided.

5. A statement of special reasons or the basis for the rezoning request, including the intended use of the property.

Response: As aforementioned, the subject parcels were recently annexed into the Village however they were never assigned a Village Land Use Designation or Zoning district. This request to allow a high density residential land use and RM zoning are necessary in order for the subject site to remain consistent with the surrounding area and to initiate any sort of development on the subject parcels.

6. A confirmation of the provisions of all necessary facilities and systems, and attested to by the applicant or authorized agent, for storm drainage, water supply, sewage treatment, solid waste disposal, public safety protection, recreational and park areas, school sites and any other services, where applicable.

Response: Due to the subject site being previously developed for an intense recreational facility, and also accommodating a residential dwelling unit, adequate provisions of all necessary facilities and systems will be achievable for the subject site.

As part of the required application, coordination has been initiated with the appropriate facilities and system providers in order to confirm adequate provisions can be provided to the subject site. Copies of all correspondence with providers has been included with this submittal, as well as any statements received.

7. Payment of a filing fee as established by the village.

Response: The filing fee associated with the Future Land Use Map Amendment and Rezoning portion of the request required by this section have been provided as part of this submittal.

CONSISTENCY WITH PALM SPRINGS CRA COMMUNITY REDEVELOPMENT PLAN

As aforementioned, the subject site is within the Palm Springs CRA, under the Lake Worth Road CRA subdistrict. Per the CRA Community Redevelopment Plan, new development applications must demonstrate consistency with the Plan. A description of the development's proposal consistency with the Community Redevelopment Plan can be found below.

1. Detailed Description of the Proposal's Consistency with Five (5) Key Goals of CRA

- **I. Improving Utilities and Infrastructure**

  Response: The development proposal will improve the Utilities and Infrastructure of the area, as improvements are necessary in order to construct the Townhouses.

- **II. Expanding Job Development and Economic Growth**

  Response: The development proposal will remain consistent with the CRA's key goal to expand job development and economic growth, as it will provide additional residents to supply the workforce and economy of the Village.

- **III. Enhancing Public Safety**

  Response: The development proposal will enhance public safety, as the subject site is currently abandoned and an ideal area for crime to occur due to its location adjacent to the LWDD canal and separation from Lake Worth Road. The development of buffers, fencing, and additional landscape screening around the perimeter of the subject site will significantly decrease the chance of any crime occurring on this property in the future.

- **IV. Increasing and Maintaining Workforce Housing**

  Response: While Workforce Housing is not a component of this development proposal, the overall nature of the development program will create an equal opportunity for all Village residents to increase home-ownership. Townhouses offer an affordable entry level homeownership opportunity. More ideal than renting and more achievable than purchasing a single-family residential house, the development proposal will provide much needed home options for residents of the Village.

- **V. Advancing the Partnership with Palm Beach County**

  Response: The development proposal will advance the partnership with Palm Beach County due to its location within the Hernden Park Countywide Community Revitalization Area (CCRT) neighborhood core area. The Countywide Community Revitalization Area's within Palm Beach County are overseen by the County's Office of Community Revitalization (OCR). This request will require the continued coordination with the County and surrounding Hernden Park residents to ensure the communities needs are met.

2. Proposal's effect on existing conditions (identified in CRA Community Redevelopment Plan) in the CRA District.

Response: As evidenced by the Lake Worth Road subdistrict study, the Lake Worth Road subdistrict is currently subject to slum/and or blighted conditions. Some of the existing conditions include faulty lot layout in relation to usefulness, inadequate building density patterns, and incidence of crime in the area higher than in the remainder of the county or municipality. This proposal will improve all of the aforementioned negative existing conditions on the subject site and in turn have an effect on the immediately surrounding area.

3. Proposal's ability to assist in achieving strategies and objectives of the Palm Springs CRA.

Response: The development proposal will assist in achieving strategies and objectives of the CRA as it addresses an existing blighted area within the Village. As evidenced by the subdistrict study, the Lake Worth Road subdistrict is subject to slum/and or blighted conditions. The subject site has sat abandoned for many years and allows for an incidence of crime in the area due to its ideal location next to the LWDD canal and separation from Lake Worth Road. Proposing a residential development such as the Fontana Townhomes development will assist in achieving the CRA's strategies to address blighted areas, by improving the area and discouraging criminal traffic.

DEVELOPMENT PROGRAM

The following outlines the development program for the proposed 59 unit multi-family residential townhouse development:

Density
The maximum density for the RM zoning district is 19 DU/AC. The proposed development remains consistent with the district's density regulations as a density of 12.5 DU/AC is proposed.

Building Height
Pursuant to Section 34-1064, the maximum height for a building within the residential planned development district shall be the same as allowed in the applicable land development district, or 35 feet, whichever is higher. The proposed RM zoning district and residential planned development height regulation remain consistent with one another, as three stories or 35 feet. The subject site is in compliance with this requirement as the proposed buildings are no more than 35 feet in height.

Minimum Acreage Requirement
The Village's code requirements state that all Residential Planned Developments shall be no less than three acres. The subject site is compliant with this requirement as it is 4.73 acres in size.

Open Space and Common Amenity Area
Pursuant to Section 34-1064(d) of the Village Code, a residential planned development is required to provide a minimum amount of open space and common amenity area. The minimum total open space requirement for residential planned developments shall be 35 percent of the gross land area, of which 20 percent shall be common amenity area. Based on the standard for required open space, the 4.73 acre subject site is required to provide 1.65 acres of open space. The subject site currently exceeds the code requirement for open space as 2.09 acres or 44 percent of the gross land are proposed to remain as open space. Of the 1.65 acre open space requirement, at least 20 percent of this area must be provided as a common amenity area to all lots such as parks, playgrounds, or other recreational purposes. Based on the open space land area requirement of 1.65 acres the subject site is required to provide 0.31 acres of common amenity area for the proposed community. This requirement is adequately satisfied, as 0.31 acres of common amenity area is proposed central to the community.

Lot Coverage
Pursuant to Sec. 34-1064(e)(2), all structures within a Residential Planned Developments shall have a maximum lot coverage of 40%, based on the net area of individual lots. The development proposal is compliant with this requirement as none of the proposed lots exceed 40% lot coverage.

Access
The subject site retains double frontage along Coconut Road and Davis Road. Two ingress/egress access points are proposed, one access point from Davis Road and another access point from Coconut Road. The two access points allow for increased circulation and flow of vehicular and pedestrian traffic throughout the subject site.

Buffering
Pursuant to Village Code *Article III*, *Section 34-162.-Required Landscaping,* in certain situations the Village requires landscaping around the perimeter of development parcels in order to create a buffer from adjoining land uses, streets and properties. The subject site is in compliance with this section of the Village's code as there is a 10 foot landscape buffer provided around the entirety of the subject site. This proposed perimeter buffer in conjunction with the adjacent properties' buffers will provide screening and will reduce the risk of any potential adverse impacts from the adjacent mobile home park and medical office developments to the north.

Waivers
As provided in Subdivision IX.-Planned Developments, the proposed residential planned development is subject to greater flexibility in design and development standards relative to specific dimensional regulations, in order to encourage ingenuity and originality in subdivision and site design while preserving open space to serve recreational, scenic and other public services. Therefore, this Subdivision of the Village's code allows for waivers from certain criteria. The waivers requested for the subject site, relate to the required sidewalk requirements, street width, and side setback requirements. The waiver details of these aforementioned requirements can be found within the subject site's *Conformance with Planned Development Code* section of this Justification Statement.

CONFORMANCE WITH PLANNED DEVELOPMENT CODE

As required by the Village's Development Application, demonstration must be provided that the proposed residential planned development is in conformance with the Planned Development Code Objectives and Performance Standards provided in Subdivision IX of the Village's Code. An outline of how the project conforms with standards has been provided below.

SEC. 41-1062 OBJECTIVES

1. ***To permit the creation of functional and unique residential, commercial and mixed-use developments that do not adversely impact the village's character and "small town feel".***

   Response: The proposed residential planned development is in conformance with this objective as the requested residential density of 12.5 dwelling units per acre (DU/AC) is not out of character for the surrounding area. The site is located in close proximity to many commercial services which will provide immediate service to future residents and create a functional balance between non-residential and residential uses. Furthermore, it is compatible with the surrounding residential land use designations to the north, east, south, and west. Therefore, by allowing for the approval of the proposed 59 dwelling unit townhouse development, the Village's "Small Town Feel" will not be adversely impacted.

2. ***To promote building siting that takes into consideration the context of the development, the location of nearby uses, and the new development's compatibility with existing neighborhoods.***

   Response: The site planning of the subject site took great consideration into the context of the development with the surrounding areas. The subject site's required dry detention areas and recreation area provide a great deal of open space and substantially less intensity, so they have been located adjacent to the southernmost property line which abuts residential on the opposite side of the LWDD L-12 Canal. This siting coupled with the canal along the southern property line provides for the utmost separation possible between the proposed townhouse development and neighboring single family residential.

3. ***To enhance landscaped open space and streetscapes.***

Response: The development proposal is consistent with the aforementioned objective as areas of the subject site will exceed landscaping requirements for open space and streetscapes.

4. ***To bring unique and creative solutions to new development, the following elements should be considered in the context of the specific site, project and/or use:***

   a) Arrangement and spacing of buildings and open spaces;
   b) Ability to aggregate adjacent lots or parcels, and/or eliminate nonconformities;
   c) Location of access drive and sidewalks to promote circulation and access;
   d) Building coverage;
   e) Sufficient and convenient parking for uses and activities;
   f) Landscape buffers and screening mechanisms to enhance aesthetics and promote compatibility
   g) Adequate lighting for security and pedestrian/vehicular safety; and
   h) Development of large employment centers predominately of light industrial or high technology uses in underutilized corridors. The flexibility of design should promote revitalization of the primary commercial areas and an economic stimulus through job creation to the local economy as well.

Response: The development proposal brings unique and creative solutions to new development, by remaining consistent with the aforementioned subobjectives. As previously mentioned, great consideration was given during the site planning of the subject site. The arrangement and spacing of buildings relative to open spaces was considered heavily to remain consistent with requirements such as the common amenity area requirements and to provide a better quality of living for future residents. Furthermore, the development proposal provides for a unique solution to develop a currently underutilized parcel by aggregating an adjacent single-family parcel rather than creating an enclave. As previously stated, the access drives have been located in a way to promote circulation and access of the unique double-frontage site. Each subobjective was weighed heavily as they relate to the specific subject site.

SEC. 34-1063 PERFORMANCE STANDARDS

The development proposal conforms with the performance standards for a Planned Development as outlined below.

Standards:

1. ***Sidewalks on both sides of a street or primary driveway, interconnected with other pedestrian-ways and/or providing access to each building.***

Response: The development proposal is proposing sidewalks along one side of the street to provide for a greater sense of open space and to utilize the subject site's potential to the greatest extent possible. The Planned Development code requires that sidewalks be required on both sides of the streets. While sidewalks are not provided on both sides of the streets, adequate pedestrian circulation and access throughout the subject site is still achieved through the use of a five foot wide sidewalk and crosswalks throughout. The proposal of one sidewalk rather than two is subject to a waiver.

2. ***Consolidation of smaller parcels into a larger, unified development project.***

Response: As aforementioned, consolidation of smaller parcels into a large, unified development project was incorporated into the planned development proposal. If the request were solely to develop the former tennis facility parcel, this would

result in an enclave of single-family residential. Therefore, the adjacent single-family lot is proposed to be consolidated with the larger parcel in order to provide a unified development and avoid any adverse impacts to the community.

3. ***Consolidation of driveways to eliminate curb cuts, with reciprocal easements for access; provision of access from secondary streets and alleys.***

   Response: The consolidation of driveways has been provided as evidenced within the provided site plan. Access from secondary streets and alleys is not appropriate for the subject site as Townhouse units are proposed, and the size of the subject site does not allow for the use of alleys and secondary streets.

4. ***Shared parking arrangements to reduce impervious surfaces and promote efficient* use *of facilities.***

   Response: As required by the Village's Parking Code, the subject site provides guest parking accommodations throughout the subject site. These guest parking locations were intentionally planned to be central to the entire development to promote efficient use by lots. Furthermore, this consideration allows for reduced impervious area as guest parking is not over abundant and throughout all areas of the subject site.

5. ***Provision of sufficient parking to avoid on-street parking, unless designed with on-street spaces.***

   Response: The subject site retains sufficient parking for the residential units per the Village's Code requirement of 2.5 spaces per unit. Parking spaces are provided for guest parking spaces as required by Village Code; the total parking provided is distributed throughout the development.

6. ***Pedestrian-scale street lighting along sidewalks and pedestrian ways.***

   Response: Street lighting will be provided along sidewalks and pedestrian-ways to create an appropriate pedestrian scale environment.

7. ***Aggregation of open space to create common areas of sufficient size for passive/leisure activities.***

   Response: The required 0.31 community amenity area is proposed to remain as one whole area located central to the development. By aggregating the amenity area into one tract rather than multiple smaller tracts throughout the subject site, the land will sufficiently be used for active and passive/leisure activities.

8. ***Continuity of sidewalks and pathways where disconnects occur; and provision of sidewalks to usable open spaces, recreation amenities or public facilities.***

   Response: As previously mentioned, crosswalks will be provided throughout the subject site to provide continuity of sidewalks and pathways where disconnects occur. The subject site has an extensive pedestrian circulation pattern which allows uninterrupted circulation from usable open spaces, recreation amenities, public facilities, and individual lots.

9. ***Residential setbacks that allow for a green, semi-private planting area between the sidewalk and house(s).***

   Response: The provided setbacks are proposed to allow for a green, semi-private planting area between the sidewalk and houses. Appropriate foundation planting has been planned to be incorporated into the individual lots.

10. ***Promote streetscape where feasible, with maintenance agreements assigning responsibility to adjacent properties.***

    Response: Streetscape is promoted throughout the subject site where feasible. This will be achieved through the use of pedestrian scale lighting, as previously mentioned, and by proposing appropriate landscaping to provide adequate streetscape.

11. ***Create bus waiting areas for safety, for school buses or mass transit, as may be applicable.***

    Response: As coordinated with Palm Beach County School Board, a 10'x15' school bus shelter has been provided along Davis Road.

12. ***Building stepbacks or setbacks to respect existing scale and massing of adjacent neighborhoods and promote compatibility.***

    Response: As aforementioned, the site was planned to provide the greatest amount of separation as possible from the least intense adjacent uses to the south. Much of the structures are massed closer to the northern boundary as the adjacent uses and structures are more compatible with the proposed townhouse structures.

13. ***Provision of original, self-confident building design, and prohibition of metal buildings.***

    Response: Metal buildings are not proposed as part of this development proposal. Original, self-confident building design is provided as the townhouse buildings are proposed to be contemporary modern.

14. ***Buffers between differing uses to include a masonry wall and landscaping to promote compatibility.***

    Response: As depicted in the site photos provided with this submittal, a masonry wall currently exists along the adjacent commercial property line to the north of the subject site. This wall is proposed to remain as is to provide further screening from the medical office use and to promote compatibility. As previously mentioned, a perimeter landscape buffer is proposed in conjunction with the neighboring medical office's landscape buffer to provide the utmost screening as possible.

15. ***Adequate vehicular circulation, traffic maintenance and/or operational measures that does not negatively impact existing roadway conditions, including avoidance of dead-end streets and t-style turnarounds.***

    Response: As aforementioned, the subject site is proposed to provide adequate vehicular circulation that does not negatively impact existing roadway conditions, including avoidance of dead-end streets and t-style turn arounds. Rather than providing access along one road, access along both frontages of the double frontage subject site is provided to negate the increased need for dead-end streets and t-style turn arounds that is commonly found in development patterns today.

WAIVERS

Pursuant to the Planned Development Performance standards of the Village's Code, the Applicant may utilize waivers to promote the use of innovative and creative techniques and concepts. As previously mentioned, waivers are requested for the development proposal to allow relief from certain requirements. The waivers requested have been outlined within the table below and meet the waiver criteria as identified within this *Waivers* section.

Waiver	Subject	Code Section	Required	Proposed	Deviation
1.	Street width adjacent to 90 degree parking	Sec. 34-1328	26’ wide drive aisle when adjacent to parking	20’ wide drive aisle when adjacent to parking	-6’
2.	Sidewalk	Sec. 34-1063(a)(1)	Sidewalk along both sides of Street	Sidewalk along one side of street	Single-sided sidewalk
3.	Side Setback	Sec. 34-1064(e)(1)(b)	20’	15’	-5’
4.	Min. Lot Area	Sec. 34-766(1)	547,000 SF / 12.55 AC.	205,881 SF / 4.73 AC.	-341,119 SF / -7.83 AC.

1. ***The request is in harmony with and is consistent with the purpose and intent of the Village's Comprehensive Plan and* Land *Development Code and that such waiver will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare.***

Waiver 1 Response: The request to allow a 20’ wide drive aisle when adjacent to 90 degree parking is in harmony and is consistent with the purpose and intent of the Village’s Comprehensive Plan and Land Development Code. The majority of the subject site is compliant with the required drive aisle dimensions, however there are seven 90 degree parking spaces in a portion of the site which require a 26’ wide drive aisle. This waiver will not be injurious to the area involved, as traffic can still safely maneuver into and out of the parking spaces.

Waiver 2 Response: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian connectivity will be provided.

Waiver 3 Response: The request to allow a reduced side setback is consistent with the purpose and intent of the Village’s Comprehensive Plan and Land Development Code, and will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. The subject area of this request is specific to lot 52, which is along the northern portion of the site. It is screened by the adjacent northern property by a 10’ landscape buffer and existing 6’ concrete wall. The request also applies to lots 14 and 15, along the southern portion of the site, adjacent to the LWDD L-12 Canal. These lots are screened by a 10’ landscape buffer with a 5’ vinyl fence.

Waiver 4 Response: The request to allow a reduced lot size from the required minimum lot requirements is outside of the Applicant’s control and will not affect the public health safety, and welfare.

2. The request results from innovative design in which other minimum standards are exceeded.

Waiver 1 Response: The request to allow a reduced drive aisle width when adjacent to 90 degree parking results from innovative design in which other minimum standards are exceeded. The subject site is compliant with the required drive aisle width in all other areas.

Waiver 2 Response: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian continuity will be provided.

Waiver 3 Response: The request to allow a reduced side setback distance results from innovative design in which other minimum standards are exceeded. The areas of focus for the reduced side setback, currently propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

Waiver 4 Response: The request to allow a reduced lot size is not the result of innovative design. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

3. The request demonstrates that granting of the waiver will result in preservation of valuable natural resources, including drainage and recharge areas, natural areas, etc.

Waiver 1 Response: The granting of the waiver request related to reduced drive aisle width will result in the preservation of valuable natural resources. A narrower street width equates to less impervious area, as a result this will help preserve valuable natural resources.

Waiver 2 Response: The granting of the waiver request will result in the preservation of valuable natural resources, including drainage and recharge areas, and natural areas. As aforementioned, by negating the requirement for an extra sidewalk, this will allow for increased pervious areas throughout the subject site.

Waiver 3 Response: The reduced side setback will result in the preservation of valuable natural resources. This will be achieved, as the reduced setback will allow for greater design freedom and allow for more opportunity to preserve natural resources.

Waiver 4 Response: The request to allow a reduced lot size will not result in preservation of valuable natural resources. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

4. The request demonstrates public benefits to be derived, including but not limited to such benefits as dedication of rights-of-way, extensions of pedestrian linkages outside of the project boundaries, preservation of open areas and* use *of desirable architectural, building, and site design techniques.

Waiver 1 Response: The request will demonstrate public benefits such as desirable site design techniques. By allowing for a narrower drive aisle adjacent to parking spaces, there is room for more pervious area and potential open spaces. This will create a more desirable community for future residents.

Waiver 2 Response: The request will demonstrate public benefits such as extension of pedestrian linkages outside of the project boundaries. The subject site is located in an ideal area with close proximity (less than 300 feet) to the Lake Worth Road Corridor. The proposed sidewalk network will connect to the existing Davis Road sidewalk and allow walkability to the surrounding areas and services.

Waiver 3 Response: The waiver request will demonstrate public benefits such as desirable site design techniques and right-of-way dedication to the LWDD L-12 Canal. By allowing for a reduced side setback, the subject site will have more design freedoms to provide increased open space and additional drainage.

Waiver 4 Response: The request to allow a reduced lot size does not demonstrate public benefits to be derived. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

5. The request provides sufficient screening and buffering to screen adjacent* uses *from adverse impacts caused by the granting of a waiver.

Waiver 1 Response: The request will not jeopardize the screening of the subject site as it relates to a decreased drive aisle width in a specific portion of the site.

Waiver 2 Response: This waiver request is specific to the pedestrian sidewalks within the subject site and would not adversely impact adjacent properties. However, appropriate landscape buffering and screening is provided.

Waiver 3 Response: The waiver request will provide sufficient screening and buffering to screen adjacent uses from any adverse impacts created by the reduced side setback. This reduced setback is specific to two areas of the subject site, which propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

Waiver 4 Response: The waiver does not generate any adverse impacts related to adjacent properties, however, the Applicant will sufficiently screen and buffer the property.

6. Economic issues may not be* used *to justify waivers.

Waiver Response: Economic issues are not used as a justification for these requests.

7. The request is compatible with existing and potential* land uses *adjacent to the development site.

Response: The request is consistent with the existing and potential land uses adjacent to the development site. A majority of the surrounding uses are residential communities which either provide one sidewalk or no sidewalks. There is a sidewalk along Davis Road which the subject site's sidewalk system will connect to. Overall, a waiver request for a decreased street width, single sidewalk, reduced side setback, and minimum lot area will not generate compatibility issues.

8. Waiver requests from minimum common amenity area requirements shall further demonstrate that adequate recreation area is available in the immediate vicinity of the proposed development.

Response: This criterion is not applicable as a waiver is not requested from the common amenity area requirements. The development proposal provides adequate community amenity area.

9. ***Waiver requests from maximum height limitations shall further demonstrate that the additional height will not adversely impact adjacent properties and appropriate setbacks are provided as building height increases.***

Response: This criterion is not applicable as a waiver is not requested from the height limitation requirements. The development proposal is currently under the maximum height threshold of three stories or 35 feet.

CONCLUSION

Based on the above justification and attached information, the petitioner respectfully requests approval of the Future Land Use Map Amendment, Rezoning, and Site Plan to allow a Residential Planned Development application for the subject site.

LANDSCAPE NOTES:

1. STRUCTURAL ELEMENTS AND HARDSCAPE FEATURES INDICATED ON LANDSCAPE PLANS ARE FOR INFORMATIONAL PURPOSES ONLY. LANDSCAPE PLANS ARE TO BE UTILIZED FOR LOCATION OF LIVING PLANT MATERIAL ONLY. LANDSCAPE PLANS SHOULD NOT BE UTILIZED FOR STAKING AND LAYOUT OR LOCATION OF ANY STRUCTURAL SITE FEATURES INCLUDING BUT NOT LIMITED TO: BUILDINGS, SIGNAGE, PATHWAYS, EASEMENTS, BERMS, WALL, FENCES, UTILITIES OR ROADWAYS.
2. CONTRACTOR SHALL ACQUIRE ALL APPLICABLE FEDERAL, STATE, LOCAL, JURISDICTIONAL OR UTILITY COMPANY PERMITS REQUIRED PRIOR TO REMOVAL, RELOCATION, AND/OR INSTALLATION OF LANDSCAPE MATERIALS INDICATED WITHIN PLAN DOCUMENTS. THE CONTRACTOR SHALL HAVE PERMITS "IN HAND" PRIOR TO STARTING WORK. LANDSCAPE ARCHITECT SHALL BEAR NO RESPONSIBILITY FOR WORK PERFORMED WITHOUT PERMITTED DRAWINGS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CHANGES TO THE WORK, AT NO ADDITIONAL COST TO THE OWNER, AS A RESULT OF UNAUTHORIZED WORK PRIOR TO RECEIPT OF PERMIT.
3. TREES SHOWN ON THIS PLAN ARE FOR GRAPHIC REPRESENTATION ONLY. TREE SPACING IS BASED ON DESIGN REQUIREMENTS AND THE TREES SHOWN ON THESE PLANS ATTEMPT TO ACCOMPLISH THAT SPACING WHILE MAINTAINING THE REQUIRED SETBACKS FROM UTILITIES. IN THE EVENT OF A CONFLICT, AFFECTED PLANT MATERIAL SHALL BE FIELD ADJUSTED WITH THE APPROVAL OF THE LANDSCAPE ARCHITECT TO AVOID CONFLICTS WITH THE WITH EXISTING AND PROPOSED UTILITIES, LIGHT POLES, DRAINAGE STRUCTURES OR LINES, LAKE MAINTENANCE EASEMENTS OR OTHER AFFECTED SITE FEATURES.
4. ANY PLANTING WITHIN THE SIGHT TRIANGLES SHALL PROVIDE UNOBSTRUCTED VIEWS AT A LEVEL BETWEEN 30" AND 8' ABOVE THE PAVEMENT.
5. ALL UTILITY BOXES/ STRUCTURES TO BE SCREENED ON 3 SIDES W/ APPROVED PLANTING MATERIAL.
6. IRRIGATION IS REQUIRED PROVIDING 100% COVERAGE WITH A MAXIMUM OF 50% OVERLAP, AN AUTOMATIC RAIN SENSOR MUST BE INCLUDED.
7. ALL PLANT MATERIAL TO BE INSTALLED SHALL CONFORM TO FLORIDA POWER AND LIGHT'S (FPL'S) RIGHT TREE RIGHT PLACE GUIDELINES.
8. IN CASE OF DISCREPANCIES PLANS TAKE PRECEDENCE OVER PLANT LIST.
9. LANDSCAPE CONTRACTOR RESPONSIBLE FOR VERIFICATION OF ALL QUANTITIES PRIOR TO BIDDING.
10. REMOVAL OF EXISTING VEGETATION IS RESPONSIBILITY OF LANDSCAPE CONTRACTOR.
11. RELOCATION OF EXISTING VEGETATION IS RESPONSIBILITY OF LANDSCAPE CONTRACTOR. REFER TO SPECIFICATIONS FOR RELOCATION INSTRUCTIONS.
12. ALL PLANT MATERIAL TO BE FLORIDA GRADE #1 AT TIME OF INSTALLATION UNLESS OTHERWISE NOTED.

Landscape Planting - Part I. General

I. Description of Work
A. Provide all exterior planting as shown on the drawings or inferable therefrom and/or as specified in accordance with the requirements of the Contract Documents. Landscape plans provided indicate the proposed location of living plant material only. Structural elements and hardscape features indicated on the landscape plans are for information purposes only. Landscape plans are not to be utilized for staking and layout or location of any structural site features including but not limited to, buildings, signage, pathways, easements, utilities or roadways.
B. These specifications include standards necessary for and incidental to the execution and completion of planting as indicated on the prepared drawings and specified herein.
C. All applicable federal, state and local permits shall be attained prior to the removal, relocation, or installation of plant materials indicated within the plan documents.
D. Protection of existing features. During construction, protect all existing trees, shrubs, and other specified vegetation, site features and improvements, structures, and utilities specified herein and/or on submitted drawings. Removal or destruction of existing plantings is prohibited unless specifically authorized by the owner, and with permit as required by associated federal, state and local government agencies.

II. Applicable Standards
A. American National Standards for Tree Care Operations, ANSI A300. American National Standards Institute, 11 West 42nd Street, New York, N.Y. 10036.
B. American Standard for Nursery Stock, ANSI Z60.1. American Nursery and Landscape Association, 1250 Eye Street. NW, Suite 500, Washington, D.C. 20005.
C. Hortus Third, The Staff of the L.H. Bailey Hortorium. 1976. MacMillan Publishing Co., New York.
D. Florida Department of Agriculture "Grades and Standards for Nursery Plants", most recent addition.
E. National Arborist Association- Pruning Standards for Shade Trees
F. All standards shall include the latest additions and amendments as of the date of advertisement for bids

III. Qualifications
A. Landscape planting and related work shall be performed by a firm with a minimum of five years experience specializing in this type of work. All contractors and their sub-contractors who will be performing any landscape work included in this section of the specification shall be approved by the landscape architect.
B. Landscape Contractor shall be licensed and shall carry any necessary insurance and shall protect the Landscape Architect and Owner against all liabilities, claims or demands for injuries or damage to any person or property growing out of the performance of the work under this contract. All workers shall be covered by Workman's Compensation Insurance.

IV. Requirements of Regulatory Agencies
A. Certificates of inspection shall accompany the invoice for each shipment of plants as may be required by law for transportation. File certificates with the landscape architect prior to acceptance of the material. Inspection by federal or state authorities at place of growth does not preclude rejection of the plants at the site.

V. Submittals
A. Manufacturer's Data: Submit copies of the manufacturer's and/or source data for all materials specified, including soils, soil amendments and fertilizer materials. Comply with regulations applicable to landscape materials.
B. Samples: Submit samples of all topsoil, soil mixes, mulches, and organic materials. Samples shall weigh 1 kg (2 lb) and be packaged in plastic bags. Samples shall be typical of the lot of material to be delivered to the site and provide an accurate indication of color, texture, and organic makeup of the material.
C. Nursery Sources: Submit a list of all nurseries that will supply plants, along with a list of the plants they will provide and the location of the nursery.
D. Soil Test: Submit soil test analysis report for each sample of topsoil and planting mix from a soil testing laboratory approved by the landscape architect.
1. Provide a particle size analysis, including the following gradient of mineral content:

USDA Designation	Size in mm
Gravel	+2 mm
Very Course Sand	1-2 mm
Coarse Sand	0.5-1 mm
Medium Sand	0.25-0.5 mm
Fine Sand	0.1-0.25 mm
Very fine sand	0.05-0.1 mm
Silt	0.002-0.05 mm
Clay	smaller than 0.002

2. Provide a chemical analysis, including the following:
a. pH and buffer pH
b. Percentage of organic content by oven-dried weight.
c. Nutrient levels by parts per million, including phosphorus, potassium magnesium, manganese, iron, zinc, and calcium. Nutrient test shall include the testing laboratory recommendations for supplemental additions to the soil based on the requirements of horticultural plants.
d. Soluble salt by electrical conductivity of a 1:2, soil: water, sample measured in millimho per cm.
e. Cation exchange capacity (CEC).
E. Material Testing: Submit the manufacturers particle size analysis, and the pH analysis and provide a description and source location for the content material of all organic materials.
F. Maintenance Instructions: Prior to the end of maintenance period, Landscape Contractor shall furnish three copies of written maintenance instructions to the Landscape Architect for transmittal to the Owner for maintenance and care of installed plants through their full growing season.

VI. Utility Verification
A. The contractor shall contact the local utility companies for verification of the location of all underground utility lines in the area of the work. The contractor shall be responsible for all damage resulting from neglect or failure to comply with this requirement.

Part 2. Materials

I. Plants
A. Plants shall be true to species and variety specified and nursery-grown in accordance with good horticultural practices under climatic conditions similar to those in the locality of the project for at least two years. They shall have been freshly dug.
1. All plant names and descriptions shall be as defined in Hortus Third.
2. All plants shall be grown and harvested in accordance with the American Standard for Nursery Stock and Florida Department of Agriculture Grades and Standards for Nursery Plants.
3. Unless approved by the landscape architect, plants shall have been grown at a latitude not more than 325 km (200 miles) north or south of the latitude of the project unless the provenance of the plant can be documented to be compatible with the latitude and cold hardiness zone of the planting location.
B. Unless specifically noted, all plants shall be exceptionally heavy, symmetrical, and so trained or favored in development and appearance as to be unquestionably and outstandingly superior in form, compactness, and symmetry. They shall be sound, healthy, vigorous, well branched, and densely foliated when in leaf; free of disease and insects, eggs, or larvae; and shall have healthy, well-developed root systems. They shall be free from physical damage or other conditions that would prevent vigorous growth.
1. Trees with multiple leaders, unless specified, will be rejected. Trees with a damaged or crooked leader, bark abrasions, sunscald, disfiguring knots, insect damage, or cuts of limbs over 20 mm (3/4 in.) in diameter that are not completely closed will be rejected.
C. Plants shall conform to the measurements specified, except that plants larger than those specified may be used if approved by the landscape architect. Use of larger plants shall not increase the contract price. If larger plants are approved, the root ball shall be increased in proportion to the size of the plant.
1. Caliper measurements shall be taken on the trunk 150 mm (6 in.) above the natural ground line for trees up to and including 100 mm (4 in.) in caliper, and 300 mm (12 in.) above the natural ground line for trees over 100 mm (4 in.) in caliper. Height and spread dimensions specified refer to the main body of the plant and not from branch tip to branch tip. Plants shall be measured when branches are in their normal position. If a range of sizes is given, no plant shall be less than the minimum size, and no less than 50 percent of the plants shall be as large as the maximum size specified. Measurements specified are minimum sizes acceptable after pruning, where pruning is required. Plants that meet measurements but do not possess a standard relationship between height and spread, according to the Florida Department of Agriculture Grades and Standards for Nursery Plants, shall be rejected.
D. Substitutions of plant materials will not be permitted unless authorized in writing by the landscape architect. If proof is submitted in writing that a plant specified is not obtainable, consideration will be given to the nearest available size or similar variety, with a corresponding adjustment of the contract price.
E. The plant schedule provided at the end of this section, or on the drawing, is for the contractor's information only, and no guarantee is expressed or implied that quantities therein are correct or that the list is complete. The contractor shall ensure that all plant materials shown on the drawings are included in his or her bid.
F. All plants shall be labeled by plant name. Labels shall be attached securely to all plants, bundles, and containers of plant materials when delivered. Plant labels shall be durable and legible, with information given in weather-resistant ink or embossed process lettering.
G. Selection and Tagging
1. Plants shall be subject to inspection for conformity to specification requirements and approval by the landscape architect at their place of growth and upon delivery. Such approval shall not impair the right of inspection and rejection during progress of the work.
2. A written request for the inspection of plant material at their place of growth shall be submitted to the landscape architect at least ten calendar days prior to digging. This request shall state the place of growth and the quantity of plants to be inspected. The landscape architect may refuse inspection at this time if, in his or her judgment, sufficient quantities of plants are not available for inspection or landscape architect deems inspection is not required.
3. All field grown deciduous trees shall be marked to indicate the trees north orientation in the nursery. Place a 1-in. diameter spot of white paint onto the north side of the tree trunk within the bottom 12 inches of the trunk.
H. Anti-Desiccants
1. Anti-desiccants, if specified, are to be applied to plants in full leaf immediately before digging or as required by the landscape architect. Anti-desiccants are to be sprayed so that all leaves and branches are covered with a continuous protective film.
I. Balled and Burlapped (B&B) Plant Materials
1. Trees designated B&B shall be properly dug with firm, natural balls of soil retaining as many fibrous roots as possible, in sizes and shapes as specified in the Florida Department of Agriculture Grades and Standards for Nursery Plants. Balls shall be firmly wrapped with synthetic, natural, or treated burlap, and/or wire. All synthetic fabric should be removed from the rootball prior to planting. True biodegradable burlap can be left around the root ball. The root collar shall be apparent at surface of ball. Trees with loose, broken, processed, or manufactured root balls will not be accepted, except with special written approval before planting.
J. Container Plants
1. Plants grown in containers shall be of appropriate size for the container as specified in the most recent edition of the Florida Department of Agriculture Grades and Standards for Nursery Plants and be free of circling roots on the exterior and interior of the root ball.
2. Container plants shall have been grown in the container long enough to have established roots throughout the growing medium.
K. Bareroot and Collected Plants
1. Plants designated as bareroot or collected plants shall conform to the American Standard for Nursery Stock.
2. Bareroot material shall not be dug or installed after bud break or before dormancy.
3. Collected plant material that has not been taken from active nursery operations shall be dug with a root ball spread at least 1/3 greater than nursery grown plants. When specified or approved, shall be in good health, free from disease, insect or weed infestation and shall not be planted before inspection and acceptance at the site. Testing may be required at the discretion of the Landscape Architect and/or the Owner and shall be provided at no additional cost.
L. Specimen Material: Plant material specified as specimens are to be approved by the Landscape Architect before being brought to the site. Unless otherwise noted on the drawings, these plants shall be Florida Fancy.
M. Palms
1. Coconut Palms shall be grown from a certified seed.
2. All palm species except Sabal palmetto shall have roots adequately wrapped before transporting.
3. Sabal palms shall have a hurricane cut. Sabal palms shall be installed on site at the earliest opportunity in the construction process. All Sabal palms shall be from Palm Beach County or other sandy soils. All Sabal palms shall be Florida Fancy.
4. For booted trunk palms, trunks shall have clean intact boots firmly attached to the palm trunk. For slick trunk palms, trunk shall be clear and free from defect and scars.
5. The Contractor shall treat all palms as required to prevent infestation by the palmetto weevil.
N. Sod
1. Sod shall be graded #1 or better. Sod shall be loam or muck grown with a firm, full texture and good root development. Sod shall be thick, healthy and free from defects and debris including but not limited to dead thatch, insects, fungus, diseases and contamination by weeds, other grass varieties or objectionable plant material.
2. Sod shall be sufficiently thick to insure a dense stand of live grass. Sod shall be live, fresh, and uninjured at the time of planting. Plant sod within 48 hours after harvesting.
3. Sod area shall be all areas not otherwise identified and shall include the area beyond the property line to the edge of pavement and/or edge of water.
O. Immediately after harvesting plants, protect from drying and damage until shipped and delivered to the planting site. Rootballs shall be checked regularly and watered sufficiently to maintain root viability.
P. Transportation and Storage of Plant Material
1. Branches shall be tied with rope or twine only, and in such a manner that no damage will occur to the bark or branches.
2. During transportation of plant material, the contractor shall exercise care to prevent injury and drying out of the trees. Should the roots be dried out, large branches broken, balls of earth broken or loosened, or areas of bark torn, the landscape architect may reject the injured tree(s) and order them replaced at no additional cost to the owner. All loads of plants shall be covered at all times with tarpaulin or canvas. Loads that are not protected will be rejected.
3. All bareroot stock sent from the storage facility shall be adequately covered with wet soil, sawdust, woodchips, moss, peat, straw, hay, or other acceptable moisture-holding medium, and shall be covered with a tarpaulin or canvas. Loads that are not protected in the above manner may be rejected.
4. Plants must be protected at all times from sun or drying winds. Those that cannot be planted immediately on delivery shall be kept in the shade, well protected with soil, wet mulch, or other acceptable material, and kept well watered. Plants shall not remain unplanted any longer than three days after delivery. Plants shall not be bound with wire or rope at any time so as to damage the bark or break branches. Plants shall be lifted and handled with suitable support of the soil ball to avoid damaging it.
Q. Mechanized Tree Spade Requirements
Trees may be moved and planted with an approved mechanical tree spade. The tree spade shall move trees limited to the maximum size allowed for a similar B&B root-ball diameter according to the American Standard for Nursery Stock or the manufacturer's maximum size recommendation for the tree spade being used, whichever is smaller. The machine shall be approved by the landscape architect prior to use. Trees shall be planted at the designated locations in the manner shown in the plans and in accordance with applicable sections of the specifications.

II Materials for Planting
A. Mulch: Except as otherwise specified, mulch shall be shredded Melaleuca mulch - grade "A". All Melaleuca mulch shall be made entirely from the wood and bark of the
Melaleuca quinquinerva tree. It shall not contain more than 10% bark (by volume). Shreds and chips shall not be larger the ¾" diameter and 1½" in length. Mulch shall
be free of weeds, seeds, and any other organic or inorganic material other than Melaleuca wood and bark. It shall not contain stones or other foreign material that will prevent its eventual decay. This shall be applied to all planted areas where indicated so that, after installation, the mulch thickness will not be less than 3". Submit sample for approval.
B. Peat: Shall be horticultural peat composed of not less than 60% decomposed organic matter by weight, on an oven dried basis. Peat shall be delivered to the site in a
workable condition free from lumps.
C. Gravel Mulch: Use only where specifically indicated on the plans of the size and type shown. Unless otherwise specified it shall be water-worn, hard durable gravel, washed free of loam, sand, clay and other foreign substances. It shall be a minimum of 3" deep and shall be contained with edging or other approved gravel stop as indicated on the plans. It shall be a maximum of 1 1/2", a minimum of 3/4" and of a readily-available natural gravel color range. Provide geotextile filter fabric below aggregate rock.
Submit sample for approval.
D. Root Barrier: Where specified, root barriers shall be installed on all tree and palm material in accordance with the root barrier detail provided within the plan drawings. Root barriers shall comply with all requirements of the municipality within which they are located as well as with any utility holder requirements of any affected utilities. In the event that conflicting requirements exist between the root barrier detail provided within the plan documents and the municipality/utility holder requirements, the more stringent of the requirements shall be applicable.
E. Planter Edging: Use only where specifically indicated on plans. Edging shall be the color black.
F. Anti-desiccant: shall be an emulsion specifically manufactured for agricultural use, which provides a protective film over plant surfaces. Anti-desiccants shall be delivered in containers of the manufacturer and shall be mixed according to the manufacturer's directions. Submit manufacturer literature for approval.

III. Materials for Soil Amendment
A. Pine Bark: Horticultural-grade milled pine bark, with 80 percent of the material by volume sized between 0.1 and 15.0 mm.
1. Pine bark shall be aged sufficiently to break down all woody material. Pine bark shall be screened.
2. pH shall range between 4 and 7.0.
3. Submit manufacturer literature for approval.
B. Organic Matter: Leaf matter and yard waste composted sufficiently to break down all woody fibers, seeds, and leaf structures, and free of toxic and nonorganic matter. Organic matter shall be commercially prepared compost. Submit 0.5 kg (1 lb) sample and suppliers literature for approval.
C. Course Sand: Course concrete sand, ASTM C-33 Fine Aggregate, with a Fines Modulus Index of 2.75 or greater.
1. Sands shall be clean, sharp, natural sands free of limestone, shale and slate particles.
2. Provide the following particle size distribution:

Sieve	Percentage Passing
3/8 in (9.5 mm)	100
No. 4 (4.75 mm)	95-100
No. 8 (2.36 mm)	80-100
No. 16 (1.18 mm)	50-85
No. 30 (0.60 mm)	25-60
No. 50 (0.30 mm)	10-30
No. 100 (0.15 mm)	2-10

D. Lime: shall be ground, palletized, or pulverized lime manufactured to meet agricultural standards and contain a maximum of 60 percent oxide (i.e. calcium oxide plus magnesium oxide). Submit manufacturer literature for approval.
E. Sulfur: shall be flowers of sulfur, palletized or granular sulfur, or iron sulfate. Submit manufacturer literature for approval.
F. Fertilizer: Agricultural fertilizer of a formula indicated by the soil test. Fertilizers shall be organic, slow-release compositions whenever applicable. Submit manufacturer literature for approval.

IV. Planting Mix
A. Planting Mix
1. Planting Mix for Trees, Shrubs, Groundcovers and vines: Check with landscape architect for appropriate mixture.
2. Planting Mix for Palms: Mixture of course sand and peat mixed to the following proportion:

Component	Percent by Volume
Coarse Sand	75%
Peat	25%

B. Planting mix shall be thoroughly mixed, screened, and shredded.
C. Prior to beginning the mixing process, submit a 1-kg (2-lb) sample of the proposed mix with soil test results that indicate the mix ratio and the results achieved.
D. During the mixing process but prior to installing the mix, submit a 1-kg (2-lb) sample for each 200 cubic meters (250 cubic yards) of planting mix, taken randomly from the finished soil mix, with soil test results for approval. In the event that the test results do not meet the required particle size distribution, remix and resubmit a revised planting mix.
E. Make all amendments of lime/sulfur and fertilizer indicated by the soil test results at the time of mixing.
F. All mixing shall take place in the contractors yard, using commercial mixing equipment sufficient to thoroughly mix all components uniformly
G. Protect the planting mix from erosion prior to installation.

Part 3. Execution

I. Excavation of Planted Areas
A. Locations for plants and/or outlines of areas to be planted are to be staked out at the site. Locate and mark all subsurface utility lines. Approval of the stakeout by the landscape architect is required before excavation begins.
B. Tree, shrub, and groundcover beds are to be excavated to the depth and widths indicated on the landscape plan detail drawings. If the planting area under any tree is initially dug too deep, the soil added to bring it up to the correct level should be thoroughly tamped.
1. The sides of the excavation of all planting areas shall be sloped at a 45 degrees. The bottom of all beds shall slope parallel to the proposed grades or toward any subsurface drain lines within the planting bed. The bottom of the planting bed directly under any tree shall be horizontal such that the tree sits plumb.
2. Maintain all required angles of repose of the adjacent materials as shown on the drawings. Do not excavate compacted subgrades of adjacent pavement or structures.
3. Subgrade soils shall be separated from the topsoil, removed from the area, and not used as backfill in any planted or lawn area. Excavations shall not be left uncovered or unprotected overnight.
C. For trees and shrubs planted in individual holes in areas of good soil that is to remain in place and/or to receive amendment in the top 150-mm (6 in.) layer, excavate the
hole to the depth of the root ball and to widths shown on the drawing. Slope the sides of the excavation at a 45 degree angle up and away from the bottom of the excavation.
1. In areas of slowly draining soils, the root ball may be set up to 75 mm (3 in.) or 1/8 of the depth of the root ball above the adjacent soil level.
2. Save the existing soil to be used as backfill around the tree.
3. On steep slopes, the depth of the excavation shall be measured at the center of the hole and the excavation dug as shown on the drawings.
D. Detrimental soil conditions: The landscape architect is to be notified, in writing, of soil conditions encountered, including poor drainage, that the contractor considers detrimental to the growth of plant material. When detrimental conditions are uncovered, planting shall be discontinued until instructions to resolve the conditions are received from the landscape architect.
E. Obstructions: If rock, underground construction work, utilities, tree roots, or other obstructions are encountered in the excavation of planting areas, alternate locations for
any planting shall be determined by the landscape architect.

II. Installation of Planting Mix
A. Prior to the installation of the planting mix, install subsurface drains, irrigation main lines, lateral lines, and irrigation risers shown on the drawings.
B. The landscape architect shall review the preparation of subgrades prior to the installation of planting mix.
C. Do not proceed with the installation of planting mix until all utility work in the area has been installed.
D. Protect adjacent walls, walks, and utilities from damage or staining by the soil. Use 12-mm (1/2 in.) plywood and/or plastic sheeting as directed to cover existing concrete,
metal, masonry work, and other items as directed during the progress of the work.
1. Clean up any soil or dirt spilled on any paved surface at the end of each working day.
2. Any damage to the paving or architectural work caused by the soils installation contractor shall be repaired by the general contractor at the soils installation contractors expense.
E. Till the subsoil into the bottom layer of topsoil or planting mix.
1. Loosen the soil of the subgrade to a depth of 50 to 75 mm (2 to 3 in.) with a rototiller or other suitable device.
2. Spread a layer of the specified topsoil or planting mix 50 mm (2 in.) deep over the subgrade. Thoroughly till the planting mix and the subgrade together.
3. Immediately install the remaining topsoil or planting mix in accordance with the following specifications. Protect the tilled area from traffic. DO NOT allow the tilled subgrade to become compacted.
4. In the event that the tilled area becomes compacted, till the area again prior to installing the planting mix.
F. Install the remaining topsoil or planting mix in 200- to 250-mm (8- to 10-in.) lifts to the depths and shown on the drawing details. The depths and grades shown on the drawings are the final grades after soil settlement and shrinkage of the organic material. The contractor shall install the soil at a higher level to anticipate this reduction of soil volume, depending on predicted settling properties for each type of soil.
1. Phase the installation of the soil such that equipment does not have to travel over already-installed topsoil or planting mixes.
2. Compact each lift sufficiently to reduce settling but not enough to prevent the movement of water and feeder roots through the soil. The soil in each lift should feel firm to the foot in all areas and make only slight heel prints. Overcompaction shall be determined by the following field percolation test.
a. Dig a hole 250 mm (10 in.) in diameter and 250 mm (10 in.) deep.
b. Fill the hole with water and let it drain completely. Immediately refill the hole with water, and measure the rate of fall in the water level.
c. In the event that the water drains at a rate less than 25 mm (1 in.) per hour, till the soil to a depth required to break the overcompaction.
d. The landscape architect shall determine the need for, and the number and location of percolation tests based on observed field conditions of the soil.
3. Maintain moisture conditions within the soils during installation to allow for satisfactory compaction. Suspend installation operations if the soil becomes wet. Do not place soils on wet subgrade.
4. Provide adequate equipment to achieve consistent and uniform compaction of the soils. Use the smallest equipment that can reasonably perform the task of spreading and compaction.
5. Add lime, sulfur, fertilizer, and other amendments during soil installation. Spread the amendments over the top layer of soil and till into the top 100 mm (4 in.) of soil. Soil amendments may be added at the same time that organic matter, when required, is added to the top layer of soil.
6. Protect soil from overcompaction after placement. An area that becomes overcompacted shall be tilled to a depth of 125 mm (6 in.). Uneven or settled areas shall be filled and regraded.

III. Fine Grading
A. It shall be the responsibility of the Contractor to finish grade (min. 6" below adjacent F.F.E.). Finish grades in planting areas shall be one inch lower than adjacent paving and are to include 3" of mulching. New earthwork shall blend smoothly into the existing earthwork, and grades shall pitch evenly between spot grades. All planted areas must pitch to drain at a minimum of 1/4" per foot. Any discrepancies not allowing this to occur shall be reported to the Landscape Architect prior to continuing work.
B. Fill all dips and remove any bumps in the overall plane of the slope.
1. The tolerance for dips and bumps in lawn areas shall be a 12-mm (1/2 in.) deviation from the plane in 3,000 mm (10 ft).
2. The tolerance for dips and bumps in shrub planting areas shall be a 25-mm (1 in.) deviation from the plane in 3,000 mm (10 ft).
3. All fine grading shall be inspected and approved by the landscape architect prior to planting, mulching, sodding, or seeding.
C. Berming shall not be placed within 10' of any existing tree nor will it be allowed to encroach upon any utility, drainage, or maintenance easement. Berming shall not impede or obstruct any necessary swales needed to drain other areas for the property.

IV. Planting Operations
A. Plants shall be set on flat-tamped or unexcavated pads at the same relationship to finished grade as they were to the ground from which they were dug, unless otherwise noted on the drawings. Plants must be set plumb and braced in position until topsoil or planting mix has been placed and tamped around the base of the root ball. Improper compacting of the soil around the root ball may result in the tree settling or leaning. Plants shall be set so that they will be at the same depth and so that the root ball does not shift or move laterally one year later.
1. Determine the elevation of the root flare and ensure that it is planted at grade. This may require that the tree be set higher than the grade in the nursery.
2. If the root flare is less than 50 mm (2 in.) below the soil level of the root ball, plant the tree the appropriate level above the grade to set the flare even with the grade. If the flare is more than 50 mm (2 in) at the center of the root ball the tree shall be rejected.
B. Lift plants only from the bottom of the root balls or with belts or lifting harnesses of sufficient width not to damage the root balls. Do not lift trees by their trunk or use the trunk as a lever in positioning or moving the tree in the planting area.
C. Remove plastic, paper, or fiber pots from containerized plant material. Pull roots out of the root mat. Loosen the potting medium and shake away from the root mat. Immediately after removing the container, install the plant such that the roots do not dry out. Pack planting mix around the exposed roots while planting.
D. The roots of bare-root trees shall be pruned at the time of planting to remove damaged or undesirable roots (those likely to become a detriment to future growth of the root system). Bare-root trees shall have the roots spread to approximate the natural position of the roots and shall be centered in the planting pit. The planting-soil backfill shall be worked firmly into and around the roots, with care taken to fill in completely with no air pockets.
E. Cut ropes or strings from the top of shrub root balls and trees smaller than 3 in. caliper after plant has been set. Remove burlap or cloth wrapping and any wire baskets from around top half of balls. Do not turn under and bury portions of burlap at top of ball.
1. Do not immediately remove the ropes and burlap from trees larger than 3 in. caliper. Return to each tree three months after planting and cut all ropes around the trunks and tops of the root balls of these trees.
2. Completely remove any waterproof or water-repellant strings or wrappings from the root ball and trunk before backfilling.
F. Set balled and burlapped trees in the hole with the north marker facing north unless otherwise approved by the landscape architect.
G. Place native soil, topsoil, or planting mix into the area around the tree, tamping lightly to reduce settlement.
1. For plants planted in individual holes in existing soil, add any required soil amendments to the soils, as the material is being backfilled around the plant. Ensure that the amendments are thoroughly mixed into the backfill.
2. For plants planted in large beds of prepared soil, add soil amendments during the soil installation process.
3. Ensure that the backfill immediately around the base of the root ball is tamped with foot pressure sufficient to prevent the root ball from shifting or leaning.
H. Solid sod shall be laid with closely abutting joints with a tamped or rolled, even surface. Stagger strips to offset joints in adjacent courses. Bring the sod edge in a neat, clean manner to the edge of all paving and shrub areas. Sod along slopes shall be pegged to hold sod in place along slopes or banks a wood peg acceptable to the Landscape Architect shall be used at no additional cost to the Owner. If, in the opinion of the Landscape Architect, top-dressing is necessary after rolling, clean sand will be evenly applied over the entire surface and thoroughly washed in without additional charge.
I. Thoroughly water all plants immediately after planting. Apply water by hose directly to the root ball and the adjacent soil.
J. Remove all tags, labels, strings, etc. from all plants.
K. Remove any excess soil, debris, and planting material from the job site at the end of each workday.
L. Form watering saucers 100 mm (4 in.) high immediately outside the area of the root ball of each tree as indicated on the drawings.

V. Relocation of Existing Material:
A. Landscape Contractor shall root prune trees which are to be relocated in accordance with approved horticultural practices and the following procedures.
1. Select a healthy tree
2. Selectively trim the canopy removing dead limbs, cross branching over crowned areas, and lower undesirable limbs. Fertilize and water trees before pruning.
3. Root prune 50% of the root system approximately 18"-2' deep (depending upon species and size). This is done by hand with sharp hand tools or a root pruning saw. The diameter of the root ball to be pruned is 8-12 inches per every one inch of diameter at breast height of the tree.
4. Back fill the existing soil with peat moss to stimulate new root growth of the pruned roots.
5. Water in thoroughly and treat with a mycorrhizae and a low nitrogen fertilizer (so not to burn the pruned roots). Brace trees if deemed necessary.
6. The root pruned tree should be watered every day (especially during warm months of the season), the equivalent of 5 gallons for every DBH of tree per day.
7. Root pruned trees should be let to stand for a minimum of 6 weeks for trees less than 8" DBH and as long as 3 months for larger specimens prior to transplanting.
8. For best results and survivorship, new root growth should be evident on root pruned trees prior to transplanting.
9. Upon transplanting, water should be applied every day as outlined in step 6 for at least one year.

VI. Staking and Guying
A. The Contractor shall stake all trees and palms in accordance with the tree and palm staking details provided within the plan drawings. Alternate methods of guying or staking may be employed with the prior approval of the Landscape Architect.
B. The Contractor shall be responsible for the replacement or adjustment of all trees, palms or shrubs that fall or lean during the guarantee period. The Contractor shall be responsible for any damage caused by the falling or leaning of trees.
C. Stakes and guys shall be installed immediately upon approval or planting, and shall be removed in accordance with the staking details provide within the plan drawings. Any tree that is not stable at the end of the warranty period shall be rejected.

VII. Pruning
A. Plants shall not be heavily pruned at the time of planting. Pruning is required at planting time to correct defects in the tree structure, including removal of injured branches, waterspouts, suckers, and interfering branches. Healthy lower branches and interior small twigs should not be removed except as necessary to clear walks and roads. In no case should more than one-quarter of the branching structure be removed. Retain the normal or natural shape of the plant.
B. All pruning shall be completed using clean, sharp tools. All cuts shall be clean and smooth, with the bark intact with no rough edges or tears.
C. Pruning of large trees shall be done from a hydraulic man-lift such that it is not necessary to climb the tree.

VIII. Mulching
A. All trees, palms, shrubs, and other plantings will be mulched with mulch previously approved by the landscape architect. The mulch shall be a minimum 3" thick layer over all tree, shrub and ground cover planting areas, unless otherwise specified. All mulch layers shall be of the specified thickness at the time of the final acceptance of the work. Mulch must not be placed within 3 inches of the trunks of trees, palms or shrubs.
B. Place mulch at least 3" in depth in a circle around all trees located in lawn areas. The diameter of the circle shall be 18" in diameter larger than the ball of the plant provided. Mulch must not be placed within 3 inches of the trunks of trees, palms or shrubs.

IX. Maintenance of Trees, Shrubs, and Vines
A. Maintenance shall begin immediately after each plant is planted and continue until its acceptance has been confirmed by the landscape architect.
B. Maintenance shall consist of pruning, watering, cultivating, weeding, mulching, fertilizing, tightening and repairing guys and stakes, resetting plants to proper grades or upright position, restoring of the planting saucer, and furnishing and applying such sprays or other materials as necessary to keep plantings free of insects and diseases and in vigorous condition.
C. Planting areas and plants shall be protected at all times against trespassing and damage of all kinds for the duration of the maintenance period. If a plant becomes damaged or injured, it shall be treated or replaced as directed by the landscape architect at no additional cost.
D. Watering: Contractor shall irrigate as required to maintain vigorous and healthy tree growth. Overwatering or flooding shall not be allowed. The contractor shall monitor, adjust, and use existing irrigation facilities, if available, and furnish any additional material, equipment, or water to ensure adequate irrigation. Root balls of all trees and large shrubs shall be spot watered using handheld hoses during the first four months after planting, as required to ensure adequate water within the root ball.
E. During periods of restricted water usage, all governmental regulations (permanent and temporary) shall be followed. The contractor may have to transport water from ponds or other sources, at no additional expense to the owner when irrigation systems are unavailable.
F. Remove soil ridges from around watering basins prior to end of maintenance period, as directed by Landscape Architect

X. Acceptance
A. The landscape architect shall inspect all work for acceptance upon written request of the contractor. The request shall be received at least ten calendar days before the anticipated date of inspection.
B. Acceptance of plant material shall be for general conformance to specified size, character, and quality and shall not relieve the contractor of responsibility for full conformance to the contract documents, including correct species.
C. Upon completion and re-inspection of all repairs or renewals necessary in the judgment of the landscape architect, the landscape architect shall certify in writing that the work has been accepted.

XI. Acceptance in Part
A. Work may be accepted in parts when the landscape architect and contractor deem that practice to be in their mutual interest. Approval must be given in writing by the landscape architect to the contractor verifying that the work is to be completed in parts. Acceptance of work in parts shall not waive any other provision of this contract.

XII. Guarantee Period and Replacements
A. The guarantee period for trees and shrubs shall begin at the date of acceptance.
B. The contractor shall guarantee all plant material to be in healthy and flourishing condition for a period of one year from the date of acceptance.
C. When work is accepted in parts, the guarantee periods extend from each of the partial acceptances to the terminal date of the guarantee of the last acceptance. Thus, all guarantee periods terminate at one time.
D. The contractor shall replace, without cost, as soon as weather conditions permit, and within a specified planting period, all plants determined by the landscape architect to be dead or in an unacceptable condition during and at the end of the guarantee period. To be considered acceptable, plants shall be free of dead or dying branches and branch tips and shall bear foliage of normal density, size, and color. Replacements shall closely match adjacent specimens of the same species. Replacements shall be subject to all requirements stated in this specification.
E. The guarantee of all replacement plants shall extend for an additional period of one year from the date of their acceptance after replacement. In the event that a replacement plant is not acceptable during or at the end of said extended guarantee period, the landscape architect may elect subsequent replacement or credit for that item.
F. At the end of the guarantee, the contractor shall reset grades that have settled below the proposed grades on the drawings.
G. The contractor shall make periodic inspections, at no extra cost, during the guarantee period to determine what changes, if any, should be made in the maintenance program. If changes are recommended, they shall be submitted in writing to the landscape architect. Claims by the contractor that the owners maintenance practices or lack of maintenance resulted in dead or dying plants will not be considered if such claims have not been documented by the contractor during the guarantee period.

XIII. Final Inspection and Final Acceptance
At the end of the guarantee period and upon written request of the contractor, the landscape architect will inspect all guaranteed work for final acceptance. The request shall be received at least ten calendar days before the anticipated date for final inspection. Upon completion and re-inspection of all repairs or renewals necessary in the judgment of the landscape architect at that time, the landscape architect shall certify, in writing, that the project has received final acceptance.

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Planning, Zoning & Building

ITEM 9.4:

Resolution 2021-03 - Site Development Plan Amendment - Fontana Townhomes Residential Planned Development Site Plan (SPR21-02) - 4063 Davis Road and 4090 Coconut Road *(Quasi-Judicial Hearing)*

SUMMARY:

Jerrod Purser, agent for Meritage Homes of Florida, Inc., is requesting site development plan approval (SPR2021-02) for a residential planned development project for the combination of the properties located at 4063 Davis Road and 4090 Coconut Road. The applicant is proposing to develop the 4.73 acres site with the construction of 59 two-story fee-simple townhomes. Each townhome will be a three-bedroom home with a one car garage and a driveway with space for two cars.

The buildings will be configured with five (5) 6-townhome units, three (3) 7-townhome units and one (1) 8-townhome unit for a total of nine (9) buildings. The community will have two access driveways via the existing Davis Road and Coconut Road right-of-way. Amenities include a tot lot with playground equipment, a shade structure, picnic table and sports field for lawn games.

Note: The Village Code - Section 34-1063(c) Waivers - provides that waivers may be granted by the Village Council following and advisory recommendation by the Planning & Zoning Board. All requests for waivers shall be identified on the site plan and shall accompany an application for site plan approval of planned development.

The applicant is requesting four (4) waivers for the proposed RPD site plan:

1. Relief from Sec.34-1328 - Allow a 20' wide drive aisle rather than the required 26' wide drive aisle for 2-way traffic
2. Relief from Sec.34-1063(a)(1) - Allow one sidewalk along the street rather than the required sidewalks on both sides of the street
3. Relief from Sec.34-766(1) - Allow 59 townhomes to be constructed on a 4.73-acre property rather than 12.55 acres minimum lot size.
4. Relief from Sec.34-1064(1)(b) - Allow a 15' side setback rather than the required 20' side setback.

Note: Based on the property standards within the Residential Multi-Family (RM) zoning district (specifically the minimum lot area requirements) outlined in Village Code section 34-766(1), this proposed 4.73-acre parcel could only support a maximum of 23 dwelling units rather than the proposed fifty-nine (59) by the developer. The applicant is seeking one (1) waiver in order to obtain approval as a Residential Planned Development (RPD) and therefore the ability to maximize density on the property with fifty-nine (59) townhomes.

The Applicant is requesting a Future Land Use Amendment and Rezoning which are subject of a separate agenda item. Approval of the Residential Planned Development site plan is dependent of the approval of the Land Use Amendment and Rezoning.

The Planning & Zoning Board considered the requested RPD during its regular meeting on March 9, 2021 and recommended approval, but were not in favor of requiring the school contribution.

Planning, Zoning & Building Staff does not object to the Residential Planned Development Site Plan with four (4) waivers and recommends conditional approval of the proposed development subject to forty-eight (48) conditions.

FISCAL IMPACT:

The proposed project is expected to increase the Village's assessed property valuation.

RESOLUTION NO. 2021-03

A RESOLUTION OF THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA, REQUESTING (APPROVING/DENYING), WITH CONDITIONS, A SITE PLAN, (SPR21-02) FOR THE CONSTRUCTION OF A RESIDENTIAL PLANNED DEVELOPMENT PROJECT CONSISTING OF NINE (9) BUILDINGS (APPROXIMATELY 50,000 SQUARE FEET) WITH 59 TWO-STORY TOWNHOMES, LOCATED AT 4063 DAVIS ROAD & 4090 COCONUT ROAD AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, WGI, Agent for Meritage Homes of South Florida ("Applicant") is requesting a Site Development Plan (SPR21-02) for a Residential Planned Development Project with four (4) waivers. The proposed project is ±4.73 gross acres (gross area) acres, located at 4063 Davis Road & 4090 Coconut Road; and

WHEREAS, WGI, Agent for Meritage Homes of South Florida, is requesting the following four (4) waivers:

1) Requesting a waiver from Sec.34-1328 to allow a 20' drive aisle instead of 26' required.

2) Requesting a waiver from Sec.34-1063(a)(1) to allow for one sidewalk on a street or primary driveway interconnected with other pedestrian ways instead of sidewalks on both sides of the main street.

3) Requesting a waiver from Sec.34-766(1) to allow the construction of 59 residential dwelling units within 4.73 acres instead of 12.55 acres minimum required within the RM district.

4) Requesting a waiver from Sec.34-1064(1)(b) to allow a 15' side setback instead of 20' minimum required.

WHEREAS, the recommendation of the Planning, Zoning and Building Department is to approve this application, subject to staff report conditions; and

WHEREAS, the Village Council and Planning & Zoning Board has heard this matter in public session; has considered the presentation and other evidence presented by the Applicant; has received and considered the recommendations of the Village Staff; and has otherwise been fully informed regarding this matter.

NOW THEREFORE, BE IT RESOLVED BY THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA:

Section 1. The Village Council having received and considered the request of WGI, Agent for Meritage Homes of Florida, Inc. ("Applicant"), for approval of Site Development Plan (SPR21-02) and four (4) waivers within the proposed Residential Planned Development.

Note: Within the proposed Site Development Plan Amendment, the Applicant is requesting four (4) waivers:

The Planning & Zoning Board ("Board") considered these requests during their March 9, 2021 meeting and in light of the applicable legal criteria set forth in Chapter 34 of the Palm Springs Code and the sworn testimony and other evidence presented at public hearing, and the Board recommended approval of the application, finding that good cause for the waivers has been shown and they have been demonstrated to be in harmony with the purpose, objectives, and performance standards of this subdivision based upon the criteria set forth in Palm Springs Code Section 34-1063(c).

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby adopts the findings of the Board and approves the said application as revised, with the staff report conditions attached hereto as Exhibit "A", and which is incorporated herein by reference**.

OR

_____Having been otherwise fully apprised of the premises herein, the Village Council hereby rejects the Board findings and denies the application, finding that good cause for the waivers has NOT been shown and they have NOT been demonstrated to be in harmony with the purpose, objectives, and performance standards of this subdivision based upon the criteria set forth in Palm Springs Code Section 34-1063(c), for the following reason(s):

_____
_____
_____

Notwithstanding any exceptions, conditions or other approvals granted herein, the applicant must conform to all other applicable codes, ordinances, and laws whether stated herein or not.

Section 2. This Resolution shall take effect immediately upon adoption.

Council Member _____ offered the foregoing resolution. Council Member_____ seconded the motion, and upon being put to a vote, the vote was as follows:

PLANNING, ZONING & BUILDING STAFF REPORT

SUBJECT: Small-Scale Land Use Amendment, Rezoning and Site Development Plan (Residential Planned Development Site Plan with Waivers) - Fontana Townhomes – 4063 Davis Road & 4090 Coconut Road.

Application Summary			
Applicant / Petitioner	Meritage Homes of Florida, Inc.	Submittal Date	10/20/2020
Reference Name	Fontana Townhomes	Case Number	SPR21-02
		Parcel Control No	70-42-44-24-00-000-6070 & 70-43-44-30-01-009-0040
Location	Assembly of the properties 4063 Davis Rd & 4090 Coconut Road	Site Area	±4.73 gross acres ±4.48 net acres
P&Z B Meeting	March 9, 2021	Local Planning Agency	April 8, 2021
Council Meeting (after LPA, 1st Reading)	April 8, 2021	Council Meeting (2nd Reading)	May 13, 2021

Requests	
Proposed Use(s)	Small-Scale Land Use Amendment of the Future Land Use Map to change the land use from Urban Infill to High Density Residential, concurrent with Rezoning from Urban Infill (UI) to Residential Multiple- Family and a Planned Development Site Plan for construction of 59 two-story townhomes within nine buildings.
Number of Buildings	9 Buildings (approximately 50,000 SF total)
Waivers	1. Requesting a waiver from Sec.34-1328 to allow a 20' drive aisle instead of 26' required. 2. Requesting a waiver from Sec.34-1063(a)(1) to allow for one sidewalk on a street or primary driveway interconnected with other pedestrian ways instead of sidewalks on both sides of the main street. 3. Requesting a waiver from Sec.34-766(1) to allow the construction of 59 residential dwelling units within 4.73 acres instead of 12.55 acres minimum required within the RM district. 4. Requesting a waiver from Sec.34-1064(1)(b) to allow a 15' side setback instead of 20' minimum required.

Parking			
Code	Required	Provided	Meets Requirement
Total Parking	Total of 185 parking needed 2.5/ DU + 25% for guest	185 spaces total 59 garages spaces 118 driveway spaces (2 per unit) 8 guest spaces	Yes

Setbacks			
Code	Required Minimum	Proposed	Meets Requirement
Front yard (East & West)	25'	25'	Yes
Rear yard (South)	20'	N/A (two frontage)	-
Side yard (North & South)	20'	15'	No* (waiver requested)

Site Characteristics			
Existing Use	Vacant lot & Single-Family Home	Proposed Use	Residential Multiple-family
Existing Zoning	Urban Infill (UI)	Proposed Zoning	Residential Multiple-Family (RM)
Existing Future Land Use	Urban Infill	Proposed Future Land Use	High Density Residential

Proposed Density	12.5 du/acres (Maximum permitted on High Density Residential is 19 du/acre)

Surrounding Existing Land Use, Future Land Use, and Zoning			
Direction	Existing Use	Future Land Use	Zoning District
North	Mobile home park & medical office building	Urban Infill & Commercial	Urban Infill (UI) & Commercial General (CG)
South	Single Family Home & Vacant lot	Unknown Unincorporated Palm Beach County	Unknown Unincorporated Palm Beach County
East	Drive in theater – Swap Shop	Commercial	Commercial General (CG)
West	PBC Governmental office	Unknown Unincorporated Palm Beach County	Unknown Unincorporated Palm Beach County

Recommendation
Planning, Zoning & Building Staff recommends conditional approval of the new residential high density planned development site plan, as depicted on the proposed site plan, based on consistency with the Village Comprehensive Plan, compatibility with surrounding uses and generally consistent with the CRA Lake Worth Road District objectives.

I. Site History

- Ordinance 2017-35: Annexation

The property located at 4090 Coconut Road, was voluntarily annexed into the Village of Palm Springs on December 21, 2017. Palm Beach County's Future Land Use and Zoning designations were maintained until today's date.

- Resolution 2017-49: Annexation

The property located at 4063 Davis Road, was annexed into the Village of Palm Springs via interlocal agreement with Palm Beach County, the agreement was executed by Palm Beach County on October 22, 2019, Village's Council approved the annexation on December 21, 2017. Palm Beach County's Future Land Use and Zoning designations were maintained until today's date.

II. Comprehensive Plan Consistency

- The subject property's Future Land Use designation and Zoning are Palm Beach County Urban Infill and Urban Infill (UI), respectively. The proposed small-scale land use amendment is to assign the Village's Future Land Use of High Density Residential. Concurrently, rezoning from the Palm Beach County zoning designation of Urban Infill to Residential Multiple-Family is requested, and is supported with a planned development site plan. All requests are consistent with goals, objectives and policies of the Village's Comprehensive Plan.

III. Waivers Requested

The applicant is seeking the following waivers:

Waiver #1: The applicant is requesting a waiver relief from Sec.34-1328 to allow a 20' wide drive aisle instead of 26' wide required.

Waiver #2: The applicant is requesting a waiver relief from Sec.34-1063(a)(1) to allow for one sidewalk on a street or primary driveway interconnected with other pedestrian ways instead of sidewalks on both sides of the main street.

Waiver #3: The applicant is requesting a waiver relief from Sec.34-766(1) to allow the construction of 59 residential dwelling units within 4.73 acres instead of 12.55 acres minimum required within the RM district.

Waiver #4: The applicant is requesting a waiver relief from Sec.34-1064(1)(b) to allow a 15' side setback instead of 20' minimum required.

The applicant's full justification to the waivers is attached hereto.

a. <u>The request is in harmony with and is consistent with the purpose and intent of the Village's Comprehensive Plan and Land Development Code and that such waiver will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare.</u>

Waiver 1: The request to allow a 20' wide drive aisle when adjacent to 90-degree parking is in harmony and is consistent with the purpose and intent of the Village's Comprehensive Plan and Land Development Code. The majority of the subject site is compliant with the required drive aisle dimensions, however there are even 90-degree parking spaces in a portion of the site which require a 26' wide drive aisle. This waiver will not be injurious to the area involved, as traffic can still safely maneuver into and out of the parking spaces.

Waiver 2: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian connectivity will be provided.

Waiver 3: The request to allow a reduced lot size from the required minimum lot requirements is outside of the Applicant's control and will not affect the public health safety, and welfare.

Waiver 4: The request to allow a reduced side setback is consistent with the purpose and intent of the Village's Comprehensive Plan and Land Development Code, and will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. The subject area of this request is specific to lot 52, which is along the northern portion of the site. It is screened by the adjacent northern property by a 10' landscape buffer and existing 6' concrete wall. The request also applies to lots 14 and 15, along the southern portion of the site, adjacent to the LWDD L-12 Canal. These lots are screened by a 10' landscape buffer with a 5' vinyl fence.

b. The request results from innovative design in which other minimum standards are exceeded.

Waiver 1: The request to allow a reduced drive aisle width when adjacent to 90-degree parking results from innovative design in which other minimum standards are exceeded. The subject site is compliant with the required drive aisle width in all other areas.

Waiver 2: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian continuity will be provided.

Waiver 3: The request to allow a reduced lot size is not the result of innovative design. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

Waiver 4: The request to allow a reduced side setback distance results from innovative design in which other minimum standards are exceeded. The areas of focus for the reduced side setback, currently propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

c. The request demonstrates that granting of the waiver will result in preservation of valuable natural resources, including drainage and recharge areas, natural areas, etc.

Waiver 1: The granting of the waiver request related to reduced drive aisle width will result in the preservation of valuable natural resources. A narrower street width equates to less impervious area, as a result this will help preserve valuable natural resources.

Waiver 2: The granting of the waiver request will result in the preservation of valuable natural resources, including drainage and recharge areas, and natural areas. As aforementioned, by negating the requirement for an extra sidewalk, this will allow for increased pervious areas throughout the subject site.

Waiver 3: The request to allow a reduced lot size will not result in preservation of valuable natural resources. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

Waiver 4: The reduced side setback will result in the preservation of valuable natural resources. This will be achieved, as the reduced setback will allow for greater design freedom and allow for more opportunity to preserve natural resources.

d. The request demonstrates public benefits to be derived, including but not limited to such benefits as dedication of rights-of-way, extensions of pedestrian linkages outside of the project boundaries, preservation of open areas and use of desirable architectural, building, and site design techniques.

Waiver 1: The request will demonstrate public benefits such as desirable site design techniques. By allowing for a narrower drive aisle adjacent to parking spaces, there is room for more pervious area and potential open spaces. This will create a more desirable community for future residents.

Waiver 2: The request will demonstrate public benefits such as extension of pedestrian linkages outside of the project boundaries. The subject site is located in an ideal area with close proximity (less than 300 feet) to the Lake Worth Road Corridor The proposed sidewalk network will connect to the existing Davis Road sidewalk and allow walkability to the surrounding areas and services.

Waiver 3: The request to allow a reduced lot size does not demonstrate public benefits to be derived. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

Waiver 4: The waiver request will demonstrate public benefits such as desirable site design techniques and right-of-way dedication to the LWDD L-12 Canal. By allowing for a reduced side setback, the subject site will have more design freedoms to provide increased open space and additional drainage.

e. The request provides sufficient screening and buffering to screen adjacent uses from adverse impacts caused by the granting of a waiver.

Waiver 1: The request will not jeopardize the screening of the subject site as it relates to a decreased drive aisle width in a specific portion of the site.

Waiver 2: This waiver request is specific to the pedestrian sidewalks within the subject site and would not adversely impact adjacent properties. However, appropriate landscape buffering and screening is provided.

Waiver 3: The waiver does not generate any adverse impacts related to adjacent properties; however, the applicant will sufficiently screen and buffer the property.

Waiver 4: The waiver request will provide sufficient screening and buffering to screen adjacent uses from any adverse impacts created by the reduced side setback This reduced setback is specific to two areas of the subject site, which propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

f. Economic issues may not be used to justify waivers.

Waiver 1, 2, 3 & 4: Economic issues are not used as a justification for these requests.

g. The request is compatible with existing and potential land uses adjacent to the development site.

Waiver 1, 2, 3 &4: The request is consistent with the existing and potential land uses adjacent to the development site. A majority of the surrounding uses are residential communities which either provide one sidewalk or no sidewalks. There is a sidewalk along Davis Road which the subject site's sidewalk system will connect to. Overall, a waiver request for a decreased street width, single sidewalk, and a reduced side setback will not generate compatibility issues.

Staff supports the applicant's request based on the intent of the applicant to maximize the utilization of the land reducing the amount of impervious surface and consistency with the Village Comprehensive Plan

allowing for innovative designs. Although the acreage is below the minimum required for 59 residential dwelling units, the property can still be developed in the proposed manner without any adverse impact to the surrounding properties.

IV. Neighborhood Compatibility

1) The proposed project is located on the south side of Lake Worth Road between Coconut Road and Davis Road.
2) Surrounding properties are a mix of residential and commercial uses.
3) The property is located within the Lake Worth Road District CRA.
4) The Village Center is located within 1.5 miles.
5) A mix of different uses like general retails, restaurants, grocery supermarket and professional offices are located on the proximities along Lake Worth Road.
6) Available public transportation on Lake Worth Road and South Military Trail are existing within less than 1 mile from the property.

V. Consistency with Palm Springs Lake Worth Road District CRA

1. Detailed Description of the Proposal's Consistency with Five (5) Key Goals of CRA

I. Improving Utilities and Infrastructure

The development proposal will extend new Utilities and install new site-serving Infrastructure to the site, as improvements are necessary in order to construct the Townhouses.

II. Expanding Job Development and Economic Growth

The development proposal does not directly fulfill the CRA's key goal to expand job development and economic growth, but it will provide additional residents to supply the workforce and economy of the Village.

III. Enhancing Public Safety

The development proposal will enhance public safety, as the subject site is currently abandoned and an ideal area for vagrancy, illegal dumping and other criminal activities to occur due to its location adjacent to the LWDD canal and separation from Lake Worth Road. The development of buffers, fencing, and additional landscape screening around the perimeter of the subject site will significantly decrease the chance of any crime occurring on this property in the future.

IV. Increasing and Maintaining Workforce Housing

While Workforce Housing is not a component of this development proposal, the overall nature of the development program will create an equal opportunity for all Village residents to increase homeownership. Townhouses offer an affordable entry level homeownership opportunity. More ideal than renting and more achievable than purchasing a single-family residential house, the development proposal will provide much needed home options for residents of the Village.

V. Advancing the Partnership with Palm Beach County

The development proposal will advance the partnership with Palm Beach County due to its location within the Hernden Park Countywide Community Revitalization Area (CCRT) neighborhood core area. The Countywide Community Revitalization Area's within Palm Beach County are overseen by the County's Office of Community Revitalization (OCR). This request will require the continued coordination with the County and surrounding Hernden Park residents to ensure the communities needs are met.

2. Proposal's effect on existing conditions (identified in CRA Community Redevelopment Plan) in the CRA District.

As evidenced by the Lake Worth Road subdistrict study, the Lake Worth Road subdistrict is currently subject to slum/and or blighted conditions. Some of the existing conditions include faulty lot layout in relation to usefulness, inadequate building density patterns, and incidence of crime in the area higher than in the remainder of the county or municipality. This proposal will improve all of the aforementioned negative existing conditions on the subject site and in turn have an effect on the immediately surrounding area.

3. Proposal's ability to assist in achieving strategies and objectives of the Palm Springs CRA.

The development proposal will assist in achieving strategies and objectives of the CRA as it addresses an existing blighted area within the Village. As evidenced by the subdistrict study, the Lake Worth Road subdistrict is subject to slum/and or blighted conditions. The subject site has sat abandoned for many years and allows for an incidence of crime in the area due to its ideal location next to the LWDD canal and separation from Lake Worth Road. Proposing a residential development such as the Fontana Townhomes development will assist in achieving the CRA's strategies to address blighted areas, by improving the area and discouraging criminal traffic.

VI. Regulatory Issues

- The site plan generally conforms to the property development standards of the Residential Planned Development.
  1) Proposed project plan generally meets required site development regulations.
  2) A High-Density Residential Land Use designation and rezoning to RM, shall be approved prior to consideration of the proposed Site Plan.
  3) The applicant is responsible to acquire all applicable permits from all regulatory agencies with jurisdiction over the project site, including but not limited to Palm Beach County, LWDD and the Village of Palm Springs.
  4) Civil/Utility plans shall be approved by the Village's Engineer.
  5) Proposed ROW dedications along the west, south and east shall be approved by PBC and LWDD respectively at time of Civil/Utility plan review.
  6) The project is located within the Airport Land Use Noise Zone (ALUNZ) for Palm Beach County Park Airport.
  7) The proposed development is located within the Airport Regulated area Zone 3 & Zone 1 for PBIA and Lantana Airport
  8) The 10' pipe easement (ORB. 2204PB. 1150) shall be abandoned at time of Civil/Utility review.
  9) Proposed Site Plan meets the Traffic Performance Standards of Palm Beach County.
  10) Property shall be platted.

VII. Environmental Issues:

There are no environmental (wetlands, floodplains, etc.) issues identified.

VIII. Community Outreach/ Notification

- The subject property was posted on February 26, 2021.
- Public Notification letters were mailed to all property owners within 300 feet radius of subject property on February 19, 2021.
- Legal advertisement was published in the paper on February 25, 2021 and will be re-advertise on March 25, 2021 and April 28, 2021.
- Staff has not received any inquiries or comments as a result of the notices.

IX. Proposed Development Plan Details

The petitioner's development plans dated received on October 20, 2020 depicts the following:

- Application for Small-Scale Land Use Amendment, Rezoning and Residential Planned Development Site Plan approval with 4 waivers for the construction of 59 two-story fee-simply townhomes within 9 buildings.
  1. Site Plan dated received October 20, 2020 revised and resubmitted on February 24, 2021.
  2. Landscape plans dated received October 20, 2020 revised and resubmitted on February 24,

2021.
3. Engineering plans dated received October 20, 2020 revised and resubmitted on January 15, 2021.
4. Architectural plans dated received October 20, 2020 revised and resubmitted on December 21, 2020.
5. Photometric plan dated received October 20, 2020 revised and resubmitted on December 21, 2020.
6. Boundary and topographic survey dated received October 20, 2020.
7. Traffic study.
8. Project narrative and Justification Statement of proposed use.
9. Drainage calculations dated received October 20, 2020 revised and resubmitted on December 21, 2020.
10. Common amenities detail plan.

X Recommendation

The applicant is proposing the development of the 4.73 acres parcel with the construction of 59 two-story fee-simple townhomes. The townhomes will be three-bedroom homes with a one car garage and a driveway with space for two cars. The buildings will be configured with five (5) 6-townhome units, three (3) 7-townhome units and one (1) 8-townhome units, for a total of nine (9) buildings. The community will have two access driveways via the existing Davis Road and Coconut Road right-of-way. Amenities include a tot lot with playground equipment, a shade structure, picnic table and sports field for lawn games.

Planning, Zoning & Building Staff has conducted a review of the application and found the proposed Residential Planned Development Site Plan to be consistent with goal, objectives and policies of the Village's Comprehensive Plan. The proposed project is generally consistent with the Land Development and zoning regulations and all other portions of the code. The proposed residential multi-family project provides internal sidewalk connections between the common amenities (tot lot with playground equipment, a shade structure, picnic table and sports field for lawn games) and the buildings, to facilitate pedestrian circulation and safety. The proposed project provides open spaces creating common areas for passive/leisure activities. The proposed use does not significantly reduce light and air on adjacent properties and would not be a deterrent to surrounding properties. The new project does not negatively impact natural systems.

A respectively 15' and 10' wide right-of-way, along Coconut Road and Davis Road, is required to be dedicated to Palm Beach County to comply with county standards.

In addition, the project exceeds some of the minimum requirement for a Planned Development as shown on the table below:

Land Development Regulations	Required	Proposed
35 percent of the gross land area for open space	68,302 sf (1.57 acres)	81,457 sf (1.87 acres)
40% maximum lot coverage	82,415 sf	50,000 sf

Planning, Zoning & Building Staff recommends approval of the Small-Scale Land Use Amendment and Rezoning. PZ&B Staff recommends conditional approval of the Residential Planned Development Site Plan with 4 waivers, for the construction of 59 two-story fee simple townhomes subject to the following forty-eight (48) conditions below and a suggestion for a voluntary monetary contribution, requested by the School District to mitigate school impacts:

1. Build out date December 31, 2025.
2. Notice of Actual Construction or Alteration form shall be filled out (form 7460) to determine if the project will be a hazard to air navigation, according to PBIA, and a final determination letter shall be provided to the Village at time of permitting.

3. Per Palm Beach Department of Airports request, each perspective tenant and/or purchaser within the ALUNZ must be informed that occasionally will observe aircraft arriving at and departing from Palm Beach County Park Airport, and shall be disclosed prior to a real estate contract. The condition will become inclusive in the contract's conditions and shall be noted in subsequent contracts. Condition shall be added into the HOA covenants/ deed restrictions document and provided to the Village at time of Platting.
4. The final plat shall be approved by the Village Council prior to issuance of a building permit.
5. The Final Plat shall be approved and recorded prior to any sales.
6. The common amenities (tot lot with playground equipment, a shade structure, picnic table and sports field for lawn games) shall be completed in their entirety, open for use and accessible to the residents, prior to the issuance of the 23rd Certificate of Occupancy (40% of the project)
7. The dedication of 10' and 15' along Davis Road and Coconut Road respectively via Right-of-way Deed to Palm Beach County free and clear of all encumbrances (to comply with county standards) shall be executed at time of platting.
8. An opaque fence shall be provided around the lift station supplemented with landscaping and details shall be provided at time of permitting.
9. A Utility/Civil Plan shall be approved by the Village Engineer and Palm Beach County Water Utility Department at time of permitting and shall be revised to match site plan.
10. Garages shall be used for parking only. The HOA covenants/ deed restrictions shall include prohibit the conversion of garages into habitable spaces or used as storage.
11. The HOA covenants/ deed restrictions shall prohibit the installation of any additional impervious or semi-impervious surface.
12. The HOA shall be responsible for all landscape maintenance, including, but not limited to, mowing of private yards and trimming the trees adjacent to L-12 Canal. Canopy trees adjacent to L-12 Canal shall not impede, under any circumstances, the access to the canal for maintenance. The HOA shall be responsible for the removal of the trash after the any lawn work concluded. (this shall be included in the HOA documents).
13. The HOA covenants/deed restrictions shall prohibit the installation of sheds, the parking of boats, commercial vehicles, or recreational vehicles anywhere inside the property. Parking of oversized vehicles that do not fit within the typical parking stall (9'x18.5') shall also be prohibited.
14. Any/all legal instrument recorded shall include deed restrictions on the lots as follows:
    a. Garages shall remain as garages and shall not be converted to habitable space.
    b. Only two vehicles shall be parked in the driveways overnight and shall not be permitted to park on or block any sidewalk or drive isles.
    c. There shall be no screen enclosures or additions permitted including screening the rear patios.
    d. There shall be no pools permitted.
    e. Boats, RV'S, or recreational vehicles shall only be permitted if parked in the garage.
    f. No additional impervious or semi-impervious surface.
15. Each perspective tenant and/or purchaser shall be advised of noise issued due to the Swap Shop.
16. The construction dumpster shall be only provided by Waste Pro USA who is under franchise Agreement with the Village.
17. Conditions of approval stated in Village Engineer's letter (Engenuity Group, Inc.) issued on January 11, 2021 shall be satisfied at time of Civil/Utility application review.
18. No parking shall be allowed, under any circumstances, along the drive isle. Residents and guest parking shall only occur within designated parking stalls, private driveways and private garages.
19. The 10' pipe easement shall be abandoned at time of platting.
20. At time of permitting, provide value of construction and number of construction jobs created to be included in CRA annual report.
21. A future signalized intersection at Davis Road and Lake Worth Road will facilitate access via the Davis Road project entrance – this entrance should be enhanced as the main ingress/egress for the project.
22. Any existing or proposed utility box/cabinet shall be screened from view, Staff recommends wrapping the cabinets/box with a match design accordingly with the existing/proposed location.

23. Any existing or proposed utility easement shall not overlap more than 5' the landscape buffer.
24. Proposed 6' Vinyl fence along Davis Road and Coconut Road ROW is not a preferrable material by the Village, Staff recommends providing more durable/resistant material to prevent unwanted pedestrian traffic.
25. The property owner shall post a notice of annual boundary school assignments for students from this development. The district will provide an 11' x 17' sign to be posted in a clear and visible location in all sales offices and models with the following:

"NOTICE TO HOMEBUYERS/TENANTS"

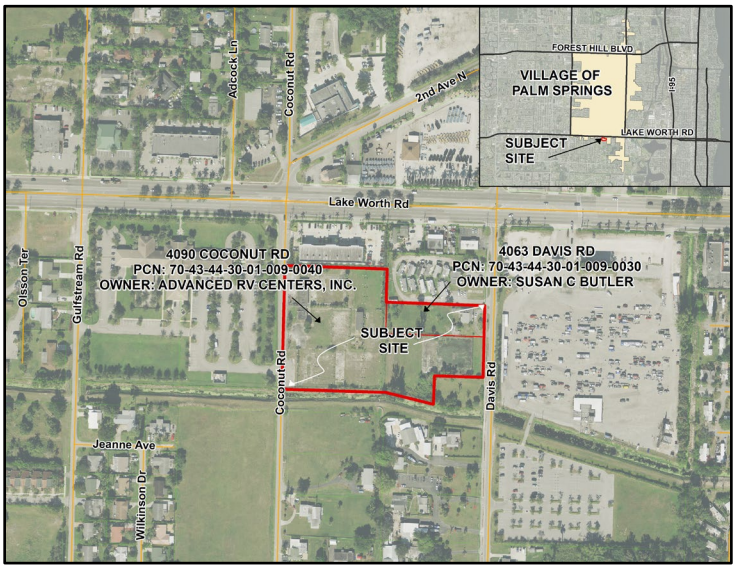
"school age children may not be assigned to the public school closest to their residences. School Board policies regarding overcrowding or other boundary policy decisions affect school boundaries. Please contact the Palm Beach School District Boundary Office at (561)434-8100 for the most current school assignment(s)".

26. Photometric plans shall be approved by the Planning, Zoning and Building Department at time of permitting.
27. Landscaped areas shall be irrigated including but not limited to buffer, islands, planter boxes, etc.
28. The mail pickup and delivery system shall be approved by the United States Postal Service.
29. Irrigation plans shall be provided at the time of permitting. Non-potable water shall be used for the irrigation system per Village code.
30. Provide permits from all applicable permitting agencies, including but not limited to, Lake Worth Drainage District, PBC and Village of Palm Springs at the time of permitting.
31. The property owner shall register an Agent of Record, prior to issuance of a permit, to establish a contact person responsible for compliance with this Development Order, including site plan/landscape plan details and conditions of approval.
32. A copy of the NPDES Notice of Intent for Generic Permit shall be submitted to the PZB Department at time of permitting.
33. A stabilized surface shall be provided at all time during construction for access by emergency vehicles.
34. All mechanical equipment's and above-ground infrastructure shall be screened from view.
35. The Applicant may be required to undertake additional security measures, based on the number of complaints or calls for service for incidents at the premises, as determined by the Police Chief. Such additional security measures, as approved by the Police Chief, may include increased on-site security at the operator's sole expense.
36. Verify utility and easement locations to ensure that there are no conflicts with landscaping, revise at time of permitting as needed.
37. All electric utilities shall be underground.
38. A pre-construction meeting shall be scheduled with the Village Planning, Zoning & Building Development Department prior to commencement of any construction activity. Permits are required from the Planning, Zoning & Building Department prior to commencing any construction or renovation. The project shall be constructed in accordance with the FBC edition in effect at the time of permitting.
39. A silt barrier shall be installed around the perimeter of the property (within the affected area for the site improvements and new building construction) prior to commencement of any site work or construction activity, and a track pad shall be installed at the construction entrance(s), both of which shall remain through substantial completion.
40. Any sidewalk broken or damaged during construction shall be replaced by the contractor prior to CO.
41. The Landscaping shall be certified by the Landscape Architect upon completion and prior to Certificate of Occupancy/Certificate of Completion of each improvement area.
42. Absolutely no occupancy, other than construction personnel, is permitted prior to TCO/CO.
43. Photometrics must be certified by an engineer prior to CO.
44. The civil engineer of record shall certify the site construction prior to Certificate of Occupancy.
45. The applicant may be required to provide a resident inspector for structural elements such as concrete pours in accordance with Section 109.1.3 FBC 2010 and F.S. 553.791. Determination shall be made at time of pre-construction conference with Planning Zoning and Building Director.
46. The General Contractor shall be on site during any and all construction activity in accordance with FS 489.1195.
47. The project shall receive approval from all Authorities Having Jurisdiction and submit copies of approvals to the Village of Palm Springs.

48. At the time of CO, the petitioner shall provide the Planning, Zoning and Building Department with electronic copies of as-builts.

49. The School District has requested the Applicant offer a voluntary commitment to make a contribution of $24,465.00 to the School District of Palm Beach County prior to issuance of a building permit, based on School Capacity Availability Determination letter issued on January 7, 2021.

JUSTIFICATION STATEMENT
FLU Map Amendment | Rezoning | Site Plan (Planned Development)
Fontana Townhomes
Initial Submittal: October 7, 2020
Resubmittal: November 23, 2020; December 21, 2020; January 15, 2021



REQUEST

On behalf of Meritage Homes of South Florida, the Applicant, WGI is requesting approval of the following:

1) **Future Land Use Map Amendment** from unincorporated Palm Beach County Urban Infill (UI) Future Land Use designation to the Village of Palm Springs High Density Residential Future Land Use.
2) **Rezoning** from unincorporated Palm Beach County UI zoning district to the Village of Palm Springs Residential Multifamily (RM) zoning district as a residential planned development.
3) **Site Plan (Planned Development)** to allow a 59 unit fee-simple townhouse residential planned development.
   - **Waivers** from the following development standards allowed as part of Planned Development Performance Standards:
     i. Drive aisle width adjacent to 90 degree parking.
     ii. Number of sidewalks along a street.
     iii. Minimum Lot Area
     iv. Side Setback

SITE CHARACTERISTICS

The 4.73 acre subject site, known as "Fontana Townhomes", is located approximately 0.1 miles south of the Davis Road and Lake Worth Road intersection on the west side of Davis Road. It is comprised of two parcels identified by Parcel Control Numbers (PCNs) 70-43-44-30-01-009-0030 and 70-43-44-30-01-009-0040. Both subject parcels retain an unincorporated Future Land Use (FLU) Designation of Urban Infill (UI) and are within the unincorporated UI Zoning district. While the parcels retain unincorporated FLU designations and zoning districts, they were recently annexed into the Village of Palm Springs and are thus under the jurisdiction of the Village of Palm Springs (herein referred to as "the Village"). The subject site is within the Palm Spring's Community Redevelopment Agency (CRA) district boundary and can be further categorized under the Village's Lake Worth Road CRA Subdistrict. The larger of the two parcels is a former recreational facility and is mostly vacant with numerous residual dilapidated facilities/structures remaining. The smaller of the two parcels is presently occupied by a single-family residential dwelling. A map has been provided below which identifies the subject sites location within the Village, as well as an adjacent parcels view which provides greater detail regarding the site characteristics and surrounding areas.

SURROUNDING PROPERTIES

The site is surrounded by a mix of uses, including a medical office, multifamily residential, single-family residential, and a flea-market/drive-in movie theater. The mix of surrounding uses adjacent to the subject site can generally be found to be consistent with the proposed development. A summary of the surrounding property information has been provided below.

	FLU Designation	Zoning District	Existing Use
North	CG (Village of Palm Springs)	CG (Village of Palm Springs)	Medical Office
	UI (Unincorporated)	UI (Unincorporated)	Mobile Home Park
South	MR-5 (Unincorporated)	RM (Unincorporated)	Vacant/Single-family Residential
East	CG (Village of Palm Springs)	CG (Village of Palm Springs)	Drive-in Movie Theater/Flea Market
West	MR-5 (Unincorporated)	PO (Unincorporated)	Government Center

DEVELOPMENT HISTORY

As previously mentioned, the subject site was recently annexed into the Village of Palm Springs. The annexation of the subject parcels was adopted in December 2017 and October 2019.

The largest of the two subject site parcels, is approximately four acres and was formerly a recreational facility. Palm Beach County (PBC) Petition Number 73-106, approved by Resolution No. 1973-429 by the PBC Board of County Commissioners (BCC) on August 7th, 1973 approved a Special Exception to allow a Tennis Recreation Facility. It is unclear how long the facility known as the *Lake Worth Racquet Club* was in operations and existed on the parcel, but aerial imagery and ownership information reflects that tennis facility site was no longer in operation by September 2000 as it was purchased by a Place of Worship entity, *Haitian Evangelical Crusade Association, Inc.* Subsequently, based on imagery, after the ownership change, many of the recreational facilities, such as tennis courts and a pool, were partially demolished but still remain on the site today in very poor condition.

According to PBC Planning & Zoning records, there were few inquiries to redevelop the tennis facility, but no formal requests were submitted.

The smaller of the two subject site parcels, is approximately 0.75 acres and presently accommodates a single family dwelling unit. No development history is associated with the single-family parcel other than the building information on file with the County, which indicates the home was built in 1946.

(This space is intentionally left blank.)

DISTRICT BOUNDARY CHANGES FUTURE LAND USE MAP AMENDMENT/REZONING

Pursuant to the review requirements provided in Section 34-602.-Land Development Board, the development proposal is consistent with said requirements as outlined below.

1. A statement of the petitioner's interest in the property to be rezoned, including a copy of the last recorded warranty deed. The following shall also be included, if applicable:

(a) If the interest is a joint and several ownership, a written consent to the rezoning petition by all parties of record.

(b) If the interest is a contract purchase, a copy of the purchase contract and written consent of the seller/owner.

(c) If an authorized agent is involved, a copy of the agency agreement or written consent of the principal/owner.

(d) If a lessee is involved, a copy of the lease agreement and written consent of the owner.

(e) If a corporation or other business entity is involved, the name of the officer or person responsible for the application and written proof that the representative has the delegated authority to represent the corporation or other business entity, or in lieu thereof, written proof that he is in fact an officer of the corporation.

Response: The Applicant has provided a copy of the Agency Agreement/written consent from the applicable property owners. A copy of the latest warranty deed applicable to each property owner has been provided for review.

2. A certified boundary survey by a surveyor registered in the state, at a scale prescribed by the village, containing the following:

(a) An accurate legal description of the property to be rezoned.

(b) A computation of the total acreage of the tract to the nearest one-tenth of an acre.

Response: A certified boundary survey by a surveyor registered in the state, at a scale prescribed by the Village has been provided as part of this land Use/district boundary change request. A legal description and computation of the total acreage of the tract to the nearest one-tenth of an acre have been provided within the survey.

3. The location of the subject parcel, plotted on an official base map, land development map or other acceptable map of the village.

Response: As identified on Page One of this Justification Statement, a location map of the subject site within the Village has been provided. Furthermore, a radius map and location maps have been included to further identify the location of the subject site.

4. A property owner's location drawing, showing all properties within 300 feet of the subject property and their relation to the subject parcel.

Response: As required by the Village to provide adjacent property owner information for Public Hearing applications/notices a location map showing all properties within 300 feet of the subject property and their relation to the subject site has been provided.

5. A statement of special reasons or the basis for the rezoning request, including the intended use of the property.

Response: As aforementioned, the subject parcels were recently annexed into the Village however they were never assigned a Village Land Use Designation or Zoning district. This request to allow a high density residential land use and RM zoning are necessary in order for the subject site to remain consistent with the surrounding area and to initiate any sort of development on the subject parcels.

6. A confirmation of the provisions of all necessary facilities and systems, and attested to by the applicant or authorized agent, for storm drainage, water supply, sewage treatment, solid waste disposal, public safety protection, recreational and park areas, school sites and any other services, where applicable.

Response: Due to the subject site being previously developed for an intense recreational facility, and also accommodating a residential dwelling unit, adequate provisions of all necessary facilities and systems will be achievable for the subject site.

As part of the required application, coordination has been initiated with the appropriate facilities and system providers in order to confirm adequate provisions can be provided to the subject site. Copies of all correspondence with providers has been included with this submittal, as well as any statements received.

7. Payment of a filing fee as established by the village.

Response: The filing fee associated with the Future Land Use Map Amendment and Rezoning portion of the request required by this section have been provided as part of this submittal.

CONSISTENCY WITH PALM SPRINGS CRA COMMUNITY REDEVELOPMENT PLAN

As aforementioned, the subject site is within the Palm Springs CRA, under the Lake Worth Road CRA subdistrict. Per the CRA Community Redevelopment Plan, new development applications must demonstrate consistency with the Plan. A description of the development's proposal consistency with the Community Redevelopment Plan can be found below.

1. Detailed Description of the Proposal's Consistency with Five (5) Key Goals of CRA

- **I. Improving Utilities and Infrastructure**

  Response: The development proposal will improve the Utilities and Infrastructure of the area, as improvements are necessary in order to construct the Townhouses.

- **II. Expanding Job Development and Economic Growth**

  Response: The development proposal will remain consistent with the CRA's key goal to expand job development and economic growth, as it will provide additional residents to supply the workforce and economy of the Village.

- **III. Enhancing Public Safety**

  Response: The development proposal will enhance public safety, as the subject site is currently abandoned and an ideal area for crime to occur due to its location adjacent to the LWDD canal and separation from Lake Worth Road. The development of buffers, fencing, and additional landscape screening around the perimeter of the subject site will significantly decrease the chance of any crime occurring on this property in the future.

- **IV. Increasing and Maintaining Workforce Housing**

  Response: While Workforce Housing is not a component of this development proposal, the overall nature of the development program will create an equal opportunity for all Village residents to increase home-ownership. Townhouses offer an affordable entry level homeownership opportunity. More ideal than renting and more achievable than purchasing a single-family residential house, the development proposal will provide much needed home options for residents of the Village.

- **V. Advancing the Partnership with Palm Beach County**

  Response: The development proposal will advance the partnership with Palm Beach County due to its location within the Hernden Park Countywide Community Revitalization Area (CCRT) neighborhood core area. The Countywide Community Revitalization Area's within Palm Beach County are overseen by the County's Office of Community Revitalization (OCR). This request will require the continued coordination with the County and surrounding Hernden Park residents to ensure the communities needs are met.

2. Proposal's effect on existing conditions (identified in CRA Community Redevelopment Plan) in the CRA District.

Response: As evidenced by the Lake Worth Road subdistrict study, the Lake Worth Road subdistrict is currently subject to slum/and or blighted conditions. Some of the existing conditions include faulty lot layout in relation to usefulness, inadequate building density patterns, and incidence of crime in the area higher than in the remainder of the county or municipality. This proposal will improve all of the aforementioned negative existing conditions on the subject site and in turn have an effect on the immediately surrounding area.

3. Proposal's ability to assist in achieving strategies and objectives of the Palm Springs CRA.

Response: The development proposal will assist in achieving strategies and objectives of the CRA as it addresses an existing blighted area within the Village. As evidenced by the subdistrict study, the Lake Worth Road subdistrict is subject to slum/and or blighted conditions. The subject site has sat abandoned for many years and allows for an incidence of crime in the area due to its ideal location next to the LWDD canal and separation from Lake Worth Road. Proposing a residential development such as the Fontana Townhomes development will assist in achieving the CRA's strategies to address blighted areas, by improving the area and discouraging criminal traffic.

DEVELOPMENT PROGRAM

The following outlines the development program for the proposed 59 unit multi-family residential townhouse development:

Density
The maximum density for the RM zoning district is 19 DU/AC. The proposed development remains consistent with the district's density regulations as a density of 12.5 DU/AC is proposed.

Building Height
Pursuant to Section 34-1064, the maximum height for a building within the residential planned development district shall be the same as allowed in the applicable land development district, or 35 feet, whichever is higher. The proposed RM zoning district and residential planned development height regulation remain consistent with one another, as three stories or 35 feet. The subject site is in compliance with this requirement as the proposed buildings are no more than 35 feet in height.

Minimum Acreage Requirement
The Village's code requirements state that all Residential Planned Developments shall be no less than three acres. The subject site is compliant with this requirement as it is 4.73 acres in size.

Open Space and Common Amenity Area
Pursuant to Section 34-1064(d) of the Village Code, a residential planned development is required to provide a minimum amount of open space and common amenity area. The minimum total open space requirement for residential planned developments shall be 35 percent of the gross land area, of which 20 percent shall be common amenity area. Based on the standard for required open space, the 4.73 acre subject site is required to provide 1.65 acres of open space. The subject site currently exceeds the code requirement for open space as 2.09 acres or 44 percent of the gross land are proposed to remain as open space. Of the 1.65 acre open space requirement, at least 20 percent of this area must be provided as a common amenity area to all lots such as parks, playgrounds, or other recreational purposes. Based on the open space land area requirement of 1.65 acres the subject site is required to provide 0.31 acres of common amenity area for the proposed community. This requirement is adequately satisfied, as 0.31 acres of common amenity area is proposed central to the community.

Lot Coverage
Pursuant to Sec. 34-1064(e)(2), all structures within a Residential Planned Developments shall have a maximum lot coverage of 40%, based on the net area of individual lots. The development proposal is compliant with this requirement as none of the proposed lots exceed 40% lot coverage.

Access
The subject site retains double frontage along Coconut Road and Davis Road. Two ingress/egress access points are proposed, one access point from Davis Road and another access point from Coconut Road. The two access points allow for increased circulation and flow of vehicular and pedestrian traffic throughout the subject site.

Buffering
Pursuant to Village Code *Article III*, *Section 34-162.-Required Landscaping,* in certain situations the Village requires landscaping around the perimeter of development parcels in order to create a buffer from adjoining land uses, streets and properties. The subject site is in compliance with this section of the Village's code as there is a 10 foot landscape buffer provided around the entirety of the subject site. This proposed perimeter buffer in conjunction with the adjacent properties' buffers will provide screening and will reduce the risk of any potential adverse impacts from the adjacent mobile home park and medical office developments to the north.

Waivers
As provided in Subdivision IX.-Planned Developments, the proposed residential planned development is subject to greater flexibility in design and development standards relative to specific dimensional regulations, in order to encourage ingenuity and originality in subdivision and site design while preserving open space to serve recreational, scenic and other public services. Therefore, this Subdivision of the Village's code allows for waivers from certain criteria. The waivers requested for the subject site, relate to the required sidewalk requirements, street width, and side setback requirements. The waiver details of these aforementioned requirements can be found within the subject site's *Conformance with Planned Development Code* section of this Justification Statement.

CONFORMANCE WITH PLANNED DEVELOPMENT CODE

As required by the Village's Development Application, demonstration must be provided that the proposed residential planned development is in conformance with the Planned Development Code Objectives and Performance Standards provided in Subdivision IX of the Village's Code. An outline of how the project conforms with standards has been provided below.

SEC. 41-1062 OBJECTIVES

1. ***To permit the creation of functional and unique residential, commercial and mixed-use developments that do not adversely impact the village's character and "small town feel".***

   Response: The proposed residential planned development is in conformance with this objective as the requested residential density of 12.5 dwelling units per acre (DU/AC) is not out of character for the surrounding area. The site is located in close proximity to many commercial services which will provide immediate service to future residents and create a functional balance between non-residential and residential uses. Furthermore, it is compatible with the surrounding residential land use designations to the north, east, south, and west. Therefore, by allowing for the approval of the proposed 59 dwelling unit townhouse development, the Village's "Small Town Feel" will not be adversely impacted.

2. ***To promote building siting that takes into consideration the context of the development, the location of nearby uses, and the new development's compatibility with existing neighborhoods.***

   Response: The site planning of the subject site took great consideration into the context of the development with the surrounding areas. The subject site's required dry detention areas and recreation area provide a great deal of open space and substantially less intensity, so they have been located adjacent to the southernmost property line which abuts residential on the opposite side of the LWDD L-12 Canal. This siting coupled with the canal along the southern property line provides for the utmost separation possible between the proposed townhouse development and neighboring single family residential.

3. ***To enhance landscaped open space and streetscapes.***

Response: The development proposal is consistent with the aforementioned objective as areas of the subject site will exceed landscaping requirements for open space and streetscapes.

4. ***To bring unique and creative solutions to new development, the following elements should be considered in the context of the specific site, project and/or use:***

   a) Arrangement and spacing of buildings and open spaces;
   b) Ability to aggregate adjacent lots or parcels, and/or eliminate nonconformities;
   c) Location of access drive and sidewalks to promote circulation and access;
   d) Building coverage;
   e) Sufficient and convenient parking for uses and activities;
   f) Landscape buffers and screening mechanisms to enhance aesthetics and promote compatibility
   g) Adequate lighting for security and pedestrian/vehicular safety; and
   h) Development of large employment centers predominately of light industrial or high technology uses in underutilized corridors. The flexibility of design should promote revitalization of the primary commercial areas and an economic stimulus through job creation to the local economy as well.

Response: The development proposal brings unique and creative solutions to new development, by remaining consistent with the aforementioned subobjectives. As previously mentioned, great consideration was given during the site planning of the subject site. The arrangement and spacing of buildings relative to open spaces was considered heavily to remain consistent with requirements such as the common amenity area requirements and to provide a better quality of living for future residents. Furthermore, the development proposal provides for a unique solution to develop a currently underutilized parcel by aggregating an adjacent single-family parcel rather than creating an enclave. As previously stated, the access drives have been located in a way to promote circulation and access of the unique double-frontage site. Each subobjective was weighed heavily as they relate to the specific subject site.

SEC. 34-1063 PERFORMANCE STANDARDS

The development proposal conforms with the performance standards for a Planned Development as outlined below.

Standards:

1. ***Sidewalks on both sides of a street or primary driveway, interconnected with other pedestrian-ways and/or providing access to each building.***

Response: The development proposal is proposing sidewalks along one side of the street to provide for a greater sense of open space and to utilize the subject site's potential to the greatest extent possible. The Planned Development code requires that sidewalks be required on both sides of the streets. While sidewalks are not provided on both sides of the streets, adequate pedestrian circulation and access throughout the subject site is still achieved through the use of a five foot wide sidewalk and crosswalks throughout. The proposal of one sidewalk rather than two is subject to a waiver.

2. ***Consolidation of smaller parcels into a larger, unified development project.***

Response: As aforementioned, consolidation of smaller parcels into a large, unified development project was incorporated into the planned development proposal. If the request were solely to develop the former tennis facility parcel, this would

result in an enclave of single-family residential. Therefore, the adjacent single-family lot is proposed to be consolidated with the larger parcel in order to provide a unified development and avoid any adverse impacts to the community.

3. ***Consolidation of driveways to eliminate curb cuts, with reciprocal easements for access; provision of access from secondary streets and alleys.***

   Response: The consolidation of driveways has been provided as evidenced within the provided site plan. Access from secondary streets and alleys is not appropriate for the subject site as Townhouse units are proposed, and the size of the subject site does not allow for the use of alleys and secondary streets.

4. ***Shared parking arrangements to reduce impervious surfaces and promote efficient* use *of facilities.***

   Response: As required by the Village's Parking Code, the subject site provides guest parking accommodations throughout the subject site. These guest parking locations were intentionally planned to be central to the entire development to promote efficient use by lots. Furthermore, this consideration allows for reduced impervious area as guest parking is not over abundant and throughout all areas of the subject site.

5. ***Provision of sufficient parking to avoid on-street parking, unless designed with on-street spaces.***

   Response: The subject site retains sufficient parking for the residential units per the Village's Code requirement of 2.5 spaces per unit. Parking spaces are provided for guest parking spaces as required by Village Code; the total parking provided is distributed throughout the development.

6. ***Pedestrian-scale street lighting along sidewalks and pedestrian ways.***

   Response: Street lighting will be provided along sidewalks and pedestrian-ways to create an appropriate pedestrian scale environment.

7. ***Aggregation of open space to create common areas of sufficient size for passive/leisure activities.***

   Response: The required 0.31 community amenity area is proposed to remain as one whole area located central to the development. By aggregating the amenity area into one tract rather than multiple smaller tracts throughout the subject site, the land will sufficiently be used for active and passive/leisure activities.

8. ***Continuity of sidewalks and pathways where disconnects occur; and provision of sidewalks to usable open spaces, recreation amenities or public facilities.***

   Response: As previously mentioned, crosswalks will be provided throughout the subject site to provide continuity of sidewalks and pathways where disconnects occur. The subject site has an extensive pedestrian circulation pattern which allows uninterrupted circulation from usable open spaces, recreation amenities, public facilities, and individual lots.

9. ***Residential setbacks that allow for a green, semi-private planting area between the sidewalk and house(s).***

   Response: The provided setbacks are proposed to allow for a green, semi-private planting area between the sidewalk and houses. Appropriate foundation planting has been planned to be incorporated into the individual lots.

10. ***Promote streetscape where feasible, with maintenance agreements assigning responsibility to adjacent properties.***

    Response: Streetscape is promoted throughout the subject site where feasible. This will be achieved through the use of pedestrian scale lighting, as previously mentioned, and by proposing appropriate landscaping to provide adequate streetscape.

11. ***Create bus waiting areas for safety, for school buses or mass transit, as may be applicable.***

    Response: As coordinated with Palm Beach County School Board, a 10'x15' school bus shelter has been provided along Davis Road.

12. ***Building stepbacks or setbacks to respect existing scale and massing of adjacent neighborhoods and promote compatibility.***

    Response: As aforementioned, the site was planned to provide the greatest amount of separation as possible from the least intense adjacent uses to the south. Much of the structures are massed closer to the northern boundary as the adjacent uses and structures are more compatible with the proposed townhouse structures.

13. ***Provision of original, self-confident building design, and prohibition of metal buildings.***

    Response: Metal buildings are not proposed as part of this development proposal. Original, self-confident building design is provided as the townhouse buildings are proposed to be contemporary modern.

14. ***Buffers between differing uses to include a masonry wall and landscaping to promote compatibility.***

    Response: As depicted in the site photos provided with this submittal, a masonry wall currently exists along the adjacent commercial property line to the north of the subject site. This wall is proposed to remain as is to provide further screening from the medical office use and to promote compatibility. As previously mentioned, a perimeter landscape buffer is proposed in conjunction with the neighboring medical office's landscape buffer to provide the utmost screening as possible.

15. ***Adequate vehicular circulation, traffic maintenance and/or operational measures that does not negatively impact existing roadway conditions, including avoidance of dead-end streets and t-style turnarounds.***

    Response: As aforementioned, the subject site is proposed to provide adequate vehicular circulation that does not negatively impact existing roadway conditions, including avoidance of dead-end streets and t-style turn arounds. Rather than providing access along one road, access along both frontages of the double frontage subject site is provided to negate the increased need for dead-end streets and t-style turn arounds that is commonly found in development patterns today.

WAIVERS

Pursuant to the Planned Development Performance standards of the Village's Code, the Applicant may utilize waivers to promote the use of innovative and creative techniques and concepts. As previously mentioned, waivers are requested for the development proposal to allow relief from certain requirements. The waivers requested have been outlined within the table below and meet the waiver criteria as identified within this *Waivers* section.

Waiver	Subject	Code Section	Required	Proposed	Deviation
1.	Street width adjacent to 90 degree parking	Sec. 34-1328	26’ wide drive aisle when adjacent to parking	20’ wide drive aisle when adjacent to parking	-6’
2.	Sidewalk	Sec. 34-1063(a)(1)	Sidewalk along both sides of Street	Sidewalk along one side of street	Single-sided sidewalk
3.	Side Setback	Sec. 34-1064(e)(1)(b)	20’	15’	-5’
4.	Min. Lot Area	Sec. 34-766(1)	547,000 SF / 12.55 AC.	205,881 SF / 4.73 AC.	-341,119 SF / -7.83 AC.

1. ***The request is in harmony with and is consistent with the purpose and intent of the Village's Comprehensive Plan and* Land *Development Code and that such waiver will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare.***

Waiver 1 Response: The request to allow a 20’ wide drive aisle when adjacent to 90 degree parking is in harmony and is consistent with the purpose and intent of the Village’s Comprehensive Plan and Land Development Code. The majority of the subject site is compliant with the required drive aisle dimensions, however there are seven 90 degree parking spaces in a portion of the site which require a 26’ wide drive aisle. This waiver will not be injurious to the area involved, as traffic can still safely maneuver into and out of the parking spaces.

Waiver 2 Response: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian connectivity will be provided.

Waiver 3 Response: The request to allow a reduced side setback is consistent with the purpose and intent of the Village’s Comprehensive Plan and Land Development Code, and will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. The subject area of this request is specific to lot 52, which is along the northern portion of the site. It is screened by the adjacent northern property by a 10’ landscape buffer and existing 6’ concrete wall. The request also applies to lots 14 and 15, along the southern portion of the site, adjacent to the LWDD L-12 Canal. These lots are screened by a 10’ landscape buffer with a 5’ vinyl fence.

Waiver 4 Response: The request to allow a reduced lot size from the required minimum lot requirements is outside of the Applicant’s control and will not affect the public health safety, and welfare.

2. The request results from innovative design in which other minimum standards are exceeded.

Waiver 1 Response: The request to allow a reduced drive aisle width when adjacent to 90 degree parking results from innovative design in which other minimum standards are exceeded. The subject site is compliant with the required drive aisle width in all other areas.

Waiver 2 Response: The request to allow a sidewalk along one side of the street where a sidewalk is required along both sides will not be injurious to the area involved or otherwise detrimental to the public health, safety, and welfare. As previously stated, this waiver will allow for greater flexibility in site design and adequate pedestrian continuity will be provided.

Waiver 3 Response: The request to allow a reduced side setback distance results from innovative design in which other minimum standards are exceeded. The areas of focus for the reduced side setback, currently propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

Waiver 4 Response: The request to allow a reduced lot size is not the result of innovative design. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

3. The request demonstrates that granting of the waiver will result in preservation of valuable natural resources, including drainage and recharge areas, natural areas, etc.

Waiver 1 Response: The granting of the waiver request related to reduced drive aisle width will result in the preservation of valuable natural resources. A narrower street width equates to less impervious area, as a result this will help preserve valuable natural resources.

Waiver 2 Response: The granting of the waiver request will result in the preservation of valuable natural resources, including drainage and recharge areas, and natural areas. As aforementioned, by negating the requirement for an extra sidewalk, this will allow for increased pervious areas throughout the subject site.

Waiver 3 Response: The reduced side setback will result in the preservation of valuable natural resources. This will be achieved, as the reduced setback will allow for greater design freedom and allow for more opportunity to preserve natural resources.

Waiver 4 Response: The request to allow a reduced lot size will not result in preservation of valuable natural resources. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

4. The request demonstrates public benefits to be derived, including but not limited to such benefits as dedication of rights-of-way, extensions of pedestrian linkages outside of the project boundaries, preservation of open areas and* use *of desirable architectural, building, and site design techniques.

Waiver 1 Response: The request will demonstrate public benefits such as desirable site design techniques. By allowing for a narrower drive aisle adjacent to parking spaces, there is room for more pervious area and potential open spaces. This will create a more desirable community for future residents.

Waiver 2 Response: The request will demonstrate public benefits such as extension of pedestrian linkages outside of the project boundaries. The subject site is located in an ideal area with close proximity (less than 300 feet) to the Lake Worth Road Corridor. The proposed sidewalk network will connect to the existing Davis Road sidewalk and allow walkability to the surrounding areas and services.

Waiver 3 Response: The waiver request will demonstrate public benefits such as desirable site design techniques and right-of-way dedication to the LWDD L-12 Canal. By allowing for a reduced side setback, the subject site will have more design freedoms to provide increased open space and additional drainage.

Waiver 4 Response: The request to allow a reduced lot size does not demonstrate public benefits to be derived. The lot is predisposed to be smaller than the required minimum and is outside of the control of the applicant.

5. The request provides sufficient screening and buffering to screen adjacent* uses *from adverse impacts caused by the granting of a waiver.

Waiver 1 Response: The request will not jeopardize the screening of the subject site as it relates to a decreased drive aisle width in a specific portion of the site.

Waiver 2 Response: This waiver request is specific to the pedestrian sidewalks within the subject site and would not adversely impact adjacent properties. However, appropriate landscape buffering and screening is provided.

Waiver 3 Response: The waiver request will provide sufficient screening and buffering to screen adjacent uses from any adverse impacts created by the reduced side setback. This reduced setback is specific to two areas of the subject site, which propose landscaping above code requirements and provide an existing 6' concrete wall and 5' vinyl fence.

Waiver 4 Response: The waiver does not generate any adverse impacts related to adjacent properties, however, the Applicant will sufficiently screen and buffer the property.

6. Economic issues may not be* used *to justify waivers.

Waiver Response: Economic issues are not used as a justification for these requests.

7. The request is compatible with existing and potential* land uses *adjacent to the development site.

Response: The request is consistent with the existing and potential land uses adjacent to the development site. A majority of the surrounding uses are residential communities which either provide one sidewalk or no sidewalks. There is a sidewalk along Davis Road which the subject site's sidewalk system will connect to. Overall, a waiver request for a decreased street width, single sidewalk, reduced side setback, and minimum lot area will not generate compatibility issues.

8. Waiver requests from minimum common amenity area requirements shall further demonstrate that adequate recreation area is available in the immediate vicinity of the proposed development.

Response: This criterion is not applicable as a waiver is not requested from the common amenity area requirements. The development proposal provides adequate community amenity area.

9. ***Waiver requests from maximum height limitations shall further demonstrate that the additional height will not adversely impact adjacent properties and appropriate setbacks are provided as building height increases.***

Response: This criterion is not applicable as a waiver is not requested from the height limitation requirements. The development proposal is currently under the maximum height threshold of three stories or 35 feet.

CONCLUSION

Based on the above justification and attached information, the petitioner respectfully requests approval of the Future Land Use Map Amendment, Rezoning, and Site Plan to allow a Residential Planned Development application for the subject site.

LANDSCAPE NOTES:

1. STRUCTURAL ELEMENTS AND HARDSCAPE FEATURES INDICATED ON LANDSCAPE PLANS ARE FOR INFORMATIONAL PURPOSES ONLY. LANDSCAPE PLANS ARE TO BE UTILIZED FOR LOCATION OF LIVING PLANT MATERIAL ONLY. LANDSCAPE PLANS SHOULD NOT BE UTILIZED FOR STAKING AND LAYOUT OR LOCATION OF ANY STRUCTURAL SITE FEATURES INCLUDING BUT NOT LIMITED TO: BUILDINGS, SIGNAGE, PATHWAYS, EASEMENTS, BERMS, WALL, FENCES, UTILITIES OR ROADWAYS.
2. CONTRACTOR SHALL ACQUIRE ALL APPLICABLE FEDERAL, STATE, LOCAL, JURISDICTIONAL OR UTILITY COMPANY PERMITS REQUIRED PRIOR TO REMOVAL, RELOCATION, AND/OR INSTALLATION OF LANDSCAPE MATERIALS INDICATED WITHIN PLAN DOCUMENTS. THE CONTRACTOR SHALL HAVE PERMITS "IN HAND" PRIOR TO STARTING WORK. LANDSCAPE ARCHITECT SHALL BEAR NO RESPONSIBILITY FOR WORK PERFORMED WITHOUT PERMITTED DRAWINGS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CHANGES TO THE WORK, AT NO ADDITIONAL COST TO THE OWNER, AS A RESULT OF UNAUTHORIZED WORK PRIOR TO RECEIPT OF PERMIT.
3. TREES SHOWN ON THIS PLAN ARE FOR GRAPHIC REPRESENTATION ONLY. TREE SPACING IS BASED ON DESIGN REQUIREMENTS AND THE TREES SHOWN ON THESE PLANS ATTEMPT TO ACCOMPLISH THAT SPACING WHILE MAINTAINING THE REQUIRED SETBACKS FROM UTILITIES. IN THE EVENT OF A CONFLICT, AFFECTED PLANT MATERIAL SHALL BE FIELD ADJUSTED WITH THE APPROVAL OF THE LANDSCAPE ARCHITECT TO AVOID CONFLICTS WITH THE WITH EXISTING AND PROPOSED UTILITIES, LIGHT POLES, DRAINAGE STRUCTURES OR LINES, LAKE MAINTENANCE EASEMENTS OR OTHER AFFECTED SITE FEATURES.
4. ANY PLANTING WITHIN THE SIGHT TRIANGLES SHALL PROVIDE UNOBSTRUCTED VIEWS AT A LEVEL BETWEEN 30" AND 8' ABOVE THE PAVEMENT.
5. ALL UTILITY BOXES/ STRUCTURES TO BE SCREENED ON 3 SIDES W/ APPROVED PLANTING MATERIAL.
6. IRRIGATION IS REQUIRED PROVIDING 100% COVERAGE WITH A MAXIMUM OF 50% OVERLAP, AN AUTOMATIC RAIN SENSOR MUST BE INCLUDED.
7. ALL PLANT MATERIAL TO BE INSTALLED SHALL CONFORM TO FLORIDA POWER AND LIGHT'S (FPL'S) RIGHT TREE RIGHT PLACE GUIDELINES.
8. IN CASE OF DISCREPANCIES PLANS TAKE PRECEDENCE OVER PLANT LIST.
9. LANDSCAPE CONTRACTOR RESPONSIBLE FOR VERIFICATION OF ALL QUANTITIES PRIOR TO BIDDING.
10. REMOVAL OF EXISTING VEGETATION IS RESPONSIBILITY OF LANDSCAPE CONTRACTOR.
11. RELOCATION OF EXISTING VEGETATION IS RESPONSIBILITY OF LANDSCAPE CONTRACTOR. REFER TO SPECIFICATIONS FOR RELOCATION INSTRUCTIONS.
12. ALL PLANT MATERIAL TO BE FLORIDA GRADE #1 AT TIME OF INSTALLATION UNLESS OTHERWISE NOTED.

Landscape Planting - Part I. General

I. Description of Work
A. Provide all exterior planting as shown on the drawings or inferable therefrom and/or as specified in accordance with the requirements of the Contract Documents. Landscape plans provided indicate the proposed location of living plant material only. Structural elements and hardscape features indicated on the landscape plans are for information purposes only. Landscape plans are not to be utilized for staking and layout or location of any structural site features including but not limited to, buildings, signage, pathways, easements, utilities or roadways.
B. These specifications include standards necessary for and incidental to the execution and completion of planting as indicated on the prepared drawings and specified herein.
C. All applicable federal, state and local permits shall be attained prior to the removal, relocation, or installation of plant materials indicated within the plan documents.
D. Protection of existing features. During construction, protect all existing trees, shrubs, and other specified vegetation, site features and improvements, structures, and utilities specified herein and/or on submitted drawings. Removal or destruction of existing plantings is prohibited unless specifically authorized by the owner, and with permit as required by associated federal, state and local government agencies.

II. Applicable Standards
A. American National Standards for Tree Care Operations, ANSI A300. American National Standards Institute, 11 West 42nd Street, New York, N.Y. 10036.
B. American Standard for Nursery Stock, ANSI Z60.1. American Nursery and Landscape Association, 1250 Eye Street. NW, Suite 500, Washington, D.C. 20005.
C. Hortus Third, The Staff of the L.H. Bailey Hortorium. 1976. MacMillan Publishing Co., New York.
D. Florida Department of Agriculture "Grades and Standards for Nursery Plants", most recent addition.
E. National Arborist Association- Pruning Standards for Shade Trees
F. All standards shall include the latest additions and amendments as of the date of advertisement for bids

III. Qualifications
A. Landscape planting and related work shall be performed by a firm with a minimum of five years experience specializing in this type of work. All contractors and their sub-contractors who will be performing any landscape work included in this section of the specification shall be approved by the landscape architect.
B. Landscape Contractor shall be licensed and shall carry any necessary insurance and shall protect the Landscape Architect and Owner against all liabilities, claims or demands for injuries or damage to any person or property growing out of the performance of the work under this contract. All workers shall be covered by Workman's Compensation Insurance.

IV. Requirements of Regulatory Agencies
A. Certificates of inspection shall accompany the invoice for each shipment of plants as may be required by law for transportation. File certificates with the landscape architect prior to acceptance of the material. Inspection by federal or state authorities at place of growth does not preclude rejection of the plants at the site.

V. Submittals
A. Manufacturer's Data: Submit copies of the manufacturer's and/or source data for all materials specified, including soils, soil amendments and fertilizer materials. Comply with regulations applicable to landscape materials.
B. Samples: Submit samples of all topsoil, soil mixes, mulches, and organic materials. Samples shall weigh 1 kg (2 lb) and be packaged in plastic bags. Samples shall be typical of the lot of material to be delivered to the site and provide an accurate indication of color, texture, and organic makeup of the material.
C. Nursery Sources: Submit a list of all nurseries that will supply plants, along with a list of the plants they will provide and the location of the nursery.
D. Soil Test: Submit soil test analysis report for each sample of topsoil and planting mix from a soil testing laboratory approved by the landscape architect.
1. Provide a particle size analysis, including the following gradient of mineral content:

USDA Designation	Size in mm
Gravel	+2 mm
Very Course Sand	1-2 mm
Coarse Sand	0.5-1 mm
Medium Sand	0.25-0.5 mm
Fine Sand	0.1-0.25 mm
Very fine sand	0.05-0.1 mm
Silt	0.002-0.05 mm
Clay	smaller than 0.002

2. Provide a chemical analysis, including the following:
a. pH and buffer pH
b. Percentage of organic content by oven-dried weight.
c. Nutrient levels by parts per million, including phosphorus, potassium magnesium, manganese, iron, zinc, and calcium. Nutrient test shall include the testing laboratory recommendations for supplemental additions to the soil based on the requirements of horticultural plants.
d. Soluble salt by electrical conductivity of a 1:2, soil: water, sample measured in millimho per cm.
e. Cation exchange capacity (CEC).
E. Material Testing: Submit the manufacturers particle size analysis, and the pH analysis and provide a description and source location for the content material of all organic materials.
F. Maintenance Instructions: Prior to the end of maintenance period, Landscape Contractor shall furnish three copies of written maintenance instructions to the Landscape Architect for transmittal to the Owner for maintenance and care of installed plants through their full growing season.

VI. Utility Verification
A. The contractor shall contact the local utility companies for verification of the location of all underground utility lines in the area of the work. The contractor shall be responsible for all damage resulting from neglect or failure to comply with this requirement.

Part 2. Materials

I. Plants
A. Plants shall be true to species and variety specified and nursery-grown in accordance with good horticultural practices under climatic conditions similar to those in the locality of the project for at least two years. They shall have been freshly dug.
1. All plant names and descriptions shall be as defined in Hortus Third.
2. All plants shall be grown and harvested in accordance with the American Standard for Nursery Stock and Florida Department of Agriculture Grades and Standards for Nursery Plants.
3. Unless approved by the landscape architect, plants shall have been grown at a latitude not more than 325 km (200 miles) north or south of the latitude of the project unless the provenance of the plant can be documented to be compatible with the latitude and cold hardiness zone of the planting location.
B. Unless specifically noted, all plants shall be exceptionally heavy, symmetrical, and so trained or favored in development and appearance as to be unquestionably and outstandingly superior in form, compactness, and symmetry. They shall be sound, healthy, vigorous, well branched, and densely foliated when in leaf; free of disease and insects, eggs, or larvae; and shall have healthy, well-developed root systems. They shall be free from physical damage or other conditions that would prevent vigorous growth.
1. Trees with multiple leaders, unless specified, will be rejected. Trees with a damaged or crooked leader, bark abrasions, sunscald, disfiguring knots, insect damage, or cuts of limbs over 20 mm (3/4 in.) in diameter that are not completely closed will be rejected.
C. Plants shall conform to the measurements specified, except that plants larger than those specified may be used if approved by the landscape architect. Use of larger plants shall not increase the contract price. If larger plants are approved, the root ball shall be increased in proportion to the size of the plant.
1. Caliper measurements shall be taken on the trunk 150 mm (6 in.) above the natural ground line for trees up to and including 100 mm (4 in.) in caliper, and 300 mm (12 in.) above the natural ground line for trees over 100 mm (4 in.) in caliper. Height and spread dimensions specified refer to the main body of the plant and not from branch tip to branch tip. Plants shall be measured when branches are in their normal position. If a range of sizes is given, no plant shall be less than the minimum size, and no less than 50 percent of the plants shall be as large as the maximum size specified. Measurements specified are minimum sizes acceptable after pruning, where pruning is required. Plants that meet measurements but do not possess a standard relationship between height and spread, according to the Florida Department of Agriculture Grades and Standards for Nursery Plants, shall be rejected.
D. Substitutions of plant materials will not be permitted unless authorized in writing by the landscape architect. If proof is submitted in writing that a plant specified is not obtainable, consideration will be given to the nearest available size or similar variety, with a corresponding adjustment of the contract price.
E. The plant schedule provided at the end of this section, or on the drawing, is for the contractor's information only, and no guarantee is expressed or implied that quantities therein are correct or that the list is complete. The contractor shall ensure that all plant materials shown on the drawings are included in his or her bid.
F. All plants shall be labeled by plant name. Labels shall be attached securely to all plants, bundles, and containers of plant materials when delivered. Plant labels shall be durable and legible, with information given in weather-resistant ink or embossed process lettering.
G. Selection and Tagging
1. Plants shall be subject to inspection for conformity to specification requirements and approval by the landscape architect at their place of growth and upon delivery. Such approval shall not impair the right of inspection and rejection during progress of the work.
2. A written request for the inspection of plant material at their place of growth shall be submitted to the landscape architect at least ten calendar days prior to digging. This request shall state the place of growth and the quantity of plants to be inspected. The landscape architect may refuse inspection at this time if, in his or her judgment, sufficient quantities of plants are not available for inspection or landscape architect deems inspection is not required.
3. All field grown deciduous trees shall be marked to indicate the trees north orientation in the nursery. Place a 1-in. diameter spot of white paint onto the north side of the tree trunk within the bottom 12 inches of the trunk.
H. Anti-Desiccants
1. Anti-desiccants, if specified, are to be applied to plants in full leaf immediately before digging or as required by the landscape architect. Anti-desiccants are to be sprayed so that all leaves and branches are covered with a continuous protective film.
I. Balled and Burlapped (B&B) Plant Materials
1. Trees designated B&B shall be properly dug with firm, natural balls of soil retaining as many fibrous roots as possible, in sizes and shapes as specified in the Florida Department of Agriculture Grades and Standards for Nursery Plants. Balls shall be firmly wrapped with synthetic, natural, or treated burlap, and/or wire. All synthetic fabric should be removed from the rootball prior to planting. True biodegradable burlap can be left around the root ball. The root collar shall be apparent at surface of ball. Trees with loose, broken, processed, or manufactured root balls will not be accepted, except with special written approval before planting.
J. Container Plants
1. Plants grown in containers shall be of appropriate size for the container as specified in the most recent edition of the Florida Department of Agriculture Grades and Standards for Nursery Plants and be free of circling roots on the exterior and interior of the root ball.
2. Container plants shall have been grown in the container long enough to have established roots throughout the growing medium.
K. Bareroot and Collected Plants
1. Plants designated as bareroot or collected plants shall conform to the American Standard for Nursery Stock.
2. Bareroot material shall not be dug or installed after bud break or before dormancy.
3. Collected plant material that has not been taken from active nursery operations shall be dug with a root ball spread at least 1/3 greater than nursery grown plants. When specified or approved, shall be in good health, free from disease, insect or weed infestation and shall not be planted before inspection and acceptance at the site. Testing may be required at the discretion of the Landscape Architect and/or the Owner and shall be provided at no additional cost.
L. Specimen Material: Plant material specified as specimens are to be approved by the Landscape Architect before being brought to the site. Unless otherwise noted on the drawings, these plants shall be Florida Fancy.
M. Palms
1. Coconut Palms shall be grown from a certified seed.
2. All palm species except Sabal palmetto shall have roots adequately wrapped before transporting.
3. Sabal palms shall have a hurricane cut. Sabal palms shall be installed on site at the earliest opportunity in the construction process. All Sabal palms shall be from Palm Beach County or other sandy soils. All Sabal palms shall be Florida Fancy.
4. For booted trunk palms, trunks shall have clean intact boots firmly attached to the palm trunk. For slick trunk palms, trunk shall be clear and free from defect and scars.
5. The Contractor shall treat all palms as required to prevent infestation by the palmetto weevil.
N. Sod
1. Sod shall be graded #1 or better. Sod shall be loam or muck grown with a firm, full texture and good root development. Sod shall be thick, healthy and free from defects and debris including but not limited to dead thatch, insects, fungus, diseases and contamination by weeds, other grass varieties or objectionable plant material.
2. Sod shall be sufficiently thick to insure a dense stand of live grass. Sod shall be live, fresh, and uninjured at the time of planting. Plant sod within 48 hours after harvesting.
3. Sod area shall be all areas not otherwise identified and shall include the area beyond the property line to the edge of pavement and/or edge of water.
O. Immediately after harvesting plants, protect from drying and damage until shipped and delivered to the planting site. Rootballs shall be checked regularly and watered sufficiently to maintain root viability.
P. Transportation and Storage of Plant Material
1. Branches shall be tied with rope or twine only, and in such a manner that no damage will occur to the bark or branches.
2. During transportation of plant material, the contractor shall exercise care to prevent injury and drying out of the trees. Should the roots be dried out, large branches broken, balls of earth broken or loosened, or areas of bark torn, the landscape architect may reject the injured tree(s) and order them replaced at no additional cost to the owner. All loads of plants shall be covered at all times with tarpaulin or canvas. Loads that are not protected will be rejected.
3. All bareroot stock sent from the storage facility shall be adequately covered with wet soil, sawdust, woodchips, moss, peat, straw, hay, or other acceptable moisture-holding medium, and shall be covered with a tarpaulin or canvas. Loads that are not protected in the above manner may be rejected.
4. Plants must be protected at all times from sun or drying winds. Those that cannot be planted immediately on delivery shall be kept in the shade, well protected with soil, wet mulch, or other acceptable material, and kept well watered. Plants shall not remain unplanted any longer than three days after delivery. Plants shall not be bound with wire or rope at any time so as to damage the bark or break branches. Plants shall be lifted and handled with suitable support of the soil ball to avoid damaging it.
Q. Mechanized Tree Spade Requirements
Trees may be moved and planted with an approved mechanical tree spade. The tree spade shall move trees limited to the maximum size allowed for a similar B&B root-ball diameter according to the American Standard for Nursery Stock or the manufacturer's maximum size recommendation for the tree spade being used, whichever is smaller. The machine shall be approved by the landscape architect prior to use. Trees shall be planted at the designated locations in the manner shown in the plans and in accordance with applicable sections of the specifications.

II Materials for Planting
A. Mulch: Except as otherwise specified, mulch shall be shredded Melaleuca mulch - grade "A". All Melaleuca mulch shall be made entirely from the wood and bark of the
Melaleuca quinquinerva tree. It shall not contain more than 10% bark (by volume). Shreds and chips shall not be larger the ¾" diameter and 1½" in length. Mulch shall
be free of weeds, seeds, and any other organic or inorganic material other than Melaleuca wood and bark. It shall not contain stones or other foreign material that will prevent its eventual decay. This shall be applied to all planted areas where indicated so that, after installation, the mulch thickness will not be less than 3". Submit sample for approval.
B. Peat: Shall be horticultural peat composed of not less than 60% decomposed organic matter by weight, on an oven dried basis. Peat shall be delivered to the site in a
workable condition free from lumps.
C. Gravel Mulch: Use only where specifically indicated on the plans of the size and type shown. Unless otherwise specified it shall be water-worn, hard durable gravel, washed free of loam, sand, clay and other foreign substances. It shall be a minimum of 3" deep and shall be contained with edging or other approved gravel stop as indicated on the plans. It shall be a maximum of 1 1/2", a minimum of 3/4" and of a readily-available natural gravel color range. Provide geotextile filter fabric below aggregate rock.
Submit sample for approval.
D. Root Barrier: Where specified, root barriers shall be installed on all tree and palm material in accordance with the root barrier detail provided within the plan drawings. Root barriers shall comply with all requirements of the municipality within which they are located as well as with any utility holder requirements of any affected utilities. In the event that conflicting requirements exist between the root barrier detail provided within the plan documents and the municipality/utility holder requirements, the more stringent of the requirements shall be applicable.
E. Planter Edging: Use only where specifically indicated on plans. Edging shall be the color black.
F. Anti-desiccant: shall be an emulsion specifically manufactured for agricultural use, which provides a protective film over plant surfaces. Anti-desiccants shall be delivered in containers of the manufacturer and shall be mixed according to the manufacturer's directions. Submit manufacturer literature for approval.

III. Materials for Soil Amendment
A. Pine Bark: Horticultural-grade milled pine bark, with 80 percent of the material by volume sized between 0.1 and 15.0 mm.
1. Pine bark shall be aged sufficiently to break down all woody material. Pine bark shall be screened.
2. pH shall range between 4 and 7.0.
3. Submit manufacturer literature for approval.
B. Organic Matter: Leaf matter and yard waste composted sufficiently to break down all woody fibers, seeds, and leaf structures, and free of toxic and nonorganic matter. Organic matter shall be commercially prepared compost. Submit 0.5 kg (1 lb) sample and suppliers literature for approval.
C. Course Sand: Course concrete sand, ASTM C-33 Fine Aggregate, with a Fines Modulus Index of 2.75 or greater.
1. Sands shall be clean, sharp, natural sands free of limestone, shale and slate particles.
2. Provide the following particle size distribution:

Sieve	Percentage Passing
3/8 in (9.5 mm)	100
No. 4 (4.75 mm)	95-100
No. 8 (2.36 mm)	80-100
No. 16 (1.18 mm)	50-85
No. 30 (0.60 mm)	25-60
No. 50 (0.30 mm)	10-30
No. 100 (0.15 mm)	2-10

D. Lime: shall be ground, palletized, or pulverized lime manufactured to meet agricultural standards and contain a maximum of 60 percent oxide (i.e. calcium oxide plus magnesium oxide). Submit manufacturer literature for approval.
E. Sulfur: shall be flowers of sulfur, palletized or granular sulfur, or iron sulfate. Submit manufacturer literature for approval.
F. Fertilizer: Agricultural fertilizer of a formula indicated by the soil test. Fertilizers shall be organic, slow-release compositions whenever applicable. Submit manufacturer literature for approval.

IV. Planting Mix
A. Planting Mix
1. Planting Mix for Trees, Shrubs, Groundcovers and vines: Check with landscape architect for appropriate mixture.
2. Planting Mix for Palms: Mixture of course sand and peat mixed to the following proportion:

Component	Percent by Volume
Coarse Sand	75%
Peat	25%

B. Planting mix shall be thoroughly mixed, screened, and shredded.
C. Prior to beginning the mixing process, submit a 1-kg (2-lb) sample of the proposed mix with soil test results that indicate the mix ratio and the results achieved.
D. During the mixing process but prior to installing the mix, submit a 1-kg (2-lb) sample for each 200 cubic meters (250 cubic yards) of planting mix, taken randomly from the finished soil mix, with soil test results for approval. In the event that the test results do not meet the required particle size distribution, remix and resubmit a revised planting mix.
E. Make all amendments of lime/sulfur and fertilizer indicated by the soil test results at the time of mixing.
F. All mixing shall take place in the contractors yard, using commercial mixing equipment sufficient to thoroughly mix all components uniformly
G. Protect the planting mix from erosion prior to installation.

Part 3. Execution

I. Excavation of Planted Areas
A. Locations for plants and/or outlines of areas to be planted are to be staked out at the site. Locate and mark all subsurface utility lines. Approval of the stakeout by the landscape architect is required before excavation begins.
B. Tree, shrub, and groundcover beds are to be excavated to the depth and widths indicated on the landscape plan detail drawings. If the planting area under any tree is initially dug too deep, the soil added to bring it up to the correct level should be thoroughly tamped.
1. The sides of the excavation of all planting areas shall be sloped at a 45 degrees. The bottom of all beds shall slope parallel to the proposed grades or toward any subsurface drain lines within the planting bed. The bottom of the planting bed directly under any tree shall be horizontal such that the tree sits plumb.
2. Maintain all required angles of repose of the adjacent materials as shown on the drawings. Do not excavate compacted subgrades of adjacent pavement or structures.
3. Subgrade soils shall be separated from the topsoil, removed from the area, and not used as backfill in any planted or lawn area. Excavations shall not be left uncovered or unprotected overnight.
C. For trees and shrubs planted in individual holes in areas of good soil that is to remain in place and/or to receive amendment in the top 150-mm (6 in.) layer, excavate the
hole to the depth of the root ball and to widths shown on the drawing. Slope the sides of the excavation at a 45 degree angle up and away from the bottom of the excavation.
1. In areas of slowly draining soils, the root ball may be set up to 75 mm (3 in.) or 1/8 of the depth of the root ball above the adjacent soil level.
2. Save the existing soil to be used as backfill around the tree.
3. On steep slopes, the depth of the excavation shall be measured at the center of the hole and the excavation dug as shown on the drawings.
D. Detrimental soil conditions: The landscape architect is to be notified, in writing, of soil conditions encountered, including poor drainage, that the contractor considers detrimental to the growth of plant material. When detrimental conditions are uncovered, planting shall be discontinued until instructions to resolve the conditions are received from the landscape architect.
E. Obstructions: If rock, underground construction work, utilities, tree roots, or other obstructions are encountered in the excavation of planting areas, alternate locations for
any planting shall be determined by the landscape architect.

II. Installation of Planting Mix
A. Prior to the installation of the planting mix, install subsurface drains, irrigation main lines, lateral lines, and irrigation risers shown on the drawings.
B. The landscape architect shall review the preparation of subgrades prior to the installation of planting mix.
C. Do not proceed with the installation of planting mix until all utility work in the area has been installed.
D. Protect adjacent walls, walks, and utilities from damage or staining by the soil. Use 12-mm (1/2 in.) plywood and/or plastic sheeting as directed to cover existing concrete,
metal, masonry work, and other items as directed during the progress of the work.
1. Clean up any soil or dirt spilled on any paved surface at the end of each working day.
2. Any damage to the paving or architectural work caused by the soils installation contractor shall be repaired by the general contractor at the soils installation contractors expense.
E. Till the subsoil into the bottom layer of topsoil or planting mix.
1. Loosen the soil of the subgrade to a depth of 50 to 75 mm (2 to 3 in.) with a rototiller or other suitable device.
2. Spread a layer of the specified topsoil or planting mix 50 mm (2 in.) deep over the subgrade. Thoroughly till the planting mix and the subgrade together.
3. Immediately install the remaining topsoil or planting mix in accordance with the following specifications. Protect the tilled area from traffic. DO NOT allow the tilled subgrade to become compacted.
4. In the event that the tilled area becomes compacted, till the area again prior to installing the planting mix.
F. Install the remaining topsoil or planting mix in 200- to 250-mm (8- to 10-in.) lifts to the depths and shown on the drawing details. The depths and grades shown on the drawings are the final grades after soil settlement and shrinkage of the organic material. The contractor shall install the soil at a higher level to anticipate this reduction of soil volume, depending on predicted settling properties for each type of soil.
1. Phase the installation of the soil such that equipment does not have to travel over already-installed topsoil or planting mixes.
2. Compact each lift sufficiently to reduce settling but not enough to prevent the movement of water and feeder roots through the soil. The soil in each lift should feel firm to the foot in all areas and make only slight heel prints. Overcompaction shall be determined by the following field percolation test.
a. Dig a hole 250 mm (10 in.) in diameter and 250 mm (10 in.) deep.
b. Fill the hole with water and let it drain completely. Immediately refill the hole with water, and measure the rate of fall in the water level.
c. In the event that the water drains at a rate less than 25 mm (1 in.) per hour, till the soil to a depth required to break the overcompaction.
d. The landscape architect shall determine the need for, and the number and location of percolation tests based on observed field conditions of the soil.
3. Maintain moisture conditions within the soils during installation to allow for satisfactory compaction. Suspend installation operations if the soil becomes wet. Do not place soils on wet subgrade.
4. Provide adequate equipment to achieve consistent and uniform compaction of the soils. Use the smallest equipment that can reasonably perform the task of spreading and compaction.
5. Add lime, sulfur, fertilizer, and other amendments during soil installation. Spread the amendments over the top layer of soil and till into the top 100 mm (4 in.) of soil. Soil amendments may be added at the same time that organic matter, when required, is added to the top layer of soil.
6. Protect soil from overcompaction after placement. An area that becomes overcompacted shall be tilled to a depth of 125 mm (6 in.). Uneven or settled areas shall be filled and regraded.

III. Fine Grading
A. It shall be the responsibility of the Contractor to finish grade (min. 6" below adjacent F.F.E.). Finish grades in planting areas shall be one inch lower than adjacent paving and are to include 3" of mulching. New earthwork shall blend smoothly into the existing earthwork, and grades shall pitch evenly between spot grades. All planted areas must pitch to drain at a minimum of 1/4" per foot. Any discrepancies not allowing this to occur shall be reported to the Landscape Architect prior to continuing work.
B. Fill all dips and remove any bumps in the overall plane of the slope.
1. The tolerance for dips and bumps in lawn areas shall be a 12-mm (1/2 in.) deviation from the plane in 3,000 mm (10 ft).
2. The tolerance for dips and bumps in shrub planting areas shall be a 25-mm (1 in.) deviation from the plane in 3,000 mm (10 ft).
3. All fine grading shall be inspected and approved by the landscape architect prior to planting, mulching, sodding, or seeding.
C. Berming shall not be placed within 10' of any existing tree nor will it be allowed to encroach upon any utility, drainage, or maintenance easement. Berming shall not impede or obstruct any necessary swales needed to drain other areas for the property.

IV. Planting Operations
A. Plants shall be set on flat-tamped or unexcavated pads at the same relationship to finished grade as they were to the ground from which they were dug, unless otherwise noted on the drawings. Plants must be set plumb and braced in position until topsoil or planting mix has been placed and tamped around the base of the root ball. Improper compacting of the soil around the root ball may result in the tree settling or leaning. Plants shall be set so that they will be at the same depth and so that the root ball does not shift or move laterally one year later.
1. Determine the elevation of the root flare and ensure that it is planted at grade. This may require that the tree be set higher than the grade in the nursery.
2. If the root flare is less than 50 mm (2 in.) below the soil level of the root ball, plant the tree the appropriate level above the grade to set the flare even with the grade. If the flare is more than 50 mm (2 in) at the center of the root ball the tree shall be rejected.
B. Lift plants only from the bottom of the root balls or with belts or lifting harnesses of sufficient width not to damage the root balls. Do not lift trees by their trunk or use the trunk as a lever in positioning or moving the tree in the planting area.
C. Remove plastic, paper, or fiber pots from containerized plant material. Pull roots out of the root mat. Loosen the potting medium and shake away from the root mat. Immediately after removing the container, install the plant such that the roots do not dry out. Pack planting mix around the exposed roots while planting.
D. The roots of bare-root trees shall be pruned at the time of planting to remove damaged or undesirable roots (those likely to become a detriment to future growth of the root system). Bare-root trees shall have the roots spread to approximate the natural position of the roots and shall be centered in the planting pit. The planting-soil backfill shall be worked firmly into and around the roots, with care taken to fill in completely with no air pockets.
E. Cut ropes or strings from the top of shrub root balls and trees smaller than 3 in. caliper after plant has been set. Remove burlap or cloth wrapping and any wire baskets from around top half of balls. Do not turn under and bury portions of burlap at top of ball.
1. Do not immediately remove the ropes and burlap from trees larger than 3 in. caliper. Return to each tree three months after planting and cut all ropes around the trunks and tops of the root balls of these trees.
2. Completely remove any waterproof or water-repellant strings or wrappings from the root ball and trunk before backfilling.
F. Set balled and burlapped trees in the hole with the north marker facing north unless otherwise approved by the landscape architect.
G. Place native soil, topsoil, or planting mix into the area around the tree, tamping lightly to reduce settlement.
1. For plants planted in individual holes in existing soil, add any required soil amendments to the soils, as the material is being backfilled around the plant. Ensure that the amendments are thoroughly mixed into the backfill.
2. For plants planted in large beds of prepared soil, add soil amendments during the soil installation process.
3. Ensure that the backfill immediately around the base of the root ball is tamped with foot pressure sufficient to prevent the root ball from shifting or leaning.
H. Solid sod shall be laid with closely abutting joints with a tamped or rolled, even surface. Stagger strips to offset joints in adjacent courses. Bring the sod edge in a neat, clean manner to the edge of all paving and shrub areas. Sod along slopes shall be pegged to hold sod in place along slopes or banks a wood peg acceptable to the Landscape Architect shall be used at no additional cost to the Owner. If, in the opinion of the Landscape Architect, top-dressing is necessary after rolling, clean sand will be evenly applied over the entire surface and thoroughly washed in without additional charge.
I. Thoroughly water all plants immediately after planting. Apply water by hose directly to the root ball and the adjacent soil.
J. Remove all tags, labels, strings, etc. from all plants.
K. Remove any excess soil, debris, and planting material from the job site at the end of each workday.
L. Form watering saucers 100 mm (4 in.) high immediately outside the area of the root ball of each tree as indicated on the drawings.

V. Relocation of Existing Material:
A. Landscape Contractor shall root prune trees which are to be relocated in accordance with approved horticultural practices and the following procedures.
1. Select a healthy tree
2. Selectively trim the canopy removing dead limbs, cross branching over crowned areas, and lower undesirable limbs. Fertilize and water trees before pruning.
3. Root prune 50% of the root system approximately 18"-2' deep (depending upon species and size). This is done by hand with sharp hand tools or a root pruning saw. The diameter of the root ball to be pruned is 8-12 inches per every one inch of diameter at breast height of the tree.
4. Back fill the existing soil with peat moss to stimulate new root growth of the pruned roots.
5. Water in thoroughly and treat with a mycorrhizae and a low nitrogen fertilizer (so not to burn the pruned roots). Brace trees if deemed necessary.
6. The root pruned tree should be watered every day (especially during warm months of the season), the equivalent of 5 gallons for every DBH of tree per day.
7. Root pruned trees should be let to stand for a minimum of 6 weeks for trees less than 8" DBH and as long as 3 months for larger specimens prior to transplanting.
8. For best results and survivorship, new root growth should be evident on root pruned trees prior to transplanting.
9. Upon transplanting, water should be applied every day as outlined in step 6 for at least one year.

VI. Staking and Guying
A. The Contractor shall stake all trees and palms in accordance with the tree and palm staking details provided within the plan drawings. Alternate methods of guying or staking may be employed with the prior approval of the Landscape Architect.
B. The Contractor shall be responsible for the replacement or adjustment of all trees, palms or shrubs that fall or lean during the guarantee period. The Contractor shall be responsible for any damage caused by the falling or leaning of trees.
C. Stakes and guys shall be installed immediately upon approval or planting, and shall be removed in accordance with the staking details provide within the plan drawings. Any tree that is not stable at the end of the warranty period shall be rejected.

VII. Pruning
A. Plants shall not be heavily pruned at the time of planting. Pruning is required at planting time to correct defects in the tree structure, including removal of injured branches, waterspouts, suckers, and interfering branches. Healthy lower branches and interior small twigs should not be removed except as necessary to clear walks and roads. In no case should more than one-quarter of the branching structure be removed. Retain the normal or natural shape of the plant.
B. All pruning shall be completed using clean, sharp tools. All cuts shall be clean and smooth, with the bark intact with no rough edges or tears.
C. Pruning of large trees shall be done from a hydraulic man-lift such that it is not necessary to climb the tree.

VIII. Mulching
A. All trees, palms, shrubs, and other plantings will be mulched with mulch previously approved by the landscape architect. The mulch shall be a minimum 3" thick layer over all tree, shrub and ground cover planting areas, unless otherwise specified. All mulch layers shall be of the specified thickness at the time of the final acceptance of the work. Mulch must not be placed within 3 inches of the trunks of trees, palms or shrubs.
B. Place mulch at least 3" in depth in a circle around all trees located in lawn areas. The diameter of the circle shall be 18" in diameter larger than the ball of the plant provided. Mulch must not be placed within 3 inches of the trunks of trees, palms or shrubs.

IX. Maintenance of Trees, Shrubs, and Vines
A. Maintenance shall begin immediately after each plant is planted and continue until its acceptance has been confirmed by the landscape architect.
B. Maintenance shall consist of pruning, watering, cultivating, weeding, mulching, fertilizing, tightening and repairing guys and stakes, resetting plants to proper grades or upright position, restoring of the planting saucer, and furnishing and applying such sprays or other materials as necessary to keep plantings free of insects and diseases and in vigorous condition.
C. Planting areas and plants shall be protected at all times against trespassing and damage of all kinds for the duration of the maintenance period. If a plant becomes damaged or injured, it shall be treated or replaced as directed by the landscape architect at no additional cost.
D. Watering: Contractor shall irrigate as required to maintain vigorous and healthy tree growth. Overwatering or flooding shall not be allowed. The contractor shall monitor, adjust, and use existing irrigation facilities, if available, and furnish any additional material, equipment, or water to ensure adequate irrigation. Root balls of all trees and large shrubs shall be spot watered using handheld hoses during the first four months after planting, as required to ensure adequate water within the root ball.
E. During periods of restricted water usage, all governmental regulations (permanent and temporary) shall be followed. The contractor may have to transport water from ponds or other sources, at no additional expense to the owner when irrigation systems are unavailable.
F. Remove soil ridges from around watering basins prior to end of maintenance period, as directed by Landscape Architect

X. Acceptance
A. The landscape architect shall inspect all work for acceptance upon written request of the contractor. The request shall be received at least ten calendar days before the anticipated date of inspection.
B. Acceptance of plant material shall be for general conformance to specified size, character, and quality and shall not relieve the contractor of responsibility for full conformance to the contract documents, including correct species.
C. Upon completion and re-inspection of all repairs or renewals necessary in the judgment of the landscape architect, the landscape architect shall certify in writing that the work has been accepted.

XI. Acceptance in Part
A. Work may be accepted in parts when the landscape architect and contractor deem that practice to be in their mutual interest. Approval must be given in writing by the landscape architect to the contractor verifying that the work is to be completed in parts. Acceptance of work in parts shall not waive any other provision of this contract.

XII. Guarantee Period and Replacements
A. The guarantee period for trees and shrubs shall begin at the date of acceptance.
B. The contractor shall guarantee all plant material to be in healthy and flourishing condition for a period of one year from the date of acceptance.
C. When work is accepted in parts, the guarantee periods extend from each of the partial acceptances to the terminal date of the guarantee of the last acceptance. Thus, all guarantee periods terminate at one time.
D. The contractor shall replace, without cost, as soon as weather conditions permit, and within a specified planting period, all plants determined by the landscape architect to be dead or in an unacceptable condition during and at the end of the guarantee period. To be considered acceptable, plants shall be free of dead or dying branches and branch tips and shall bear foliage of normal density, size, and color. Replacements shall closely match adjacent specimens of the same species. Replacements shall be subject to all requirements stated in this specification.
E. The guarantee of all replacement plants shall extend for an additional period of one year from the date of their acceptance after replacement. In the event that a replacement plant is not acceptable during or at the end of said extended guarantee period, the landscape architect may elect subsequent replacement or credit for that item.
F. At the end of the guarantee, the contractor shall reset grades that have settled below the proposed grades on the drawings.
G. The contractor shall make periodic inspections, at no extra cost, during the guarantee period to determine what changes, if any, should be made in the maintenance program. If changes are recommended, they shall be submitted in writing to the landscape architect. Claims by the contractor that the owners maintenance practices or lack of maintenance resulted in dead or dying plants will not be considered if such claims have not been documented by the contractor during the guarantee period.

XIII. Final Inspection and Final Acceptance
At the end of the guarantee period and upon written request of the contractor, the landscape architect will inspect all guaranteed work for final acceptance. The request shall be received at least ten calendar days before the anticipated date for final inspection. Upon completion and re-inspection of all repairs or renewals necessary in the judgment of the landscape architect at that time, the landscape architect shall certify, in writing, that the project has received final acceptance.

This document, together with the concepts and designs presented herein, as an instrument of service, is intended only for the specific purpose and client for which it was prepared. Reuse of and improper reliance on this document without written authorization and adaptation by Kimley–Horn and Associates, Inc. shall be without liability to Kimley–Horn and Associates, Inc.

GENERAL CONSTRUCTION NOTES

1. THE CONTRACTOR AND SUBCONTRACTORS SHALL OBTAIN A COPY OF THE FLORIDA DEPARTMENT OF TRANSPORTATION "STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION" (LATEST EDITION), AND BECOME FAMILIAR WITH THE CONTENTS PRIOR TO COMMENCING WORK.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR FURNISHING ALL MATERIAL AND LABOR TO CONSTRUCT THE FACILITY AS SHOWN AND DESCRIBED IN THE CONSTRUCTION DOCUMENTS IN ACCORDANCE WITH THE APPROPRIATE APPROVING AUTHORITIES, SPECIFICATIONS AND REQUIREMENTS. CONTRACTOR SHALL CLEAR AND GRUB ALL AREAS UNLESS OTHERWISE INDICATED, REMOVING TREES, STUMPS, ROOTS, MUCK, EXISTING PAVEMENT AND ALL OTHER DELETERIOUS MATERIAL.
3. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CONTACT THE VARIOUS UTILITY COMPANIES WHICH MAY HAVE BURIED OR AERIAL UTILITIES WITHIN OR NEAR THE CONSTRUCTION AREA BEFORE COMMENCING WORK. THE CONTRACTOR SHALL PROVIDE 2 WORKING DAYS MINIMUM NOTICE TO ALL UTILITY COMPANIES PRIOR TO BEGINNING CONSTRUCTION. THE CONTRACTOR MUST CALL THE UTILITY COMPANIES BEFORE COMMENCING WORK.
4. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL REQUIRED CONSTRUCTION PERMITS AND BONDS IF REQUIRED PRIOR TO CONSTRUCTION.
5. THE CONTRACTOR SHALL HAVE AVAILABLE AT THE JOB SITE AT ALL TIMES ONE COPY OF THE CONSTRUCTION DOCUMENTS INCLUDING PLANS, SPECIFICATIONS, AND SPECIAL CONDITIONS AND COPIES OF ANY REQUIRED CONSTRUCTION PERMITS.
6. ANY DISCREPANCIES ON THE DRAWINGS SHALL BE IMMEDIATELY BROUGHT TO THE ATTENTION OF THE OWNER AND ENGINEER BEFORE COMMENCING WORK. NO FIELD CHANGES OR DEVIATIONS FROM DESIGN ARE TO BE MADE WITHOUT PRIOR APPROVAL OF THE OWNER AND THE ENGINEER.
7. ALL COPIES OF COMPACTION, CONCRETE AND OTHER REQUIRED TEST RESULTS ARE TO BE SENT TO THE OWNER AND ENGINEER DIRECTLY FROM THE TESTING AGENCY.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SUBMITTING TO THE ENGINEER A CERTIFIED RECORD SURVEY SIGNED AND SEALED BY A PROFESSIONAL LAND SURVEYOR REGISTERED IN THE STATE OF FLORIDA DEPICTING THE ACTUAL FIELD LOCATION OF ALL CONSTRUCTED IMPROVEMENTS THAT ARE REQUIRED BY THE JURISDICTIONAL AGENCIES FOR THE CERTIFICATION PROCESS. ALL SURVEY COSTS WILL BE THE CONTRACTOR'S RESPONSIBILITY.
9. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DOCUMENTING AND MAINTAINING AS-BUILT INFORMATION WHICH SHALL BE RECORDED AS CONSTRUCTION PROGRESSES OR AT THE COMPLETION OF APPROPRIATE CONSTRUCTION INTERVALS AND SHALL BE RESPONSIBLE FOR PROVIDING AS-BUILT DRAWINGS TO THE OWNER FOR THE PURPOSE OF CERTIFICATION TO JURISDICTIONAL AGENCIES AS REQUIRED. ALL AS-BUILT DATA SHALL BE COLLECTED BY A STATE OF FLORIDA PROFESSIONAL LAND SURVEYOR WHOSE SERVICES ARE ENGAGED BY THE CONTRACTOR.
10. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THAT THE PROPOSED IMPROVEMENTS SHOWN ON THE PLANS DO NOT CONFLICT WITH ANY KNOWN EXISTING OR OTHER PROPOSED IMPROVEMENTS. IF ANY CONFLICTS ARE DISCOVERED, THE CONTRACTOR SHALL NOTIFY THE OWNER PRIOR TO INSTALLATION OF ANY PORTION OF THE SITE WORK THAT WOULD BE AFFECTED. FAILURE TO NOTIFY OWNER OF AN IDENTIFIABLE CONFLICT PRIOR TO PROCEEDING WITH INSTALLATION RELIEVES OWNER OF ANY OBLIGATION TO PAY FOR A RELATED CHANGE ORDER.
11. CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR VERIFYING ALL QUANTITIES, TAKE-OFF MEASUREMENTS, MATERIALS, ETC. DURING THE BID PROCESS WHEN DISCREPANCIES OCCUR, THE PHYSICAL PLAN TAKES PRECEDENCE. THE ENGINEER, LANDSCAPE ARCHITECT, COUNTY, CITY OR PROJECT MANAGERS ARE NOT TO BE HELD RESPONSIBLE FOR DISCREPANCIES TO THE SPECIFICATIONS OR PLANS.
12. THE CONTRACTOR SHALL LIMIT CONSTRUCTION OPERATIONS TO WITHIN THE LIMITS OF CONSTRUCTION. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR ANY DAMAGES OUTSIDE THE LIMITS OF CONSTRUCTION.
13. CONTRACTOR IS ADVISED THAT THE U.S. ENVIRONMENTAL PROTECTION AGENCY REQUIRES THAT ALL OPERATORS FILE A NOTICE OF INTENT (NOI) FOR STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITY UNDER THE NPDES GENERAL PERMIT PRIOR TO BEGINNING WORK. IT IS THE CONTRACTOR'S SOLE RESPONSIBILITY TO OBTAIN THE SAME. A COPY SHALL BE SENT TO THE ENGINEER OF RECORD, ARCHITECT OF RECORD AND THE OWNER.
14. FLORIDA LAW (F.S. 553.851) PROTECTION OF UNDERGROUND PIPELINES MANDATES THAT NO EXCAVATOR SHALL COMMENCE OR PERFORM ANY EXCAVATION WITHOUT FIRST OBTAINING INFORMATION CONCERNING THE POSSIBLE LOCATION OF GAS PIPELINES IN THE AREA OF PROPOSED EXCAVATION. THE EXCAVATOR MUST NOTIFY THE GAS UTILITY A MINIMUM OF 2 WORKING DAYS AND A MAXIMUM OF 5 WORKING DAYS PRIOR TO EXCAVATION.
15. THE CONTRACTOR SHALL BE RESPONSIBLE TO COORDINATE WITH THE LOCAL ELECTRICAL PROVIDER ON ANY WORK IN THE VICINITY OF OVERHEAD OR UNDERGROUND POWER LINES.
16. CONTRACTOR SHALL BE RESPONSIBLE FOR REVIEWING ALL PLANS RELATED TO SITE WORK INCLUDING (BUT NOT LIMITED TO) LANDSCAPE, IRRIGATION, SITE LIGHTING, BUILDING FOUNDATION, PLUMBING, FIRE SPRINKLER, AND OTHER APPLICABLE PLANS FOR CONFLICTING INFORMATION AND ALERT OWNER'S REPRESENTATIVE OF ANY CONFLICT FOR RESOLUTION.
17. CONTRACTOR SHALL VERIFY LOCATION OF ALL IRRIGATION, STREET LIGHTING, AND ELECTRICAL CONDUIT THAT WILL BE IN CONFLICT WITH ANY PROPOSED CONSTRUCTION AND SHALL RESOLVE CONFLICT ACCORDINGLY. COST OF CONFLICT RESOLUTION SHALL BE INCLUDED IN THE BID.
18. ANY DEBRIS RESULTING FROM STRIPPING AND DEMOLITION OPERATIONS SHALL BE REMOVED FROM THE SITE AT FREQUENT INTERVALS TO PREVENT THIS MATERIAL FROM ACCUMULATING ON SITE.
19. UPON REMOVAL OF TREES, SHRUBS OR ANY STUMP GRINDING, NO ROOT GREATER THAN THREE INCHES IN DIAMETER SHALL REMAIN WITHIN FIVE FEET OF AN UNDERGROUND STRUCTURE OR UTILITY LINE OR UNDER SLABS OR FOOTINGS OR PAVED AREAS.
20. THE CONTRACTOR SHALL RESTORE ALL DISTURBED VEGETATION IN KIND, UNLESS SHOWN OTHERWISE.
21. THE CONTRACTOR SHALL ENSURE THAT ANY TREE OR SHRUB PLACED WITHIN WATER, SEWER OR DRAINAGE EASEMENTS SHALL CONFORM TO THE VILLAGE OF PALM SPRINGS STANDARD DETAILS

PRECONSTRUCTION RESPONSIBILITIES

1. UPON RECEIPT OF NOTICE OF AWARD, THE CONTRACTOR SHALL ARRANGE A PRECONSTRUCTION CONFERENCE TO INCLUDE ALL INVOLVED GOVERNMENTAL AGENCIES, ALL AFFECTED UTILITY OWNERS, THE OWNER, THE ENGINEER AND ITSELF.
2. THE CONTRACTOR SHALL CONTACT 'SUNSHINE STATE ONE CALL OF FLORIDA, INC. (811)' AT LEAST 2 WORKING DAYS PRIOR TO BEGINNING ANY EXCAVATION.
3. PRIOR TO BEGINNING CONSTRUCTION, THE CONTRACTOR SHALL VERIFY THE SIZE, LOCATION, ELEVATION, AND MATERIAL OF ALL EXISTING UTILITIES WITHIN THE AREA OF CONSTRUCTION.
4. EXISTING UTILITY LOCATIONS SHOWN ON THESE PLANS ARE APPROXIMATE. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF EXISTING UTILITIES SHOWN OR FOR ANY EXISTING UTILITIES NOT SHOWN.
5. IF UPON EXCAVATION, AN EXISTING UTILITY IS FOUND TO BE IN CONFLICT WITH THE PROPOSED CONSTRUCTION OR TO BE OF A SIZE OR MATERIAL DIFFERENT FROM THAT SHOWN ON THE PLANS; THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER.

CONSTRUCTION SAFETY

ALL CONSTRUCTION SHALL BE DONE IN A SAFE MANNER, SPECIFICALLY, THE RULES AND REGULATIONS OF THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA), THE FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) AND THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES (MUTCD) SHALL BE STRICTLY OBSERVED.

UTILITIES

EXISTING UTILITIES SHOWN ARE LOCATED ACCORDING TO THE INFORMATION AVAILABLE TO THE ENGINEER AT THE TIME OF THE TOPOGRAPHIC SURVEY AND HAVE NOT BEEN INDEPENDENTLY VERIFIED BY THE OWNER OR THE ENGINEER. GUARANTEE IS NOT MADE THAT ALL EXISTING UNDERGROUND UTILITIES ARE SHOWN OR THAT THE LOCATION OF THOSE SHOWN ARE ENTIRELY ACCURATE. FINDING THE ACTUAL LOCATION OF ANY EXISTING UTILITIES IS THE CONTRACTOR'S RESPONSIBILITY AND SHALL BE DONE BEFORE HE COMMENCES ANY WORK IN THE VICINITY. FURTHERMORE, THE CONTRACTOR SHALL BE FULLY RESPONSIBLE FOR ANY AND ALL DAMAGES DUE TO THE CONTRACTOR'S FAILURE TO EXACTLY LOCATE AND PRESERVE ANY AND ALL UNDERGROUND UTILITIES. THE OWNER OR ENGINEER WILL ASSUME NO LIABILITY FOR ANY DAMAGES SUSTAINED OR COST INCURRED BECAUSE OF THE OPERATIONS IN THE VICINITY OF EXISTING UTILITIES OR STRUCTURES, NOR FOR TEMPORARY BRACING AND SHORING OF SAME. IF IT IS NECESSARY TO SHORE, BRACE, SWING OR RELOCATE A UTILITY, THE UTILITY COMPANY OR DEPARTMENT AFFECTED SHALL BE CONTACTED AND THEIR PERMISSION OBTAINED REGARDING THE METHOD TO USE FOR SUCH WORK.

EROSION CONTROL NOTES

1. THE STORM WATER POLLUTION PREVENTION PLAN ("SWPPP") IS COMPRISED OF THIS EROSION AND SEDIMENTATION CONTROL PLAN, THE STANDARD DETAILS, AND ALL SUBSEQUENT REPORTS AND RELATED DOCUMENTS PROVIDED BY THE CONTRACTOR.
2. ALL CONTRACTORS AND SUBCONTRACTORS INVOLVED WITH STORM WATER POLLUTION PREVENTION SHALL OBTAIN A COPY OF THE STORM WATER POLLUTION PREVENTION PLAN AND THE STATE OF FLORIDA NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM GENERAL PERMIT (NPDES PERMIT) AND BECOME FAMILIAR WITH THEIR CONTENTS.
3. THE CONTRACTOR SHALL IMPLEMENT BEST MANAGEMENT PRACTICES AS REQUIRED BY THE SWPPP. ADDITIONAL BEST MANAGEMENT PRACTICES SHALL BE IMPLEMENTED AS DICTATED BY CONDITIONS AT NO ADDITIONAL COST TO THE OWNER THROUGHOUT ALL PHASES OF CONSTRUCTION.
4. BEST MANAGEMENT PRACTICES (BMP'S) AND CONTROLS SHALL CONFORM TO FEDERAL, STATE, OR LOCAL REQUIREMENTS OR MANUAL OF PRACTICE, AS APPLICABLE. THE CONTRACTOR SHALL IMPLEMENT ADDITIONAL CONTROLS AS DIRECTED BY THE PERMITTING AGENCY OR OWNER.
5. EROSION AND SEDIMENTATION CONTROL PLAN MUST CLEARLY DELINEATE ALL STATE WATERS. PERMITS FOR ANY CONSTRUCTION ACTIVITY IMPACTING STATE WATERS OR REGULATED WETLANDS MUST BE MAINTAINED ON SITE AT ALL TIMES.
6. THE CONTRACTOR SHALL MINIMIZE CLEARING TO THE MAXIMUM EXTENT PRACTICAL OR AS REQUIRED BY THE GENERAL PERMIT.
7. CONTRACTOR SHALL DENOTE ON PLAN THE TEMPORARY PARKING AND STORAGE AREA WHICH SHALL ALSO BE USED AS THE EQUIPMENT MAINTENANCE AND CLEANING AREA, EMPLOYEE PARKING AREA, AND AREA FOR LOCATING PORTABLE FACILITIES, OFFICE TRAILERS, AND TOILET FACILITIES.
8. ALL WASH WATER (CONCRETE TRUCKS, VEHICLE CLEANING, EQUIPMENT CLEANING, ETC.) SHALL BE DETAINED AND PROPERLY TREATED OR DISPOSED.
9. SUFFICIENT OIL AND GREASE ABSORBING MATERIALS AND FLOTATION BOOMS SHALL BE MAINTAINED ON SITE OR READILY AVAILABLE TO CONTAIN AND CLEAN-UP FUEL OR CHEMICAL SPILLS AND LEAKS.
10. RUBBISH, TRASH, GARBAGE, LITTER, OR OTHER SUCH MATERIALS SHALL BE DEPOSITED INTO SEALED CONTAINERS. MATERIALS SHALL BE PREVENTED FROM LEAVING THE PREMISES THROUGH THE ACTION OF WIND OR STORM WATER DISCHARGE INTO DRAINAGE DITCHES OR WATERS OF THE STATE.
11. ALL STORM WATER POLLUTION PREVENTION MEASURES PRESENTED ON THE PLAN, SHALL BE INITIATED AS SOON AS PRACTICABLE.
12. STABILIZATION PRACTICES SHOULD BE INITIATED AS SOON AS PRACTICAL, BUT IN NO CASE MORE THAN 7 DAYS WHERE CONSTRUCTION HAS TEMPORARILY OR PERMANENTLY CEASED.
13. DISTURBED PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITY HAS PERMANENTLY STOPPED SHALL BE PERMANENTLY STABILIZED. THESE AREAS SHALL BE STABILIZED NO LATER THAN 7 DAYS AFTER THE LAST CONSTRUCTION ACTIVITY OCCURRED.
14. IF THE ACTION OF VEHICLES TRAVELING OVER THE GRAVEL CONSTRUCTION ENTRANCES IS NOT SUFFICIENT TO REMOVE THE MAJORITY OF DIRT OR MUD, THEN THE TIRES MUST BE WASHED BEFORE THE VEHICLES ENTER A PUBLIC ROAD. IF WASHING IS USED, PROVISIONS MUST BE MADE TO INTERCEPT THE WASH WATER AND TRAP THE SEDIMENT BEFORE IT IS CARRIED OFF THE SITE.
15. ALL MATERIALS SPILLED, DROPPED, WASHED, OR TRACKED FROM VEHICLES ONTO ROADWAYS OR INTO STORM DRAINS MUST BE REMOVED AS SOON AS POSSIBLE.
16. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVING SEDIMENT IN THE DETENTION POND AND ANY SEDIMENT THAT MAY HAVE COLLECTED IN THE STORM SEWER DRAINAGE SYSTEMS IN CONJUNCTION WITH THE STABILIZATION OF THE SITE.
17. ON-SITE & OFF-SITE SOIL STOCKPILE AND BORROW AREAS SHALL BE PROTECTED FROM EROSION AND SEDIMENTATION THROUGH IMPLEMENTATION OF BEST MANAGEMENT PRACTICES. STOCKPILE AND BORROW AREA LOCATIONS SHALL BE NOTED ON THE EROSION AND SEDIMENTATION CONTROL PLAN AND PERMITTED IN ACCORDANCE WITH GENERAL PERMIT REQUIREMENTS.
18. SLOPES SHALL BE LEFT IN A ROUGHENED CONDITION DURING THE GRADING PHASE TO REDUCE RUNOFF VELOCITIES AND EROSION.
19. DUE TO GRADE CHANGES DURING THE DEVELOPMENT OF THE PROJECT, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ADJUSTING THE EROSION CONTROL MEASURES AS NECESSARY AS CONSTRUCTION PROGRESSES (SILT FENCES, ETC.) TO PREVENT EROSION.
20. ALL CONSTRUCTION SHALL BE STABILIZED AT THE END OF EACH WORKING DAY, THIS INCLUDES BACK FILLING OF TRENCHES FOR UTILITY CONSTRUCTION AND PLACEMENT OF GRAVEL OR BITUMINOUS PAVING FOR ROAD CONSTRUCTION.
21. EROSION AND SEDIMENTATION CONTROL PLANS PROVIDED HEREIN ARE A GUIDELINE ONLY. THE CONTRACTOR IS RESPONSIBLE FOR PREPARING THE FINAL STORM WATER POLLUTION PREVENTION PLAN. THE PLAN SHALL BE SUBMITTED TO THE OWNER AND ENGINEER WHICH DEMONSTRATES THE MECHANISMS AND PRACTICES THAT WILL BE EMPLOYED TO PROTECT THE CONSTRUCTION SITE AND SURROUNDING AREA DURING CONSTRUCTION. THE PLAN SHALL BE CONSISTENT WITH FEDERAL NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES PERMIT REQUIREMENTS PERTAINING TO POLLUTION PREVENTION PLANS. THE PLAN SHALL INCLUDE, BUT NOT BE LIMITED TO, THE LOCATIONS OF SILT BARRIERS, TURBIDITY SCREENS OR TEMPORARY SHEETING, EMERGENCY RESPONSE PRACTICES, AND OTHER METHODS TO PREVENT POLLUTION. REFUELING OR STORAGE OF VEHICLES OR EQUIPMENT THAT UTILIZE PETROLEUM BASED PRODUCTS SHALL BE PROHIBITED ANYWHERE WITHIN 50 FEET OF A WATER'S EDGE. THE PLAN SHALL BE SUBMITTED TO THE OWNER AFTER NOTICE OF AWARD AND PRIOR TO NOTICE TO PROCEED. AFTER REVIEW BY OWNER THE PLAN SHALL BE FILED WITH ALL APPLICABLE REGULATORY AGENCIES BY THE CONTRACTOR. REFER TO FURTHER NOTES AND DETAILS WITHIN THESE DOCUMENTS.
22. SILT FENCE IS REQUIRED AS SHOWN ON THE PLANS AND ANYWHERE ADDITIONAL AS REQUIRED BY CONSTRUCTION. SILT FENCE IS NOT APPLICABLE IN PAVEMENT AREAS. LIMITS OF CONSTRUCTION SHOWN ARE DIAGRAMATIC. CONTRACTOR TO PROVIDE PLAN FOR SHOP DRAWING REVIEW.
23. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE CONTROL OF DUST AND DIRT RISING AND SCATTERING IN THE AIR DURING CONSTRUCTION AND SHALL PROVIDE WATER SPRINKLING OR OTHER SUITABLE METHODS OF CONTROL. THE USE OF MOTOR OILS AND OTHER PETROLEUM BASED OR TOXIC LIQUIDS FOR DUST SUPPRESSION OPERATIONS IS PROHIBITED. THE CONTRACTOR SHALL COMPLY WITH ALL GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION.

DEMOLITION NOTES

1. ALL MATERIAL REMOVED FROM THIS SITE BY THE CONTRACTOR SHALL BE DISPOSED OF BY THE CONTRACTOR IN A LEGAL MANNER.
2. REFER TO THE TOPOGRAPHIC SURVEY FOR ADDITIONAL DETAILS OF EXISTING STRUCTURES, ETC., LOCATED WITHIN THE PROJECT SITE. UNLESS OTHERWISE NOTED, ALL EXISTING BUILDINGS, STRUCTURES, SLABS, CONCRETE, ASPHALT, DEBRIS PILES, SIGNS, AND ALL APPURTENANCES ARE TO BE REMOVED FROM THE SITE BY THE CONTRACTOR AND PROPERLY DISPOSED OF IN A LEGAL MANNER AS PART OF THIS CONTRACT. SOME ITEMS TO BE REMOVED MAY NOT BE DEPICTED ON THE TOPOGRAPHIC SURVEY. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VISIT THE SITE AND DETERMINE THE FULL EXTENT OF ITEMS TO BE REMOVED. IF ANY ITEMS ARE IN QUESTION, THE CONTRACTOR SHALL CONTACT THE OWNER PRIOR TO REMOVAL OF SAID ITEMS.
3. THE CONTRACTOR SHALL REFER TO THE DEMOLITION PLAN AND LANDSCAPE PLAN FOR DEMOLITION/PRESERVATION OF EXISTING TREES. ALL TREES NOT SPECIFICALLY SHOWN TO BE REMOVED OR RELOCATED SHALL BE PRESERVED AS A PART OF THIS CONTRACT. TREE PROTECTION FENCING SHALL BE INSTALLED PRIOR TO ANY DEMOLITION. CONTRACTOR TO SEE LANDSCAPE PLAN FOR TREE PROTECTION REQUIREMENTS. ALL TREES TO REMAIN UNLESS OTHERWISE NOTED. CONTRACTOR TO NOTE EXISTING TREES TO REMAIN. SHOULD ANY TREE TO BE REMAIN BE DAMAGED BY THE CONTRACTOR, IT WILL REQUIRE REPLACEMENT IN KIND.

MAINTENANCE

1. ALL MEASURES STATED ON THE EROSION AND SEDIMENT CONTROL PLAN, AND IN THE STORM WATER POLLUTION PREVENTION PLAN, SHALL BE MAINTAINED IN FULLY FUNCTIONAL CONDITION UNTIL NO LONGER REQUIRED FOR A COMPLETED PHASE OF WORK OR FINAL STABILIZATION OF THE SITE. ALL EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE CHECKED BY A QUALIFIED PERSON AT LEAST ONCE EVERY SEVEN CALENDAR DAYS AND WITHIN 24 HOURS OF THE END OF A 0.5" RAINFALL EVENT, AND CLEANED AND REPAIRED IN ACCORDANCE WITH THE FOLLOWING:
2. INLET PROTECTION DEVICES AND BARRIERS SHALL BE REPAIRED OR REPLACED IF THEY SHOW SIGNS OF UNDERMINING, OR DETERIORATION. INLET PROTECTION DEVICES SHALL BE CLEANED OUT AT REGULAR INTERVALS OR AS THEY BECOME FULL OF DEBRIS.
3. ALL SEEDED AREAS SHALL BE CHECKED REGULARLY TO SEE THAT A GOOD STAND IS MAINTAINED. AREAS SHOULD BE FERTILIZED, WATERED AND RESEEDED AS NEEDED.
4. SILT FENCES SHALL BE REPAIRED TO THEIR ORIGINAL CONDITIONS IF DAMAGED. SEDIMENT SHALL BE REMOVED FROM THE SILT FENCES WHEN IT REACHES ONE-HALF THE HEIGHT OF THE SILT FENCE.
5. THE CONSTRUCTION ENTRANCES SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOW OF MUD ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING OF THE CONSTRUCTION ENTRANCES AS CONDITIONS DEMAND.
6. ALL MAINTENANCE OPERATIONS SHALL BE DONE IN A TIMELY MANNER BUT IN NO CASE LATER THAN 2 CALENDAR DAYS FOLLOWING THE INSPECTION.

INTERRUPTION OF EXISTING UTILITIES

ANY CONSTRUCTION WORK THAT REQUIRES INTERRUPTION OF SERVICE TO ANY CUSTOMER SHALL BE DONE SO WITH A MINIMUM OF SEVENTY-TWO (72) HOUR NOTICE TO, AND WRITTEN APPROVAL BY THE APPROPRIATE UTILITY COMPANY. THE CONTRACTOR SHALL ARRANGE A MEETING WITH THE LOCAL JURISDICTIONAL AGENCIES AND OTHER GOVERNING AGENCIES, AND OTHER AFFECTED UTILITIES PRIOR TO SCHEDULING THE SHUTDOWN TO ASSESS THE SCOPE OF WORK. ALL SYSTEM SHUT DOWNS SHALL BE SCHEDULED BY THE CONTRACTOR AT SUCH TIME THAT SYSTEM DEMAND IS LOW. THIS GENERALLY REQUIRES NIGHT TIME WORK BY THE CONTRACTOR AND REQUIRES FULL TIME INSPECTION BY A REPRESENTATIVE OF THE UTILITY. ALL COST FOR OVERTIME WORK BY THE REPRESENTATIVE OF THE UTILITY SHALL BE BORNE BY THE CONTRACTOR. EACH CUSTOMER AFFECTED BY THE SHUT DOWN SHALL BE PROVIDED, MINIMUM, FORTY-EIGHT (48) HOURS WRITTEN NOTIFICATION BY THE CONTRACTOR.

PAVING, GRADING AND DRAINAGE NOTES

1. ALL PAVING, CONSTRUCTION, MATERIALS, AND WORKMANSHIP WITHIN PUBLIC RIGHT-OF-WAY SHALL BE IN ACCORDANCE WITH LOCAL COUNTY OR STATE SPECIFICATIONS AND STANDARDS (LATEST EDITION) OR FDOT STANDARDS AND SPECIFICATIONS (LATEST EDITION) IF NOT COVERED BY LOCAL OR COUNTY REGULATIONS, WHICHEVER IS MOST RESTRICTIVE.
2. ALL UNPAVED AREAS DISTURBED BY CONSTRUCTION SHALL BE REGRADED AND SODDED, UNLESS OTHERWISE NOTED.
3. TRAFFIC CONTROL ON ALL FDOT, LOCAL AND COUNTY RIGHTS-OF-WAY SHALL MEET THE REQUIREMENTS OF THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES (U.S. DOT/FHA) AND THE REQUIREMENTS OF THE STATE AND ANY LOCAL AGENCY HAVING JURISDICTION. IN THE EVENT THAT THE CONTRACT DOCUMENTS AND THE JURISDICTIONAL AGENCY REQUIREMENTS ARE NOT IN AGREEMENT, THE MOST STRINGENT SHALL GOVERN.
4. THE CONTRACTOR SHALL GRADE THE SITE TO THE ELEVATIONS INDICATED AND SHALL REGRADE WASHOUTS WHERE THEY OCCUR AFTER EVERY RAINFALL UNTIL A GRASS STAND IS WELL ESTABLISHED OR ADEQUATE STABILIZATION OCCURS.
5. ALL OPEN AREAS WITHIN THE PROJECT SITE SHALL BE SODDED WITH BAHIA SOD UNLESS INDICATED OTHERWISE ON THE ENGINEERING OR LANDSCAPE PLANS.
6. ALL AREAS INDICATED AS PAVEMENT SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE TYPICAL PAVEMENT SECTIONS AS INDICATED ON THE DRAWINGS.
7. WHERE EXISTING PAVEMENT IS INDICATED TO BE REMOVED AND REPLACED, THE CONTRACTOR SHALL SAW CUT A MINIMUM 2" DEEP FOR A SMOOTH AND STRAIGHT JOINT AND REPLACE THE PAVEMENT WITH THE SAME TYPE AND DEPTH OF MATERIAL AS EXISTING OR AS INDICATED.
8. WHERE NEW PAVEMENT MEETS THE EXISTING PAVEMENT, THE CONTRACTOR SHALL SAW CUT THE EXISTING PAVEMENT A MINIMUM 2" DEEP FOR A SMOOTH AND STRAIGHT JOINT AND MATCH THE EXISTING PAVEMENT ELEVATION WITH THE PROPOSED PAVEMENT UNLESS OTHERWISE INDICATED.
9. THE CONTRACTOR SHALL INSTALL FILTER FABRIC OVER ALL DRAINAGE STRUCTURES FOR THE DURATION OF CONSTRUCTION AND UNTIL ACCEPTANCE OF THE PROJECT BY THE OWNER. ALL DRAINAGE STRUCTURES AND PIPES WITHIN THE LIMITS OF CONSTRUCTION SHALL BE CLEANED OF DEBRIS AS REQUIRED DURING AND AT THE END OF CONSTRUCTION TO PROVIDE POSITIVE DRAINAGE FLOWS.
10. IF DEWATERING IS REQUIRED, THE CONTRACTOR SHALL OBTAIN ANY APPLICABLE REQUIRED PERMITS. THE CONTRACTOR IS TO COORDINATE WITH THE OWNER AND THE ENGINEER PRIOR TO ANY EXCAVATION.
11. CONTRACTOR TO STRIP TOPSOIL AND ORGANIC MATTER FROM ALL AREAS OF THE SITE AS REQUIRED. IN SOME CASES TOPSOIL MAY BE STOCKPILED ON SITE FOR PLACEMENT WITHIN LANDSCAPED AREAS BUT ONLY AS DIRECTED BY THE OWNER.
12. FIELD DENSITY TESTS SHALL BE TAKEN AT INTERVALS IN ACCORDANCE WITH THE LOCAL JURISDICTIONAL AGENCY OR TO FDOT STANDARDS. IN THE EVENT THAT THE CONTRACT DOCUMENTS AND THE JURISDICTIONAL AGENCY REQUIREMENTS ARE NOT IN AGREEMENT, THE MOST STRINGENT SHALL GOVERN.
13. ALL SLOPES AND AREAS DISTURBED BY CONSTRUCTION SHALL BE GRADED AS PER PLANS. THE AREAS SHALL THEN BE SODDED AS SPECIFIED IN THE PLANS, FERTILIZED, MULCHED, WATERED, AND MAINTAINED UNTIL A GOOD STAND OF GRASS GROWTH IS ESTABLISHED IN ALL AREAS. ANY AREAS DISTURBED FOR ANY REASON PRIOR TO FINAL ACCEPTANCE OF THE JOB SHALL BE CORRECTED BY THE CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER.
14. ALL CUT OR FILL SLOPES SHALL BE 4 (HORIZONTAL) :1 (VERTICAL) OR FLATTER UNLESS OTHERWISE SHOWN.
15. THE CONTRACTOR SHALL ENSURE THAT ISLAND PLANTING AREAS AND OTHER PLANTING AREAS ARE NOT COMPACTED AND DO NOT CONTAIN ROAD BASE MATERIALS. THE CONTRACTOR SHALL ALSO EXCAVATE AND REMOVE ALL UNDESIRABLE MATERIAL FROM ALL AREAS ON THE SITE TO BE PLANTED AND PROPERLY DISPOSED OF IN A LEGAL MANNER.

WATER AND SEWER UTILITY NOTES

1. ALL CONSTRUCTION SHALL MEET OR EXCEED THE LOCAL WATER AND SEWER REQUIREMENTS AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REQUIREMENTS UNLESS OTHERWISE NOTED. IT IS THE CONTRACTOR'S RESPONSIBILITY TO OBTAIN THE SPECIFICATIONS AND DETAILS FROM THE LOCAL AGENCY.
2. THE CONTRACTOR SHALL CONSTRUCT GRAVITY SEWER LATERALS, MANHOLES AND GRAVITY SEWER LINES AS SHOWN ON THESE PLANS. THE CONTRACTOR SHALL FURNISH ALL NECESSARY MATERIALS, EQUIPMENT, MACHINERY, TOOLS, MEANS OF TRANSPORTATION AND LABOR NECESSARY TO COMPLETE THE WORK IN FULL AND COMPLETE ACCORDANCE WITH THE SHOWN, DESCRIBED AND REASONABLY INTENDED REQUIREMENTS OF THE CONTRACT DOCUMENTS AND JURISDICTIONAL AGENCY REQUIREMENTS. IN THE EVENT THAT THE CONTRACT DOCUMENTS AND THE JURISDICTIONAL AGENCY REQUIREMENTS ARE NOT IN AGREEMENT, THE MOST STRINGENT SHALL GOVERN.
3. EXISTING UTILITIES SHOWN ARE LOCATED ACCORDING TO THE INFORMATION AVAILABLE TO THE ENGINEER AT THE TIME OF THE TOPOGRAPHIC SURVEY AND HAVE NOT BEEN INDEPENDENTLY VERIFIED BY THE OWNER OR THE ENGINEER. GUARANTEE IS NOT MADE THAT ALL EXISTING UNDERGROUND UTILITIES ARE SHOWN OR THAT THE LOCATION OF THOSE SHOWN ARE ENTIRELY ACCURATE. FINDING THE ACTUAL LOCATION OF ANY EXISTING UTILITIES IS THE CONTRACTOR'S RESPONSIBILITY AND SHALL BE DONE BEFORE HE COMMENCES ANY WORK IN THE VICINITY. FURTHERMORE, THE CONTRACTOR SHALL BE FULLY RESPONSIBLE FOR ANY AND ALL DAMAGES DUE TO THE CONTRACTOR'S FAILURE TO EXACTLY LOCATE AND PRESERVE ANY AND ALL UNDERGROUND UTILITIES. THE OWNER OR ENGINEER WILL ASSUME NO LIABILITY FOR ANY DAMAGES SUSTAINED OR COST INCURRED BECAUSE OF THE OPERATIONS IN THE VICINITY OF EXISTING UTILITIES OR STRUCTURES, NOR FOR TEMPORARY BRACING AND SHORING OF SAME. IF IT IS NECESSARY TO SHORE, BRACE, SWING OR RELOCATE A UTILITY, THE UTILITY COMPANY OR DEPARTMENT AFFECTED SHALL BE CONTACTED AND THEIR PERMISSION OBTAINED REGARDING THE METHOD TO USE FOR SUCH WORK.
4. DEFLECTION OF PIPE JOINTS AND CURVATURE OF PIPE SHALL NOT EXCEED THE MANUFACTURER'S SPECIFICATIONS. SECURELY CLOSE ALL OPEN ENDS OF PIPE AND FITTINGS WITH A WATERTIGHT PLUG WHEN WORK IS NOT IN PROGRESS. THE INTERIOR OF ALL PIPES SHALL BE CLEAN AND JOINT SURFACES WIPED CLEAN AND DRY AFTER THE PIPE HAS BEEN LOWERED INTO THE TRENCH. VALVES SHALL BE PLUMB AND LOCATED ACCORDING TO THE PLANS.
5. ALL PHASES OF INSTALLATION, INCLUDING UNLOADING, TRENCHING, LAYING AND BACK FILLING, SHALL BE DONE IN A FIRST CLASS WORKMANLIKE MANNER. ALL PIPE AND FITTINGS SHALL BE CAREFULLY STORED FOLLOWING MANUFACTURER'S RECOMMENDATIONS. CARE SHALL BE TAKEN TO AVOID DAMAGE TO THE COATING OR LINING OF ANY D.I. PIPE FITTINGS. ANY PIPE OR FITTING WHICH IS DAMAGED OR WHICH HAS FLAWS OR IMPERF

TRENCH SAFETY ACT

1. CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR COMPLIANCE WITH THE STATE OF FLORIDA TRENCH SAFETY ACT.
2. WHERE EXCAVATIONS TO A DEPTH IN EXCESS OF FIVE FEET (5') ARE REQUIRED. THE CONTRACTOR SHALL INCLUDE THE FOLLOWING INFORMATION IN THE BID:
   A. A REFERENCE TO THE TRENCH SAFETY STANDARDS THAT WILL BE IN EFFECT DURING THE PERIOD OF CONSTRUCTION OF THE PROJECT.
   B. WRITTEN ASSURANCES BY THE CONTRACTOR PERFORMING THE TRENCH EXACTION THAT SUCH CONTRACTOR WILL COMPLY WITH THE APPLICABLE TRENCH SAFETY STANDARDS.
   C. A SEPARATE ITEM IDENTIFYING THE COST OF COMPLIANCE WITH THE APPLICABLE TRENCH SAFETY STANDARDS.
3. WHEN A BID IS NOT SUBMITTED, THE CONTRACTOR SHALL SUBMIT THE INFORMATION LISTED IN ITEM "2" TO THE ENGINEER PRIOR TO STARTING WORK.

SURVEY DATA

1. THE CONTRACTOR SHALL PROTECT ALL PERMANENT REFERENCE MONUMENTS AND TAKE ALL PRECAUTIONS NECESSARY TO AVOID DAMAGE TO SURVEY MAKERS DURING CONSTRUCTION. ANY SURVEY MARKERS DAMAGED DURING CONSTRUCTION WILL BE REPLACED AT THE EXPENSE OF THE CONTRACTOR.
2. BENCHMARK LOCATION AND ELEVATION ARE AS REPRESENTED BY SURVEYOR AT THE TIME OF SURVEY. CONTRACTOR SHALL VERIFY ITS CORRECTNESS AT TIME OF CONSTRUCTION.
3. ALL ELEVATIONS ON THE PLANS OR REFERENCED IN THE SPECIFICATIONS ARE BASED ON NAVD 1988 DATUM.

MINIMUM REQUIRED AS-BUILT INFORMATION

1. ALL AS-BUILT INFORMATION SUBMITTED TO THE ENGINEER SHALL BE SUFFICIENTLY ACCURATE, CLEAR, AND LEGIBLE TO SATISFY THE ENGINEER THAT THE INFORMATION PROVIDES A TRUE REPRESENTATION OF THE IMPROVEMENTS CONSTRUCTED.
2. STORM DRAINAGE:
   A. TOP ELEVATION OF EACH MANHOLE FRAME AND COVER / GRATE AS WELL ALL OTHER STRUCTURES (HEADWALLS, CONTROL STRUCTURES, ETC.).
   B. INVERT ELEVATION OF EACH LINE ENTERING AND LEAVING EACH STRUCTURE, INCLUDING UNDERDRAIN PIPES.
   C. INVERTS OF ALL MITERED END SECTIONS
   D. ACTUAL GRADE OF PIPE BETWEEN THE STRUCTURES
   E. INVERT ELEVATION AND TWO HORIZONTAL TIES FROM PERMANENT VISIBLE OBJECTS TO ALL STORM STUB-OUTS.
   F. CONTRACTOR SHALL PROVIDE ACCURATE AS-BUILT DIMENSIONS AND ELEVATIONS OF THE STORM WATER MANAGEMENT AREAS IMMEDIATELY AFTER FINAL GRADING AND PRIOR TO SEEDING OR SODDING OF THE SLOPES. AT A MINIMUM, THE CONTRACTOR SHALL PROVIDE CROSS SECTIONS ON ALL SIDES OF THE WATER MANAGEMENT AREAS AT 100-FOOT INTERVALS. THE CROSS SECTIONS SHALL BE PROVIDED FROM TOP OF BANK TO THE SLOPE BREAK BELOW CONTROL ELEVATION THE ENGINEER'S APPROVAL IS REQUIRED PRIOR TO GRASSING OF THE BANK. IF ANY MODIFICATIONS ARE SPECIFIED, ADDITIONAL AS-BUILTS MAY BE REQUIRED.
3. LOCATIONS AND DEPTHS OF UNDERGROUND UTILITIES.
4. REVISIONS TO ROUTING OF PIPING AND CONDUITS.
5. REVISIONS TO ELECTRICAL CIRCUITRY.
6. ACTUAL EQUIPMENT LOCATIONS.
7. CHANGES MADE BY CHANGE ORDER OR CONSTRUCTION CHANGE DIRECTIVE.
8. CHANGES MADE FOLLOWING ENGINEER'S WRITTEN ORDERS.
9. DETAILS NOT ON THE ORIGINAL CONTRACT DRAWINGS.
10. FIELD RECORDS FOR VARIABLE AND CONCEALED CONDITIONS.
11. ALL SLEEVES, FITTINGS, TEES, BENDS, VALVES, ETC. SHALL BE LOCATED BY STATION/OFFSET (OR METHOD APPROVED BY ENGINEER) AND ELEVATION OF TOP OF PIPE FOR ALL CONSTRUCTED SLEEVING. AS-BUILTS FOR ALL SLEEVING DEPICTING TOP OF PIPE AT 100-FOOT INTERVALS MUST BE PROVIDED.
12. RECORD DRAWINGS SHALL INDICATE AS-BUILT DATA FOR EVERY ELEVATION SHOWN ON THE PLANS.
13. IF A NEW BENCHMARK LOCATION IS ESTABLISHED, CONTRACTOR SHALL PROVIDE A BENCH LOOP CLOSURE TO THE CLOSEST EXISTING BENCHMARKS IN BOTH DIRECTIONS. ALL BENCHMARK DATA SHALL BE SUBMITTED BY A REGISTERED LAND SURVEYOR.
14. IDENTIFICATION OF ADDENDUM ITEMS ISSUED DURING BIDDING PERIOD.
15. THE CONTRACTOR IS RESPONSIBLE FOR ENSURING THAT ALL AS-BUILT DATA FOR UTILITIES AND SLEEVING IS COLLECTED PRIOR TO PAVEMENT SECTION CONSTRUCTION. PRELIMINARY UTILITY AS-BUILTS MUST BE PROVIDED TO THE ENGINEER FOR REVIEW PRIOR TO PAVEMENT SECTION CONSTRUCTION.
16. PRESSURE SYSTEMS (WATER):
   A. ACTUAL LENGTHS BETWEEN BRANCHES AND VALVES ALONG THE MAIN RUN.
   B. TOP OF PIPE AND FINISHED GRADE ELEVATIONS AT 100' INTERVALS.
   C. LOCATE WITH MEASUREMENTS FROM PERMANENT VISIBLE OBJECTS ALL FITTINGS/ACCESSORIES NOT VISIBLE FROM THE SURFACE (MINIMUM TWO POINT TIES).
   D. AS-BUILT INFORMATION SUBMITTED TO THE ENGINEER SHALL BE SUFFICIENTLY ACCURATE, CLEAR AND LEGIBLE TO SATISFY THE ENGINEER THAT THE INFORMATION PROVIDES A TRUE REPRESENTATION OF THE IMPROVEMENTS CONSTRUCTED.
   E. ALL AS-BUILT INFORMATION SUBMITTED TO THE ENGINEER SHALL BE SUFFICIENTLY ACCURATE, CLEAR AND LEGIBLE TO SATISFY THE ENGINEER THAT THE INFORMATION PROVIDES A TRUE REPRESENTATION OF THE IMPROVEMENTS CONSTRUCTED.
   F. UPON COMPLETION OF CONSTRUCTION, THE CONTRACTOR SHALL SUBMIT TO THE ENGINEER OF RECORD COMPLETE SETS OF AS-BUILT CONSTRUCTION DRAWINGS AS REQUIRED FOR SUBMITTAL AND APPROVAL. THESE DRAWINGS SHALL BE MARKED TO SHOW "AS-BUILT" CONSTRUCTION CHANGES AND DIMENSIONED LOCATIONS AND ELEVATIONS OF ALL IMPROVEMENTS AND SHALL BE SIGNED AND SEALED BY A FLORIDA REGISTERED LAND SURVEYOR.
   G. ALL OTHER REQUIRED PRESSURE PIPE INFORMATION IN ACCORDANCE WITH THE AS-BUILT REQUIREMENTS OF PALM BEACH COUNTY.
17. UTILITY CROSSING SEPARATION INFORMATION FOR THAT PROVIDED ON THE PLANS VERIFYING:
   A. SIZE AND MATERIAL OF CROSSING PIPES
   B. TOP ELEVATION OF BOTTOM PIPE
   C. BOTTOM ELEVATION OF TOP PIPE
   D. FINISH SURFACE ELEVATION OVER UTILITY CROSSING

DEMOLITION NOTES

1. ANY ITEMS TO REMAIN THAT ARE DAMAGED BY THE CONTRACTOR SHALL BE REPLACED TO THE EXISTING CONDITION OR BETTER AT THE CONTRACTOR'S EXPENSE.
2. REFER TO LANDSCAPE PLANS FOR TREE REMOVAL, RELOCATION, AND PROTECTION INFORMATION. ANY AREAS FOR LANDSCAPING SHALL HAVE ALL BASE AND SUBGRADE MATERIAL REMOVED TO A DEPTH OF 3 FEET.
3. ALL VALVE BOXES, MANHOLES, CATCH BASINS, AND OTHER ITEMS TO REMAIN SHALL BE ADJUSTED TO PROPOSED GRADE.
4. THE INTENT OF THE DEMOLITION PLAN IS TO DEPICT EXISTING FEATURES THAT ENCUMBER THE PROPOSED CONSTRUCTION AREA AND ARE SCHEDULED FOR REMOVAL. SOME INCIDENTAL ITEMS MAY HAVE BEEN INADVERTENTLY OMITTED FROM THE PLAN. THE CONTRACTOR IS ENCOURAGED TO THOROUGHLY INSPECT THE SITE AS WELL AS REVIEW THE PLANS AND SPECIFICATIONS PRIOR TO SUBMITTING PRICING. CONTRACTOR WILL NOT RECEIVE ADDITIONAL COMPENSATION FOR INCIDENTAL ITEMS NOT SHOWN ON THIS DEMOLITION PLAN.
5. THIS DEMOLITION PLAN IS BASED ON AVAILABLE UTILITY INFORMATION AND MAY OR MAY NOT BE ALL INCLUSIVE FOR THIS SITE. ANY UTILITIES ENCOUNTERED DURING DEMOLITION THAT ARE NOT DEPICTED/ADDRESSED ON THIS DRAWING SHOULD BE BROUGHT TO THE ATTENTION OF THE PROJECT ENGINEER IMMEDIATELY.
6. CONTRACTOR IS REQUIRED TO OBTAIN ALL DEMOLITION AND DEWATERING PERMITS, IF APPLICABLE.
7. ALL FEATURES IDENTIFIED ON THIS PLAN WHICH ARE LISTED TO BE DEMOLISHED ARE TO BE REMOVED FROM THE SITE AND DISPOSED OF IN A LEGAL MANNER.
8. CONTRACTOR SHALL LIMIT ALL DEMOLITION ACTIVITIES TO THOSE AREAS DELINEATED ON THE CONSTRUCTION DRAWINGS UNLESS OTHERWISE DIRECTED BY THE DEVELOPER OR AS REQUIRED FOR CONSTRUCTION OF IMPROVEMENTS.
9. CONTRACTOR IS RESPONSIBLE FOR CONTROLLING AIRBORNE DUST AND POLLUTANTS BY USING WATER SPRINKLING OR OTHER SUITABLE MEANS OF CONTROL.
10. CONTRACTOR TO USE CARE IN HANDLING DEBRIS FROM SITE TO ENSURE THE SAFETY OF THE PUBLIC. HAUL ROUTE TO BE CLOSELY MONITORED FOR DEBRIS OR MATERIALS TRACKED ONTO ADJOINING ROADWAYS, SIDEWALKS, ETC. ROADWAYS AND WALKWAYS TO BE CLEARED DAILY OR AS NECESSARY TO MAINTAIN PUBLIC SAFETY.
11. ALL ASPHALT TO BE REMOVED SHALL BE SAW CUT ADJACENT TO REMAINING IMPROVEMENTS.
12. WHERE REMAINING, INLETS, MANHOLE COVERS, AND VALVE COVERS TO BE PROTECTED IN PAVEMENT REMOVAL AREAS. CONTRACTOR SHALL REPLACE DAMAGED STRUCTURES AT THEIR EXPENSE.
13. CONTRACTOR MUST PROTECT THE PUBLIC AT ALL TIMES WITH FENCING, BARRICADES, ENCLOSURES, ETC. AS APPROVED BY THE VILLAGE OF PALM SPRINGS AND CONSTRUCTION MANAGER.
14. CONTINUOUS ACCESS SHALL BE MAINTAINED FOR SURROUNDING PROPERTIES AT ALL TIMES DURING DEMOLITION OF EXISTING FACILITIES AND CONSTRUCTION OF NEW FACILITIES. SIGNAGE SHALL BE POSTED TO DIRECT THE PUBLIC TO THE PATH OF TRAVEL.
15. REFER TO THE TOPOGRAPHIC SURVEY FOR ADDITIONAL DETAILS OF EXISTING STRUCTURES, ETC., LOCATED WITHIN THE PROJECT SITE. UNLESS OTHERWISE NOTED, ALL EXISTING BUILDINGS, STRUCTURES, SLABS, CONCRETE, ASPHALT, DEBRIS PILES, SIGNS, AND ALL APPURTENANCES ARE TO BE REMOVED FROM THE SITE BY THE CONTRACTOR AND PROPERLY DISPOSED OF IN A LEGAL MANNER AS PART OF THIS CONTRACT. SOME ITEMS TO BE REMOVED MAY NOT BE DEPICTED ON THE TOPOGRAPHIC SURVEY. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VISIT THE SITE AND DETERMINE THE FULL EXTENT OF ITEMS TO BE REMOVED. IF ANY ITEMS ARE IN QUESTION, THE CONTRACTOR SHALL CONTACT THE OWNER PRIOR TO REMOVAL OF SAID ITEMS.
16. ALL TREES NOT SPECIFICALLY SHOWN TO BE PRESERVED OR RELOCATED SHALL BE REMOVED AS A PART OF THIS CONTRACT. TREE PROTECTION FENCING SHALL BE INSTALLED PRIOR TO ANY DEMOLITION.
17. CONTRACTOR SHALL COORDINATE THE LIMITS OF UTILITY DEMOLITION WITH PROPOSED PLANS.

PLANS ARE IN NAVD 1988 DATUM

Always call 811 two full business days before you dig to have underground utilities located and marked.
Sunshine811.com

THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR ADDRESSING THIS ISSUE AND OBTAINING ALL NECESSARY PERMITS.

EROSION CONTROL NOTES

1. SEDIMENT BASINS AND TRAPS, PERIMETER DIKES, SEDIMENT BARRIERS AND OTHER MEASURES INTENDED TO TRAP SEDIMENT SHALL BE CONSTRUCTED AS A FIRST STEP IN ANY LAND DISTURBING ACTIVITY AND SHALL BE MADE FUNCTIONAL BEFORE UP-SLOPE LAND DISTURBANCE TAKES PLACE.
2. ALL SEDIMENT CONTROL MEASURES ARE TO BE ADJUSTED TO MEET FIELD CONDITIONS AT THE TIME OF CONSTRUCTION AND BE CONSTRUCTED PRIOR TO ANY GRADING OR DISTURBANCE OF EXISTING SURFACE MATERIAL ON BALANCE OF SITE. PERIMETER SEDIMENT BARRIERS SHALL BE CONSTRUCTED TO PREVENT SEDIMENT OR TRASH FROM FLOWING OR FLOATING ON TO ADJACENT PROPERTIES.
3. PERMANENT OR TEMPORARY SOIL STABILIZATION SHALL BE APPLIED TO DENUDED AREAS WITHIN SEVEN (7) DAYS AFTER FINAL GRADE IS REACHED ON ANY PORTION OF THE SITE. TEMPORARY SOIL STABILIZATION SHALL BE APPLIED WITHIN SEVEN (7) DAYS TO DENUDED AREAS THAT MAY NOT BE AT FINAL GRADE BUT WILL REMAIN UNDISTURBED FOR LONGER THAN 30 DAYS. PERMANENT STABILIZATION SHALL BE APPLIED TO AREAS THAT ARE TO BE LEFT UNDISTURBED FOR MORE THAN ONE YEAR.
4. DURING CONSTRUCTION OF THE PROJECT, SOIL STOCK PILES SHALL BE STABILIZED, COVERED OR CONTAINED WITH SEDIMENT TRAPPING MEASURES. THE APPLICANT IS RESPONSIBLE FOR THE TEMPORARY PROTECTION AND PERMANENT STABILIZATION OF ALL SOIL STOCKPILES ON SITE AS WELL AS SOIL INTENTIONALLY TRANSPORTED FROM THE PROJECT SITE.
5. A PERMANENT VEGETATIVE COVER SHALL BE ESTABLISHED ON DENUDED AREAS NOT OTHERWISE PERMANENTLY STABILIZED.
6. AFTER ANY SIGNIFICANT RAINFALL, SEDIMENT CONTROL STRUCTURES WILL BE INSPECTED FOR INTEGRITY. ANY DAMAGED DEVICES SHALL BE CORRECTED IMMEDIATELY.
7. CONCENTRATED RUNOFF SHALL NOT FLOW DOWN CUT OR FILL SLOPES UNLESS CONTAINED WITHIN AN ADEQUATE TEMPORARY OR PERMANENT CHANNEL, FLUME, SLOPE DRAIN STRUCTURE OR APPROVED CONTROL.
8. SEDIMENT WILL BE PREVENTED FROM ENTERING ANY STORM WATER SYSTEM, DITCH OR CHANNEL. ALL STORM WATER INLETS THAT ARE MADE OPERABLE DURING CONSTRUCTION SHALL BE PROTECTED SO THAT SEDIMENT-LADEN WATER CANNOT ENTER THE CONVEYANCE SYSTEM WITHOUT FIRST BEING FILTERED OR OTHERWISE TREATED TO REMOVE SEDIMENT.
9. WHEN WORK IN A LIVE WATERCOURSE IS PERFORMED, PRECAUTIONS SHALL BE TAKEN TO MINIMIZE ENCROACHMENT, CONTROL SEDIMENT TRANSPORT AND STABILIZE THE WORK AREA TO THE GREATEST EXTENT POSSIBLE DURING CONSTRUCTION.
10. PERIODIC INSPECTION AND MAINTENANCE OF ALL SEDIMENT CONTROL STRUCTURES MUST BE PROVIDED TO ENSURE INTENDED PURPOSE IS ACCOMPLISHED. THE DEVELOPER, OWNER AND/OR CONTRACTOR SHALL BE CONTINUALLY RESPONSIBLE FOR ALL SEDIMENT CONTROLS. SEDIMENT CONTROL MEASURES SHALL BE IN WORKING CONDITION AT THE END OF EACH WORKING DAY.
11. WHERE CONSTRUCTION VEHICLE ACCESS ROUTES INTERSECT PAVED PUBLIC ROADS, PROVISIONS SHALL BE MADE TO MINIMIZE THE TRANSPORT OF SEDIMENT BY TRACKING ONTO THE PAVED SURFACE. WHERE SEDIMENT IS TRANSPORTED ONTO A PUBLIC ROAD SURFACE WITH CURBS AND GUTTERS, THE ROAD SHALL BE CLEANED THOROUGHLY AT THE END OF EACH DAY. SEDIMENT SHALL BE REMOVED FROM THE ROADS BY SHOVELING OR SWEEPING AND TRANSPORTED TO A SEDIMENT CONTROL DISPOSAL AREA. STREET WASHING SHALL BE ALLOWED ONLY AFTER SEDIMENT IS REMOVED IN THIS MANNER. THIS PROVISION SHALL APPLY TO INDIVIDUAL SUBDIVISION LOTS AS WELL AS TO LARGER LAND DISTURBING ACTIVITIES.
12. ALL TEMPORARY EROSION AND SEDIMENT CONTROL MEASURES SHALL BE REMOVED WITHIN 30 DAYS AFTER FINAL SITE STABILIZATION OR AFTER THE TEMPORARY MEASURES ARE NO LONGER NEEDED.
13. PROPERTIES AND WATERWAYS DOWNSTREAM FROM CONSTRUCTION SITES SHALL BE PROTECTED FROM SEDIMENT DEPOSITION AND EROSION AT ALL TIMES DURING CONSTRUCTION.
14. EROSION CONTROL DESIGN AND CONSTRUCTION SHALL FOLLOW THE REQUIREMENTS IN INDEX NUMBERS 101, 102 AND 103 OF F.D.O.T. ROADWAY AND TRAFFIC DESIGN STANDARDS AND COUNTY PERMITS.
15. CONTRACTOR IS RESPONSIBLE FOR ALL SURFACE WATER DISCHARGES, RAINFALL RUN OFF OR DEWATERING ACTIVITIES.
16. CONTRACTOR MUST INCORPORATE ALL BMP'S NECESSARY TO MEET OR EXCEED STATE WATER QUALITY AND SWPPP REQUIREMENTS.
17. THE POLLUTION PREVENTION PLAN IS A MINIMUM GUIDELINE ONLY. ADDITIONAL BMP'S MAY BE NECESSARY AT CONTRACTOR'S EXPENSE.
18. NOI TO BE POSTED ON SITE.
19. DEWATERING ACTIVITIES:
    A. DISCHARGE MUST NOT EXCEED STATE WATER QUALITY STANDARDS.
    B. CONTRACTOR MUST HAVE A TRANSFERABLE SFWMD DEWATERING PERMIT.
    C. NO HYDRAULIC PUMPS MAY BE USED FOR DEWATERING UNLESS APPROVED BY THE WATER MANAGEMENT DISTRICT FOR THAT AREA.

SOIL EROSION/SEDIMENTATION CONTROL OPERATION TIME SCHEDULE

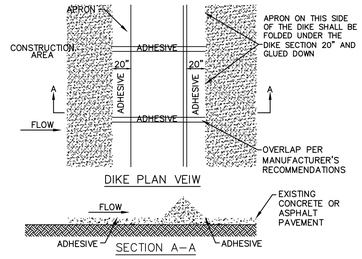
Reuse of and improper reliance on this document without written authorization and adaptation by Kimley-Horn and Associates, Inc. shall be without liability to Kimley-Horn and Associates, Inc.

1. EMPTY FILTER SACK WHEN BRIGHTLY COLORED EXPANSION RESTRAINT CAN NO LONGER BE SEEN.
2. GEOTEXTILE WILL BE A WOVEN POLYPROPYLENE FABRIC THAT MEETS OR EXCEEDS REQUIREMENTS IN THE SPECIFICATIONS TABLE.
3. AN OIL ADSORBENT PAD OR PILLOW CAN BE PURCHASED WHEN OIL SPILLS ARE A CONCERN.
4. INSPECT PER REGULATORY REQUIREMENTS.
5. THE WIDTH, "W", OF THE FILTER SACK WILL MATCH THE INSIDE WIDTH OF THE GRATED INLET BOX.
6. THE DEPTH, "D", OF THE FILTER SACK WILL BE BETWEEN 18 INCHES AND 36 INCHES.
7. THE LENGTH, "L", OF THE FILTER SACK WILL MATCH THE INSIDE LENGTH OF THE GRATED INLET BOX.



LOW TO MODERATE FLOW GEOTEXTILE FABRIC SPECIFICATION TABLE		
PROPERTIES	TEST METHOD	UNITS
GRAB TENSILE STRENGTH	ASTM D-4632	300 LBS

FILTER SACK INLET PROTECTION
NOT TO SCALE

K-H

NOTES:
1. INSTALLED SILT DIKE UNIT SHALL HAVE CONTINUOUS AND FIRM CONTACT WITH PAVEMENT.

2. ADHESIVES SHALL BE LIQUID NAIL OR APPROVED EQUAL FOR CONCRETE PAVEMENT APPLICATIONS AND EMULSIFIED ASPHALT FOR ASPHALT APPLICATIONS. ADHESIVE SHALL BE PLACED WHERE THE UNITS OVERLAP AND A 20" STRIP ALONG BOTH EDGES.

SILT DIKE ON EXISTING PAVEMENT
NOT TO SCALE

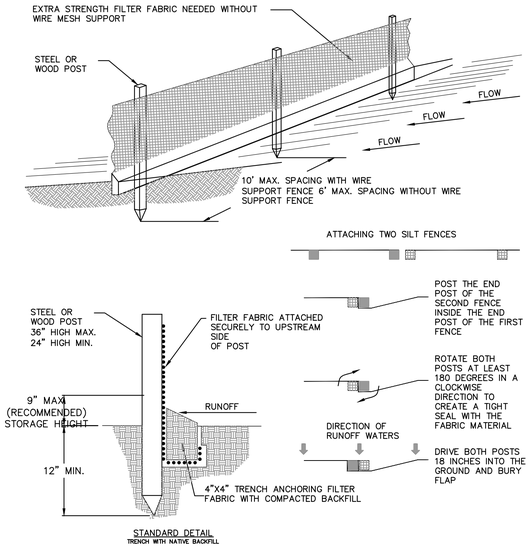
K-H

SEQUENCE OF CONSTRUCTION

UPON IMPLEMENTATION AND INSTALLATION OF THE FOLLOWNG AREAS: TRAILER, PARKING, LAYDOWN, PORTA-POTTY, WHEEL WASH, CONCRETE WASHOUT, FUEL AND MATERIAL STORAGE CONTAINERS, SOLID WASTE CONTAINERS, ETC., IMMEDIATELY DENOTE THEM ON THE SITE MAPS AND NOTE ANY CHANGES IN LOCATION AS THEY OCCUR THROUGHOUT THE CONSTRUCTION PROCESS.

PHASE 1:
1. CONSTRUCT STABILIZED CONSTRUCTION ENTRANCE AND INSTALL SILT FENCE, TURBIDITY BARRIER AND INLET PROTECTION.
2. PERFORM CLEARING AND GRUBBING AND DEMOLITION.

PHASE 2:
1. PERFORM MASS GRADING. ROUGH GRADE TO ESTABLISH PROPOSED DRAINAGE PATTERNS.
2. CONSTRUCT PROPOSED DRAINAGE INFRASTRUCTURE.
3. TEMPORARILY SEED WITH PURE LIVE SEED, THROUGHOUT CONSTRUCTION, DISTURBED AREAS THAT WILL BE INACTIVE FOR 7 DAYS OR MORE OR AS REQUIRED BY GENERIC PERMIT.
4. CONSTRUCT PROPOSED IMPROVEMENTS.
5. COMPLETE FINAL GRADING AND FINAL STABILIZATION.
6. REMOVE TEMPORARY EROSION CONTROL MEASURES.



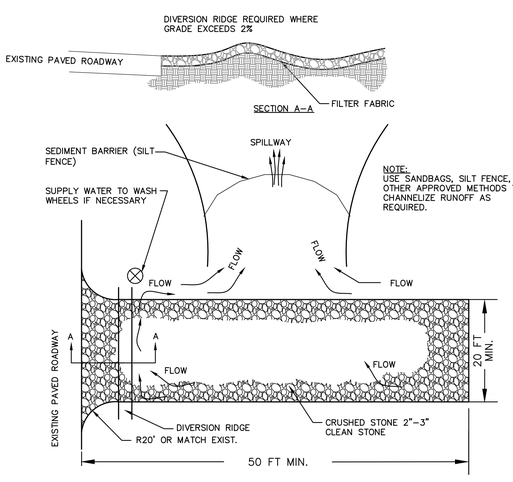
MAINTENANCE (ALL PHASES)

ALL MEASURES STATED ON THIS SITE MAP, AND IN THE STORM WATER POLLUTION PREVENTION PLAN, SHALL BE MAINTAINED IN FULLY FUNCTIONAL CONDITION UNTIL NO LONGER REQUIRED FOR A COMPLETED PHASE OF WORK OR FINAL STABILIZATION OF THE SITE. ALL EROSION AND SEDIMENTATION CONTROL MEASURES AND PRACTICES WHETHER TEMPORARY OR PERMANENT, SHALL BE AT ALL TIMES THE RESPONSIBILITY OF THE CONTRACTOR/PRIMARY PERMITEE. THESE MEASURES SHALL BE CHECKED BY A QUALIFIED PERSON IN ACCORDANCE WITH THE CONTRACT DOCUMENTS OR THE APPLICABLE PERMIT, WHICHEVER IS MORE STRINGENT, AND REPAIRED IN ACCORDANCE WITH THE FOLLOWING:

1. INLET PROTECTION DEVICES AND BARRIERS SHALL BE REPAIRED OR REPLACED IF THEY SHOW SIGNS OF UNDERMINING OR DETERIORATION.
2. ALL SEEDED AREAS SHALL BE CHECKED REGULARLY TO SEE THAT A GOOD STAND IS MAINTAINED. AREAS SHOULD BE FERTILIZED, WATERED, AND RESEEDED AS NEEDED.
3. SILT FENCES SHALL BE REPAIRED TO THEIR ORIGINAL CONDITIONS IF DAMAGED. SEDIMENT SHALL BE REMOVED FROM THE SILT FENCES WHEN IT REACHES ONE-HALF THE HEIGHT OF THE SILT FENCE.
4. THE CONSTRUCTION EXITS SHALL BE MAINTAINED IN A CONDITION WHICH WILL PREVENT TRACKING OR FLOW OF MUD ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING OF THE CONSTRUCTION EXITS AS CONDITIONS DEMAND.
5. THE TEMPORARY PARKING AND STORAGE AREA SHALL BE KEPT IN GOOD CONDITION (SUITABLE FOR PARKING AND STORAGE). THIS MAY REQUIRE PERIODIC TOP DRESSING OF THE TEMPORARY PARKING AREA AS CONDITIONS DEMAND.

NOTES

1. CONTRACTOR TO CONSIDER POTENTIAL DEWATERING ACTIVITIES WHEN PREPARING BID DOCUMENTS FOR THIS PROJECT.
2. CONTRACTOR SHALL OBTAIN ANY NECESSARY DEWATERING PERMITS AS SITE CONDITIONS AND CONSTRUCTION ACTIVITIES REQUIRE.
3. CONTRACTOR TO USE B.M.P.'S TO ENSURE COMPLIANCE WITH NPDES AND WATER MANAGEMENT DISTRICT REGULATIONS FOR STORMWATER DISCHARGE FROM CONSTRUCTION ACTIVITIES AND DEWATERING OPERATIONS.
4. THE ESCAPE OF SEDIMENT FROM THE SITE SHALL BE PREVENTED BY THE INSTALLATION OF EROSION AND SEDIMENT CONTROL MEASURES AND PRACTICES PRIOR, OR CONCURRENT WITH LAND DISTURBING ACTIVITIES.

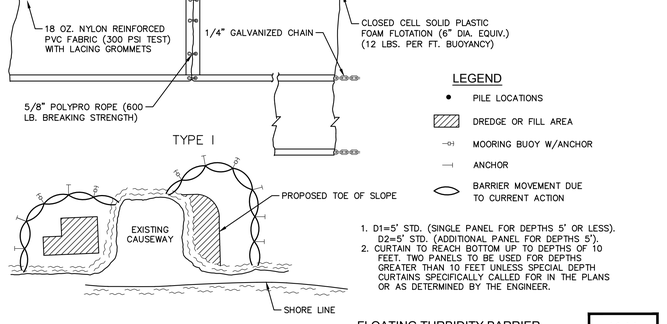


NOTE:

1. INSPECT AND REPAIR FENCE EVERY 7 DAYS AND AFTER EACH STORM EVENT AND REMOVE SEDIMENT WHEN NECESSARY.
2. REMOVED SEDIMENT SHALL BE DEPOSITED TO AN AREA THAT WILL NOT CONTRIBUTE SEDIMENT OFF-SITE AND CAN BE PERMANENTLY STABILIZED.
3. SILT FENCE SHALL BE PLACED ON SLOPE CONTOURS TO MAXIMIZE PONDING EFFICIENCY.
4. DOUBLE ROW SILT FENCE SHALL BE INSTALLED WITH 3' HORIZONTAL SPACING.

STAKED SILT FENCE
NOT TO SCALE

K-H



NOTES:

1. THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE TOP DRESSING, REPAIR AND/OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT.
2. WHEN NECESSARY, WHEELS SHALL BE CLEANED PRIOR TO ENTRANCE ONTO PUBLIC RIGHT-OF-WAY.
3. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON AN AREA STABILIZED WITH CRUSHED STONE THAT DRAINS INTO AN APPROVED SEDIMENT TRAP OR SEDIMENT BASIN.

TEMPORARY GRAVEL CONSTRUCTION ENTRANCE
NOT TO SCALE

K-H

1. D1=5' STD. (SINGLE PANEL FOR DEPTHS 5' OR LESS). D2=5' STD. (ADDITIONAL PANEL FOR DEPTHS 5').
2. CURTAIN TO REACH BOTTOM UP TO DEPTHS OF 10 FEET. TWO PANELS TO BE USED FOR DEPTHS GREATER THAN 10 FEET UNLESS SPECIAL DEPTH CURTAINS SPECIFICALLY CALLED FOR IN THE PLANS OR AS DETERMINED BY THE ENGINEER.

FLOATING TURBIDITY BARRIER
NOT TO SCALE

K-H

PLANS ARE IN NAVD 1988 DATUM

PAVING, GRADING AND DRAINAGE NOTES

1. THE CROSS SLOPE ON ADA ACCESSIBLE ROUTES SHALL NOT EXCEED 2.0%. THE LONGITUDINAL SLOPE ON ADA ACCESSIBLE ROUTES (NOT INCLUDING RAMPS) SHALL NOT EXCEED 5.0%. THE LONGITUDINAL SLOPE FOR RAMPS SHALL NOT EXCEED 1V:12H (8.3%). ACCESSIBLE PARKING SPACES SHALL NOT EXCEED 2.0% IN ANY DIRECTION (INCLUDING DIAGONAL).
2. ALL CATCH BASINS AND DRAINAGE COLLECTION STRUCTURES SHALL BE DESIGNED WITH AN EIGHTEEN INCH (18") VERTICAL SUMP FROM THE INVERT ELEVATION (OR BOTTOM OF BAFFLE) TO THE BOTTOM OF THE STRUCTURE.
3. DRAINAGE STRUCTURES SHALL BE CONSTRUCTED USING U.S. PRECAST (USP) U.S. FOUNDRY (USF) OR FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD (FDOT) PRODUCTS AS SPECIFIED OR APPROVED EQUAL. ALL STORM DRAINAGE STRUCTURES MUST COMPLY WITH THE VILLAGE OF PALM SPRINGS DETAILS AND REGULATIONS.
4. ROOF DRAIN CONNECTIONS TO DRAINAGE PIPE SHALL BE AS FOLLOWS:
   A. FOR ADS N-12 CORRUGATED POLYETHYLENE DRAINAGE PIPE USE ADS DUAL WALL FABRICATED REDUCING SADDLE TEE 4"-24" DIAMETER
   B. FOR RCP DRAINAGE PIPE MAKE CONNECTION FDOT INDEX 280, CONCRETE COLLAR FOR JOINING MAINLINE PIPE AND STUB PIPE DETAIL
   C. NOTIFY CONSULTANT FOR CONNECTION METHOD TO STEEL PIPE.
5. ALL RAMPS SHALL COMPLY WITH FDOT INDEX 304.
6. STORM DRAIN PIPE SHALL BE AS FOLLOWS:
   A. REINFORCED CONCRETE PIPE (RCP) CLASS III PER ASTM C-76 OR HIGH DENSITY POLY-ETHYLENE (HDPE) PIPE FOR 24" OR LESS FOR PIPES AND HP (HIGH PERFORMANCE) STORM PIPE FOR PIPES 30" AND LARGER. ROOF LEADER PIPE MATERIAL SHALL BE PVC SDR-35.
   B. CORRUGATED POLYETHYLENE PIPE PER AASHTO M294 JOINTS SHALL BE WATER TIGHT
   C. ANY STORM PIPE USED MUST BE APPROVED BY LOCAL AUTHORITIES. CONTRACTOR SHALL SELECT THE MOST ECONOMICAL PRODUCT.
7. CONTRACTOR SHALL CLEAN ALL PROPOSED DRAINAGE STRUCTURES AND PIPES UPON COMPLETION OF CONSTRUCTION.
8. PROPOSED ELEVATIONS OF CURB REPRESENT FACE OF CURB OR EDGE OF PAVEMENT ELEVATIONS UNLESS OTHERWISE NOTED.
9. PROPOSED ELEVATIONS IN ALL PERVIOUS AREAS REPRESENT FINISHED TOP OF SOD/GRASS OR ANY OTHER LANDSCAPING MATERIAL.
10. ALL DRAINAGE STRUCTURES SHALL CONFORM TO THE LATEST FDOT INDEX STANDARDS. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS TO THE ENGINEER PRIOR TO COMMENCEMENT OF CONSTRUCTION.
11. MATCH EXISTING GRADES AT TIE-IN LOCATIONS AT PROPERTY LINES.
12. TOP OF LANDSCAPED OR SODDED AREA AGAINST BUILDING SHALL BE MIN. 4" BELOW FINISH FLOOR ELEVATION.
13. TOP OF LANDSCAPED OR SODDED AREA AGAINST SIDEWALKS, PAVEMENT OR CURB SHALL BE MIN. 1" BELOW FINISH GRADE.

PLANS ARE IN NAVD 1988 DATUM

UTILITY NOTES

1. CONTRACTOR SHALL FURNISH AND INSTALL NECESSARY PIPE AND FITTINGS TO TRANSITION PIPE MATERIALS WHEN REQUIRED AND TO CONNECT TO BUILDING PLUMBING.
2. CONTRACTOR SHALL SUPPORT AND PROTECT ALL EXISTING UTILITIES WHEN CONSTRUCTING NEW UTILITIES.
3. ALL MANHOLES, VALVES, CLEANOUTS AND OTHER SUCH BOXES IN PAVEMENT OR SIDEWALKS SHALL BE SET FLUSH WITH PAVEMENT TO MATCH THE PROPOSED SLOPE AND SHALL BE H-20 TRAFFIC RATED.
4. ANY TREES OR SHRUBS PLACED WITHIN WATER, SEWER, OR DRAINAGE EASEMENTS SHALL CONFORM TO PALM BEACH COUNTY WATER UTILITIES DEPARTMENT STANDARD DETAILS.
5. NO PROPOSED IMPROVEMENTS, BUILDINGS OR ANY KIND OF CONSTRUCTION CAN BE PLACED ON OR WITHIN ANY WATER, SEWER, OR DRAINAGE EASEMENTS, UNLESS APPROVED BY PALM BEACH COUNTY WATER UTILITIES DEPARTMENT'S ENGINEER.
6. NO PROPOSED STRUCTURES SHALL BE INSTALLED WITHIN A HORIZONTAL DISTANCE OF 10-FEET FROM ANY EXISTING OR PROPOSED WATER, SEWER, OR DRAINAGE FACILITIES, UNLESS APPROVED BY PALM BEACH COUNTY WATER UTILITIES DEPARTMENT'S ENGINEER.
7. ALL WATER MAIN (WM) SHALL BE PVC C-900 DR-18 UNLESS OTHERWISE NOTED.
8. ALL FIRE MAIN (FM) SHALL BE DIP WITH ALL JOINTS RESTRAINED WITH MEGALUGS UNLESS OTHERWISE NOTED. ALL FIRE MAIN SHALL BE LAID AT 36" MIN. COVER. ALL FIRE RELATED CONSTRUCTION SHALL FOLLOW THE FLORIDA FIRE PREVENTION CODE 5TH EDITION – FLORIDA SPECIFIC NFPA 1, FIRE CODE, 2012 EDITION AND FLORIDA SPECIFIC NFPA 101, LIFE SAFETY CODE, 2012 EDITION.
9. ALL DUCTILE IRON PIPE (DIP) SHALL BE CLASS 350 UNLESS OTHERWISE NOTED. ALL DIP SHALL BE MARKED PER FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION (FDEP) STANDARDS.
10. ALL NEW FIRE HYDRANTS SHALL HAVE "OUT OF SERVICE" SIGNS AFFIXED AT TIME OF INSTALLATION. SIGNS SHALL REMAIN IN PLACE UNTIL THE WATER SYSTEM IS CLEARED FOR USE.
11. ALL WATER MAIN AND FORCE MAINS SHALL HAVE A MINIMUM 36" COVER OVER THE TOP OF THE PIPE UNLESS OTHERWISE NOTED. WATER AND FIRE MAINS SHALL HAVE MIN. 6" VERTICAL SEPARATION FROM EACH OTHER.
12. A MINIMUM HORIZONTAL DISTANCE OF 10 FEET MUST BE PROVIDED BETWEEN WATER MAINS AND STORM OR SANITARY SEWERS.ALL FITTINGS FOR WATER MAIN AND FIRE MAIN SHALL BE DUCTILE IRON MECHANICAL JOINT FITTINGS UNLESS OTHERWISE NOTED.
13. WATER METER SIZES SHALL BE DESIGNED BY ENGINEER OF RECORD AND SHALL BE CHECKED AND AUTHORIZED BY PALM BEACH COUNTY WATER UTILITIES..
14. PIPE DEFLECTION OF WATER MAIN AND FIRE MAIN SHALL NOT EXCEED MANUFACTURER'S RECOMMENDATIONS.
15. ALL GRAVITY SEWER MAINS SHALL BE PVC SDR-26 UNLESS OTHERWISE NOTED
16. ALL GRAVITY SEWER LATERALS SHALL BE PVC SDR-35 UNLESS OTHERWISE NOTED.
17. ALL SEWER FORCE MAIN (SFM) SHALL BE PVC C-900 DR-18 UNLESS OTHERWISE NOTED. ALL SEWER FORCE MAIN IS PRIVATE.
18. ANY VITRIFIED CLAY PIPE (VCP) DAMAGED BY NEW CONSTRUCTION OR CONNECTIONS SHALL BE REPLACED WITH NEW SANITARY SEWER MAIN PIPE.
19. SANITARY SEWER PIPE LENGTHS ARE MEASURED FROM CENTER OF MANHOLE TO CENTER OF MANHOLE. CONTRACTOR SHALL ADJUST LIMITS OF PVC TO DIP AS SHOWN IN PROFILE.
20. ALL SEWER LATERALS SHALL BE CONNECTED TO SEWER MAIN AND NOT DIRECTLY INTO SEWER MANHOLES.
21. EXISTING WATER MAIN AND SEWER MAIN SHALL BE REMOVED AFTER PROPOSED WATER MAIN AND/OR SEWER MAIN HAS BEEN TESTED AND ACCEPTED BY PALM BEACH COUNTY HEALTH DEPARTMENT AND EXISTING SERVICES HAVE BEEN RELOCATED.
22. PROPOSED WATER AND SEWER IMPROVEMENTS IN PRIVATE PROPERTY SHALL MEET PALM BEACH COUNTY HEALTH DEPARTMENT SEPARATION REQUIREMENTS, THESE CONFLICTS WILL BE ADDRESS DURING CONSTRUCTION AND WON'T AFFECT THE PUBLIC SAFETY.
23. CONTRACTOR SHALL COORDINATE UNDERGROUND ELECTRIC SERVICE CONNECTION WITH FPL FOR CONDUIT SIZE AND BURIED DEPTH REQUIREMENT.

ADDITIONAL UTILITY NOTES

1. PALM BEACH COUNTY WATER UTILITIES DEPARTMENT MUST BE GIVEN AT LEAST 48 HOURS NOTIFICATION PRIOR TO ANY SHUT-DOWN AND/OR REMOVAL OF EXISTING WATER MAIN OR SANITARY SEWER LINES.
2. COUNTY MAINTAINED UTILITIES WILL NEED TO BE TESTED AND PROTECTED (IE. PAVED AT LEAST UP TO FIRST LIFT, IF NOT ROADWAY) PRIOR TO ISSUANCE OF CERTIFICATION OF OCCUPANCY.
3. LEAD FREE BRASS WATER WORKS PRODUCTS SHALL MEET THE REQUIREMENT OF ASNI/AWWA C800 AND THE MAXIMUM LEAD CONTENT OF S.3872 AND NSF 61 ANNEX G. THE MANUFACTURER'S DESIGNATION AS A LEAD FREE PRODUCT SHALL BE PERMANENTLY STAMPED OR CAST INTO THE PRODUCT'S BODY. EFFECTIVE JANUARY 1, 2013, ONLY LEAD FREE BRASS WATER WORKS PRODUCTS SHALL BE INSTALLED IN CONTACT WITH POTABLE WATER.
4. ALL PROPOSED BACKFLOW PREVENTERS AND DOUBLE DETECTOR CHECK VALVES SHALL BE USC CERTIFIED AND LEAD FREE.

PLANS ARE IN NAVD 1988 DATUM

Always call 811 two full business days before you dig to have underground utilities located and marked.
Sunshine811.com

WATER MAIN AND FORCE MAIN ARE PUBLIC. SANITARY SEWER AND LIFT STATION ARE PRIVATE.

THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR ADDRESSING THIS ISSUE AND OBTAINING ALL NECESSARY PERMITS.

2. COUNTY MAINTAINED UTILITIES WILL NEED TO BE TESTED AND PROTECTED (IE. PAVED AT LEAST UP TO FIRST LIFT, IF NOT ROADWAY) PRIOR TO ISSUANCE OF CERTIFICATION OF OCCUPANCY.
3. LEAD FREE BRASS WATER WORKS PRODUCTS SHALL MEET THE REQUIREMENT OF ASNI/AWWA C800 AND THE MAXIMUM LEAD CONTENT OF S.3372 AND NSF 61 ANNEX G. THE MANUFACTURER'S DESIGNATION AS A LEAD FREE PRODUCT SHALL BE PERMANENTLY STAMPED OR CAST INTO THE PRODUCT'S BODY. EFFECTIVE JANUARY 1, 2013, ONLY LEAD FREE BRASS WATER WORKS PRODUCTS SHALL BE INSTALLED IN CONTACT WITH POTABLE WATER.
4. ALL PROPOSED BACKFLOW PREVENTERS AND DOUBLE DETECTOR CHECK VALVES SHALL BE USC CERTIFIED AND LEAD FREE.

PLANS ARE IN NAVD 1988 DATUM

Always call 811 two full business days before you dig to have underground utilities located and marked.

Sunshine811.com

THE PRESENCE OF GROUNDWATER SHOULD BE ANTICIPATED. CONTRACTOR'S BID SHALL INCLUDE CONSIDERATION FOR ADDRESSING THIS ISSUE AND OBTAINING ALL NECESSARY PERMITS.

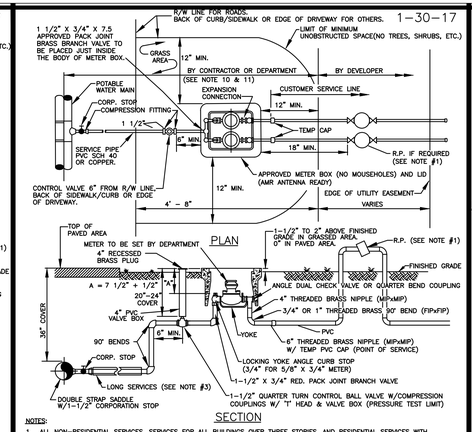
This document, together with the concepts and designs presented herein, as an instrument of service, is intended only for the specific purpose and client for which it was prepared. Reuse of and improper reliance on this document without written authorization and adaptation by Kimley-Horn and Associates, Inc. shall be without liability to Kimley-Horn and Associates, Inc.

NOTES:

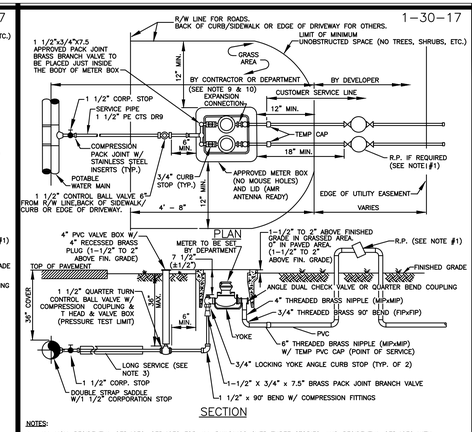
1. ALL NON-RESIDENTIAL SERVICES, SERVICES FOR ALL BUILDINGS OVER THREE STORIES, AND RESIDENTIAL SERVICES WITH INDIVIDUALLY METERED RECLAIMED WATER SERVICE TO HAVE AN APPROVED REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTION ASSEMBLY (R.P.). THE INITIAL TEST OF THE R.P. SHALL BE PERFORMED BY THE DEPARTMENT. THE R.P. SHALL BE INSTALLED AS CLOSE AS POSSIBLE TO THE POINT OF SERVICE.
2. 12" MINIMUM CLEARANCE TO BE MAINTAINED BETWEEN METER BOX AND ANY OBSTRUCTION.
3. FOR INSTALLATION OF SERVICES UNDER DRIVEWAYS AND ROADWAYS USE MIN. 3" DIAMETER BLACK IRON, PVC SCH 40, OR HDPE SDR 9 CASING. CASING SHALL EXTEND MIN. 24" BEYOND EDGE OF PAVEMENT. END OF CASING TO BE SEALED WITH FOAM SEALANT. CASING SHALL BE COLOR-CODED BLACK, WHITE, BLUE, OR BLUE STRIPED.
4. SUCCESSIVE TAPS INTO THE WATER MAIN SHALL BE SPACED A MINIMUM OF 18" APART. TAPS SPACED BETWEEN 18" AND 48" SHALL BE OFFSET TO EACH SIDE OF THE MAIN. TAPS ON THE SAME SIDE OF A PVC PIPE SECTION SHALL BE MIN. 10' APART.
5. METER SHALL NOT BE PLACED IN SIDEWALK OR DRIVEWAY AREAS. SERVICE LINES AND TAPS SHALL NOT BE PLACED UNDER DRIVEWAYS WHENEVER POSSIBLE.
6. COPPER SHALL BE "TYPE K" CONTINUOUS AND SUITABLE FOR UNDERGROUND SERVICE WITH FLARED CONNECTIONS. PVC SHALL BE SCH. 40 PIPE WITH SCH 80 PVC FITTINGS. ALL BRASS SHALL BE "LEAD FREE".
7. MAXIMUM SERVICE LENGTH IS 100' TO METER.
8. BEDDING (MIN. 4") AND COVER (MIN. 4") OVER SERVICE LINE OR CASING SHALL CONSIST OF FINE GRANULAR MATERIAL. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED WITH 2" MAXIMUM SIZE.
9. METER/SERVICE WILL NOT BE INSTALLED/ACTIVATED UNTIL:
   A. – FORM BOARDS FOR DRIVEWAY AND/OR SIDEWALK ARE IN PLACE OR – DRIVEWAY OR SIDEWALK IS IN PLACE
   B. "MINIMUM UNOBSTRUCTED SPACE" (AS SHOWN) IS PROVIDED. (MIN 12" VERTICAL SEPARATION IS REQUIRED TO OTHER UTILITIES.)
   C. – THE REQUIRED BACKFLOW PREVENTION ASSEMBLY/DEVICE IS INSTALLED AND HAS PASSED THE INITIAL TEST.
10. METER TO BE SET BY THE DEPARTMENT.
11. THE DEVELOPER/PROPERTY OWNER OR ASSIGNEE SHALL BE RESPONSIBLE FOR INSTALLATION OF SERVICES BEYOND PRESSURE TEST LIMITS AS SPECIFIED BY THE DEPARTMENT.
12. THREADED AREAS OF CORPORATION STOP AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO (2) WRAPS OF TEFLON TAPE.
13. METER BOXES IN NON-GRASS AREAS SHALL HAVE TRAFFIC RATED LIDS.
14. A 12" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED FOR METER BOXES OUTSIDE OF GRASS AREA. THE BASE SHALL EXTEND MIN. 12" BEYOND THE METER BOX PERIMETER.



POTABLE WATER SERVICE SINGLE 5/8" X 3/4" & 1" METER INSTALLATION DETAIL (PVC) — 1W

NOTES:

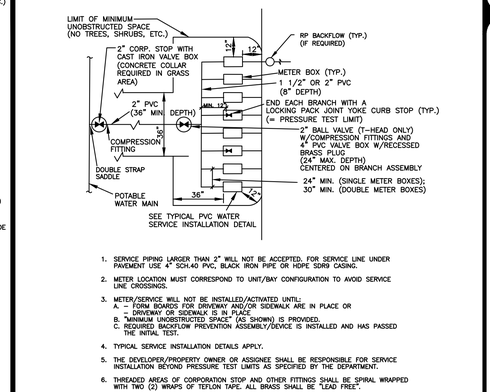
1. ALL NON-RESIDENTIAL SERVICES, SERVICES FOR ALL BUILDINGS OVER THREE STORIES, AND RESIDENTIAL SERVICES WITH INDIVIDUALLY METERED RECLAIMED WATER SERVICE TO HAVE AN APPROVED REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTION ASSEMBLY (R.P.). THE INITIAL TEST OF THE R.P. SHALL BE PERFORMED BY THE DEPARTMENT. THE R.P. SHALL BE INSTALLED AS CLOSE AS POSSIBLE TO THE POINT OF SERVICE.
2. 12" MINIMUM CLEARANCE TO BE MAINTAINED BETWEEN METER BOX AND ANY OBSTRUCTION.
3. FOR INSTALLATION OF SERVICES UNDER DRIVEWAYS AND ROADWAYS USE MIN. 3" DIAMETER BLACK IRON, PVC SCH 40 OR HDPE SDR 9 CASING. CASING SHALL EXTEND MIN. 24" BEYOND EDGE OF PAVEMENT. END OF CASING TO BE SEALED WITH FOAM SEALANT. CASING SHALL BE COLOR-CODED BLACK, WHITE, BLUE, OR BLUE STRIPED.
4. SUCCESSIVE TAPS INTO THE WATER MAIN SHALL BE SPACED A MINIMUM OF 18" APART. TAPS SPACED BETWEEN 18" AND 48" SHALL BE OFFSET TO EACH SIDE OF THE MAIN. TAPS ON THE SAME SIDE OF A PVC PIPE SECTION SHALL BE MIN. 10' APART.
5. METER SHALL NOT BE PLACED IN SIDEWALK OR DRIVEWAY AREAS. SERVICE LINES AND TAPS SHALL NOT BE PLACED UNDER DRIVEWAYS WHENEVER POSSIBLE.
6. MAXIMUM SERVICE LENGTH IS 100' TO METER.
7. BEDDING (MIN. 4") AND COVER (MIN. 4") OVER SERVICE LINE OR CASING SHALL CONSIST OF FINE GRANULAR MATERIAL. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED WITH 2" MAXIMUM SIZE.
8. METER/SERVICE WILL NOT BE INSTALLED/ACTIVATED UNTIL:
   A. – FORM BOARDS FOR DRIVEWAY AND/OR SIDEWALK ARE IN PLACE OR – DRIVEWAY OR SIDEWALK IS IN PLACE
   B. "MINIMUM UNOBSTRUCTED SPACE" (AS SHOWN) IS PROVIDED. (MIN 12" VERTICAL SEPARATION IS REQUIRED TO OTHER UTILITIES.)
   C. – THE REQUIRED BACKFLOW PREVENTION ASSEMBLY/DEVICE IS INSTALLED AND HAS PASSED THE INITIAL TEST.
9. METER TO BE SET BY THE DEPARTMENT.
10. THE DEVELOPER/PROPERTY OWNER OR ASSIGNEE SHALL BE RESPONSIBLE FOR INSTALLATION OF SERVICES BEYOND PRESSURE TEST LIMITS AS SPECIFIED BY THE DEPARTMENT.
11. THREADED AREAS OF CORPORATION STOP AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO (2) WRAPS OF TEFLON TAPE. ALL BRASS SHALL BE "LEAD FREE".
12. METER BOXES IN NON-GRASS AREAS SHALL HAVE TRAFFIC RATED LIDS.
13. A 12" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED FOR METER BOXES OUTSIDE OF GRASS AREA. THE BASE SHALL EXTEND MIN. 12" BEYOND THE METER BOX PERIMETER.
14. STAINLESS STEEL INSERTS ARE REQUIRED FOR ALL COMPRESSION FITTINGS.



POTABLE WATER SERVICE SINGLE 5/8" X 3/4" & 1" METER INSTALLATION DETAIL (POLYETHYLENE) — 2W

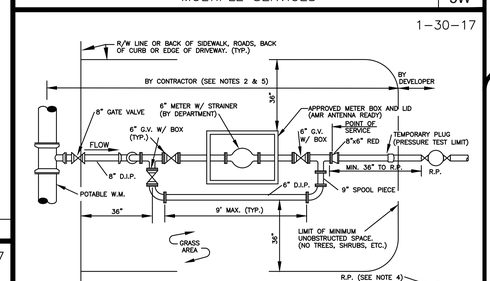
NOTES:

1. ALL NON-RESIDENTIAL SERVICES, SERVICES FOR ALL BUILDINGS OVER THREE STORIES, AND RESIDENTIAL SERVICES WITH INDIVIDUALLY METERED RECLAIMED WATER SERVICE TO HAVE AN APPROVED REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTION ASSEMBLY (R.P.). THE INITIAL TEST OF THE R.P. SHALL BE PERFORMED BY THE DEPARTMENT. THE R.P. SHALL BE INSTALLED AS CLOSE AS POSSIBLE TO THE POINT OF SERVICE.
2. 12" MINIMUM CLEARANCE TO BE MAINTAINED BETWEEN METER BOX AND ANY OBSTRUCTION.
3. FOR INSTALLATION OF SERVICES UNDER DRIVEWAYS AND ROADWAYS USE MIN. 3" DIAMETER BLACK IRON, PVC SCH 40 OR HDPE SDR 9 CASING. CASING SHALL EXTEND MIN. 24" BEYOND EDGE OF PAVEMENT. END OF CASING TO BE SEALED WITH FOAM SEALANT. CASING SHALL BE COLOR-CODED BLACK, WHITE, BLUE, OR BLUE STRIPED.
4. SUCCESSIVE TAPS INTO THE WATER MAIN SHALL BE SPACED A MINIMUM OF 18" APART. TAPS SPACED BETWEEN 18" AND 48" SHALL BE OFFSET TO EACH SIDE OF THE MAIN. TAPS ON THE SAME SIDE OF A PVC PIPE SECTION SHALL BE MIN. 10' APART.
5. METER SHALL NOT BE PLACED IN SIDEWALK OR DRIVEWAY AREAS. SERVICE LINES AND TAPS SHALL NOT BE PLACED UNDER DRIVEWAYS WHENEVER POSSIBLE.
6. MAXIMUM SERVICE LENGTH IS 100' TO METER.
7. BEDDING (MIN. 4") AND COVER (MIN. 4") OVER SERVICE LINE OR CASING SHALL CONSIST OF FINE GRANULAR MATERIAL. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED WITH 2" MAXIMUM SIZE.
8. METER/SERVICE WILL NOT BE INSTALLED/ACTIVATED UNTIL:
   A. – FORM BOARDS FOR DRIVEWAY AND/OR SIDEWALK ARE IN PLACE OR – DRIVEWAY OR SIDEWALK IS IN PLACE
   B. "MINIMUM UNOBSTRUCTED SPACE" (AS SHOWN) IS PROVIDED. (MIN 12" VERTICAL SEPARATION IS REQUIRED TO OTHER UTILITIES.)
   C. – THE REQUIRED BACKFLOW PREVENTION ASSEMBLY/DEVICE IS INSTALLED AND HAS PASSED THE INITIAL TEST.
9. METER TO BE SET BY THE DEPARTMENT.
10. THE DEVELOPER/PROPERTY OWNER OR ASSIGNEE SHALL BE RESPONSIBLE FOR INSTALLATION OF SERVICES BEYOND PRESSURE TEST LIMITS AS SPECIFIED BY THE DEPARTMENT.
11. THREADED AREAS OF CORPORATION STOP AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO (2) WRAPS OF TEFLON TAPE. ALL BRASS SHALL BE "LEAD FREE".
12. METER BOXES IN NON-GRASS AREAS SHALL HAVE TRAFFIC RATED LIDS.
13. A 12" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED FOR METER BOXES OUTSIDE OF GRASS AREA. THE BASE SHALL EXTEND MIN. 12" BEYOND THE METER BOX PERIMETER.
14. A 12" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED FOR METER BOX PERIMETER.



POTABLE WATER SERVICE DUAL 5/8" X 3/4" METER INSTALLATION DETAIL (PVC) — 3W

NOTES:



1. ALL NON-RESIDENTIAL SERVICES, SERVICES FOR ALL BUILDINGS OVER THREE STORIES, AND RESIDENTIAL SERVICES WITH INDIVIDUALLY METERED RECLAIMED WATER SERVICE TO HAVE AN APPROVED REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTION ASSEMBLY (R.P.). THE INITIAL TEST OF THE R.P. SHALL BE PERFORMED BY THE DEPARTMENT. THE R.P. SHALL BE INSTALLED AS CLOSE AS POSSIBLE TO THE POINT OF SERVICE.
2. 12" MINIMUM CLEARANCE TO BE MAINTAINED BETWEEN METER BOX AND ANY OBSTRUCTION.
3. FOR INSTALLATION OF SERVICES UNDER DRIVEWAYS AND ROADWAYS USE MIN. 3" DIAMETER BLACK IRON, PVC SCH 40 OR HDPE SDR 9 CASING. CASING SHALL EXTEND MIN. 24" BEYOND EDGE OF PAVEMENT. END OF CASING TO BE SEALED WITH FOAM SEALANT. CASING SHALL BE COLOR-CODED BLACK, WHITE, BLUE, OR BLUE STRIPED.
4. SUCCESSIVE TAPS INTO THE WATER MAIN SHALL BE SPACED A MINIMUM OF 18" APART. TAPS SPACED BETWEEN 18" AND 48" SHALL BE OFFSET TO EACH SIDE OF THE MAIN. TAPS ON THE SAME SIDE OF A PVC PIPE SECTION SHALL BE MIN. 10' APART.
5. METER SHALL NOT BE PLACED IN SIDEWALK OR DRIVEWAY AREAS. SERVICE LINES AND TAPS SHALL NOT BE PLACED UNDER DRIVEWAYS WHENEVER POSSIBLE.
6. MAXIMUM SERVICE LENGTH IS 100' TO METER.
7. BEDDING (MIN. 4") AND COVER (MIN. 4") OVER SERVICE LINE OR CASING SHALL CONSIST OF FINE GRANULAR MATERIAL. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED WITH 2" MAXIMUM SIZE.
8. METER/SERVICE WILL NOT BE INSTALLED/ACTIVATED UNTIL:
   A. – FORM BOARDS FOR DRIVEWAY AND/OR SIDEWALK ARE IN PLACE OR – DRIVEWAY OR SIDEWALK IS IN PLACE
   B. "MINIMUM UNOBSTRUCTED SPACE" (AS SHOWN) IS PROVIDED. (MIN 12" VERTICAL SEPARATION IS REQUIRED TO OTHER UTILITIES.)
   C. – THE REQUIRED BACKFLOW PREVENTION ASSEMBLY/DEVICE IS INSTALLED AND HAS PASSED THE INITIAL TEST.
9. METER TO BE SET BY THE DEPARTMENT.
10. THE DEVELOPER/PROPERTY OWNER OR ASSIGNEE SHALL BE RESPONSIBLE FOR INSTALLATION OF SERVICES BEYOND PRESSURE TEST LIMITS AS SPECIFIED BY THE DEPARTMENT.
11. THREADED AREAS OF CORPORATION STOP AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO (2) WRAPS OF TEFLON TAPE. ALL BRASS SHALL BE "LEAD FREE".
12. METER BOXES IN NON-GRASS AREAS SHALL HAVE TRAFFIC RATED LIDS.
13. A 12" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED FOR METER BOXES OUTSIDE OF GRASS AREA. THE BASE SHALL EXTEND MIN. 12" BEYOND THE METER BOX PERIMETER.
14. STAINLESS STEEL INSERTS ARE REQUIRED FOR ALL COMPRESSION FITTINGS.

POTABLE WATER SERVICE DUAL 5/8" X 3/4" METER INSTALLATION DETAIL (POLYETHYLENE) — 4W

1. SERVICE PIPING LARGER THAN 2" WILL NOT BE ACCEPTED. FOR SERVICE LINE UNDER PAVEMENT USE 4" SCH.40 PVC, BLACK IRON PIPE OR HDPE SDR9 CASING.
2. METER LOCATION MUST CORRESPOND TO UNIT/BAY CONFIGURATION TO AVOID SERVICE LINE CROSSINGS.
3. METER/SERVICE WILL NOT BE INSTALLED/ACTIVATED UNTIL:
   A. – FORM BOARDS FOR DRIVEWAY AND/OR SIDEWALK ARE IN PLACE OR – DRIVEWAY OR SIDEWALK IS IN PLACE
   B. "MINIMUM UNOBSTRUCTED SPACE" (AS SHOWN) IS PROVIDED.
   C. REQUIRED BACKFLOW PREVENTION ASSEMBLY/DEVICE IS INSTALLED AND HAS PASSED THE INITIAL TEST.
4. TYPICAL SERVICE INSTALLATION DETAILS APPLY.
5. THE DEVELOPER/PROPERTY OWNER OR ASSIGNEE SHALL BE RESPONSIBLE FOR SERVICE INSTALLATION BEYOND PRESSURE TEST LIMITS AS SPECIFIED BY THE DEPARTMENT.
6. THREADED AREAS OF CORPORATION STOP AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO (2) WRAPS OF TEFLON TAPE. ALL BRASS SHALL BE "LEAD FREE".
7. MAX. (8) 5/8" METERS OR MAX. (4) 1" METERS MAY BE CONNECTED TO A SINGLE 2" SERVICE LINE.
8. PLEASE NOTE THAT ADDITIONAL UNOBSTRUCTED SPACE WILL BE REQUIRED FOR THE INSTALLATION OF A BACKFLOW PREVENTERS (IF REQUIRED).

POTABLE WATER TYPICAL CONNECTION FOR MULTIPLE SERVICES — 5W

NOTES:

1. ALL SERVICE PIPING SHALL BE 4" DUCTILE IRON WITH 4" GATE VALVES WITH VALVE BOXES AND CONCRETE COLLARS (IF APPLICABLE).
2. ONLY APPROVED METER BOXES SHALL BE USED. THE BOX SHALL BE PROVIDED BY CUSTOMER AND PLACED ABOVE GROUND NEAR THE METER LOCATION. PROPERTY OWNER SHALL EXCAVATE THE METER BOX AREA, EXPOSE THE BYPASS PIPING, THEN INSTALL THE BOX AND BACKFILL THE AREA AFTER METER INSTALLATION.
3. APPROVED RESTRAINED FLANGED ADAPTERS ARE REQUIRED. PLACE 4"x3" FLANGED REDUCERS AS SHOWN ON DETAIL.
4. ALL SERVICES TO HAVE AN APPROVED REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTION ASSEMBLY (R.P.). THE INITIAL TEST OF THE R.P. SHALL BE PERFORMED BY THE DEPARTMENT. THE R.P. SHALL BE INSTALLED AS CLOSE AS POSSIBLE TO THE POINT OF SERVICE.
5. WATER METER SHALL BE INSTALLED BY THE DEPARTMENT. LAYING LENGTH OF THE METER TO BE CONFIRMED PRIOR TO SERVICE INSTALLATION.
6. SERVICE COMPONENTS SHALL BE CONSTRUCTED FOR THE METER TO BE INSTALLED "TRUE" AND "PLUMB" AND TO ALLOW METER READING THROUGH THE METER READER LID.
7. THE ENTIRE ASSEMBLY (WITHOUT METER/SPOOL PIECES AS SHOWN) SHALL BE PRESSURE TESTED AS REQUIRED.
8. METER/SERVICE WILL NOT BE INSTALLED/ACTIVATED UNTIL:
   A. – FORM BOARDS FOR DRIVEWAY AND/OR SIDEWALK ARE IN PLACE OR – DRIVEWAY OR SIDEWALK IS IN PLACE
   B. "MINIMUM UNOBSTRUCTED SPACE" (AS SHOWN) IS PROVIDED. MIN. 12" VERTICAL SEPARATION IS REQUIRED TO OTHER UTILITIES.
   C. REQUIRED BACKFLOW PREVENTION ASSEMBLY IS INSTALLED AND HAS PASSED THE INITIAL TEST.
9. BYPASS PIPING SHALL BE INSTALLED ON THE RIGHT SIDE OF METER IN DIRECTION OF FLOW UNLESS OTHERWISE APPROVED BY COUNTY.
10. ALL HARDWARE FOR FLANGED CONNECTIONS (BOLTS, ETC.) TO BE STAINLESS STEEL.
11. METER BOXES IN NON-GRASS AREAS SHALL HAVE TRAFFIC RATED LIDS.
12. A 4" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED. THE BASE SHALL EXTEND MINIMUM 12" BEYOND THE METER BOX PERIMETER.

POTABLE WATER 6" METER INSTALLATION — 10W

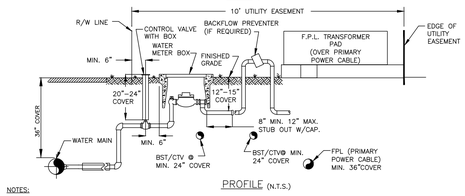
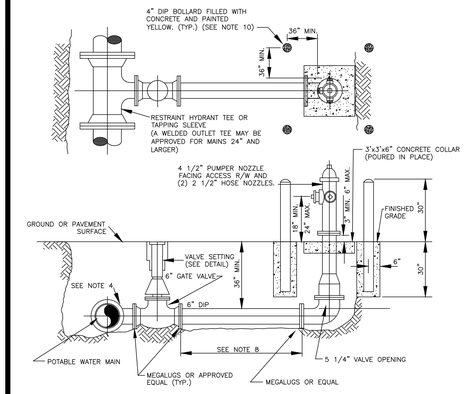
Jan 15, 2021



NOTES:

1. ALL SERVICES TO HAVE AN APPROVED REDUCED PRESSURE PRINCIPLE BACKFLOW PREVENTION ASSEMBLY (R.P.). THE INITIAL TEST OF THE R.P. SHALL BE PERFORMED BY THE DEPARTMENT. THE R.P. SHALL BE INSTALLED AS CL

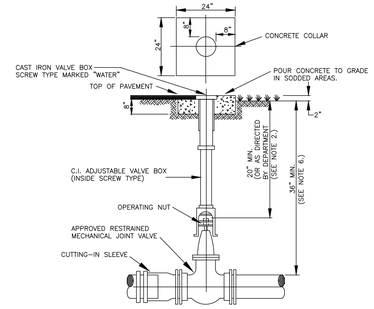
PLAN (N.T.S.)



PROFILE (N.T.S.)

NOTES:

1. THE DETAIL WAS DEVELOPED IN COLLABORATION WITH UTILITY COMPANIES SUPPLYING VARIOUS UTILITY SERVICES TO P.B.C.W.U.D. CUSTOMERS.
2. THE DIMENSIONS SHOWN SHALL SERVE AS A GENERAL GUIDELINE TO INSTALL UTILITIES WITHIN A 10' WIDE UTILITY EASEMENT PARALLELING A RIGHT-OF-WAY.
3. THE PARTICIPATING UTILITIES PLEDGE TO OBSERVE, FOLLOW, AND ENFORCE THE INSTALLATION PARAMETERS SHOWN ON THIS DETAIL.

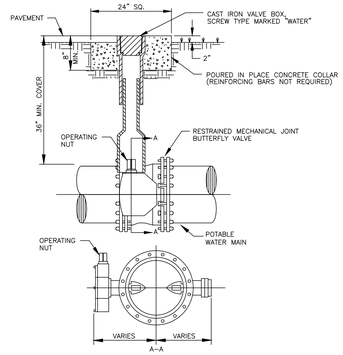


TYPICAL UTILITY INSTALLATION DETAIL IN A 10' UTILITY EASEMENT ADJACENT TO R/W ✳ 11W

NOTES:

1. HYDRANT SHALL BE INSTALLED PLUMB AND TRUE IN UNOBSTRUCTED LOCATION AND SHALL NOT INTERFERE WITH PEDESTRIAN WALKWAYS, BIKEPATHS, ETC. (MIN. 7.5' FEET CLEARANCE ON ALL SIDES).
2. THE SAME MODEL HYDRANT SHALL BE USED THROUGHOUT CURRENT CONTRACT PHASE. HYDRANTS MUST BE ORDERED RED IN COLOR, WITH FINISHED EPOXY COAT APPLIED BY THE HYDRANT MANUFACTURER. HYDRANT SHALL BE FACTORY EQUIPPED WITH PLUGGED DRAIN HOLES.
3. VALVE SHALL BE PLACED ADJACENT TO MAIN AND RESTRAINED WITH MEGALUGS OR EQUAL.
4. HYDRANT TEES ARE PREFERRED.
5. ALL HYDRANTS SHALL BE TEE'D OFF OF MAINS
6. HYDRANTS SHALL NOT BE PLACED IN SIDEWALKS, ROADWAYS, OR BIKEPATHS.
7. FIRE HYDRANT SHALL BE LOCATED 5' MIN. FROM EDGE OF PAVEMENT WITH RAISED CURBING.
8. ON RUNS LONGER THAN 60 FEET ANOTHER VALVE IS REQUIRED LESS THAN ONE PIPE JOINT OF THE HYDRANT.
9. PAINT SAFETY RED, IF REQUIRED, WITH APPROVED PAINT.
10. BOLLARDS MAY BE REQUIRED FOR HYDRANTS WITH LESS THAN 7 FEET TO EDGE OF PAVEMENT (WITHOUT RAISED CURBING). NO BOLLARDS SHALL BE INSTALLED IN COUNTY RIGHT-OF-WAY "CLEAR ZONE".
11. BURIED HYDRANT HARDWARE SHALL BE STAINLESS STEEL (TYPE 304L OR TYPE 304 BOLTS/TYPE 304 NUTS).
12. NO CONNECTION (TEE, TAP) IS ALLOWED BETWEEN THE HYDRANT CONTROL VALVE AND THE FIRE HYDRANT.
13. APPROVED SECURITY CAPS WITH CHAINS ARE REQUIRED FOR ALL NOZZLES.

TYPICAL FIRE HYDRANT INSTALLATION WITH BOLLARDS DETAIL ✳ 12W

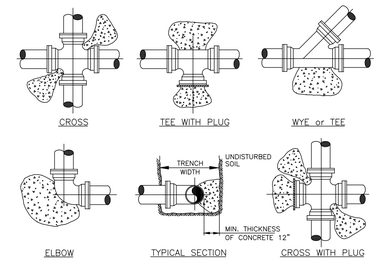


NOTES:

1. CONCRETE COLLAR IS NOT REQUIRED IN PAVED AREAS IF PAVEMENT SURFACE IS FINISHED PRIOR TO CONDITIONAL FINAL INSPECTION.
2. WHEN OPERATING NUT IS DEEPER THAN 36" A ONE PIECE EXTENSION WILL BE REQUIRED TO BRING OPERATING NUT 20"-30" BELOW FINISHED GRADE. EXTENSION BOLTS & NUTS ARE TO BE STAINLESS STEEL. A HIGH STRENGTH STEEL CENTERING PLATE, WELDED TO THE EXTENSION, IS ALSO REQUIRED.
3. VALVE BOXES SHALL HAVE COVERS MARKED "WATER".
4. VALVE BOX EXTENSION TO BE D.I.P. OR C-900 PVC SDR 18 (BLUE)
5. A CUT-IN INSTALLATION SHALL REQUIRE MEGALUGS OR EQUAL THROUGHOUT ASSEMBLY.
6. IN ORDER TO MAINTAIN ADEQUATE COVER OVER VALVE NUT, THE FOLLOWING MINIMUM COVERS OVER PIPE ARE REQUIRED

GATE VALVE SIZE	MIN. COVER OVER PIPE
16"	48"
20"	54"
24"	60"
30"	72"
36"	84"

7. VALVES IN ROADWAYS SHALL BE LOCATED OUTSIDE OF WHEEL PATHS WHENEVER POSSIBLE.

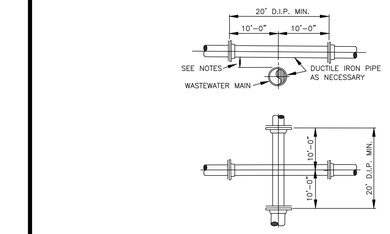


POTABLE WATER MAIN TYPICAL GATE VALVE SETTING AND MAIN CUT-IN DETAIL 13W

NOTES:

1. CONCRETE COLLAR IS NOT REQUIRED IN PAVED AREAS IF PAVEMENT SURFACE IS FINISHED PRIOR TO CONDITIONAL FINAL INSPECTION.
2. WHEN TOP OF OPERATING NUT IS DEEPER THAN 42" AN EXTENSION WILL BE REQUIRED TO BRING OPERATING NUT 24"-30" BELOW FINISHED GRADE. EXTENSION BOLTS & NUTS ARE TO BE STAINLESS STEEL. A HIGH STRENGTH STEEL CENTERING PLATE, WELDED TO THE EXTENSION, IS ALSO REQUIRED.
3. VALVE BOXES SHALL HAVE COVERS MARKED "WATER".
4. A CUT-IN INSTALLATION SHALL REQUIRE MEGALUGS OR EQUAL THROUGHOUT ASSEMBLY.
5. EXTENSION VALVE BOX TO BE D.I.P. OR C-900 PVC DR 18 (COLOR: BLUE)
6. VALVES IN ROADWAYS SHALL BE LOCATED OUTSIDE OF WHEEL PATHS WHENEVER POSSIBLE.

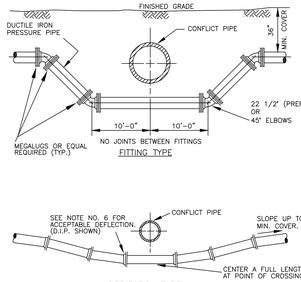
POTABLE WATER MAIN TYPICAL BUTTERFLY VALVE SETTING 14W



PIPE	THRUST BLOCK AREA REQ'D	REMARKS	NOTE:
4"	2.0 SQ. FT.	VALUES ARE FOR 90° BEND, BASED ON 2000 P.S.F. SAFE BEARING LOAD AND PIPE PRESSURE OF 150 P.S.I. FOR OTHER SOILS & PRESSURES THE AREA REQUIRED IS IN DIRECT PROPORTION	FOR OTHER FITTINGS USE THE FOLLOWING FACTORS, TEE 100% 45° BEND 71% 22 1/2° BEND 39% 11 1/4° BEND 20% DEAD END 100%
6"	4.0 SQ. FT.		
8"	6.6 SQ. FT.		
10"	10.0 SQ. FT.		
12"	14.0 SQ. FT.		
14"	18.6 SQ. FT.		

NOTES:

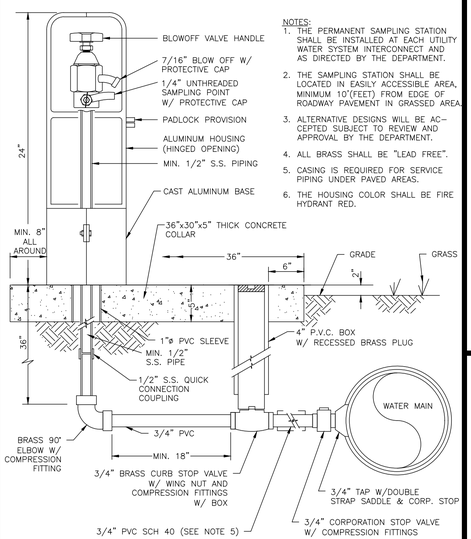
1. CONCRETE THRUST BLOCKS OR THRUST COLLARS MAY BE UTILIZED ONLY IF NECESSARY FOR CONNECTIONS TO AN EXISTING PIPING SYSTEM, OTHERWISE MECHANICAL RESTRAINTS SHALL BE USED. KEEP "T" BOLTS CLEAR OF CONCRETE, WRAPPED IN VISQUEEN FOR FUTURE ACCESS, WITH A MINIMUM OF 1" THICKNESS BETWEEN THE FITTING AND SOIL.
2. BEFORE POURING CONCRETE, PLUGS SHALL BE WRAPPED WITH VISQUEEN AND A BOARD PLACED IN FRONT.
3. CONCRETE SHALL BE 2500 P.S.I. MINIMUM.
4. THE ENGINEER OF RECORD SHALL SUBMIT A THRUST BLOCK SIZE CALCULATION FOR TEE CONNECTIONS INTO UNRESTRAINED EXISTING MAINS LARGER THAN 14".
5. THE ENGINEER OF RECORD SHALL SUBMIT A PIPE RESTRAINT DESIGN FOR INLINE EXTENSIONS OF A EXISTING UNRESTRAINED MAIN IF MECHANICAL JOINT RESTRAINT CAN NOT BE INSTALLED ON THE EXISTING MAIN.



TYPICAL THRUST BLOCKS FOR PRESSURE PIPE 20W

NOTES:

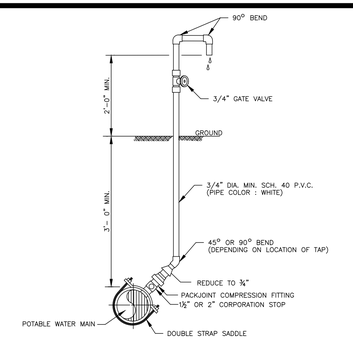
1. STORM SEWER, GRAVITY WASTEWATER AND RECLAIMED WATER MAIN CROSSING UNDER POTABLE WATER MAINS SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE INVERT OF THE UPPER PIPE AND THE CROWN OF THE LOWER PIPE. WHERE THIS MINIMUM SEPARATION CANNOT BE MAINTAINED, THE CROSSING SHALL BE ARRANGED SO THAT THE STORM/WASTEWATER/RECLAIMED WATER PIPE JOINTS AND POTABLE WATER MAIN JOINTS ARE EQUIDISTANT FROM THE POINT OF CROSSING WITH NO LESS THAN TEN (10) FEET BETWEEN ANY TWO JOINTS, BOTH PIPES SHALL BE D.I.P., AND THE MINIMUM VERTICAL SEPARATION SHALL BE 6 INCHES. WHERE THERE IS NO ALTERNATIVE TO STORM/WASTEWATER/RECLAIMED WATER PIPES CROSSING OVER A POTABLE WATER MAIN, THE CRITERIA FOR MINIMUM 12" VERTICAL SEPARATION BETWEEN LINES AND JOINT ARRANGEMENT, AS STATED ABOVE, SHALL BE REQUIRED, AND BOTH PIPES SHALL BE D.I.P. IRRESPECTIVE OF SEPARATION. D.I.P. IS NOT REQUIRED FOR STORM SEWERS.
2. WHENEVER POSSIBLE MAINTAIN MIN. TEN (10) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN POTABLE WATER MAIN AND STORM SEWER, WASTEWATER MAIN, OR FORCE MAIN (A MIN. 6' SEPARATION MAY BE APPROVED ON A CASE BY CASE BASIS). MAINTAIN MIN. THREE (3) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN RECLAIMED WATER MAIN AND POTABLE WATER MAIN, STORM SEWER, WASTEWATER GRAVITY MAIN OR FORCE MAIN.
3. FORCE MAIN CROSSING POTABLE WATER MAIN OR RECLAIMED WATER MAIN SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE OUTSIDE OF THE FORCE MAIN AND OUTSIDE OF THE POTABLE WATER MAIN OR RECLAIMED WATER MAIN WITH THE POTABLE WATER MAIN OR RECLAIMED WATER MAIN CROSSING OVER THE FORCE MAIN.
4. WASTEWATER LATERALS SHALL CROSS UNDER POTABLE WATER MAINS WITH A MIN. 12" VERTICAL SEPARATION WHENEVER POSSIBLE. WHERE THIS MINIMUM SEPARATION CANNOT BE MAINTAINED, A 20' SECTION OF DUCTILE IRON PIPE POTABLE WATER MAIN CENTERED ON THE CROSSING IS REQUIRED AND THE MINIMUM VERTICAL SEPARATION SHALL BE 6". WHERE THERE IS NO ALTERNATIVE TO A WASTEWATER LATERAL PIPE CROSSING OVER A POTABLE WATER MAIN, A MINIMUM 12" VERTICAL SEPARATION IS REQUIRED, THE LATERAL SHALL BE P.V.C. C-900 SDR18 OR BETTER, THE POTABLE WATER MAIN SHALL BE D.I.P. AND THE PIPE JOINTS SHALL BE EQUIDISTANT FROM THE POINT OF CROSSING.
5. POTABLE WATER SERVICE LINES SHALL CROSS OVER WASTEWATER MAINS WITH MIN. 12" VERTICAL SEPARATION. WHERE THIS MIN. SEPARATION CAN NOT BE MAINTAINED, THE WATER SERVICE SHALL BE ENCASED IN A MIN. 10' LONG CASING CENTERED OVER THE CROSSING WITH MIN. 6" VERTICAL SEPARATION.
6. WASTEWATER MAINS, WATER MAINS, STORM PIPES AND OTHER UTILITY PIPES SHALL CROSS PERPENDICULAR WHENEVER POSSIBLE.



POTABLE WATER, WASTEWATER MAIN AND STORM SEWER CONFLICT 18W

NOTES:

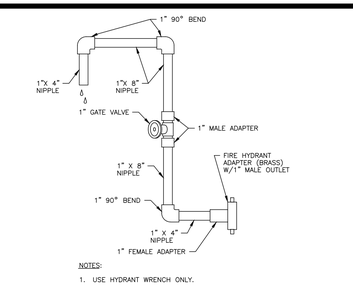
1. STORM SEWER, GRAVITY WASTEWATER AND RECLAIMED WATER MAIN CROSSING UNDER POTABLE WATER MAINS SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE INVERT OF THE UPPER PIPE AND THE CROWN OF THE LOWER PIPE. WHERE THIS MINIMUM SEPARATION CANNOT BE MAINTAINED, THE CROSSING SHALL BE ARRANGED SO THAT THE STORM/WASTEWATER/RECLAIMED WATER PIPE JOINTS AND POTABLE WATER MAIN JOINTS ARE EQUIDISTANT FROM THE POINT OF CROSSING WITH NO LESS THAN TEN (10) FEET BETWEEN ANY TWO JOINTS, BOTH PIPES SHALL BE D.I.P., AND THE MINIMUM VERTICAL SEPARATION SHALL BE 6 INCHES. WHERE THERE IS NO ALTERNATIVE TO STORM/WASTEWATER/RECLAIMED WATER PIPES CROSSING OVER A POTABLE WATER MAIN, THE CRITERIA FOR MINIMUM 12" VERTICAL SEPARATION BETWEEN LINES AND JOINT ARRANGEMENT, AS STATED ABOVE, SHALL BE REQUIRED, AND BOTH PIPES SHALL BE D.I.P. IRRESPECTIVE OF SEPARATION. D.I.P. IS NOT REQUIRED FOR STORM SEWERS.
2. WHENEVER POSSIBLE MAINTAIN MIN. TEN (10) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN POTABLE WATER MAIN AND STORM SEWER, WASTEWATER MAIN, OR FORCE MAIN (A MIN. 6' SEPARATION MAY BE APPROVED ON A CASE BY CASE BASIS.) MAINTAIN MIN. THREE (3) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN RECLAIMED WATER MAIN AND POTABLE WATER MAIN, STORM SEWER, WASTEWATER GRAVITY MAIN OR FORCE MAIN.
3. FORCE MAIN CROSSING POTABLE WATER MAIN OR RECLAIMED WATER MAIN SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE OUTSIDE OF THE FORCE MAIN AND OUTSIDE OF THE POTABLE WATER MAIN OR RECLAIMED WATER MAIN WITH THE POTABLE WATER MAIN OR RECLAIMED WATER MAIN CROSSING OVER THE FORCE MAIN.
4. FITTINGS SHALL BE RESTRAINED.
5. THE DEFLECTION TYPE CROSSING IS PREFERRED.
6. DO NOT EXCEED 75% OF MANUFACTURER'S RECOMMENDED MAXIMUM JOINT DEFLECTION FOR DUCTILE IRON PIPE. PVC PIPE CURVATURE MAY ONLY BE ACCOMPLISHED BY INSTALLING APPROPRIATE BENDS.
7. ALL EXPOSED TIE STEEL SHALL BE COATED WITH COAL-TAR EPOXY.
8. POTABLE WATER SERVICE LINES SHALL CROSS OVER WASTEWATER MAINS WITH MIN. 12" VERTICAL SEPARATION. WHERE THIS MIN. SEPARATION CAN NOT BE MAINTAINED, THE WATER SERVICE SHALL BE ENCASED IN A MIN. 10' LONG CASING CENTERED OVER THE CROSSING WITH MIN. 6" VERTICAL SEPARATION.
9. WASTEWATER MAINS, WATER MAINS, STORM PIPES AND OTHER UTILITY PIPES SHALL CROSS PERPENDICULAR WHENEVER POSSIBLE.



POTABLE WATER MAIN / FORCE MAIN PRESSURE PIPE CONFLICT DETAIL 19W

NOTES:

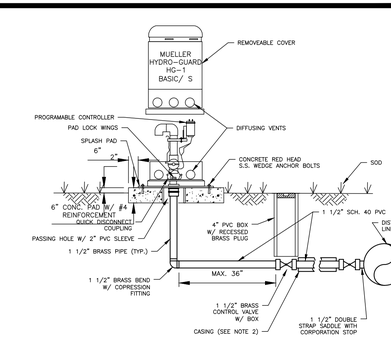
1. THE PERMANENT SAMPLING STATION SHALL BE INSTALLED AT EACH UTILITY WATER SYSTEM INTERCONNECT AND AS DIRECTED BY THE DEPARTMENT.
2. THE SAMPLING STATION SHALL BE LOCATED IN EASILY ACCESSIBLE AREA, MINIMUM 10'(FEET) FROM EDGE OF ROADWAY PAVEMENT IN GRASSED AREA.
3. ALTERNATIVE DESIGNS WILL BE ACCEPTED SUBJECT TO REVIEW AND APPROVAL BY THE DEPARTMENT.
4. ALL BRASS SHALL BE "LEAD FREE".
5. CASING IS REQUIRED FOR SERVICE PIPING UNDER PAVED AREAS.
6. THE HOUSING COLOR SHALL BE FIRE HYDRANT RED.



PERMANENT SAMPLING POINT 15W

NOTE:

1. SAMPLE POINT SHOULD BE A SERVICE LINE OR FIRE HYDRANT IF POSSIBLE.
2. THREADED AREAS OF CORPORATION STOP SHALL BE SPIRAL WRAPPED WITH TWO WRAPS OF TEFLON TAPE.
3. CLOSE AND CAP CORPORATION STOP AFTER SAMPLING COMPLETION.



POTABLE WATER MAIN TEMPORARY SAMPLING POINT 16W

NOTES:

1. USE HYDRANT WRENCH ONLY.
2. ALL PIPES AND FITTINGS SCH. 40 P.V.C. (PIPE COLOR : WHITE)

POTABLE WATER MAIN FIRE HYDRANT SAMPLING POINT 17W

NOTES:

1. 12" MINIMUM CLEARANCE TO BE MAINTAINED BETWEEN AUTOMATIC FLUSHING SYSTEM PAD AND ANY OBSTRUCTION.
2. FOR INSTALLATION OF SERVICES UNDER DRIVEWAYS AND ROADWAYS, USE MIN. 4" DIAMETER BLACK IRON, PVC SCH 40, OR HDPE SDR 9 CASING. CASING SHALL EXTEND MIN. 24" BEYOND EDGE OF PAVEMENT. CASING TO BE SEALED WITH CEMENT. CASING SHALL BE COLOR-CODED BLACK, WHITE, BLUE, OR BLUE STRIPED.
3. AUTOMATIC FLUSHING ASSEMBLY TO BE INSTALLED AS CLOSE AS POSSIBLE TO THE WATER MAIN.
4. BEDDING (MIN. 4") AND COVER (MIN. 4") OVER SERVICE LINE OR CASING SHALL CONSIST OF FINE GRANULAR MATERIAL. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED WITH 2" MAXIMUM SIZE.
5. ALL HARDWARE FOR FLANGED CONNECTIONS (BOLTS, ETC.) TO BE STAINLESS STEEL.
6. THREADED AREAS OF CORPORATION STOP AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO (2) WRAPS OF TEFLON TAPE. ALL BRASS SHALL BE "LEAD FREE".
7. A 4" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED. THE BASE SHALL EXTEND MINIMUM 12" BEYOND AUTOMATIC FLUSHING ASSEMBLY PAD PERIMETER.

AUTOMATIC FLUSHING ASSEMBLY (TYPE A) 43W

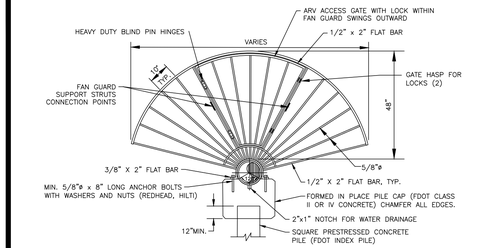
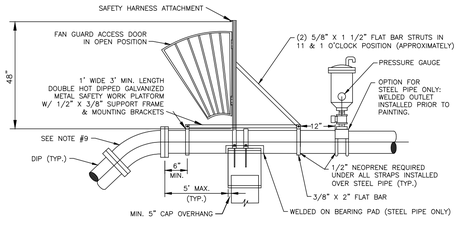
SHEET NUMBER 2 OF 4

SEAL

Jan 15, 2021



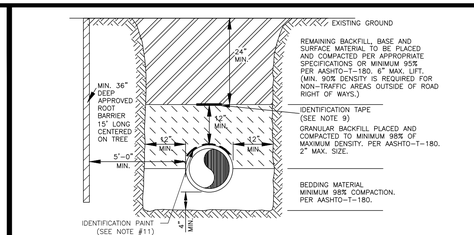


A.R.V. DETAIL

NOTES:

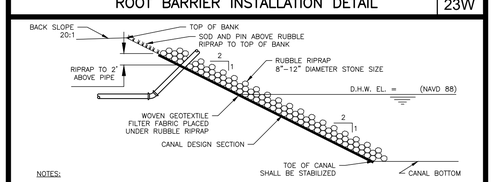
1. ALL EXPOSED PIPE SHALL BE DUCTILE IRON OR PREFABRICATED STEEL WITH FLANGED FITTINGS AND PROFILED GASKETS. RETAINER GLANDS AND/OR UNIFLANGE TYPE FITTINGS ARE NOT TO BE SUBSTITUTED FOR FLANGED FITTINGS. PREFABRICATED STEEL PIPE MAY INCORPORATE WELDED ON LONG RADIUS UPPER BENDS. PREFABRICATED FLANGED PIPE SHALL BE FACTORY TESTED.
2. SPAN LENGTHS AS REQUIRED BY PERMITTING AGENCY
3. FAN GUARDS ARE REQUIRED. SEE FAN GUARD/PILE CAP DESIGN DETAILS FOR ADDITIONAL REQUIREMENTS. ACCESS PLATFORM AND GATE REQUIRED ON ARV SIDE ONLY.
4A. ALL EXPOSED PIPING SHALL BE PAINTED AS SPECIFIED IN THE APPROVED MATERIAL LIST.
4B. ALL HARDWARE SHALL BE PAINTED WITH COAL-TAR EPOXY.
5. PIPE SHALL BE CRADLED ON ⅜" THICK NEOPRENE.(DUROMETER GRADE 50.) CURRENT FDOT STANDARDS APPLY. NEOPRENE IS REQUIRED AT ALL STRAPS INSTALLED OVER STEEL PIPE. NEOPRENE SHALL EXTEND MIN. 1" BEYOND THE EDGES OF CRADLE AND STRAPS.
6. TIE-DOWN STRAPS MUST PROPERLY FIT AND SECURE PIPE IN CRADLE.
7. PIPE CRADLE IN CAP SHALL CONTACT ⅓ CIRCUMFERENCE OF PIPE. (SEE FAN GUARD DETAIL)
8. SHOW EXISTING CANAL CROSS SECTION ULTIMATE CANAL SECTION AND RELEVANT ELEVATIONS AND DISTANCES ON A TO SCALE DETAIL DRAWING.
9. PILE LIFT CABLE SHALL BE REMOVED BELOW SURFACE; HOLE SHALL BE FILLED WITH EPOXY CEMENT.
10. THREADED AREAS OF BRASS FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO WRAPS OF TEFLON TAPE.
11. THE PRESSURE GAUGE SHALL FACE THE CLOSEST FAN GUARD.
12. THE PRESSURE GAUGE SHALL BE "ASHCROFT NO. 45–1009A" OR APPROVED EQUAL.
13. THE PILES AND CAP DESIGN SHALL BE SHOWN ON TO SCALE SIGNED AND SEALED DETAIL DRAWINGS. (MIN. 12"x12" TYPE 1A FLORIDA DOT. INDEX PILES ARE REQUIRED.) PILE PENETRATION BELOW CANAL BOTTOM SHALL BE 15' MINIMUM. MINIMUM LOAD CAPACITY OF 20 TONS PER PILE IS REQUIRED (FDOT STANDARDS APPLY). SIGNED AND SEALED SHOP DRAWINGS ARE REQUIRED.
14. STEEL PIPE SHALL HAVE WELDED ON BEARING PADS EXTENDING MIN. 1" BEYOND PIPE CRADLE THE PADS SHALL BE INSTALLED PRIOR TO PAINTING

POTABLE WATER MAIN TYPICAL AERIAL CANAL CROSSING – SINGLE PIPE (SINGLE PILES) 26W



NOTES:

1. FAN GUARDS SHALL BE PLACED AT EACH END OF CANAL CROSSING.
2. HARDWARE SHALL BE PAINTED WITH COAL TAR EPOXY.
3. FANGUARD WITH HARDWARE SHALL BE FABRICATED FROM DOUBLE HOT DIPPED GALVANIZED STEEL.
4. SHOP DRAWINGS FOR FANGUARDS, CAPS, AND PILES MUST BE SUBMITTED TO PBCWUD FOR REVIEW AND APPROVAL PRIOR TO PRE–CONSTRUCTION MEETING.
5. REINFORCING STEEL SHALL CONFORM TO ASTM A–615, GRADE 60. MIN. 2" CONCRETE COVER OVER ALL STEEL.
6. SEE "TYPICAL CANAL CROSSING DETAIL" FOR ADDITIONAL REQUIREMENTS.
7. NO WELDING OF REBAR TO REBAR OR REBAR TO PILE STRANDS SHALL BE ALLOWED.
8. DESIGN DRAWINGS ARE REQUIRED.
9. LONG RADIUS WELDED ON UPPER BENDS ARE ACCEPTABLE FOR STEEL PIPE.
10. IF A PILE/CAP STEEL CONNECTION IS REQUIRED BY DESIGNING ENGINEER, MIN. (4) #8 REINFORCEMENT BARS SHALL BE DRILLED AND DOWELED (EPOXIED) MIN. 16" DEEP INTO THE PILE AND TIED WITH THE CAP STEEL.
11. ACCESS PLATFORM AND GATE REQUIRED ON ARV SIDE ONLY.



FAN GUARD/ PILE CAP DESIGN SINGLE PILE (SINGLE PILES) 27W

NOTES:

1. BEDDING SHALL CONSIST OF IN–SITU GRANULAR MATERIAL OR WASHED AND GRADED LIMEROCK 3/8" – 7/8" SIZING. UNSUITABLE IN–SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED.
2. THE PIPE SHALL BE FULLY SUPPORTED FOR ITS ENTIRE LENGTH WITH APPROPRIATE COMPACTION UNDER THE PIPE HAUNCHES.
3. THE PIPE SHALL BE PLACED IN A DRY TRENCH.
4. BACKFILL SHALL BE FREE OF UNSUITABLE MATERIAL SUCH AS LARGE ROCK, MUCK AND DEBRIS.
5. DENSITY TESTS ARE REQUIRED IN 1 FOOT LIFTS ABOVE THE PIPE AT INTERVALS OF 400' MAXIMUM, MINIMUM 1 SET OF TESTS FOR EACH WASTEWATER GRAVITY MAIN RUN, OR AS DIRECTED BY THE INSPECTOR.
6. THE DEVELOPER/CONTRACTOR SHALL BE RESPONSIBLE TO COMPLY WITH ALL TRENCH SAFETY LAWS AND REGULATIONS.
7. SEE SEPARATE DETAILS FOR "PIPE INSTALLATION UNDER EXISTING PAVEMENT – OPEN CUT."
8. THE AFFECTED AREA SHALL BE RESTORED TO EQUAL OR BETTER CONDITION OR AS SPECIFIED IN PERMIT/CONTRACT DOCUMENTS.
9. APPROVED MAGNETIC TAPE IS REQUIRED FOR: ALL POTABLE WATER MAINS, FORCE MAINS AND RECLAIMED WATER MAINS. THE TAPE SHALL BE INSTALLED MAX. 24" BELOW FINISHED GRADE.
10. ROOT BARRIER IS REQUIRED FOR APPROVED TREE INSTALLATION CLOSER THAN 10 FEET FROM UTILITY FACILITIES.
11. CONTINUOUS 4" WIDE PAINT STRIPING IS REQUIRED FOR DIP/PCCP WATER MAINS (BLUE), DIP SEWER MAINS (GREEN), AND DIP RECLAIMED WATER MAINS (PURPLE).
12. PERMANENT ABOVE GROUND UTILITY MARKER SHALL BE INSTALLED IF REQUIRED BY PROPERTY OWNER GRANTING THE PIPE INSTALLATION PERMIT.
13. FOR PIPE INSTALLATIONS IN ROAD RIGHTS–OF–WAY, ROAD OWNER'S PERMIT SPECIFICATIONS SHALL APPLY.

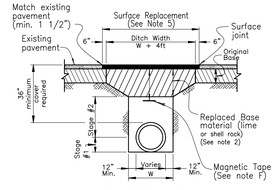
TYPICAL TRENCH DETAIL/ ROOT BARRIER INSTALLATION DETAIL 23W

NOTES:

1. RUBBLE RIPRAP TO MEET F.D.O.T. STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION AND F.D.O.T. DESIGN STANDARDS.
2. DUMP RUBBLE IN PLACE FORMING A COMPACT LAYER CONFORMING TO THE CANAL DESIGN SECTION SLOPE. ENSURE THAT RUBBLE DOES NOT SEGREGATE SO THAT SMALLER PIECES EVENLY FILL THE VOIDS BETWEEN LAGER PIECES.
3. ALTERNATIVE DESIGN WILL BE CONSIDERED, SUBJECT TO APPROVAL BY THE CANAL PROPERTY OWNER.

RUBBLE RIPRAP DETAIL 45W

CONSTRUCTION PROCEDURES



THE BACKFILL FOR THE FIRST AND SECOND STAGES SHALL BE PLACED IN 6" LIFTS (COMPACTED THICKNESS) AND SHALL BE COMPACTED TO 100% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T–99.

STAGE 1:

THE CONTRACTOR SHALL PROVIDE ADEQUATE COMPACTED FILL BENEATH THE HAUNCHES OF THE PIPE, USING MECHANICAL TAMPS SUITABLE FOR THIS PURPOSE. THIS COMPACTION APPLIES TO THE MATERIAL PLACED BENEATH THE HAUNCHES OF THE PIPE AND ABOVE ANY BEDDING REQUIRED.

STAGE 2:

THE CONTRACTOR SHALL OBTAIN A WELL–COMPACTED BED AND FILL ALONG THE SIDES OF THE PIPE AND TO A POINT INDICATING THE TOP OF SUB–GRADE MATERIAL.

REPLACEMENT OF FLEXIBLE PAVEMENT FOR PERMITTED PAVEMENT CUT

CONSTRUCTION NOTES

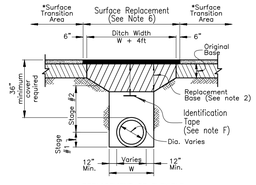
1) BEDDING SHALL CONSIST OF IN–SITU GRANULAR MATERIAL OR WASHED AND GRADED LIMEROCK 3/8" – 7/8" SIZING WITH EQUAL OR GREATER STRUCTURAL ADEQUACY AS EXISTING. UNSUITABLE IN–SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED.
2) REPLACED BASE MATERIAL (PER LAND DEVELOPMENT DESIGN STANDARDS) OVER DITCH SHALL BE TWICE THE THICKNESS OF THE ORIGINAL BASE OR 12" MINIMUM, WHICHEVER IS GREATER.
3) ASPHALT CONCRETE PAVEMENT JOINTS SHALL BE MECHANICALLY SAWED AND BUTT–JOINTED.
4) BASE MATERIAL SHALL BE PLACED IN TWO OR THREE LAYERS (6" MAX. PER LAYER) AND EACH LAYER THOROUGHLY ROLLED OR TAMPED TO THE SPECIFIED DENSITY.
5) SURFACE MATERIAL WILL BE CONSISTENT WITH THE EXISTING SURFACE OR 1 1/2" SI ASPHALTIC CONCRETE WITH RC–70 PRIME COAT AT 0.10 GAL/SQ. YD.
6) PIPE SHALL BE PLACED IN A DRY TRENCH.

GENERAL NOTES

A) ALL ROADWAY REPAIR WORK SHALL BE PERFORMED IN CONFORMANCE WITH APPLICABLE FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION AND COUNTY PPM# EL–0–3605.
B) DENSITY TESTS SHALL BE TAKEN IN 1 FT LIFTS ABOVE THE PIPE AT INTERVALS OF 400 FT MAXIMUM (1 SET MINIMUM) OR AS DIRECTED BY THE CONSTRUCTION COORDINATION DIVISION. RESULTS SHALL BE SUBMITTED TO CONSTRUCTION COORDINATION DIVISION AS PART OF THEIR FIELD REVIEW.
C) ENGINEER–OF–RECORD SHALL PROVIDE FULL–TIME INSPECTION DURING THE ENTIRETY OF THE OPEN–CUT OPERATION, BEGINNING WITH THE EXCAVATION AND CONTINUING THROUGH THE COMPLETION OF THE PAVING.
D) IF THE PAVEMENT IS NOT COMPLETELY RESTORED IMMEDIATELY FOLLOWING THE OPEN CUT, A SMOOTH TEMPORARY PATCH (MINIMUM 1.25" ASPHALT) SHALL BE INSTALLED, PROPERLY MATCHING THE EXISTING GRADING OF THE ROADWAY. THE TEMPORARY PATCH SHALL BE ALLOWED TO REMAIN IN PLACE AND BE MAINTAINED FOR A PERIOD NO LONGER THAN 45 DAYS. THE COUNTY RETAINS THE RIGHT TO USE POSTED SURETY TO COMPLETE ANY RESTORATION WORK THAT HAS NOT BEEN COMPLETED IN THE 45 DAYS PERIOD. ALTERNATIVE TEMPORARY TRENCH PROTECTION (STEEL PLATES OR OTHERS) MAY BE APPROVED BY THE CONSTRUCTION COORDINATION DIVISION.
E) FOR THE FINAL RESTORATION, THE ROAD SHALL BE MILLED AND RESURFACED WITH 1–1/2" (ONE AND A HALF INCH) OF SIII OR SI ASPHALT SURFACE COURSE FOR A FULL LANE WIDTH ENCROACHED BY THE TRENCH.
F) APPROVED MAGNETIC TAPE IS REQUIRED FOR ALL MAIN PRESSURE PIPES AND CONDUIT IN THE COUNTY'S RIGHT–OF–WAY. INSTALL TAPE 24" BELOW FINISHED GRADE.
G) CONTINUOUS 4" WIDE PAINT STRIPING IS REQUIRED FOR DIP/PCCP WATER MAINS (BLUE), DIP SANITARY MAINS (GREEN), DIP RECLAIMED WATER MAINS (PURPLE), GAS MAINS (YELLOW), OR AS REQUIRED BY THE APWA.

OPEN CUT PIPE INSTALLATION NON–THOROUGHFARE ROAD 24W

CONSTRUCTION PROCEDURES



THE BACKFILL FOR THE FIRST AND SECOND STAGES SHALL BE PLACED IN 6" LIFTS (COMPACTED THICKNESS) AND SHALL BE COMPACTED TO 100% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T–99.

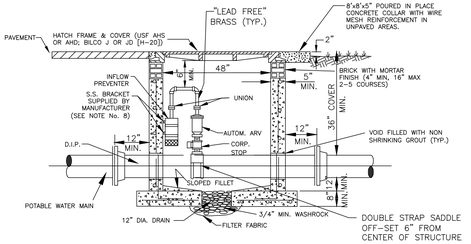
STAGE 1:

THE CONTRACTOR SHALL PROVIDE ADEQUATE COMPACTED FILL BENEATH THE HAUNCHES OF THE PIPE, USING MECHANICAL TAMPS SUITABLE FOR THIS PURPOSE. THIS COMPACTION APPLIES TO THE MATERIAL PLACED BENEATH THE HAUNCHES OF THE PIPE AND ABOVE ANY BEDDING REQUIRED.

STAGE 2:

THE CONTRACTOR SHALL OBTAIN A WELL–COMPACTED BED AND FILL ALONG THE SIDES OF THE PIPE AND TO A POINT INDICATING THE TOP OF SUB–GRADE MATERIAL.

REPLACEMENT OF FLEXIBLE PAVEMENT FOR PERMITTED PAVEMENT CUT



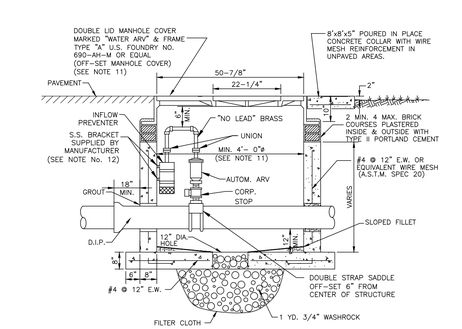
CONSTRUCTION NOTES

1) BEDDING SHALL CONSIST OF IN–SITU GRANULAR MATERIAL OR WASHED AND GRADED LIMEROCK 3/8" – 7/8" SIZING WITH EQUAL OR GREATER STRUCTURAL ADEQUACY AS EXISTING. UNSUITABLE IN–SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED.
2) REPLACED BASE MATERIAL OVER DITCH SHALL BE 16" MINIMUM FOR THOROUGHFARE PLAN ROADS.
3) ASPHALT CONCRETE PAVEMENT JOINTS SHALL BE MECHANICALLY SAWED AND BUTT–JOINTED.
4) BASE MATERIAL (PER ROADWAY PRODUCTION DESIGN STANDARDS) SHALL BE PLACED IN TWO OR THREE LAYERS (6" MAX. PER LAYER) AND EACH LAYER THOROUGHLY ROLLED ON TAMPED TO THE SPECIFIED DENSITY.
5) * SURFACE TRANSITION AREA (SEE PLANS FOR LOCATION). OVERLAY OR MILL/RESURFACE FOR A DISTANCE OF 50'ON BOTH SIDES OF THE OPEN CUT AND FOR A FULL LANE WIDTH.
6) 1" SIII ASPHALTIC CONCRETE OVER 1 1/2" SI ASPHALTIC CONCRETE WITH RC–70 PRIME COAT AT 0.10 GAL/SQ. YD.
7) PIPE SHALL BE PLACED IN A DRY TRENCH.

GENERAL NOTES

A) ALL ROADWAY REPAIR WORK SHALL BE PERFORMED IN CONFORMANCE WITH APPLICABLE FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION AND COUNTY PPM# EL–0–3605.
B) DENSITY TESTS SHALL BE TAKEN IN 1 FT LIFTS ABOVE THE PIPE AT INTERVALS OF 400 FT MAXIMUM (1 SET MINIMUM) OR AS DIRECTED BY THE CONSTRUCTION COORDINATION DIVISION. RESULTS SHALL BE SUBMITTED TO CONSTRUCTION COORDINATION DIVISION AS PART OF THEIR FIELD REVIEW.
C) ENGINEER–OF–RECORD SHALL PROVIDE FULL–TIME INSPECTION DURING THE ENTIRETY OF THE OPEN–CUT OPERATION, BEGINNING WITH THE EXCAVATION AND CONTINUING THROUGH THE COMPLETION OF THE PAVING.
D) IF THE PAVEMENT IS NOT COMPLETELY RESTORED IMMEDIATELY FOLLOWING THE OPEN CUT, A SMOOTH TEMPORARY PATCH (MINIMUM 1.25" ASPHALT) SHALL BE INSTALLED, PROPERLY MATCHING THE EXISTING GRADING OF THE ROADWAY. THE TEMPORARY PATCH SHALL BE ALLOWED TO REMAIN IN PLACE AND BE MAINTAINED FOR A PERIOD NO LONGER THAN 45 DAYS. THE COUNTY RETAINS THE RIGHT TO USE POSTED SURETY TO COMPLETE ANY RESTORATION WORK THAT HAS NOT BEEN COMPLETED IN THE 45 DAYS PERIOD. ALTERNATIVE TEMPORARY TRENCH PROTECTION (STEEL PLATES OR OTHERS) MAY BE APPROVED BY THE CONSTRUCTION COORDINATION DIVISION.
E) THE FINAL RESTORATION, THE ROAD SHALL BE MILLED/RESURFACED FOR A FULL LANE WIDTH OF THE TRAVEL LANES ENCROACHED BY THE TRENCH AREA, INCLUDING A TRANSITION AREA OF 50 FT ON EACH SIDE OF THE TRENCH, THE PAVEMENT SHALL BE MILLED AND RESURFACED PER CONSTRUCTION NOTE 6.
F) APPROVED MAGNETIC TAPE IS REQUIRED FOR ALL MAIN PRESSURE PIPES AND CONDUIT IN THE COUNTY'S RIGHT–OF–WAY. INSTALL TAPE 24" BELOW FINISHED GRADE.
G) CONTINUOUS 4" WIDE PAINT STRIPING IS REQUIRED FOR DIP/PCCP WATER MAINS (BLUE), DIP SANITARY MAINS (GREEN), DIP RECLAIMED WATER MAINS (PURPLE), GAS MAINS (YELLOW), OR AS REQUIRED BY THE APWA.

OPEN CUT PIPE INSTALLATION THOROUGHFARE ROAD 25W



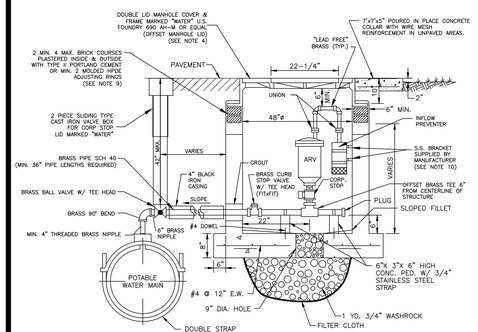
NOTES:

1. 4000 P.S.I. TYPE II PRECAST CONCRETE WITH STEEL REINFORCEMENT. SHOP DRAWING IS REQUIRED
2. AIR RELEASE VALVE SHALL BE TYPE AND SIZE APPROPRIATE FOR SERVICE INTENDED. FORCE MAINS REQUIRE 2" MIN.
3. ALL OPENINGS SHALL BE SEALED WITH WATERPROOF NON–SHRINKING GROUT.
4. OTHER VAULT AND COVER DESIGNS MAY BE USED UPON SUBMITTAL AND APPROVAL OF SHOP DRAWINGS.
5. DUCTILE IRON PIPE IS REQUIRED THROUGH THE VAULT. NO PIPE JOINTS INSIDE OR WITHIN 12" OF THE VAULT.
6. THREADED AREAS OF BRASS FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO WRAPS OF TEFLON TAPE.
7. LARGER VAULTS WILL BE REQUIRED FOR PIPES LARGER THAN 12"

PIPE SIZE	MIN. VAULT SIZE
16"–24"	4'x5'
30"–42"	4'x6'

8. SHOP DRAWINGS ARE REQUIRED FOR CUSTOM MADE BRACKETS

POTABLE WATER MAIN UNDERGROUND AIR RELEASE VALVE AND VAULT IN NON–TRAFFIC AREAS OUTSIDE OF ROAD R/W 28W

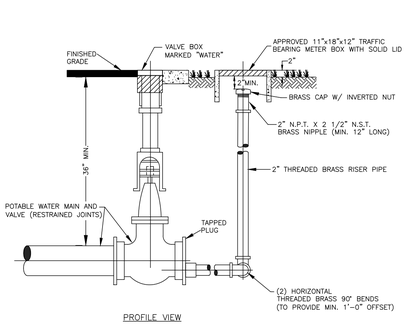


NOTES:

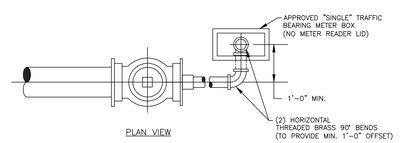
1. PRECAST CONCRETE TYPE # 4000 P.S.I. A SHOP DRAWING IS REQUIRED.
2. ALL OPENINGS SHALL BE SEALED WITH A WATERPROOF NON–SHRINKING GROUT.
3. LIFT HOLES ARE PERMITTED.
4. ALL PIPE HOLES SHALL BE PRECAST OR CORE–DRILLED.
5. MANHOLE FABRICATION SHALL BE IN ACCORDANCE WITH A.S.T.M. C–478 LATEST STANDARD.
6. CONCRETE COLLAR REQUIRED WHEN MANHOLE IS OUTSIDE OF PAVEMENT, SEE DETAIL.
7. AIR RELEASE VALVE SHALL BE TYPE AND SIZE APPROPRIATE FOR SERVICE INTENDED. FORCE MAINS REQUIRE 2" MIN.
8. DUCTILE IRON PIPE IS REQUIRED THROUGH THE VAULT. NO PIPE JOINTS INSIDE OR WITHIN 18" OF THE MANHOLE.
9. THREADED AREAS OF BRASS FITTINGS SHALL BE SPIRAL WRAP WITH TWO WRAPS OF TEFLON TAPE.
10. FOR PIPES 12" AND SMALLER, AN ALTERNATIVE DESIGN WITH APPROVED 32" DIAMETER HINGED MANHOLE COVERS WILL BE CONSIDERED.
11. LARGER MANHOLES WILL BE REQUIRED FOR PIPES LARGER THAN 12"

PIPE SIZE	MIN. MANHOLE DIAMETER
16"–24"	60"
30"–42"	72"

12. SHOP DRAWINGS ARE REQUIRED FOR CUSTOM MADE BRACKETS



POTABLE WATER MAIN AIR RELEASE MANHOLE IN PAVED AREAS AND ROAD R/W 29W

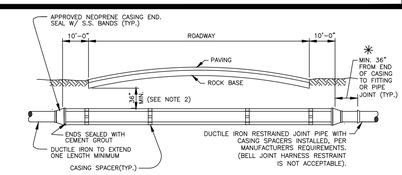


NOTES:

1. MONOLITHICALLY POURED STRUCTURE IS REQUIRED (ASTM C–478)
2. ALL OPENINGS SHALL BE SEALED WITH A WATERPROOF NON–SHRINKING GROUT.
3. ALL PIPE HOLES SHALL BE PRECAST OR CORE–DRILLED.
4. ALTERNATIVE DESIGN WILL BE CONSIDERED USING APPROVED 32" DIAMETER HINGED MANHOLE COVER
5. ARV, TAP AND PIPING TO BE TYPE AND SIZE APPROPRIATE FOR SERVICE INTENDED.
6. CONCRETE COLLAR REQUIRED IN UNPAVED AREAS.
7. SHOP DRAWING IS REQUIRED FOR REVIEW AND APPROVAL.
8. THREADED AREAS OF BRASS FITTINGS AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO WRAPS OF TEFLON TAPE.
9. IN LIEU OF BRICK WORK, APPROVED PRECAST CONCRETE ADJUSTING RINGS MAY BE USED. INSTALLATION SHALL FOLLOW MANUFACTURERS RECOMMENDATIONS.
10. SHOP DRAWINGS ARE REQUIRED FOR CUSTOM MADE BRACKETS
11. PIPE AND FITTINGS SHALL BE NO LEAD BRASS.

POTABLE WATER MAIN OFF–SET UNDERGROUND AIR RELEASE VALVE 30W

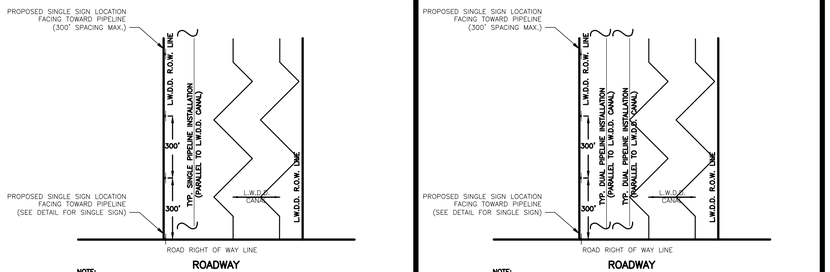
PROFILE VIEW



PLAN VIEW

NOTES:

1. BLOWOFF BOX TO BE LOCATED IN GRASS AREA, MIN. 2' FROM SIDEWALK OR PAVEMENT
2. PERMANENT DEAD ENDS SHALL INCLUDE AN APPROVED AUTOMATIC FLUSHING ASSEMBLY.
3. ALL BRASS SHALL BE "LEAD FREE".



TYPICAL 2" TERMINAL BLOWOFF POTABLE WATER DISTRIBUTION MAINS 21W

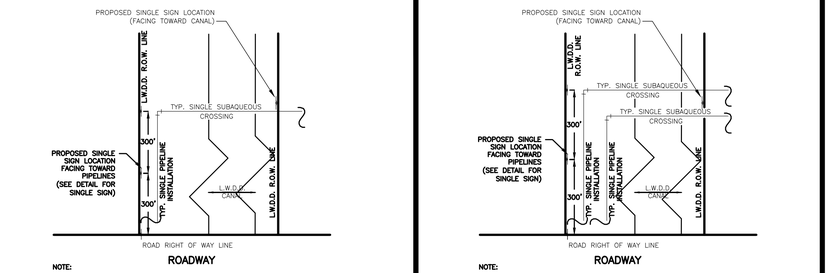
NOTE:

1. A TO–SCALE PROFILE DRAWING FOR EACH UTILITY MAIN JACK AND BORE IS REQUIRED. ALL RELEVANT DATA MUST BE SHOWN (LENGTH AND SIZE OF CASING, PIPE CONFLICTS, ELEVATIONS, ETC.).
2. THICKER WALL CASINGS AND

NOTE:

1. UNDERGROUND PIPELINE WARNING SIGNS ARE TO BE PLACED AT THE POINT IN WHICH THE LINE INGRESSES AND EGRESSES THE L.W.D.D. RIGHT-OF-WAY.
2. SIGN SPACING IS TO BE A MAXIMUM OF 300' ALONG THE L.W.D.D. RIGHT-OF-WAY, AS CLOSE AS POSSIBLE TO THE L.W.D.D. RIGHT-OF-WAY.

L.W.D.D. – SINGLE PIPE PARALLEL INSTALLATION UNDERGROUND PIPELINE SIGN INSTALLATION DETAIL



38W

NOTE:

1. UNDERGROUND PIPELINE WARNING SIGNS ARE TO BE PLACED AT THE POINT IN WHICH THE LINE INGRESSES AND EGRESSES THE L.W.D.D. RIGHT-OF-WAY.
2. SIGN SPACING IS TO BE A MAXIMUM OF 300' ALONG THE L.W.D.D. RIGHT-OF-WAY, AS CLOSE AS POSSIBLE TO THE L.W.D.D. RIGHT-OF-WAY.

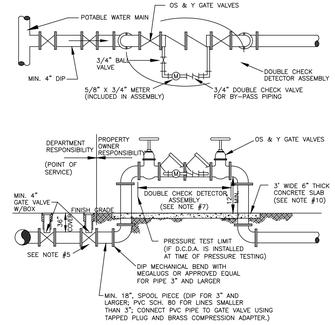
L.W.D.D. – DUAL PIPE PARALLEL INSTALLATION UNDERGROUND PIPELINE SIGN INSTALLATION DETAIL

39W

NOTE:

1. UNDERGROUND PIPELINE WARNING SIGNS ARE TO BE PLACED ON BOTH SIDES OF THE CANAL CROSSING; AT THE INSIDE EDGE OF THE RIGHT-OF-WAY.
2. SIGN POST IS NOT TO BE PLACED DIRECTLY OVER PIPELINE. OFFSET SIGN POST 5' FROM PIPELINE.

L.W.D.D. – SINGLE PIPE SUBAQUEOUS CROSSING UNDERGROUND PIPELINE SIGN INSTALLATION DETAIL



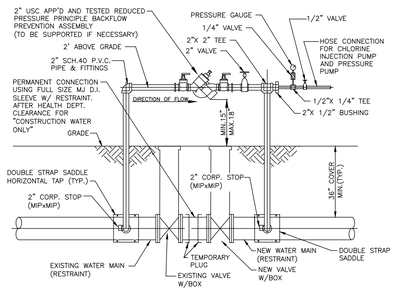
40W

NOTE:

1. UNDERGROUND PIPELINE WARNING SIGNS ARE TO BE PLACED ON BOTH SIDES OF THE CANAL CROSSING; AT THE INSIDE EDGE OF THE RIGHT-OF-WAY.
2. SIGN POST IS NOT TO BE PLACED DIRECTLY OVER PIPELINE. OFFSET SIGN POST 5' FROM PIPELINE.

L.W.D.D. – DUAL PIPE SUBAQUEOUS CROSSING UNDERGROUND PIPELINE SIGN INSTALLATION DETAIL

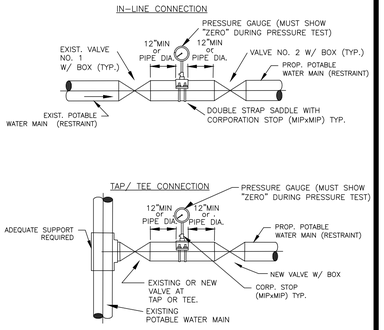
41W



NOTES:

1. ALL PIPE AND FITTINGS UP TO THE D.C.D.A. SHALL BE DUCTILE IRON CEMENT LINED.
2. THE INITIAL TEST OF THE BACKFLOW PREVENTION ASSEMBLY SHALL BE PERFORMED BY THE DEPARTMENT PRIOR TO SERVICE ACTIVATION.
3. THE DOUBLE CHECK DETECTOR ASSEMBLY SHALL BE APPROVED BY THE UNIVERSITY OF SOUTHERN CALIFORNIA (U.S.C.) OR THE A.S.S.E. (WITH ONE YEAR FIELD TESTING).
4. THE PROPERTY OWNER SHALL BE RESPONSIBLE FOR THE PROPER OPERATION, MAINTENANCE AND SUBSEQUENT TESTING OF THE DOUBLE CHECK DETECTOR ASSEMBLY BY A CERTIFIED BACKFLOW TECHNICIAN .
5. WHEN FIRE LINE LENGTH IS OVER ONE PIPE LENGTH, LINE SHALL BE TERMINATED WITH A GATE VALVE (=POINT OF SERVICE). NO PIPE JOINTS / CONNECTIONS ARE PERMITTED BETWEEN POINT OF SERVICE AND VERTICAL 90° BEND
6. THE DESIGN SHALL MINIMIZE ANY POTENTIAL FOR WATER MAIN WITH NO FLOW. A FIRE HYDRANT LOCATED NEAR THE DOUBLE CHECK DETECTOR ASSEMBLY MAY BE REQUIRED FOR LONG, DEAD ENDING DEDICATED FIRE LINES.
7. AN APPROVED REDUCED PRESSURE PRINCIPLE DETECTOR ASSEMBLY SHALL BE REQUIRED FOR ALL FIRE SYSTEMS WITH STORAGE TANKS AND/OR AUXILIARY WATER SUPPLY.
8. TAMPER SWITCHES MAY BE REQUIRED BY THE FIRE MARSHALL.
9. PIPE MATERIAL ON THE CUSTOMER SIDE OF POINT OF SERVICE SHALL COMPLY WITH FIRE MARSHALL REQUIREMENTS
10. 3' WIDE 6" THICK CONCRETE SLAB IS RECOMMENDED FOR ASSEMBLY SMALLER THAN 4".

DOUBLE CHECK DETECTOR ASSEMBLY



32W

1. ENSURE PROPER RESTRAINT OF EXISTING VALVE AND EXISTING PIPE PRIOR TO NEW PIPE CONNECTION.
2. ENSURE PROPER OPERATION OF EXISTING VALVE.
3. INSTALL BY-PASS PIPING AS SHOWN. A NEARBY HYDRANT OR SERVICE TAP MAY BE USED AS A WATER SOURCE.
4. USING BY-PASS AND CHLORINE INJECTOR PUMP, DISINFECT NEW WATER MAIN (MIN. 50 CHLORINE PPM IS REQUIRED FOR DISINFECTION).
5. COMPLETE FILLING OF THE NEW WATER MAIN AND PERFORM BACTERIOLOGICAL TESTING.
6. REMOVE EXISTING BLOW OFF (IF APPLICABLE) AND EXISTING PLUG, CONNECT NEW MAIN TO EXISTING VALVE.
7. CRACK OPEN EXISTING VALVE AFTER INITIAL DISINFECTION AND FLUSH THE NEW WATER MAIN (PBCWUD PRESENCE IS REQUIRED).
8. REMOVE BY-PASS PIPING. CAP CORPORATION STOPS WITH BRASS CAPS.
9. PRESSURE TESTING IS REQUIRED AFTER SUCCESSFUL COMPLETION OF BACTERIOLOGICAL TESTING AND HEALTH DEPARTMENT RELEASE FOR "CONSTRUCTION WATER"(IF APPLICABLE). PRESSURE TEST TO BE PERFORMED AFTER BACKFILL/ ROAD BASE AND ROAD ROCK BASE INSTALLATION/ COMPACTION.
10. AN ALTERNATIVE TIE-IN PROCEDURE (PRESSURE TESTING PRIOR TO BACTERIOLOGICAL TESTING) MAY BE CONSIDERED WITH PRIOR APPROVAL. (SEE SEPARATE DETAIL).
11. RECORD DRAWINGS TO SHOW DATA FOR ALL TEST TAPS.
12. ALL BRASS SHALL BE "LEAD FREE".

STANDARD POTABLE WATER MAIN TIE-IN

33W

NOTES:

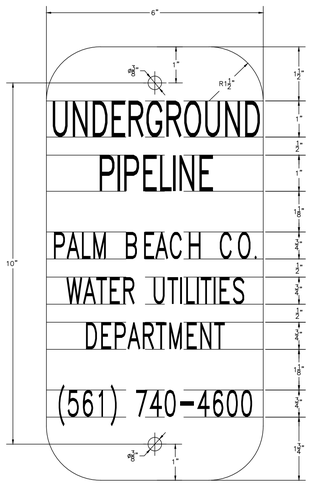
1. THE "ALTERNATIVE" PROCEDURE MUST BE APPROVED BY WUD IN ADVANCE. IT ALLOWS THE NEW PIPE TO BE PRESSURE TESTED PRIOR TO BACTERIOLOGICAL TESTING.
2. BOTH VALVES SHALL BE KEPT CLOSED EXCEPT FOR FILLING AND FLUSHING.
3. WUD SHALL BE NOTIFIED BEFORE FILLING AND FLUSHING.
4. PRESSURE TEST PUMP MAY BE CONNECTED TO SERVICE LINE, FIRE HYDRANT OR BLOWOFF IN THE TESTED WATER MAIN. NO EXTRA TAPS ARE PERMITTED UNLESS UNAVOIDABLE.
5. GAUGE AND RISER TO BE REMOVED AFTER PRESSURE TEST, HOLE TO BE PLUGGED AT SADDLE WITH BRASS PLUG. A BRASS CAP IS REQUIRED.
6. THREAD AREAS OF CORPORATION STOP SHALL BE SPIRAL WRAPPED WITH TWO WRAPS OF TEFLON TAPE.
7. ENSURE PROPER RESTRAINT OF EXISTING VALVE(S) AND PIPE PRIOR TO NEW CONNECTION.
8. SEE ALSO DETAIL FOR "STANDARD POTABLE WATER MAIN TIE-IN PROCEDURE"
9. RECORD DRAWINGS TO SHOW DATA FOR ALL TEST TAPS.
10. ALL BRASS SHALL BE "LEAD FREE".

ALTERNATIVE WATER MAIN TIE-IN

42W

GENERAL NOTES

DEFINITIONS



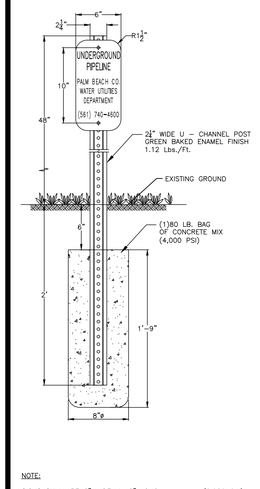
1. DEPARTMENT – THE PALM BEACH COUNTY WATER UTILITIES DEPARTMENT.
2. CONTRACTOR – UTILITY CONTRACTOR AND ALL UTILITY SUBCONTRACTORS.
3. ENGINEER – ENGINEER RESPONSIBLE FOR INSPECTION AND CERTIFICATION.

PROCEDURE

1. A PRE-CONSTRUCTION MEETING IS TO BE HELD PRIOR TO DELIVERY OF MATERIALS AND INITIATION OF ANY POTABLE WATER, RECLAIMED WATER AND/OR WASTEWATER SYSTEM CONSTRUCTION. THE MEETING SHALL BE ATTENDED BY THE DEPARTMENT, CONTRACTOR, ENGINEER AND OTHER INTERESTED PARTIES.
2. ANY REVISIONS TO THE APPROVED PLANS SHALL BE CALLED TO THE ATTENTION OF THE DEPARTMENT PRIOR TO THE PRE-CONSTRUCTION MEETING. REVISED PLANS MUST BE APPROVED PRIOR TO THE MEETING.
3. FIVE (5) COPIES OF THE CURRENT APPROVED MATERIAL LIST AND ALL NECESSARY SHOP DRAWINGS SHALL BE SUBMITTED FOR APPROVAL PRIOR TO SCHEDULING OF THE PRE-CONSTRUCTION MEETING.
4. ALL APPLICABLE PERMITS MUST BE OBTAINED PRIOR TO PRECONSTRUCTION MEETING. (DOT, HEALTH DEPARTMENT, COUNTY ENGINEER, ETC.).
5. THE CONTRACTOR SHALL MAINTAIN A CURRENT APPROVED SET OF CONSTRUCTION PLANS ON JOB SITE.
6. ALL MATERIALS SUPPLIED SHALL CONFORM TO PRODUCT LIST AND SHOP DRAWINGS AS APPROVED PRIOR TO CONSTRUCTION. SUBSTITUTE MATERIALS SHALL NOT BE APPROVED AFTER DELIVERY TO THE JOB SITE. ALL REQUESTS FOR MATERIAL SUBSTITUTION SHALL BE APPROVED PRIOR TO DELIVERY OF THESE MATERIALS TO THE JOB SITE.
7. THE LOCATIONS OF EXISTING UTILITIES SHOWN ON THE APPROVED PLANS ARE TO BE VERIFIED IN THE FIELD BY THE CONTRACTOR. APPROVAL OF DEVELOPMENT PLANS BY THE DEPARTMENT IN NO WAY IMPLIES VERIFICATION OF THE ACCURACY OF THOSE PLANS OR FEATURES DEPICTED THEREON. ANY DISCREPANCY IN OR VARIATION FROM THE APPROVED PLANS IS TO BE BROUGHT TO THE ATTENTION OF THE DEPARTMENT BY THE ENGINEER AND CONTRACTOR. THE CONTRACTOR SHALL CONFIRM AND INSTALL (IF NECESSARY) ADEQUATE MECHANICAL PIPE / JOINT RESTRAINT ON EXISTING PIPES PRIOR TO CONNECTION.
8. THE CONTRACTOR SHALL BE RESPONSIBLE AT ALL TIMES THROUGHOUT THE DURATION OF CONSTRUCTION FOR THE PROTECTION OF EXISTING AND NEWLY INSTALLED UTILITIES FROM DAMAGE OR DISRUPTION OF SERVICE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR TAKING SUCH MEASURES AS NECESSARY TO PROTECT THE HEALTH, SAFETY AND WELFARE OF THOSE PERSONS HAVING ACCESS TO THE WORK SITE.
9. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING LOCATIONS FROM ALL OTHER UTILITY FACILITIES.
10. THE CONTRACTOR OR ENGINEER SHALL SCHEDULE INSPECTIONS AND TESTS A MINIMUM OF 24-48 HOURS IN ADVANCE.
11. NO CONNECTION TO OR ANY OTHER CONSTRUCTION SHALL BE PERFORMED ON AN EXISTING DEPARTMENT OWNED OR MAINTAINED MAIN OR STRUCTURE WITHOUT THE PRESENCE OF A DEPARTMENT INSPECTOR.
12. FACILITIES PROPOSED HEREIN SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE APPROVED PLANS AND THE DEPARTMENT'S MINIMUM STANDARDS. CONFLICTS BETWEEN THE PRECEDING DOCUMENTS SHOULD BE CALLED TO THE ATTENTION OF THE DEPARTMENT FOR RESOLUTION. DEVIATIONS FROM THE APPROVED PLANS MUST BE APPROVED IN ADVANCE BY THE DEPARTMENT.
13. UPON COMPLETION OF CONSTRUCTION, A FINAL INSPECTION SHALL VERIFY PROPER ADHERENCE TO ALL FACETS OF THE PLANS AND SPECIFICATIONS.

PRESSURE PIPE NOTES

1. THERE SHALL BE 36" MINIMUM COVER FROM FINISHED GRADE TO TOP OF PIPE.
2. DUCTILE IRON PIPE (DIP) THICKNESS SHALL CONFORM TO THE DEPARTMENT'S APPROVED MATERIAL LIST. POTABLE WATER AND RECLAIMED WATER MAINS DIP SHALL BE CEMENT LINED. FORCE MAIN DIP SHALL BE CERAMIC EPOXY LINED.
3. PVC PRESSURE PIPE SHALL BE C-900, SDR-18, 150 PSI.
4. ALL FITTINGS SHALL BE DUCTILE IRON WITH MECHANICAL JOINTS AND CEMENT OR APPROVED EPOXY LINING.
5. POTABLE WATER, RECLAIMED WATER AND WASTEWATER FORCE MAIN VALVES 10 INCHES AND SMALLER SHALL BE RESILIENT SEAT GATE VALVES. TWELVE-INCH (12") OR LARGER FORCE MAIN VALVES SHALL BE RESILIENT SEAT GATE VALVES OR ECCENTRIC PLUG VALVES (IF APPROVED IN ADVANCE BY DEPARTMENT). POTABLE WATER AND RECLAIMED WATER MAIN VALVES LARGER THAN 10 INCHES SHALL BE BUTTERFLY VALVES.
6. ALL TRENCHING, PIPE-LAYING, BACKFILL, PRESSURE TESTING, AND DISINFECTION MUST COMPLY WITH ALL APPLICABLE FEDERAL, STATE, COUNTY AND HEALTH DEPARTMENT STANDARDS AND REGULATIONS.

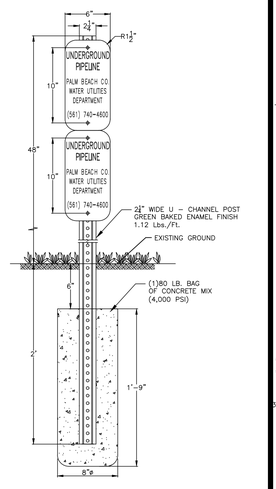


NOTE:

SIGN SHALL BE 6" WIDE X 12" LONG, ALUMINUM (0.080 GA.). SIGN COLOR IS WHITE WITH BLACK LETTERING. ROUNDED CORNERS (1.5" RAD.), 2 HOLES (3/8" DIAM.), 10" O.C.

UNDERGROUND PIPELINE SIGN DETAIL

35W

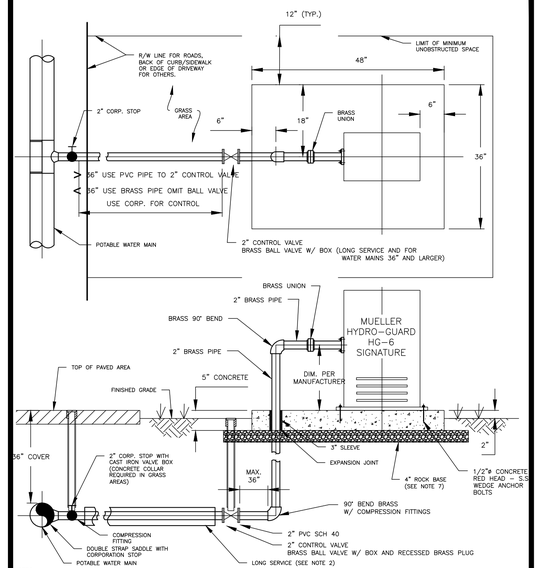


NOTE:

SIGNS SHALL BE 6" WIDE X 12" LONG, ALUMINUM (0.080 GA.). SIGN COLOR IS WHITE WITH BLACK LETTERING. ROUNDED CORNERS (1.5" RAD.), 2 HOLES (3/8" DIAM.), 10" O.C.

SINGLE UNDERGROUND PIPELINE SIGN DETAIL

36W



NOTES:

1. SIGNS SHALL BE 6" WIDE X 12" LONG, ALUMINUM (0.080 GA.) SIGN COLOR IS WHITE WITH BLACK LETTERING. ROUNDED CORNERS (1.5" RAD.), 2 HOLES (3/8" DIAM.), 10" O.C.
2. THE DUAL UNDERGROUND PIPELINE SIGN SHALL BE UTILIZED FOR TWO UNDERGROUND PIPELINES WITHIN THE L.W.D.D. RIGHT-OF-WAY.

DUAL UNDERGROUND PIPELINE SIGN DETAIL

37W

NOTES:

1. 12" MINIMUM CLEARANCE TO BE MAINTAINED BETWEEN AUTOMATIC FLUSHING SYSTEM PAD AND ANY OBSTRUCTION.
2. FOR INSTALLATION OF SERVICES UNDER DRIVEWAYS AND ROADWAYS, USE MIN. 4" DIAMETER BLACK IRON, PVC SCH 40, OR HDPE SDR 9 CASING. CASING SHALL EXTEND MIN. 24" BEYOND EDGE OF PAVEMENT. CASING TO BE SEALED WITH CEMENT. CASING SHALL BE COLOR-CODED BLACK, WHITE, BLUE, OR BLUE STRIPED.
3. AUTOMATIC FLUSHING ASSEMBLY TO BE INSTALLED AS CLOSE AS POSSIBLE TO THE WATER MAIN.
4. BEDDING (MIN. 4") AND COVER (MIN. 4") OVER SERVICE LINE OR CASING SHALL CONSIST OF FINE GRANULAR MATERIAL. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED WITH 2" MAXIMUM SIZE.
5. ALL HARDWARE FOR FLANGED CONNECTIONS (BOLTS, ETC.) TO BE STAINLESS STEEL.
6. THREADED AREAS OF CORPORATION STOP AND OTHER FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO (2) WRAPS OF TEFLON TAPE. ALL BRASS SHALL BE "LEAD FREE".
7. A 4" THICK COMPACTED 3/4" ROCK BASE IS REQUIRED. THE BASE SHALL EXTEND MINIMUM 12" BEYOND AUTOMATIC FLUSHING ASSEMBLY PAD PERIMETER.

AUTOMATIC FLUSHING ASSEMBLY (TYPE B)

NOTES:

1. THE DATA IN THE ABOVE TABLE ARE BASED UPON THE FOLLOWING INSTALLATION CONDITIONS:
   SOIL TYPE-SAND TEST PRESSURE-150 PSI/200 PSI DEPTH OF BURY-3'
   TRENCH TYPE-3 SAFETY FACTOR- 1.5 VERTICAL OFFSET-3'
   MINIMUM PIPE LENGTH ALONG TEE RUN-5'
2. THE RESTRAINED PIPE LENGTHS APPLY TO DUCTILE IRON AND PVC PIPE.
3. ALL JOINTS BETWEEN UPPER AND LOWER BENDS SHALL BE RESTRAINED.
4. RESTRAINED PIPE LENGTHS APPLY TO PIPE ON BOTH SIDES OF VALVES AND FITTINGS.
5. MULTIPLY PIPE LENGTH BY 1.4 FOR POLYETHYLENE ENCASED PIPE.
6. RESTRAINED PIPE LENGTHS EQUAL TO AN "INLINE VALVE" CONDITION ARE REQUIRED AT EACH END OF A TRANSITION FROM HDPE PIPE TO OTHER PIPE MATERIALS.
7. DESIGN ENGINEER IS RESPONSIBLE TO PROPERLY SIZE THE RESTRAINT PIPE LENGTHS FOR THE PROJECT

MECHANICAL THRUST RESTRAINT MINIMUM PIPE LENGTHS

34W

MAXIMUM QUANTITY OF WATER (GALLONS PER HOUR) THAT MAY BE SUPPLIED TO MAINTAIN PRESSURE WITHIN 5 P.S.I. OF THE SPECIFIED TEST PRESSURE

(MECHANICAL OR PUSH-ON JOINT, 18 FT. NOMINAL LENGTHS, PER 1000 FT. OF PIPE)

AVG. TEST PRESSURE PSI	PIPE DIAMETER (INCHES) 2	3	4	6	8	10	12	14	16	18	20	24	30	36	42	48
150	0.10	0.14	0.18	0.27	0.37	0.46	0.55	0.64	0.73	0.83	0.92	1.10	1.38	1.65	1.93	2.20
200	0.10	0.15	0.21	0.31	0.42	0.53	0.63	0.74	0.84	0.95	1.06	1.27	1.59	1.91	2.22	2.54

FORMULA BASIS: $L = \frac{(S) \times (D) \times (P)^{1/2}}{148{,}000} \times 1/2$

L = MAXIMUM QUANTITY OF WATER TO BE ADDED (GALLONS PER HOUR)
S = LENGTH OF PIPE TESTED (FEET)
D = DIAMETER OF PIPE (INCHES)
P = TEST PRESSURE (P.S.I.)

NOTES:

1. TO OBTAIN THE MAXIMUM QUANTITY OF WATER FOR PIPE WITH 20 FT. NOMINAL LENGTHS, MULTIPLY THE QUANTITY CALCULATED FROM THE TABLE BY 0.9
2. THE MAXIMUM QUANTITY OF ADDED WATER FOR A PIPELINE IS CALCULATED BY MULTIPLYING THE QUANTITY PER HOUR AS OBTAINED FROM THE ABOVE TABLE, BY THE DURATION OF THE TEST IN HOURS,AND BY THE TOTAL LENGTH OF THE LINE BEING TESTED DIVIDED BY 1,000. IF THE LINE UNDER TEST CONTAINS SECTIONS OF VARIOUS DIAMETERS, THE MAXIMUM QUANTITY ADDED WILL BE THE SUM OF THE COMPUTED QUANTITIES FOR EACH SIZE.
3. MAXIMUM TEST LENGTH = 2,500 FEET PER SECTION.
4. THIS STANDARD SHALL REFLECT ANY REVISION OF A.W.W.A. C-600. HOWEVER, THE MAXIMUM QUANTITY OF WATER ADDED SHALL NOT EXCEED 50% OF THE RECOMMENDED LIMIT PER APPLICABLE AWWA C-600 STANDARD.
5. STANDARD TEST PRESSURE = 150 P.S.I.; 200 P.S.I. FOR MAINS LARGER THAN 24"
6. PRESSURE TEST DURATION TO BE MIN. 2 HOURS.

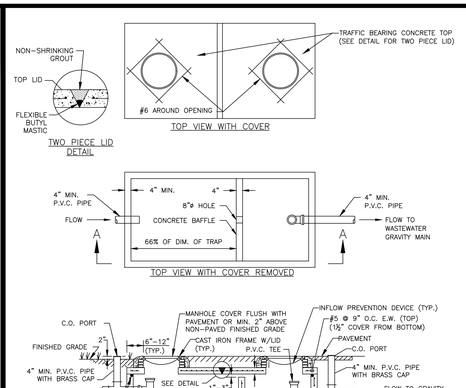
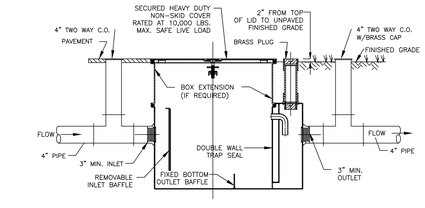
PROJECT NO. 149658011



FONTANA

NOTES:

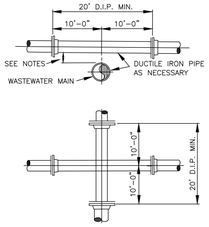
1. GREASE INTERCEPTORS SHALL BE WATERTIGHT AND SHALL BE BUILT OF PRE CAST CONCRETE WHICH HAS A DESIGN COMPRESSIVE STRENGTH OF MINIMUM 3000 PSI AFTER 28 DAYS CURE. THE DESIGN, SIZING AND CONSTRUCTION MUST CONFORM TO THIS STANDARD AND TO ALL APPLICABLE BUILDING CODE AND HEALTH DEPARTMENT REQUIREMENTS AND REGULATIONS, INCLUDING, BUT NOT LIMITED TO CHAPTER 64E-6, FLORIDA ADMINISTRATIVE CODE. WALL AND SLAB THICKNESS SHOWN ARE MINIMUMS, AND SHALL BE DETERMINED BY THE OWNERS ENGINEER. THE CONCRETE BOX SHALL HAVE PRE CAST HOLES AND CAST-IN BOOTS WHENEVER POSSIBLE.
2. THE OIL/GREASE INTERCEPTOR SHALL BE USED FOR APPLICATIONS EXCEEDING 25 GPM FLOW RATE, DETERMINED USING THE PLUMBING AND DRAINAGE INSTITUTE PDI G101 STANDARD. A DESIGN CALCULATION MUST BE SUBMITTED FOR APPROVAL WITH A SHOP DRAWING PRIOR TO THE PRE-CONSTRUCTION MEETING. FOR APPLICATIONS UP TO 25 GPM FLOW RATE (ONE MINUTE FLOW) OR 50 GPM (TWO MINUTE FLOW), AN APPROVED OUTDOOR "GREASE TRAP" MAY BE USED; OTHER DESIGNS MAY BE CONSIDERED UPON SUBMITTAL AND APPROVAL OF SHOP DRAWINGS.
3. INSPECTION PORTS (CLEAN OUTS) SHALL BE EASILY ACCESSIBLE FOR INSPECTION/SAMPLING.
4. THE INTERCEPTOR AND CLEAN-OUTS PORT SHALL BE LOCATED OUTDOORS AND IN NON-TRAFFIC AREA WHENEVER POSSIBLE. THE SURFACE SURROUNDING THE INTERCEPTOR SHALL BE SLOPED TO DRAIN STORM WATER AWAY FROM THE INTERCEPTOR.
5. THE CAPACITY DETERMINATION FOR THE INTERCEPTOR IS THE RESPONSIBILITY OF THE OWNER/CUSTOMER. THE MINIMUM VOLUME OF ANY GREASE INTERCEPTOR SHALL BE 750 GALLONS AND THE MAXIMUM VOLUME OF A SINGLE GREASE INTERCEPTOR SHALL BE 1250 GALLONS. WHEN THE REQUIRED EFFECTIVE CAPACITY OF THE INTERCEPTOR IS GREATER THAN 1250 GALLONS, INSTALLATION OF MULTIPLE GREASE INTERCEPTORS IN SERIES IS REQUIRED.
6. NO BAFFLE IS REQUIRED IF THERE ARE MULTIPLE GREASE INTERCEPTORS INSTALLED IN SERIES. HOWEVER, CLEANOUT PORTS MUST BE INSTALLED ON EACH END OF EACH INTERCEPTOR.
7. THE PROPERTY OWNER/CUSTOMER SHALL BE RESPONSIBLE FOR THE OPERATION AND MAINTENANCE OF THE INTERCEPTOR.
8. THE GREASE INTERCEPTOR SHALL NOT BE USED FOR THE PURPOSE OF INTERCEPTING SAND AND OIL FROM NON-FOOD HANDLING ESTABLISHMENTS.
9. EACH FACILITY WITH AN OIL/GREASE INTERCEPTOR SHALL HAVE A SEPARATE (NOT SHARED) INTERCEPTOR AND SHALL BE INDIVIDUALLY METERED THROUGH THE DEPARTMENT.
10. A "GREASE TRAP" OR "OIL/GREASE INTERCEPTOR" SHALL BE REQUIRED TO RECEIVE THE DRAINAGE FROM FIXTURES AND EQUIPMENT (SINKS, DISHWASHERS, FLOOR DRAINS, CAN WASH AREAS, ETC.) WITH GREASE LADEN WASTE LOCATED IN COMMERCIAL FOOD PREPARATION AREAS SUCH AS RESTAURANTS, HOTEL KITCHENS, HOSPITALS, SCHOOL KITCHENS, BARS, FACTORY CAFETERIAS, CLUBS, ETC.
11. THE "GREASE TRAP" OR "OIL/GREASE INTERCEPTOR" SHALL BE LOCATED AS CLOSE AS PRACTICALLY POSSIBLE TO THE FIXTURES AND EQUIPMENT GENERATING GREASE.
12. A "SOLIDS INTERCEPTOR" SHALL BE CONSIDERED TO BE INSTALLED UPSTREAM OF A " GREASE TRAP" WHERE SUBSTANTIAL AMOUNT OF SOLIDS FROM FOOD GRINDERS, DISPOSALS MAY BE PRESENT.
13. MANHOLE COVER SHALL BE MACHINED TO ACCEPT INFLOW PROTECTOR.



OIL/ GREASE INTERCEPTOR * 1S

NOTES:

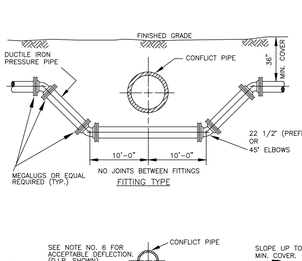
1. SAND/OIL INTERCEPTORS SHALL BE WATERTIGHT AND SHALL BE BUILT OF PRECAST CONCRETE WHICH HAS A DESIGN COMPRESSIVE STRENGTH OF MINIMUM 3000 PSI AFTER 28 DAYS CURE. THE DESIGN, SIZING AND CONSTRUCTION MUST CONFORM TO THIS STANDARD AND TO ALL APPLICABLE BUILDING CODE AND HEALTH DEPARTMENT REQUIREMENTS AND REGULATIONS, INCLUDING, BUT NOT LIMITED TO CHAPTER 64E-6, FLORIDA ADMINISTRATIVE CODE. WALL AND SLAB THICKNESS SHOWN ARE MINIMUMS, AND SHALL BE DETERMINED BY THE OWNERS ENGINEER. THE CONCRETE BOX SHALL HAVE PRECAST HOLES AND CAST-IN BOOTS WHENEVER POSSIBLE.
2. SHOP DRAWINGS ARE REQUIRED PRIOR TO PRECONSTRUCTION MEETING. OTHER DESIGNS MAY BE USED UPON SUBMITTAL AND APPROVAL OF SHOP DRAWINGS.
3. INSPECTION PORTS (CLEAN OUTS) SHALL BE EASILY ACCESSIBLE FOR INSPECTION/SAMPLING.
4. THE INTERCEPTOR SHALL BE LOCATED IN GRASS AREA/NON-TRAFFIC AREA WHENEVER POSSIBLE. THE SURFACE SURROUNDING THE INTERCEPTOR SHALL BE SLOPED TO DRAIN STORM WATER AWAY FROM THE INTERCEPTOR.
5. THE CAPACITY DETERMINATION FOR THE INTERCEPTOR IS THE RESPONSIBILITY OF THE OWNER/CUSTOMER. THE MINIMUM VOLUME OF A SAND/OIL INTERCEPTOR SHALL BE 750 GALLONS. WHEN THE REQUIRED EFFECTIVE CAPACITY OF THE SAND/OIL INTERCEPTOR IS GREATER THAN 750 GALLONS, INSTALLATION OF SINGLE COMPARTMENT SAND/OIL INTERCEPTORS IN SERIES IS REQUIRED.
6. THE PROPERTY OWNER/CUSTOMER SHALL BE RESPONSIBLE FOR THE OPERATION AND MAINTENANCE OF THE INTERCEPTOR.
7. SAND/OIL INTERCEPTOR SHALL NOT BE USED FOR THE PURPOSE OF INTERCEPTION OF GREASE FROM FOOD HANDLING ESTABLISHMENTS.
8. EACH FACILITY REQUIRED TO HAVE A SAND/OIL INTERCEPTOR SHALL HAVE A SEPARATE INTERCEPTOR AND SHALL BE INDIVIDUALLY METERED THROUGH THE DEPARTMENT.
9. MANHOLE LIDS SHALL BE MACHINED TO ACCEPT INFLOW PREVENTER.



SAND/ OIL INTERCEPTOR * 2S

NOTES:

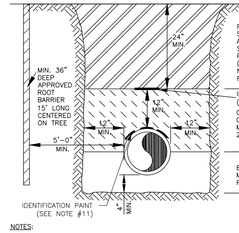
1. THE GREASE TRAP SHALL BE WATERTIGHT AND GAS TIGHT AND SHALL BE FABRICATED FROM STEEL, ACID RESISTANT COATED INTERIOR AND EXTERIOR.
2. THE GREASE TRAP SHALL BE CERTIFIED AND TAGGED BY THE SEAL OF THE PLUMBING AND DRAINAGE INSTITUTE (PDI), AND PDI RATED AT 50 GPM FLOW RATE AND 100 LBS. GREASE CAPACITY. THE GREASE TRAP SIZE, DESIGN AND INSTALLATION MUST COMPLY OR EXCEED THE APPLICABLE BUILDING CODES AND REGULATIONS.
3. THE GREASE TRAP MAY BE USED IF AN OIL/GREASE INTERCEPTOR IS NOT REQUIRED AND ONLY FOR APPLICATIONS UP TO 25 GPM FLOW RATE (ONE MINUTE FLOW) OR 50 GPM (TWO MINUTE FLOW), DETERMINED USING THE PDI G 101 STANDARD. FOR HIGHER FLOW RATES OR GREASE CAPACITY GREATER THAN 50 LBS., AN APPROVED "OIL/GREASE INTERCEPTOR" WILL BE REQUIRED. A DESIGN CALCULATION SHALL BE SUBMITTED FOR APPROVAL WITH A SHOP DRAWING PRIOR TO PRE-CONSTRUCTION MEETING. THE SHOP DRAWING SHALL BE SIGNED BY THE DESIGNING ENGINEER AND BY THE CONTRACTOR. THE PROJECT NAME WITH STREET ADDRESS OF THE FACILITY (IF AVAILABLE) SHALL BE SHOWN ON THE SHOP DRAWING. OTHER DESIGNS MAY BE USED UPON APPROVAL OF SHOP DRAWINGS.
4. THE GREASE TRAP SHALL BE LOCATED OUTDOORS, EASY ACCESSIBLE FOR MAINTENANCE AND SAMPLING, PREFERABLY IN GRASS AREA, NOT IN TRAFFIC AREA, PARKING SPACES OR SIDEWALKS. THE SURFACE SURROUNDING THE GREASE TRAP SHALL BE SLOPED TO DRAIN STORM WATER AWAY FROM THE GREASE TRAP.
5. THE GREASE TRAP SHALL NOT BE USED FOR THE PURPOSE OF INTERCEPTING SAND AND OIL FROM NON-FOOD HANDLING ESTABLISHMENTS.
6. THE PROPERTY OWNER/CUSTOMER SHALL BE RESPONSIBLE FOR THE OPERATION AND MAINTENANCE OF THE GREASE TRAP.
7. EACH FACILITY WITH A GREASE TRAP SHALL BE INDIVIDUALLY METERED THROUGH THE DEPARTMENT.
8. EACH FACILITY WHICH IS REQUIRED TO INSTALL A GREASE TRAP SHALL HAVE A SEPARATE (NOT SHARED) GREASE TRAP.
9. INSPECTION PORTS (TWO-WAY CLEAN OUTS) SHALL BE EASILY ACCESSIBLE FOR INSPECTION AND SAMPLING.
10. A "GREASE TRAP" OR "OIL/GREASE INTERCEPTOR" SHALL BE REQUIRED TO RECEIVE THE DRAINAGE FROM FIXTURES AND EQUIPMENT (SINKS, DISHWASHERS, FLOOR DRAINS, CAN WASH AREAS, ETC.) WITH GREASE LADEN WASTE LOCATED IN COMMERCIAL FOOD PREPARATION AREAS SUCH AS RESTAURANTS, HOTEL KITCHENS, HOSPITALS, SCHOOL KITCHENS, BARS, FACTORY CAFETERIAS, CLUBS, ETC.
11. THE "GREASE TRAP" OR "OIL/GREASE INTERCEPTOR" SHALL BE LOCATED AS CLOSE AS PRACTICALLY POSSIBLE TO THE FIXTURES AND EQUIPMENT GENERATING GREASE.
12. GREASE TRAPS SHALL BE EQUIPPED WITH DEVICES TO CONTROL THE RATE OF FLOW, SO THE RATE OF THE FLOW DO NOT EXCEED 25 GPM. THE FLOW CONTROL DEVICE SHALL BE INSTALLED IN ACCORDANCE WITH THE CODE AND MANUFACTURER'S INSTRUCTIONS.
13. A "SOLIDS INTERCEPTOR" SHALL BE CONSIDERED TO BE INSTALLED UPSTREAM OF A " GREASE TRAP" WHERE SUBSTANTIAL AMOUNT OF SOLIDS FROM FOOD GRINDERS, DISPOSALS MAY BE PRESENT.



GREASE TRAP * 3S

NOTES:

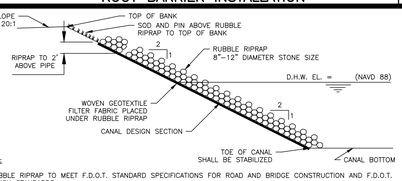
1. STORM SEWER, GRAVITY WASTEWATER AND RECLAIMED WATER MAIN CROSSING UNDER POTABLE WATER MAINS SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE INVERT OF THE UPPER PIPE AND THE CROWN OF THE LOWER PIPE. WHERE THIS MINIMUM SEPARATION CANNOT BE MAINTAINED, THE CROSSING SHALL BE ARRANGED SO THAT THE STORM/WASTEWATER/RECLAIMED WATER PIPE JOINTS AND POTABLE WATER MAIN JOINTS ARE EQUIDISTANT FROM THE POINT OF CROSSING WITH NO LESS THAN TEN (10) FEET BETWEEN ANY TWO JOINTS, BOTH PIPES SHALL BE D.I.P., AND THE MINIMUM VERTICAL SEPARATION SHALL BE 6 INCHES. WHERE THERE IS NO ALTERNATIVE TO STORM/WASTEWATER/RECLAIMED WATER PIPES CROSSING OVER A POTABLE WATER MAIN, THE CRITERIA FOR MINIMUM 12" VERTICAL SEPARATION BETWEEN LINES AND JOINT ARRANGEMENT, AS STATED ABOVE, SHALL BE REQUIRED, AND BOTH PIPES SHALL BE D.I.P. IRRESPECTIVE OF SEPARATION. D.I.P. IS NOT REQUIRED FOR STORM SEWERS.
2. WHENEVER POSSIBLE MAINTAIN MIN. TEN (10) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN POTABLE WATER MAIN AND STORM SEWER, WASTEWATER MAIN, OR FORCE MAIN (A MIN. 6" SEPARATION MAY BE APPROVED ON A CASE BY CASE BASIS). MAINTAIN MIN. THREE (3) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN RECLAIMED WATER MAIN AND POTABLE WATER MAIN, STORM SEWER, WASTEWATER GRAVITY MAIN OR FORCE MAIN.
3. FORCE MAIN CROSSING POTABLE WATER MAIN OR RECLAIMED WATER MAIN SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE OUTSIDE OF THE FORCE MAIN AND OUTSIDE OF THE POTABLE WATER MAIN OR RECLAIMED WATER MAIN WITH THE POTABLE WATER MAIN OR RECLAIMED WATER MAIN CROSSING OVER THE FORCE MAIN.
4. WASTEWATER LATERALS SHALL CROSS UNDER POTABLE WATER MAINS WITH A MIN. 12" VERTICAL SEPARATION WHENEVER POSSIBLE. WHERE THIS MINIMUM SEPARATION CANNOT BE MAINTAINED, A 20' SECTION OF DUCTILE IRON PIPE POTABLE WATER MAIN CENTERED ON THE CROSSING IS REQUIRED AND THE MINIMUM VERTICAL SEPARATION SHALL BE 6". WHERE THERE IS NO ALTERNATIVE TO A WASTEWATER LATERAL PIPE CROSSING OVER A POTABLE WATER MAIN, A MINIMUM 12" VERTICAL SEPARATION IS REQUIRED, THE LATERAL SHALL BE P.V.C. C-900 SDR18 OR BETTER, THE POTABLE WATER MAIN SHALL BE D.I.P. AND THE PIPE JOINTS SHALL BE EQUIDISTANT FROM THE POINT OF CROSSING.
5. POTABLE WATER SERVICE LINES SHALL CROSS OVER WASTEWATER MAINS WITH MIN. 12" VERTICAL SEPARATION. WHERE THIS MIN. SEPARATION CAN NOT BE MAINTAINED, THE WATER SERVICE SHALL BE ENCASED IN A MIN. 10' LONG CASING CENTERED OVER THE CROSSING WITH MIN. 6" VERTICAL SEPARATION.
6. WASTEWATER MAINS, WATER MAINS, STORM PIPES AND OTHER UTILITY PIPES SHALL CROSS PERPENDICULAR WHENEVER POSSIBLE.



POTABLE WATER, WASTEWATER MAIN AND STORM SEWER CONFLICT 4S

NOTES:

1. STORM SEWER, GRAVITY WASTEWATER AND RECLAIMED WATER MAIN CROSSING UNDER POTABLE WATER MAINS SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE INVERT OF THE UPPER PIPE AND THE CROWN OF THE LOWER PIPE. WHERE THIS MINIMUM SEPARATION CANNOT BE MAINTAINED, THE CROSSING SHALL BE ARRANGED SO THAT THE STORM/WASTEWATER/RECLAIMED WATER PIPE JOINTS AND POTABLE WATER MAIN JOINTS ARE EQUIDISTANT FROM THE POINT OF CROSSING WITH NO LESS THAN TEN (10) FEET BETWEEN ANY TWO JOINTS, BOTH PIPES SHALL BE D.I.P., AND THE MINIMUM VERTICAL SEPARATION SHALL BE 6 INCHES. WHERE THERE IS NO ALTERNATIVE TO STORM/WASTEWATER/RECLAIMED WATER PIPES CROSSING OVER A POTABLE WATER MAIN, THE CRITERIA FOR MINIMUM 12" VERTICAL SEPARATION BETWEEN LINES AND JOINT ARRANGEMENT, AS STATED ABOVE, SHALL BE REQUIRED, AND BOTH PIPES SHALL BE D.I.P. IRRESPECTIVE OF SEPARATION. D.I.P. IS NOT REQUIRED FOR STORM SEWERS.
2. WHENEVER POSSIBLE MAINTAIN MIN. TEN (10) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN POTABLE WATER MAIN AND STORM SEWER, WASTEWATER MAIN, OR FORCE MAIN (A MIN. 6" SEPARATION MAY BE APPROVED ON A CASE BY CASE BASIS.) MAINTAIN MIN. THREE (3) FEET HORIZONTAL DISTANCE (WALL TO WALL) BETWEEN RECLAIMED WATER MAIN AND POTABLE WATER MAIN, STORM SEWER, WASTEWATER GRAVITY MAIN OR FORCE MAIN.
3. FORCE MAIN CROSSING POTABLE WATER MAIN OR RECLAIMED WATER MAIN SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF TWELVE (12) INCHES BETWEEN THE OUTSIDE OF THE FORCE MAIN AND OUTSIDE OF THE POTABLE WATER MAIN OR RECLAIMED WATER MAIN CROSSING OVER THE FORCE MAIN.
4. FITTINGS SHALL BE RESTRAINED.
5. THE DEFLECTION TYPE CROSSING IS PREFERRED.
6. DO NOT EXCEED 75% OF MANUFACTURERS RECOMMENDED MAXIMUM JOINT DEFLECTION FOR DUCTILE IRON PIPE. PVC PIPE CURVATURE MAY ONLY BE ACCOMPLISHED BY INSTALLING APPROPRIATE BENDS.
7. ALL EXPOSED TIE STEEL SHALL BE COATED WITH COAL-TAR EPOXY.
8. POTABLE WATER SERVICE LINES SHALL CROSS OVER WASTEWATER MAINS WITH MIN. 12" VERTICAL SEPARATION. WHERE THIS MIN. SEPARATION CAN NOT BE MAINTAINED, THE WATER SERVICE SHALL BE ENCASED IN A MIN. 10' LONG CASING CENTERED OVER THE CROSSING WITH MIN. 6" VERTICAL SEPARATION.
9. WASTEWATER MAINS, WATER MAINS, STORM PIPES AND OTHER UTILITY PIPES SHALL CROSS PERPENDICULAR WHENEVER POSSIBLE.



POTABLE WATER MAIN/FORCE MAIN PRESSURE PIPE CONFLICT 5S

NOTES:

1. BEDDING SHALL CONSIST OF IN-SITU GRANULAR MATERIAL OR WASHED AND GRADED LIMEROCK 3/8" - 7/8" SIZING. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED.
2. THE PIPE SHALL BE FULLY SUPPORTED FOR ITS ENTIRE LENGTH WITH APPROPRIATE COMPACTION UNDER THE PIPE HAUNCHES.
3. THE PIPE SHALL BE PLACED IN A DRY TRENCH.
4. BACKFILL SHALL BE FREE OF UNSUITABLE MATERIAL SUCH AS LARGE ROCK, MUCK AND DEBRIS.
5. DENSITY TESTS ARE REQUIRED IN 1 FOOT LIFTS ABOVE THE PIPE AT INTERVALS OF 400' MAXIMUM, MINIMUM 1 SET OF TESTS FOR EACH WASTEWATER GRAVITY MAIN RUN, OR AS DIRECTED BY THE INSPECTOR.
6. THE DEVELOPER/CONTRACTOR SHALL BE RESPONSIBLE TO COMPLY WITH ALL TRENCH SAFETY LAWS AND REGULATIONS.
7. SEE SEPARATE DETAILS FOR "PIPE INSTALLATION UNDER EXISTING PAVEMENT - OPEN CUT."
8. THE AFFECTED AREA SHALL BE RESTORED TO EQUAL OR BETTER CONDITION OR AS SPECIFIED IN PERMIT/CONTRACT DOCUMENTS.
9. APPROVED MAGNETIC TAPE IS REQUIRED FOR: ALL POTABLE WATER MAINS, FORCE MAINS AND RECLAIMED WATER MAINS. THE TAPE SHALL BE INSTALLED MAX. 24" BELOW FINISHED GRADE.
10. ROOT BARRIER IS REQUIRED FOR APPROVED TREE INSTALLATION CLOSER THAN 10 FEET FROM UTILITY FACILITIES.
11. CONTINUOUS 4" WIDE PAINT STRIPING IS REQUIRED FOR DIP/PCCP WATER MAINS (BLUE), DIP SEWER MAINS (GREEN), AND DIP RECLAIMED WATER MAINS (PURPLE).
12. PERMANENT ABOVE GROUND UTILITY MARKER SHALL BE INSTALLED IF REQUIRED BY PROPERTY OWNER GRANTING THE PIPE INSTALLATION PERMIT.
13. FOR PIPE INSTALLATIONS IN ROAD RIGHTS-OF-WAY, ROAD OWNER'S PERMIT SPECIFICATIONS SHALL APPLY.

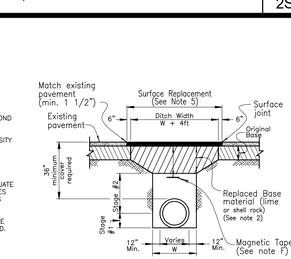
TYPICAL TRENCH DETAIL ROOT BARRIER INSTALLATION 8S

NOTES:

1. RUBBLE RIPRAP TO MEET F.D.O.T. STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION AND F.D.O.T. DESIGN STANDARDS.
2. DUMP RUBBLE IN PLACE FORMING A COMPACT LAYER CONFORMING TO THE CANAL DESIGN SECTION SLOPE. ENSURE THAT RUBBLE DOES NOT SEGREGATE SO THAT SMALLER PIECES EVENLY FILL THE VOIDS BETWEEN LAGER PIECES.
3. ALTERNATIVE DESIGN WILL BE CONSIDERED, SUBJECT TO APPROVAL BY THE CANAL PROPERTY OWNER.

RUBBLE RIPRAP DETAIL 83S

CONSTRUCTION PROCEDURES



THE BACKFILL FOR THE FIRST AND SECOND STAGES SHALL BE PLACED IN 6" LIFTS (COMPACTED THICKNESS) AND SHALL BE COMPACTED TO 100% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T-99.

STAGE 1:

THE CONTRACTOR SHALL PROVIDE ADEQUATE COMPACTED FILL BENEATH THE HAUNCHES OF THE PIPE, USING MECHANICAL TAMPS SUITABLE FOR THIS PURPOSE. THIS COMPACTION APPLIES TO THE MATERIAL PLACED BENEATH THE HAUNCHES OF THE PIPE AND ABOVE ANY BEDDING REQUIRED.

STAGE 2:

THE CONTRACTOR SHALL OBTAIN A WELL-COMPACTED BED AND FILL ALONG THE SIDES OF THE PIPE AND TO A POINT INDICATING THE TOP OF SUB-GRADE MATERIAL.

REPLACEMENT OF FLEXIBLE PAVEMENT FOR PERMITTED PAVEMENT CUT

CONSTRUCTION NOTES

1) BEDDING SHALL CONSIST OF IN-SITU GRANULAR MATERIAL OR WASHED AND GRADED LIMEROCK 3/8" - 7/8" SIZING WITH EQUAL OR GREATER STRUCTURAL ADEQUACY AS EXISTING. UNSUITABLE IN-SITU MATERIALS SUCH AS MUCK, DEBRIS AND LARGER ROCKS SHALL BE REMOVED.
2) REPLACED BASE MATERIAL (PER LAND DEVELOPMENT DESIGN STANDARDS) OVER DITCH SHALL BE TWICE THE THICKNESS OF THE ORIGINAL BASE OR 12" MINIMUM, WHICHEVER IS GREATER.
3) ASPHALT CONCRETE PAVEMENT JOINTS SHALL BE MECHANICALLY SAWED AND BUTT-JOINTED.
4) BASE MATERIAL SHALL BE PLACED IN TWO OR THREE LAYERS (6" MAX. PER LAYER) AND EACH LAYER THOROUGHLY ROLLED OR TAMPED TO THE SPECIFIED DENSITY.
5) SURFACE MATERIAL WILL BE CONSISTENT WITH THE EXISTING SURFACE OR 1 1/2" SI ASPHALTIC CONCRETE WITH RC-70 PRIME COAT AT 0.10 GAL/SQ. YD.
6) PIPE SHALL BE PLACED IN A DRY TRENCH.

GENERAL NOTES

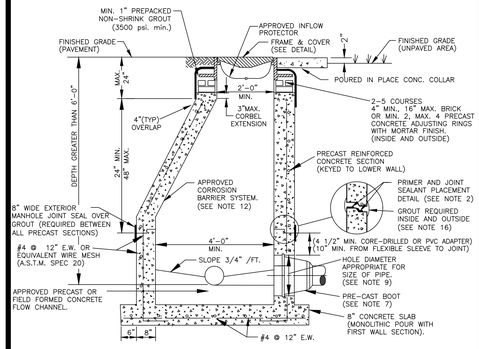
A) ALL ROADWAY REPAIR WORK SHALL BE PERFORMED IN CONFORMANCE WITH APPLICABLE FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION AND COUNTY PPM# EL-0-3606.
B) DENSITY TESTS SHALL BE TAKEN IN 1 FT LIFTS ABOVE THE PIPE AT INTERVALS OF 400 FT MAXIMUM (1 SET MINIMUM) OR AS DIRECTED BY THE CONSTRUCTION COORDINATION DIVISION. RESULTS SHALL BE SUBMITTED TO CONSTRUCTION COORDINATION DIVISION AS PART OF THEIR FIELD REVIEW.
C) ENGINEER-OF-RECORD SHALL PROVIDE FULL-TIME INSPECTION DURING THE ENTIRETY OF THE OPEN-CUT OPERATION, BEGINNING WITH THE EXCAVATION AND CONTINUING THROUGH THE COMPLETION OF THE PAVING.
D) IF THE PAVEMENT IS NOT COMPLETELY RESTORED IMMEDIATELY FOLLOWING THE OPEN CUT, A SMOOTH TEMPORARY PATCH (MINIMUM 1.25" ASPHALT) SHALL BE INSTALLED, PROPERLY MATCHING THE EXISTING GRADING OF THE ROADWAY. THE TEMPORARY PATCH SHALL BE ALLOWED TO REMAIN IN PLACE AND BE MAINTAINED FOR A PERIOD NO LONGER THAN 45 DAYS. THE COUNTY RETAINS THE RIGHT TO USE POSTED SURETY TO COMPLETE ANY RESTORATION WORK THAT HAS NOT BEEN COMPLETED IN THE 45 DAYS PERIOD. ALTERNATIVE TEMPORARY TRENCH PROTECTION (STEEL PLATES OR OTHERS) MAY BE APPROVED BY THE CONSTRUCTION COORDINATION DIVISION.
E) FOR THE FINAL RESTORATION, THE ROAD SHALL BE MILLED AND RESURFACED WITH 1-1/2" (ONE AND A HALF INCH) OF SIII OR SI ASPHALT SURFACE COURSE FOR A FULL LANE WIDTH ENCROACHED BY THE TRENCH.
F) APPROVED MAGNETIC TAPE IS REQUIRED FOR ALL MAIN PRESSURE PIPES AND CONDUIT IN THE COUNTY'S RIGHT-OF-WAY. INSTALL TAPE 24" BELOW FINISHED GRADE.
G) CONTINUOUS 4" WIDE PAINT STRIPING IS REQUIRED FOR DIP/PCCP WATER MAINS (BLUE), DIP SANITARY MAINS (GREEN), DIP RECLAIMED WATER MAINS (PURPLE), GAS MAINS (YELLOW), OR AS REQUIRED BY THE APWA.

OPEN CUT PIPE INSTALLATION NON-THOROUGHFARE ROAD 6S

CONSTRUCTION PROCEDURES

THE BACKFILL FOR THE FIRST AND SECOND STAGES SHALL BE PLACED IN 6" LIFTS (COMPACTED THICKNESS) AND SHALL BE COMPACTED TO 100% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T-99.

STAGE 1:



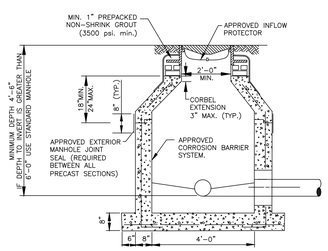
THE CONTRACTOR SHALL PROVIDE ADEQUATE COMPACTED FILL BENEATH THE HAUNCHES OF THE PIPE, USING MECHANICAL TAMPS SUITABLE FOR THIS PURPOSE. THIS COMPACTION APPLIES TO THE MATERIAL PLACED BENEATH THE HAUNCHES OF THE PIPE AND ABOVE ANY BEDDING REQUIRED.

STAGE 2:

THE CONTRACTOR SHALL OBTAIN A WELL-COMPACTED BED AND FILL ALONG THE SIDES OF THE PIPE AND TO A PO

THIS SPACE INTENTIONALLY LEFT BLANK

*



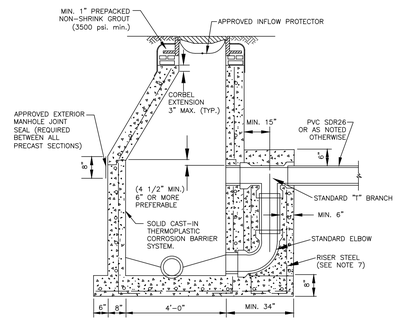
NOTES:

1. PRECAST CONCRETE TYPE II 4000 P.S.I. CALCAREOUS AGGREGATE REQUIRED (MIN. CaCO3 CONTENT: 65% IN LARGE AGGREGATE, 50% IN CONCRETE SCREENING).
2. INSTALL APPROVED JOINT SEALANT AT ALL RISER JOINTS WITH GROUT ON INSIDE AND OUTSIDE. MANHOLE SHOP DRAWINGS SHALL INCLUDE THE SIZE AND PLACEMENT OF JOINT SEALANT. AN APPROVED JOINT PRIMER SHALL BE APPLIED BY THE PRECASTER (TONGUE SECTION ONLY).
3. ALL OPENINGS SHALL BE SEALED WITH A WATERPROOF NON-SHRINKING GROUT.
4. FLOW CHANNELS SHALL BE PRECAST OR FIELD CONSTRUCTED TO DIRECT INFLUENT INTO FLOW STREAM. (SEE DETAIL)
5. LIFT HOLES ARE PERMITTED.
6. ALL PIPE HOLES SHALL BE PRECAST OR CORE – DRILLED.
7. A. FOR PVC PIPE ENTERING MANHOLE WITH PRECAST HOLES USE THE APPROVED. PRECASTED FLEXIBLE MANHOLE SLEEVE FOR THE APPROPRIATE PIPE DIAMETER AND DIMENSION RATIO. DOUBLE BANDING IS REQUIRED FOR FLEXIBLE MANHOLE SLEEVE.
   B. CONNECTION TO A MANHOLE WITH A CORE DRILLED HOLE SHALL BE MADE USING A 5" MIN. PVC C900 DR 18 AND THE APPROVED PVC-MANHOLE ADAPTER. THE ADAPTER SHALL NOT EXTEND MORE THAN 1"INTO THE MANHOLE.
   C. THE INSIDE AND OUTSIDE SPACE BETWEEN PIPE AND MANHOLE WALL SHALL BE FILLED WITH GROUT
8. INSIDE DROPS SHALL NOT BE DESIGNED TO EXCEED 1.80 FEET AND NOT CONSTRUCTED TO EXCEED 2.0 FEET, MAX. 6" INSIDE DROP IS PERMITTED FOR MANHOLES WITH 3 OR MORE INVERTS AND MANHOLES WITH A CHANGE IN FLOW DIRECTION OF MORE THAN 45 DEGREES.
9. 8" DIAMETER PIPE: 15" HOLE FOR PVC – 10" DIAMETER PIPE: 17" HOLE FOR PVC.
10. MANHOLE FABRICATION SHALL BE IN ACCORDANCE WITH ASTM C-478, LATEST STANDARD.
11. MINIMUM 5 FEET IS REQUIRED BETWEEN OUTSIDE OF MANHOLE AND A SERVICE WYE.
12. MANHOLES TO BE COATED INSIDE WITH AN APPROVED CORROSION BARRIER SYSTEM. SOLID THERMOPLASTIC CAST-IN LINER IS REQUIRED FOR LAST MANHOLE PRIOR TO LIFT STATION, MANHOLES DEEPER THAN 14 FT., MANHOLES WITH OUTSIDE DROP, AND MANHOLES WITH A FORCE MAIN CONNECTION. (SEE APPROPRIATE DETAILS)
13. APPROVED INFLOW PROTECTORS ARE REQUIRED.
14. MANHOLES IN ROADWAYS SHALL BE LOCATED OUTSIDE OF WHEEL PATHS.
15. SPECIAL PRE-APPROVED GROUT IS REQUIRED FOR PRECAST STRUCTURES WITH ANTIMICROBIAL ADMIXTURE.

STANDARD MANHOLE

*

13S



NOTE:

ALL STANDARD MANHOLE NOTES AND DETAILS ARE APPLICABLE.

SHALLOW MANHOLE

14S

NOTES:

1. ALL DETAILS AND SPECIFICATIONS FOR STANDARD MANHOLES ARE APPLICABLE EXCEPT FOR REFERENCES TO DROP ASSEMBLY AND CAST IN LINERS.
2. THE PRECAST BASE SHALL EXTEND FULLY UNDER THE DROP ASSEMBLY.
3. MASONRY CONSTRUCTION ABOVE THE EXTENDED PRECAST BASE, IF FILLED WITH CONCRETE, IS PERMISSIBLE.
4. BRICK AND CONCRETE RUBBLE ARE PERMITTED AS FILLER IN DROP ENCASEMENT.
5. DROP CONNECTIONS SHALL BE REQUIRED WHENEVER AN INFLUENT INVERT IS LOCATED 2.0 FEET OR MORE ABOVE THE MAIN INVERT CHANNEL. DROP CONNECTIONS SHOULD NOT BE DESIGNED FOR LESS THAN A 2.4 FOOT DROP.
6. PVC SDR 26 PIPE WITH PVC SDR 35 FITTINGS SHALL BE UTILIZED IN THE DROP ASSEMBLY.
7. RISER STEEL TO BE CAST IN PLACE WITH BASE (4 RODS) OR USE 4 – 1/2" DIA. COIL LOOP INSERTS CAST IN PLACE WITH BASE (TO BE USED WITH 1/2" COIL RODS). COIL LOOP INSERTS TO BE "DAYTON SUPERIOR" B16, 1/2"X 4" OR APPROVED EQUAL.

DROP CONNECTION PRECAST MANHOLE

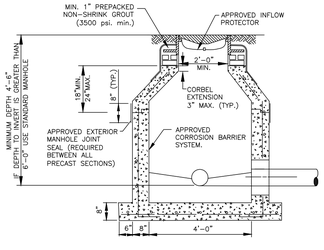
15S

GENERAL NOTES

DEFINITIONS

1. DEPARTMENT – THE PALM BEACH COUNTY WATER UTILITIES DEPARTMENT.
2. CONTRACTOR – UTILITY CONTRACTOR AND ALL UTILITY SUBCONTRACTORS.
3. ENGINEER – ENGINEER RESPONSIBLE FOR INSPECTION AND CERTIFICATION.

PROCEDURE



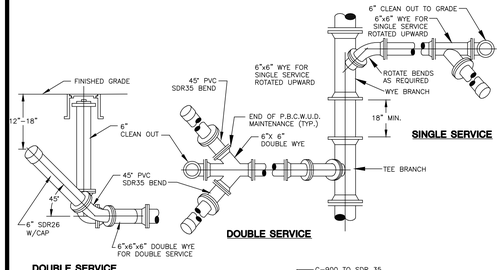
1. A PRE-CONSTRUCTION MEETING IS TO BE HELD PRIOR TO DELIVERY OF MATERIALS AND INITIATION OF ANY POTABLE WATER, RECLAIMED WATER AND/OR WASTEWATER SYSTEM CONSTRUCTION. THE MEETING SHALL BE ATTENDED BY THE DEPARTMENT, CONTRACTOR, ENGINEER AND OTHER INTERESTED PARTIES.
2. ANY REVISIONS TO THE APPROVED PLANS SHALL BE CALLED TO THE ATTENTION OF THE DEPARTMENT PRIOR TO THE PRE-CONSTRUCTION MEETING. REVISED PLANS MUST BE APPROVED PRIOR TO THE MEETING.
3. FIVE (5) COPIES OF THE CURRENT APPROVED MATERIAL LIST AND ALL NECESSARY SHOP DRAWINGS SHALL BE SUBMITTED FOR APPROVAL PRIOR TO SCHEDULING OF THE PRE-CONSTRUCTION MEETING.
4. ALL APPLICABLE PERMITS MUST BE OBTAINED PRIOR TO PRECONSTRUCTION MEETING. (DOT, HEALTH DEPARTMENT, COUNTY ENGINEER, ETC.).
5. THE CONTRACTOR SHALL MAINTAIN A CURRENT APPROVED SET OF CONSTRUCTION PLANS ON JOB SITE.
6. ALL MATERIALS SUPPLIED SHALL CONFORM TO PRODUCT LIST AND SHOP DRAWINGS AS APPROVED PRIOR TO CONSTRUCTION. SUBSTITUTE MATERIALS SHALL NOT BE APPROVED AFTER DELIVERY TO THE JOB SITE. ALL REQUESTS FOR MATERIAL SUBSTITUTION SHALL BE APPROVED PRIOR TO DELIVERY OF THESE MATERIALS TO THE JOB SITE.
7. THE LOCATIONS OF EXISTING UTILITIES SHOWN ON THE APPROVED PLANS ARE TO BE VERIFIED IN THE FIELD BY THE CONTRACTOR. APPROVAL OF DEVELOPMENT PLANS BY THE DEPARTMENT IN NO WAY IMPLIES VERIFICATION OF THE ACCURACY OF THOSE PLANS OR FEATURES DEPICTED THEREON. ANY DISCREPANCY IN OR VARIATION FROM THE APPROVED PLANS IS TO BE BROUGHT TO THE ATTENTION OF THE DEPARTMENT BY THE ENGINEER AND CONTRACTOR. THE CONTRACTOR SHALL CONFIRM AND INSTALL (IF NECESSARY) ADEQUATE MECHANICAL PIPE / JOINT RESTRAINT ON EXISTING PIPES PRIOR TO CONNECTION.
8. THE CONTRACTOR SHALL BE RESPONSIBLE AT ALL TIMES THROUGHOUT THE DURATION OF CONSTRUCTION FOR THE PROTECTION OF EXISTING AND NEWLY INSTALLED UTILITIES FROM DAMAGE OR DISRUPTION OF SERVICE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR TAKING SUCH MEASURES AS NECESSARY TO PROTECT THE HEALTH, SAFETY AND WELFARE OF THOSE PERSONS HAVING ACCESS TO THE WORK SITE.
9. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING LOCATIONS FROM ALL OTHER UTILITY FACILITIES.
10. THE CONTRACTOR OR ENGINEER SHALL SCHEDULE INSPECTIONS AND TESTS A MINIMUM OF 24-48 HOURS IN ADVANCE.
11. NO CONNECTION TO OR ANY OTHER CONSTRUCTION SHALL BE PERFORMED ON AN EXISTING DEPARTMENT OWNED OR MAINTAINED MAIN OR STRUCTURE WITHOUT THE PRESENCE OF A DEPARTMENT INSPECTOR.
12. FACILITIES PROPOSED HEREIN SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE APPROVED PLANS AND THE DEPARTMENT'S MINIMUM STANDARDS. CONFLICTS BETWEEN THE PRECEDING DOCUMENTS SHOULD BE CALLED TO THE ATTENTION OF THE DEPARTMENT FOR RESOLUTION. DEVIATIONS FROM THE APPROVED PLANS MUST BE APPROVED IN ADVANCE BY THE DEPARTMENT.
13. UPON COMPLETION OF CONSTRUCTION, A FINAL INSPECTION SHALL VERIFY PROPER ADHERENCE TO ALL FACETS OF THE PLANS AND SPECIFICATIONS.

PRESSURE PIPE NOTES

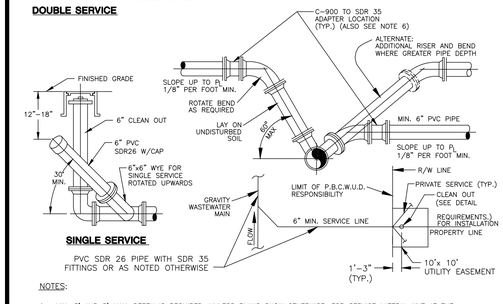
1. THERE SHALL BE 36" MINIMUM COVER FROM FINISHED GRADE TO TOP OF PIPE.
2. DUCTILE IRON PIPE (DIP) THICKNESS SHALL CONFORM TO THE DEPARTMENT'S APPROVED MATERIAL LIST. POTABLE WATER AND RECLAIMED WATER MAINS DIP SHALL BE CEMENT LINED. FORCE MAIN DIP SHALL BE CERAMIC EPOXY LINED.
3. PVC PRESSURE PIPE SHALL BE C-900, SDR-18, 150 PSI.
4. ALL FITTINGS SHALL BE DUCTILE IRON WITH MECHANICAL JOINTS AND CEMENT OR APPROVED EPOXY LINING.
5. POTABLE WATER, RECLAIMED WATER AND WASTEWATER FORCE MAIN VALVES 10 INCHES AND SMALLER SHALL BE RESILIENT SEAT GATE VALVES. TWELVE-INCH (12") OR LARGER FORCE MAIN VALVES SHALL BE RESILIENT SEAT GATE VALVES OR ECCENTRIC PLUG VALVES (IF APPROVED IN ADVANCE BY DEPARTMENT). POTABLE WATER AND RECLAIMED WATER MAIN VALVES LARGER THAN 10 INCHES SHALL BE BUTTERFLY VALVES.
6. ALL TRENCHING, PIPE-LAYING, BACKFILL, PRESSURE TESTING, AND DISINFECTION MUST COMPLY WITH ALL APPLICABLE FEDERAL, STATE, COUNTY AND HEALTH DEPARTMENT STANDARDS AND REGULATIONS.

GRAVITY SEWER NOTES

1. MANHOLES AND OTHER CASTINGS SHALL BE INSPECTED BY THE DEPARTMENT BEFORE PLACEMENT AND BEFORE APPLICATION OF THE CORROSION BARRIER SYSTEM (IF APPLICABLE).
2. ALL OPENINGS IN PRECAST MANHOLES SHALL BE CAST AT TIME OF MANUFACTURE OR CORED IN FIELD.
3. ALL MANHOLES SHALL BE SET PLUMB TO LINE AND GRADE, AND SHALL REST ON A FIRM, CAREFULLY GRADED SUBGRADE, WHICH SHALL PROVIDE UNIFORM BEARING UNDER BASE.
4. PVC WASTEWATER GRAVITY PIPE SHALL CONFORM TO ASTM D-3034, SDR 26 WITH PVC SDR 35 FITTINGS, OR PVC C-900 SDR 18, PIPE AND FITTINGS, WITH PUSH-ON RUBBER GASKET JOINTS.
5. D.I.P GRAVITY SEWER PIPE SHALL BE PRESSURE CLASS 350, EPOXY LINED.
6. THE COMPLETED GRAVITY WASTEWATER SYSTEM SHALL BE INSPECTED BY THE DEPARTMENT TO VERIFY ALIGNMENT AND INTEGRITY. THERE SHALL BE NO LEAKAGE. ALL MAINS SHALL BE LAMPED, SHOWING A FULL CIRCLE OF LIGHT. DURING THESE INSPECTIONS, THE MAIN SHALL BE CLEAN AND DRY.



NOTE:

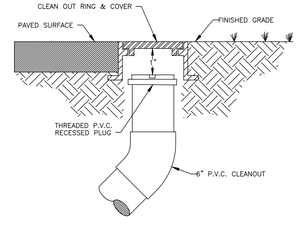


ALL STANDARD MANHOLE NOTES AND DETAILS ARE APPLICABLE.

SHALLOW MANHOLE

14S

WASTEWATER #2
STANDARD DETAILS

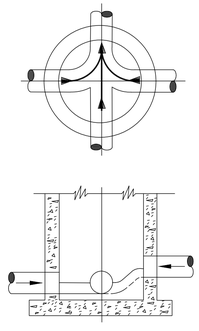


NOTES:

1. MIN. 3' AND 5' MAX. DEPTH IS REQUIRED, UNLESS PLANS SHOW OTHERWISE, FOR SERVICE LATERAL WYE AT THE CLEAN OUT ENDING P.B.C.W.U.D. OWNERSHIP AND MAINTENANCE RESPONSIBILITY.
2. CLEAN OUT IS TO BE INSTALLED PER DEPARTMENT STANDARDS PRIOR TO WATER METER INSTALLATION.
3. WASTEWATER MAIN WYE BRANCH TO MATCH MAIN PIPE MATERIAL.
4. CLEAN OUTS DESIGNATING THE END OF THE DEPARTMENT'S MAINTENANCE RESPONSIBILITY SHALL BE LOCATED WITHIN AN UTILITY EASEMENT OR RIGHT-OF WAY DEDICATED FOR UTILITIES.
5. THE DEVELOPER/PROPERTY OWNER OR ASSIGNEE SHALL BE RESPONSIBLE FOR CLEAN OUT INSTALLATION PRIOR TO WATER METER INSTALLATION AS SPECIFIED BY THE DEPARTMENT.
6. SEE MINIMUM SEPARATION STATEMENT FOR P.V.C. C-900 SDR 18 PIPE MATERIAL REQUIREMENTS AT WASTEWATER LATERAL/POTABLE WATER MAIN CROSSINGS.
7. ALONG STREETS WITH ADJACENT NON-EXCLUSIVE UTILITY EASEMENT, THE CLEANOUT ENDING PBCWUD MAINTENANCE RESPONSIBILITY SHALL BE INSTALLED 1'-3" INTO THE UTILITY EASEMENT.
8. MIN. 3' HORIZONTAL SEPARATION MUST BE MAINTAINED BETWEEN CLEANOUTS AND EDGE OF PAVEMENT, BACK OF CURB, EDGE OF DRIVEWAY, LIGHTPOLES, TRANSFORMERS, POWER POLES.

TYPICAL WASTEWATER SERVICE CONNECTION

12S

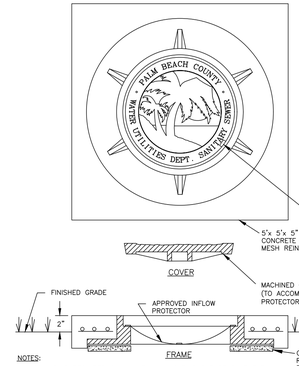


NOTES:

1. CLEANOUTS TO BE LOCATED IN GRASS AREA WHENEVER POSSIBLE, MIN. 3' FROM EDGE OF PAVEMENT, BACK OF CURB, EDGE OF DRIVEWAY, LIGHT POLES, TRANSFORMERS, OR POWER POLES.
2. CLEANOUTS SHALL NOT BE INSTALLED IN TRAFFIC LANES OR AREAS UNDER HEAVY TRAFFIC LOADS.
3. THE COVER TO BE MARKED "S".
4. CLEANOUTS TO BE INSTALLED PRIOR TO WATER METER RELEASE.
5. THE DEVELOPER/PROPERTY OWNER OR ASSIGNEE SHALL BE RESPONSIBLE FOR CLEANOUT INSTALLATION PRIOR TO WATER METER INSTALLATION AS SPECIFIED BY THE DEPARTMENT.
6. A CONCRETE COLLAR MAY BE REQUIRED IF CLEANOUT IS LOCATED BETWEEN DRIVEWAYS. A SPECIAL CONSTRUCTION DETAIL WILL BE REQUIRED.
7. ALONG STREETS WITH ADJACENT NON-EXCLUSIVE UTILITY EASEMENTS, THE CLEANOUTS ENDING PBCWUD MAINTENANCE RESPONSIBILITY SHALL BE INSTALLED MIN. 12", MAX. 18" INTO THE EASEMENT.

TYPICAL CLEANOUT INSTALLATION

11S



NOTES:

1. PROPERLY SHAPED INVERT CHANNELS AND SPILLWAYS SHALL BE CONSTRUCTED BETWEEN PIPES WITH DIFFERENT INVERT ELEVATIONS TO PROVIDE FOR SMOOTH FLOWS.
2. SERVICE LATERALS SHALL NOT ENTER MANHOLES UNLESS SPECIFIED ON PLANS AND THEN MUST BE TREATED AS MAINS (ELEVATIONS SHOWN, PRECAST HOLE, FLOW CHANNEL)
3. APPROVED PRECAST POLYPROPYLENE OR FIBER REINFORCED POLYMER (FRP) FLOW CHANNELS WITH INTEGRATED PIPE INVERTS (SEE SEPARATE DETAILS), PRECAST CONCRETE FLOW CHANNELS, OR FIELD INSTALLED CONCRETE FLOW CHANNELS ARE REQUIRED.
4. SIDEWALLS OF FLOW CHANNELS SHALL BE AT LEAST HALF OF PIPE HEIGHT AT ALL POINTS.
5. NO INSIDE DROP LARGER THAN 6" SHALL BE ALLOWED WITH 3 OR 4 INVERTS AND MANHOLES WITH A CHANGE OF DIRECTION OF FLOW OF MORE THAN 45 DEGREES.
6. THE FIELD APPLIED CORROSION BARRIER SYSTEM SHALL BE INSTALLED AFTER INVERT CHANNEL CONSTRUCTION UNLESS PRECAST THERMOPLASTIC BASELINER IS USED. THE FIELD APPLIED CORROSION BARRIER MAY NOT BE APPLIED TO THE FLOW CHANNEL.

INVERT FLOW CHANNELS

16S

NOTES:

1. COLLAR IS REQUIRED ONLY WHEN MANHOLE IS OUT OF PAVEMENT.
2. STANDARD FRAME AND COVER SIZE SHALL BE SEVEN INCHES (7"). A 4" FRAME MAY ONLY BE USED WITH PRIOR APPROVAL.
3. A STEEL MANHOLE RISER, APPROVED PRECAST CONCRETE ADJUSTING RINGS OR ADDITIONAL BRICKS MAY BE USED TO ELEVATE EXISTING MANHOLE COVERS TO RESURFACED GRADE (MAX. 4" HEIGHT).
4. COVER SHALL FIT FLUSH WITH THE FRAME WITH THE INFLOW PROTECTOR INSTALLED.

GRAVITY SEWER MANHOLE FRAME & COVER

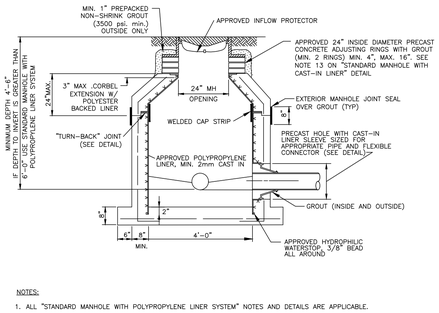
SHEET NUMBER 2 OF 5

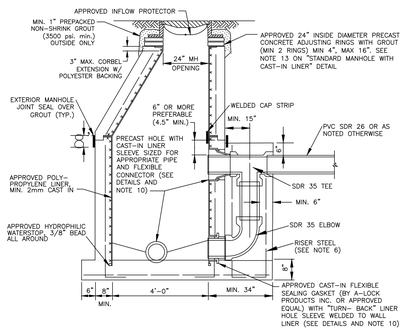
SEAL



Jan 15, 2021

NOTES:

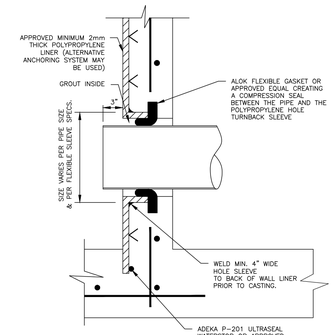
1. PRECAST CONCRETE TYPE II 4000 P.S.I. CALCAREOUS AGGREGATE REQUIRED (MIN. CaCO3 CONTENT: 65% IN LARGE AGGREGATE, 50% IN CONCRETE SCREENING).
2. APPROVED PRIMER AND SEALANT GASKET AT ALL RISER JOINTS. SEALANT GASKET SIZE AND PLACEMENT SHALL BE CALLED OUT ON SHOP DRAWINGS. PRIMER TO BE APPLIED BY THE PRECASTER (TONGUE SECTION ONLY).
3. ALL PIPE OPENINGS SHALL BE GAS TIGHT AND WATER TIGHT WITH NO EXPOSED CONCRETE SURFACES.
4. CAST OPENINGS SHALL BE MANUFACTURED WITH A POLYPROPYLENE SLEEVE CAST IN. APPROVED FLEXIBLE MANHOLE CONNECTORS SHALL BE USED AT PIPE CONNECTIONS. HOLE SIZE PER BOOT MANUFACTURER'S SPECIFICATIONS. DOUBLE PIPE CLAMPS MUST BE INSTALLED ON FLEXIBLE SLEEVES WHERE REQUIRED BY BOOT MANUFACTURERS INSTALLATION INSTRUCTIONS.
5. CORED PIPE OPENINGS SHALL BE INSTALLED PER DETAIL. APPROVED FLEXIBLE CONNECTOR WILL BE INSTALLED ONTO POLY-PROPYLENE WALL SLEEVE. WALL SLEEVE SHALL BE EPOXIED INTO CORED OPENING AND THERMAL WELDED TO WALL LINER.
6. FLOW CHANNELS SHALL BE CONSTRUCTED TO DIRECT INFLUENT INTO FLOW STREAM. APPROVED CAST-IN PP/FRP BASE LINER IS ACCEPTABLE (SEE DETAIL).
7. LIFT HOLES ARE PERMITTED.
8. INSIDE DROPS SHALL NOT BE DESIGNED TO EXCEED 1.80 FEET AND NOT CONSTRUCTED TO EXCEED 2.0 FEET, MAX. 6" INSIDE DROP IS PERMITTED FOR MANHOLES WITH 3 OR MORE INVERTS AND MANHOLES WITH A CHANGE IN FLOW DIRECTION OF MORE THAN 45 DEGREES.
9. MANHOLE FABRICATION SHALL BE IN ACCORDANCE WITH ASTM C-478, LATEST STANDARD.
10. MINIMUM 5 FEET IS REQUIRED BETWEEN OUTSIDE OF MANHOLE AND SERVICE WYE OR ANY PIPE JOINT.
11. ONLY APPROVED THERMOPLASTIC LINER SYSTEM SHALL BE USED. LINERS MUST BE WELDED BY LINER MFG CERTIFIED WELDERS AND BE CAST INTO THE MANHOLE BY A LINER MANUFACTURER CERTIFIED PRECASTER.
12. APPROVED INFLOW PROTECTORS ARE REQUIRED.
13. MAXIMUM HEIGHT OF CHIMNEY SHALL NOT EXCEED 24" (INCLUDING FRAME CASTING).
14. SEAL INVERT BENCH AND CHANNEL TO WALL LINER WITH 3M WEATHERBAN 5354 SEALANT TAPE OR APPROVED EQUAL.
15. MIN. 4" WIDE FIELD WELDED CAP STRIP IS REQUIRED FOR ALL JOINTS.
16. SOLID THERMOPLASTIC CAST-IN LINER IS REQUIRED FOR LAST MANHOLE PRIOR TO LIFT STATION. MANHOLES DEEPER THAN 14 FT., MANHOLES WITH OUTSIDE DROP, AND MANHOLES WITH A FORCE MAIN CONNECTION. (SEE APPROPRIATE DETAILS)
17. MANHOLES IN ROADWAYS SHALL BE LOCATED OUTSIDE OF WHEEL PATHS.



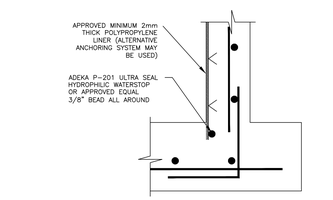
STANDARD MANHOLE WITH CAST-IN LINER 18S

NOTES:

1. ALL "STANDARD MANHOLE WITH POLYPROPYLENE LINER SYSTEM" NOTES AND DETAILS ARE APPLICABLE.
2. SEAL INVERT BENCH AND CHANNEL TO WALL LINER WITH 3M WEATHERBAN 5354 SEALANT TAPE (OR APPROVED EQUAL).
3. SEE SEPARATE DETAIL FOR OPTIONAL CAST-IN POLYPROPYLENE OR FIBER REINFORCED POLYMER BASE LINER.



SHALLOW MANHOLE WITH CAST-IN LINER 19S



NOTES:

1. ALL DETAILS AND SPECIFICATIONS FOR "STANDARD MANHOLE WITH SOLID POLYPROPYLENE LINER SYSTEM" ARE APPLICABLE EXCEPT FOR REFERENCES TO DROP ASSEMBLY.
2. THE PRECAST BASE SHALL EXTEND FULLY UNDER THE DROP ASSEMBLY.
3. PRECAST DROP ENCASEMENT REQUIRED UP TO TOP EDGE OF 90 DEGREE ELBOW, BRICK AND CONCRETE RUBBLE ARE PERMITTED AS FILLER IN REMAINDER OF DROP ENCASEMENT.
4. DROP CONNECTIONS SHALL BE REQUIRED WHENEVER AN INFLUENT INVERT IS LOCATED 2.0 FEET OR MORE ABOVE THE MAIN INVERT CHANNEL. DROP CONNECTIONS SHOULD NOT BE DESIGNED FOR LESS THAN A 2.4 FOOT DROP.
5. PVC SDR 26 PIPE WITH PVC SDR 35 FITTINGS SHALL BE UTILIZED IN THE DROP ASSEMBLY.
6. DROP ENCASEMENT REINFORCING STEEL TO BE CAST IN PLACE WITH BASE (4 RODS) OR USE 4-1/2" DIA. COIL LOOP INSERTS CAST IN PLACE WITH BASE (TO BE USED WITH 1/2" COIL RODS). COIL LOOP INSERTS TO BE "DAYTON SUPERIOR" B16, 1/2"x 4" OR APPROVED EQUAL.
7. MIN. 4" WIDE FIELD WELDED CAP STRIP IS REQUIRED OVER ALL JOINTS.
8. SEAL INVERT BENCH AND CHANNEL TO WALL LINER WITH 3M WEATHERBAN 5354 SEALANT TAPE (OR APPROVED EQUAL).
9. SEE SEPARATE DETAIL FOR OPTIONAL CAST-IN POLYPROPYLENE OR FIBER REINFORCED POLYMER BASE LINER.

OUTSIDE DROP MANHOLE WITH CAST-IN LINER 20S

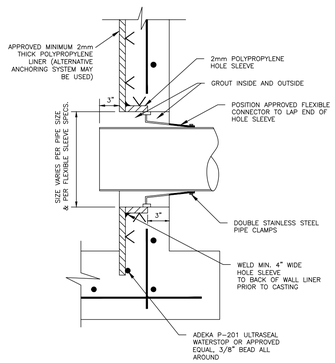
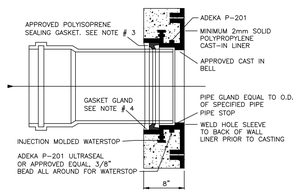
NOTE:



THIS STYLE WATERSTOP IS USED ON STRUCTURES CAST WITH A MONOLITHICALLY POURED BOTTOM SLAB.

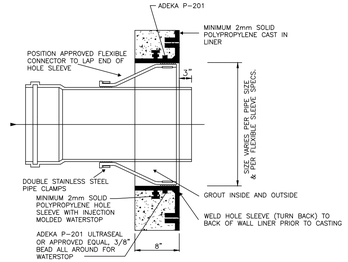
BASE MANHOLE SECTION WATERSTOP DETAIL 26S



NOTE:
THERMAL WELDING AND EPOXY OF THE SLEEVE TO BE PERFORMED BY A CONTRACTOR CERTIFIED BY THE LINER MANUFACTURER

CORED HOLE W/FLEX. CONNECTOR & TURNBACK SLEEVE POLYPROPYLENE LINER SYSTEM CAST-IN 24S

PIPE TO MANHOLE CONNECTION – TYPE "A" 21S



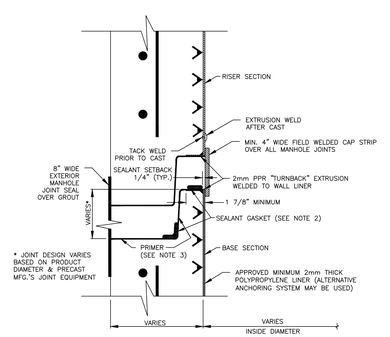
INSTALLATION:
1) CLEAN BELL
2) INSTALL GASKET AS SHOWN
3) LUBRICATE PIPE SPIGOT AND SLIDE INTO BELL AND GASKET UNTIL REACHING PIPESTOP
4) CHECK FOR WATERTIGHT CONNECTION

DO NOT LUBRICATE THE GASKET OR THE BELL

NOTES:
1) MANHOLE SHOP DRAWINGS SHALL IDENTIFY THE TYPE OF MANHOLE/PIPE CONNECTION.
2) MANHOLE SHOP DRAWINGS SHALL IDENTIFY THE PIPE SIZE, TYPE, GASKET TYPE, AND HOLE SIZE.
3) ONLY THE POLYISOPRENE GASKET SUPPLIED BY THE BELL MANUFACTURER SHALL BE USED IN COMPRESSION TYPE BELLS.
4) GASKET GLAND VARIES ACCORDING TO PIPE SIZE AND TYPE.
5) HOLE SLEEVES AND BELL CONNECTORS SHALL EXTEND TO THE OUTER PROFILE OF THE CONCRETE STRUCTURE AT MINIMUM PROVIDING A COMPLETELY LINED SURFACE WHERE THE GASKET AND HOLE LINER MATE TOGETHER.

CAST-IN BELL WITH COMPRESSION SEAL GASKET

PIPE TO MANHOLE CONNECTION – TYPE "B" 22S

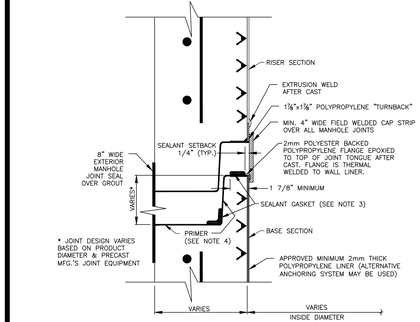


INSTALLATION:
1) CLEAN BOOT HUB
2) INSTALL RUBBER BOOT CONNECTOR (PER MANUFACTURER'S INSTRUCTIONS).
3) LUBRICATE PIPE SPIGOT AND SLIDE INTO RUBBER BOOT CONNECTOR.
4) TIGHTEN RUBBER BOOT CLAMPS (PER MANUFACTURER'S INSTRUCTIONS)
5) SECURE AND BACKFILL WITH PROPER MATERIAL AS SPECIFIED
6) CHECK FOR WATERTIGHT CONNECTION

DO NOT LUBRICATE THE BOOT CONNECTOR OR THE BOOT HUB

NOTES:
1) MANHOLE SHOP DRAWINGS SHALL IDENTIFY THE TYPE OF MANHOLE/PIPE CONNECTION.
2) MANHOLE SHOP DRAWINGS SHALL IDENTIFY THE PIPE SIZE, TYPE, GASKET TYPE, AND HOLE SIZE.
3) ONLY THE POLYISOPRENE GASKET SUPPLIED BY THE BELL MANUFACTURER SHALL BE USED IN COMPRESSION TYPE BELLS.
4) GASKET GLAND VARIES ACCORDING TO PIPE SIZE AND TYPE.
5) HOLE SLEEVES AND BELL CONNECTORS SHALL EXTEND TO THE OUTER PROFILE OF THE CONCRETE STRUCTURE AT MINIMUM PROVIDING A COMPLETELY LINED SURFACE WHERE THE GASKET AND HOLE LINER MATE TOGETHER.

TURN BACK BOOT HUB WITH BOOT CONNECTOR



PIPE TO MANHOLE CONNECTION – TYPE "C" 23S

NOTES:

1. LINER WELDING SHALL BE PERFORMED EXCLUSIVELY BY LICENSED, CERTIFIED WELDERS.
2. STRUCTURE SHOP DRAWINGS SHALL CALL OUT THE SIZE, TYPE AND PLACEMENT OF THE JOINT SEALANT.
3. JOINT PRIMER TO BE APPLIED BY THE PRECASTER (TONGUE SECTION ONLY).

TURN BACK JOINT INSTALLED PRIOR TO CAST 27S

NOTES:

1. THE "AFTER CAST" "TURNBACK" JOINT IS USED WHEN THE "PRIOR TO CAST" "TURNBACK" JOINT IS NOT FEASIBLE.
2. LINER WELDING SHALL BE PERFORMED EXCLUSIVELY BY LICENSED, CERTIFIED WELDERS.
3. STRUCTURE SHOP DRAWINGS SHALL CALL OUT THE SIZE, TYPE AND PLACEMENT OF THE JOINT SEALANT.
4. JOINT PRIMER TO BE APPLIED BY THE PRECASTER (TONGUE SECTION ONLY).

TURN BACK JOINT INSTALLED AFTER CAST 28S

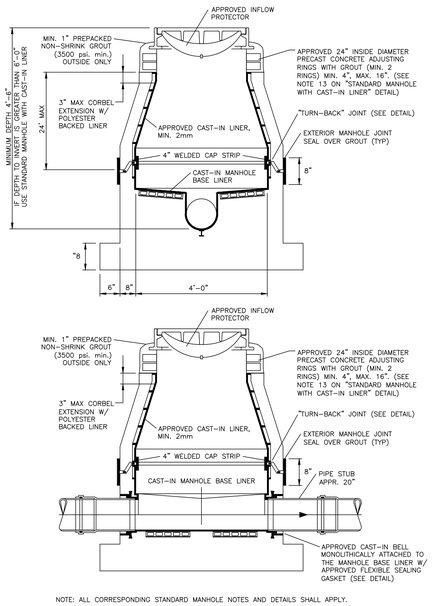
SHEET NUMBER 3 OF 5

SEAL

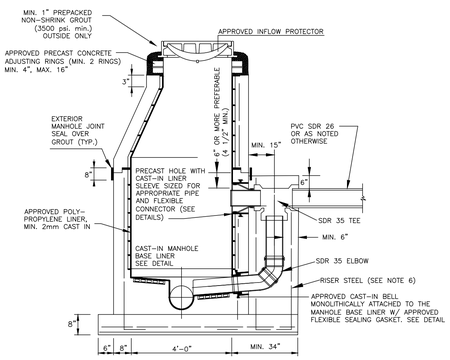
Jan 15, 2021



NOTES:

1. PRECAST CONCRETE TYPE II 4000 P.S.I. CALCAREOUS AGGREGATE REQUIRED (MIN. CaCO3 CONTENT: 65% IN LARGE AGGREGATE, 50% IN CONCRETE SCREENING).
2. RUB'R NEK (RU 106) OR APPROVED EQUAL AT ALL RISER JOINTS. SIZES TO BE SPECIFIED ON SHOP DRAWINGS.
3. ALL PIPE OPENINGS SHALL BE GAS TIGHT AND WATER TIGHT WITH NO EXPOSED CONCRETE SURFACES.
4. CAST OPENINGS SHALL BE MANUFACTURED WITH A POLYPROPYLENE SLEEVE CAST IN. APPROVED FLEXIBLE MANHOLE CONNECTORS SHALL BE USED AT PIPE CONNECTIONS. HOLE SIZE PER BOOT MANUFACTURER'S SPECIFICATIONS. DOUBLE PIPE CLAMPS MUST BE INSTALLED ON FLEXIBLE SLEEVES WHERE REQUIRED BY BOOT MANUFACTURER'S INSTALLATION INSTRUCTIONS.
5. CORED PIPE OPENINGS SHALL BE INSTALLED PER DETAIL. APPROVED FLEXIBLE CONNECTOR WILL BE INSTALLED ONTO POLY-PROPYLENE WALL SLEEVE. WALL SLEEVE SHALL BE EPOXIED INTO CORED OPENING AND THERMAL WELDED TO WALL LINER. BY LICENSED CONTRACTOR.
6. FLOW CHANNELS SHALL DIRECT INFLUENT INTO FLOW STREAM. (SEE DETAIL)
7. LIFT HOLES ARE PERMITTED.
8. INSIDE DROPS SHALL NOT BE DESIGNED TO EXCEED 1.80 FEET AND NOT CONSTRUCTED TO EXCEED 2.0 FEET. MAX. 6" INSIDE DROP IS PERMITTED FOR MANHOLES WITH 3 OR MORE INVERTS AND MANHOLES WITH A CHANGE IN FLOW DIRECTION OF MORE THAN 45 DEGREES.
9. MANHOLE FABRICATION SHALL BE IN ACCORDANCE WITH ASTM C-478, LATEST STANDARD.
10. MINIMUM 5 FEET IS REQUIRED BETWEEN OUTSIDE OF MANHOLE AND SERVICE WYE.
11. MANHOLES SHALL BE LINED INSIDE WITH AN APPROVED POLYPROPYLENE LINER SYSTEM. LINERS MUST BE WELDED BY LINER MFG CERTIFIED WELDERS AND BE CAST INTO THE MANHOLE BY A LINER MANUFACTURER CERTIFIED PRECASTER.
12. APPROVED INFLOW PROTECTORS ARE REQUIRED.
13. MAXIMUM HEIGHT OF CHIMNEY SHALL NOT EXCEED 24" (INCLUDING FRAME CASTING).
14. APPROVED THERMO-PLASTIC CHIMNEY LINER SHALL COMPLETELY COVER THE PRECAST CONCRETE GRADE RINGS AND SHALL BE SEALED TO THE CORBEL LINER BY MEANS OF AN APPROVED POLYISOPRENE LIP SEAL GASKET AND SEALED TO THE RING USING APPROVED BUTYL STRIPS. SEE DETAILS.
15. SOLID THERMO-PLASTIC CAST-IN LINER SYSTEM IS REQUIRED FOR LAST MANHOLE PRIOR TO A LIFT STATION, MANHOLES DEEPER THAN 14 FEET, MANHOLES WITH AN OUTSIDE DROP, AND MANHOLES WITH A FORCE MAIN CONNECTION. SEE APPROPRIATE DETAILS.
16. MANHOLES IN ROADWAYS SHALL BE LOCATED OUTSIDE OF WHEEL PATHS.

STANDARD MANHOLE WITH CAST-IN LINER AND BASE LINER

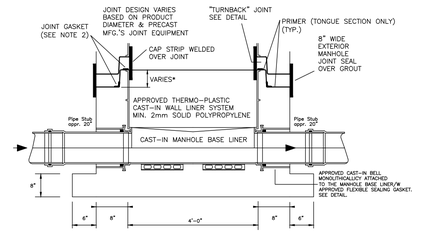


29S

NOTE: ALL CORRESPONDING STANDARD MANHOLE NOTES AND DETAILS SHALL APPLY.

SHALLOW MANHOLE WITH CAST-IN LINER AND BASE LINER

30S



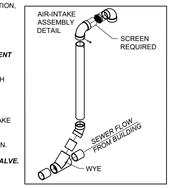
NOTES:

1. ALL DETAILS AND SPECIFICATIONS FOR "STANDARD MANHOLE WITH SOLID POLYPROPYLENE LINER SYSTEM" ARE APPLICABLE EXCEPT FOR REFERENCES TO DROP ASSEMBLY.
2. THE PRECAST BASE SHALL EXTEND FULLY UNDER THE DROP ASSEMBLY.
3. PRECAST DROP ENCASEMENT REQUIRED UP TO TOP EDGE OF 90 DEGREE ELBOW, BRICK AND CONCRETE RUBBLE ARE PERMITTED AS FILLER IN REMAINDER OF DROP ENCASEMENT.
4. DROP CONNECTIONS SHALL BE REQUIRED WHENEVER AN INFLUENT INVERT IS LOCATED 2.0 FEET OR MORE ABOVE THE MAIN INVERT CHANNEL. DROP CONNECTIONS SHOULD NOT BE DESIGNED FOR LESS THAN A 2.4 FOOT DROP.
5. PVC SDR 26 PIPE WITH PVC SCH 35 FITTINGS SHALL BE UTILIZED IN THE DROP ASSEMBLY.
6. DROP ENCASEMENT REINFORCING STEEL TO BE CAST IN PLACE WITH BASE (4 RODS) OR USE 4-1/2" DIA. COIL LOOP INSERTS CAST IN PLACE WITH BASE (TO BE USED WITH 1/2" COIL' RODS). COIL LOOP INSERTS TO BE "DAYTON SUPERIOR" B16, 1/2"X 4" OR APPROVED EQUAL.

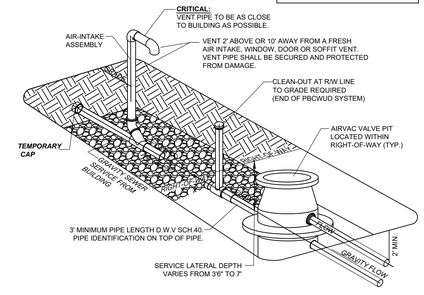
OUTSIDE DROP MANHOLE WITH CAST-IN LINER AND BASE LINER

31S

NOTES:



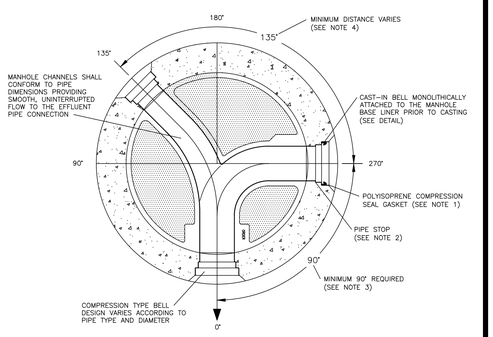
1. LINER WELDING SHALL BE PERFORMED EXCLUSIVELY BY LICENSED, CERTIFIED WELDERS.
2. SHOP DRAWINGS SHALL CALL OUT THE SIZE, TYPE AND POSITIONING OF THE APPROVED JOINT SEALANT.
3. PRIMER TO BE APPLIED BY THE PRECASTER (TONGUE SECTION ONLY).



MANHOLE BASE SECTION

32S

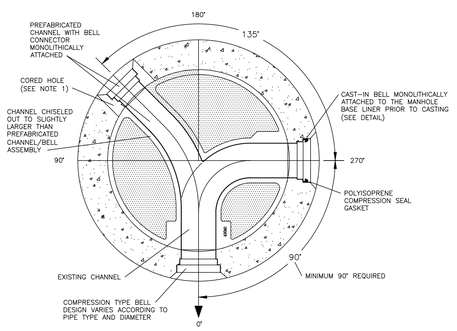
NOTES:



1. APPROVED PLUMBING PLAN MUST BE ON JOB SITE FOR INSPECTION. IF NOT, INSTALLATION WILL BE REJECTED.
2. PLUMBING SHALL CONFORM TO ALL PALM BEACH COUNTY AND OTHER APPLICABLE CODES.
3. ***TEMPORARY CAP IN PLACE (NO SEWAGE), UPSTREAM OF THE VENT PIPE TO BE IN PLACE UNTIL WUD INSPECT AND INSTALL VALVE***
4. EXISTING SEPTIC TANK TO BE ABANDONED IN ACCORDANCE WITH LOCAL HEALTH DEPT. SPECIFICATIONS.
5. AIR INTAKE ASSEMBLY IS REQUIRED.
6. AIR VAC VALVE WILL BE INSTALLED BY UTILITY **AFTER** 4" AIR-INTAKE ASSEMBLY IS IN PLACE.
7. 6. SEWER CONNECTION FEES TO BE PAID PRIOR TO CONNECTION.
8. ***TEMPORARY CAP IN PLACE UNTIL WUD INSPECT AND INSTALL VALVE.***
9. ***CAP IS NOT TO BE REMOVED UNTIL WUD HAS INSTALLED VALVE***

TYPICAL WASTEWATER SERVICE INSTALLATION FOR VACUUM SEWER SYSTEM

82S

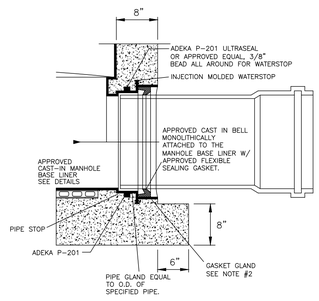


NOTES:

1. ONLY THE POLYISOPRENE GASKET PROVIDED BY THE MANHOLE BASE LINER MANUFACTURER SHALL BE USED IN COMPRESSION TYPE BELLS.
2. CONNECTION PIPES SHALL BE INSERTED COMPLETELY INTO THE BELL CONNECTOR FLUSH WITH THE PIPE STOP PROVIDING A SMOOTH TRANSITION FROM PIPE TO MANHOLE BASE LINER CHANNEL.
3. MINIMUM OF 90 DEGREES BETWEEN INCOMING, LEFT OR RIGHT OF OUTGOING PIPE. DISTANCE BETWEEN CONNECTIONS MAY VARY ACCORDING TO MANHOLE DIAMETER, PIPE SIZE AND TYPE.
4. MINIMUM DISTANCE BETWEEN INFLUENT PIPE CONNECTIONS MAY VARY AND SHALL BE SPECIFIED BY THE LINER MANUFACTURER ACCORDING TO MANHOLE AND/OR PIPE DIAMETER AND TYPE.

FLOW CHANNEL/PIPE CONNECTION TO NEW CAST-IN BASE LINER

33S



NOTES:

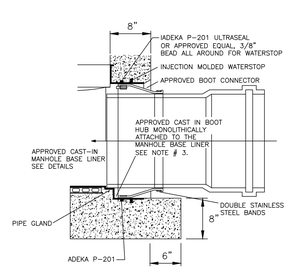
1. CORED OPENING AND CHANNEL DIAMETER PER CHANNEL/BELL MANUFACTURER REQUIREMENTS. SIZES SHALL BE SPECIFIED ON SHOP DRAWING.
2. ONLY AN APPROVED CHANNEL/BELL ASSEMBLY PROVIDED BY THE BASE LINER MANUFACTURER SHALL BE USED.
3. CHANNEL/BELL ASSEMBLY MUST BE COMPLETELY GROUTED IN PLACE USING AN APPROVED CEMENT.
4. UPON "SETTING" OF GROUT, THE NEW CHANNEL/BELL ASSEMBLY MUST BE JOINED TO THE EXISTING MANHOLE BASE LINER BY EITHER THERMO-PLASTIC WELDING OR FRP PATCH AS SPECIFIED BY BASE LINER MANUFACTURER.

FLOW CHANNEL/ PIPE CONNECTION TO EXISTING CAST-IN BASE LINER

34S

INSTALLATION:

1. CLEAN BELL REMOVING ANY EXCESS CONCRETE, SLURRY OR DIRT INSIDE BELL.
2. INSTALL GASKET AS SHOWN.
3. LUBRICATE PIPE SPIGOT AND SLIDE INTO BELL AND GASKET UNTIL REACHING PIPE STOP.
4. CHECK FOR WATERTIGHT CONNECTION. (VACUUM TESTING OR OTHER APPROVED METHOD).



DO NOT LUBRICATE THE GASKET OR THE BELL

NOTES:

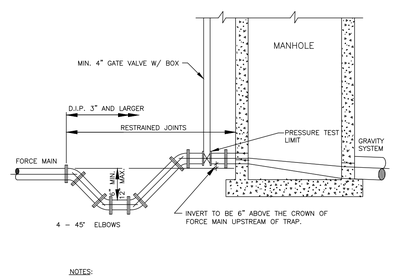
1. MANHOLE SHOP DRAWINGS SHALL IDENTIFY THE TYPE OF MANHOLE/PIPE CONNECTION.
2. ONLY THE POLYISOPRENE GASKET SUPPLIED BY THE BELL MANUFACTURER SHALL BE USED IN COMPRESSION TYPE BELLS.
3. BOOT HUB VARIES ACCORDING TO GASKET MANUFACTURER'S SPECIFICATION FOR SPECIFIC PIPE SIZE AND TYPE.
4. MANHOLE SHOP DRAWINGS MUST IDENTIFY THE PIPE SIZE, TYPE, GASKET TYPE AND HOLE SIZE.

PIPE TO MANHOLE CONNECTION DETAIL TYPE "A" (GASKET)

35S

INSTALLATION:

1. CLEAN BOOT HUB REMOVING ANY EXCESS CONCRETE, SLURRY OR DIRT INSIDE BELL.
2. INSTALL RUBBER BOOT CONNECTOR (PER MANUFACTURER'S INSTRUCTIONS). WEDGE STYLE EXPANDER BOLTS MUST BE ALIGNED WITH THE "TOP" OF BOOT HUB ACCESS NOTCH.
3. PRE-MITER PIPE END AS REQUIRED TO PREDETERMINED PIPE DEFLECTION ANGLE. MERELY "DE-BURR" PIPE END – DO NOT CHAMFER OR BEVEL PIPE END.
4. LUBRICATE SPIGOT; ORIENT PIPE MITER; SLIDE INTO RUBBER BOOT CONNECTOR; "HOME" PIPE TO BASE LINER CHANNEL END; DEFLECT PIPE AS REQUIRED. INSPECT MANHOLE BASE INTERIOR FOR CHANNEL/PIPE INVERT ALIGNMENT AND SEAL; TIGHTEN RUBBER BOOT CLAMP (PER MANUFACTURER'S INSTRUCTIONS).
1. CHECK FOR WATERTIGHT CONNECTION; (VACUUM TESTING OR OTHER APPROVED METHOD).



DO NOT LUBRICATE THE GASKET OR THE BELL

NOTES:

1. MANHOLE SHOP DRAWINGS SHALL IDENTIFY THE TYPE OF MANHOLE/PIPE CONNECTION.
2. ONLY THE POLYISOPRENE GASKET SUPPLIED BY THE BELL MANUFACTURER SHALL BE USED IN COMPRESSION TYPE BELLS.
3. BOOT HUB VARIES ACCORDING TO GASKET MANUFACTURER'S SPECIFICATION FOR SPECIFIC PIPE SIZE AND TYPE.
4. MANHOLE SHOP DRAWINGS MUST IDENTIFY THE PIPE SIZE, TYPE, GASKET TYPE AND HOLE SIZE.

PIPE TO MANHOLE CONNECTION TYPE "B" (BOOT)

36S

NOTES:

1. FORCE MAIN TO ENTER MANHOLE AS CLOSE AS POSSIBLE TO 180° TO GRAVITY OUTLET.
2. THE INVERT LEVEL OF FORCE MAIN AT POINT OF ENTRY SHALL BE 6" ABOVE OUTFLOW INVERT OF MANHOLE.
3. CORE ENTRY ONLY INTO EXISTING MANHOLES.
4. TRAP TO BE LOCATED PRIOR TO DROP INTO MANHOLE AND OUTSIDE OF PAVED AREAS.
5. USE TWO 45° ELBOWS PAST TRAP IF ELEVATION DROP IS REQUIRED TO ENTER MANHOLE.
6. CAST-IN OR FIELD INSTALLED FLOW CHANNEL IS REQUIRED.
7. MANHOLE WALL TO BE COATED WITH AN APPROVED SOLID THERMOPLASTIC CAST-IN CORROSION BARRIER SYSTEM.
8. TRAP JOINTS TO BE RESTRAINED.

FORCE MAIN ENTERING MANHOLE

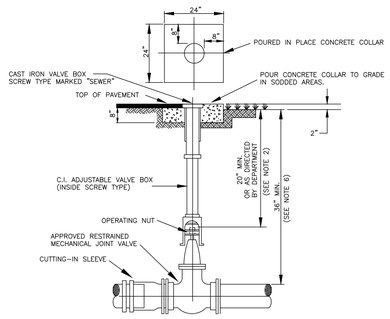
STD DETAILS

SHEET NUMBER 4 OF 5

SEAL

Jan 15, 2021



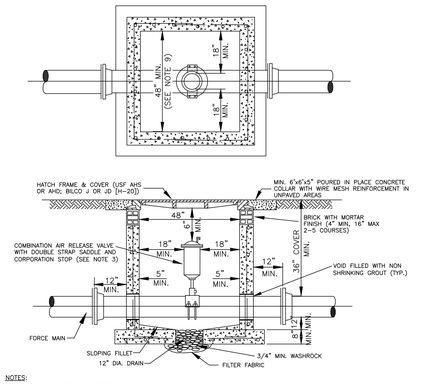
NOTE:

1. THE FLUSHING CONNECTION SHALL BE LOCATED IN GRASS AREA.
2. ALL 4" PIPES SHALL BE RESTRAINED.

CONNECTION OF PRIVATE FORCE MAIN UNDER 4" IN DIAMETER

37S

NOTES:



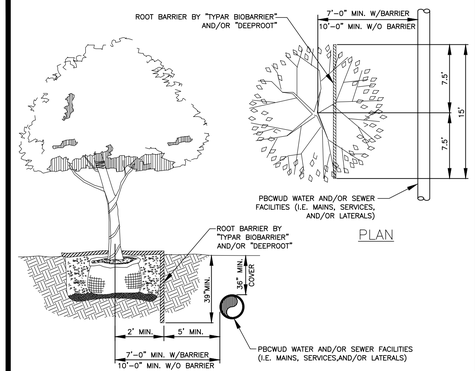
1. CONCRETE COLLAR IS NOT REQUIRED IN PAVED AREAS IF PAVEMENT SURFACE IS FINISHED PRIOR TO CONDITIONAL FINAL INSPECTION.
2. WHEN OPERATING NUT IS DEEPER THAN 36" A ONE PIECE EXTENSION WILL BE REQUIRED TO BRING OPERATING NUT 20"–30" BELOW FINISHED GRADE. EXTENSION BOLTS & NUTS ARE TO BE STAINLESS STEEL. A HIGH STRENGTH STEEL CENTERING PLATE, WELDED TO THE EXTENSION, IS ALSO REQUIRED.
3. VALVE BOXES SHALL HAVE COVERS MARKED "SEWER".
4. EXTENSION VALVE BOX TO BE D.I.P. OR C-900 PVC DR 18 (COLOR: GREEN).
5. A CUT–IN INSTALLATION SHALL REQUIRE MEGALUGS OR EQUAL THROUGHOUT ASSEMBLY.
6. IN ORDER TO MAINTAIN ADEQUATE COVER OVER VALVE NUT, THE FOLLOWING MINIMUM COVERS OVER PIPE ARE REQUIRED:

GATE VALVE SIZE	MIN. COVER OVER PIPE
16"	48"
20"	54"
24"	60"
30"	72"
36"	84"

7. PIPE SHALL BE RESTRAINED ON BOTH SIDES OF THE VALVE AS REQUIRED.
8. VALVES IN ROADWAYS SHALL BE LOCATED OUTSIDE OF WHEEL PATHS WHENEVER POSSIBLE.

TYPICAL FORCE MAIN GATE VALVE SETTING AND CUT–IN DETAIL

38S



NOTES:

1. 4000 P.S.I. TYPE II CONCRETE
2. VAULT SHALL BE PRECAST WITH STEEL REINFORCING. SHOP DRAWING IS REQUIRED TO BE APPROVED BY THE DEPARTMENT PRIOR TO VAULT CONSTRUCTION AND/OR INSTALLATION.
3. COMBINATION AIR RELEASE VALVE (ARV) SHALL BE TYPE AND SIZE APPROPRIATE FOR SERVICE INTENDED. ALTHOUGH A 2" MINIMUM SIZED ARV IS REQUIRED ON FORCE MAIN INSTALLATIONS.
4. ALL OPENINGS SHALL BE SEALED WITH WATERPROOF NON–SHRINKING GROUT.
5. ALTERNATE VAULT AND COVER DESIGN MAY BE USED PROVIDED ALTERNATE VAULT AND/OR COVER SHOP DRAWINGS WERE SUBMITTED AND APPROVED BY THE DEPARTMENT PRIOR TO THE VAULT AND/OR COVER BEING INSTALLED.
6. COAT INSIDE WITH AN APPROVED CORROSION BARRIER SYSTEM.
7. DUCTILE IRON PIPE IS REQUIRED THROUGH THE VAULT. NO PIPE JOINTS WITHIN THE VAULT.
8. THREADED AREAS OF CORPORATION STOP SHALL BE SPIRAL WRAPPED WITH TWO WRAPS OF TEFLON TAPE.
9. LARGER VAULTS WILL BE REQUIRED FOR PIPES LARGER THAN 12"

PIPE SIZE	MIN. VAULT SIZE
16"–24"	4'W x 5'L
30"–42"	4'W x 6'L

FORCE MAIN AIR RELEASE VALVE AND VAULT OUTSIDE OF R/W, NON–TRAFFIC AREAS

39S

NOTES:

1. TREES SHOWN ON THIS PLAN ARE FOR GRAPHIC REPRESENTATION ONLY. TREE SPACING IS BASED ON DESIGN REQUIREMENTS AND THE TREES SHOWN ON THESE PLANS ATTEMPT TO ACCOMPLISH THAT SPACING WHILE MAINTAINING THE REQUIRED SETBACKS FROM UTILITIES. TREES MAY BE FIELD ADJUSTED TO AVOID CONFLICTS WITH DRIVEWAYS AND UNDERGROUND UTILITIES. IN ANY CASE THE TREES SHALL BE LOCATED IN THE FIELD IN ACCORDANCE WITH THE PLANTING DETAILS SHOWN HEREON.
2. TREES ARE TO BE INSTALLED WITH A TEN FOOT (10') SEPARATION FROM ANY WATER OR SEWER MAIN AND/OR SERVICE, HYDRANTS, AND LIFT STATIONS. IF A TEN FOOT (10') SEPARATION CANNOT BE ACHIEVED, THE TREE CAN BE INSTALLED WITH A ROOT BARRIER SYSTEM. HOWEVER, IN NO CASE SHALL A TREE ENCROACH INTO A PBCUE WITHOUT PRIOR DEPARTMENT APPROVAL.

LANDSCAPE AND ROOT BARRIER DETAIL

84S

NOTES:

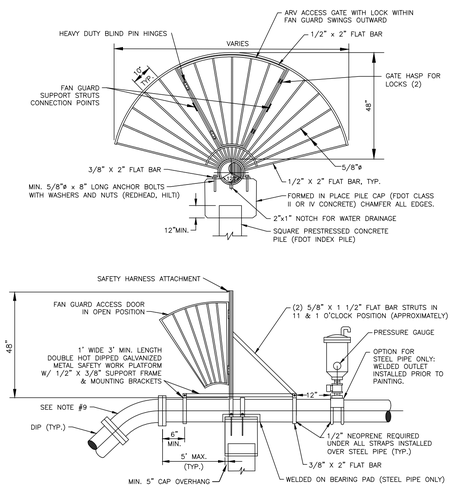
1. THE DATA IN THE ABOVE TABLE ARE BASED UPON THE FOLLOWING INSTALLATION CONDITIONS:
   SOIL TYPE–SAND TEST PRESSURE–150 PSI DEPTH OF BURY–3'
   TRENCH TYPE–3 SAFETY FACTOR– 1.5 VERTICAL OFFSET–3'
   MINIMUM PIPE LENGTH ALONG TEE RUN–5'
2. THE RESTRAINED PIPE LENGTHS APPLY TO DUCTILE IRON AND PVC PIPE.
3. ALL JOINTS BETWEEN UPPER AND LOWER BENDS SHALL BE RESTRAINED.
4. RESTRAINED PIPE LENGTHS APPLY TO PIPE ON BOTH SIDES OF VALVES AND FITTINGS.
5. MULTIPLY PIPE LENGTH BY 1.4 FOR POLYETHYLENE ENCASED PIPE.
6. RESTRAINED PIPE LENGTHS EQUAL TO AN "INLINE VALVE" CONDITION ARE REQUIRED AT EACH END OF A TRANSITION FROM HDPE PIPE TO OTHER PIPE MATERIALS.
7. DESIGN ENGINEER IS RESPONSIBLE FOR PROPER RESTRAINT PIPE LENGTH SIZING FOR THE PROJECT.

MECHANICAL THRUST RESTRAINT MINIMUM PIPE LENGTHS (FORCE MAINS)

41S

NOTES:

1. ALL EXPOSED PIPE SHALL BE DUCTILE IRON OR PREFABRICATED STEEL WITH FLANGED FITTINGS AND PROFILED GASKETS. RETAINER GLANDS AND UNIFLANGE TYPE FITTINGS ARE NOT TO BE SUBSTITUTED FOR FLANGED FITTINGS. PREFABRICATED STEEL PIPE MAY INCORPORATE WELDED ON LONG RADIUS UPPER BENDS. PREFABRICATED FLANGED PIPE SHALL BE FACTORY TESTED.
2. SPAN LENGTHS AS REQUIRED BY PERMITTING AGENCY
3. FAN GUARDS ARE REQUIRED. SEE FAN GUARD/PILE CAP DESIGN DETAILS, FOR ADDITIONAL REQUIREMENTS. ACCESS PLATFORM AND GATE REQUIRED ON ARV SIDE ONLY.



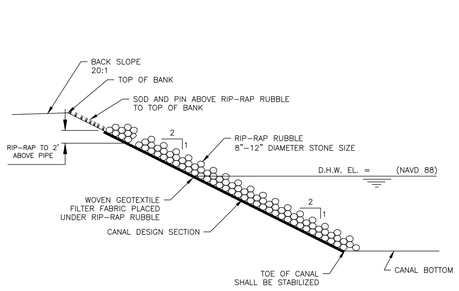
4A. ALL EXPOSED PIPING SHALL BE PAINTED AS SPECIFIED IN THE APPROVED MATERIAL LIST.

4B. ALL HARDWARE SHALL BE PAINTED WITH COAL–TAR EPOXY.

5. PIPE SHALL BE CRADLED ON ¾" THICK NEOPRENE, (MURO–METER GRADE 50) CURRENT FDOT STANDARDS APPLY. NEOPRENE IS REQUIRED AT ALL STRAPS INSTALLED OVER STEEL PIPE. NEOPRENE SHALL EXTEND 1" BEYOND THE EDGES OF CRADLE AND STRAPS.
6. TIE–DOWN STRAPS MUST PROPERLY FIT AND SECURE PIPE IN CRADLE.
7. PIPE CRADLE IN CAP SHALL CONTACT ⅔ CIRCUMFERENCE OF PIPE. (SEE FAN GUARD DETAIL)
8. SHOW EXISTING CANAL CROSS SECTION, ULTIMATE CANAL SECTION, AND RELEVANT ELEVATIONS AND DISTANCES ON A TO SCALE DETAIL DRAWING.
9. PILE LIFT CABLE SHALL BE REMOVED BELOW SURFACE; HOLE SHALL BE FILLED WITH EPOXY CEMENT.
10. THREADED AREAS OF BRASS FITTINGS SHALL BE SPIRAL WRAPPED WITH TWO WRAPS OF TEFLON TAPE.
11. THE PILES AND CAP DESIGN SHALL BE SHOWN ON TO SCALE SIGNED AND SEALED DETAIL DRAWINGS. MIN. 12"x12" TYPE 1A FLORIDA DOT INDEX PILES ARE REQUIRED. PILE PENETRATION BELOW CANAL BOTTOM SHALL BE 15' MINIMUM. MINIMUM LOAD CAPACITY OF 20 TONS PER PILE IS REQUIRED (FDOT STANDARDS APPLY). SIGNED AND SEALED SHOP DRAWINGS ARE REQUIRED.
12. PREFABRICATED STEEL PIPE SHAL HAVE WELDED ON BEARING PADS EXTENDING MIN. 1" BEYOND PIPE CRADLE. THE PADS SHALL BE INSTALLED BY STEEL PIPE MANUFACTURER PRIOR TO PAINTING.
13. FORCE MAIN CROSSINGS OVER BODIES OF WATER MAY BE SUBJECT TO A D.E.P. "NOTICED GENERAL ENVIRONMENTAL RESOURCE PERMIT" (NOP)

TYPICAL FORCE MAIN AERIAL CANAL CROSSING – SINGLE PIPE (SINGLE PILES)

45S

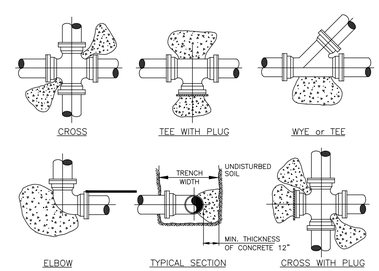


NOTES:

1. FAN GUARDS SHALL BE PLACED AT EACH END OF CANAL CROSSING.
2. HARDWARE SHALL BE PAINTED WITH COAL TAR EPOXY.
3. FANGUARD WITH HARDWARE SHALL BE FABRICATED FROM DOUBLE HOT DIPPED GALVANIZED STEEL.
4. SHOP DRAWINGS FOR FANGUARDS, CAPS, AND PILES MUST BE SUBMITTED TO PBCWUD FOR REVIEW AND APPROVAL PRIOR TO PRE–CONSTRUCTION MEETING.
5. REINFORCING STEEL SHALL CONFORM TO ASTM A–615, GRADE 60. MIN. 2" CONCRETE COVER OVER ALL STEEL.
6. SEE "TYPICAL CANAL CROSSING DETAIL" FOR ADDITIONAL REQUIREMENTS.
7. NO WELDING OF REBAR TO REBAR OR REBAR TO PILE STRANDS SHALL BE ALLOWED.
8. DESIGN DRAWINGS ARE REQUIRED.
9. LONG RADIUS WELDED ON UPPER BENDS ARE ACCEPTABLE FOR STEEL PIPE.
10. IF A PILE/CAP STEEL CONNECTION IS REQUIRED BY DESIGNING ENGINEER, MIN. (4) #8 REINFORCEMENT BARS SHALL BE DRILLED AND DOWELED (EPOXIED) MIN. 16" DEEP INTO THE PILE AND TIED WITH THE CAP STEEL.
11. ACCESS PLATFORM AND GATE REQUIRED ON ARV SIDE ONLY.

FAN GUARD/ PILE CAP DESIGN – SINGLE PIPE (SINGLE PILES)

46S

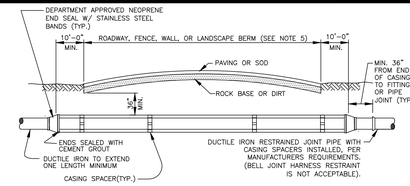


NOTES:

1. RIP–RAP RUBBLE AND ITS INSTALLATION MUST MEET CANAL OWNERSHIP SPECIFICATIONS AND PERMITTING REQUIREMENTS.
2. DUMP RUBBLE IN PLACE FORMING A COMPACT LAYER CONFORMING TO THE CANAL DESIGN SECTION SLOPE. ENSURE THAT RUBBLE DOES NOT SEGREGATE SO THAT SMALLER PIECES EVENLY FILL THE VOIDS BETWEEN LAGER PIECES.
3. AN ALTERNATIVE DESIGN WILL BE CONSIDERED AND MUST RECEIVE PRIOR APPROVAL FROM THE CANAL PROPERTY OWNER.

RIP–RAP RUBBLE DETAIL

83S



PIPE	THRUST BLOCK AREA REQ'D	REMARKS	NOTE: FOR OTHER FITTINGS USE THE FOLLOWING FACTORS.
4"	2.0 SQ. FT.	VALUES ARE FOR 90° BEND, BASED ON 2000 P.S.F. SAFE BEARING LOAD AND PIPE PRESSURE OF 150 P.S.I. FOR OTHER SOILS & PRESSURES THE AREA REQUIRED IS IN DIRECT PROPORTION	TEE 100%
6"	4.0 SQ. FT.		45° BEND 71%
8"	6.6 SQ. FT.		22 1/2° BEND 39%
10"	10.0 SQ. FT.		11 1/4° BEND 20%
12"	14.0 SQ. FT.		DEAD END 100%
14"	18.6 SQ. FT.		

NOTES:

1. CONCRETE THRUST BLOCKS OR THRUST COLLARS MAY BE UTILIZED ONLY IF NECESSARY FOR CONNECTIONS TO AN EXISTING PIPING SYSTEM, OTHERWISE MECHANICAL RESTRAINTS SHALL BE USED. KEEP "T" BOLTS CLEAR OF CONCRETE, WRAPPED IN VISQUEEN FOR FUTURE ACCESS, WITH A MINIMUM OF 1' THICKNESS BETWEEN THE FITTING AND SOIL.
2. BEFORE POURING CONCRETE, PLUGS SHALL BE WRAPPED WITH VISQUEEN AND A BOARD PLACED IN FRONT.
3. CONCRETE SHALL BE 2500 P.S.I. MINIMUM.
4. THE ENGINEER OF RECORD SHALL SUBMIT A THRUST BLOCK SIZE CALCULATION FOR TEE CONNECTIONS INTO UNRESTRAINED EXISTING MAINS LARGER THAN 14".
5. THE ENGINEER OF RECORD SHALL SUBMIT A PIPE RESTRAINT DESIGN FOR INLINE EXTENSIONS OF A EXISTING UNRESTRAINED MAIN IF MECHANICAL JOINT RESTRAINT CAN NOT BE INSTALLED ON THE EXISTING MAIN.

TYPICAL THRUST BLOCKS FOR PRESSURE PIPING

42S

CARRIER PIPE SIZE	STEEL CASING INSIDE DIAMETER (MIN)	MINIMUM WALL THICKNESS (SEE NOTE 2)
4"	12"	.188
6"	14"	.250
8"	20"	.250
10"	20"	.250
12"	24"	.250
14"	24"	.250
16"	30"	.312
18"	30"	.312

30"	48"	.500
36"	54"	.625
42"	60"	.625
48"	72"	.625

NOTES:

1. A PROFILE DRAWING TO SCALE FOR EACH JACK AND BORE, DIRECTIONAL DRILL, OR DIRECT BURIED INSTALLATION IS REQUIRED TO BE APPROVED BY THE DEPARTMENT PRIOR TO INSTALLATION. IF A SPLIT CASING IS REQUIRED THEN SHOP DRAWINGS ARE REQUIRED TO BE SUBMITTED AND APPROVED BY THE DEPARTMENT PRIOR TO CONSTRUCTION AND/OR INSTALLATION.
2. THICKER WALL CASINGS AND LARGER COVER OVER CASING MAY BE REQUIRED BY THE RIGHT–OF–WAY OWNER.
3. STEEL CASING SHALL BE COATED OUTSIDE WITH COAL TAR EPOXY (MIN. 16 MILS DFT) AND BE PAINTED WITH A 4" MINIMUM WIDE CONTINUOUS STRIPE, COLOR CODED TO MATCH THE PIPE INSIDE, ALONG THE TOP AXIS OF THE CASING.
4. PIPE IN CASING SHALL BE PULLED TO FULLY ENGAGE RESTRAINT.
5. STEEL CASING IS REQUIRED FOR ALL WASTEWATER MAIN INSTALLATIONS UTILIZING JACK AND BORE CONSTRUCTION AND WHEN MAINS ARE INSTALLED UNDER FENCES, WALLS, OR LANDSCAPE BERMS. WHEN THE CASING IS INSTALLED UNDER FENCES, WALLS, OR LANDSCAPE BERMS IT SHALL BE CENTERED ON THE PREVIOUS BARRIER AND IS REQUIRED TO EXTEND 10' MINIMUM PAST BARRIER ON EACH SIDE UNLESS OTHERWISE PREVIOUSLY APPROVED BY THE DEPARTMENT.

Notice Criteria Tool

Notice Criteria Tool - Desk Reference Guide V_2018.2.0

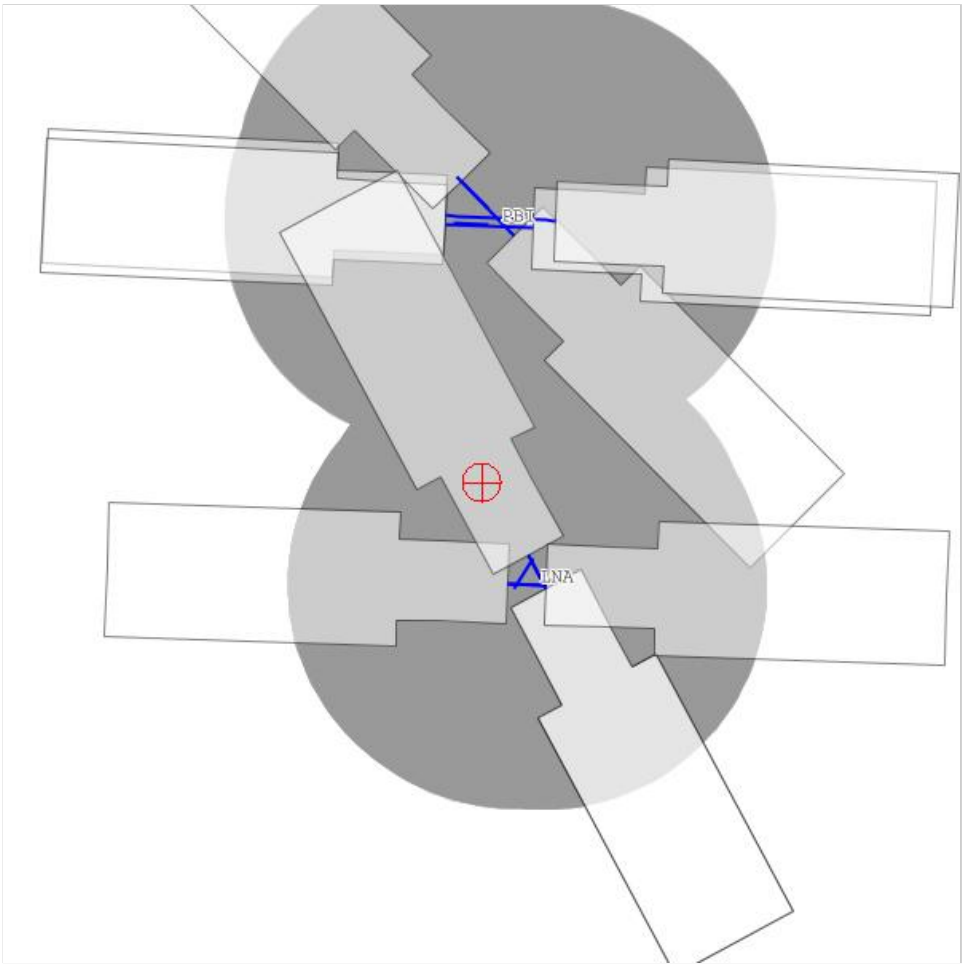
The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference CFR Title 14 Part 77.9.

You must file with the FAA at least 45 days prior to construction if:

- your structure will exceed 200ft above ground level
- your structure will be in proximity to an airport and will exceed the slope ratio
- your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
- your structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy
- your structure will be in an instrument approach area and might exceed part 77 Subpart C
- your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
- your structure will be on an airport or heliport
- filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the Air Traffic Areas of Responsibility map for Off Airport construction, or contact the FAA Airports Region / District Office for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.



Latitude:	26 Deg 36 M 58.3 S N
Longitude:	80 Deg 05 M 54.1 S W
Horizontal Datum:	NAD83
Site Elevation (SE):	16 (nearest foot)
Structure Height :	25 (nearest foot)
Traverseway:	No Traverseway (Additional height is added to certain structures under 77.9(c)) User can increase the default height adjustment for Traverseway, Private Roadway and Waterway
Is structure on airport:	(•) No ( ) Yes

Results

You exceed the following Notice Criteria:

Your proposed structure is in proximity to a navigation facility and may impact the assurance of navigation signal reception. The FAA, in accordance with 77.9, requests that you file.

The FAA requests that you file

South Florida Water Management District
3301 Gun Club Rd
West Palm Beach, FL 33406

RE: Fontana Townhomes
Drainage Statement

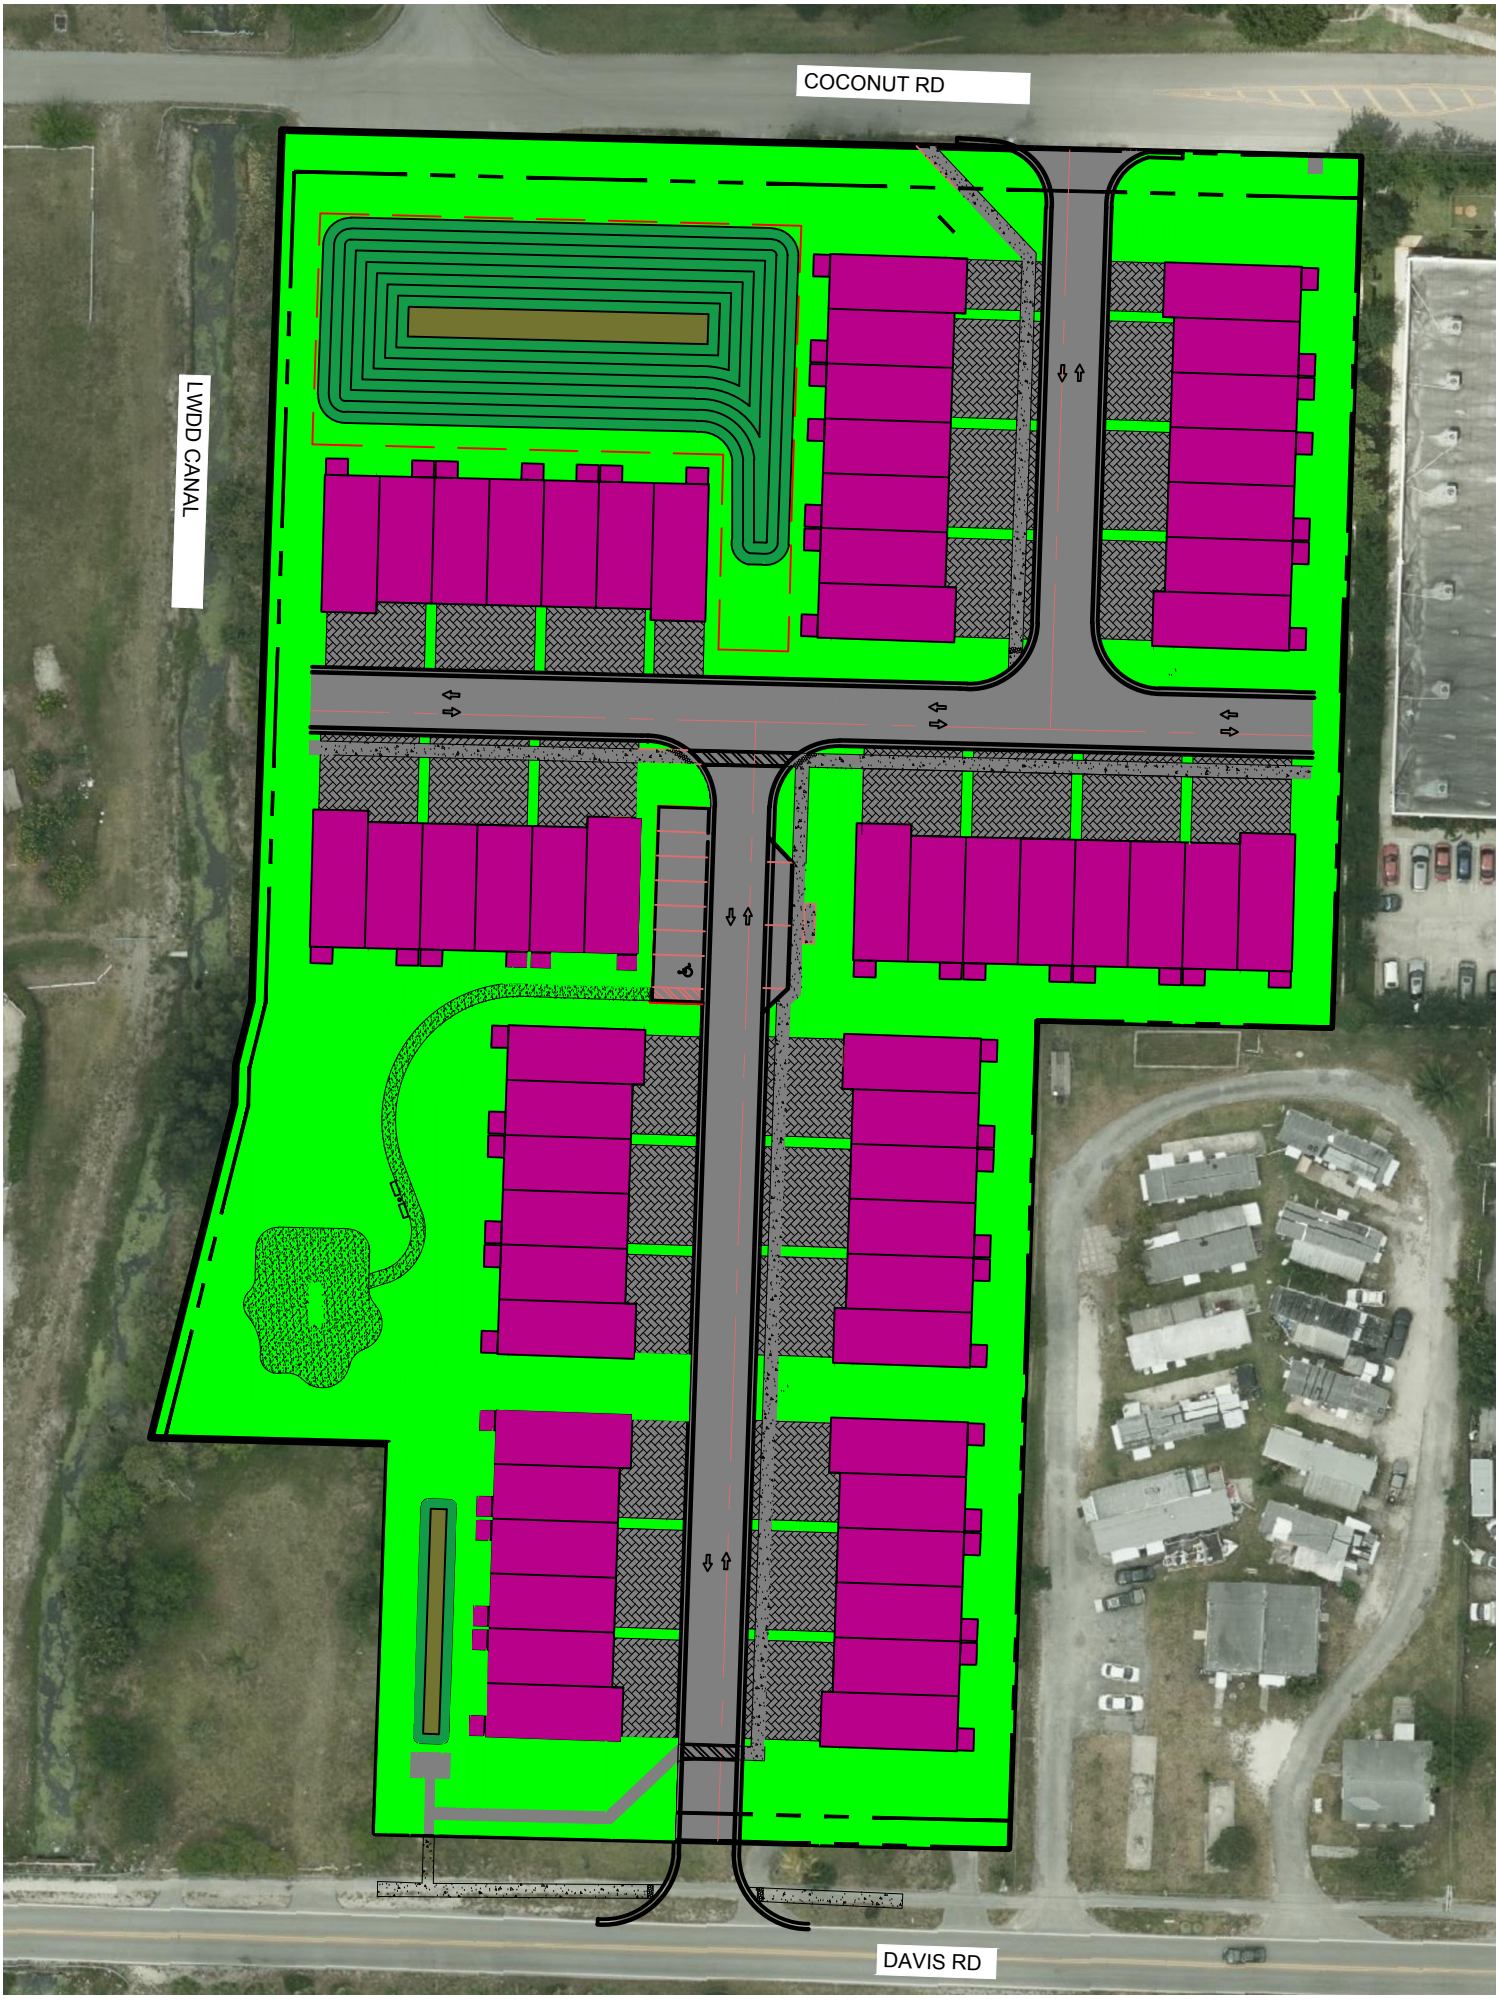
To Whom It May Concern,

This project is located in the Village of Palm Springs south of Lake Worth Road and north of LWDD's L-12 canal between Coconut Road and Davis Road. The site is currently permitted under South Florida Water Management District (SFWMD) with a general surface water management permit (permit # 50-02750-S) that was approved in 1992 for the entire C-16 Basin within Lake Worth Drainage District (LWDD). Currently there are no existing LWDD permits for this site as shown in the location map below.

Photo 1: Location Map/Existing LWDD Permits

The site is approximately 4.72 acres is size. The proposed improvements include the construction of new residential townhomes, 0.38 acres of dry detention area (8.05% of the site), 0.31 acres of recreational grassed area (6.57% of the site) and other associated infrastructure.

Stormwater management for quality and quantity control, prior to discharge, is required for the development. Stormwater treatment is per the rules of the South Florida Water Management District (SFWMD), Lake Worth Drainage District (LWDD), and Village of Palm Springs. The discharge design to the LWDD L-12 canal will be based on a pre vs post condition for the 25 year-3 day storm event since this site currently discharges to LWDD. Attached are preliminary calculations for the site for the 10 year – 1 day, 25 year – 3 day and the 100 year – 3 day storm events.



The project will be designed to comply with all South Florida Water Management District, Lake Worth Drainage District and Village of Palm Springs, and other applicable stormwater management requirements.

Please feel free to call me at (561) 330-2345 or mike.spruce@kimley-horn.com with any questions or concerns you might have, or should you require additional information.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.

Water Quality Calculations - Existing

Designed by: YXY
Fontana Townhomes — Checked by: MDS
Project No: 149658011 — Date: 12/16/2020

I. LAND USE:

1	Building	0.15	ac.	3.25%
2	Garages	0.00	ac.	0.00%
3	Asphalt / Sidewalk / Other Imp.	0.94	ac.	19.83%
4	Lake Surface	0.00	ac.	0.00%
5	Lake Banks	0.00	ac.	0.00%
6	Dry Detention Bottom	0.00	ac.	0.00%
7	Dry Detention Banks	0.00	ac.	0.00%
8	Landscaping	3.63	ac.	76.92%
	Total =	**4.72**	**ac.**	**100%**

Total overall impervious surface with building = 23.08%

II. WATER QUALITY CRITERIA:

Quality standards shall be provided during a 3 year, 1 hour storm event for one of the following three combinations:

1. If a wet detention system, then whichever is the greater of the following:
   a. The first inch of runoff from the entire project site.
   b. The amount of 2.5 inches times the percent impervious for the project site.
2. Exfiltration trench requires the volume required for the wet detention system.

III. WATER QUALITY COMPUTATIONS:

1. Compute the first inch of runoff from the entire developed project site:
   = 1.00 inch X 4.72 acres X (1 foot / 12 inches)
   = **0.393 ac-ft for the first inch of runoff**

2. Compute 2.5 inches times the percent impervious for the developed project site:
   a. Site area for water quality pervious / impervious calculations only:
      = Total Project - (Lake Area + Buildings)
      = 4.72 acres - (0.00 acres + 0.15 acres)
      = **4.56 acres of site area for water quality calculations**

   b. Impervious area for water quality pervious / impervious calculations only:
      = Site area for water quality - Pervious area
      = 4.56 acres - 3.63 acres
      = **0.94 acres of impervious area for water quality calculations**

   c. Percentage of impervious area for water quality:
      = Impervious area for water quality / Site area for water quality x 100%
      = 0.94 acres / 4.564 acres x 100%
      = **20.50 % Impervious**

   d. For 2.5 inches times the percentage of impervious area:
      = 2.5 inches X 20.50 %
      = **0.51 inches to be treated**

   e. Compute volume required for quality detention:
      = Inches to be treated X (Total Site Area - Lake Area)
      = 0.51 inches X (4.72 acres - 0.000 acres) x (1 foot / 12 inches)
      = **0.20 ac-ft required for detention storage**

3. The first inch of runoff from the entire developed site = 0.393 ac-ft
   2.5 inches times the percentage of impervious area = 0.201 ac-ft

The volume of 0.393 ac-ft controls

TR-55 Volume Calculations - Existing

Designed by: YXY
Fontana Townhomes — Checked by: MDS
Project No: 149658011 — Date: 12/16/2020

Existing Land Use

	10 year/24 hours	25-year /72 hours	100-year /72 hours
Potential Maximum Retention (S) (in)	5.19	5.19	5.19
Rainfall (P) (in)	7.8	12.5	16
Total Site Drainage Area (A) (ac)	4.72	4.72	4.72
Runoff (Q) (in)	3.82	7.89	11.11
Volume of Runoff (V_r) (ac-ft)	1.50	3.10	4.37

Water Quality Calculations - Proposed

Designed by: YXY
Fontana Townhomes — Checked by: MDS
Project No: 149658011 — Date: 12/16/2020

I. LAND USE:

1	Building	1.34	ac.	28.39%
2	Garages	0.00	ac.	0.00%
3	Asphalt / Sidewalk / Other Imp.	1.30	ac.	27.54%
4	Lake Surface	0.00	ac.	0.00%
5	Lake Banks	0.00	ac.	0.00%
6	Dry Detention Bottom	0.04	ac.	0.85%
7	Dry Detention Banks	0.31	ac.	6.57%
8	Landscaping	1.73	ac.	36.65%
	Total =	**4.72**	**ac.**	**100%**

Total overall impervious surface with building = 55.93%

II. WATER QUALITY CRITERIA:

Quality standards shall be provided during a 3 year, 1 hour storm event for one of the following three combinations:

1. If a wet detention system, then whichever is the greater of the following:
   a. The first inch of runoff from the entire project site.
   b. The amount of 2.5 inches times the percent impervious for the project site.
2. Exfiltration trench requires the volume required for the wet detention system.

III. WATER QUALITY COMPUTATIONS:

1. Compute the first inch of runoff from the entire developed project site:
   = 1.00 inch X 4.72 acres X (1 foot / 12 inches)
   = **0.393 ac-ft for the first inch of runoff**

2. Compute 2.5 inches times the percent impervious for the developed project site:
   a. Site area for water quality pervious / impervious calculations only:
      = Total Project - (Lake Area + Buildings)
      = 4.72 acres - (0.00 acres + 1.34 acres)
      = **3.38 acres of site area for water quality calculations**

   b. Impervious area for water quality pervious / impervious calculations only:
      = Site area for water quality - Pervious area
      = 3.38 acres - 2.08 acres
      = **1.30 acres of impervious area for water quality calculations**

   c. Percentage of impervious area for water quality:
      = Impervious area for water quality / Site area for water quality x 100%
      = 1.30 acres / 3.380 acres x 100%
      = **38.46 % Impervious**

   d. For 2.5 inches times the percentage of impervious area:
      = 2.5 inches X 38.46 %
      = **0.96 inches to be treated**

   e. Compute volume required for quality detention:
      = Inches to be treated X (Total Site Area - Lake Area)
      = 0.96 inches X (4.72 acres - 0.000 acres) x (1 foot / 12 inches)
      = **0.38 ac-ft required for detention storage**

3. The first inch of runoff from the entire developed site = 0.393 ac-ft
   2.5 inches times the percentage of impervious area = 0.378 ac-ft

The volume of 0.393 ac-ft controls

RE: Fontana Townhomes
Project #: 201006
Traffic Performance Standards Review (Revised)

Dear Mr. Heggen:

The Palm Beach County Traffic Division has reviewed the **Fontana Townhomes** Traffic Impact Statement, revised December 9, 2020, pursuant to the Traffic Performance Standards in Article 12 of the Palm Beach County Unified Land Development Code (ULDC). The project is summarized as follows:

Municipality:	Palm Springs
Location:	East side of Coconut Rd, about 200 feet south of Lake Worth Rd
PCN:	70-43-44-30-01-009-0040 & 70-43-44-30-01-009-0030
Access:	One full access driveway connection onto Coconut Rd and onto Davis Rd (As used in the study and is NOT necessarily an approval by the County through this TPS letter)
Existing Uses:	One Single Family Home
Proposed Uses:	Redevelop the site with: Low-rise Multi-Family Residential = 59 DU
New Daily Trips:	422
New Peak Hour Trips:	26 (6/20) AM; 32 (20/12) PM
Build-out:	December 31, 2025

Based on our review, the Traffic Division has determined the proposed development does not have significant peak hour traffic impact (as defined in PBC TPS) on the roadway network and therefore, **meets** the Traffic Performance Standards of Palm Beach County.

The following site related comment should be addressed:

1. Dedicate Right-of-Way 30 feet from the centerline on Coconut Rd and 40 feet from the centerline on Davis Rd along the property frontage. This dedication will need to be free and clear of all encumbrances.

Please note the receipt of a Traffic Performance Standards (TPS) approval letter does not constitute the review and issuance of a Palm Beach County Right-of-Way (R/W) Construction Permit nor does it eliminate any requirements that may be deemed as site related. For work within Palm Beach County R/W, a detailed review of the project will be provided upon submittal for a R/W permit application. The

project is required to comply with all Palm Beach County standards and may include R/W dedication.

No building permits are to be issued by the Village after the build-out date specified above. The County traffic concurrency approval is subject to the Project Aggregation Rules set forth in the Traffic Performance Standards Ordinance.

The approval letter shall be valid no longer than one year from date of issuance, unless an application for a Site Specific Development Order has been approved, an application for a Site Specific Development Order has been submitted, or the approval letter has been superseded by another approval letter for the same property.

If you have any questions regarding this determination, please contact me at 561-684-4030 or email QBari@pbcgov.org.

Sincerely,

Hanane Akif, E.I. on behalf of
Quazi Bari, P.E., PTOE

SCHOOL CAPACITY AVAILABILITY DETERMINATION (SCAD)

Application	**Submittal Date**	01/07/2021		
	SCAD No.	**20121501D – D. O.**		
	FLU /Rezoning/D.O. No.	202001093 – Village of Palm Springs		
	PCN No. / Address	70-43-44-30-01-009-0030(0040) / 4090 Coconut Road		
	Development Name	**Fontana Townhomes**		
	Agent Name	Jerrod Purser		
	SAC No.	210B		
	Proposed Unit No. & Type	**59 Multi-Family Units**		
Impact Review		**Palm Springs** Elementary School	**Lake Worth** Middle School	**Lake Worth** High School
	New Students Generated	7	3	4
	Capacity Available	**-37**	44	61
	Utilization Percentage	**104%**	97%	98%
School District Staff's Recommendation	**Based on the findings and evaluation of the proposed development, there will be negative impact on the public school system. Therefore, if the proposed development is approved by the Village Council, School District staff recommends the following condition to mitigate such impacts.** In order to address the school capacity deficiency generated by this proposed development at the District **elementary school level**, the property owner shall contribute **$24,465** to the School District of Palm Beach County prior to the issuance of first building permit. This school capacity contribution is intended to supplement the required school impact fee (impact fee credit has already been applied). _____ Please note that the school impact fee credit is calculated based on the Net Impact Cost per Student, as calculated in the County's latest Impact Fee Ordinance, which was adopted on April 16, 2019.			
Validation Period	1) This determination is valid from **01/11/2021** to **01/10/2022** or the expiration date of the site-specific development order approved during the validation period. 2) A copy of the approved D.O. must be submitted to the School District Planning Dept. prior to **01/10/2022** or this determination will expire automatically on **01/10/2022**.			
Notice	School age children may not necessarily be assigned to the public school closest to their residences. Students in Palm Beach County are assigned annually to schools under the authority of the School Board and by direction of the Superintendent, public school attendance zones are subject to change.

Re: Fontana Townhomes
Site Plan Approval Letter
Engenuity Group Project No. 6001.106

We have received the following through WeTransfer on 12-30-20:

1. Site Development Plans, 24 sheets, dated December 2020, by Kimley Horn.
2. Site Plan, 1 sheet (SP-1), revised 12-21-20, by WGI.
3. Landscape Plan, 5 sheets (LP-1.00, LP-1.01, LP-1.02, LP-5.00, LP-6.00), revised 12-21-20, by WGI.
4. Drainage Statement, 19 sheets, dated 12-18-20, by Kimley Horn.
5. PBC Traffic Performance Standard Review (Revised), 2 sheets, dated 12-15-20
6. Justification Letter, 12 sheets, resubmitted 12-21-20, by WGI.
7. Response Letter, 2 sheets, dated 12-21-20, by WGI.

We recommend Site Plan approval with the following condition:

1. Provide cross sections at the perimeter of the property.
2. Verify the placement of the weir in the control structure.
3. Verify the any construction activities will not impact the properties to the north and south adjacent to Davis Road as they are in an AE Flood Zone.
4. Provide permits from applicable agencies including, but not limited to, LWDD, SFWMD, PBCWUD, PBC Fire Rescue, etc.
5. Additional comments may be asked at time of Civil/Utility Plan review.

If you should have any questions, please give me a call at 561-655-1151.

Iramis,
I reviewed the revised plans and they are acceptable for site plan approval.
In the response letter WGI indicates they included documentation regarding coordination with LWDD regarding the auto flusher. I was not able to locate this documentation.
The applicant will be required to submit plans to PBCWUD for plan approval. This process can begin anytime.
Thank you

Hello,

Per the results of the Notice Criteria tool, It is required the applicant fill out Form 7460, Notice of Actual Construction or Alteration. Form 7460 is available online on FAA website at the link https://oeaaa.faa.gov. FAA will perform an aeronautical study to determine if the proposed development will be a hazard to air navigation. Once FAA has provided a decision, the applicant must provide DOA a copy of their results with their application. FAA 7460 application process time is pending, it may take several months. Please contact FAA to determine the application process time.

The FAA results must be provided to DOA prior to commencement of subject construction.

Please contact me with any concerns.

Thank you

Wil Hicks

12-3-2020

After review of the survey and canal cross sections with Dave Lindley, and changes made, LWDD has no objection to the certification of this petition.

LWDD will not require additional right-of-way as originally discussed. While it would be beneficial to LWDD to obtain an additional 5 feet, LWDD will not require the property owner to convey an easement.

Thank you.

PBC

Hello Iramis,

No comments on revised submittal. As a reminder, applicant will still need to fill out a right of way dedication package per our website. The separate instruments for right of way dedication on Coconut Rd and David Rd will need to be approved by our right of way section prior to any right of way permits being issued.

Best Regards,
Will

PUBLIC HEARING NOTICE

Notice is hereby given that public hearings will be held on:

Tuesday, March 9, 2021 at 6:30 p.m. by Planning & Zoning Board
Thursday, April 8, 2021 at 6:30 p.m. by Local Planning Agency
Thursday, April 8, 2021 at 6:30 p.m. by the Village Council, after LPA Meeting
Thursday, May 13, 2021 at 6:30 p.m. by the Village Council

In the Village Hall Council Chambers at 226 Cypress Lane, Palm Springs, FL 33461 to consider:

Small-Scale Land Use Amendment, Rezoning and Site Development Plan

An application submitted by Jerrod Purser, agent for Meritage Homes of Florida, Inc. ("Applicant"), for Small-Scale Land Use Amendment of the Future Land Use Map (FLUM) to change the land use from Urban Infill to High Density Residential land use, concurrent with Rezoning from Urban Infill (UI) to Residential Multiple-Family (RM) and a Planned Development Site Plan (**SPR21-02**) with waivers, for construction of fifty-nine (59) two-story fee simple townhomes, located on the two unified parcels, totaling of 4.73 acres, at 4063 Davis Road and 4090 Coconut Road.

Ordinance No. 2021-02: Comprehensive Plan Amendment to designate the Village Future Land Use of the subject properties to "High Density Residential" and concurrently designate with the Land Development to "Residential Multiple-Family" (RM).

Resolution No. 2021-03 Fontana Townhomes Planned Development Site Plan with Waivers

All persons interested in these matters may appear at the times and place aforesaid and be heard. Prior to the meeting the application may be reviewed at the Village Clerk's Office.

If a person decides to appeal any decision made by the above Boards with respect to any matter considered at such hearings, he or she will need a record of the proceedings, and for such purpose may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. Persons who need an accommodation to attend or participate in this meeting should contact the Village Clerk at (561) 965-4010 at least three (3) days prior to the meeting to request such assistance.

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Planning, Zoning & Building

ITEM 9.5: Resolution No. 2021-10 - Site Development Plan Amendment (SPR21-06) Special Exception Use (PSSE21-02) and Hours of Operation (PSV21-07) - Five Star Education - 2390 South Military Trail (*Quasi-Judicial Hearing*)

SUMMARY: Ms. Martie A. Lovely, applicant, is requesting a Site Plan amendment (SPR21-06) and Special Exception Use (PSSE21-02) approval to re-establish the child daycare use and educational use for the Commercial General property located at 2390 South Military Trail.

Note: Currently, the 3.39 acres property is developed with 5 buildings and 1 portable structure for a total of 22,889 square feet floor area. The property was annexed into the Village in 2001 as a developed parcel and has been used continuously as a place of worship (church).

In 2003 the Village Council approved a site plan and special exception use under Resolution No. 2003-68 to permit educational use on the property (a charter school sponsored by Palm Beach County as a public school of choice). It was initially serving kindergarten through third grade with approval to add an additional grade per year over two years (until it reached fifth grade) but never exceeding 190 students.

Per Village Code, the approved special exception use is valid as long as it remains in operation, and should it cease or not be utilized for more than 12 months, the approved becomes null and void. The educational buildings are still present on the property but have been unutilized for many years.

The applicant is proposing to re-establish the daycare and school use on the property, utilizing the existing buildings previously approved for the same type of use. At this time the applicant is proposing a maximum of 62 children (infant to pre-kindergarten) and a maximum of 89 students (kindergarten to fifth grade) for a total of 151 children/students.

A site plan amendment is being requested to enable the applicant to bring the property up to code, to the extent possible, and to be consistent with the Village's Commercial General (CG) zoning district regulations. Additionally, the proposed site plan provides enhanced landscape buffers, dumpster enclosure, upgrades to the interior of the building and cosmetic work to the exterior facades.

Additionally, the applicant is requesting one (1) variance:

1. (PSV21-07) - Request to allow business operations to commence at 6:00 am (one hour early) [Provides relief from Section 34-891(1) that restricts business activities prior to 7:00 a.m.]

Note: The proposed hours of operation variance was not considered by Planning & Zoning Board as Village Code (Sec. 34-891 - Hours of Operation) provides that operational hours are approved by the Village
Council.

The Planning and Zoning Board considered this application during their April 13, 2021 meeting and recommended approval.

Planning, Zoning & Building Staff does not object to the proposed special exception use, site plan amendments and hours of operation variance and recommends conditional approval of the proposed development subject to twenty-eight (28) conditions.

FISCAL IMPACT:

The proposed project is not expected to have a direct fiscal impact on the Village as it the use is anticipated to be tax exempt. Additionally, this project, if approved, would require various Village services that will result in increased expenditures to the Village.

RESOLUTION NO. 2021-10

A RESOLUTION OF THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA, (APPROVING/DENYING), WITH CONDITIONS, A SITE PLAN DEVELOPMENT AMENDMENT, (SPR21-06), AND SPECIAL EXCEPTION USE (PSSE21-02) TO PERMIT EDUCATIONAL USE AND RE-ESTABLISH THE DAYCARE AND SCHOOL USE AND ALLOW HOURS OF OPERATION VARIANCE (PSV21-07) TO COMMENCE AT 6:00 A.M. RATHER THAN 7:00 A.M., LOCATED AT 2390 SOUTH MILITARY TRAIL AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Ms. Martie A. Lovely, applicant for Five Star Education, ("Applicant") is requesting a Site Plan Amendment (SPR21-06) and Special Exception (PSSE21-02) approval to re-establish the child daycare use and educational use for the Commercial General property located at 2390 South Military; and

WHEREAS, Ms. Lovely, Applicant ("Applicant") is requesting one (1) variance relief, (PSV21-07); and

1. Section 34-891(1) to allow business operations to commence at 6:00 am (one hour early) [Provides relief from Section 34-891(1) that restricts business activities prior to 7:00 a.m.]

WHEREAS, the Planning & Zoning Board ("Board") considered the Site Plan Amendment (SPR21-06) and Special Exception Use (PSSE21-02) during their April 13, 2021 meeting and in light of the applicable legal criteria set forth in Chapter 34 of the Palm Springs Code and the sworn testimony and other evidence presented at public hearing, and the Board recommended approval of the application; and

WHEREAS, the Village Council heard the request for variance relief, (PSV21-07)in public session; has considered the presentation and other evidence presented by the Applicant; has received and considered the recommendations of the Village Staff; and has otherwise been fully informed regarding this matter.

NOW THEREFORE, BE IT RESOLVED BY THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA:

Section 1. The Village Council, having received and considered the request of Ms. Martie A. Lovely, Applicant ("Applicant"), for approval of Site Plan Amendment (SPR21-06), Special Exception Use (PSSE21-02), determines as follows:

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby adopts the findings of the Board and approves the said application**

as revised, with the staff report conditions attached hereto as Exhibit "A", and which is incorporated herein by reference.

OR

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby rejects the Board findings and denies the application for the following reason(s):**

Section 1. The Village Council having received and considered the request of Ms. Martie A. Lovely, Applicant ("Applicant"), for approval of one (1) variance (PSV21-07) from Section 34-891(1) to allow business operations to commence at 6:00 a.m. in light of the applicable legal criteria set forth in Chapter 34 of the Palm Springs Code and the sworn testimony and other evidence presented at public hearing, determines as follows:

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby finds that there is substantial evidence to support same, and hereby APPROVES the request for the above-described variance relief.**

OR

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby DENIES the application for variance relief, finding that the requirements of Chapter 34 have not been met for the following reason(s):**

Notwithstanding any exceptions, conditions or other approvals granted herein, the applicant must conform to all other applicable codes, ordinances, and laws whether stated herein or not.

Section 2. This Resolution shall take effect immediately upon adoption.

Council Member _____ offered the foregoing resolution. Council Member_____ seconded the motion, and upon being put to a vote, the vote was as follows:

	Aye	Nay	Absent
BEV SMITH, MAYOR	□	□	□
GARY M. READY, VICE MAYOR	□	□	□

East	Residential Multi-Families Residences	Low Density Residential	Residential Multiple-Family (RM)
West	Place of assembly	Unknown Unincorporated Palm Beah County	Unknown Unincorporated Palm Beah County
Recommendation			
Planning, Zoning & Building Staff recommends conditional approval for the proposed re-establishment of the child daycare and school uses on the property, as depicted on the proposed site plan, based on consistency with the Village Comprehensive Plan and compatibility with surrounding uses, and supports the requested variance.			

I. Site History

- Ordinance 2000-74: Annexation

On January 25, 2001, the property was voluntarily annexed into the Village of Palm Springs as a developed parcel and designated with the Land Development as Commercial General zoning district and Commercial Future Land Use designation.

- Resolution 2003-68: Site Plan

On July 24, 2003, the Village Council approved the above resolution to allow the use of the property as a charter school and daycare with a maximum of 190 students.

II. Comprehensive Plan Consistency

The subject property's Future Land Use designation and Zoning are Commercial and Commercial General (CG), respectively. The proposed use is permitted as special exception use and is generally consistent with goals, objectives and policies of the Village's Comprehensive Plan. With the proposed use, the property is proposed to be revitalized and improvement to the exterior of the site will create a beneficial visual impact to the neighborhood.

III. Variances Requested

The applicant is seeking the following variances:

- PSV21-07 Requesting Variance relief from Section 34-891(1) to allow business operations to commence at 6:00 am instead of 7:00 am required.

The applicant's full justification is hereto:

a. That special condition and circumstances exist which are peculiar to the land, structure, or building involved, and which are not applicable to other lands, structures, or buildings in the same land development district.

Hours of Operation are unique to the use proposed as a childcare/school facility for the local residents. The limitation of the hours of 7am-11pm is not consistent with the proposed use as a childcare facility. The proposed request from 6am-6pm operations is consistent with other childcare/school facilities within the Village of Palm Springs.

b. That the special conditions and circumstances do not result from the actions of the applicant.

The unique condition of the operation cycle for the proposed use is standard operating procedure within this industry. The applicant is only proposing to operate this facility in a consistent manner with other like facilities on similar roadways and in similar locations. The applicant is not requesting more than what has been afforded other like childcare/schools within the Village

c. That granting the variance requested will not confer on the applicant any special privilege that is denied by this chapter to other lands, buildings, or structures in the same land development district.

Literal interpretation of this article certainly would deprive the applicant of rights commonly enjoyed by similar facilities. The most recent examples are the Kreative Kids Lake Worth facility located on 10th Ave. N. as well as Creative Learning Experience located off Miller Rd. Limiting this site would clearly deprive the applicant of similar rights enjoyed by like uses.

d. That literal interpretation of the provisions of this chapter would deprive the applicant of rights commonly enjoyed by other properties in the same land development district under the terms of this chapter and would work unnecessary and undue hardship on the applicant.

As stated above, the minimum variance necessary is from 6am-6pm to be consistent with the similar uses within the vicinity. There are no site constraints that deem this location different or unique from the other facilities that operate consistent with this request. Any limitation on the hours of operation less than what has been provided to others would create a financial and competitive hardship for this site.

e. That the variance granted is the minimum variance that will make possible the reasonable use of the land, building, or structure.

There is no detrimental effect on the public or properties surrounding this site if the variance were to be approved. Currently, the buildings have no active use in the daytime or nighttime.

f. That the granting of the variance will be in harmony with the general intent and purpose of this chapter.

The granting of the variance will be in harmony with the general intent of the chapter.

g. That such variance will not be injurious to the area involved or otherwise detrimental to the public welfare.

The variance will not be injurious to the area involved or otherwise detrimental to the public welfare. The variance will provide flexibility to parents that need to be at work earlier.

Staff does not object to the applicant's request, based on the applicant intent to provide more alternatives to parents/guardians to drop off their child and report to work/school on time. Staff found the variance to be in harmony with the general intent of the Village Code and will no create conflicts from the use or granting of the variance to commence business operation one hour (1 hr.) ahead of what is permitted.

IV. Neighborhood Compatibility

1) The proposed project is located on the east side of South Military Trail between Forest Lane and Cypress Lane.
2) The project re-establishes the previously approved use of the property.
3) Enhancement to the landscaping will be beneficial to the neighborhood.
4) The project is located in proximity to predominantly residential uses.
5) Clifford O. Taylor Kirklane Elementary school is located 750 away from the property.

V. Regulatory Issues

- The site plan generally conforms to the property development standards of the CG district.
  1) Proposed project plan generally meets required site development regulations.
  2) Variance requested shall be approved by the Village Council.
  3) Permits from all applicable permitting agencies, including but not limited to PBC Fire Rescue and Village of Palm Springs are required prior to any construction.
  4) Proposed project meets the Traffic Performance Standards of Palm Beach County.

VI. Environmental Issues:

There are no environmental (wetlands, floodplains, etc.) issues identified.

VII. Community Outreach/ Notification

- The subject property was posted on March 30, 2021.
- Public Notification letters were mailed to all property owners within 300 feet radius of subject property on March 26, 2021.
- Legal advertisement was published in the paper on April 1, 2021.
- Staff has not received any inquiries or comments as a result of the notices.

VIII. Proposed Development Plan Details

The petitioner's development plans dated received on November 19, 2020 depicts the following:

- An application submitted for a Site Plan Amendment Approval and concurrently Special Exception Use with one (1) variance to re-establish the child daycare and school use of the property that was approved in 2003.
  1. Site Plan dated received November 19, 2020 revised and resubmitted on March 18, 2021.
  2. Landscape Plans dated received February 19, 2020 revised and resubmitted on March 12, 2021.
  3. Architectural plans dated received February 19, 2020 revised and resubmitted on February 23, 2021.
  4. Justification Statement and proposed use.
  5. Traffic Study.

IX Recommendation

The 3.39 acres property is located on the east side of South Military Trail between Forest Lane and Cypress Lane within a predominantly residential neighborhood. The site is currently developed with five (5) buildings and one (1) portable structure for a total of 22,889 square feet floor area. The property was annexed into the Village in 2001 as a developed

parcel and has been used as a place of worship (church) as of today.

In 2003 the Village Council approved a site plan and special exception use under Resolution 2003-68 to permit the educational use on the property as charter school sponsored by Palm Beach County as a public school of choice. It was initially serving kindergarten through third grade and adding additional grades per year for two years until it reached fifth grade but never exceeding 190 students.

Per Village Code, the approved special exception use is valid as long as it remains in operation, and should it cease or not be utilized for more than 12 months, the approval becomes null and void. The educational buildings are still present on the property but have been unutilized for many years.

The applicant is proposing to re-establish the daycare and school use on the property, utilizing the existing buildings previously approved for the same type of use. At this time the applicant is proposing a maximum of 62 children (infants to pre-kindergarten) and a maximum of 89 students (kindergarten to fifth grade). The children and student's distribution are proposed to be as follow:

Building A (2,674 sf)	43 children (1 to 4 years old)
Building B (706 sf)	19 children (infants)
Building C (2,780 sf)	89 students
Total of 151 kids/students	

The proposed site plan includes enhancement to the landscape buffers, dumpster enclosure, upgrades to the interior of the buildings (to be in compliance with Florida Building Code) and cosmetic work to the exterior facades.

Staff has found the proposed Special Exception use to be generally consistent with goals, objectives and policies of the Village's Comprehensive Plan. The proposed use is generally consistent with the Land Development and zoning regulations and all other portions of the code. The proposed special exception use does not significantly reduce light and air to adjacent properties and would not be deterrent to surrounding properties. The new project does not negatively impact natural systems.

Planning, Zoning and Building Staff recommends conditional approval of the Special Exception Uses and Site Plan Amendment subject to the following twenty-eight (28) conditions below:

1. Build out date is December 31, 2022.
2. The special exception approval shall be implemented within 18 months of Council approval.
3. The site plan approval is valid within 24 months of Council approval.
4. The Site Plan sheet (ASP-1) shall be revised to reflect the correct structure type for Building B at time of permitting, Building B is not a CBS building.
5. Architectural overall floor plan sheet (A1) shall be revised at time of permitting to reflect the correct occupancy on suites 111 and 112, maximum occupancy shall be 5 within each room.
6. The maximum number of children attending the daycare shall not exceed 62 and the maximum number of students shall not exceed 89 at any time.
7. Proposed landscape upgrading shall be concluded prior to any operations commencement.
8. The dumpster enclosure shall be completed prior to the issuance of the business license.
9. Proposed security fence around the sport field shall be installed and completed with the Planning, Zoning & Building department prior to the issuance of the business license.
10. A life safety plan shall be provided to the Village's Planning, Zoning & Building department addressing comments issued by PBC Fire Department on February 18, 2021.
11. A building permit must be obtained with the Village's Planning, Zoning & Building department prior to any remodeling/construction work on the property.
12. No drop-off/pick-up shall be permitted from the northern parking spaces.
13. Staff shall direct customers to utilize the designated drop-off/pick-up parking spaces on the south side of the building.
14. Palm Beach County "Digital Inclusion infrastructure" (broadband antenna and related facilities) shall be

accommodated on the property (if location is determined to be desirable for broadband coverage by Palm Beach County or School District of Palm Beach County), prior to Certificate of Completion, and property owner shall voluntarily serve as a program partner (easement/agreement, electric) through the life of the program.

15. Permits must be obtained from the Village and Palm Beach County Fire Department at time of permitting.
16. Provide permits from all applicable permitting agencies at the time of permitting.
17. The construction dumpster shall be only provided by Waste Pro USA who is under franchise Agreement with the Village.
18. Landscaped areas shall be irrigated including but not limited to buffer, islands, planter boxes, etc. Non-potable water shall be used for the irrigation system per Village code.
19. The property owner shall register an Agent of Record, prior to issuance of a permit, to establish a contact person responsible for compliance with this Development Order, including site plan/landscape plan details and conditions of approval.
20. The Applicant may be required to undertake additional security measures, based on the number of complaints or calls for service for incidents at the premises, as determined by the Police Chief. Such additional security measures, as approved by the Police Chief, may include increased on-site security at the operator's sole expense.
21. All new electric utilities shall be underground.
22. A silt barrier shall be installed around the perimeter of the property (within the affected area for the site improvements and new building construction) prior to commencement of any site work or construction activity, and a track pad shall be installed at the construction entrance(s), both of which shall remain through substantial completion.
23. Any sidewalk broken or damaged during construction shall be replaced by the contractor prior to CC.
24. The Landscaping shall be certified by the Landscape Architect upon completion and prior to CC or CO .
25. Absolutely no occupancy, other than construction personnel, is permitted prior to TCC/CC.
26. The applicant may be required to provide a resident inspector for structural elements such as concrete pours in accordance with Section 109.1.3 FBC 2010 and F.S. 553.791. Determination shall be made at time of pre-construction conference with Planning Zoning and Building Director.
27. The General Contractor shall be on site during any and all construction activity in accordance with FS 489.1195.
28. At the time of CC, the petitioner shall provide the Planning, Zoning and Building Department with electronic copies of as-builts.

Five Star Education, Inc.

16112 E. Preakness Drive, Loxahatchee Fl. 334700
Phone: 561-301-7511

Section 4 Description of Project.

Following is the description of Five Star Education Inc. as an attachment to the application for Special Exception (for Childcare/School Use).

The Five Star Education, Inc. is a childcare/school program focusing on education from infants to fifth grade, before and after school care, and summer camp. Five Star will provide year-round academics, and life skills development. The facility will include classrooms, offices for staff, playground area, and eating area (meals that are brought into the site, not prepared on the premises).

This request is for approval of a special exception to permit the childcare/school facility use, to re-establish the previous approvals used for a daycare and private charter school that was abandoned by the previous tenant in 2003. This site plan amendment proposes improvements (upgrade) to the interior of the buildings to be in compliance with Florida Building Code and some cosmetics work to the site to replace/ install missing vegetation, accordingly with the approved landscape plan on the Village files.

The narrative below provides a description of the Five Star Learning Academy use, and addresses the Special Exception criteria for the Childcare/School Facility use.

Five Star Learning Academy Description

- Sec. 34-1022. - Development standards.

In addition to applicable regulations and requirements otherwise set forth in this article, the following minimum standards and regulations shall apply to the development of property for a child care facility. Such standards shall be met regardless of the existence of lesser standards that may be imposed by other agencies of government.

(1) Location. Child care facilities shall be located in residential areas and designed so as to minimize any adverse effects on adjacent property.

This property is located in a residential area and surrounded by local residents. The child care is surrounded by homes and apartments.

(2) Lot area. The minimum lot area shall not be less than 10,000 square feet in area.

The lot area is not less than 10,000 square feet. The current lot size is 147,668.4

(3) Frontage. The minimum frontage for the lot shall be 100 feet.

This lot has 270 feet and we meet the minimum of 100 feet.

(4) Floor area. There shall exist a minimum usable floor area, exclusive of any space devoted to kitchen, office, storage, toilet facilities, hallways, stairs, permanent fixtures, and non-moveable furniture of not less than 1,500 square feet for a capacity of 40 children or less. Facilities with capacities exceeding 40 children shall provide 35 square feet of additional floor space per child.

The facilities have a minimum usable food space of over 1500 square feet, and will provide 35 square feet per child in the space. The building has a total of 6,454 square feet

(5) Outdoor play areas. There shall be provided a minimum of 1,500 square feet of usable outdoor play area or 75 square feet per non-infant child and 45 square feet per infant child, whichever produces the larger area. The play area shall be provided on the same lot as the principal use and shall not be located in the required front yard, or adjacent to any outdoor storage area on such use or an adjacent use.

The play area is located on the same lot as principal use and is not located in the front yard or adjacent to any outdoor storage area. The playground exceeds the 1500 square feet usable outdoor play area as well as 75 square feet per non infant child, and 45 square feet for infant children.

(6) Height and other building restrictions. The building height and other site regulations, except for those otherwise specifically cited, shall be governed by the land development district regulations within which the child care facility is proposed to be located.

The Height of the building does not exceed 45 feet and the current is 16 feet.

(7) Childcare facilities. One parking space per employee and teacher normally engaged in or about the building or grounds, or one parking space per 200 square feet of gross floor area. One off-street loading/unloading space per eight pupils shall be provided for a convenient drop-off area, with clear, unobstructed ingress and egress.

1 x employee @ 18 employees = 18 parking spaces or

1/200 of gross floor area @ 3,380 sf = 17 parking spaces

===18 parking spaces shall be provided

And 1/8 pupils @ 62 = 8 parking spaces

Total parking spaces for the day care use shall be 36

Elementary and junior high schools. One parking space per classroom, plus one parking space per employee and teacher, plus one parking space per six seats in the auditorium or other places of assembly.

1x classroom @ 3 classrooms= 3 spaces +

1 x employee @ 5 teachers = 5 spaces

Total of 8 spaces

Church 1 x 4 seats = 137 spaces

Five Star will be utilizing the facility located on 2390 S. Military Trail, Palm Springs, FL 33461 to offer academics, life skills to children.

The facility at 2390 S. Military Trail will include a reception/lobby area; Classrooms; storage and file spaces; Staff offices; large multi-purpose rooms for school related activities; employee lounge; and restrooms. There will be a total of 13 classrooms including a portable to accommodate a maximum of 62 childcare students, 89 school age and 12-18 faculty. Landscape materials (shrubs/hedges) shall be added along the north side (adjacent to the row) along the north side of the playground area. The hours of operation will be from 6am to 6pm Monday through Friday. Five Star Learning Academy will follow the State required student to staff ratio for operating a childcare facility.

To ensure the safety of our students, staff, volunteers and visitors, Five Star Learning Academy takes all necessary measures and steps to secure its facilities by installing necessary security equipment, training staff.

The existing covered walkway area shall be protected from parking area and street on the north side of the building. Landscape materials (shrubs/hedges) shall be added along the north side (adjacent to the row) along the north side of the playground area. Dumpster shall be enclosed, the dumpster enclosure shall be screened with landscape materials on the 3 sides, and landscape materials shall be added to the plans (landscape plan and site plan).

Multi-sport/ playing field shall be secured from vehicle circulation along the drive aisle on the west side. Shrubs / hedges materials, adjacent to the row, shall be added along the north and south sides of the multi-sport field.

“The majority of our Students will be parents drop off and pick up. Drop off/ pick up area (parking spaces) shall be clear, unobstructed ingress and egress. Breakfast, lunch, and snack will be provided on site to all children by an authorized National School Lunch vendor.

<u>Special Exception Criteria-Child Daycare/Private School Facility</u>
Chapter 34, Section 34-608 of the Code of Ordinances, Village of Palm Springs, requires a statement of special reasons or basis for the special exception request. This statement

should be predicated on the criteria and factors as set forth in Section 34-608(b) of the Code. The statement must include comments on each of the following individually:
(1) The proposed special exception use is consistent with goals, objectives, and policies of the village's comprehensive plan.

The subject site is located in a Commercial designation on the Future Land Use Plan Map. The proposal is to utilize an existing church use building and site for a Childcare/School Use. Relevant goals, objectives and policies of the comprehensive plans include the following:

Future Land Use Element Objective B – Develop commercial development standards that are in line with an intensity of development consistent with that established on the Future Land use Map and which is oriented primarily to serving the needs of the residents while maintaining the integrity of residential areas.

Policy B.2: Limit commercial development to areas with direct access to collector and arterial streets.

This site has direct access to Military Trail.

Future Land Use Element Objective K – Discourage urban sprawl in order to achieve a compact urban form.

Policy K.1: All land uses that have been developed must be adequately served by existing public utilities.

The subject site is fully developed and is served by existing public utilities.

Policy K.2: The Village shall direct urban growth to areas, which can be served efficiently by public services and facilities.

The subject site is fully developed and is served by existing public services.

Policy K.4: All development shall be compatible with and complementary to surrounding land uses and shall not negatively affect existing approved activities.

The proposed development will utilize the existing site as-is with no proposed changes, will include modifications to the interior of the building only, and will not affect any surrounding approved activities or uses in a negative manner.

(2) The proposed special exception is consistent with the land development and zoning regulations and all other portions of this Code.

The existing development was constructed in accordance with the regulations at the time of approval, and the proposed development will utilize the existing site as-is with no proposed changes. All interior modifications will be consistent with the Village codes and Florida Building Code.

(3) The proposed special exception use is compatible with the character and use (existing and future) of the surrounding properties in its function; hours of operation, type and amount of traffic to be generated; building location, mass, height and setback; and other relevant factors peculiar to the proposed special exception use and the surrounding property.

There are no changes to the proposed site or exterior and is compatible with the existing character and use. Because there are no proposed changes to the site or building exterior, the building location, mass, height and setback will not change.

(4) The establishment of the proposed special exception use in the identified location does not create a concentration or proliferation of the same or similar type of special exception use, which may be deemed detrimental to the development or redevelopment of the area in which the special exception use is proposed to be developed.

There are known facilities similar in nature to the subject use and proximate to the subject use but based on the population characteristics and demographics of the area, there is a high demand for this type of use in this area.

(5) The proposed special exception use does not have a detrimental impact on surrounding properties based on:

a. The number of persons anticipated be using, residing, or working on the property as a result of the special exception use;

The number of students and faculty is based on the size of the existing office building and will be limited by the maximum occupancy standards of the Florida Building Code.

b. The degree of noise, odor, visual, or other potential nuisance factors generated by the special exception use; and

The outdoor activities and the use will have minimal impact on surrounding properties.

c. The effect on the amount and flow of traffic within the vicinity of the proposed special exception use.

As noted the students will be dropped off by parents or school bus (after care), site access is via Military Trail, and building entry is through the front (for visitors) and side (for students and faculty) thus minimizing impacts on traffic flow and effect on neighboring properties.

(6) That the proposed special exception uses:

a. Does not significantly reduce light and air to adjacent properties.

No changes to the existing site improvements are proposed.

b. Does not adversely affect property values in adjacent areas.

Approval will enable occupancy of an existing vacant building structure and will continue to be maintained and managed in a manner that will be an asset to the community and not affect property values.

c. Would not be deterrent to the improvement, development or redevelopment of surrounding properties in accord with existing regulations.

There are no proposed changes to the existing site. All renovations will be internal and will not impact surrounding properties.

d. Does not negatively impact adjacent natural systems or public facilities, including parks and open spaces.

There are no proposed changes to the existing site. All renovations will be internal and will not impact natural systems or public facilities.

e. Provides pedestrian amenities, including, but not limited to, benches, trash receptacles, and/or bicycle parking.

There are no proposed changes to the existing site. All renovations will be internal and will not impact natural systems or public facilities.

Section 34-891(1) Variance request from the hours of operation

Variance Criteria – Chapter 34, Section 34-329(b)(1-5)

This variance request is to allow for the operation of the daycare to operate from 6am-6pm Monday-Friday, as opposed to the current Commercial operation hours of 7:00 am to 11:00 pm.

1. Special and unique conditions exist which are peculiar to the applicant's case and which are not generally applicable to the property located within the zoning district or neighborhood involved, such as natural or manmade sight limitations from the public rights-of-way.

Hours of Operation are unique to the use proposed as a childcare/school facility for the local residents. The limitation of the hours of 7am-11pm is not consistent with the proposed use as a childcare facility. The proposed request from 6am-6pm operations is consistent with other childcare/school facilities within the Village of Palm Springs.

2. The special and unique conditions are not directly attributable to the actions of the applicant.

The unique condition of the operation cycle for the proposed use is standard operating procedure within this industry. The applicant is only proposing to operate this facility in a consistent manner with other like facilities on similar roadways and in similar locations. The applicant is not requesting more than what has been afforded other like childcare/schools within the Village.

3. The literal interpretation of this article, as applied to the applicant, would deprive the applicant of rights commonly enjoyed by persons who are similarly situated.

Literal interpretation of this article certainly would deprive the applicant of rights commonly enjoyed by similar facilities. The most recent examples are the Kreative Kids Lake Worth facility located on 10th Ave. N. as well as Creative Learning Experience located off Miller Rd. Limiting this site would clearly deprive the applicant of similar rights enjoyed by like uses.

4. The variance granted is the minimum variance necessary for the applicant to make reasonable use of the property.

As stated above, the minimum variance necessary is from 6am-6pm to be consistent with the similar uses within the vicinity. There are no site constraints that deem this location different or unique from the other facilities that operate consistent with this request. Any limitation on the hours of operation less than what has been provided to others would create a financial and competitive hardship for this site.

5. Granting the variance is not detrimental to the public welfare, or injurious to property or improvements in the zoning district or neighborhood involved.

There is no detrimental effect on the public or properties surrounding this site if the variance were to be approved. Currently, the buildings have no active use in the daytime or nighttime.

NOTES:

GENERAL PLANTING REQUIREMENTS

All sizes shown for plant material on the plans are to be considered Minimum. All plant material must meet or exceed these minimum requirements for both height and spread. Any other requirements for specific shape or effect as noted on the plan(s) will also be required for final acceptance.

All plant material furnished by the landscape contractor shall be Florida #1 or better as established by "Grades and Standards for Florida Nursery Plants" and "Grades and Standards for Florida Nursery Trees". All material shall be installed as per CSI specifications.

All plant material as included herein shall be warrantied by the landscape contractor for a minimum period as follows: All trees and palms for 12 months, all shrubs, vines, groundcovers and miscellaneous planting materials for 90 days, and all lawn areas for 60 days after final acceptance by the owner or owner's representative.

All plant material shall be planted in planting soil that is delivered to the site in a clean loose and friable condition. All soil shall have a well drained characteristic. Soil must be free of all rocks, sticks, and objectionable material including weeds and weed seeds as per CSI specifications.

Twelve inches (12") of planting soil 50/50 sand/topsoil mix is required around and beneath the root ball of all trees and palms, and 1 cubic yard per 50 bedding or groundcover plants.

All landscape areas shall be covered with Eucalyptus or sterilized seed free Melaleuca mulch to a minimum depth of three inches (3") of cover when settled. Cypress bark mulch shall not be used.

All plant material shall be thoroughly watered in at the time of planting; no dry planting permitted. All plant materials shall be planted such that the top of the plant ball is flush with the surrounding grade.

All landscape and lawn areas shall be irrigated by a fully automatic sprinkler system adjusted to provide 100% coverage of all landscape areas. All heads shall be adjusted to 50% overlap as per manufacturers specifications and performance standards utilizing a rust free water source. Each system shall be installed with a rain sensor.

Each lot shall supply, install, and maintain an individual irrigation system for that individual lot.

It is the sole responsibility of the landscape contractor to insure that all new plantings receive adequate water during the installation and during all plant warranty periods. Deep watering of all new trees and palms and any supplemental watering that may be required to augment natural rainfall and site irrigation is mandatory to insure proper plant development and shall be provided as a part of this contract.

Special Note

No items to be stored higher than the screening wall or fence.

All plant material shall be installed with fertilizer, which shall be State approved as a complete fertilizer containing the required minimum of trace elements in addition to N-P-K, of which 50% of the nitrogen shall be derived from an organic source as per CSI specifications.

Contractors are responsible for coordinating with the owners and appropriate public agencies to assist in locating and verifying all underground utilities prior to excavation.

All ideas, designs and plans indicated or represented by this drawing are owned by and are the exclusive property of Wayne K. Tonning,RLA.

The plan takes precedence over the plant list.

SPECIAL INSTRUCTIONS

General site and berm grading to +/- 1 inch (1") shall be provided by the general contractor. All finished site grading and final decorative berm shaping shall be provided by the landscape contractor.

All sod areas as indicated on the planting plan shall receive Stenotaphrum secundatum, St. Augustine 'Floratam' solid sod. It shall be the responsibility of the landscape contractor to include in the bid, the repair of any sod which may be damaged from the landscape installation operations.

PROPOSED PLANT LIST

TREES / PALMS

Code		Drought	QTY.	Botanical Name / Common Name	Specifications

ARCHITECTURAL PLAN GENERAL NOTES

- DRAWINGS ARE INTENDED TO SHOW EXISTING CONDITIONS TO THE BEST OF OUR KNOWLEDGE. DIMENSIONS HAVE A TOLERANCE OF +/- 12", AND SHALL BE FIELD VERIFIED PRIOR TO DO ANY WORK.
- DO NOT SCALE DRAWINGS. DIMENSIONS IN LARGE SCALE PLANS, ELEVATIONS, AND DETAILS SHALL GOVERN OVER SMALL SCALE DETAILS. IF DIMENSIONS ARE IN QUESTION, THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING CLARIFICATION FROM THE ARCHITECT BEFORE CONTINUING WITH CONSTRUCTION.
- THERE IS NO SCOPE OF WORK AS PART OF THESE DRAWINGS.
- SEE PARTITION TYPE GENERAL NOTES AND THESE DRAWINGS FOR THE REQUIRED LOCATIONS OF 5/8" TYPE X GLASS MAT PAPERLESS INTERIOR GYPSUM BOARD. THE USE OF WATER-RESISTANT GYPSUM BOARD (I.E. GREEN BOARD) IS NOT ACCEPTABLE IN WET LOCATIONS; INSTEAD, USE 5/8" TYPE X GLASS MAT PAPERLESS INTERIOR GYPSUM BOARD.
- THE CONTRACTOR SHALL VERIFY THAT THE EXISTING CONSTRUCTION (INCLUDING DAMPERS, DUCT PENETRATIONS, DOORS, WINDOWS, FRAMES, ETC) MEETS THE FIRE/SMOKE/SOUND ASSEMBLY RATINGS AT ALL WALLS/PARTITIONS/BARRIERS, FLOORS, AND ROOFS WHICH ENCLOSE OR TOUCH SPACES IN WHICH WORK IS BEING PERFORMED AS PART OF THIS PROJECT. THE CONTRACTOR SHALL ALSO MAKE ANY REPAIRS AND/OR MODIFICATIONS NECESSARY TO BRING THE EXISTING CONSTRUCTION (INCLUDING DAMPERS, DUCT PENETRATIONS, DOORS, WINDOWS, FRAMES, ETC) UP TO THE PROPER INDICATED FIRE/SMOKE/SOUND ASSEMBLY RATINGS. DOORS, WINDOWS, AND FRAMES WHICH DO NOT MEET THE REQUIREMENTS OF THE DESIGNATED WALL/PARTITION/BARRIER ASSEMBLIES (INCLUDING PROPER LABELS) SHALL BE REPLACED.

LIFE SAFETY GENERAL NOTES

1. THE LIFE SAFETY PLANS ARE DIAGRAMMATIC ONLY. THEIR PURPOSE IS SOLELY TO REPRESENT THE LIFE SAFETY COMPONENTS FOR THE PROJECT (AS INCLUDED IN THE CONSTRUCTION DOCUMENTS PREPARED BY THE ARCHITECT, ELECTRICAL ENGINEER, FIRE PROTECTION ENGINEER, ETC). THE CONTRACTOR SHALL USE THE CONSTRUCTION DOCUMENTS (NOT THE LIFE SAFETY PLANS) FOR THE IMPLEMENTATION OF THE REQUIRED LIFE SAFETY COMPONENTS INTO THE PROJECT.

2. THE CONTRACTOR SHALL MAINTAIN ALL MEANS OF EGRESS FOR THE DURATION OF DEMOLITION / CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE FIRE RATED TEMPORARY PARTITIONS, AND COVERED WALKS TO MAINTAIN EGRESS AND SAFE PASSAGE FROM THE BUILDING TO THE PUBLIC WAY AND AS REQUIRED BY AUTHORITY HAVING JURISDICTION.

3. THE CONTRACTOR SHALL PROVIDE TEMPORARY PROTECTION WHILE WORKING IN THE SPACES BELOW OR ABOVE THE AREA OF DEMOLITION / CONSTRUCTION.

4. THE CONTRACTOR SHALL PROVIDE BARRIERS, TEMPORARY PARTITIONS TO PROTECT OCCUPANTS FROM PHYSICAL HAZARD AND NOISE DURING DEMOLITION / CONSTRUCTION.

5. THE CONTRACTOR SHALL ADVISE THE ARCHITECT IMMEDIATELY UPON DISCOVERY OF ANY LIFE SAFETY COMPONENT THAT IS SHOWN ON THE LIFE SAFETY PLANS BUT HAS NOT BEEN INCLUDED IN THE CONSTRUCTION DOCUMENTS PREPARED BY THE ARCHITECT, ELECTRICAL ENGINEER, FIRE PROTECTION ENGINEER, ETC.

6. THE CONTRACTOR SHALL STENCIL PAINTED SIGNS IN RED LETTERS ON BOTH SIDES OF ALL FIRE WALLS, ALL RATED FIRE BARRIERS, ALL RATED SMOKE BARRIERS, ALL NON-RATED SMOKE PARTITIONS AND ALL FIRE RATED PARTITIONS. LOCATE BOTTOM OF SIGNS NO MORE THAN 12 INCHES ABOVE REMOVABLE CEILINGS, PER THE REQUIREMENTS OF SPECIFICATION SECTION 099123 - INTERIOR PAINTING.

7. THE EXISTING-TO-REMAIN PORTIONS OF THE BUILDING WERE PROVIDED TO THE ARCHITECT BY THE OWNER. CRAIN ATLANTIS, INC. ARCHITECTS TAKES NO RESPONSIBILITY FOR THEIR ACCURACY BEYOND THE LIMITS OF THE DESIGNATED "SCOPE OF WORK" AS DEFINED ON THE ARCHITECTURAL FLOOR PLANS.

2-18/2021

Good afternoon Iramis,

The question was posed, “what needs to be done or can be done” for the operator to utilize the space for the intended usages. This is a loaded question so I’ll attempt to provide as much helpful information as I can to guide the customer. The first and most crucial step is for the architect to identify what the existing occupancy uses were for the three buildings in accordance with the Florida Fire Prevention Code (FFPC). Chapter 43 – Building Rehabilitation of the FFPC will then allow us to properly identify the required fire and life safety features needed to adequately protect occupants for the proposed uses.

For example, as a New Educational occupancy (Building C – grades K through 5) the building is required to be protected by a supervised automatic fire sprinkler system and manual fire alarm system; however, as an Existing Educational occupancy, no fire sprinkler system is required, but a manual fire alarm system is required as well as “rescue windows” for the classrooms exceeding 250 sq.ft. There are other requirements, but the example provided is the most critical.

For the proposed day care uses, again we would need to have the existing uses classified; however, as an Existing Day Care occupancy a manual fire alarm system and a corridor smoke detection system is required. Additionally, in Building “A” rescue windows are needed for classrooms exceeding 250 sq.ft. and the corridor requires a minimum of ½-hour fire resistance rating. There are other requirements but again these are just examples…

RE: Terranova Academy
TRAFFIC PERFORMANCE STANDARDS REVIEW

Dear Ms. Lowe:

The Palm Beach County Traffic Division has reviewed the traffic statement for the project entitled; **Terranova Academy**, pursuant to the Traffic Performance Standards in Article 15 of the Palm Beach County Land Development Code. The project is summarized as follows:

Location:	NE Corner of Military Trail/Cypress Lane
Municipality:	Village of Palm Springs
Existing Uses:	16,512 SF Church, and 7,058 SF Daycare/School
Proposed Uses:	No increase in Building or number of Students
New Daily Trips:	None
Build-out Year:	2003

Based on our review, the Traffic Division has determined that the proposed operational changes meet the Traffic Performance Standards of Palm Beach County, under the following condition:

- There shall be no building expansion or addition to the existing number of school students.

If you have any questions regarding this determination, please contact me at 684-4030.

Sincerely,

OFFICE OF THE COUNTY ENGINEER

Masoud Atefi, MSCE
Sr. Engineer - Traffic Division

Re: Five Star Education – Traffic Concurrency Analysis
PCN 70-42-44-13-02-003-0151
Palm Springs Application No.: 20080137

Dear Martie,

JFO Group Inc. has been retained to evaluate a traffic impact analysis to determine compliance with *Palm Beach County (PBC) - Traffic Performance Standards (TPS) - Article 12 of the PBC Unified Land Development Code (ULDC)*. This traffic statement is associated with a site plan amendment application for the Five Star Education property to allow again daycare/school uses on the subject site.

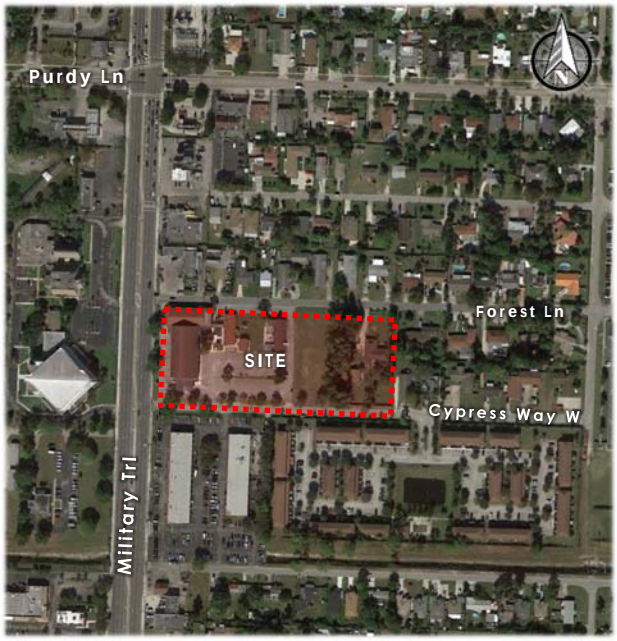

Figure 1 : Project Location

The site is located on the east side of Military Trail, about 0.15 miles south of Purdy Lane in the Village of Palm Springs, Florida. Figure 1 shows the project location in relation to the transportation network. Parcel Control Number associated with this project is 70-42-44-13-02-003-0151**.** A copy of the property appraiser information for the site is included as Exhibit 1 while Exhibit 2 includes a copy of the proposed site plan for the project. Project buildout is expected in the year 2022.

There is an existing 11,000 SF Church attached to a 5,435 SF accessory use building where a 62-student daycare and an 89-student Elementary School are being proposed on the existing buildings on the east side of the property. This site was last approved as a 16,512 SF Church and a 7,058 SF Day Care/School. Exhibit 3 includes a copy of the latest TPS approval for the site. The Day Care/School operated last in 2006-2007 as the Terranova Charter School which held 141 students from K-5, see Exhibit 4.

Project trip generation rates used for this analysis were based on *PBC Trip Generation Rates* dated March 2, 2020. Table 1 shows the rates used in order to determine the trip generation for Daily, AM, and PM peak hour conditions while Table 2 summarizes the net Daily, AM, and PM peak trips potentially generated by the existing and proposed development. For simplification purposes, no internal capture was assumed among the existing/proposed uses. Exhibit 5 includes a copy of the PBC trip generation rates.

Table 2 summarizes the net Daily, AM, and PM peak trips potentially generated by the proposed development. According to Table 2, the net Daily, AM and PM peak trips potentially generated due to the proposed development are 295, 84 and 39 trips respectively. Therefore, according to Table 12.B.2.D-7 3A from the PBC – TPS and given the trip generation characteristics from Table 2, a 1-mile Radius of Development Influence (RDI) needs to be considered for traffic impact analysis.

Based on the *PBC – TPS* and the *Land Development Design Standards Manual*, a left-turn lane is required at each driveway where inbound peak hour left-turning traffic is equal or greater than 30 vehicles. A right-turn lane is required at each driveway where street Average Daily Traffic (ADT) volumes exceed 10,000 vehicles per day, and driveway daily volume is greater than 1,000 trips, with inbound peak hour right-turning traffic being at least 75 vehicles. Figure 3 provides Daily, AM and PM peak hour driveway volumes for the Five Star Education property. As part of a conservative analysis, it was assumed that all project traffic is arriving/departing via Military Trail where both Forest Ln and Cypress Way W provide connectivity to the neighborhood to the east of the subject site as well as direct access to Purdy Ln. Table 4 includes HCS analyses where the project connects to Military Trail. As shown in Table 4, the existing roadway system can accommodate the proposed project traffic, see Exhibit 6.

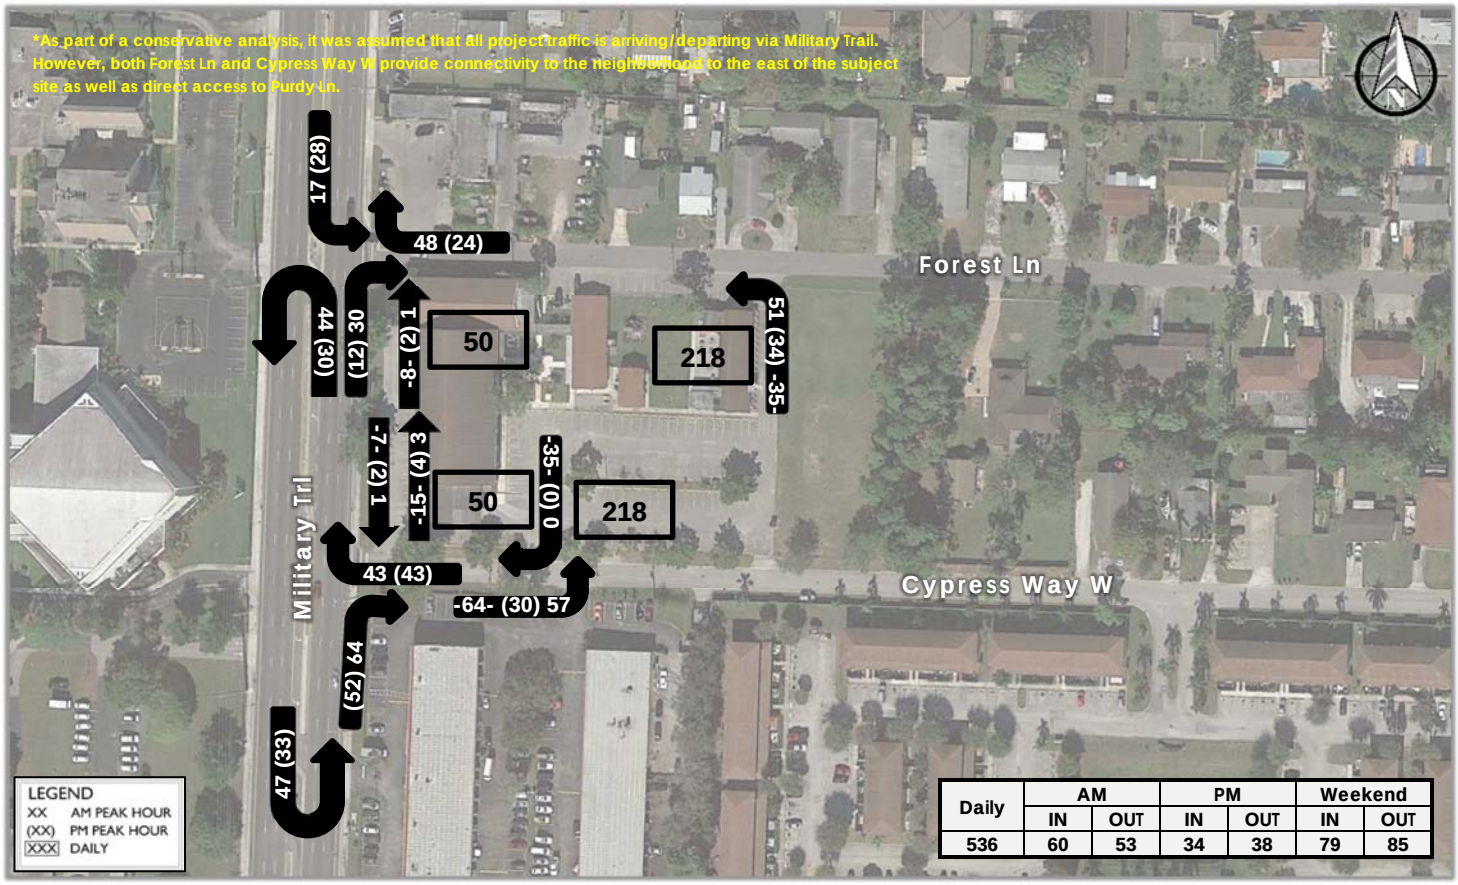

Figure 2: Project Driveway Volumes

The proposed changes to the Five Star Education property have been evaluated following *PBC TPS - Article 12 of the PBC ULDC*. This analysis shows that the proposed request to allow again daycare/school uses on the subject site will generate less than one percent (1%) of the adjacent roadway peak-hour peak-direction LOS in all links included within the PBC RDI. This analysis shows that the proposed development will be in compliance with *PBC TPS - Article 12 of the PBC ULDC*. Project build-out is expected in 2022.

Sincerely,

RE: Five Star Education
Project #: 210313
Traffic Performance Standards Review

Dear Dr. Ortega:

The Palm Beach County Traffic Division has reviewed the **Five Star Education** Traffic Impact Statement, dated March 26, 2021, pursuant to the Traffic Performance Standards in Article 12 of the Palm Beach County Unified Land Development Code (ULDC). The project is summarized as follows:

Municipality:	Palm Springs
Location:	NEC of Cypress Lane and Military Trail
PCN:	70-42-44-13-02-003-0151
Access:	Access driveway connections onto Cypress Lane and Forest Lane (As used in the study and is NOT an approval by the County through this letter)
Existing Uses:	Church = 16,435
Proposed Uses:	Additional: Daycare = 62 Students Elementary School = 89 Students
New Daily Trips:	295
New Peak Hour Trips:	84 (44/40) AM; 39 (18/21) PM
Build-out:	December 31, 2022

Based on our review, the Traffic Division has determined the proposed development does not have significant peak hour traffic impact (as defined in PBC TPS) on the roadway network; therefore, the project **meets** the Traffic Performance Standards of Palm Beach County.

Please note the receipt of a Traffic Performance Standards (TPS) approval letter does not constitute the review and issuance of a Palm Beach County Right-of-Way (R/W) Construction Permit nor does it eliminate any requirements that may be deemed as site related. For work within Palm Beach County R/W, a detailed review of the project will be provided upon submittal for a R/W permit application. The project is required to comply with all Palm Beach County standards and may include R/W dedication.

No building permits are to be issued by the Village after the build-out date specified above. The County traffic concurrency approval is subject to the Project Aggregation Rules set forth in the Traffic Performance Standards Ordinance.

The approval letter shall be valid no longer than one year from date of issuance, unless an application for a Site Specific Development Order has been approved, an application for a Site Specific Development Order has been submitted, or the approval letter has been superseded by another approval letter for the same property.

If you have any questions regarding this determination, please contact me at 561-684-4030 or email QBari@pbcgov.org.

Sincerely,

Quazi Bari, P.E., PTOE
Manager – Growth Management

Palm Springs, FL 33461

RE: Terranova Academy
TRAFFIC PERFORMANCE STANDARDS REVIEW

Dear Ms. Lowe:

The Palm Beach County Traffic Division has reviewed the traffic statement for the project entitled; **Terranova Academy**, pursuant to the Traffic Performance Standards in Article 15 of the Palm Beach County Land Development Code. The project is summarized as follows:

Location:	NE Corner of Military Trail/Cypress Lane
Municipality:	Village of Palm Springs
Existing Uses:	16,512 SF Church, and 7,058 SF Daycare/School
Proposed Uses:	No increase in Building or number of Students
New Daily Trips:	None
Build-out Year:	2003

Based on our review, the Traffic Division has determined that the proposed operational changes meet the Traffic Performance Standards of Palm Beach County, under the following condition:

- There shall be no building expansion or addition to the existing number of school students.

If you have any questions regarding this determination, please contact me at 684-4030.

Sincerely,

OFFICE OF THE COUNTY ENGINEER

Masoud Atefi, MSCE
Sr. Engineer - Traffic Division

Footnotes

a) Weekend peak hour rate = 9.99 per 1,000 s.f. with a 48/52 directional split

b) To be used only when adjacent to hospital, for Med. Office square footage not to exceed 44% of the hospital square footage

c) Use caution when using because of very low sample data. Consult with the County before using.

d) For intensities under 10,000 s.f., use a rate of 125.61 / 1,000 S.F. instead of the equation.

e) Pass-by percent = 62% for 10,000 s.f. or less, otherwise = 83.18 - 9.30 * Ln(A) where A is 1,000 s.f. of leasable area

f) For intensities under 10,000 s.f., use a rate of 9.9 / 1,000 s.f. instead of the equation.

g) Use these rates for a drive-in bank with up to 4 drive-thru lanes (excl. ATM lane). For additional drive-thru lanes, use per lane rates from ITE Code 912 (124.76 daily, 8.83 AM, 27.15 PM. Use same in/out splits)

h) ITE rate NA. Rate derived using PM to Daily ratio for ITE Code 937

i) FP=Fueling Position. Use both FP and Convenience Store size in estimating trips using the provided equation. Note that no internalization between the gas pumps and convenience store, as per ULDC Artice 12, should be applied to estimate the net trips.

j) Use PM rates

k) Daily rate taken from PBC trip gen. study. Peak hour rates derived by applying peak to daily ratios for gas station to daily carwash rate

l) Assume 50/50

m) Landscape Services acreage consists of overnight vehicle and equipment storage as well as areas (covered or uncovered) for chemicals, fertilizers, landscape materials (excluding plants) and other items needed for day-to-day operations. Not included are drive aisles, customer/employee parking, structures shared by nursery and landscape services, facilities that solely serve the onsite landscape activities or any nursery growing areas.

Modification History

3/26/2019: First published

3/2/2020: Added Landscape Services, modification history, edited formatting,

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Planning, Zoning & Building

ITEM 9.6: Resolution No. 2021-11 - Site Development Plan Amendment (SPR21-05) and Special Exception Use (PSSE21-01) - Starbucks - 4380 Forest Hill Boulevard *(Quasi-Judicial Hearing)*

SUMMARY:

Mr. Brian Plewinski, agent for the applicant, is requesting a Site Plan Amendment (SPR21-05) and Special Exception (PSSE21-01) approval to allow the conversion of a 3,387 square foot existing restaurant with drive-thru use into a coffee shop with 482 square foot outdoor seating area and drive thru window, located on a 0.26 acre outparcel of the Shoppes of Forest Hill shopping center, which is located at the southeast corner of the intersection of Forest Hill Boulevard and South Military Trail.

Note: The property was annexed into the Village in 2008 as a developed outparcel and currently, the site is developed with a 3,387 gross square feet commercial structure and has been used continuously as a fast-food restaurant with drive thru. The applicant is proposing 2,593 square feet indoor coffee area and 482 square feet outdoor seating area.

A site plan amendment is being requested to enable the applicant to convert the existing Boston Market restaurant into a Starbucks coffee shop, maintaining the drive thru and adding an outdoor seating area. It is proposed to recess the building on its northern elevation by approximately 482 square foot, to create a covered outdoor seating area for customers to enjoy in the shade. The footprint of the building and covered patio generally remains the same as the current restaurant footprint.

The proposed site plan amendment includes creating a longer vehicle stacking lane (by extending a terminal landscape island) and modifying the traffic circulation plan to avoid negative impacts to the roadway system and/or main drive aisles of the shopping center. The proposed improvements include directional signage, enhanced landscaped buffers, re-striping

parking lot, pedestrian connections and exterior improvements to the building.

Additionally, the applicant is requesting a variance relief (PSV21-06) from Section 34-891(1) to allow business operation to commence at 5:30 am rather than 7:00 am required. The request will be considered by the Village Council on May 13th if the site plan and special exception are recommended for approval.

The Planning and Zoning Board considered this application during their April 13, 2021 meeting and recommended approval.

Based on the surrounding characteristics, staff recommends conditional approval of the proposed revised site plan and special exception use.

FISCAL IMPACT:

The proposed request is not expected to provide a direct fiscal impact to the Village; however, if approved, would require various Village services that will result in increased expenditures to the Village.

RESOLUTION NO. 2021-11

A RESOLUTION OF THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA, (APPROVING/DENYING), WITH CONDITIONS, A SITE PLAN AMENDMENT, (SPR21-05), AND SPECIAL EXCEPTION USE (PSSE21-01) TO ALLOW THE CONVERSION OF A 3,387 SQUARE FOOT EXISTING RESTAURANT WITH DRIVE-THRU USE INTO A COFFEE SHOP WITH 482 SQUARE FOOT OUTDOOR SEATING AREA AND DRIVE THRU WINDOW AND HOURS OF OPERATION VARIANCE (PSV21-06) TO ALLOW BUSINESS OPERATIONS TO COMMENCE AT 5:30 A.M. RATHER THAN 7:00 A.M., LOCATED AT THE SOUTHEAST CORNER OF THE INTERSECTION OF FOREST HILL BOULEVARD AND SOUTH MILITARY TRAIL AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, Mr. Brian Plewinski, agent for Starbucks, ("Applicant") is requesting a Site Plan Amendment (SPR21-05) and Special Exception (PSSE21-01) approval to allow the conversion of a 3,387 square foot existing restaurant with drive-thru use into a coffee shop with 482 square foot outdoor seating area and drive thru window, located on a 0.26 acre outparcel of the Shoppes of Forest Hill shopping center, which is located at the southeast corner of the intersection of Forest Hill Boulevard and South Military Trail; and

WHEREAS, Applicant is also requesting a variance relief, (PSV21-06) from the requirements of Code Section 34-891(1) to allow business operations to commence at 5:30 a.m. rather than 7:00 a.m.; and

WHEREAS, the Planning & Zoning Board considered the Site Plan Amendment (SPR21-05) and Special Exception Use (PSSE21-01) during their April 13, 2021 meeting and in light of the applicable legal criteria set forth in Chapter 34 of the Palm Springs Code and the sworn testimony and other evidence presented at public hearing, and the Board recommended approval of the application subject to staff report conditions; and

WHEREAS, the Village Council has heard the request for variance in public session; has considered the presentation and other evidence presented by the Applicant; has received and considered the recommendations of the Village Staff; and has otherwise been fully informed regarding this matter.; and

NOW THEREFORE, BE IT RESOLVED BY THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA:

Section 1. The Village Council having received and considered the request of Mr. Brian Plewinski, agent for the Applicant", for approval of Site Plan Amendment (SPR21-05), Special Exception Use (PSSE21-01) for the proposed coffee shop with outdoor seating and drive thru, determines as follows

.

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby adopts the findings of the Board and approves the said application as revised, with the staff report conditions attached hereto as Exhibit "A", and which is incorporated herein by reference**.

OR

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby rejects the Board findings and denies the application for the following reason(s):**

_____
_____
_____

Notwithstanding any exceptions, conditions or other approvals granted herein, the applicant must conform to all other applicable codes, ordinances, and laws whether stated herein or not.

Section 2. The Village Council having received and considered the request by Mr. Brian Plewinski, agent for the Applicant, for approval of one (1) variance (PSV21-06) from Section 34-891(1) to allow business operations to commence at 5:30 a.m. in light of the applicable legal criteria set forth in Chapter 34 of the Palm Springs Code and the sworn testimony and other evidence presented at public hearing, determines as follows:

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby finds that there is substantial evidence to support same, and hereby APPROVES the request for the above-described variance relief.**

OR

_____**Having been otherwise fully apprised of the premises herein, the Village Council hereby DENIES the application for variance relief, finding that the requirements of Chapter 34 have not been met for the following reason(s):**

Section 3. This Resolution shall take effect immediately upon adoption.

Council Member _____ offered the foregoing resolution. Council Member_____ seconded the motion, and upon being put to a vote, the vote was as follows:

PLANNING, ZONING & BUILDING STAFF REPORT

SUBJECT: Special Exception Use and Site Plan Amendment with One (1) Variance - Starbucks #66291 – 4380 Forest Hill Boulevard

Application Summary			
Applicant / Petitioner	Starbucks #66291	Submittal Date	2/26/2021
Reference Name	Starbucks	Case Number	SPR21-05, PSSE21-01, PSV21-06
		Parcel Control No	70-42-44-12-00-000-5680
Location	4380 Forest Hill Boulevard	Site Area	±0.26 acres
P&Z B Meeting	April13, 2021	Council Meeting	May 13, 2021
Requests			
Proposed Use(s)	Site Plan Amendment and concurrent request for a Special Exception Use to allow the conversion of the existing restaurant use into a coffee shop with outdoor seating area and maintaining the drive thru.		
Number of Buildings	1 single structure (3,387 sf) 482 square footage of the existing building is going to be converted into an outdoor patio area (11'4" x 42'11")		
Variances	COUNCIL CONSIDERATION: PSV21-06 Requesting a Variance relief from Section 34-891(1) to allow business operation to commence at 5:30 am instead of 7:00 am required.		
Parking			
Code	Required	Provided	Meets Requirement
Total Overall Parking	Entire center 1 / 200 s.f. @ 122,042 s.f. = 610 spaces As an outparcel 1/50 s.f. @ 3,387 s.f.= 68 spaces	631 after improvements	Yes (considering entire plaza with shared parking)
Site Characteristics			
Existing Use	Fast Food Restaurant with drive thru	Proposed Use	Coffee shop with outdoor seating and drive thru
Existing Zoning	Commercial General (CG)	Existing Future Land Use	Commercial

Surrounding Existing Land Use, Future Land Use, and Zoning			
Direction	Existing Use	Future Land Use	Zoning District
North	Commercial vacant lot	Commercial	Commercial General (CG)
South	Residential Multi-Families Residences	Low Density Residential	Residential Multiple-Family (RM)
East	Residential Multi-Families Residences	Low Density Residential	Residential Multiple-Family (RM)
West	Commercial shopping center	Unknown Unincorporated Palm Beah County	Unknown Unincorporated Palm Beah County

Recommendation
Planning, Zoning & Building Staff recommends conditional approval of the conversion of the existing 3,387 sf restaurant use into a coffee shop with outdoor seating area and drive thru, as depicted on the proposed site plan, based on consistency with the Village Comprehensive Plan and compatibility with surrounding uses. Staff highly recommends that with the proposed new coffee shop queue shall be stored internally to the site without blocking a roadway system or a major driveway/ drive aisle.

I. Site History

- Ordinance 2008-24: Annexation

On December 11, 2008, the property was voluntarily annexed into the Village of Palm Springs as a developed parcel and designated with the Land Development as Commercial General zoning district and Commercial Future Land Use designation. Since the property was annexed has been used a fast-food restaurant with drive thru.

II. Comprehensive Plan Consistency

The subject property's Future Land Use designation and Zoning are Commercial and Commercial General (CG), respectively. The proposed use is permitted as special exception use and is generally consistent with goals, objectives and policies of the Village's Comprehensive Plan. With the modifications of the restaurant use the property is proposed to be revitalized and improvement to the exterior of the building will create a beneficial visual impact to the neighborhood.

III. Variances Requested

The applicant is seeking the following variances:

- PSV21-06 Requesting Variance relief from Section 34-891(1) to allow business operations to commence at 5:30 am instead of 7:00 am required.

The applicant's full justification is hereto:

a. *That special condition and circumstances exist which are peculiar to the land, structure, or building involved, and which are not applicable to other lands, structures, or buildings in the same land development district.*

Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours. Starbucks is only requesting operating hours of 5:30 a.m. to 11:00 p.m.

b. *That the special conditions and circumstances do not result from the actions of the applicant.*

Coffee is primarily consumed in the morning. According to the Bureau of US Labor Statistics, about 29 percent of workers were on the clock at 7 a.m. These early risers often have long commutes. Village of Palm Springs residents want their coffee on the way to work. Starbucks does not determine when workers commute to work.

c. That granting the variance requested will not confer on the applicant any special privilege that is denied by this chapter to other lands, buildings, or structures in the same land development district.

Nearby coffee competitors such as Dunkin Donuts, WAWA and McDonalds are open 24 hours. Starbucks is only requesting operating hours of 5:30 a.m. to 11:00 p.m. This request does not confer any special privileges.

d. That literal interpretation of the provisions of this chapter would deprive the applicant of rights commonly enjoyed by other properties in the same land development district under the terms of this chapter and would work unnecessary and undue hardship on the applicant.

The literal interpretation of the provisions of this chapter would deprive the applicant of rights commonly enjoyed by other properties. Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours. Starbucks is only requesting operating hours of 5:30 a.m. to 11:0 p.m.

e. That the variance granted is the minimum variance that will make possible the reasonable use of the land, building, or structure.

The variance granted is the minimum variance for reasonable use. Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours. Starbucks is only requesting operating hours of 5:30 a.m. to 11:00 p.m.

f. That the granting of the variance will be in harmony with the general intent and purpose of this chapter.

The granting of the variance will be in harmony with the general intent of the chapter.

g. That such variance will not be injurious to the area involved or otherwise detrimental to the public welfare.

The variance will not be injurious to the area involved or otherwise detrimental to the public welfare. The public will enjoy a safe and welcoming Starbucks café experience. Our stores are a neighborhood gathering place for meeting friends and family. Our customers enjoy quality service, an inviting atmosphere, and an exceptional beverage.

Staff does not object to the applicant's request, based on the applicant intent to provide more alternatives to residents and customers who consumed coffee on their way to work early in the morning. Staff found the variance to be in harmony with the general intent of the Village Code and will no create conflicts from the use or granting of the variance to commence business operation one hour and half (1 ½ hr.) ahead of what is permitted.

IV. Neighborhood Compatibility

1) The proposed project is located on the south side of Forest Hill Blvd and East of south Military Trail.
2) The project is a modification of the existing restaurant use and is expected to bring more customers daily.
3) The project is located within the shopping center where several different retails, offices and restaurants are occupying the suites.
4) Properties to the east and south are generally residential use.
5) The property is located within the TCEA for S Military Trail corridor therefore, exempt from Traffic Performance Standards of Palm Beach County.
6) FDOT conceptual driveway pre-approval letter is required.
7) The proposed restaurant is permitted as special exception use within the CG zoning district.

V. Regulatory Issues

- The site plan generally conforms to the property development standards of the CG district.
  1) Proposed project plan generally meets required site development regulations.
  2) Variance requested shall be approved by the Village Council.

3) Permits from all applicable permitting agencies, including but not limited to PBC Fire Rescue and Village of Palm Springs are required prior to construction.
4) Proposed use meets the Traffic Performance Standards of Palm Beach County.

VI. Environmental Issues:

There are no environmental (wetlands, floodplains, etc.) issues identified.

VII. Community Outreach/ Notification

- The subject property was posted on March 30, 2021.
- Public Notification letters were mailed to all property owners within 300 feet radius of subject property on March 26, 2021.
- Legal advertisement was published in the paper on April 1, 2021.
- Staff has not received any inquiries or comments as a result of the notices.

VIII. Proposed Development Plan Details

The petitioner's development plans dated received on February 26, 2021 depicts the following:

- An application submitted for a Site Plan Amendment Approval and concurrently Special Exception Use with 1 variance for the continued use of the property as a restaurant with outdoor seating area and drive thru.
    1. Site Plan dated received February 26, 2021 revised and resubmitted on March 25, 2021.
    2. Landscape Plans dated received February 26, 2021.
    3. Architectural plans dated received February 26, 2021.
    4. Preliminary Engineering Plans dated received February 26, 2021.
    5. Justification Statement and proposed use.
    6. Traffic Statement.
    7. Color rendering.
    8. Sign package.
    9. Color Site Plan.

IX Recommendation

The 0.26 acres property is located on south side of Forest Hill Boulevard and east of South Military Trail within Shoppes of Forest Hills shopping center. The site is currently developed with a single building 3,387 square feet Boston Market restaurant with drive thru constructed in 1994. The property was annexed into the Village in 2008 as a developed parcel and has been used as a fast-food restaurant with drive thru as of today.

The applicant is requesting a site plan amendment and special exception use with one variance to convert the existing restaurant use into a coffee shop maintaining the drive thru and adding an outdoor seating area. It is proposed to recess the storefront on the northern elevation by approximately 482 square foot, to create an outdoor seating area, under roof, for customers to enjoy in the shade. The footprint of the building remains the same.

The proposed site plan includes creating longer stacking, modification to the traffic circulation plan to avoid negative impact into the roadway system and/or main drive aisles, extending a landscape island to lengthen the stacking lane, significant directional signage, enhancement to the landscaped buffers, stripping parking lot, paving, pedestrian connections, and exterior improvements to the building.

Project proposed the following additional changes:

	Boston Market	Starbucks
Chairs	60	17 outside + 47 inside = 64
Signs	North elevation – 63 sq.ft.	27.6 sq.ft.

	East elevation – 42 sq.ft. West elevation – 42 sq.ft. Pole sign (approximately) – 96 sq.ft.	26.84 sq.ft. 34.8 sq.ft. (approximately) 64 sq.ft.

As part of the review process, Staff made a site visit to the Starbucks located on Wellington to observe existing characteristic of the drive-up window queue and got the results found on the table below:

Time (am)	Cars in queue (average)	Wait time upon entering queue until receive order (minutes)
6:36 – 6:47	11	7
6:54 -7:00	11	8
7:05 – 7:19	15	13
7:37- 7:48	12	8
7:51 – 7:56	12	9
7:59 – 8:14	14	8
8:17 – 8:24	14	8
Average = 10-11 cars in queue Average customers wait time upon entering queue until receive order = 9 minutes Most vehicles observed = 18 cars When queue (13-14 cars) stacked to drive aisle, customers made decision to wait in line or park and go into store		

Staff has found the proposed Special Exception use to be generally consistent with goals, objectives and policies of the Village's Comprehensive Plan. The proposed use is generally consistent with the Land Development and zoning regulations and all other portions of the code. The proposed special exception use does not significantly reduce light and air to adjacent properties and would not be deterrent to surrounding properties. The new project does not negatively impact natural systems.

Planning, Zoning and Building Staff recommends conditional approval of the two Special Exception Uses and Site Plan Amendment subject to the following thirty (30) conditions below:

1. Build out date is December 31, 2021.
2. The special exception approval for the new coffee shop shall be implemented within 18 months of Council approval.
3. The site plan approval is valid within 24 months of Council approval.
4. FDOT pre-approval letter shall be provided at time of permitting for access connections.
5. If/when drive-thru vehicles extends beyond the conflict point, as shown on sheet C-1A dated signed on 3-24-2021, an employee shall be stationed at the drive-thru line to take orders and prevent traffic from overflowing on the northern part of the drive aisles.
6. Drive-thru signs along each of the driveway entrances indicating the flow of traffic for the drive-thru window shall be provided.
7. Tables and chairs shall be removed each night from the outside patio area and secured within the restaurant.
8. The wi-fi and all outside electrical outlets shall be turned off each night to prevent unwanted guests from loitering in the area.
9. Palm Beach County "Digital Inclusion infrastructure" (broadband antenna and related facilities) shall be accommodated on the property (if location is determined to be desirable for broadband coverage by Palm Beach County or School District of Palm Beach County), prior to Certificate of Completion, and property owner shall voluntarily serve as a program partner (easement/agreement, electric) through the life of the program.
10. No loitering on the grounds will be permitted.
11. No electronically changeable menu board is permitted.
12. Utility easements shall not overlap more than 5' any landscape buffers.
13. A Utility/Civil plan shall be approved by the Village's Engineer and Public Service Department at time of permitting.
14. Permits must be obtained from the Village and Palm Beach County Fire Department at time of permitting.
15. The construction dumpster shall be only provided by Waste Pro USA who is under franchise Agreement with the Village.
16. Landscaped areas shall be irrigated including but not limited to buffer, islands, planter boxes, etc.

17. Irrigation plans shall be provided at the time of permitting. Non-potable water shall be used for the irrigation system per Village code.
18. Provide permits from all applicable permitting agencies, including but not limited to PBC Fire Rescue and Village of Palm Springs at the time of permitting.
19. The property owner shall register an Agent of Record, prior to issuance of a permit, to establish a contact person responsible for compliance with this Development Order, including site plan/landscape plan details and conditions of approval.
20. The Applicant may be required to undertake additional security measures, based on the number of complaints or calls for service for incidents at the premises, as determined by the Police Chief. Such additional security measures, as approved by the Police Chief, may include increased on-site security at the operator's sole expense.
21. All electric utilities shall be underground.
22. A silt barrier shall be installed around the perimeter of the property (within the affected area for the site improvements and new building construction) prior to commencement of any site work or construction activity, and a track pad shall be installed at the construction entrance(s), both of which shall remain through substantial completion.
23. Any sidewalk broken or damaged during construction shall be replaced by the contractor prior to CC.
24. The Landscaping shall be certified by the Landscape Architect upon completion and prior to Certificate of Occupancy/Certificate of Completion of each improvement area.
25. Absolutely no occupancy, other than construction personnel, is permitted prior to TCC/CC.
26. The civil engineer of record shall certify the site construction prior to Certificate of Occupancy.
27. The applicant may be required to provide a resident inspector for structural elements such as concrete pours in accordance with Section 109.1.3 FBC 2010 and F.S. 553.791. Determination shall be made at time of pre-construction conference with Planning Zoning and Building Director.
28. The General Contractor shall be on site during any and all construction activity in accordance with FS 489.1195.
29. The project shall receive approval from all Authorities Having Jurisdiction and submit copies of approvals to the Village of Palm Springs.
30. At the time of CC, the petitioner shall provide the Planning, Zoning and Building Department with electronic copies of as-builts.

SECTION 4 - DESCRIPTION OF PROJECT (attach additional pages if necessary)
Including compliance with zoning standards and supplemental regulations

Starbucks proposes to convert the existing Boston Market with Drive Thru located at 4380 Forest Hill Blvd into a Starbucks Coffee Shop with Drive Thru & Outdoor Seating.

This scope includes recessing the the storefront on the northern elevation to create an outdoor seating area, under roof, for Starbucks customers to enjoy in the shade. Please see attached floorplan and elevations. The footprint of the building remains the same: 3357 SF.

A number of Site Improvements are proposed, in order to accommodate Staff's and property owner's concerns regarding a potential increase in drive thru stacking. These site improvements include creating a longer stacking area. These site improvements are shown on attached page C-1A Traffic Circulation Plan and include extending a landscape island to lengthen the stacking lane, significant directional signage, way finding signs, directional pavement markings, designating employee parking spaces, "Do Not Enter"signs, and designated parking spaces fronting Forest Hill, away from the drive thru, for "Order Pick Up" parking only.

Please see attached Traffic Engineer Reponse to via planning, inc comment letter dated 2/1/2021 for further details regarding how Starbucks is addressing any remaining Village of Palm Springs queueing and traffic concerns.

Starbucks is also seeking variance approval for proposed Hours of Operation. Proposed and Typical Hours of Operation for Starbucks are 5:30am to 11:00pm. The basis for this variance for Hours of Operation request is attached separately to this application.

Per Police request during pre-application meeting, outdoor furniture will be secured at night, or brought inside the space. Exterior Lighting will be sufficient to provide safety at rear door and throughout the site. Rear Door will have a viewer, per Starbucks' security standards.

Signage package is included in this submittal. Wall Signage area is less than previously approved Boston Market wall signage. Re-use of existing monument sign is included in sign package.

SECTION 8 – VARIANCE ONLY
(Hours of Operation)
Related Applications
Code Section: Sec. 34-891
Required: (1) No commercial use shall commence business activities prior to 7:00 a.m., nor continue such activities later than 11:00 p.m.
Request: Operating Hours of 5:30 a.m. to 11:00 p.m.

Details of Variance Request or Appeal:

Starbucks primary business is selling coffee. Coffee is primarily consumed in the morning. According to the Bureau of US Labor Statistics, about 29 percent of workers were on the clock at 7 a.m. These Early Risers often have long commutes. Village of Palm Springs residents want their coffee on the way to work. Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours.

Chapter 34, Section 34-603 of the Code of Ordinances, Village of Palm Springs, requires a statement of special reasons or basis for the variance request. This statement should be predicated on the objectives presented in Section 34-603(f)(1) of the Code. The statement must include comments on each of the following individually:

a. That special condition and circumstances exist which are peculiar to the land, structure, or building involved, and which are not applicable to other lands, structures, or buildings in the same land development district.

Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours. Starbucks is only requesting Operating Hours of 5:30 a.m. to 11:00 p.m.

b. That the special conditions and circumstances do not result from the actions of the applicant.

Coffee is primarily consumed in the morning. According to the Bureau of US Labor Statistics, about 29 percent of workers were on the clock at 7 a.m. These Early Risers often have long commutes. Village of Palm Springs residents want their coffee on the way to work. Starbucks does not determine when workers commute to work.

c. That granting the variance requested will not confer on the applicant any special privilege that is denied by this chapter to other lands, buildings, or structures in the same land development district.

Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours. Starbucks is only requesting Operating Hours of 5:30 a.m. to 11:00 p.m. This request does not confer any special privileges.

d. That literal interpretation of the provisions of this chapter would deprive the applicant of rights commonly enjoyed by other properties in the same land

development district under the terms of this chapter and would work unnecessary and undue hardship on the applicant.

The literal interpretation of the provisions of this chapter would deprive the applicant of rights commonly enjoyed by other properties. Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours. Starbucks is only requesting Operating Hours of 5:30 a.m. to 11:00 p.m.

e. That the variance granted is the minimum variance that will make possible the reasonable use of the land, building, or structure.

The variance granted is the minimum variance for reasonable use. Nearby coffee competitors such as Dunkin Donuts, WAWA, and McDonalds are open 24 hours. Starbucks is only requesting Operating Hours of 5:30 a.m. to 11:00 p.m.

f. That the granting of the variance will be in harmony with the general intent and purpose of this chapter.

The granting of the variance will be in harmony with the general intent of the chapter.

g. That such variance will not be injurious to the area involved or otherwise detrimental to the public welfare.

The variance will not be injurious to the area involved or otherwise detrimental to the public welfare. The public will enjoy a safe and welcoming Starbucks Café experience.
Our stores are a neighborhood gathering place for meeting friends and family. Our customers enjoy quality service, an inviting atmosphere and an exceptional beverage.

The 1 parking space lost was to provide an ADA pedestrian path from the remodeled Building to the public sidewalk along Forest Hill Boulevard as per ADA standards.

Total shopping center Building area is 122,042 square feet

Total Required Parking Spaces 5 spaces per 1000 square feet
122,042 sq. ft. × 5 / 1,000 = 610 spaces required

Total Proposed Parking Spaces 631

Total Proposed Parking Spaces 5.17 spaces per 1000 square feet

BUILDING SETBACKS:	REQUIRED	EXISTING
Front (Forest Hill Blvd.)	50 FT.	56.7 FT.
Rear	0 FT.	23.3 FT.
Side Interior (East)	0 FT.	57.4 FT.
Side Interior (West)	0 FT.	7.9 FT.

LEGAL DESCRIPTION:

A PARCEL OF LAND LYING IN TRACT 5, BLOCK 4, SECTION 12, TOWNSHIP 44 SOUTH RANGE 42 EAST, PLAT No. 1, PALM BEACH PLANTATIONS, ACCORDING TO THE PLAT THEREOF, AS RECORDED IN PLAT BOOK 10, PAGE 20, PUBLIC RECORDS, PALM BEACH COUNTY, FLORIDA; SAID PARCEL OF LAND MORE PARTICULARLY DESCRIBED AS FOLLOWS;
COMMENCING AT THE NORTHEAST CORNER OF SAID TRACT 5, THENCE, SOUTH 01°29'44" EAST, ALONG THE EAST LINE OF SAID TRACT 5, A DISTANCE OF 60.07 FEET TO THE INTERSECTION THEREOF WITH THE SOUTH RIGHT OF WAY LINE OF FOREST HILL BLVD. THENCE NORTH 88°46'56" WEST, ALONG SAID SOUTH RIGHT OF WAY LINE AND ALONG A LINE 60 FEET SOUTH OF, AS MEASURED AT RIGHT ANGLES TO THE NORTH LINE OF SAID TRACT 5, A DISTANCE OF 755.00 FEET; THENCE SOUTH 01°13'04" WEST, A DISTANCE OF 51.00 FEET TO THE POINT OF BEGINNING (P.O.B.).
THENCE CONTINUE SOUTH 01°13'04" WEST, A DISTANCE OF 105.00 FEET; THENCE, NORTH 88°46'56" WEST, A DISTANCE OF 110.00 FEET; THENCE NORTH 01°13'04" EAST, A DISTANCE OF 105.00 FEET; THENCE SOUTH 88°46'56" EAST, A DISTANCE OF 110.00 FEET TO THE POINT OF BEGINNING (P.O.B.).

NOTES:

1. BACKGROUND INFORMATION OBTAINED FROM BOUNDARY & TOPOGRAPHIC SURVEY ECS PROFESSIONAL LAND SURVEYORS DATED DECEMBER 9, 2020
2. ELEVATIONS ARE BASED UPON N.A.V. 88 (1988) DATUM AND AS SHOWN ON THE SURVEY.
3. UNDERGROUND UTILITY INFORMATION IS TAKEN FROM THE BEST AVAILABLE SOURVES BUT SHOULD BE VERIFIED BY THE CONTRACTOR IN THE FIELD WITH THE APPROPRIATE UTILITY AGENCY PRIOR TO COMMENCEMENT OF ANY WORK.
   EXISTING UTILITY LINES OTHER THAN THOSE INDICATED IN THIS DRAWING MAY BE ON THE SITE THE CONTRACTOR IS WARNED TO PROCEED WITH CAUTION WITH ALL WORK. HE IS TO MAKE ALL POSSIBLE INVESTIGATION AS TO POSSIBLE UNMARKED UTILITY LINES.
4. ANY APPARENT DISCREPANCIES IN THE PLANS AND FIELD CONDITIONS SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE PROCEEDING WITH THE WORK.
5. THE CONTRACTOR SHALL RESTORE ALL AREAS DISTURBED BY THIS CONSTRUCTION TO A CONDITION EQUAL TO, OR BETTER THAN, THAT NOW EXISTING.
6. CONTRACTOR SHALL ADJUST ANY UTILTY LIDS AND/OR COVERS IN PROJECT AREA TO THE FINISHED GRADE.
7. ALL CONSTRUCTION SHALL COMPLY WITH THE LATEST BUILDING CODE IN AFFECT.
8. THIS PROPERTY FOLIO NUMBER IS 70-42-44-12-00-000-5680
9. THIS PROJECT SHALL COMPLY WITH CURRENT VILLAGE OF PALM SPRINGS PUBLIC WORKS DEPARTMENT PALM BEACH COUNTY FIRE, MUTCD AND FLORIDA DEPARTMENT OF TRANSPORTATION STANDARDS.
10. THIS PROPERTY LIES IN SECTION 12, TOWNSHIP 44 SOUTH, RANGE 42 EAST.

GENERAL NOTES:

1. All materials and labor under the project shall conform to Village of Palm Springs Public Works Department, Florida Department of Transportation (FDOT) and Palm Beach County Standards and Specifications.
2. For site dimensions and geometry see Boundary & Site Plan.
3. Elevations shown are based on N.A.V. (88) Datum and as shown on Survey.
4. Underground utility information is taken from the best available sources, but should be verified by contractor in the field with the appropriate utility agency prior to commencement of any work. Existing utility lines other than those indicated in this drawing may be on site. The contractor is warned to proceed with caution with all work. He is to make all possible investigation as to possible unmarked utility lines.
5. Contractor shall adjust any utility lids and/or covers in project area to the finished grade.
6. Any apparent discrepancies in the plans and field condition shall be brought to the attention of the Engineer before proceeding with the
7. Contractor shall notify the Owner's representative and Engineer if soil condition encountered is unsuitable for construction. Furthermore all existing organic materials shall be removed from beneath areas of new asphalt or concrete pavement and from proposed building locations. The full depth of all existing organic and deleterious material within the right of way and utility/drainage easements shall be removed. No material of FDOT Class A-5, A-7 or A-8 shall be allowed.
8. The Contractor shall restore all areas disturbed by this construction to a condition equal to, or better than, that now existing.
9. Typical Pavement Section: 1.5" Type S-III Asphaltic Concrete surface course 6" Limerock base (Minimum LBR 100), compact to 98% of maximum density as determined by AASHTO T-180 and 6" concrete slab on well compacted subgrade compact to 98% of maximum density as determined by AASHTO T-180.
10. Fill shall be placed in 12" layers loose thickness, measured and compacted to 95% of maximum density as determined by AASHTO T-180. Fill shall be locally acceptable and suitable for fill purposes. The top 12" of fill or cut (Minimum LBR 40) under pavement base shall be compacted to 98% of maximum density as determined by AASHTO T-180.
11. Backround information obtained from Boundary Survey prepared by ECS Professional Land Surveyors Inc. Dated December 9, 2020.
12. All signage and markings shall conform to the requirements of Palm Beach County, Florida.
13. This site lies in Section 12, Township 44 S, Range 42 East in Miami-Dade County.
14. All repairs to the existing pavement shall receive saw-cut edges prior to relaying asphalt. Utility piping or wiring less than four (4) inches in diameter requires a Schedule 40 PVC casing pipe with sand backfills under paved areas only.
15. Prime coat shall be applied at a rate of 0.25 gallons per square yard. Prime and tack coat for base shall conform to the requirements and specifications of sections 300-1 through 300-7 of FDOT standards specifications.
16. Base and subgrade density tests shall be conducted for a maximum 7000 square feet of finished pavement.
17. Proctors shall be performed on all material, subgrade and base and any subsequent changes in materials. Limerock bearing ratios, sieve analysis and densities required by contract documents shall be submitted to the City.
18. Minimum longitudinal slope of pavement shall be 0.3%.
19. Minimum transverse slope of the pavement shall be one percent for parking areas.

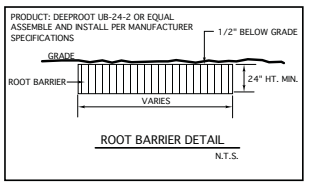
ALL EXISTING TREES SHALL BE CORRECTIVELY PRUNED PER ANSI-300 STDS. ALL PRUNING SHALL BE SUPERVISED BY A CERTIFIED ARBORIST TYP. CONTRACTOR SHALL FIELD VERIFY LOCATION OF EXISTING AND PROPOSED UNDERGROUND UTILITIES CONTRACTOR SHALL INSTALL A ROOT BARRIER WHERE TREES ARE LOCATED WITHIN 5' OF UTILITY LINE. SEE DETAIL SHEET L-3

ROOT PRUNING REQUIRED ON EXISTING TREES DUE TO PROPOSED CURBING OR PAVING SHALL BE DONE BY A CERTIFIED ARBORIST. NO MACHING TRENCHING SHALL BE DONE WITHIN THE DRIP LINE OF TREES. ALL DIGGING SHALL BE BY HAND IN THESE AREAS.



NOTE: ALL LANDSCAPE MATERIALS WITHIN SIGHT TRIANGLES SHALL BE MAINTAINED BELOW 30" IN HEIGHT.

NOTE: ALL LANDSCAPE MATERIALS WITHIN SIGHT TRIANGLES SHALL BE MAINTAINED BELOW 30" IN HEIGHT.

NOTES:
1. ALL LANDSCAPE AREAS SHALL BE MULCHED WITH GRADE 'A' NATURAL PINE OR EUCALYPTUS
2. ALL SHRUBS/TREES IN POOR CONDITION OR LESS THAN FL. NO. 1 QUALITY SHALL BE REPLACED WITH SAME SPECIES AND SIZE (OR EQUIVALENT)
3. ALL MULCHED PLANTER BEDS SHALL BE KEPT 1" BELOW THE TOP OF CURBS
4. CONTRACTOR SHALL ADJUST OR ADD IRRIGATION EQUIPMENT TO ENSURE ALL LANDSCAPE MATERIALS RECIEVE 100% COVERAGE
5. REFER TO SHEET IR-1 AND IR-2 FOR IRRIGATION DESIGN, DETAILS AND SPECIFICATIONS
6. INSTALL ROOT BARRIER WHERE TREES AND UTILITY LINES ARE WITHIN 5' OF EACH OTHER.

• ALL TREES AND PALMS SHALL BE BRACED OR GUYED, AND ALL STRAPS OR WOOD BRACING SHALL BE REMOVED WITHIN ONE YEAR OF FINAL INSPECTION. • ALL EXISTING LANDSCAPING, INCLUDING BUT NOT LIMITED TO TREE, PALMS, SHRUBS, GROUNDCOVER, SOD, IRRIGATION, GRADING, AND CURBING DESTROYED DURING THE CONSTRUCTION SHALL BE RESTORED/REPLACED PRIOR TO FINAL INSPECTION. • ALL PROPOSED LANDSCAPING AND IRRIGATION SHALL MEET OR EXCEED FLORIDA FRIENDLY REQUIREMENTS. • ALL EXISTING DEAD, DYING OR MISSING LANDSCAPE SHALL BE REPLACED PRIOR TO FINAL LANDSCAPE INSPECTION

GENERAL LANDSCAPE NOTES

LANDSCAPE SPECIFICATIONS

1. CONTRACTOR SHOULD MAKE HIS OWN TAKE OFF TO ELIMINATE DISCREPANCIES. IN CASE THEY OCCUR, THE PLAN WIL TAKE PRECEDENCE OVER THE PLANT LIST.

2. EXACT LOCATION OF PLANT MATERIAL MAY VARY SLIGHTLY. COORDINATE FIELD LOCATIONS WITH OTHER TRADES PRIOR TO COMMENCEMENT OF WORK

3. ALL PLANT MATERIAL FURNISHED BY THE LANDSCAPE CONTRACTOR SHALL BE "FLORIDA #1" OR BETTER AND SHALL BE INSTALLED AS SPECIFIED IN "FLORIDA DEPT. OF AGRICULTURAL GRADES AND STANDARDS". CURRENT EDITION RESPECTIVELY.

4. ALL PLANTING TO BE DONE ACCORDING TO GOOD NURSERY PRACTICE AND ADHEAR TO ALL MUNICIPAL REQUIREMENTS.

5. ALL PLANTING MATERIAL SHALL BE GUARANTEED 365 DAYS (I YEAR) FROM TIME OF FINAL INSPECTION & APPROVAL.

6. ALL SOD TO BE ST. AUGUSTIN FLORATAM SOLID UNLESS OTHERWISE SPECIFIED. DIFFERENT SOD TYPES SHALL BE SEPARATED BY EDGING, PLANT MATERIAL OR OTHER PHYSICAL BARRIER.

7. ALL BED AREAS TO RECEIVE A 3" LAYER OF ARSENIC FREE EUCALYPTUS MULCH(FLORIMULCH ,& SHALL BE A MIN. OF 1'-0" WIDER THAN PLANTS (MEASURED FROM OUTSIDE OF FOLIAGE)

8. ALL TREES MEET THE MINIMUM TRUNK DBH. AS SHOWN ON THE LANDSCAPE SPECIFICATIONS

9. ALL EXISTING LANDSCAPING INCLUDING BUT NOT LIMITED TO TREES, SHRUBS, GROUNDCOVER, SOD, IRRIGATION,GRADING AND CURBING DAMAGED DURING CONSTRUCTION SHALL BE RESTORED/REPLACED PRIOR TO FINAL INSPECTION.

10. LANDSCAPER TO FURNISH ALL MATERIAL AND LABOR INCLUDING, PLANTS MULCH, TOP DRESSING, SOIL PREPARATION, DECORATIVE ITEMS (IF SHOWN), INSPECTIONS. TRANSPORTATION, WARRANTY, PEMIT, ETC. NESCSARY FOR COMPLETION OF ALL LANDSCAPING REQUIRED HEREIN EXCEPT IF DESIGNATED TO BE OTHERS.

11. ALL PRINCIPALS OF FLORIDA FRIENDLY LANDSCAPING AND DESIGN STANDARDS SHALL BE UTILIZIED. ANY CHANGES TO MATERIALS, SIZES OR SPECIFICATIONS SHALL BE FIRST APPROVED BY THE LANDSCAPE ARCHITECT OF RECORD.

12. OWNER RESERVES THE RIGHT TO REJECT ANY OR ALL BIDS.

13. LANDSCAPER SHALL HAVE A COMPETENT ENGLISH SPEAKING SUPERINTENDENT PRESENT ON THE JOB WHO SHALL BE AUTHORIZED TO REPRESENT THE LANDSCAPER IN HIS ABSENCE.

14. PLANTS SHOULD BE TYPICAL FOR THEIR VARIETY AND SPECIES, PLANTS SHALL BE SOUND, HEALTHY VIGOROUS, FREE FROM PLANT DISEASE, INSECT OR THEIR EGGS. THEY SHALL HAVE HEALTHY NORMAL ROOTS AND SHALL NOT BE ROOT BOUND. QUALITY AND SIZE: ALL PLANT MATERIALS SHALL BE NURSERY GROWN UNLESS OTHERWISE NOTED.

15. ALL PLANT MATERIAL SHALL BE HANDLED IN A CAREFUL MANNER DURING TRANSPORTATION AND INSTALLATION.

16. PLANTS SHALL NOT BE PRUNED OR TOPPED BEFORE DELIVERY. ALL TREE PRUNING SHALL BE DONE IN ACCORDANCE WITH CURRENT ANSI- 300 STANDARDS.

17. OWNER RESERVES THE RIGHT TO APPROVE ALL PLANTS MATERIALS. OWNER OR OWNERS AGENT SHALL BE RESPONSIBLE FOR THE MAINTENANCE OF THE LANDSCAPING.

18 .LANDSCAPER SHALL REMOVE ALL TRASH AND DEBRIS FROM THE SITE DAILY. THE PREMISES SHALL BE KEPT NEAT AND ORDERLY AT ALL TMES WHILE WORK IS IN PROGRESS.

19.THE LANDSCAPE CONTRACTOR SHALL LAY OUT HIS WORK ACCORDING TO THE PLANS AND SPECIFICATIONS AND WILL BE RESPONSIBLE FOR ALL MEASUREMENTS EXERCISING SPECIAL CARE IN LAYING OUT WORK TO KEEP WITHIN PROPERTY LINES AND RECOGNIZING EASEMENTS AND UTILITIES. THE LANDSCAPE CONTRACTOR WILL BE HELD RESPONSIBLE FOR ANY ERRORS. CONTRACTOR TO NOTIFY LANDSCAPE ARCHITECT OF ANY DISCREPANCIES IN LAYOUT.

20. METHODS OF PROTECTION SHALL BE MAINTAINED AT ALL TIMES, AS REQUIRED TO INSURE ALL PERSONS AND PROPERTY AGAINST INJURY, AND SHALL BE MAINTAINED UNTIL THE COMPLETION OF ALL WORK. THE LANDSCAPE CONTRACTOR SHALL PROVIDE AN ENGLISH SPEAKING FORMAN ON THE JOB AT ALL TIMES.

21. PLANT MATERIAL ABBREVIATIONS ON THE PLANT LIST: FG (FIELD GROWN); CT (INDICATES CLEAR TRUNK MEASUREMENT FROM THE TOP OF BALL TO FIRST BRANCHING OR BASE OF THE LOWESR FROND), GAL (GALLON CAN), 3 GAL (3 GALLON CAN); OA (INDICATES OVERALL HEIGHT FROM TOP OF BALL TO MID POINT OF CURRENT SEASON'S GROWTH); SPR (INDICATES SPREAD), HVY (INDICATED HEAVY), MIN (INDICATES MINIMUM).

22. SUBSTITUTION: PLANT SUBSTITUTION REQUESTS, FOR PLANT MATERIAL NOT OBTAINABLE IN THE TYPE AND SIZE SPECIFIED SHALL BE MADE PRIOR TO SUBMISSION OF BIDS. ALL SUBSTITUTION REQUESTS SHALL BE DIRECTED TO THE LANDSCAPE ARCHITECT AND THE GOVERNING MUNICIPALITY FOR CONSIDERATION AND APPROVAL. IT IS THE LANDSCAPE CONTRACTORS OBLIGATION TO KNOW WHERE THEY CAN OBTAIN ALL MATERIAL AT THE TIME OF BIDDING AND AT THE TIME A CONTRACT IS EXECUTED.

23. THE CONTRACTOR'S GUARANTEE SHALL NOT APPLY IN THE EVENT OF FIRE, FLOOD, HURRICANE, WINDSTORM, OR OTHER ACTS OF NATURE OR DAMAGES TO LANDSCAPING IN PROGRESS CAUSED BY ANY PERSONS OTHER THAN THOSE PERSONS UNDER THE DOMINION AND CONTROL OF THE CONTRACTOR.

24. ALL TREES, PALMS AND OTHER PLANTS SHALL BE PLANTED WITH THE TOP OF THEIR ROOTBALLS 10% ABOVE FINAL GRADE SURROUNDING THE PLANTING AREA. ALL WIRE BASKETS, BURLAP, STRING AND ROPE MUST BE REMOVED. ALL TREE OR PALMS IN LAWN AREAS SHALL RECEIVE A 2 FOOT DIAMETER MULCH RING. MULCH SHALL BE PULLED AWAY FROM THE TRUNKS 3". ALL PLANTING PITS SHALL BE A MIN. OF 3X THE ROOTBALL SIZE. ALL TREES AND PALMS SHALL BE BRACED OR GUYED. ALL NYLON STRAPS AND WOOD BRACING SHALL BE REMOVED WITHIN ON YEAR OF FINAL INSPECTION.

25. DELIVERY RECEIPTS FOR TOP SOIL, PLANTING SOIL & MULCH SHALL BE SUPPLIED TO THE INSPECTOR OR LANDSCAPE ARCHITECT UPON REQUEST

26. COMMERCIAL FERTILIZER: COMMERCIAL FERTILIZER SHALL BE AN ORGANIC FERTILIZER CONTAINING NITROGEN, PHOSPHORIC ACID, MINOR TRACE ELEMENTS AND POTASH IN EQUAL PERCENTAGES OF AVAILABLE PLANT FOOD WEIGHT OR "MILORGANITE" NITROGEN SHALL BE NOT LESS THAN 100% FROM ORGANIC SOURCE. FERTILIZER SHALL BE DELIVERED TO THE SITE UNOPENED IN ORIGINAL CONTAINERS, EACH BEARING THE MANUFACTURE'S GUARANTEED ANALYSIS. INITIAL FERTILIZATION OF TREES SHRUBS, GROUND COVERS, SHALL BE WITH "MILORGANITE" OR AN APPROVED COMPLETE FERTILIZER. APPLY "MILORGANITE" IN A CIRCLE AROUND THE PLANT BEFORE MULCHING DO NOT TOUCH THE PLANT WITH THE FERTILIZER. WATER IN FERTILIZER AFTER MULCHING. APPLY "MILORGANITE" FERTILIZER AT THE FOLLOWING AT THE RATE:

5 LBS OR 14.5 CUPS / PALMS
3 LBS OR 8.70 CUPS /12'-16' MATERIAL
2 LBS OR 5.80 CUPS / 8' -12' MATERIAL
0.69 LBS OR 2.00 CUPS / 6'-8' MATERIAL
0.19 LBS OR _ CUP /3 GAL MATERIAL
0.10 LBS OR _ CUP/ 1 GAL. MATERIAL
FERTILIZERS SHALL BE SLOW TIME RELEASE, UNIFORM IN COMPOSITION DRY, AND FREE FLOWING AND SHALL MEET THE FOLLOWING REQUIREMENTS
SIX (6) PERCENT NITROGEN, SIX (6) PERCENT PHOSPHOROUS, AND SIX (6) PERCENT POTASSIUM. FERTILIZER SHALL BE APPLIED TO ALL SHRUBS (1/3 LB PER 3 GAL. CONTAINER, _ LB PER 1 GAL. CONTAINER) AND GROUNDCOVER THE SOD STARTER FERTILIZER MIXTURE SHALL BE A 5-10-10 AT A RATE OF 20 LBS. PER 1000 S.F. A 14-14-14 FERTILIZER IS REQUIRED ON ALL TREES AND SHRUBS OVER 5' IN HEIGHT (1/2 LB. PER 5' OF SPREAD). AGRIFORM TABLETS WITH TWENTY (20) PERCENT NITROGEN, TEN (10) PERCENT PHOSPHOROUS, FIVE (5) PERCENT POTASSIUM IN 21 GRAM SIZES & SHALL BE APPLIED AT THE FOLLOWING RATE: 1 PER GAL. PLANT 2 PER 3 GAL. PLANTS AND 2 TABLES PER 1" OF TREE TRUNK CALIPER APPLY PALM SPECIAL FERTILIZER AS PER MANUFACTURES RECOMMENDATION.

27. SUPER ABSORBENT POLYMER: "TERRA SORB" OR APPROVED EQUAL AS PACKAGED IN 3 OZ. HANDY PAC COMPOSED OF SYNTHETIC ACRLAMIDE COLOLYMER, POTASSIUM, AND ACRYLATE. PARTICLE SIZE OF 1.0 MM TO 3.0 MM AND ABSORPTION RATE OF 300 TIMES IT'S WEIGHT IN WATER. APPLY DRY USING THE FOLLOWING AMOUNT:
1 PAC PER TREE - 36" BALL SIZE
2 PAC PER TREE -OVER 36" BALL SIZE
1 PAC PER 20 GAL. CONTAINER
0.5 PACS PER 7-10 GAL. CONTAINER
0.25 PACS PER 3 GAL. CONTAINER
0.12 PACS PER 1GAL. CONTAINER

28. LANDSCAPE CONTRACTOR WILL BE RESPONSIBLE FOR HAVING UTILITIES LOCATED BY CALLING SUNSHINE ONE CALL SERVICE OR EQUAL. CARE SHALL BE TAKEN NOT TO DISTURB ANY UNDERGROUND CONSTRUCTION AND UTILITIES. ANY DAMAGE TO THESE FACILITIES DURING THE PLANTING OPERATIONS WILL BE REPAIRED AT THE EXPENSE OF THE LANDSCAPE CONTRACTOR IN A MANNER APPROVED BY THE OWNER.

29. PLANTING SOIL: PLANTING SHALL BE COMPOSED OF 50% SAND AND 50% MUCK. ANY VARIATIONS IN THIS COMPOSITION SHALL BE APPROVED BY THE OWNER PRIOR TO USE. PLANTING SOIL SHALL BE FREE OF STONE, PLANTS, ROOTS AND OTHER FOREIGN MATERIALS WHICH MIGHT BE HINDRANCE TO PLANTING OPERATIONS OR BE DETRIMENTAL TO GOOD PLANT GROWTH. SOIL SHALL BE DELIVERED IN A LOOSE FRIABLE CONDITION AND APPLIED IN ACCORDANCE WITH THE PLANTING SPECIFICATION

30. WATER FOR PLANTING SHALL BE AVAILABLE AT THE SITE AND SHALL BE PROVIDED BY THE OWNER/GC. AN AUTOMATIC UNDERGROUND RUST FREE IRRIGATION SYSTEM SHALL BE PROVIDED WITH A RAIN SENSOR. THE IRRIGATION SHALL COVER 100% WITH 100% OVERLAP PRIOR TO FINAL INSPECTION.

31. PRUNING: REMOVE DEAD AND BROKEN BRANCHES FROM ALL PLANT MATERIAL PRUNE TO RETAIN TYPICAL GROWTH HABIT OF INDIVIDUAL SPECIES, RETAINING AS MUCH HEIGHT AND SPREAD AS POSSIBLE. MAKE ALL PRUNING CUTS WITH A SHARP INSTRUMENT, FLUSH WITH THE TRUNK OR ADJACENT BRANCH, IN SUCH A MANNER AS TO ENSURE ELIMINATION OF STUBS. "HEADBACK" CUTS, RIGHT ANGLE TO LINE OF GROWTH WILL NOT BE PERMITTED AND TREES WILL NOT BE POLED, TOPPED, OR HATRACKED.

32. SITE PREPARATION: IT SHALL BE RESPONSIBILITY OF THE LANDSCAPE CONTRACTOR TO FINISH (FINE) GRADE ALL LANDSCAPE AREAS TO BE SODDED (PRIOR TO APPLICATION OF SOD) ELIMINATING ALL BUMPS, DEPRESSIONS, STICKES, STONES AND OTHER DEBRIS TO THE SATISFACTION OF THE CITY/TOWN INSPECTOR

33. MAINTENANCE: MAINTENACE SHALL BEGIN IMMEDIATELY AFTER EACH PLANT IS PLANTED AND SHALL CONTINUE UNTIL ALL PLANTING HAS PASSED FINAL INSPECTION AND ACCEPTANCE. MAINTENANCE SHALL INCLUDE WATERING, WEEDING, CULTIVATING, REMOVAL OF DEAD MATERIALS, RESETTING PLANTS TO PROPER GRADES OR UPRIGHT POSITION AND RESTORATION OF THE PLANTING SAUCER AND ANY OTHER NECESSARY OPERATION. PROPER PROTECTION TO LAWN AREAS SHALL BE PROVIDED AND ANY DAMAGE RESULTING FROM PLANTING OPERATIONS. SHALL BE REPAIRED PROMPTLY. ALL TREE/PALM TRIMMING SHALL BE DONE IN ACCORDANCE WITH ANSI-300 STANDARDS. ALL OWNERS OF THE LAND OR THEIR AGENTS SHALL BE RESPONSIBLE FOR THE MAINTENANCE OF THE LANDSCAPING

34 .(NOTE: SABAL PALMETTO/CABBAGE PALM SPECIES TIE BRANCHES TOGETHER WITH BIO-DEGRADABLE TWINE TO TIGHT BUNDLE AROUND BUD FOR PROTECTION.

35. MULCH. MULCH MAY BE USED WITHIN PLANTING BEDS IN CONJUNTION WITH GROUND COVER. MULCH SHALL BE RENEWED AND MAINTAINED AS REQUIRED TO MAINTAIN A THREE- INCH DEPTH AT THE TIME OF FINAL INSPECTION. MULCH AROUND TREE ROOT BALLS NOT PLANTED IN PLANTING AREA SHALL BE THREE INCHES DEEP AT THE PERIMETER OF THE ROOT BALL. SEE FIGURES 1 AND 2 AT THE END OF THE CHAPTER.

36. GRASS. AREAS WITHIN THE LANDSCAPE EASEMENT NOT USED FOR TREES, SHRUBS, GROUND COVER, MULCH, OR OTHER LANDSCAPE ELEMENTS SHALL BE PLANTED WITH SOLID SOD OF ST. AUGUSTINE FLORATAM OR PLAMETTO AND SHALL BE IRRIGATED. SOD SHALL BE WEED/PEST FREE INCLUDING FUNGUS AND DISEASE, LAID SMOOTH WITH TIGHT JOINTS AND CUT TO CONFORM TO CURBS AND PLANTERS.

37. WHERE THE LANDSCAPE EASEMENT ABUTS ON SITE VEHICULAR USE AREAS SUCH AS TRAFFIC LANES, THE LANDSCAPE EASEMENT SHALL BE SEPARATED FROM THE TRAFFIC LANES BY CONTINUOS CONCRETE CURBING WITH AN 18-INCH DEPTH BELOW GRADE. EXTRUDED CURBING INSTALLED ON TOP OF THE PAVING IS PROHIBITED.

38. EXCAVATION REQUIREMENT: REQUIRED: ISLANDS/MEDIANS SHALL BE EXCAVATED TO 30 INCHES, AND BACK FILLED WITH CLEAN FILL AND PLANTING SOIL CONSISTING OF 50% MUCK AND 50% SAND AT LEAST 3" BELOW THE TOP OF CURB. MANIPULATION OF THE GRADE BEHIND THE CURBING TO CREATE SMALL SCALE MOUNDING IS ENCOURAGED. REQUIRED EXCAVATION AT BUILDING FOUNDATIONS SHALL BE 12 INCHES AND BACK FILLED WITH CLEAN FILL AND PLANTING SOIL. PLANTING SOIL SHALL BE FREE OF DEBRIS, WEED, ROCK, AND PH BETWEEN 6.5 AND 7.0

39. A LANDSCAPE PERMIT IS REQUIRED FOR ALL LANDSCAPE INSTALLATIONS INCLUDING NEW SINGLE FAMILY HOMES THAT ARE NOT PART OF A PLANNED COMMUNITY. NO TREES OR OTHER PLANT MATERIAL MAY BE PLANTED IN PUBLIC RIGHTS-OF-WAY (SWALE AREAS) WITHOUT PERMIT FROM THE CITY. NO SHRUB SPECIES WITH A MATURE HEIGHT THAT WILL BLOCK THE CLEAR SIGHT ZONE FROM 30 INCHES IN HEIGHT TO SIX FEET IN EIGHT WILL BE APPROVED IN SWALE AREAS.

40. TOPSOIL SHALL BE CLEAN AND FREE OF CONSTRUTION DEBRIS, WEEDS, ROCKS, NOXIOUS PESTS AND DISEASES, AND EXHIBITT A PH OF 6.5 TO 7.0. THE TOPSOIL FOR PLANTING AREAS SHALL BE AMENDED WITH HORTICULTURALLY ACCEPTABLE ORGANIC ATERIAL. ALL SOIL USED SHALL BE SUITABLE FOR THE INTENDED PLANT MATERIAL. THE SOURCE OF THE TOPSOIL SHALL BE KNOWN TO THE APPLICANT AND SHALL BE ACCEPTABLE TO THE CITY

MINIMUM SOIL DEPTH:
REQUIRED: THE MINIMUM PLANTING SOIL DEPTH SHALL BE SIX INCHES FOR GROUND COVERS, FLOWERS, SHRUBS AND HEDGES.
ROOTBALL SOIL:
REQUIRED: TREES SHALL RECEIVE 12 INCHES OF PLANTING SOIL AROUND THE ROOT BALL.
NATIVE SOIL:
REQUIRED: NATIVE TOPSOIL ON THE SITE SHALL BE RETAINED ON-SITE AND USED WHEN THERE IS SUFFICIENT QUANTITY TO COVER AT LEAST SOME OF THE ON-SITE LANDSCAPED AREAS.
ARID PLAMS:
REQUIRED: CLEAN SAND SHALL BE USED TO BACKFILL ARID CLIMATE PALMS.

41. USE OF ORGANIC MULCHES:
A TREE-INCH MINIMUM THICKNESS OF APPROVED ORGANIC ARSENIC FREE MULCH MATERIAL AT THE TIME OF FINAL INSPECTION, SHALL BE INSTALLED IN ALL LANDSCAPE AREAS NOT COVERED BY BUILDING, PAVEMENT, SOD, DECORATIVE STONES, PRESERVED AREAS AND ANNUAL FLOWER BEDS. EACH TREE SHALL HAVE A RING OF ORGANIC MULCH AT THE PERIMETER OF THE ROOT BALL.

42. ALL SHADE TREES INSTALLED WITHIN SIX FEET OF PUBLIC INFRASTRUCTURE SHALL UTILIZE A ROOT BARRIER SYSTEM AS APPROVED BY THE CITY.

43. THE ERADICATION OF NUISANCE VEGETATION (EXOTICS) EXISTING ON SITE REQUIRED ON ALL SITES. INCLUDING ABUTTING RIGHTS-OF WAY, PRIOR TO THE ISSUANCE OF CERTIFICATE OF OCCUPANCY PRIVATELY OWNED NATURAL AREAS SHALL BE INCLUDED IN THIS REQUIREMENT. FICUS BENJAMINA AND FICUS NITIDA MAY BE USED FOR HEDGE MATERIAL WITH A FIVE-FOOT SEPARATION FROM WATER LINES. FICUS HEDGES MAY NOT BE PLANTED IN UTILITY EASEMENTS

44. HEDGES: WHERE REQUIRED SHALL BE PLANTED SO AS TO BE TIP TO TIP WITHIN SIX MONTH S OF PLANTING AND MAINTAINED SO AS TO FORM A CONTINOUS VISUAL SCREEN. SHRUBS USED AS HEDGES SHALL BE FLORIDA DEPARTMENT OF AGRICULTURE GRADE No 1 OR BETTER WITH A MINIMUM HEIGHT OF 24 INCHES AND MINIMUM SPREAD OF 24 INCHES, WHEN MEASURED IMMEDIATELY AFTER PLANTING AND SHALL BE MINIMUM OF THREE FEET IN HEIGHT WITHIN TWO YEARS FROM THE DATE OF PLATING. HEDGES SHALL BE PLANTED WITH BRANCHES TOUCHING, WITHIN SIX MONTHS OF PLANTING SO AS TO CREATE A SOLID SCREEN WITH NO VISUAL SPACES BETWEEN PLANTS AT THIS TIME, PLANTS SPACING MAY BE ADJUSTED ACCORDING TO PLAT SIZES SO LONG A THE PRECEDING IS ACHIEVED. ALL GROUNDCOVER SHALL BE INSTALLED AT 75% COVERAGE AND 100% WITHIN 6 MONTHS AFTER FINAL ACCEPTANCE.

45. ALL ABOVE GROUND ELEMENTS INCLUDING BUT NOT LIMITED TO DUMPSTERS, FENCES, WALLS, A/C UNITS, IRRIGATION PUMPS, TRANSFORMERS AND GENERATORS SHALL BE SCREENED WITH LANDSCAPE MATERIAL TO A HEIGHT OF 36" MIN.

46. AN AUTOMATIC IRRIGATION SYSTEM SHALL BE INSTALLED TO PROVIDE RUST FREE 100% COVERAGE & 100% OVERLAP. CONTRACTOR SHALL ENSURE THERE IS NO OVERSPRAY ONTO IMPERVIOUS AREAS. ALL IRRIGATION PVC RISERS SHALL BE PAINTED FLAT BLACK

- EMERGENCY LIGHT
- EXIT SIGN
- FIRE EXTINGUISHER
- ADA ACCESSIBLE SEATING 36" (915MM) X 48" (1220MM) CLEAR AREA

HEALTH DEPT. PLAN NOTES

A. GENERAL CONTRACTOR TO SCHEDULE WITH REFRIGERATION CONTRACTOR TO CONDUCT INITIAL FOOD CASE START-UP AND TESTING. FOR APPROVED CONTRACTOR, CONTACT THE VENDOR.

B. THE SPACE IS SERVED BY THE MUNICIPAL WATER AND SEWER SYSTEM UNLESS OTHERWISE NOTED.

C. ALL EQUIPMENT AND INSTALLATION WILL MEET NATIONAL SANITATION FOUNDATION STANDARDS OR EQUIVALENT.

D. EQUIPMENT UNITS SHALL CONTAIN NO EXPOSED THREADS, EMBELLISHMENTS OR OVERHANGING EDGES THAT SERVE AS PLACES FOR ACCUMULATION OF DUST, DIRT AND DEBRIS

E. WARMING OVEN(S) SHOWN FOR PERMITTING PURPOSES. INSTALLATION AT STORE OPENING TO BE VERIFIED BY STARBUCKS CONSTRUCTION REPRESENTATIVE.

F. EACH HAND WASHING WILL HAVE A SINGLE SERVICE TOWEL AND SOAP DISPENSER AND ALL HAND SINKS TO HAVE A COMBINATION FAUCET OR PREMIXING FAUCET.

G. REFERENCE INTERIOR SCHEDULE SHEETS (I600 SERIES) FOR ADDITIONAL INFORMATION.

H. PROVIDE SNEEZE GUARDS WHERE REQUIRED BY JURISDICTION.

I. ALL FOOD STORAGE AND DISPLAY SHELVING SHALL BE A MINIMUM 6" (150MM) ABOVE FINISH FLOOR.

KEYED NOTES

1. THRESHOLDS TO BE BARRIER FREE COMPLIANT PER ALL APPLICABLE CODES.
2. BARRIER-FREE PATH OF TRAVEL.
3. 30 INCH X 48" CLEAR FOR WHEELCHAIR ACCESS.
4. 60" (1525 MM) DIAMETER MINIMUM TURN RADIUS FOR WHEELCHAIR ACCESS.
5. 32" MINIMUM CLEAR AT RESTROOM DOOR.
6. SEE ENLARGED RESTROOM PLAN AND ELEVATIONS SHEET (I401) FOR ADDITIONAL INFORMATION ON ACCESSIBLE RESTROOM CLEARANCES.
7. POS TRANSACTION PLANE, CONDIMENT CART TOP AND HAND-OFF PLANE ARE 34 INCHES ABOVE THE FINISHED FLOOR FOR WHEELCHAIR ACCESSIBILITY.
8. PROVIDE BARRIER-FREE SIGNAGE AT ADA RESTROOMS PER ALL APPLICABLE CODES.
9. 36 INCH CLEAR FOR ELECTRICAL PANEL ACCESS.
10. 36 INCH CLEAR FOR ROOF LADDER ACCESS.
11. PROVIDE TACTILE "EXIT" SIGNAGE.

ACCESSIBLE SEATING

INTERIOR SEATING:
47 SEATS X 5% = 3 ADA REQUIRED (3 PROVIDED)

EXTERIOR SEATING:
17 SEATS X 5% = 1 ADA REQUIRED (1 PROVIDED)

MEANS OF EGRESS NOTES

A. EVERY ROOM OR SPACE THAT IS ASSEMBLY OCCUPANCY SHALL HAVE THE OCCUPANT LOAD OF THE ROOM OR SPACE POSTED IN A CONSPICUOUS PLACE, NEAR THE MAIN EXIT ACCESS DOORWAY. POSTED SIGNS SHALL BE OF AN APPROVED LEGIBLE PERMANENT DESIGN AND SHALL BE MAINTAINED BY THE OWNER AUTHORIZED AGENT.

B. EGRESS SHALL NOT PASS THROUGH KITCHENS, STORAGE ROOMS, CLOSETS OR SIMILAR SPACES.

C. PANIC AND FIRE EXIT HARDWARE, WHERE INSTALLED ON DOORS IN THIS BUILDING SHALL SATISFY THE FOLLOWING :

1) THE ACTUATION PORTION OF THE RELEASING DEVICE SHALL EXTEND AT LEAST ONE-HALF OF THE DOOR LEAF WIDTH.
2) THE MAXIMUM UNLATCHING FORCE DOES NOT EXCEED 15 POUNDS (6.8 KG).
3) PIVOTED OR BALANCED DOORS SHALL BE OF THE PUSH-PAD TYPE WHERE PANIC HARDWARE IS REQUIRED AND THE PAD SHALL NOT EXTEND ACROSS MORE THAN ONE-HALF OF THE DOOR WIDTH, MEASURED FROM THE LATCH SIDE.
4) PANIC HARDWARE LISTED IN ACCORDANCE WITH UL 305.
5) FIRE EXIT HARDWARE LISTED IN ACCORDANCE WITH UL 10C AND UL 305.

D. STRUCTURAL ELEMENTS, FIXTURES OR FURNISHINGS SHALL NOT PROJECT HORIZONTALLY FROM EITHER SIDE MORE THAN 4 INCHES (100 MM) OVER ANY WALKING SURFACE BETWEEN 27 INCHES (685 MM) AND 80 INCHES (2030 MM) ABOVE THE WALKING SURFACE.
EXCEPTION: HANDRAILS SERVING STAIRS AND RAMPS ARE PERMITTED TO PROTRUDE 4 1/2 INCHES (115 MM) FROM THE WALL.

E. THE PATH OF EGRESS TRAVEL EXITS AND WITHIN EXITS IN THIS BUILDING SHALL BE IDENTIFIED BY EXIT SIGNS CONFORMING TO THE REQUIREMENTS AS NOTED BELOW:

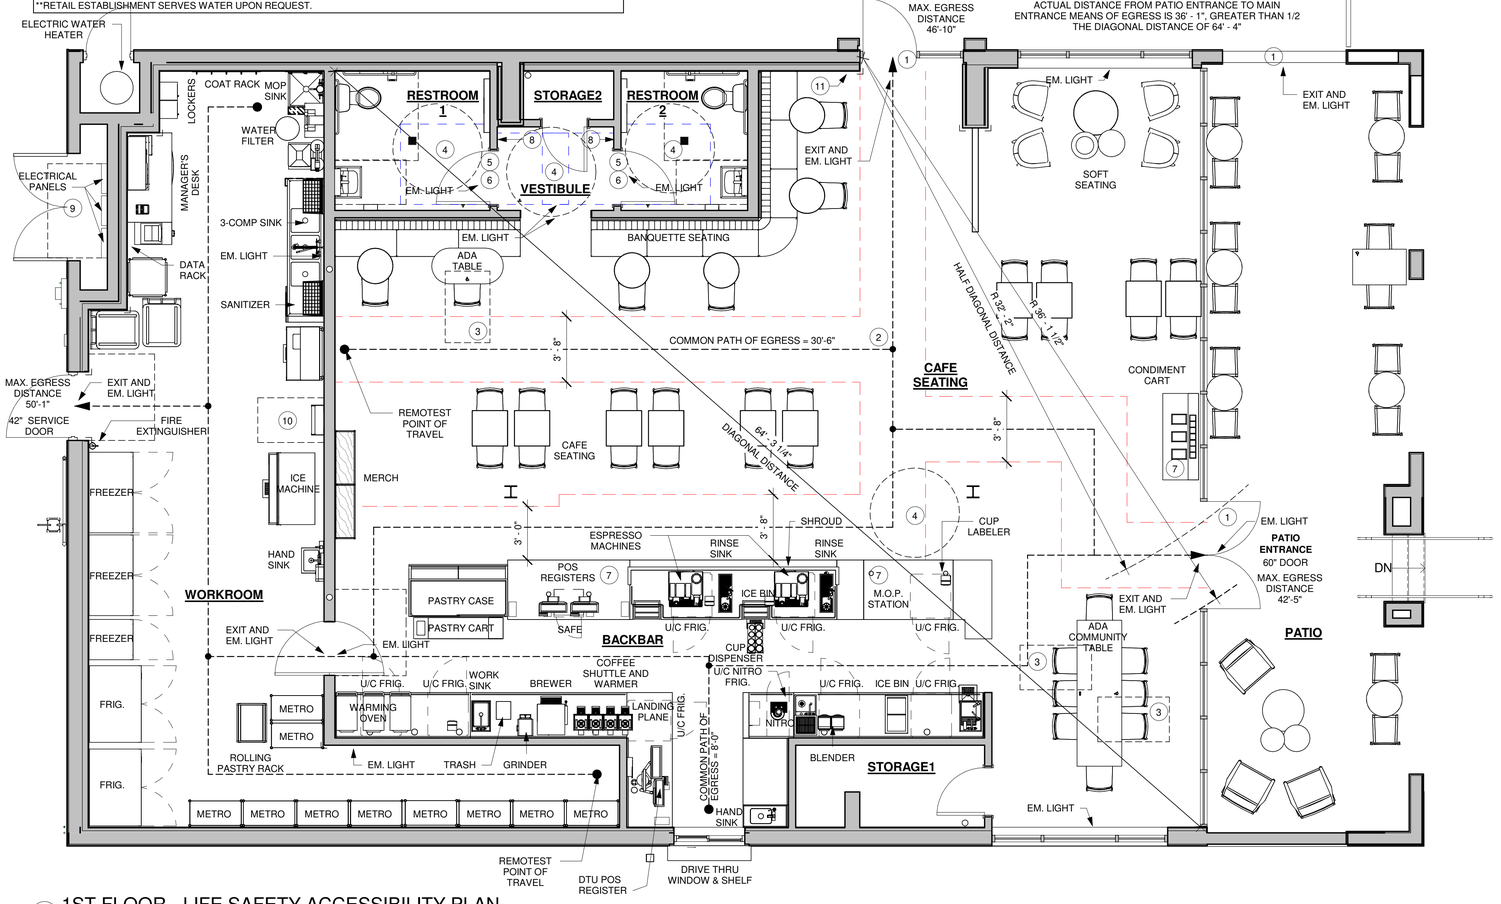
1) EXIT SIGNS SHALL BE READILY VISIBLE FROM ANY DIRECTION OF EGRESS TRAVEL.
2) EXIT SIGNS SHALL BE LOCATED AS NECESSARY TO CLEARLY INDICATE THE DIRECTION OF EGRESS TRAVEL.
3) NO POINT IN A CORRIDOR SHALL BE MORE THAN 100 FT (30.5 M) OR THE LISTED VIEWING DISTANCE FOR THE SIGN, WHICHEVER IS LESS, FROM THE NEAREST VISIBLE EXIT SIGN.

F. EXIT SIGNS SHALL BE INTERNALLY OR EXTERNALLY ILLUMINATED INTERNALLY ILLUMINATED EXIT SIGNS SHALL BE LISTED AND LABELED IN ACCORDANCE WITH UL 924 AND SHALL BE INSTALLED IN ACCORDANCE WITH THE MANUFACTURER'S INSTRUCTIONS. EXTERNALLY ILLUMINATED EXIT SIGNS SHALL COMPLY WITH THE GRAPHICS AND POWER SOURCE REQUIREMENTS. WHEN THE FACE OF AN EXIT SIGN IS ILLUMINATED FROM AN EXTERNAL SOURCE, IT SHALL HAVE AN INTENSITY OF NOT LESS THAN 5 FOOT CANDLES (54 LUX).

G. ANYTIME A BUILDING OR A PORTION OF A BUILDING IS OCCUPIED, THE MEANS OF EGRESS SERVING THE OCCUPIED PORTION SHALL BE ILLUMINATED AT AN INTENSITY OF NOT LESS THAN 1 FOOT CANDLE (11 LUX) AT THE WALKING SURFACE LEVEL.

H. THE POWER SUPPLY FOR MEANS OF EGRESS ILLUMINATION SHALL BE PROVIDED BY THE PREMISE'S ELECTRICAL SUPPLY. IN THE EVENT OF POWER SUPPLY FAILURE, ILLUMINATION SHALL BE AUTOMATICALLY PROVIDED FROM AN EMERGENCY SYSTEM FOR THE FOLLOWING AREAS:

1) AISLES AND UNENCLOSED EGRESS STAIRWAYS IN ROOMS AND SPACES THAT REQUIRE TWO OR MORE MEANS OF EGRESS.
2) CORRIDORS, INTERIOR EXIT STAIRWAYS & RAMPS AND EXIT PASSAGEWAYS IN BUILDINGS REQUIRED TO HAVE TWO OR MORE EXITS.
3) EXTERIOR EGRESS COMPONENTS AT OTHER THAN THE LEVEL OF EXIT DISCHARGE UNTIL EXIT DISCHARGE IS ACCOMPLISHED FOR BUILDINGS REQUIRED TO HAVE TWO OR MORE EXITS.
4) INTERIOR EXIT DISCHARGE ELEMENTS, IN BUILDINGS REQUIRED TO HAVE TWO OR MORE EXITS.
5) EXTERIOR LANDINGS, EXIT DISCHARGE DOORWAYS IN BUILDING REQUIRED TO HAVE TWO OR MORE EXITS.



I. THE EMERGENCY POWER SYSTEM SHALL ALSO BE CONNECTED TO AN EMERGENCY ELECTRICAL SYSTEM WHICH IS TO PROVIDE CONTINUED ILLUMINATION FOR A DURATION OF NOT LESS THAN 1 1/2 HOUR IN CASE OF PRIMARY POWER LOSS. CONTINUED ILLUMINATION IS TO BE PROVIDED FROM STORAGE BATTERIES, UNIT EQUIPMENT OR AN ON-SITE GENERATOR AND THE INSTALLATION OF THE EMERGENCY POWER SYSTEM.

J. EMERGENCY LIGHTING FACILITIES SHALL BE ARRANGED TO PROVIDE INITIAL ILLUMINATION THAT IS AT LEAST AN AVERAGE OF 1 FOOT CANDLE (11 LUX) AND A MINIMUM AT ANY POINT OF 0.1 FOOT CANDLE (1 LUX) MEASURED ALONG THE PATH OF EGRESS AT FLOOR LEVEL. A MAXIMUM TO MINIMUM ILLUMINATION UNIFORMITY RATION OF 40:1 SHALL NOT BE EXCEEDED.

K. WHERE KEY OPERATED LOCKING DEVICES ARE USED, POST A SIGN ON OR ADJACENT TO THE REQUIRED MAIN EXIT DOOR WITH 1 INCH (25 MM) LETTERING STATING THAT "THIS DOOR TO REMAIN UNLOCKED WHEN BUILDING IS OCCUPIED".

L. EGRESS DOORS OR GATES SHALL BE OPENABLE FROM THE EGRESS SIDE WITHOUT THE USE OF A KEY, SPECIAL KNOWLEDGE OR EFFORT. DOOR HANDLES, PULLS, LATCHES, LOCKS AND OTHER OPERATING DEVICES SHALL BE INSTALLED 34 INCHES (860 MM) TO 48 INCHES (1220 MM) ABOVE FINISHED FLOOR. MANUALLY OPERATED FLUSH BOLTS OR SURFACE BOLTS ARE NOT PERMITTED. THE UNLATCHING OF ANY DOOR OR LEAF SHALL NOT REQUIRE MORE THAN ONE OPERATION.

M. LANDINGS SHALL BE PROVIDED ON EACH SIDE OF DOORS AND SUCH LANDING SHALL BE AT THE SAME ELEVATION ON EACH SIDE OF THE DOOR LANDINGS SHALL HAVE A WIDTH NOT LESS THAN THE WIDTH OF THE DOOR AND LENGTH MEASURED IN THE DIRECTION OF TRAVEL OF NOT LESS THAN 44 INCHES (11120 MM).

KEYED NOTES

1. STORE ADDRESS. PROVIDE 3" (76MM) HIGH BLACK ACRYLIC STORE ADDRESS ON GLAZING ABOVE MAIN ENTRY DOORS. OR PER LOCAL JURISDICTIONAL CODE REQUIREMENTS.
2. PROVIDE J-BOX FOR BUILDING SIGNAGE. COORDINATE LOCATION WITH SIGNAGE VENDOR SHOP DRAWINGS. PROVIDE SIGNAGE DISCONNECT ON INSIDE FACE OF WALL.
   3/4" MARINE GRADE PLYWOOD BLOCKING FOR EXTERIOR SIGNAGE. EXTEND BLOCKING 8" (205MM) MIN. BEYOND EDGE OF SIGNAGE.
3. NON-ILLUMINATED PROTECTIVE BOLLARD.
4. EXISTING ELECTRICAL METER.
5. EXISTING SERVICE DOOR.
6. FURNISH AND INSTALL SECURITY LIGHT ABOVE ENTRY DOOR.
7. DT WINDOW. PROVIDE READY ACCESS DT SERVICE WINDOW. WINDOW TO MATCH ADJACENT STOREFRONT.
8. DT WINDOW SHELF. INSTALL SERVICE WINDOW SHELF AT 36" (915MM) INSIDE.
9. CANOPY. SEE BUILDING DETAIL SHEETS AND STRUCTURAL DRAWINGS.
10. EXISTING ROOF SCUPPER .
11. EXTERIOR SCONCE LIGHTING.
12. LOCKABLE HOSE BIB. SEE PLUMBING DRAWINGS.
13. EXISTING GAS METER. SEE PLUMBING SHEETS FOR ADDITIONAL INFORMATION.
14. GUARDRAIL
15. METAL BAND

GENERAL NOTES

A. GENERAL CONTRACTOR TO COORDINATE AND SCHEDULE SIGNAGE INSTALLATION WITH THE SIGNAGE CONTRACTOR PROVIDING A MINIMUM SCHEDULING NOTICE OF 4 WEEKS AND 1 WEEK PRIOR TO SCHEDULED DATE OF INSTALLATION. CONSTRUCTION MANAGER TO PROVIDE GENERAL CONTRACTOR WITH SIGNAGE CONTRACTOR CONTACT INFORMATION.

B. GENERAL CONTRACTOR SHALL COORDINATE WITH ELECTRICAL CONTRACTOR TO FURNISH AND INSTALL ELECTRICAL CIRCUITS INCLUDING ALL CONDUIT, WIRE, CONNECTIONS AND BREAKER AT PANEL BOARD NECESSARY TO SERVE SIGNAGE.

C. GENERAL CONTRACTOR TO PROVIDE FIRE TREATED WOOD STUD BLOCKING OR EQUIVALENT TO SUPPORT SIGNAGE.

D. SIGNAGE CONTRACTOR SHALL VERIFY SIZE AND LOCATION OF ANY AND ALL ALLOWABLE MONUMENT OR POLE SIGNAGE AND PROVIDE SHOP DRAWING(S) PRIOR TO FABRICATION TO THE STARBUCKS DESIGNER FOR APPROVAL.

E. SIGNAGE CONTRACTOR TO INSTALL SIGNAGE IN COMPLIANCE WITH LOCAL CODES AND OBTAIN PERMIT.

F. SIGNAGE CONTRACTOR TO SUPPLY SHOP DRAWINGS TO CONSTRUCTION MANAGER AND TO THE GENERAL CONTRACTOR AS NEEDED. GENERAL CONTRACTOR TO NOTIFY CONSTRUCTION MANAGER IMMEDIATELY IF SHOP DRAWINGS OR INSTALLATION IS IN DISCREPANCY WITH ARCHITECTURAL DRAWINGS.

G. GENERAL CONTRACTOR TO CLEAN, PATCH AND REPAIR EXISTING EXTERIOR AS REQUIRED.

SIGNAGE SHOWN FOR REFERENCE ONLY. SIGNAGE APPROVALS SHALL BE ACQUIRED UNDER SEPARATE SIGN PERMIT SUBMITTALS. SIGNAGE IS NOT INCLUDED IN THE SCOPE OF THIS BUILDING PERMIT.

SCHEMATIC DESIGN ONLY - NOT INTENDED FOR CONSTRUCTION USE

Scale: 1" = 1'-0"

SQUARE FOOTAGE:
1.25' x 2.08' = 2.60 Sq Ft

SUPPORT DESCRIPTION:
- Supporting structure will be all welded aluminum tube and "C" channel construction painted to match Pantone 419 black (RAL 7021M).
- Base Cover constructed of aluminum and installed to cover electrical connection and base plate.

COLOR SCHEDULE:

Pantone 419 Black (RAL 7021M) gloss

Copy = 3M 7725-10 White Opaque Vinyl

CABINET DESCRIPTION:
- Fabricated .090" aluminum cabinet painted to match Pantone 419 black (RAL 7021M) and White painted section of cabinet returns as shown.
- Directional Copy and graphics routed away from face and backed with 7328 white polycarbonate. White polycarbonate edge is visible on the return of the cabinet, Chevron side only. Face backing mechanically secured with welded studs & nuts. Interior of cabinet painted Lacryl Starbrite white.
- Welded aluminum construction with no visible fasteners. Fasteners retaining the hinged face will be located on the bottom such that they are not visible. All fasteners used in the assembly of internal components shall be coated to prevent corrosion.

INTERNAL ILLUMINATION DESCRIPTION:
- Graphic elements are internally illuminated using GE Tetra LED modules and power supplies. LED's to be mounted to internal baffle with self contained power supply. All electrical components are removable for service.
- Sign meets all regulation in the NEC as well as any local or state codes.
- As per NEC 600.6, sign is equipped with a service disconnect switch.
- Sign must be listed as an Electric Sign per Underwriters Laboratories UL48 and/or CSA and bear the appropriate UL, CUL or CSA relevant certification marks.

Good evening Iramis,

LWDD has no objection to the certification of this petition. It is located north of the L-8 Canal and is not adjacent.

Thank you.

Recommendation(s):

1) If/when drive-thru vehicles extend beyond the conflict point, an employee shall be stationed at the drive-thru line to take orders and to prevent traffic from overflowing on the northern part of the drive isles (see illustration).

2) Drive-thru signs along each of the driveway entrances indicating the flow of traffic for the drive-thru window.

3) Tables/chairs shall be removed each night from the outside patio area and secured within the restaurant.

4) The wi-fi and all outside electrical outlets shall be turned off each night to prevent unwanted guests from loitering in the area.

Re: Starbucks at 4380 Forest Hill Blvd
Site Plan Approval Letter
Engenuity Group Project No. 6001.113

We have received the following through WeTransfer on 3-1-21:

1. Civil Plans, 4 sheet (C-1, C1A, C-2, C-3), dated 2-23-21, by Zamora & Associates, Inc.
2. Landscape Plan, 3 sheets (L-1, L-2, L-3), revised 2-25-21, by MLA
3. Master Site Plan,1 sheet, dated 2-23-21, by Zamora & Associates, Inc.
4. Section 4- description of Project, 1 sheet
5. Section 8- Variance Only, 2 sheets

We recommend Site Plan approval with the following condition:

1. Verify drainage pipe running north/south at east edge of property and determine any impacts including Silver Buttonwood planting. Add root barrier if necessary.
2. Evaluate existing grease trap.
3. On the Traffic Circulation Plan, it appears there will be a continuous circular traffic pattern before the drive thru with the right turn only.
4. On Sheet C-2, it appears grading will be required at the new drive thru entrance.

If you should have any questions, please give me a call at 561-655-1151.

RE: Starbucks Redevelopment - 4380 FHB
Project #: 210116
Traffic Performance Standards Review

Dear Ms. Caldera:

The Palm Beach County Traffic Division has reviewed the **Starbucks Redevelopment** Traffic Impact Statement, dated December 14, 2020, pursuant to the Traffic Performance Standards in Article 12 of the Palm Beach County Unified Land Development Code (ULDC). The project is summarized as follows:

Municipality:	Palm Springs
Location:	SEC of Forest Hill Blvd and Military Trl
PCN:	70-42-44-12-00-000-5680
Access:	Existing access driveway connections onto Forest Hill Blvd and Military Trl (As used in the study and is NOT necessarily an approval by the County through this TPS letter)
Existing Uses:	Fast Food Restaurant + DT = 3,357 SF
Proposed Uses:	Convert the existing use to: Coffee/Donut Shop + DT = 3,357 SF
New Daily Trips:	598
New Peak Hour Trips:	84 (43/41) AM; 18 (8/10) PM
Build-out:	December 31, 2021

Based on our review, the Traffic Division has determined the proposed development is located within the Urban Redevelopment Area (URA) Traffic Concurrency Exception Area (TCEA) and therefore, exempt from the Traffic Performance Standards of Palm Beach County.

Please note an FDOT conceptual driveway pre-approval letter must be provided for the access connections onto Forest Hill Blvd and Military Trl for the proposed land use.

Please note the receipt of a Traffic Performance Standards (TPS) approval letter does not constitute the review and issuance of a Palm Beach County Right-of-Way (R/W) Construction Permit nor does it eliminate any requirements that may be deemed as site related. For work within Palm Beach County R/W, a detailed review of the project will be provided upon submittal for a R/W permit application. The project is required to comply with all Palm Beach County standards and may include R/W dedication.

No building permits are to be issued by the Village after the build-out date specified above. The County traffic concurrency approval is subject to the Project Aggregation Rules set forth in the Traffic Performance Standards Ordinance.

The approval letter shall be valid no longer than one year from date of issuance, unless an application for a Site Specific Development Order has been approved, an application for a Site Specific Development Order has been submitted, or the approval letter has been superseded by another approval letter for the same property.

If you have any questions regarding this determination, please contact me at 561-684-4030 or email QBari@pbcgov.org.

Sincerely,

Quazi Bari, P.E., PTOE

3-5-2021

Hello,

We've been doing some research and found that the Village's Comprehensive Plan refers to Palm Beach County's TPS. The excerpts are shown below:

> *Policy C.3: The Village shall continue to enforce the Palm Beach County Traffic Performance Standard Ordinance to ensure that roadway capacities will be available when necessitated by development.*
>
> *Objective F: The Village of Palm Springs authorizes and establishes the Transportation Concurrency Exception Area (TCEA) for the corridors of Military Trail and Congress Avenue (Figures 1A and 1B). … The Military Trail right-of-way is in unincorporated Palm Beach County as well as most of the contiguous properties (See Figure 1D). However, both corridors and contiguous properties are within the future annexation area of the Village (Figure 1E). The TCEA standards as established by Palm Beach County are delineated below and the data and analysis are adopted by reference.*
>
> *Policy F.1: Prior to issuance of any Development Order for a project within the TCEA, the project must submit a traffic generation study for approval to the County Engineer. This traffic study shall show external project traffic and all other existing and committed development traffic in the area to demonstrate that the proposed project is within the limits for allowable land uses and trips set forth in Tables TE-7.A and TE-7.B.*

If I understand this correctly, the Village effectively adopted the TCEA policies from PBC, and Military Trail corridor is indeed within the Village's TCEA.

We also completed the review of the Traffic Circulation Plan, Comment Response Letter, and the Variance Justification for Hours of Operations.

- The circulation plan looks great! They did exactly what we recommended on the call with the management company. They propose to close one of the accesses to the east of the site and restrict one of the center drive aisles to be one-way southbound/exit only, which will further improve overall circulation. My only comment would be: "Please make sure that a stop sign, a stop bar, and lane marking "STOP" are presented for all stop locations/approaches."
- With the confirmation from PBC, I'm good with the traffic study/responses as well.
- I'm not as familiar with the Variance request, but it does not seem unreasonable.

Please let me know if you have any questions, would like to discuss, or would like me to formalize the comment above in a letter. I can also add anything else the Village has a concern with.

Thanks,

Thuha

PUBLIC HEARING NOTICE

Notice is hereby given that public hearings will be held on:

Tuesday, April 13, 2021 at 6:30 p.m. by Planning & Zoning Board
Thursday, May 13, 2021 at 6:30 p.m. by the Village Council
in the Village Hall Council Chambers at 226 Cypress Lane, Palm Springs, FL 33461
to consider:

Site Plan Amendment and Special Exception Use

An application submitted by Brian Plewinski ("Applicant"), for a Site Plan Amendment (**SPR21-05)** and concurrently requesting a Special Exception Use (**PSSE21-01)** to allow the conversion of the existing 3,357 square feet restaurant building into a coffee shop with drive thru and outdoor seating area, for the commercial general property located at 4380 Forest Hill Boulevard.

Additional requested:

Thursday, May 13, 2021 at 6:30 p.m. by Village Council
in the Village Hall Council Chambers at 226 Cypress Lane, Palm Springs, FL 33461
to consider:

Hours of Operation Variance

An application submitted by Brian Plewinski ("Applicant") for:

PSV21-06 - Variance relief from Section 34-891(1) to allow business operation commence at 5:30 am instead of 7:00 am required.

All persons interested in these matters may appear at the times and place aforesaid and be heard. Prior to the meeting the application may be reviewed at the Village Clerk's Office.

If a person decides to appeal any decision made by the above Boards with respect to any matter considered at such hearings, he or she will need a record of the proceedings, and for such purpose may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. Persons who need an accommodation in order to attend or participate in this meeting should contact the Village Clerk at (561) 965-4010 at least three (3) business days prior to the meeting in order to request such assistance.

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Administration

ITEM 9.7: Public Workshop: Extraordinary Circumstances Necessitating and Justifying Impact Fees for Law Enforcement and Parks & Recreation

SUMMARY: Recently adopted House Bill 337 amends Chapter 163.31801, Florida Statutes, pertaining to impact fees and places new requirements, retroactively to January 1, 2021, on local government when considering an increase in impact fee rates.

In general, the new legislation restricts increases in impact fees to no more than 50% in a four (4) year period, unless the local government:

1) Bases an increase in impact fee rates on needs established in a study,
2) Holds two publicly noticed workshops dedicated to the "extraordinary circumstances" necessitating the need to exceed the 50% threshold, and
3) Approves an impact fee ordinance by at least a two-thirds (2/3) vote.

Village consultants, Tindale Oliver, and Village staff find that Palm Springs has extraordinary circumstances for the consideration of an increase in Law Enforcement and Parks & Recreation impact fees:

- An increase in impact fee rates is justified in an Impact Fee Study prepared by Tindale Oliver dated March 18, 2021
- The Village has not increased impact fee rates since at least 2006 (over 15 years)
- Additional revenues are needed in order to maintain Village level of service standards for Law Enforcement and Parks & Recreation
- Alternatives to increasing impact fee rates include reduction of the level of service and/or using General Operating funds to cover capital costs associated with new growth and development
- The Village has annexed 629 acres (primarily of developed properties) since 2006,

which has brought additional demand on law enforcement services and parks and recreation facilities that necessitates investment in capital expenditures
- Capital investments are essential for law enforcement and parks and recreation to promote public health, safety and welfare of Village residents, businesses and property owners.

This is the first advertised public workshop to discuss the circumstances necessitating and justifying the need for increases in impact fee rates. A second public workshop has been advertised for June 10, 2021, and will be followed by consideration of proposed Ordinance No. 2021-03 - Village Code Amendment - Chapter 34 - Law Enforcement and Parks & Recreation Impact Fees.

FISCAL IMPACT:

The proposed, new impact fees would increase Village revenues to assist in supporting the requisite costs to provide the highest levels of policing and parks & recreation infrastructure and would be determined by the new growth that occurs within the Village.

Based on FY 2020 permit activity, the proposed, new impact fees are expected to generate approximately $7,537.12 and $18,304 for law enforcement and parks & recreation, respectively, within FY 2022.

I. Introduction

The Village of Palm Springs is the 12th largest municipality in Palm Beach County, with a population of approximately 24,000 permanent residents. Since 2000, the Village's population doubled primarily due to an aggressive annexation program. These annexations included improved residential and commercial properties as well as some vacant land. As the Village becomes more developed, the growth is starting to occur through redevelopment projects. To address capital infrastructure needs associated with new growth, the Village implemented law enforcement and parks and recreational facilities impact fees. At this time, to comply with the legislative requirements and to reflect most recent data, the Village is interested in updating its impact fee program.

The Village of Palm Springs has retained Tindale Oliver (TO) to prepare the technical study for these fees and this report serves as the technical study to support the calculation of the impact fees.

Methodology

In updating the Village's impact fee program, a consumption-based impact fee methodology is utilized, which is commonly used throughout Florida. A consumption-based impact fee charges new development based upon the burden placed on services from each land use (demand). The demand component is measured in terms of population per unit of development in the case of law enforcement and parks and recreational facilities impact fee areas.

A consumption-based impact fee charges new growth the proportionate share of the cost of providing additional infrastructure necessitated by and available for use by new growth. Unlike a "needs-based" approach, the consumption-based approach ensures that the impact fee is set at a rate that does not generate revenues at a level to correct existing deficiencies. As such, the Village does not need to go through the process of estimating the portion of each capacity expansion project that may be related to existing deficiencies. In addition, per legal requirements, a credit is subtracted from the total cost to account for the value of future tax contributions generated by new development toward any capacity expansion projects. In other words, case law requires that the new development should not be charged twice for the same service.

Legal Standard Overview

In Florida, legal requirements related to impact fees have primarily been established through case law since the 1980's. Impact fees must comply with the "dual rational nexus" test, which requires that they:

- Be supported by a study demonstrating that the fees are proportionate in amount to the need created by new development paying the fee; and
- Be spent in a manner that directs a proportionate benefit to new development, typically accomplished through establishment of benefit districts (if needed) and a list of capacity-adding projects included in the Capital Improvement Plans, Capital Improvement Elements, or another planning documents/Master Plans.

In 2006, the Florida legislature passed the "Florida Impact Fee Act," which recognized impact fees as "an outgrowth of home rule power of a local government to provide certain services within its jurisdiction." § 163.31801(2), Fla. Stat. The statute – concerned with mostly procedural and methodological limitations – did not expressly allow or disallow any particular public facility type from being funded with impact fees. The Act did specify procedural and methodological prerequisites, such as the requirement of the fee being based on most recent and localized data, a 90-day requirement for fee changes, and other similar requirements, most of which were common to the practice already.

More recent legislation further affected the impact fee framework in Florida, including the following:

- **HB 227 in 2009**: The Florida legislation statutorily clarified that in any action challenging an impact fee, the government has the burden of proving by a preponderance of the evidence that the imposition or amount of the fee meets the requirements of state legal precedent or the Impact Fee Act and that the court may not use a deferential standard.
- **SB 360 in 2009:** Allowed fees to be decreased without the 90-day notice period required to increase the fees and purported to change the standard of legal review associated with impact fees. SB 360 also required the Florida Department of Community Affairs (now the Department of Economic Opportunity) and Florida Department of Transportation (FDOT) to conduct studies on "mobility fees," which were completed in 2010.
- **HB 7207 in 2011:** Required a dollar-for-dollar credit, for purposes of concurrency compliance, for impact fees paid and other concurrency mitigation required.

- **HB 319 in 2013:** Applied mostly to concurrency management authorities, but also encouraged local governments to adopt alternative mobility systems using a series of tools identified in section 163.3180 (5)(f), Florida Statutes.
- **HB 207 in 2019:** Included the following changes to the Impact Fee Act along with additional clarifying language:
    1. Impact fees cannot be collected prior to building permit issuance; and
    2. Impact fee revenues cannot be used to pay debt service for previously approved projects unless the expenditure is reasonably connected to, or has a rational nexus with, the increased impact generated by the new residential and commercial construction.
- **HB 7103 in 2019:** Addressed multiple issues related to affordable housing/linkage fees, impact fees, and building services fees. In terms of impact fees, the bill required that when local governments increase their impact fees, the outstanding impact fee credits for developer contributions should also be increased. This requirement will operate prospectively. This bill also allowed local governments to waive/reduce impact fees for affordable housing projects without having to offset the associated revenue loss.
- **SB 1066 in 2020:** Added language allowing impact fee credits to be assignable and transferable at any time after establishment from one development or parcel to another that is within the same impact fee zone or impact fee district or that is within an adjoining impact fee zone or district within the same local government jurisdiction. In addition, added language indicating any new/increased impact fee not being applicable to current or pending permit applications submitted prior to the effective date of an ordinance or resolution imposing new/increased fees.
- **HB 1339 in 2020:** Requires reporting of various impact fee related data items within the annual financial audit report submitted to the Department of Financial Services.

The following paragraphs provide further detail on the generally applicable legal standards applicable here.

<u>Impact Fee Definition</u>

- An impact fee is a one-time capital charge levied against new development.
- An impact fee is designed to cover the portion of the capital costs of infrastructure capacity consumed by new development.
- The principal purpose of an impact fee is to assist in funding the implementation of projects identified in the Capital Improvements Element (CIE) and other capital improvement programs for the respective facility/service categories.

Impact Fee vs. Tax

- An impact fee is generally regarded as a regulatory function established based upon the specific benefit to the user related to a given infrastructure type and is not established for the primary purpose of generating revenue for the general benefit of the community, as are taxes.
- Impact fee expenditures must convey a proportional benefit to the fee payer. This is accomplished through the establishment of benefit districts as needed, where fees collected in a benefit district are spent in the same benefit district.
- An impact fee must be tied to a proportional need for new infrastructure capacity created by new development.

This technical report has been prepared to support legal compliance with existing case law and statutory requirements and documents the methodology used for impact fee calculations for each fee in the following sections, including an evaluation of the inventory, service area, level of service (LOS), cost, credit, and demand components. Information supporting this analysis was obtained through November 2020 from the Village and other sources, as indicated.

II. Law Enforcement

This section discusses the analysis used in the update of the law enforcement impact fee. Several elements addressed in this section include:

- Facility Inventory
- Service Area and Demand Component
- Level of Service
- Cost Component
- Credit Component
- Net Impact Cost
- Calculated Impact Fee Schedule
- Impact Fee Schedule Comparison

These elements are summarized throughout this section.

Facility Inventory

The facility inventory for the Village's law enforcement services includes buildings, land, vehicles and equipment. According to information provided by the Village of Palm Springs, law enforcement building and land related capital assets include approximately 13,950 square feet of building space and 2.5 acres of land. Table II-1 presents this information.

Cost estimate for the police station is based primarily on insurance values, estimated cost figures for the police station expansion and cost information obtained from other jurisdictions. Land values are based on a review of current value of land where the existing station is located and estimated value of a parcel the Village is considering purchasing based on information obtained from the Palm Beach County Property Appraiser as well as vacant land sales and values of similarly sized parcels.

Based on this data and analysis, the building value is estimated at $300 per square foot and the land value is estimated at $250,000 per acre. These cost estimates result in a total building and land value of approximately $4.8 million, of which $4.2 million is for buildings and the remaining $625,000 is for land. A more detailed explanation of building and land value estimates is included in Appendix B.

Table II-1

Law Enforcement Building and Land Inventory

Facility[1]	Address[1]	Square Footage[1]	Total Acres[1]	Building Value[2]	Land Value[3]	Total Building and Land Value[4]

Service Area and Demand Component

The Village of Palm Springs Police Department provides law enforcement services for the entire Village. As such, the proper benefit district for law enforcement is the entire Village. In this technical study, the current 2021 weighted and functional population estimates are used.

Because simply using weighted (permanent plus weighted seasonal) population estimates does not fully address daily workers and visitors who also benefit from law enforcement services, the "functional" weekly 24-hour population approach is used to establish a common unit of demand across different land uses. Functional population accounts for residents, visitors and workers traveling in and out of the Village throughout the day and calculates the presence of population at different land uses during the day, which represents the demand component of the impact fee equation. Appendix A provides further explanation of the population analysis and demand calculations.

Level of Service

Based on sworn officer counts provided by the Village of Palm Springs Police Department, as well as, population estimates produced in Appendix A, the current level of service (LOS) is calculated at 2.01 sworn officers per 1,000 weighted seasonal residents. Table II-3 presents the calculation of the existing LOS, which are used in the impact fee calculations assuming the Village will continue to provide this LOS in the future.

While the 2020 LOS is 2.01 sworn officers per 1,000 weighted seasonal residents, to calculate the law enforcement impact fee, the LOS needs to be calculated in terms functional residents. As shown, the current LOS of law enforcement services is 2.18 sworn officers per 1,000 functional residents, which is utilized in calculating the law enforcement impact fee for the Village of Palm Springs.

Table II-3

Current Level of Service (2020)

Component	Year 2021	
	Weighted Population	Functional Population
Population[(1)]	24,435	22,495
Number of Law Enforcement Officers[(2)]	49	49
Residents per Officer[(3)]	499	459
LOS (officers per 1,000 residents)[(4)]	**2.01**	**2.18**

1) Source: Appendix A, Table A-1 for weighted population and Table A-7 for functional population
2) Source: Table II-2
3) Population (Item 1) divided by number of officers (Item 2)
4) Number of officers (Item 2) divided by the population (Item 1) and multiplied by 1,000

Table II-4 summarizes an LOS comparison between the Village of Palm Springs and other Florida cities. The LOS is displayed in terms of permanent population for all jurisdictions because a functional population analysis has not been completed for these entities. The LOS comparison is based on the permanent population for 2020 and number of officers reported in the 2019 FDLE Criminal Justice Agency Profile Report, as these are the most recent data available for all jurisdictions. As presented in this table, the Village of Palm Springs' LOS is in the lower-range of the communities reviewed.

Table II-4
Level of Service Comparison (2020)

Jurisdiction	Service Area Population (2020)[1]	Number of Officers[2]	LOS (Officers per 1,000 Residents)[3]
Town of Jupiter	63,188	114	1.80
Village of Palm Springs	**23,867**	**49**	**2.05**
City of Palm Beach Gardens	56,709	147	2.59
City of Boca Raton	95,139	201	2.11
City of Boynton Beach	78,495	145	1.85
City of Delray Beach	67,168	165	2.46
Village of North Palm Beach	12,813	44	3.43
City of West Palm Beach	116,781	292	2.50
City of Riviera Beach	36,057	124	3.44
Town of Juno Beach	3,463	14	4.04
Town of Palm Beach	8,409	64	7.61

1) Source: University of Florida, Bureau of Economic & Business Research (BEBR)
2) Source: FDLE Criminal Justice Agency Profile Report, 2019 for all jurisdictions except for the Village of Palm Springs. The officer figure for Palm Springs reflects the current count.
3) Permanent population (Item 1) divided by the number of officers (Item 2) and multiplied by 1,000

Cost Component

The cost component of the study evaluates the cost of all capital assets, including buildings, land and equipment/vehicles. Table II-5 provides a summary of all capital costs, which amounts to approximately $7.8 million or $160,000 per sworn officer.

In addition, Table II-5 also provides the impact cost per functional resident, which is calculated by multiplying the net asset value per sworn officer of $160,000 by the current achieved LOS

(sworn officers per 1,000 functional residents) of 2.18 and dividing by 1,000. As shown, this calculation results in law enforcement capital cost of $348 per functional resident.

Table II-5

Total Impact Cost per Functional Resident

Component	Cost	Percent of Total Value[8]
Building Value[1]	$4,183,800	53.5%
Land Value[1]	$625,000	8.0%
Vehicle and Equipment Value[2]	$3,013,021	38.5%

Credit Component

To avoid overcharging new development, a review of the capital funding allocation for law enforcement services is completed. The purpose of this review is to determine any potential revenues generated by future development that is likely to be used for capital facilities, land, vehicle, and equipment expansion of the law enforcement program. Revenue credits are then applied against the total impact cost per functional resident so that new development is not charged twice for capital revenue contributions used to expand the law enforcement program.

Capital Expansion Credit

To calculate the capital expansion credit per functional resident, funding sources used for historical and future programmed capacity projects are reviewed. Between 2016 and 2025, the Village of Palm Springs allocated an average non-impact fee funding of $172,000 per year toward law enforcement capital facilities utilizing General Fund and Sales Tax revenues. The annual capital expansion expenditures were divided by the average annual functional residents for the

same period to calculate the average annual capital expansion credit per functional resident. As presented in Table II-6, the result is $7.63 per functional resident per year.

Once the revenue credit per population is calculated, a credit adjustment is needed for the portion of the revenue credit funded with ad valorem tax revenues, which is approximately 5 percent of the cash funding. This adjustment accounts for the fact that new homes tend to pay higher property taxes per dwelling unit than older homes and was estimated based on a comparison of the average taxable value of newer homes to that of all homes. As presented, the adjusted revenue credit per population amounts to $7.90 per year.

Table II-6

Capital Expansion Credit

Description[1]	Funding Source	FY 2016-2020	FY 2021-2025	Total (FY 2016-2025)
Machinery and Equipment	General Fund	$184,784		$184,784
Vehicles	General Fund	$160,000		$160,000
Police Station Expansion	Sales Tax		$1,375,000	$1,375,000
Total Capital Expansion Expenditures				$1,719,784
Annual Capital Expansion Expenditures[2]				$171,978
Average Functional Population (FY 2016-2025)[3]				22,554
Annual Capital Expansion Expenditure per Functional Resident[4]				**$7.63**
Portion of Capital Expansion Projects Funded with Ad Valorem Tax Revenues[5]				**5%**
Portion Funded with Ad-Valorem Tax Revenues[6]				$0.38
Credit Adjustment Factor for Residental Land Uses[7]				1.70
Residential Land Uses - Adjusted Annual Capital Improvement Credit per Functional Resident[8]				$0.65
Portion Funded with Other Sources[9]				$7.25

9) Capital expansion expenditures per functional resident (Item 4) less portion funded with ad-valorem tax revenues (Item 6)
10) Adjusted capital expansion expenditures per functional resident (Item 8) plus the portion funded with other revenue sources (Item 9)

Debt Service Credit

Any outstanding bond issues related to the law enforcement also will result in a credit to the impact fee. The Village of Palm Springs used bond proceeds for the construction of the police station. The remaining debt service payments are divided by the population during the same period to determine the debt service credit per resident. Table II-7 presents these calculations.

Table II-7

Debt Service Credit

Description[1]	Funding Source[1]	Present Value of Payments Remaining[1]	Avg Annual Functional Population During Remaining Debt Service Period[2]	Credit per Resident[3]
General Obligation Bond, Portion Associated with Construction of Police Station	General Fund	$1,135,239	23,780	$47.74
Total Debt Service Credit per Functional Resident				**$47.74**

5) Total debt service credit per functional resident multiplied by the portion funded with ad valorem tax revenues (Item 4)
6) Adjustment factor to reflect higher ad valorem taxes paid by new homes
7) Total debt service credit per functional resident paid with ad valorem tax revenues (Item 5) multiplied by the credit adjustment factor (Item 6)
8) Total debt service credit per functional resident less the portion paid with ad valorem tax revenues (Item 5)
9) Sum of the adjusted portion of the debt service credit for residential land uses (Item 7) and the portion funded with other sources (Item 8)

Net Law Enforcement Impact Cost

The net impact cost per resident is the difference between the cost component and the credit component. Table II-8 summarizes the calculation of the net impact cost which amounts to approximately $144 per functional resident for residential land uses and $156 per functional resident for non-residential land uses.

Table II-8

Net Impact Cost

Impact Cost / Credit Element	Per Functional Resident
Impact Cost	
Total Impact Cost[1]	$347.99
Revenue Credit	
Annual Capital Expansion "Cash" Credit per Functional Resident[2]

Law Enforcement Impact Fee Schedule Comparison

As part of the work effort in updating the Village of Palm Springs's law enforcement impact fee schedule, the Village's calculated impact fees for select land uses were compared to the adopted fee schedules of several Florida cities. Table II-10 presents this comparison.

Table II-10

Law Enforcement IF Schedule Comparison

III. Parks & Recreation Facilities

This section addresses the analysis used in developing the parks and recreation impact fee. Several elements addressed in the section include:

- Park Land and Recreation Facilities Inventory
- Service Area and Demand Component
- Level of Service
- Cost Component
- Credit Component
- Net Impact Cost
- Calculated Impact Fee Schedule
- Impact Fee Schedule Comparison

These elements are summarized throughout this section.

Park Land and Recreation Facilities Inventory

Based on information provided by the Village of Palm Springs, the Village's land and recreation facilities inventory utilized for impact fee purposes includes 11 parks totaling approximately 38 acres. The inventory excludes park land that is not owned by the Village's and parks that are operated by another entity and/or generate revenue. Table III-1 presents a summary of the inventory included in the parks and recreation facilities impact fee.

Table III-1

1) Source: Village of Palm Springs

Service Area and Demand Component

The Village-owned parks are utilized village-wide, and therefore, the village-wide service area and population are used in the calculation of parks and recreational facilities impact fee. Appendix A, Table A-1, provides the estimated population for 2021 and the projected population through 2045. Parks and recreation impact fees are charged only to residential land uses. As such, the permanent population per housing unit is used to measure demand from each residential land use, which is presented in Appendix A.

Level of Service

The current LOS for all Village of Palm Springs-owned and maintained parks is presented in Table III-2. To determine the current LOS, the total acreage of each park type is divided by the Village's population for 2021 and multiplied by 1,000. As shown, the current LOS for neighborhood parks is 0.68 acres per 1,000 residents while the adopted LOS standard is 0.50 acres per 1,000 residents. In the case of community parks, the achieved LOS is 0.91 acres per 1,000 residents while the adopted LOS standard is 1.50 acres per 1,000 residents. While the achieved LOS indicates the investment made by the community, the adopted LOS standard provides the intended/goal LOS. For impact fee calculation purposes, the lower of the two measures are used to ensure new development is not being charged at a level above what the existing community invested to date or intend to provide in the future. This approach results in the use of adopted LOS standard for neighborhood parks and the use of current LOS for the community parks, for a total of 1.41 acres per 1,000 residents.

Table III -2
Current Level of Service (2021)

Park Type Classification	Inventory (Acres)[1]	Current LOS[2]	Adopted LOS Standard[3]	LOS Used in Calculations[4]

5) Source: Appendix A, Table A-10 for permanent population

Table III-3 presents a comparison of the parks and recreation adopted LOS standards of other select Florida cities to the Village of Palm Springs' adopted LOS standard in terms of acreage per population. As shown, the Village's current LOS is in the lower end of the range of the adopted LOS standards of the other jurisdictions reviewed.

Cost Component

The capital cost associated with parks and recreation facilities consists of two components: the cost of recreational facilities located at each park and the cost of purchasing and developing land for each park. The following paragraphs address park land and recreation facility value estimates.

Land Cost

The park land value per acre for the Village's park inventory is calculated based on upcoming park land purchase cost estimates, value of current park land, vacant land sales of similar size parcels over the past four years, and value of similar size vacant parcels based on information obtained from the Palm Beach County Property Appraiser's database. This analysis resulted in an estimated average land value of $250,000 per acre as presented in Table III-4. Appendix B provides further detail regarding the calculation of the land value.

The cost of land for parks and recreation facilities includes more than just the purchase cost of the land. Landscaping, site improvement, and parking costs are also considered. These costs can vary greatly, depending on the type of park. Based on information provided by the Village and other Florida jurisdictions, the cost for landscaping, site preparation, and parking is estimated at $10,000 per acre. The total land cost of $260,000 per acre translates into land value of $367 per resident based on the LOS of 1.41 acres per 1,000 residents.

Table III -4

5) Total land cost per acre (Item 3) multiplied by total acres (Item 4) divided by 1,000

Recreational Facility Value

To estimate current recreational facility value, multiple sources were reviewed to determine the unit cost of each recreational facility type, including insured values of the facilities, recent cost information obtained for similar facilities from other jurisdictions and input from the Village of Palm Springs representatives.

In addition to the construction cost of recreational facilities, the architectural, engineering and inspection (AE&I) costs associated with developing this infrastructure are also included. The AE&I cost is estimated at 9 percent of the construction cost based on estimates obtained from the Village of Palm Springs. This percentage is also consistent with information obtained from other jurisdictions and industry standards.

As shown in Table III-5, the total recreational facility value for all parks is $4.5 million, which equates to an average of $120,000 per acre and $190 per resident.

.

Table III -5

Recreational Facility Value

Description	Unit	Unit Cost[1]	Inventory Count by Park Type[2]			Total Value by Park Type[3]		
			Neighborhood	Community	All	Neighborhood	Community	All

Credit Component

To avoid overcharging new development for the capital cost of providing parks and recreation services, a review of the capital funding program for the parks and recreation program was completed. The purpose of this review is to estimate any future revenues generated by new development, other than impact fees, which will be used to fund the expansion of capital facilities and land related to the Village of Palm Springs parks and recreation program. As mentioned previously, the credit component does not include any capital renovation, maintenance, or operations expenses, as these types of expenditures do not add capacity and should not be considered for impact fee credit.

Capital Expansion Credit

The capital expansion expenditure credit per resident was calculated based on non-impact fee revenue funding for capital expansion projects completed over the past five years as well as those programmed for the next five years. To calculate the capital expenditure per resident, the average annual capital expansion expenditures are divided by average population for the same period. As shown in Table III-6, the average annual expenditure over this five-year period amounts to approximately $403,000 and approximately $17 per resident per year.

Once the revenue credit per population is calculated, a credit adjustment was made for the portion of the revenue credit funded with ad valorem tax revenues. This adjustment accounts for the fact that new homes tend to pay higher property taxes per dwelling unit than older homes and was estimated based on a comparison of the average taxable value of newer homes to that of all homes.

10) Adjusted capital expansion expenditures per person (Item 8) plus the portion funded with other revenue sources (Item 9)

Debt Service Credit

Any outstanding bond issues related to parks and recreation also will result in a credit to the impact fee. The capital expansion portion of the remaining payments of debt service are divided by the population during the same period to determine the debt service credit per resident. Table III-7 presents these calculations for parks and recreation facilities.

Table III-7

Debt Service Credit

Description[1]	Funding Source[1]	Present Value of Payments Remaining[1]	Avg Annual Population During Remaining Bond Issue Period[2]	Credit per Resident[3]

Net Parks & Recreation Facilities Impact Cost

The net impact cost per resident is the difference between the cost and credit components. Table III-8 summarizes the calculation of the net impact cost for the parks and recreational facilities impact fee. As presented, the net impact cost amounts to approximately $226 per resident.

Table III-8

Net Impact Cost per Resident

Impact Cost / Credit Element	Per Permanent Resident
Impact Cost	
Total Land Value per Resident[1]	$366.60
Facilities and Equipment Value per Resident[2]	$190.98
Total Impact Cost per Resident	**$557.58**
Revenue Credit	
Capital Expansion Credit[3]:	
- Annual Expenditures	$17.19
Capitalization Rate	2.3%
Capitalization Period (in years)	25
Total Capital Expansion Credit[4]	$324.08
Total Debt Service Credit[5]	$7.79
Total Revenue Credit[6]	$331.87
Net Impact Cost	
Net Impact Cost[7]	**$225.71**

7) Total impact cost per resident less total revenue credit per resident (Item 6)

Calculated Parks & Recreation Facilities Impact Fee Schedule

Table III-9 presents the calculated parks and recreation facilities impact fee schedule for the Village of Palm Springs for residential land uses, based on the net impact cost per resident previously presented in Table III-8. Also presented in the table is a comparison to the Village's current adopted fee and percent change from the current fee. The Village's current impact fee charges all residential categories the same fee. The proposed methodology differentiates by residential category and tiers single family homes.

Table III-9

Calculated Parks and Recreation Facilities Impact Fee Schedule

Land Use	Impact Unit	Residents per Unit[1]	Net Cost per Resident[2]	Total Impact Fee[3]	Current Adopted Fee[4]	Percent Change[5]
Residential						
Single Family (detached/attached):						
- Less than 1,500 sf	du	2.92	$225.71	**$659**	$273	141%
- 1,500 to 2,499 sf	du	3.24	$225.71	**$731**	$273	168%
- 2,500 sf or more	du	3.63	$225.71	**$819**	$273	200%
Multi-Family (Apartment/Condo)	du	2.15	$225.71	**$485**	$273	78%
Mobile Home	du	2.58	$225.71	**$582**	$273	113%
Senior Adult Housing (Detached)	du	2.48	$225.71	**$560**	$273	105%
Senior Adult Housing (Attached)	du	1.64	$225.71	**$370**	$273	36%

Appendix A
Demand Component
Population: Supplemental Information

Appendix A: Population

Both impact fee programs included in this report require the use of population data in calculating current levels of service, performance standards, and demand and credit calculations. With this in mind, a consistent approach to developing population estimates and projections is an important component of the data compilation process.

In the case of parks and recreational facilities impact fee, permanent resident population was used to be consistent with the population measure used in establishing the Village's adopted LOS standards.

In the case of law enforcement, to accurately determine demand for services, not only the residents, or permanent population of the Village, but also the seasonal residents and visitors were considered. Seasonal residents include visitors and part-time residents, which are defined as living in Palm Springs for less than six months each year.

Table A-1 presents the Village of Palm Springs' population trends. The projections indicate that the current weighted seasonal population of the Village is approximately 24,400 and is estimated to increase to 29,300 (increase of 4,900) by 2045. Based on these estimates, the projected population growth rate averages 0.7% percent per year between 2020 and 2045.

3) Ratios developed based on national PPH data derived from the 2019 American Housing Survey
4) Population (Item 1) divided by housing units (Item 2). Single family residential tiers are adjusted by the ratios developed using the 2019 AHS data (Item 3).
5) Permanent population divided by housing units (Item 2)
6) Estimate for Senior Housing (Detached) is based on people per household figures for single-family homes, adjusted for the residents over 55 years of age based on information obtained from the 2017 National Household Travel Survey, prepared by the US Department of Transportation.
7) Estimate for Senior Housing (Attached) is based on people per household figures for multi-family homes, adjusted for the residents over 55 years of age based on information obtained from the 2017 National Household Travel Survey, prepared by the US Department of Transportation.
8) Estimate for congregate care facility is based on people per household figures for single and multi-family homes, adjusted for the residents over 55 years of age based on information obtained from the 2017 National Household Travel Survey, prepared by the US Department of Transportation.

Notes: Excludes boats, RVs, vans, etc.

Functional Population

Functional population, as used in the impact fee analysis, is a generally accepted methodology for several impact fee areas, including law enforcement services, and is based on the assumption that demand for certain facilities is generally proportional to the presence of people at a land use, including residents, employees, and visitors. It is not enough to simply add resident population to the number of employees, since the service demand characteristics can vary considerably by type of industry.

Functional population is the equivalent number of people occupying space within a community on a 24-hour-day, 7-days-a-week basis. A person living and working in the community will have the functional population coefficient of 1.0. A person living in the community but working elsewhere may spend only 16 hours per day in the community on weekdays and 24 hours per day on weekends for a functional population coefficient of 0.76 (128-hour presence divided by 168 hours in one week). A person commuting into the Village to work five days per week would have a functional population coefficient of 0.30 (50-hour presence divided by 168 hours in one week). Similarly, a person traveling into the community to shop at stores, perhaps averaging 8 hours per week, would have a functional population coefficient of 0.05.

Functional population thus tries to capture the presence of all people within the community, whether residents, workers, or visitors, to arrive at a total estimate of effective population needed to be served.

This form of adjusting population to help measure real facility needs replaces the population approach of merely weighting residents two-thirds and workers one-third (Nelson and Nicholas 1992)[1]. By estimating the functional and weighted population per unit of land use across all major land uses in a community, an estimate of the demand for certain facilities and services in the present and future years can be calculated. The following paragraphs explain how functional population is calculated for residential and non-residential land uses.

Residential Functional Population

Developing the residential component of functional population is simpler than developing the non-residential component. It is generally estimated that people spend one-half to three-fourths of their time at home and the rest of each 24-hour day away from their place of residence. In developing the residential component of the Village of Palm Springs' functional population, an analysis of the Village's population and employment characteristics was conducted. Tables A-3 and A-4 present this analysis for the Village. Based on this analysis, people in the Village, on average, spend 15.1 hours each day at their place of residence. This corresponds to approximately 63 percent of each 24-hour day at their place of residence and the remaining 37 percent away from home.

[1] Arthur C. Nelson and James C. Nicholas, "Estimating Functional Population for Facility Planning," *Journal of Urban Planning and Development* 118(2): 45-58 (1992)

Table A-3
Population & Employment Characteristics

Calculation Step	Figure
Total workers living in Village of Palm Springs[1]	11,015
Total Census Population (2010)[2]	18,928

Non-Residential Functional Population

Given the varying characteristics of non-residential land uses, developing the estimates of functional residents for non-residential land uses is more complicated than developing estimated functional residents for residential land uses. Nelson and Nicholas originally introduced a method for estimating functional resident population, which is now widely used in the industry. This method uses trip generation data from the Institute of Transportation Engineers' (ITE) Trip

Generation Manual and Tindale Oliver's Trip Characteristics Database, information of passengers per vehicle, workers per vehicle, length of time spent at the land use, and other variables.

Specific calculations include:

- Total one-way trips per employee (ITE trips multiplied by 50 percent to avoid double counting entering and exiting trips as two trips).
- Visitors per impact unit based on occupants per vehicle (trips multiplied by occupants per vehicle less employees).
- Worker hours per week per impact unit (such as nine worker-hours per day multiplied by five days in a work week).
- Visitor hours per week per impact unit (visitors multiplied by number of hours per day times relevant days in a week, such as five for offices and seven for retail shopping).
- Functional population coefficients per employee developed by estimating time spent by employees and visitors at each land use.

Table A-5

General Functional Population Coefficients

Population/ Employment Category	ITE LUC	Employee Hours In-Place[1]	Trips per Employee[2]	One-Way Trips per Employee[3]	Journey-to-Work Occupants per Trip[4]	Daily Occupants per Trip[5]	Visitors per Employee[6]	Visitor Hours per Trip[1]	Days per Week[7]	Functional Population Coefficient[8]

(1) Assumed

(2) Trips per employee represents all trips divided by the number of employees and is based on Trip Generation 10th Edition (Institute of Transportation Engineers 2017) as follows:

ITE Code 110 at 3.05 weekday trips per employee, Volume 2 - Industrial Land Uses, page 11

ITE Code 140 at 2.47 weekday trips per employee, Volume 2 - Industrial Land Uses, page 58

ITE Code 150 at 5.05 weekday trips per employee, Volume 2 - Industrial Land Uses, page 77

ITE Code 710 at 3.28 weekday trips per employee, Volume 2 Office Land Uses, page 12

ITE Code 730 at 7.45 weekday trips per employee, Volume 2 Office Land Uses, page 180

ITE Code 820 based on blended average of trips by retail center size calculated below, adapted from Volume 2 - Retail Land Uses, page 138.

Trips per retail employee from the following table:

Retail Scale	*Assumed Center Size*	*Trip Rate*	*Sq Ft per Employee[11]*	*Trips per Employee*	*Share*	*Weighted Trips*
Neighborhood <50k sq.ft.	50	75.05	802	60	45.0%	27.00
Community 50k-250k sq.ft.	250	44.84	975	44	35.0%	15.40
Regional 250k-500k sq.ft.	500	35.92	1,043	37	15.0%	5.55
Super Reg. 500k-1000k sq.ft.	1,000	28.78	676	19	5.0%	0.95
Sum of Weighted Trips/1k sq.ft.						48.90

(3) Trip per employee (Item 2) multiplied by 0.5.

(4) Journey-to-Work Occupants per Trip from 2001 Nationwide Household Travel Survey (FHWA 2001) as follows:

1.32 occupants per Construction, Manufacturing, TCU, and Wholesale trip

1.24 occupants per Retail Trade, FIRE, and Services trip

(5) Daily Occupants per Trip from 2001 Nationwide Household Travel Survey (FHWA 2001) as follows:

1.38 occupants per Construction, Manufacturing, TCU, and Wholesale trip

1.73 occupants per Retail Trade, FIRE, and Services trip

(6) [Daily occupants per trip (Item 5) multiplied by one-way trips per employee (Item 3)] - [(Journey-to-Work occupants per trip (Item 4) multiplied by one-way trips per employee (Item 3)]

(7) Typical number of days per week that indicated industries provide services and relevant government services are available.

(8) Table A-7 for residential and the equation below to determine the Functional Population Coefficient per Employee for all land-use categories except residential includes the following:

$$\frac{(\text{Days per Week} \times \text{Employee Hours in Place}) + (\text{Visitors per Employee} \times \text{Visitor Hours per Trip} \times \text{Days per Week})}{(24 \text{ Hours per Day} \times 7 \text{ Days per Week})}$$

(9) Trips per employee for the services category is the average trips per employee for the following service related land use categories: quality restaurant, high-turnover restaurant, supermarket, hotel, motel, elementary school, middle school, high school, hospital, medical office, and church. Source for the trips per employee figure from ITE, 10th ed., when available, or else derived from the square feet per employee for the appropriate land use category from the Energy Information Administration from Table B-1 of the Commercial Energy Building Survey, 2003.

(10) Includes Federal Civilian Government, Federal Military Government, and State and Local Government categories.

(11) Square feet per retail employee from the Energy Information Administration from Table B-1 of the Commercial Energy Building Survey, 2003

Table A-6

Village Functional Population (2021)

Population Category	Village of Palm Springs Baseline Data[1]	Functional Resident Coefficient[2]	Functional Population[3]
2021 Weighted Population	24,435	0.629	15,370
Employment Category

Functional Residents by Specific Land Use Category

When a wide range of land uses impact services, an estimate of that impact is needed for each land use. This section presents functional population coefficient estimates by residential and non-residential land uses.

Residential and Transient Land Uses

As mentioned previously, different functional population coefficients need to be developed for each impact fee service area to be analyzed. For residential and transient land uses, these coefficients are displayed in Table A-8. The average number of persons per housing unit was calculated for single family homes by size of home, multi-family, and mobile home land uses separately. Besides the residential land uses, Table A-8 also includes transient land uses, such as hotels, motels, congregate care facilities (CCF), assisted living facilities and nursing homes. Secondary sources, such as Palm Beach County Tourist Development Council and the Florida Department of Elderly Affairs, are used to determine the occupancy rate for hotels, motels, CCF, assisted living and nursing homes.

Non-Residential Land Uses

A similar approach is used to estimate functional residents for non-residential land uses. Table A-9 presents basic assumptions and calculations, such as trips per unit, trips per employee, employees per impact unit, one-way trips per impact unit, worker hours, occupants per vehicle trip, visitors (patrons, etc.) per impact unit, visitor hours per trip, and days per week for non-residential land uses. The final column in the table shows the estimated functional resident coefficients by land use. These coefficients by land use measure the demand component for several impact fee programs and will be used in the calculation of the impact fee per unit for each land use category in the related impact fee schedules.

Table A-8

Functional Population for Residential and Transient Land Uses

Residential Land Use	Impact Unit	ITE LUC[1]	Residents/ Visitors Per Unit[2]	Occupancy Rate[3]	Adjusted Residents Per Unit[4]	Visitor Hours at Place[5]	Workers Per Unit[6]	Work Day Hours[7]	Days Per Week[8]	Work Week Residents Per Unit[9]
Residential:										
Single Family (detached):										
- Less than 1,500 sf	du	210	3.01	-	-	-	-	-	-	1.89
- 1,500 to 2,499 sf	du	210	3.34	-	-	-	-	-	-	2.10
- 2,500 sf and greater	du	210	3.74	-	-	-	-	-	-	2.35
Multi-Family (Apartment/Condominium/Townhouse)	du	220/221/222	2.21	-	-	-	-	-	-	1.39
Mobile Home	du	240	2.66							1.67
Senior Adult Housing (Detached)	du	251	2.55	-	-	-	-	-	-	1.60
Senior Adult Housing (Attached)	du	252	1.69	-	-	-	-	-	-	1.06
Transient, Assisted, Group:										
Congregate Care Facility/Continuing Care Retirement Center	du	253/255	2.03	84%	1.71	16	0.51	9	7	1.33
Assisted Living	bed	254	1.00	84%	0.84	20	0.61	9	7	0.93
Hotel	room	310	2.10	73%	1.53	12	0.58	9	7	0.98
Motel	room	320	2.10	73%	1.53	12	0.13	9	7	0.81
Nursing Home	bed	620	1.00	84%	0.84	20	1.05	9	7	1.09

(1) Land use code from the Institute of Transportation Engineers (ITE) Trip Generation Handbook, 10th Edition

(2) Estimates for the residential and congregate care facility/continuing care retirement center land use from Table A-2; estimates for the hotel and motel land use is based on data obtained from Palm Beach County Tourist Development Council; and the estimate used for assisted living/ nursing home land use is based on 1 person per bed.

(3) Source for hotel/motel occupancy: Palm Beach County Tourist Development Council. Average hotel/motel occupancy rate for 2014 through 2016. Source for nursing home occupancy rate is the Florida Department of Elderly Affairs, Palm Beach County Profile. Average occupancy rate for 2016 through 2018.

(4) Residents per unit times occupancy rate (Item 3)

(5), (7), (8) Estimated

(6) Adapted from ITE Trip Generation Handbook, 10th Edition

(9) For residential this is Residents Per Unit times 0.628. For Transient, Assisted, and Group it is:

$$\frac{[(\text{Adjusted Residents per Unit} \times \text{Hours at Place} \times \text{Days per Week}) + (\text{Workers Per Unit} \times \text{Work Hours Per Day} \times \text{Days per Week})]}{(24 \text{ Hours per Day} \times 7 \text{ Days per Week})}$$

2045	28,403	856	29,259

1) Source: U.S. Census and the Bureau of Economic and Business Research (BEBR).

2) Seasonal population is estimated by multiplying permanent population (Item 1) by the ratio of seasonal to permanent population from the 2000 U.S. Census for years 2001-2009 and the 2010 U.S. Census for years 2011-2045. The figures are weighed by 0.42 to account for seasonal residents only residing in the Village for a portion of the year (assume 5 months; 5 months divided by 12 months = 0.42).
3) Sum of permanent population (Item 1) and seasonal population (Item 2)

Appendix B
Cost Component
Building and Land Values:
Supplemental Information

Appendix B: Building and Land Values

This Appendix provides a summary of building and land value estimates for law enforcement and parks and recreation impact fees.

Building Values

To estimate building and recreational facility value, the following information was reviewed:

- Recent construction by the Village of Palm Springs, if any;
- Cost estimates for future facilities, if any;
- Insurance values of existing facilities;
- Data from other jurisdictions; and
- Discussions with the representatives from the Village.

The following paragraphs provide a summary for each service area**.**

Law Enforcement

As part of the cost estimate for the police station the following was considered:

- The Village is considering expanding the existing police station. The construction cost estimate for the expansion portion is $275 per square foot. When soft costs are added, this estimated increases to $360 per square foot.
- The insured value of the existing police station is $226 per square foot. Insurance values tend to be conservative estimates because insurance companies exclude the value of the foundation and other more permanent parts of the structure when determining insurance values since they would not have to be rebuilt if the structure was damaged or lost.
- Station cost data from other jurisdictions ranged from $200 per square foot to $350 per square foot.

Given this information a building value of $300 per square foot is used for the police station.

Recreational Facilities

Similar to law enforcement facilities, recreational facility values are based on the following:

- Construction cost of recently built facilities, if any;
- Insurance values of existing facilities;

- Facility values obtained from other jurisdictions; and
- Input from the Village representatives.

The resulting estimates are presented in Table III-5, earlier in this report.

Land Values

For both impact fee program areas, land values were determined based on the following analysis, as data available:

- Recent land purchases or appraisals/estimates for upcoming purchases for the related infrastructure (if any);
- Land value of current inventory as reported by the Palm Beach County Property Appraiser;
- Value of vacant land by size and by land use;
- Vacant land sales between 2017 and 2020 by size and by land use; and
- Discussions with the Village representatives.

<u>Law Enforcement</u>

The land value estimate for law enforcement facilities is based on the following:

- The Village of Palm Springs has not purchased any land for law enforcement facilities over the past five years.
- The Village is considering buying a parcel near the Municipal Complex to be used both as a park and potentially for the expansion of the police station. Estimated cost of this purchase is approximately $254,000 per acre.
- The value of the parcel where the current police station is located is $62,500 per acre. Property Appraiser land value estimates for governmental entities tend to be on the low end since these properties are not subject to property tax and the values are not always updated to reflect the market conditions.
- Vacant land sales of similarly sized parcels (between 0.05 acre and 5 acres) between 2017 and 2020 averaged $254,000 per acre with a median value of $229,000 per acre for all vacant land use types. These prices were higher for commercial properties, with an average of $298,000 per acre and a median value of $270,000 per acre.
- Similarly, the value of vacant land reported by the Property Appraiser averaged $294,000 per acre with a median value of $261,000 per acre for all vacant properties with 0.5 acres to 5 acres. For commercial properties, the average value is estimated at $379,000 per acre with a median value of $492,000 per acre.

Given this information, an average land value of **$250,000 per acre** is determined to be a reasonable estimate for law enforcement impact fee calculation purposes.

Parks

The park land value estimate is based on the following:

- The Village has not purchased any park land over the past five years; however, the Village is considering purchasing a parcel to expand the park area adjacent to the Municipal Complex. The estimated cost of this purchase is approximately $254,000 per acre.
- The value of parcels where current parks are located averages $114,000 per acre with a range of $62,000 per acre to $418,000 per acre. As mentioned previously, Property Appraiser land value estimates for governmental entities tend to be on the low end since these properties are not subject to property tax and the values are not always updated to reflect the market conditions.
- Vacant land sales of similarly sized parcels (between 0.05 acre and 5 acres) between 2017 and 2020 averaged $254,000 per acre with a median value of $229,000 per acre for all vacant land use types. Because there tends to be more flexibility in terms of location for parks, residential land values were also reviewed. Vacant residential land sales averaged $216,000 per acre with a median value of $218,000 per acre. There were no sales of any parcels larger than 5 acres over the past three years.
- The value of vacant land reported by the Property Appraiser averaged $257,000 per acre with a median value of $254,000 per acre for all vacant properties with 0.05 acre to 10 acres. For residential properties, the average value is estimated at $173,000 per acre with a median value of $183,000 per acre.

Given this information, an average land value of **$250,000 per acre** is determined to be a reasonable estimate for parks and recreational facilities impact fee calculation purposes.

A bill to be entitled

An act relating to impact fees; amending s. 163.31801, F.S.; defining the terms "infrastructure" and "public facilities"; requiring local governments and special districts to credit against the collection of impact fees any contribution related to public facilities or infrastructure; providing conditions under which credits may not be applied; providing limitations on impact fee increases; providing for retroactive operation; requiring specified entities to submit an affidavit attesting that impact fees were appropriately collected and expended; providing that impact fee credits are assignable and transferable regardless of when they the credits were established; requiring school districts to report specified information regarding impact fees; providing a directive to the Division of Law Revision; providing an effective date.

Be It Enacted by the Legislature of the State of Florida:

Section 1. Section 163.31801, Florida Statutes, is amended to read:

163.31801 Impact fees; short title; intent; minimum requirements; audits; challenges.—

(1) This section may be cited as the "Florida Impact Fee Act."

(2) The Legislature finds that impact fees are an important source of revenue for a local government to use in funding the infrastructure necessitated by new growth. The Legislature further finds that impact fees are an outgrowth of the home rule power of a local government to provide certain services within its jurisdiction. Due to the growth of impact fee collections and local governments' reliance on impact fees, it is the intent of the Legislature to ensure that, when a county or municipality adopts an impact fee by ordinance or a special district adopts an impact fee by resolution, the governing authority complies with this section.

(3) For purposes of this section, the term:

(a) "Infrastructure" means a fixed capital expenditure or fixed capital outlay, excluding the cost of repairs or maintenance, associated with the construction, reconstruction, or improvement of public facilities that have a life expectancy of at least 5 years; related land acquisition, land improvement, design, engineering, and permitting costs; and other related construction costs required to bring the public facility into service. The term also includes a fire department vehicle, an emergency medical service vehicle, a sheriff's office vehicle, a police department vehicle, a school bus as defined in s. 1006.25, and the equipment necessary to outfit the vehicle or

bus for its official use. For independent special fire control districts, the term includes new facilities as defined in s. 191.009(4).

(b) "Public facilities" has the same meaning as in s. 163.3164 and includes emergency medical, fire, and law enforcement facilities.

(4)~~(3)~~ At a minimum, each local government that adopts and collects an impact fee by ordinance and each special district that adopts, collects, and administers an impact fee by resolution must ~~an impact fee adopted by ordinance of a county or municipality or by resolution of a special district must satisfy all of the following conditions~~:

(a) Ensure that the calculation of the impact fee is ~~must be~~ based on the most recent and localized data.

(b) ~~The local government must~~ Provide for accounting and reporting of impact fee collections and expenditures and~~. If a local governmental entity imposes an impact fee to address its infrastructure needs, the entity must~~ account for the revenues and expenditures of such impact fee in a separate accounting fund.

(c) Limit administrative charges for the collection of impact fees ~~must be limited~~ to actual costs.

(d) ~~The local government must~~ Provide notice at least ~~not less than~~ 90 days before the effective date of an ordinance or resolution imposing a new or increased impact fee. A local

government ~~county or municipality~~ is not required to wait 90 days to decrease, suspend, or eliminate an impact fee. Unless the result is to reduce the total mitigation costs or impact fees imposed on an applicant, new or increased impact fees may not apply to current or pending permit applications submitted before the effective date of ~~an ordinance or resolution imposing~~ a new or increased impact fee.

(e) Ensure that collection of the impact fee may not be required to occur earlier than the date of issuance of the building permit for the property that is subject to the fee.

(f) Ensure that the impact fee is ~~must be~~ proportional and reasonably connected to, or has ~~have~~ a rational nexus with, the need for additional capital facilities and the increased impact generated by the new residential or commercial construction.

(g) Ensure that the impact fee is ~~must be~~ proportional and reasonably connected to, or has ~~have~~ a rational nexus with, the expenditures of the funds collected and the benefits accruing to the new residential or nonresidential construction.

(h) ~~The local government must~~ Specifically earmark funds collected under the impact fee for use in acquiring, constructing, or improving capital facilities to benefit new users.

(i) Ensure that revenues generated by the impact fee are ~~may~~ not ~~be~~ used, in whole or in part, to pay existing debt or for previously approved projects unless the expenditure is

reasonably connected to, or has a rational nexus with, the increased impact generated by the new residential or nonresidential construction.

(5)(a) ~~(4)~~ Notwithstanding any charter provision, comprehensive plan policy, ordinance, development order, development permit, or resolution, the local government or special district must credit against the collection of the impact fee any contribution, whether identified in a proportionate share agreement or other form of exaction, related to public ~~education~~ facilities or infrastructure, including land dedication, site planning and design, or construction. Any contribution must be applied on a dollar-for-dollar basis at fair market value to reduce any ~~education-based~~ impact fee collected for the general category or class of public facilities or infrastructure for which the contribution was made ~~fees on a dollar-for-dollar basis at fair market value~~.

(b) If a local government or special district does not charge and collect an impact fee for the general category or class of public facilities or infrastructure contributed, a credit may not be applied under paragraph (a).

(6) ~~(5)~~ A local government, school district, or special district may increase an impact fee only as provided in this subsection.

(a) An impact fee may be increased only pursuant to a plan for the imposition, collection, and use of the increased impact

fees which complies with this section.

(b) An increase to a current impact fee rate of not more than 25 percent of the current rate must be implemented in two equal annual increments beginning with the date on which the increased fee is adopted.

(c) An increase to a current impact fee rate which exceeds 25 percent but is not more than 50 percent of the current rate must be implemented in four equal installments beginning with the date the increased fee is adopted.

(d) An impact fee increase may not exceed 50 percent of the current impact fee rate.

(e) An impact fee may not be increased more than once every 4 years.

(f) An impact fee may not be increased retroactively for a previous or current fiscal or calendar year.

(g) A local government, school district, or special district may increase an impact fee rate beyond the phase-in limitations established under paragraph (b), paragraph (c), paragraph (d), or paragraph (e) by establishing the need for such increase in full compliance with the requirements of subsection (4), provided the following criteria are met:

1. A demonstrated need study justifying any increase in excess of those authorized in paragraph (b), paragraph (c), paragraph (d), or paragraph (e) has been completed within the 12 months before the adoption of the impact fee increase and

expressly demonstrates the extraordinary circumstances necessitating the need to exceed the phase-in limitations.

2. The local government jurisdiction has held not less than two publicly noticed workshops dedicated to the extraordinary circumstances necessitating the need to exceed the phase-in limitations set forth in paragraph (b), paragraph (c), paragraph (d), or paragraph (e).

3. The impact fee increase ordinance is approved by at least a two-thirds vote of the governing body.

(h) This subsection operates retroactively to January 1, 2021.

(7) If an impact fee is increased ~~a local government increases its impact fee rates~~, the holder of any impact fee credits, whether such credits are granted under s. 163.3180, s. 380.06, or otherwise, which were in existence before the increase, is entitled to the full benefit of the intensity or density prepaid by the credit balance as of the date it was first established. ~~This subsection shall operate prospectively and not retrospectively.~~

(8)~~(6)~~ A local government, school district, or special district must submit with its annual financial report required under s. 218.32 or its financial audit report required under s. 218.39 a separate affidavit signed by its chief financial officer or, if there is no chief financial officer, its executive officer attesting, to the best of his or her

knowledge, that all impact fees were collected and expended by the local government, school district, or special district, or were collected and expended on its behalf, in full compliance with the spending period provision in the local ordinance or resolution, and that funds expended from each impact fee account were used only to acquire, construct, or improve specific infrastructure needs ~~Audits of financial statements of local governmental entities and district school boards which are performed by a certified public accountant pursuant to s. 218.39 and submitted to the Auditor General must include an affidavit signed by the chief financial officer of the local governmental entity or district school board stating that the local governmental entity or district school board has complied with this section~~.

(9) ~~(7)~~ In any action challenging an impact fee or the government's failure to provide required dollar-for-dollar credits for the payment of impact fees as provided in s. 163.3180(6)(h)2.b., the government has the burden of proving by a preponderance of the evidence that the imposition or amount of the fee or credit meets the requirements of state legal precedent and this section. The court may not use a deferential standard for the benefit of the government.

(10) ~~(8)~~ Impact fee credits are assignable and transferable at any time after establishment from one development or parcel to any other that is within the same impact fee zone or impact

fee district or that is within an adjoining impact fee zone or impact fee district within the same local government jurisdiction and which receives benefits from the improvement or contribution that generated the credits. This subsection applies to all impact fee credits regardless of whether the credits were established before or after the effective date of this act.

(11) ~~(9)~~ A county, municipality, or special district may provide an exception or waiver for an impact fee for the development or construction of housing that is affordable, as defined in s. 420.9071. If a county, municipality, or special district provides such an exception or waiver, it is not required to use any revenues to offset the impact.

(12) ~~(10)~~ This section does not apply to water and sewer connection fees.

(13) ~~(11)~~ In addition to the items that must be reported in the annual financial reports under s. 218.32, a local government, school district ~~county, municipality~~, or special district must report all of the following information ~~data~~ on all impact fees charged:

(a) The specific purpose of the impact fee, including the specific infrastructure needs to be met, including, but not limited to, transportation, parks, water, sewer, and schools.

(b) The impact fee schedule policy describing the method of calculating impact fees, such as flat fees, tiered scales based on number of bedrooms, or tiered scales based on square

footage.

(c) The amount assessed for each purpose and for each type of dwelling.

(d) The total amount of impact fees charged by type of dwelling.

(e) Each exception and waiver provided for construction or development of housing that is affordable.

Section 2. The Division of Law Revision is directed to replace the phrase "the effective date of this act" wherever it occurs in this act with the date the act becomes a law.

Section 3. This act shall take effect upon becoming a law.

NOTICE OF PROPOSED IMPACT FEE WORKSHOPS

In accordance with Section 163.31801, Florida Statutes, the Village Council of the Village of Palm Springs, Florida hereby provides notice of two (2) scheduled workshops to discuss the extent to which extraordinary circumstances necessitate and justify the need for proposed impact fees to fund Law Enforcement and Parks & Recreation improvements necessitated by growth and development.

Public Workshops will be held in the Council Chambers at Village Hall, 226 Cypress Lane, Palm Springs, Florida, on the following dates:

Village Council, Thursday, May 13, 2021, at 6:30 PM
Village Council, Thursday, June 10, 2021 at 6:30 PM

The impact fee study may be inspected at the Office of the Village Clerk during business hours, Monday through Friday between 8:30 a.m. and 4:30 p.m. All interested parties may appear at the meeting and be heard with respect to the proposed ordinance at the public hearing.

If a person decides to appeal any decision made by the above Village Council with respect to any matter considered at such hearing, he or she will need a record of the proceedings, and for such purpose may need to ensure that a verbatim record of the proceeding is made, which record includes the testimony and evidence upon which the appeal is to be based. Persons who need an accommodation to attend or participate in this meeting should contact the Village Clerk at (561) 965-4010 at least three (3) days prior to the meeting to request such assistance.

Kimberly Wynn, Village Clerk

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Administration

ITEM 10.1: Presentation - Transportation / Mobility Study

SUMMARY: Mr. Ed Ng, Eric Czerniejewski and Mark Alvarez from The Corradino Group will present their progress on the Village's Transportation/Mobility Study, and seek Village Council input on potential solutions to identified issues and potential policy directives for future action.

FISCAL IMPACT:
Recommendations from the Transportation/Mobility Study might be included as capital projects in future fiscal years' CIP Budget and/or General Operating Budget.

ATTACHMENTS:
Transportation / Mobility Plan Update - The Corradino Group

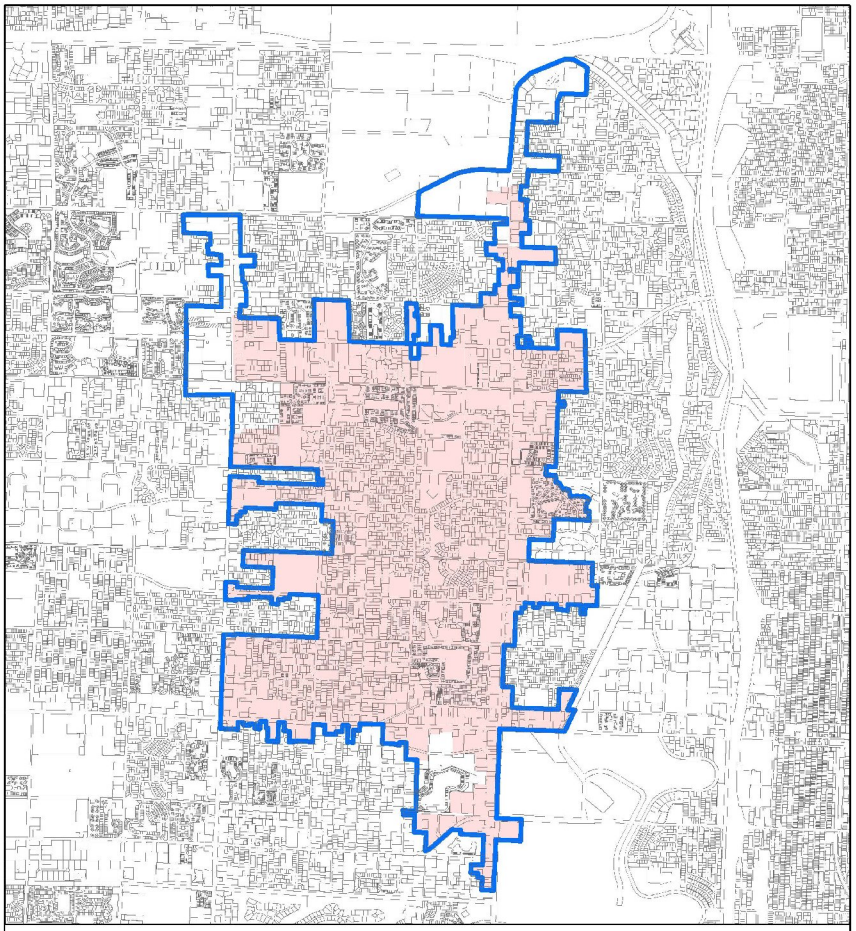
Village of Palm Springs Transportation/Mobility Master Plan

- Presentation to Village Council

May 13, 2021

Agenda

- Introduction
- Scope and Schedule
- Analysis/Potential solutions and policy needs
- Project Prioritization Criteria
- Questions and answer, discussion



Study Objectives

- Review current traffic issues, including vehicular travel, and roadway configurations and develop recommendations for improvement while taking into consideration future planned development opportunities.
- Review bicycle and pedestrian facilities and develop policy and project recommendations to improve accessibility to businesses, residential, public/civic facilities, and effect first and last mile connections to Palm Tran.
- Establish basis for local transit needs.
- Establish an overall mobility plan for the Village with projects developed by category:
  - Roadway
  - Bicycle
  - Pedestrian
  - Transit
  - Policy

Study Area

- Village of Palm Springs
- Additional areas within the Village's Future Annexation Area

Project Tasks and Projected Timeline

Roadway Assessment

z

- **Traffic Data Collection-** Palm Beach County Traffic Engineering Division and FDOT published recent traffic counts used. Additional intersection turning movement counts and speed/volume tube counts collected.
- **Traffic Operational Analysis** was completed at 31 key intersections for the AM and PM peak hours for 2020 existing and 2030 future conditions.
- **Road Segment Link Analysis** was completed at 22 north-south and 19 east-west roadways for the 2020 existing and 2030 future conditions.
- **Speed Evaluation** was completed for nine roadway corridor segments
- **Safety Review/Evaluation** was completed for the 22 north-south and 19 east-west roadways

Vehicular Traffic

Summary of results

- 6 roadways segments will fail to meet adopted Level of Service in the future (2030)
- 17 of 34 Intersections will fail to meet acceptable levels of service by 2030
- Evaluated 9 locations for speeding concerns – 8 locations have speeding issues
- Evaluation of crash locations

Vehicular Traffic

- Military Trail- Southern Boulevard to Forest Hill Boulevard- LOS E in 2030
- Congress Avenue- 10th Avenue to Lake Worth Road- LOS E in 2030
- Forest Hill Boulevard- Kirk Road to Congress Avenue- LOS E in 2030
- Forest Hill Boulevard- Congress Avenue to I-95- LOS E in 2020 and LOS F in 2030
- 10th Avenue- Kirk Road to Congress Avenue- LOS E in 2020 and LOS F in 2030
- Melaleuca Lane- Congress Avenue to I-95- LOS E in 2020 and LOS F in 2030

Vehicular Traffic (Intersections)

- Military Trail and Gun Club Road- LOS F in 2020 and in 2030 AM;
- Kirk Road and Gun Club Road- LOS E in 2020 and LOS F in 2030 AM; LOS E in 2030 PM
- Military Trail and Summit Boulevard- LOS E in 2030 AM; LOS E in 2020 PM and LOS F in 2030 PM
- Kirk Road and Summit Boulevard- LOS E in 2030 PM;
- Congress Avenue and Summit Boulevard- LOS F in 2020 and in 2030 AM; LOS E in 2020 and LOS F in 2030 PM;
- Military Trail and Forest Hill Boulevard- LOS E in 2020 and in 2030 AM; LOS F in 2020 and in 2030 PM;
- Kirk Road and Forest Hill Boulevard- LOS E in 2020 and in 2030 AM; LOS F in 2020 and in 2030 PM;
- Congress Avenue and Forest Hill Boulevard- LOS F in 2020 and in 2030 AM; LOS F in 2020 and in 2030 PM;
- Florida Mango Road and Forest Hill Boulevard- LOS E in 2020 and in 2030 AM; LOS E in 2020 and in 2030 PM;
- Military Trail and Alemeda Drive- LOS E in 2020 and in 2030 PM;
- Military Trail and 10th Avenue- LOS E in 2020 and in 2030 AM; LOS F in 2020 and in 2030 PM;
- Congress Avenue and 10th Avenue- LOS E in 2030 AM; LOS E in 2020 and LOS F in 2030 PM;
- Florida Mango Road and 10th Avenue- LOS F in 2020 and in 2030 PM;
- Military Trail and Lake Worth Road- LOS F in 2020 and in 2030 AM; LOS F in 2020 and in 2030 PM;
- Congress Avenue and Lake Worth Road- LOS E in 2020 and LOS F in 2030 AM; LOS F in 2020 and in 2030 PM;
- Military Trail and Melaleuca Lane- LOS E in 2020 and in 2030 AM; LOS F in 2020 and in 2030 PM; Kirk Road and Melaleuca Lane- LOS F in 2030 PM;
- Congress Avenue and Melaleuca Lane- LOS F in 2020 and 2030 AM; LOS F in 2020 and in 2030 PM;

Areas of Speeding Concern

z

- 10th Avenue N between Kirk Road and S. Congress Avenue (4 mph over posted speed limit)
- S. Congress Avenue between Forest Hill Boulevard and Summit Boulevard (8 to 11 mph over posted speed limit)
- Dolan Road between S. Congress Avenue and Kirk Road (11 to 19 mph over posted speed limit)
- Davis Road between Greenbrier Drive and 10th Avenue N (6 to 11 mph over the posted speed limit)
- Lake Worth Road between Kirk Road and S. Congress Avenue (6 to 8 mph over the posted speed limit)
- Lillian Road between S. Congress Avenue and Davis Road (10 to 13 mph over the posted speed limit)
- Lorene Drive (8 to 10 mph over the posted speed limit)

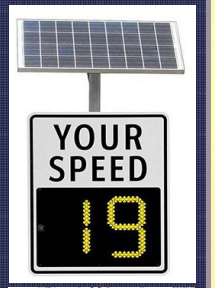
Overall Road Segment Crash Rankings

- Alemeda Drive- Military Trail to Congress Avenue: 27.42 Crash Rate
- Gun Club Road- Military Trail to Kirk Road: 15.31 Crash Rate
- Summit Blvd.- Military Trail to Kirk Road: 15.19 Crash Rate
- Kirk Road- 10th Avenue to Lake Worth Road: 13.80 Crash Rate
- Kirk Road- Lake Worth Road to Melaleuca Lane: 12.75 Crash Rate
- Kirk Road- Summit Blvd. to Forest Hill Blvd.: 12.71 Crash Rate
- Summit Blvd.- Between Congress Avenue to Florida Mango Rd: 12.47 Crash Rate
- Kirk Road- Forest Hill Blvd. to Greenbrier Drive: 11.41 Crash Rate
- Davis Road- Summit Blvd. to Alemeda Drive: 10.40 Crash Rate
- Congress Avenue- 10th Avenue to Lake Worth Road: 9.83 Crash Rate

Overall Road Segment- Fatalities

- Military Trail- Southern Blvd. to Forest Hill Blvd- 8 fatalities
- Lake Worth Road- Military Trail to Davis Road- 5 fatalities
- Military Trail- Forest Hill Blvd to 10th Avenue- 5 fatalities
- Forest Hill Blvd.- Between Congress Road to I-95- 4 fatalities
- Forest Hill Blvd.- Military Trail to Congress Road- 3 fatalities
- Melaleuca Lane- Congress Avenue to I-95- 3 fatalities

Overall Road Segment- Bicycle and Pedestrian Crashes



- Military Trail- Southern Blvd. to Forest Hill Blvd- 28 bike and pedestrian crashes
- Lake Worth Road- Military Trail to Davis Road- 26 bike and pedestrian crashes
- Congress Avenue- 10th Avenue to Lake Worth Road- 25 bike and pedestrian crashes
- Military Trail- Forest Hill Blvd to 10th Avenue- 24 bike and pedestrian crashes
- Forest Hill Blvd.- Military Trail to Congress Road- 20 bike and pedestrian crashes
- Lake Worth Road- Congress Avenue to I-95- 15 bike and pedestrian crashes
- Melaleuca Lane- Military Trail to Davis Road- 14 bike and pedestrian crashes
- Congress Avenue- Forest Hill Blvd. to 10th Avenue- 13 bike and pedestrian crashes
- Forest Hill Blvd.- Between Congress Road to I-95- 13 bike and pedestrian crashes
- 10th Avenue- Military Trail to Davis Road- 13 bike and pedestrian crashes

Traffic Operational Improvements- Intersections

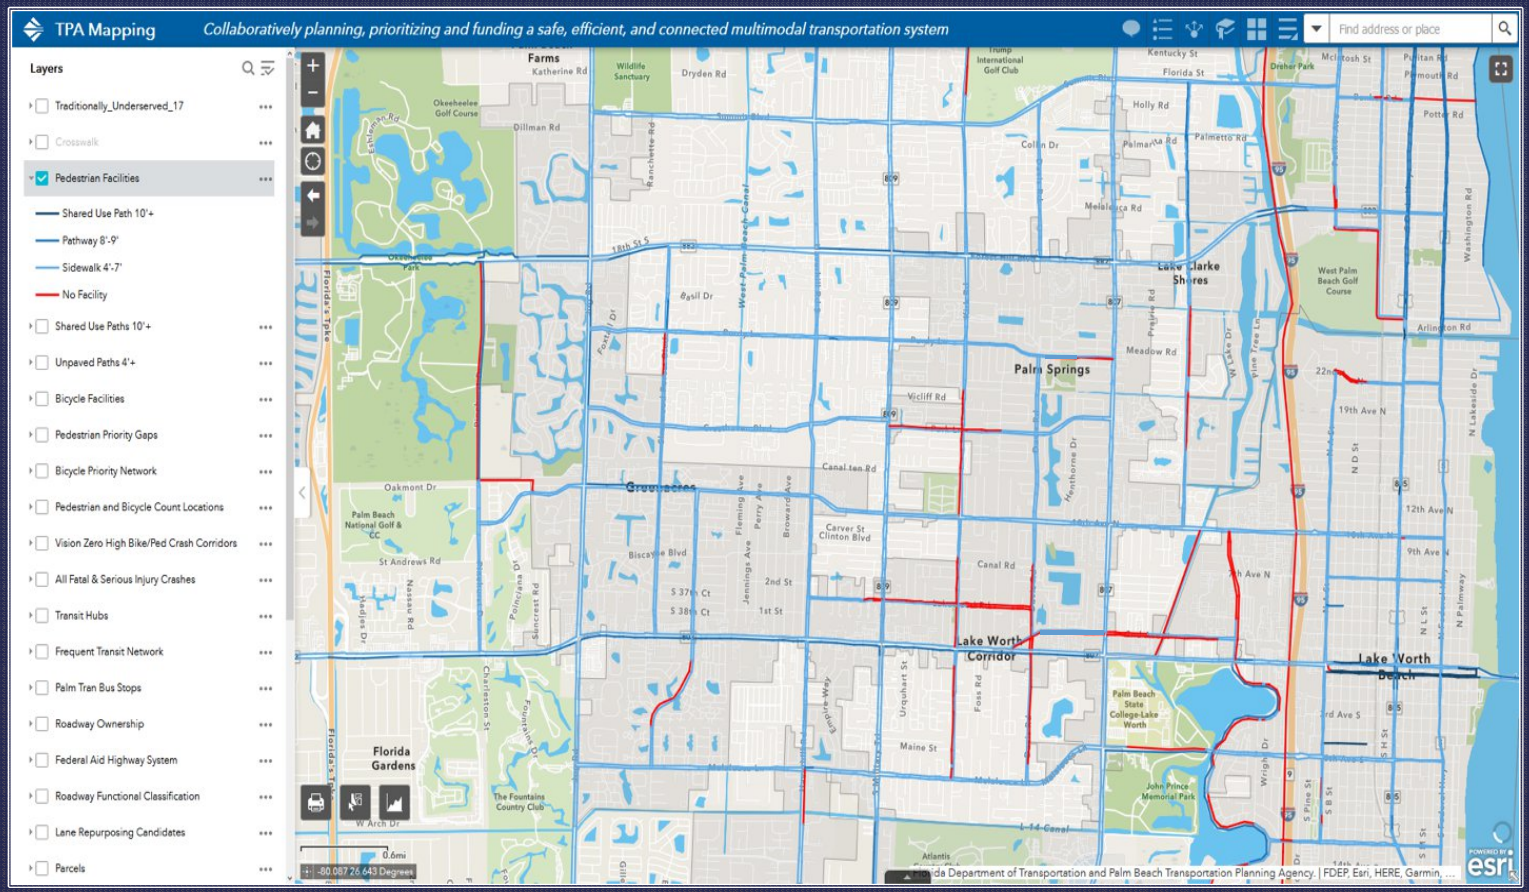
Traffic Operational Improvements- Intersections			
Number	Intersection Name	Peak Period	Scope of Mitigation Improvements
1	Military Trail and Gun Club Road	AM	Addition of dual eastbound and westbound left turn lanes; addition of eastbound right turn lane; addition of northbound right turn lane; traffic signal timing optimization
2	Kirk Road and Gun Club Road	AM	Addition of eastbound right turn lane; traffic signal timing optimization
3	Congress Avenue and Summit Blvd	Both	Addition of eastbound and westbound dual left turn lanes; traffic signal optimization
4	Congress Avenue and Forest Hill Blvd	Both	Addition of northbound, eastbound and westbound right turn lanes; traffic signal timing optimization
5	Military Trail and Lake Worth Road	Both	Addition of a southbound and eastbound righ turn lane; traffic signal optimization
6	Congress Avenue and Lake Worth Road	Both	Addition of a dual southbound left turn lane; traffic signal optimization
7	Congress Avenue and Melaleuca Lane	Both	Addition of eastbound and westbound through lanes; addition of a southbound through lane; traffic signal timing optimization
8	Military Trail and Summit Blvd	PM	Addition of dual northbound and southbound left turn lanes; traffic signal timing optimization
9	Military Trail and Forest Hill Blvd	PM	Addition of northbound /southbound dual left turn lanes; addition of a northbound and southbound right turn lanes; traffic signal optimization
10	Kirk Road and Forest Hill Blvd	PM	Addition of dual eastbound/westbound left turn lanes; addition of eastbound/westbound right turn lanes; traffic signal timing
11	Military Trail and 10th Avenue	PM	Addition of northbound, eastbound and westbound right turn lanes; traffic signal timing optimization
12	Congress Avenue and 10th Avenue	PM	Addition of northbound right turn lane; traffic signal timing optimization
13	Florida Mango Road and 10th Avenue	PM	Addition of dual eastbound and westbound left turn lanes; traffic signal timing optimization
14	Kirk Road and Melaleuca Lane	PM	Addition of eastbound right turn lane; traffic signal timing optimization
15	Kirk Road and Lakewood Road	Both	Conversion from traffic signal to Roundabout if feasible
16	Davis Road and 2nd Avenue North	Both	Conversion of all way stop to Roundabout if feasible

Traffic Calming Improvements- Road Segments/Intersections

Traffic Calming Improvements- Road Segments/Intersections			
Number	Road Segment/Intersection Name	Year	Scope of Mitigation Improvements
1	10th Avenue- Between Kirk Road and Congress Avenue	2020	Installation of speed radar signs pending traffic study approval
2	Congress Avenue- Between Forest Hill Blvd and Summit Blvd	2020	Installation of speed radar signs pending traffic study approval
3	Alemeda Drive- Between S. Congress and Kirk Road	2020	Evaluate a neighborhood traffic circle at Davis Road and Alemeda Drive; Evaluate speed tables along Alemeda Drive
4	Davis Road- Between Green Briar Drive and 10th Avenue N	2020	Evaluate a neighborhood traffic circle at Davis Road and Riverdale Road or Winged Foot Road; Evaluate speed tables along Davis Road
5	Lake Worth Road- Between Kirk and S. Congress Avenue	2020	Installation of speed radar signs pending traffic study approval
6	Lillian Road- Between Congress Avenue and Lori Drive	2020	Evaluate speed tables along Lilian Road
7	Lorene Drive east of Congress Avenue	2020	Evaluate speed tables along Lorene Drive
8	Melaleuca Lane- Between Kirk Road and Davis Road	2020	Installation of speed radar signs pending traffic study approval
9	Park Lane/Greenbrier Drive- Between Kirk Road and Congress Avenue	2020	Evaluate neighborhood traffic circles at the intersections of Davis Road and Gulfstream Road; Evaluate speed tables on Greenbrier Drive

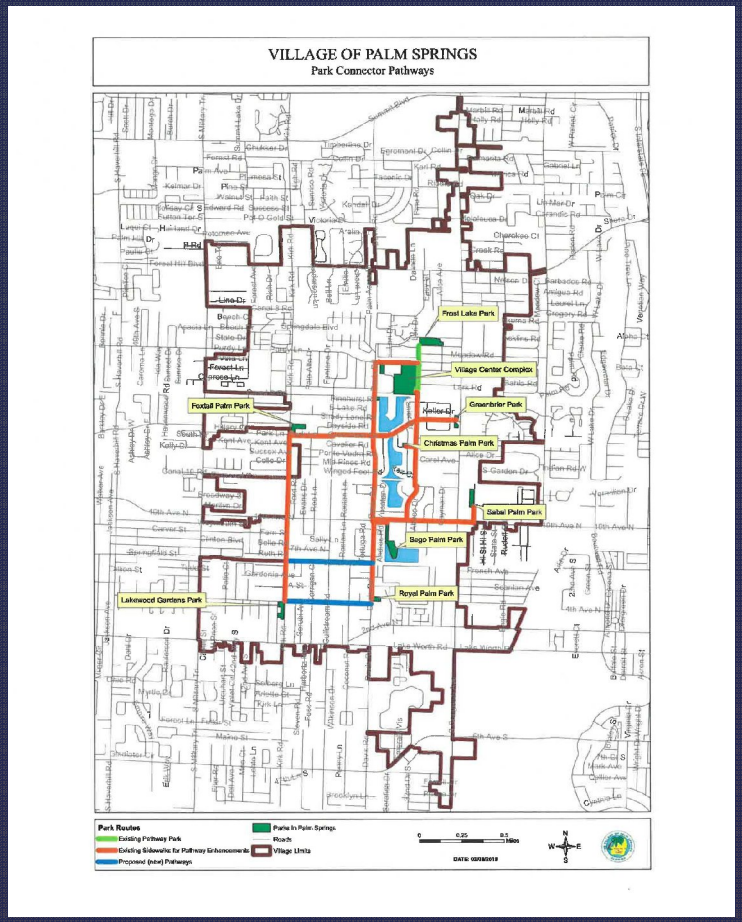
Important note: On neighborhood streets and minor roadways, the neighborhood is responsible, per Village code as it relates to traffic calming benefits, for providing the study and for the actual improvement, and must provide the recommendations and design schematics for permit review.

Safety Improvements- High Crash Locations



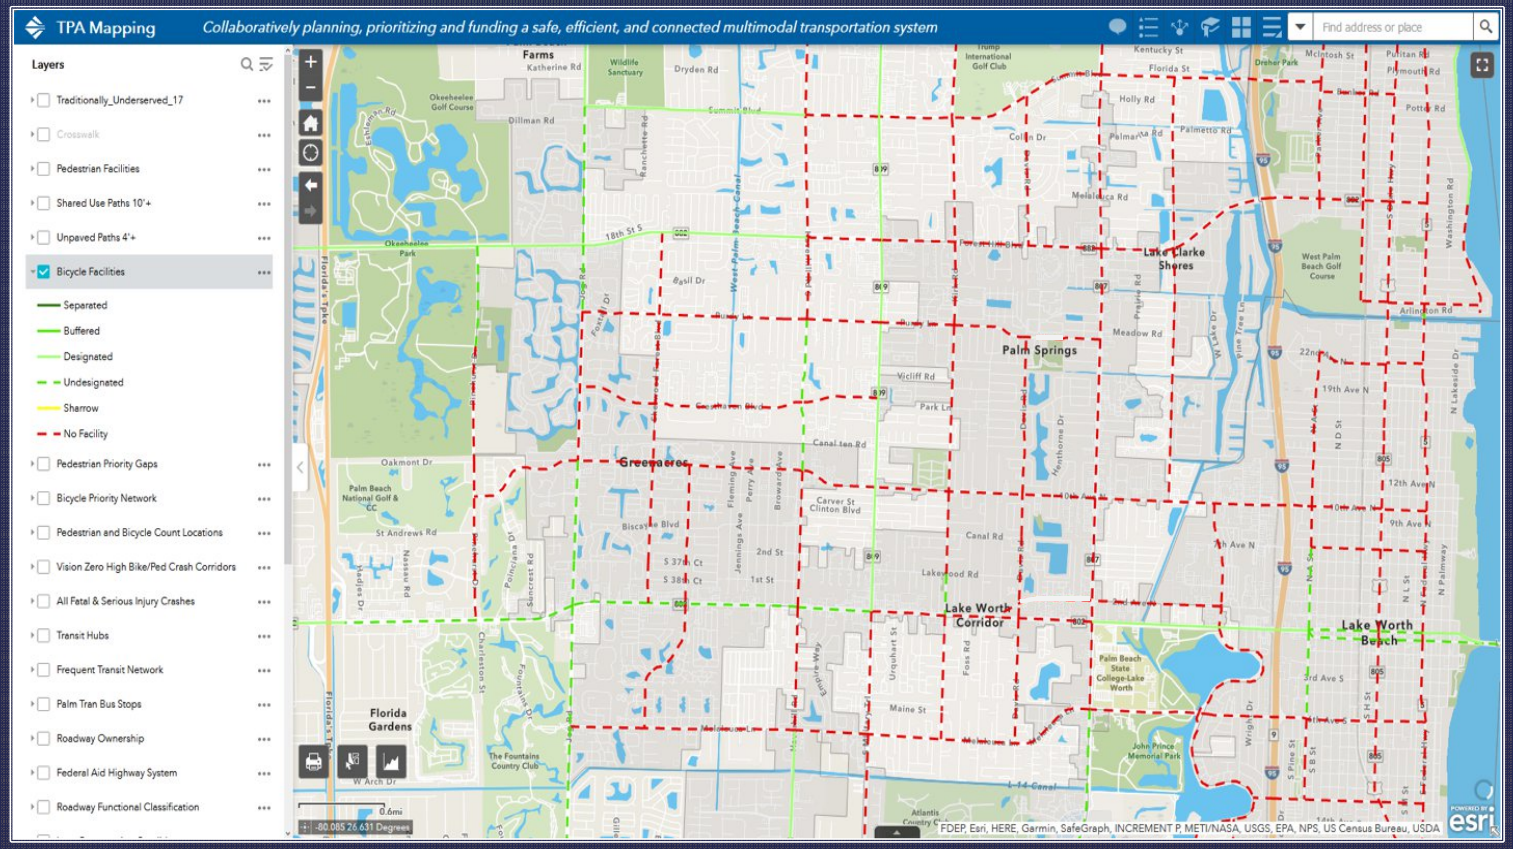
z

Safety Improvements- High Crash Locations			
Number	Road Segment/Intersection Name	Year	Scope of Safety Improvements
1	Alemeda Drive- Military Trail to Congress Avenue	2021	Perform Corridor Safety Study to mitigate for high crash location
2	Gun Club Road- Military Trail to Kirk Road	2021	Perform Corridor Safety Study to mitigate for high crash location
3	Summit Blvd.- Military Trail to Kirk Road	2021	Perform Corridor Safety Study to mitigate for high crash location
4	Kirk Road- 10th Avenue to Lake Worth Road	2021	Perform Corridor Safety Study to mitigate for high crash location
5	Kirk Road- Lake Worth Road to Melaleuca Lane	2021	Perform Corridor Safety Study to mitigate for high crash location
6	Kirk Road- Summit Blvd. to Forest Hill Blvd.	2021	Perform Corridor Safety Study to mitigate for high crash location
7	Summit Blvd.- Between Congress Avenue to Florida Mango Rd	2021	Perform Corridor Safety Study to mitigate for high crash location
8	Kirk Road- Forest Hill Blvd. to Greenbrier Drive	2021	Perform Corridor Safety Study to mitigate for high crash location
9	Congress Avenue- 10th Avenue to Lake Worth Road	2021	Perform Corridor Safety Study to mitigate for high crash location; high pedestrian and bicycle crash



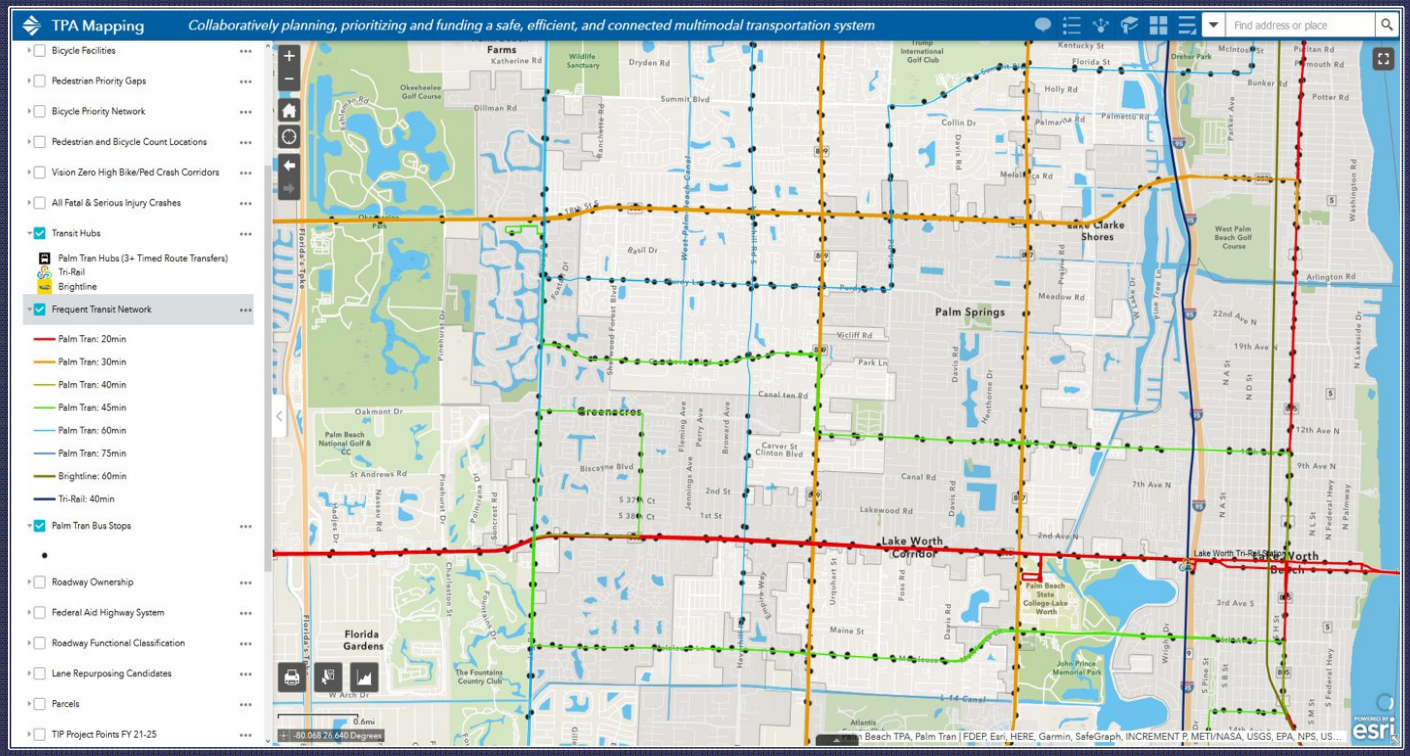
Safety Improvements- Bicycle and Pedestrian Crashes

Safety Improvements- High Bicycle and Pedestrian Crashes			
Number	Road Segment/Intersection Name	Year	Scope of Safety Improvements
10	Congress Avenue- 10th Avenue to Lake Worth Road	2021	Perform Corridor Safety Study to mitigate for high crash location; high pedestrian and bicycle crash
11	Military Trail- Southern Blvd. to Forest Hill Blvd	2021	Perform Corridor Safety Study to mitigation pedestrian and bicycle crash location
12	Lake Worth Road- Military Trail to Davis Road	2021	Perform Corridor Safety Study to mitigate for high pedestrian and bicycle crash location
13	Military Trail- Forest Hill Blvd to 10th Avenue	2021	Perform Corridor Safety Study to mitigate for high pedestrian and bicycle crash location
14	Forest Hill Blvd.- Military Trail to Congress Road	2021	Perform Corridor Safety Study to mitigate for high pedestrian and bicycle crash location
15	Lake Worth Road- Congress Avenue to I-95	2021	Perform Corridor Safety Study to mitigate for high pedestrian and bicycle crash location
16	Melaleuca Lane- Military Trail to Davis Road	2021	Perform Corridor Safety Study to mitigate for high pedestrian and bicycle crash location
17	Congress Avenue- Forest Hill Blvd. to 10th Avenue	2021	Perform Corridor Safety Study to mitigation pedestrian and bicycle crash location
18	Forest Hill Blvd.- Between Congress Road to I-95	2021	Perform Corridor Safety Study to mitigation pedestrian and bicycle crash location
19	10th Avenue- Military Trail to Davis Road	2021	Perform Corridor Safety Study to mitigate for high pedestrian and bicycle crash location



Pedestrian Network

Planned Park Connector Pathways



Bicycle Network

Red = No facilities

Transit Routes

Pedestrian and Bicycle Facilities

Summary

- Evaluation approach looked at “Level of Stress” – different methodology to account for comfort
- Bicycle and Pedestrian facilities have widespread gaps that serve as candidates for system completion
- Grid has a lack of N-S and E-W parallel paths that make implementation of alternatives difficult
- Future facilities development should include Complete Streets and Vision Zero – Village’s policies will need revision
- System has potential to be more age friendly
- Recreational system is easier to implement. Commuter based system on major roadways such as Congress Avenue have issues with available right of way.

Pedestrian and Bicycle Facilities

- Park Connector network should serve as in initial “grid” for implementation.
- Subsequent pathways should be completed on a block by block or section by section basis emanating from this network, with priority for first and last mile connectivity to transit.
- Bicycle routes should be “offset” from arterials and focused on Village collector and local roads.
- East – West Connectors
  - Separated facilities would be needed on roadways like Lake Worth Road, which has no space unless lanes are reduced or ROW is acquired
  - Alternatives – Prioritize bicycle and mixed-use pathways along canals or roadways like Greenbrier Drive
- North-South Connectors
  - Similar issues as East – West Connectors with space (example, Congress Avenue)
  - Bicycle and mixed-use pathways will require new pedestrian bridges like the one on Henthorne Drive that connects to Village facilities
  - Davis Road and Kirk Road are better candidates than regional arterials for implementing bicycle paths

Transit Recommendations

- Focus on existing Palm Tran Routes and “first-last mile” connectivity (Pedestrian and Bicycle projects)
- Local circulator – **wait**, but set up policy framework for
  - Developer Contributions
  - Draft pilot program for if monies are available
  - Pilot program, given size and population, should be geared toward small, on-demand shuttles

Prioritization Criteria

- Complete Streets Implementation/Network Completion
  - Prioritize 1st and last mile connections to transit
  - Prioritize infill of gaps
- Relieves Congestion/Improves Traffic Operations
- Effect on Safety
- Addresses Level of Stress issues
- Cost/Cost Effectiveness
- Ease of Implementation
