Seller is the sole and exclusive owner of the Intellectual Property in the Goods and processes incorporated in such Goods, and the rights attached to that Intellectual Property. Nothing herein grants to Buyer any right, title or interest in or to any of the Intellectual Property in the Goods. Buyer shall not claim to have acquired any right, title or interest to the Intellectual Property in the Goods by virtue of purchasing Goods sold hereunder. Buyer shall not deconstruct, reverse compile or reverse engineer the Goods in any way for the purpose of deciphering or replicating the chemical composition of the Goods. As used herein, "Intellectual Property" means any intellectual or industrial property right anywhere in the world including, without limitation, any patent, patent application, utility model, copyright (including copyright in manuals, databases, and promotional materials), registered design and other design rights, unpatented secrets and innovations, confidential information, and any other rights that may subsist anywhere in the world in improvements, inventions and other manufacturing processes or technical and other information of Seller. Buyer shall not resell, distribute or supply the Goods to any third party for any reason without Seller's prior written consent

11. CONFIDENTIALITY; ENTIRE AGREEMENT; AMENDMENTS; CHANGES TO TERMS AND CONDITIONS.

(a) All information that Buyer acquires from Seller hereunder, directly or indirectly, and all information that arises out of the sale of the Goods hereunder, concerning such Goods and/or proprietary processes involved, including information concerning Seller's current and future business plans, information relating to Seller's operations, know-how, and other Seller-furnished information shall be deemed Seller's "Proprietary Information". Buyer shall (a) hold Seller's Proprietary Information in strictest confidence, (b) not disclose it to others, (c) use it solely for purposes of this Agreement and (d) upon Seller's request, either promptly deliver to Seller all such Proprietary Information that is in written, electronic or other form, including copies and summaries, or, at Seller's option, destroy such Proprietary Information and provide Buyer certification of such destruction. The obligations under this Section shall survive the expiration or termination of the Contract.

(b) The Contract constitutes the entire agreement of the parties with respect to the purchase and sale of Goods and supersedes and excludes all prior and other discussions, representations (contractual or otherwise) and arrangements relating to the supply of Goods, including but not limited to, those relating to the performance of Goods or results that ought to be expected from using the Goods.
(c) **These terms and conditions will govern the specific pricing attached and identified as Exhibit 1.**

12. GOVERNING LAW.

The rights and duties of the parties and any dispute regarding the sale of Goods covered hereby shall be resolved according to the laws of the state of Florida, without regard to its conflicts of law provisions. Buyer hereby agrees to submit to the non-exclusive jurisdiction of the courts in the state of Florida. Any controversy or claim arising out of or relating to the sale of Goods or the dealings between the parties shall be settled exclusively by arbitration in Palm Beach County, FL by a single arbitrator pursuant to the American Arbitration Association's Commercial Arbitration rules then in effect, and judgment upon the award shall be entered in any court having jurisdiction thereof. The prevailing party in any arbitration proceeding shall be entitled to recover its reasonable attorneys' fees and costs, in addition to any other relief obtained.

13. WAIVER.

No failure to exercise nor any delay or omission in exercising any right, power or remedy by Seller operates as or constitutes a waiver. A single or partial exercise by Seller of any right, power or remedy does not preclude any other or further exercise by it of that or any other right, power or remedy. A waiver is not valid or binding on Seller unless made in writing. No failure by Seller to exercise, nor any delay or omission by Seller in exercising any right, power or remedy nor any representation made or conduct carried out by Seller under the Contract or in connection with the supply of Goods or any of them shall constitute or provide grounds for a common law or equitable estoppel.

14. SEVERANCE.

If any provision of the Terms and Conditions or its application to any person or circumstances is or becomes invalid, illegal or unenforceable, the provision shall so far as possible be read down to such extent as may be necessary to ensure that it is not invalid, illegal or unenforceable. If any provision or part of it cannot be so read down, the provision or part of it shall be deemed void and severable and the remaining provisions of the Terms and Conditions shall not in any way be affected or impaired.

15. PALM BEACH COUNTY IG: In accordance with Palm Beach County ordinance number 2011-009, the VENDOR acknowledges that this Agreement may be subject to investigation and/or audit by the Palm Beach County Inspector General. The VENDOR has reviewed Palm Beach County ordinance number 2011-009 and is aware of its rights and/or obligations under such ordinance.

16. **F.S.768.28:** Buyer acknowledges the waiver of sovereign immunity for liability in tort contained in Florida Statutes Section 768.28 and acknowledges that such statue permits actions at law against the Buyer to recover damages in tort for money damages up to the amounts set forth in such statute for injury or loss of property, personal injury, or death caused by the negligence or wrongful act or omission of an employee of the municipality while acting in the scope of the employee's office or employment under circumstances in which municipality, if a private person, would be liable under the genera laws of this State. Buyer's requirement to indemnify shall not exceed those limits set forth in F.S. 768.28.

RE : MIEX (R) DOC Resin Sole Source Supply

Dear Mr. Ward,

This letter is written regarding the manufacture and availability of MIEX® DOC Resin, as well as the availability of any substitute products, manufactured in North America, that may be used in the MIEX® Process.

MIEX® DOC Resin is a strong base anion exchange resin that has been developed for the removal of Dissolved Organic Carbon (DOC) and is manufactured solely by Ixom Watercare, Inc. in Deer Park, Victoria, Australia. MIEX® DOC Resin is imported into North America exclusively by Ixom Watercare, Inc. MIEX® DOC Resin is warehoused in several locations throughout the United States, with the primary warehouse in Georgia. Ixom Watercare, Inc. stocks sufficient quantities of Resin to support MIEX® plants in North America, and is the only supplier of this product and process in the world.

MIEX® DOC Resin has been certified by the NSF as meeting all requirements for NSF/ANSI Standard 61 – Drinking Water System Components – Health Effects. The MIEX® DOC Resin has two very unique properties as compared to traditional ion exchange resins. First, the resin beads are very small, with an average diameter of 180 μm, which allows for very quick uptake of contaminant species within water. Second, each resin bead contains a magnetized component within their structure, which allows the beads to act as weak individual magnets. This magnetic attraction allows the resin to quickly agglomerate when mixing energy is removed.

MIEX products and processes incorporate technology that is subject to granted patents and patent applications worldwide. MIEX DOC resin is made based on methods outlined in US patent number 6,171,489 (now expired), US patent number 7,514,500 (granted) and US patent number 10,173,197 (granted Jan 8, 2019). The properties that make MIEX® DOC Resin unique also make it impossible for a substitute product to be used in the MIEX® Process.

Ixom Watercare is committed to assisting the Village of Palm Springs in any way that is required. Please feel free to contact me if you have any questions or require any additional information.

Sincerely,

Ellen Gaby
MIEX Market Manager

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Public Service

ITEM 6.17: Approve SCADA System Improvements Award - Main Water Treatment Plant (Task Order No. 227) - Invitation to Bid (ITB) - Public Service Department (FY 2021 Budget Funded - Water & Sewer Enterprise Fund) - Revere Control Systems, Inc.

SUMMARY:

The Public Service Department has identified a need to make improvements to the supervisory control and data acquisition (SCADA) system at the Main Water Treatment Plant, which would assist in the control and monitoring on various chemical feeds and water flows during the water treatment process.

Currently, the Village Council has authorized Eckler Engineering to serve as the Village's consulting engineer to complete the engineering and design for this project (Task Order #227). The proposed project consists of the installation of new control panels and SCADA computers, network improvements, SCADA software upgrades, programming, electrical wiring and site restoration. These upgrades would allow Village water treatment staff to monitor and adjust chemical feeds and water flows throughout the water plant and provide better oversight and more accurate report generation for management staff.

To ensure the lowest possible price for this project, the Village issued an Invitation to Bid (ITB) on January 14, 2021 for the SCADA system improvements at the Village's Main Water Treatment Plant. This process was completed by the Village through a competitive bid selection process - SCADA System Improvements (ITB No. 2021B-003 - January 14, 2021).

Within the Fiscal Year 2021 Budget - Water & Sewer Enterprise Fund and the Capital Improvement Plan (CIP), the Village Council approved $842,000 for the SCADA System Improvements at the Main Water Treatment Plant. As a result of the Village's ITB, the following four (4) bid proposals were received:

Vendor	**Total Bid**
Revere Control Systems, Inc.	$ 866,000.00
Boromei Cosntruction, Inc.	$ 924,756.00
Curry Controls Company	$ 943,260.00
TLC Diversified, Inc.	$1,087,600.00

After review of the four (4) bids received, the Assistant Public Service Director/Engineer, the Public Service Project Manager, the Utilities Superintendent, the Village Attorney and the Village's consulting engineer, Eckler Engineering, have determined that Revere Control Systems, Inc. provided the lowest responsible and responsive bid. As a result, staff is recommending that the Council award this proposed contract (Task Order #227) to the lowest responsive and responsible bidder, Revere Control Systems, Inc. in the amount of $866,000.

Note: The proposed bid amount submitted by Revere Control Systems ($866,000) is higher than the cost estimate ($816,000) by approximately 6%. The total approved budget for FY 2021 for this project is $842,000.00; however, staff beleive that approximately $266,000.00 will be spent during the FY 2021 fiscal year. therefore, this project is expected to roll over into the next fiscal year (FY 2022) and the remaining funding of $600,000.00 to complete this project is expected to be requested to be approved by the Village Council during the upcoming FY 2022 budget process and a budget transfer or amendment is not expected.

If approved, the Village would accept Revere Control Systems, Inc., pricing including all terms, conditions, and pricing as submitted within their ITB proposal. The Village will not expend more than the amount in the approved budget as it may be adopted/amended each year for these goods and services over the term of this contract. An internal budget transfer or amendment to support this proposed project will be completed within the Water & Sewer Enterprise Fund at a later date, if necessary.

If approved, the project is expected to take approximately 270 days (February/March 2022) to complete following the Notice to Proceed from the Village.

The proposed agreement was prepared by the Village Attorney and reviewed by the Assistant Public Service Director/Engineer, the Public Service Project Manager, the Utilities Superintendent and the Finance Director.

The Village has not worked with the proposed vendor previously; however, the Village has received positive references from three (3) municipalities [Gainesville Regional Utilities, Seminole County Utilities, Orange County Utilities] for the proposed vendor.

FISCAL IMPACT:

Funding to support the proposed SCADA improvement project is available within FY 2021 Budget - Water & Sewer Enterprise Fund:

Allocated/Estimated Project Funding:	***Amount:***
FY 2018 Actual Funding - Water & Sewer Fund	$ 44,773.53
FY 2019 Actual Funding - Water & Sewer Fund	$ 15,370.01
FY 2020 Actual Funding - Water & Sewer Fund	$ 3,341.31
FY 2021 Approved Funding - Water & Sewer Fund	$266,000.00
FY 2022 Requested Funding - Water & Sewer Fund	$600,000.00
Total Allocated/Approved Budget:	**$929,484.85**

Expected Project Costs:	***Amount***
FY 2018 Project Cost - Actual Engineering & Design - Water & Sewer Fund	$ 44,773.53
FY 2019 Project Cost - Actual Engineering & Design - Water & Sewer Fund	$ 15,370.01
FY 2020 Project Cost - Actual Engineering & Design - Water & Sewer Fund	$ 3,341.31
FY 2021 Project Cost - Estimated Engineering & Design - Water & Sewer Fund	$ 30,480.85
FY 2021 Project Cost - Estimated Construction Cost - Water & Sewer Fund	$266,000.00
FY 2022 Project Cost - Estimated Construction Cost - Water & Sewer Fund$266,000.00	$600,000.00
Total Project Request/Cost:	**$959,965.70**

Note: The proposed bid amount submitted by Revere Control Systems ($866,00) is higher than the cost estimate ($816,000) by approximately 6%. The total approved budget for FY 2021 for this project is $842,000.00; however, staff beleive that approximately $266,000.00 will be spent during the FY 2021 fiscal year. therefore, this project is expected to roll over into the next fiscal year (FY 2022) and the remaining funding of $600,000.00 to complete this project is expected to be requested to be approved by the Village Council during the upcoming FY 2022 budget process and a budget transfer or amendment is not expected.

The Village will not expend more than the amount within the approved budget as it may be adopted/amended each year for these goods and/or services over the term of this contract.

An internal budget transfer or amendment to support this proposed project will be completed within the Water & Sewer Enterprise Fund at a later date, if necessary.

Date of Issuance:

Owner:	Village of Palm Springs	Owner's Task Order No.:	227
Engineer:	Eckler Engineering, Inc.	Engineer's Project No.:	400-077.01
Project:	SCADA System Upgrade Main Water Treatment Plant	Contract Name:	

Bidder:

Bidder's Address:

TO BIDDER:

You are notified that Owner has accepted your Bid dated [March 10, 2021] for the above Contract, and that you are the Successful Bidder and are awarded a Contract for:

ITB #2021B-003 SCADA System Upgrade, Main Water Treatment Plant .

[describe Work, alternates, or sections of Work awarded]

The Contract Price of the awarded Contract is: $ 866,000 *[note if subject to unit prices, or cost-plus]*

[ ] unexecuted counterparts of the Agreement accompany this Notice of Award, and one copy of the Contract Documents accompanies this Notice of Award, or has been transmitted or made available to Bidder electronically. *[revise if multiple copies accompany the Notice of Award]* ☐ a set of the Drawings will be delivered separately from the other Contract Documents. You must comply with the following conditions precedent within 15 days of the date of this Notice of Award:

1. Deliver to Owner [____]counterparts of the Agreement, fully executed by Bidder.
2. Deliver with the executed Agreement(s) the Contract security *[e.g., performance and payment bonds]* and insurance documentation as specified in the Instructions to Bidders and General Conditions, Articles 2 and 6.
3. Other conditions precedent (if any):

Failure to comply with these conditions within the time specified will entitle Owner to consider you in default, annul this Notice of Award, and declare your Bid security forfeited.

Within ten days after you comply with the above conditions, Owner will return to you one fully executed counterpart of the Agreement, together with any additional copies of the Contract Documents as indicated in Paragraph 2.02 of the General Conditions.

By:

Title:

SECTION 00520
AGREEMENT
BETWEEN OWNER AND CONTRACTOR
FOR CONSTRUCTION CONTRACT (STIPULATED PRICE)

THIS AGREEMENT is by and between Village of Palm Springs ("Owner") and Revere Control Systems, Inc. ("Contractor").

Owner and Contractor hereby agree as follows:

ARTICLE 1 – WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows: The Project consists of furnishing all labor, equipment and material for the SCADA System Improvements/Upgrade as described by the Drawings and Specifications. Generally, the work includes minor demolition, new control panels, modification to existing control panels, new computers/network equipment, software upgrades, electrical, site restoration and all other incidentals as indicated by the drawings and specifications or as required to properly complete the project as planned.

ARTICLE 2 – THE PROJECT

2.01 The Project, of which the Work under the Contract Documents is a part, is generally described as follows: **SCADA System Upgrade – Main Water Treatment Plant.**

ARTICLE 3 – ENGINEER

3.01 The part of the Project that pertains to the Work has been designed by Eckler Engineering, Inc.

3.02 The Owner has retained Eckler Engineering, Inc. ("Engineer") to act as Owner's representative, assume all duties and responsibilities, and have the rights and authority assigned to Engineer in the Contract Documents in connection with the completion of the Work in accordance with the Contract Documents.

ARTICLE 4 – CONTRACT TIMES

4.01 *Time of the Essence*

A. All time limits for Milestones, if any, Substantial Completion, and completion and readiness for final payment as stated in the Contract Documents are of the essence of the Contract.

4.02 *Contract Times: Days*

A. The Work will be substantially completed within 270 days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 300 days after the date when the Contract Times commence to run.

4.03 *Liquidated Damages*

A. Contractor and Owner recognize that time is of the essence as stated in Paragraph 4.01 above and that Owner will suffer financial and other losses if the Work is not completed

and Milestones not achieved within the times specified in Paragraph 4.02 above, plus any extensions thereof allowed in accordance with the Contract. The parties also recognize the delays, expense, and difficulties involved in proving in a legal or arbitration proceeding the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

1. Substantial Completion: Contractor shall pay Owner $500.00 for each day that expires after the time (as duly adjusted pursuant to the Contract) specified in Paragraph 4.02.A above for Substantial Completion until the Work is substantially complete.

2. Completion of Remaining Work: After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract) for completion and readiness for final payment, Contractor shall pay Owner $500.00 for each day that expires after such time until the Work is completed and ready for final payment.

3. Liquidated damages for failing to timely attain Substantial Completion and final completion are not additive and will not be imposed concurrently.

4.04 *Special Damages*

A. In addition to the amount provided for liquidated damages, Contractor shall reimburse Owner (1) for any fines or penalties imposed on Owner as a direct result of the Contractor's failure to attain Substantial Completion according to the Contract Times.

ARTICLE 5 – CONTRACT PRICE

5.01 Owner shall pay Contractor for completion of the Work in accordance with the Contract Documents the amounts that follow, subject to adjustment under the Contract: A. For all Work other than Unit Price Work, a lump sum of: $ 866,000.00 .

All specific cash allowances are included in the above price in accordance with Paragraph 13.02 of the General Conditions.

B. For all Unit Price Work, an amount equal to the sum of the extended prices (established for each separately identified item of Unit Price Work by multiplying the unit price times the actual quantity of that item):

Unit Price Work					
Item No.	**Description**	**Unit**	**Estimated Quantity**	**Unit Price**	**Extended Price**
	Not Applicable				
Total of all Extended Prices for Unit Price Work (subject to final adjustment based on actual quantities)					$ N/A

The extended prices for Unit Price Work set forth as of the Effective Date of the Contract are based on estimated quantities. As provided in Paragraph 13.03 of the General Conditions, estimated quantities are not guaranteed, and determinations of actual quantities and classifications are to be made by Engineer.

C. Total of Lump Sum Amount and Unit Price Work (subject to final Unit Price adjustment) $ 866,000.00 .

D. For all Work, at the prices stated in Contractor's Bid, attached hereto as an exhibit.

ARTICLE 6 – PAYMENT PROCEDURES

6.01 *Submittal and Processing of Payments*

A. Contractor shall submit Applications for Payment in accordance with Article 15 of the General Conditions. Applications for Payment will be processed by Engineer as provided in the General Conditions.

6.02 *Progress Payments; Retainage*

A. Owner shall make progress payments on account of the Contract Price on the basis of Contractor's Applications for Payment on or about the 20th day of each month during performance of the Work as provided in Paragraph 6.02.A.1 below, provided that such Applications for Payment have been submitted in a timely manner and otherwise meet the requirements of the Contract. All such payments will be measured by the Schedule of Values established as provided in the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no Schedule of Values, as provided elsewhere in the Contract.

1. Prior to Substantial Completion, progress payments will be made in an amount equal to the percentage indicated below but, in each case, less the aggregate of payments previously made and less such amounts as Owner may withhold, including but not limited to liquidated damages, in accordance with the Contract

a. 90 percent of Work completed (with the balance being retainage). If the Work has been 50 percent completed as determined by Engineer, and if the character and progress of the Work have been satisfactory to Owner and Engineer, then as long

as the character and progress of the Work remain satisfactory to Owner and Engineer, the retainage will be reduced in accordance with Florida Statute 218.735; and

b. 90 percent of cost of materials and equipment not incorporated in the Work (with the balance being retainage).

B. Upon Substantial Completion, Owner shall pay an amount sufficient to increase total payments to Contractor to 100 percent of the Work completed, less such amounts set off by Owner pursuant to Paragraph 15.01.E of the General Conditions, and less 200 percent of Engineer's estimate of the value of Work to be completed or corrected as shown on the punch list of items to be completed or corrected prior to final payment.

6.03 *Final Payment*

A. Upon final completion and acceptance of the Work in accordance with Paragraph 15.06 of the General Conditions, Owner shall pay the remainder of the Contract Price as recommended by Engineer as provided in said Paragraph 15.06.

ARTICLE 7 – INTEREST

7.01 All amounts not paid when due shall bear interest at the rate of 0 percent per annum.

ARTICLE 8 – CONTRACTOR'S REPRESENTATIONS

8.01 In order to induce Owner to enter into this Contract, Contractor makes the following representations:

A. Contractor has examined and carefully studied the Contract Documents, and any data and reference items identified in the Contract Documents.

B. Contractor has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and is satisfied as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Contractor is familiar with and is satisfied as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Contractor has carefully studied all: (1) reports of explorations and tests of subsurface conditions at or adjacent to the Site and all drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings, and (2) reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings.

E. Contractor has considered the information known to Contractor itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Contract Documents; and the Site-related reports and drawings identified in the Contract Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor; and (3) Contractor's safety precautions and programs.

F. Based on the information and observations referred to in the preceding paragraph, Contractor agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

G. Contractor is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Contract Documents.

H. Contractor has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Contractor has discovered in the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

I. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

J. Contractor's entry into this Contract constitutes an incontrovertible representation by Contractor that without exception all prices in the Agreement are premised upon performing and furnishing the Work required by the Contract Documents.

ARTICLE 9 – CONTRACT DOCUMENTS

9.01 *Contents*

A. The Contract Documents consist of the following:

1. This Agreement (pages 1 to ___, inclusive).
2. Performance bond (pages ___ to ___, inclusive).
3. Payment bond (pages ___ to ___, inclusive).
4. Other bonds.
   a. ___ (pages ___ to ___, inclusive).
   b. ___ (pages ___ to ___, inclusive).
   c. ___ (pages ___ to ___, inclusive).
5. General Conditions (pages ___ to ___, inclusive).
6. Supplementary Conditions (pages ___ to ___, inclusive).
7. Specifications as listed in the table of contents of the Project Manual.
8. Drawings (not attached but incorporated by reference) consisting of ___ sheets with each sheet bearing the following general title: ___ **[or]** the Drawings listed on the attached sheet index.
9. Addenda (numbers ___ to ___, inclusive).
10. Exhibits to this Agreement (enumerated as follows):
    a. Contractor's Bid (pages ___ to ___, inclusive).
11. The following which may be delivered or issued on or after the Effective Date of the Contract and are not attached hereto:
    a. Notice to Proceed.

b. Work Change Directives.

c. Change Orders.

d. Field Orders.

B. The documents listed in Paragraph 9.01.A are attached to this Agreement (except as expressly noted otherwise above).

C. There are no Contract Documents other than those listed above in this Article 9.

D. The Contract Documents may only be amended, modified, or supplemented as provided in the General Conditions.

E. To the extent that there exists a conflict between this Agreement and the remaining Contract Documents, the terms, conditions, covenants, and/or provisions of this Agreement shall prevail. Wherever possible, the provisions of such documents shall be construed in such a manner as to avoid conflicts between provisions of the various documents.

ARTICLE 10 – MISCELLANEOUS

10.01 *Terms*

A. Terms used in this Agreement will have the meanings stated in the General Conditions and the Supplementary Conditions.

10.02 *Assignment of Contract*

A. Unless expressly agreed to elsewhere in the Contract, no assignment by a party hereto of any rights under or interests in the Contract will be binding on another party hereto without the written consent of the party sought to be bound; and, specifically but without limitation, money that may become due and money that is due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents.

10.03 *Successors and Assigns*

A. Owner and Contractor each binds itself, its successors, assigns, and legal representatives to the other party hereto, its successors, assigns, and legal representatives in respect to all covenants, agreements, and obligations contained in the Contract Documents.

10.04 *Severability*

A. Any provision or part of the Contract Documents held to be void or unenforceable under any Law or Regulation shall be deemed stricken, and all remaining provisions shall continue to be valid and binding upon Owner and Contractor, who agree that the Contract Documents shall be reformed to replace such stricken provision or part thereof with a valid and enforceable provision that comes as close as possible to expressing the intention of the stricken provision.

10.05 *Contractor's Certifications*

A. Contractor certifies that it has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for or in executing the Contract. For the purposes of this Paragraph 10.05:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process or in the Contract execution;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process or the execution of the Contract to the detriment of Owner, (b) to establish Bid or Contract prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish Bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

10.06 *Indemnity*

A. The parties recognize that the CONTRACTOR is an independent contractor. The CONTRACTOR agrees to assume liability for and indemnify, hold harmless, and defend the VILLAGE, its council members, mayor, officers, employees, agents, and attorneys of, from, and against all liability and expense, including reasonable attorney's fees, in connection with any and all claims, demands, damages, actions, causes of action, and suits in equity of whatever kind or nature, including claims for personal injury, property damage, equitable relief, or loss of use, to the extent caused by the negligence, recklessness, or intentionally wrongful conduct of the CONTRACTOR, its agents, officers, Contractors, subcontractors, employees, or anyone else utilized by the CONTRACTOR in the performance of this Contract. The CONTRACTOR's liability hereunder shall include all attorney's fees and costs incurred by the VILLAGE in the enforcement of this indemnification provision. This includes claims made by the employees of the CONTRACTOR against the VILLAGE and the CONTRACTOR hereby waives its entitlement, if any, to immunity under Section 440.11, Florida Statutes. The obligations contained in this provision shall survive termination of this Contract and shall not be limited by the amount of any insurance required to be obtained or maintained under this Contract.

B. Subject to the limitations set forth in this Section, CONTRACTOR shall assume control of the defense of any claim asserted by a third party against the VILLAGE and, in connection with such defense, shall appoint lead counsel, in each case at the CONTRACTOR's expense. The VILLAGE shall have the right, at its option, to participate in the defense of any third party claim, without relieving CONTRACTOR of any of its obligations hereunder. If the CONTRACTOR assumes control of the defense of any third party claim in accordance with this paragraph, the CONTRACTOR shall obtain the prior written consent of the VILLAGE before entering into any settlement of such claim. Notwithstanding anything to the contrary in this Section, the CONTRACTOR shall not assume or maintain control of the defense of any third party claim, but shall pay the fees of counsel retained by the VILLAGE and all expenses, including experts' fees, if (i) an adverse determination with respect to the third party claim would, in the good faith judgment of the VILLAGE, be detrimental in any material respect to

the VILLAGE's reputation; (ii) the third party claim seeks an injunction or equitable relief against the VILLAGE; or (iii) the CONTRACTOR has failed or is failing to prosecute or defend vigorously the third party claim. Each party shall cooperate, and cause its agents to cooperate, in the defense or prosecution of any third party claim and shall furnish or cause to be furnished such records and information, and attend such conferences, discovery proceedings, hearings, trials, or appeals, as may be reasonably requested in connection therewith.

C. It is the specific intent of the parties hereto that the foregoing indemnification complies with Section 725.06, Florida Statutes, as amended. CONTRACTOR expressly agrees that it will not claim, and waives any claim, that this indemnification violates Section 725.06, Florida Statues. Nothing contained in the foregoing indemnification shall be construed as a waiver of any immunity or limitation of liability the VILLAGE may have under the doctrine of sovereign immunity or Section 768.28, Florida Statutes.

10.07 *Governing Law and Remedies*

A. The validity of this Agreement and of any of its terms or provisions, as well as the rights and duties of the parties hereunder, shall be governed by the laws of the State of Florida and venue for any and all disputes related to or arising from this Agreement shall be in Palm Beach County, Florida.

B. No remedy herein conferred upon any party is intended to be exclusive of any other remedy, and each and every such remedy shall be cumulative and shall be in addition to every other remedy given hereunder or now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder shall preclude any other or further exercise thereof.

10.08 *Office of the Inspector General*

A. Palm Beach County has established the Office of the Inspector General, which is authorized and empowered to review past, present, and proposed County programs, contracts, transactions, accounts and records. The Inspector General (IG) has the power to subpoena witnesses, administer oaths, require the production of records, and monitor existing projects and programs. The Inspector General may, on a random basis, perform audits on all Village contracts.

10.09. *Scrutinized Companies*

Company certifies that it and its subcontractors are not on the Scrutinized Companies that Boycott Israel List and are not engaged in the boycott of Israel. Pursuant to section 287.135, Florida Statutes, the Village may immediately terminate this Agreement at its sole option if the Company or any of its subcontractors are found to have submitted a false certification; or if the Company or any of its subcontractors, are placed on the Scrutinized Companies that Boycott Israel List or is engaged in the boycott of Israel during the term of this Agreement.

The Company agrees to observe the above requirements for applicable subcontracts entered into for the performance of work under this Agreement. The Company agrees that the certifications in this section shall be effective and relied upon by the Village for the term of this Agreement, including any and all renewals. The Company agrees that if it or any of its subcontractors' status changes in regards to any certification herein, the Company shall immediately notify the Village of the same. As provided in Subsection 287.135(8), Florida

Statutes, if federal law ceases to authorize the above-stated contracting prohibitions then they shall become inoperative.

10.10 *Public Records*

A. The CONTRACTOR shall comply with Florida's Public Records Laws, Chapter 119, Florida Statutes, and, if it is acting on behalf of the VILLAGE as provided under section 119.011(2), the CONTRACTOR specifically agrees to:

1. Keep and maintain public records required by the VILLAGE to perform the services under this Agreement.

2. Upon request from the VILLAGE's custodian of public records, provide the VILLAGE with a copy of the requested records or allow the records to be inspected or copied within a reasonable tie at a cost that does not exceed the cost provided in this Chapter 119, Florida Statutes, or as otherwise provided by law.

3. Ensure that said public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Agreement term and following completion of the Agreement, if the CONTRACTOR does not transfer the records to the VILLAGE.

4. Upon the completion of the Agreement, transfer, at no cost, to the VILLAGE all public records in possession of the CONTRACTOR or keep and maintain public records required by the VILLAGE to perform the services. If the CONTRACTOR transfers all public records to the VILLAGE upon completion of the Agreement, the CONTRACTOR shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the CONTRACTOR keeps and maintains public records upon completion of the Agreement, the CONTRACTOR shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the VILLAGE, upon request from the VILLAGE's custodian of public records, in a format that is compatible with the information technology systems of the Village.

IF THE COMPANY HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE COMPANY'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS OR DESIGNEE AT: ATTENTION KIMBERYLY WYNN, VILLAGE CLERK 561-434-5084, kwynn@vpsfl.org, OR BY MAIL AT VILLAGE OF PALM SPRINGS, 226 CYPRESS LANE, PALM SPRINGS, FL 33461.

10.11 *E-VERIFY*

Pursuant to Section 448.095(2), Florida Statutes, beginning on January 1, 2021, the Company shall:

1. Register with and use the E-Verify system to verify the work authorization status of all newly hired employees and require all subcontractors (providing services or receiving funding under this Agreement) to register with and use the E-Verify system to verify the work authorization status of all the subcontractors' newly hired employees;

~~1.~~2. Secure an affidavit from all subcontractors (providing services or receiving funding under this Agreement) stating that the subcontractor does not employ, contract with, or subcontract with an unauthorized alien;

~~2.~~3. Maintain copies of all subcontractor affidavits for the duration of this Agreement;

~~3.~~4. Comply fully, and ensure all of its subcontractors comply fully, with Section 448.095, Florida Statutes;

~~4.~~5. Be aware that a violation of Section 448.09, Florida Statutes (Unauthorized aliens; employment prohibited) shall be grounds for termination of this Agreement; and

~~5.~~6. Be aware that if the Village terminates this Agreement under Section 448.095(2)(c), Florida Statutes, the Company may not be awarded a public contract for at least 1 year after the date on which the Agreement is terminated and will be liable for any additional costs incurred by the Village as a result of the termination of the Agreement.

10.11 *Insurance*

A. The limits of liability for insurance required by Paragraph 6.03 of the General Conditions shall provide coverage for not less that the following amounts or greater where required by Law and Regulations:

1. Workers' Compensation, and related coverages under Paragraphs 6.03.A.1 and A.2 of the General Conditions:

a.	State	Statutory
b.	Applicable Federal	Statutory
c.	Employer Liability:	
	Bodily injury, each accident	$1,000,000 Bodily
	injury by disease, each employee	$500,000
	Bodily injury/disease aggregate	$1,000,000
	Foreign voluntary worker compensation	Statutory

2. Contractor's Commercial General Liability under Paragraphs 6.03.B and 6.03.C of the General Conditions:

a.	General Aggregate	$2,000,000
b.	Products – Completed Operations Aggregate	$2,000,000
c.	Personal and Advertising Injury	$1,000,000
d.	Each Occurrence (Bodily Injury and Property Damage)	$1,000,000

3. Automobile Liability under paragraph 6.03.D of the General Conditions:

a.	Bodily Injury:	
	Each Person	$500,000
	Each Accident	$1,000,000
b.	Property Damage:	
	Each Incident	$1,000,000

4. Umbrella of Excess Liability under paragraph 6.03.E of the General Conditions:

a. Excess or Umbrella Liability
   1) General Aggregate $5,000,000
   2) Each Occurrence $1,000,000

5. Contractor's Pollution Liability under paragraph 6.03.F of the General Conditions:

   a. Contractor's Pollution Liability
      1) General Aggregate $2,000,000
      2) Each Occurrence $1,000,000

6. Additional Insureds include the respective officers, partners, directors, employees, agents, consultants, and subconsultants of the following firms and municipal government(s):

   a. Village of Palm Springs

10.12 *Public Construction Bond*

A. If the contract amount exceeds $200,000 in total construction cost, the CONTRACTOR must provide the VILLAGE with a public construction bond in accordance with section 255.05, Florida Statutes. Said bond must be recorded in the Official Records in and for Palm Beach County and a copy of the recorded bond must be provided to the VILLAGE prior to the CONTRACTOR providing any services under the contract. The VILLAGE reserves the right to request a bond for any work which is less than $200,000. The cost of the bond shall be a direct pass through cost to the VILLAGE without any mark-up by the CONTRACTOR.

B. The public construction bond shall be on forms attached hereto as **Exhibit "B"** or substantially similar as approved by the VILLAGE. The bond shall be in an amount not less than the total contract price and shall incorporate by reference the terms of the Contract Documents in their entirety.

C. To be acceptable to the VILLAGE, a Surety Company shall comply with the following provisions:

(a) The Surety Company shall have a currently valid Certificate of Authority, issued by the State of Florida Department of Insurance, authorizing it to write surety bonds in the State of Florida.

(b) The Surety Company shall have a currently valid Certificate of Authority issued by the United States Department of Treasury under Sections 9304 to 9308 of Title 31 of the United States Code.

(c) The Surety Company shall be in full compliance with the provisions of the Florida Insurance Code.

(d) The Surety Company shall have at least twice the minimum surplus and capital required by the Florida Insurance Code at the time the contract is approved.

(e) The Surety Company shall have at least the ratings of A-/Class V in the latest issue of Best's Key Rating Guide.

(f) The Surety Company shall not expose itself to any loss on any one risk in an amount exceeding ten (10) percent of its surplus to policyholders, provided:

1. Any risk or portion of any risk being reinsured shall be deducted in determining the limitation of the risk as prescribed in this section. These minimum requirements shall apply to

the reinsuring carrier providing authorization or approval by the State of Florida, Department of Insurance to do business in this state have been met.

2. In the case of the surety insurance company, in addition to the deduction for reinsurance, the amount assumed by any co-surety, the value of any security deposited, pledged or held subject to the consent of the surety and for the protection of the surety shall be deducted.

10.13 *Audit By Village*

A. The CONTRACTOR shall maintain adequate records to justify all charges, expenses, and costs incurred in estimating and performing the Services for at least three (3) years after completion of the Contract. The CONTRACTOR shall permit the VILLAGE, or any authorized representatives of the VILLAGE, at all reasonable times, access to and the right to examine all records, books, papers or documents related to the CONTRACTOR's performance under this Agreement including, but not limited to, expenses for sub-contractors, agents or assistants, direct and indirect charges for work performed and detailed documentation for all such work performed or to be performed under this Agreement.

10.14 *Copies of Data/Documents*

A. Copies or original documents prepared by the CONTRACTOR in relation to work associated with this Agreement shall be provided to the VILLAGE. Data collected, stored, and/or provided shall be in a form acceptable to the VILLAGE and agreed upon by the VILLAGE.

10.15 *Ownership*

A. Each and every report, draft, work product, map, record, and other document reproduced, prepared, or caused to be prepared by the CONTRACTOR pursuant to or in connection with this Agreement shall be the exclusive property of the VILLAGE.

10.16 *Limitations of Liability*

A. Under no circumstances shall either party be liable to the other for any consequential, incidental, special, punitive, or any other form of indirect or non-compensatory damages.

10.17 *Enforcement Costs*

A. All parties shall be responsible for their own attorneys' fees, court costs and expenses if any legal action or other proceeding is brought for any dispute, disagreement, or issue of construction or interpretation arising hereunder whether relating to the Agreement's execution, validity, the obligations provided therein, or performance of this Agreement, or because of an alleged breach, default or misrepresentation in connection with any provisions of this Agreement.

10.18 *Copyrights and/or Patent Rights*

A. CONTRACTOR warrants that there has been no violation of copyrights and/or patent rights in the manufacturing, producing or selling of the goods, shipped or ordered, as a result of this Agreement and the CONTRACTOR agrees to hold the Village harmless from any and all liability, loss, or expense occasioned by any such violation.

10.19 *Protection of Property*

A. The CONTRACTOR shall at all times guard against damage or loss to the property of the VILLAGE or of other vendors or contractors and shall be held responsible for replacing or repairing any such loss or damage. The VILLAGE may withhold payment or make such deductions as deemed necessary to insure reimbursement or replacement for loss or damage to property through negligence of the successful CONTRACTOR or its agents. The CONTRACTOR shall be responsible to safeguard all of their property such as tools and equipment while on site. The VILLAGE will not be held responsible for any loss of CONTRACTOR property due to theft or vandalism.

10.20 *Damage to Persons or Property*

A. The responsibility for all damage to person or property arising out of or on account of Scope of Work done under this Contract shall rest upon the CONTRACTOR.

10.21 *Discrimination*

A. The CONTRACTOR warrants and represents that all of its employees are treated equally during employment without regard to race, color, religion, disability, sex, age, national origin, ancestry, political affiliation, marital status, handicap, or sexual orientation. Further, CONTRACTOR shall not discriminate or permit discrimination against any employee or an applicant for employment on the basis of race, color, sex, religion, political affiliation, natural origin, ancestry, marital status, sexual orientation or handicap.

10.22 *Construction Defects*

A. PURSUANT TO SECTION 558.005, FLORIDA STATUTES, ANY CLAIMS FOR CONSTRUCTION DEFECTS ARE NOT SUBJECT TO THE NOTICE AND CURE PROVISIONS OF CHAPTER 558, FLORIDA STATUTES.

IN WITNESS WHEREOF, Owner and Contractor have signed this Agreement.

This Agreement will be effective on _____ (which is the Effective Date of the Contract).

ECKLER ENGINEERING, INC.

March 29, 2021
400-077.01

Mr. Paul Ward
Village of Palm Springs
226 Cypress Lane
Lake Worth, FL 33461

Dear Mr. Ward:

Reference: Recommendation of Award
Bid No. 2021B-003
SCADA System Upgrades, Main Water Treatment Plant

The Village of Palm Springs received, opened, and read aloud bids for the SCADA System Upgrades, Main Water Treatment Plant on Wednesday, March 10, 2021 at 2:00 P.M. Four (4) bids were received ranging in price from $866,000.00 to $1,087,600.00. The apparent low bid was submitted by Revere Control Systems, Inc., of Birmingham, AL.

The bid packages were reviewed and evaluated per the requirements of the bid documents as follows:

Revere Control Systems, Inc.

The bid package submitted by the apparent low bidder was reviewed first. Per our review and evaluation, we noted the following items as incomplete or not provided in accordance with the bid documents:

1. All required documents and attachments were provided in accordance with the requirements of the bid documents.

Based on the above determination of bid responsiveness, we continued the evaluation process of the bidder's qualifications and experience. Revere Control Systems, Inc., has successfully completed numerous projects similar to the bid scope for many different municipal water and wastewater treatment facilities. Based on submitted past performance references and our knowledge of their capabilities, they are qualified to complete this project per the bid drawings and specifications.

Based on the above evaluation, we recommend the Village award of this construction contract to Revere Control Systems, Inc., in the amount of $866,000.00. We find this recommended amount to be approximately 6% above the Engineer's final opinion of probable construction cost of $816,000.

A certified bid tabulation has been attached. The bid tabulation lists the documents that were required to be submitted by the bidder with the bid proposal. An "X" indicates that the necessary documents were submitted and found to be in compliance with the requirements of the bidding phase of this project.

If you have any questions or require additional information pertaining to this recommendation of award or the project in general, please do not hesitate to contact me.

Sincerely,

Douglas K. Hammann, P.E.

SECTION 00400

BID SUBMISSION CHECKLIST

Project Name: **SCADA SYSTEM UPGRADE, MAIN WATER TREATMENT PLANT**

Bid Number: **2021B-003**

Bidder=s Name: Revere Control Systems, Inc.

The following items must be submitted in the following order with your bid:

1. 9 Completed Section 00400 - Bid Submission Checklist.

2. 9 Completed Section 00410 - Bid Form.

3. 9 Completed Section 00430 - Bid Bond, complete with Power of Attorney.

4. 9 Completed Section 00431 – Tabulation of Subcontractors and Suppliers.

5. 9 Completed Section 00440 – Florida Trench Safety Act Certification.

6. 9 Completed Section 00451 –Qualifications Statement.

7. 9 Completed Section 00452 – Bidder's Statement of Disputes, Litigation, Arbitration, and Surety Completion – Last Three (3) Years

8. 9 Completed Section 00453 - Non-Collusive Affidavit.

9. 9 Completed Section 00454 - Drug-Free Workplace.

10. 9 Completed Section 00455 - Public Entity Crimes.

11. 9 Completed Section 00456 - Scrutinized Companies Certification Form.

12. 9 Provide requested bidder qualification information per Section 00200 - Instructions to Bidders, Articles 3.1, 3.2, 3.3, and 3.4.

13. 9 Current insurance certificate showing that bidder can meet the insurance requirements per Specification Section 00815 - Supplementary Conditions, Article SC-5.04 and SC-5.06, A.

14. 9 Signed copy of all Addenda.

Submit one (1) original and two (2) copies of all documents listed above. Original shall be clearly marked Original.

Failure to provide the above listed items may result in your bid being deemed non-responsive.

SECTION 00410

BID FORM

ARTICLE 1 – BID RECIPIENT

1.01 This Bid is submitted to:

Village of Palm Springs
226 Cypress Lane
Palm Springs, FL 33461

1.02 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2 – BIDDER'S ACKNOWLEDGEMENTS

2.01 Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security. This Bid will remain subject to acceptance for 120 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

ARTICLE 3 – BIDDER'S REPRESENTATIONS

3.01 In submitting this Bid, Bidder represents that:

A. Bidder has examined and carefully studied the Bidding Documents, and any data and reference items identified in the Bidding Documents, and hereby acknowledges receipt of the following Addenda:

Addendum No.	Addendum, Date
Addendum 01	February 01, 2021
Addendum 02	February 16, 2021
Addendum 03	March 8, 2021

B. Bidder has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and satisfied itself as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Bidder is familiar with and has satisfied itself as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Not used.

E. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and any Site-related reports and drawings identified in the Bidding Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and

performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder; and (3) Bidder's safety precautions and programs.

F. Bidder agrees, based on the information and observations referred to in the preceding paragraph, that no further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of this Bid for performance of the Work at the price bid and within the times required, and in accordance with the other terms and conditions of the Bidding Documents.

G. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

H. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and confirms that the written resolution thereof by Engineer is acceptable to Bidder.

I. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance and furnishing of the Work.

J. The submission of this Bid constitutes an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article, and that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

ARTICLE 4 – BIDDER'S CERTIFICATION

4.01 Bidder certifies that:

A. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation;

B. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid;

C. Bidder has not solicited or induced any individual or entity to refrain from bidding; and

D. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 4.01.D:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the e execution of the Contract.

ARTICLE 5 – BASIS OF BID

5.01 Bidder will complete the Work in accordance with the Contract Documents for the following price(s):

Lump Sum Bid Price	$ 816,000.00
Lump Sum Contingency Allowance (Section 01010, 1.05)	$ 50,000.00

Total of Lump Sum Price $ 866,000.00

Eight Hundred Sixty-Six Thousand and 00/100 Dollars

(written)

ARTICLE 6 – TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete within 270 calendar days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 300 calendar days after the date when the Contract Times commence to run.

6.02 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 7 – ATTACHMENTS TO THIS BID

7.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. List of Proposed Subcontractors;

C. List of Proposed Suppliers;

D. List of Project References;

E. Evidence of authority to do business in the state of the Project;

F. Contractor's License Number;

G. Required Bidder Qualification Statement with supporting data; and

H. Documentation per Section 00200 – Instructions to bidders, page 8, Article 15.04.

ARTICLE 8 – DEFINED TERMS

8.01 The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 9 – BID SUBMITTAL

BIDDER: *[Indicate correct name of bidding entity]*

Revere Control Systems, Inc.

By:
[Signature] Nan Johnson

[Printed name] Nan Johnson, Vice President of Municipal Systems

(If Bidder is a corporation, a limited liability company, a partnership, or a joint venture, attach evidence of authority to sign.)

A. Introduction

Thank you for the opportunity to present our proposal for the referenced project. We will furnish instrumentation equipment and PLC Panels programmed as an integrated system and maintain system responsibility for the functional operation as defined in the specifications. Your project deserves the most reliable equipment and best possible cost-performance ratio available for this application, and we will deliver such a system to you while still meeting all the functional requirements of the specifications.

Revere is an ideal match for your SCADA System Upgrade Main WTP project. We will deliver the kind of value you expect and deserve on this project for the following reasons:

- We are a certified Solution Provider for Rockwell Automation products and software, assuring that your system will enjoy the highest level of expertise available in implementing the system design.)
- Revere Control Systems (RCS) is an Advanced Certified VTScada System Integrator

We look forward to serving you and to delivering a system that will give you many years of valuable service.

B. Project Scope

Drawings and Specifications by: Eckler Engineering

Specifications

Section	Description
13700	Process Instrumentation and Controls
13710	Programmable Logic Controller
13711	Existing SCADA System Modifications
13712	Local HMI System Development
13725	Loop Functions/Programming Strategies/Protocol
13750	SCADA System Software
13751	RTU Subsystem
13752	Computers and Accessories
13753	Operator Consoles and Accessories
13759	Modifications to Existing Field panels, MCC's and PLCs

Addenda: 1, 2, 3

1. Management

A. Project Management
Project Coordination and Scheduling

B. Project Meetings:
- One (1) Pre-construction Conference
- Nine (9) Progress Meetings
- One (1) Pre-installation Conference

2. Engineering Documentation Packages

A. Documentation Packages
- Field Instrumentation Submittal with Manufacturer Cutsheets
- Control Panel Hardware and Drawings Submittal
- Software Submittal including HMI Graphics and Functional Control Strategies
- Computer and Network Hardware/Software Submittal
- Factory and Field Test Plan Submittal
- Training Plan Submittal
- Fiber Optic Submittal
- ISA S5.4 Loop Diagrams Submittal
- Operations & Maintenance Manuals

3. Programming / Software Configuration

A. PLC Programming
- PLC programming

B. OIT Programming
- Not Provided – Panel Mounted Operator Terminals are View Nodes to the Plant HMI Application

C. HMI Programming/Configuration
- VTScada HMI Application including Database, Graphics, Historical Data, Trending
- Two (2) Data Reports per Owner's Direction
- Configure regular file backup for owner furnished offsite file/data backup service

4. PLC Control Panels

4.01 PLC Panels

Qty	Description	Tag
1	Remote I/O-MCP consists of the following: - 48x42x24" steel, NEMA1, wall-mounted enclosure - Externally mounted filter fan w/filter - Front panel mounted louvers - AB MicroLogix PLC - 21.5" Phoenix panel mounted workstation - (2) 8-port Ethernet switches - (3) Media converters - Fiber optic patch panel - (9) Circuit breakers - (1) 50VA isolation transformer - (4) Time delay relays - (1) Pilot light - 24VDC power supply - UPS - Surge protection	Remote I/O-MCP DI-8 (32 w/spares) DO-3 (32 w/spares) AI-6 (10 w/spares) AO-0
1	Unit Process 4 – Disinfection (NaOCl Storage) Modifications control panel consists of the following: - 72x42x24", NEMA12, free-standing enclosure w/deadfront - Thermostatically controlled externally mounted fan w/filter - Front mounted louvers - AB MicroLogix PLC - 8 port Ethernet switch - Media converter - Fiber optic patch panel - (1) 50VA isolation transformer - (2) Selector switch - (4) HOA switch - (7) Pilot lights - (6) Relays - (1) Process display - (1) Visual strobe - (1) 1P, 30A circuit breaker - (8) 1P, 20A circuit breaker - (3) 1P, 10A circuit breaker - (1) 2P, 60A circuit breaker - 24VDC power supply - UPS - Surge protection	FP-4-2 DI-9 (9 w/spares) DO-8 (12 w/spares) AI-0 (12 w/spares) AO-1 (8 w/spares)

1	Unit Process 5 – Filtration Modifications control panel consists of the following: - (4) 52x30x30", 316SS, NEMA4X, floor-mounted enclosure - (4) 52"x30" subpanel - (4) 52"x30" deadfront - Panel lights - (9) Circuit breakers - Thermostat - Fan - AB MicroLogix PLC - 21.5" Phoenix panel mounted workstation - Media converter - (2) 8-port Ethernet switch - Fiber optic patch panel - (29) Pilot light - (31) Relay - (9) HOA switch - (2) Pushbutton - (11) Selector switch - (1) 120/24VAC stepdown transformer - (1) Resistance/current converter potentiometer switch - 24VDC power supply - UPS - Surge protection	FP-5-1 DI-82 DO-41 AI-6 AO-6
1	Unit Process 7 Washwater Recovery Modifications Remote I/O-WWR consists of the following: - 30x30x18" 316SS, NEMA4X wall-mounted enclosure - SS Sunshield - Thermostat - Intake & exhaust filter fans w/hoods - AB MicroLogix PLC - 8-port Ethernet switch - Media converter - Fiber optic patch panel - (10) Circuit breakers - (5) Relays - (1) Pilot light - 24VDC power supply - UPS - Surge protection	RIO-WWR DI-12 (16w/spares) DO-4 (8w/spares) AI- 4 w/spares AO-4 w/spares

1	Main Lift Station RTU consists of the following: - 30x30x18" 316SS, NEMA4X wall-mounted enclosure - SS Sunshield - Thermostat - Intake & exhaust filter fans w/hoods - AB CompactLogix PLC - 8-port Ethernet switch - Media converter - Fiber optic patch panel - (10) Circuit breakers - (5) Relays - (1) Pilot light - 24VDC power supply - UPS - Surge protection	Main Lift Stn RTU DI-24 DO-8 AI-12 AO-8

Factory Acceptance Test (Lakeland, FL location)

- Un-witnessed Factory Test (UFT)
- Witnessed Factory Test (WFT); travel expenses and lodging not included.

5. Local Control Panels

- None included.

6. Field Equipment

FIELD EQUIPMENT		
Qty	**Description/Location**	**Tag**
6	RF Admittance/capacitance level transmitters ~ 11 ft probe length	LT-5-2-XA, XB
	Above with sunshields and surge arrestor as required by specification.	
	Stanchions, mounting racks, root valves, tubing, and stilling wells by others.	

7. Computer / Software / Network & Communications

NETWORK, COMPUTERS & SOFTWARE		
Qty	**Description**	**Notes**
1	Reusing existing network rack/server enclosure modifications consists of the following: - Furnish and install fiber optic patch panel - Furnish and install (2) slide out trays - Furnish and install (2) SCADA computers/servers - Furnish and install (1) UPS - Furnish and install (1) Ethernet switch w/8 fiber optic connections	
3	24” monitors	
1	65” monitor	
1	Laser printer	
2	Keyboard & mouse	
2 sets	Speakers	
2	Power strips	
2	VTSCADA runtime license update – Main WTP & RL Pratt WTP	
2	VTSCADA development license update – Main WTP & RL Pratt WTP	
2	VTSCADA thin clients license update – Main WTP & RL Pratt WTP	
1	48”x72” SCADA network console/desk	

COMMUNICATIONS		
Qty	**Description**	**Notes**
1 lot	12 strand multimode OM2 fiber optic cable	

8. On-Site Services

A. Onsite Services (Revere Staff Members)

- Instrument Calibration and Start-up for Revere Supplied Field Equipment
- Termination and Testing of Fiber Optic Cable
- Establish Network Communications
- Loop (I/O) Checkout for Equipment Connected to Revere Supplied Panels wiring terminations to be performed by others
- A minimum of five (5) days construction/installation assistance is included – PICS section
- A minimum of five (5) days I&C system(s) startup/calibration is included – PICS section
- A minimum of one (1) day construction/installation assistance is included – PLC section
- A minimum of two (2) days PLC system(s) startup/modifications is included – PLC section
- A minimum of five (5) days testing is included is included – existing SCADA modifications section
- ADDITIONAL two (2) days programming modifications is included – existing SCADA modifications section
- Operational Readiness Test (ORT)
- System Performance Test (SAT)

B. Training (Revere Staff Members)

- Onsite training
  - Five (5) 8-hour PICS owner personnel training sessions
  - One (1) 8-hour PLC owner personnel training session
- All training is performed by qualified Revere Control Systems personnel unless specified herein.

9. Special Services

MODIFICATION TO EXISTING EQUIPMENT		
Qty	**Description**	**Notes**
1	Professional preconstruction video-audio tape of existing conditions of project impact areas per section 01720.	
1	Concrete sidewalk repair per drawing C-02	
1	Patch stucco and repaint wall per drawing C-02	
1	MIEX system PLC-3-8 modifications consists of the following: - Furnish and install Micrologix PLC modules - Furnish and install (2) media converters - Furnish and install fiber optic patch panel - Furnish and install 21.5" Phoenix panel mounted workstation - Furnish and install(1) circuit breaker	PLC-3-8 DI-19 (31 w/spares) DO-5 (12 w/spares) AI-4 (8 w/spares) AO-3 (4 w/spares)

1	PLC-9-2 Unit Process 9 Finished water (storage & hi svc) pumping modifications consists of the following: - Furnish and install CompactLogix PLC and corresponding I/O modules - Furnish and install 8-port Ethernet switch - Furnish and install media converter - Furnish and install fiber optic patch panel	PLC-9-2 DI-26 (41 w/spares) DO-6 (17 w/spares) AI-10 (12 w/spares) AO-10(12 w/spares)

10. Project Close Out

A. SPARE PARTS		
Qty	**Description**	**Specification Section**
	None included.	

B. TOOLS & TEST EQUIPMENT		
Qty	**Description**	**Specification Section**
	None included.	

11. Project Pricing and Timelines

Reference Bid Form for Pricing Information

Pricing: Quotation is valid for sixty (60) days.

12. Warranty

Warranty shall run for a period of twenty-four (24) months after acceptance.

Thank you for your consideration of Revere Control Systems. We look forward to working with you on this project.

Sincerely,

Jean Mead

Bid Bond

CONTRACTOR:
(Name, legal status and address)

Revere Control Systems, Inc.
2240 Rocky Ridge Rd.
Birmingham, AL 35216

SURETY:
(Name, legal status and principal place of business)
The Hanover Insurance Company
440 Lincoln Street
Worcester, MA 01653
Mailing Address for Notices

OWNER:
(Name, legal status and address)

Village of Palm Springs
226 Cypress Lane
Palm Springs, FL 33461

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

BOND AMOUNT: 5% Five Percent of Amount Bid

PROJECT:
(Name, location or address, and Project number, if any)

SCADA System Upgrade - Main Water Treatment Plant ITB -2021B-003-0-2021/KW

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

Signed and sealed this 11th day of February, 2021.

CITIZENS INSURANCE COMPANY OF AMERICA

POWER OF ATTORNEY

THIS Power of Attorney limits the acts of those named herein, and they have no authority to bind the Company except in the manner and to the extent herein stated.

KNOW ALL PERSONS BY THESE PRESENTS:

That THE HANOVER INSURANCE COMPANY and MASSACHUSETTS BAY INSURANCE COMPANY, both being corporations organized and existing under the laws of the State of New Hampshire, and CITIZENS INSURANCE COMPANY OF AMERICA, a corporation organized and existing under the laws of the State of Michigan, (hereinafter individually and collectively the "Company") does hereby constitute and appoint,

Thomas J. Bole, Sharon E. Griffith, Gregg A. Tatum and/or Grantland Rice, III

Of **Cobbs, Allen & Hall, Inc. of Birmingham, AL** each individually, if there be more than one named, as its true and lawful attorney(s)-in-fact to sign, execute, seal, acknowledge and deliver for, and on its behalf, and as its act and deed any place within the United States, any and all surety bonds, recognizances, undertakings, or other surety obligations. The execution of such surety bonds, recognizances, undertakings or surety obligations, in pursuance of these presents, shall be as binding upon the Company as if they had been duly signed by the president and attested by the secretary of the Company, in their own proper persons. Provided however, that this power of attorney limits the acts of those named herein; and they have no authority to bind the Company except in the manner stated and to the extent of any limitation stated below:

Any such obligations in the United States, not to exceed Twenty-Five Million and No/100 ($25,000,000) in any single instance

That this power is made and executed pursuant to the authority of the following Resolutions passed by the Board of Directors of said Company, and said Resolutions remain in full force and effect:

RESOLVED: That the President or any Vice President, in conjunction with any Vice President, be and they hereby are authorized and empowered to appoint Attorneys-in-fact of the Company, in its name and as it acts, to execute and acknowledge for and on its behalf as surety, any and all bonds, recognizances, contracts of indemnity, waivers of citation and all other writings obligatory in the nature thereof, with power to attach thereto the seal of the Company. Any such writings so executed by such Attorneys-in-fact shall be binding upon the Company as if they had been duly executed and acknowledged by the regularly elected officers of the Company in their own proper persons.

RESOLVED: That any and all Powers of Attorney and Certified Copies of such Powers of Attorney and certification in respect thereto, granted and executed by the President or Vice President in conjunction with any Vice President of the Company, shall be binding on the Company to the same extent as if all signatures therein were manually affixed, even though one or more of any such signatures thereon may be facsimile. (Adopted October 7, 1981 – The Hanover Insurance Company; Adopted April 14, 1982 – Massachusetts Bay Insurance Company; Adopted September 7, 2001 – Citizens Insurance Company of America)

IN WITNESS WHEREOF, THE HANOVER INSURANCE COMPANY, MASSACHUSETTS BAY INSURANCE COMPANY and CITIZENS INSURANCE COMPANY OF AMERICA have caused these presents to be sealed with their respective corporate seals, duly attested by two Vice Presidents, this **11th** day of **March, 2020.**

BIDDER: Revere Control Systems, Inc.

By: Nan Johnson

Name: Nan Johnson

Title: Vice President of Municipal Systems

Date: 3/10/2021

SECTION 00440
FLORIDA TRENCH SAFETY ACT CERTIFICATION

The Bidder acknowledges that included in the various items of the proposal and in the Total Bid Price are costs for complying with the most current version of the Florida Trench Safety Act (90-96, Laws of Florida). The Bidder further identifies the costs to be summarized below:

	Cost
1. Trench Safety Act Compliance	$ 0.00
2. Special Shoring	$ 0.00

Identify method of compliance for Item #1: The Deepest trench required is 24" for direct buried conduit. Unique methods for Trench Safety Act Compliance are not needed.

Identify or attach a copy of Special Shoring Requirements for Item #2: Special shoring is not needed due to the limited depth of 24" for trenches.

The undersigned certifies that he/she is the Contractor who will perform the trench excavation for this project and hereby gives written assurance that Contractor will comply with the applicable trench safety standards specifically set forth in Florida's Trench Safety Act (90-96, Laws of Florida).

NONCOLLUSION AFFIDAVIT

TO: The Village of Palm Springs, herein called the "Owner."

Pursuant to bidding requirements for the work titled "**SCADA System Upgrade, Main Water Treatment Plant**," the enclosed contract documents shall be provided to the Owner.

State of Alabama

County of Jefferson

Nan Johnson, being first duly
(Officer's Name)

sworn, deposes, and says that:

A. He\She is Vice President of Municipal Systems (officer's title) of Revere Control Systems, Inc. (company name), the Bidder that has submitted the attached bid;

B. He\She is fully informed respecting the preparation and contents of the attached bid and of all pertinent circumstances respecting such bid;

C. Such bid is genuine and is not a collusive or sham bid;

D. Neither the said Bidder nor any of its officers, partners, owners, agents, representatives, employees, or parties in interest, including this affiant, has in any way colluded, conspired, connived, or agreed, directly or indirectly with any other Bidder, firm, or person to submit a collusive or sham bid in connection with the contract for which the attached bid has been submitted or to refrain from bidding in connection with such contract, or has in any manner, directly or indirectly, sought by agreement or collusion or communication or conference with any other Bidder, firm, or person to fix the price or prices in the attached bid or of any other Bidder, or to fix any overhead, profit, or cost element of the bid price or the bid price of any other Bidder, or to secure through any collusion, conspiracy, connivance, or unlawful agreement any advantage against the _____ or any person interested in the proposed contract; and

E. The price or prices quoted in the attached bid are fair and proper and are not tainted by any collusion, conspiracy, connivance, or unlawful agreement on the part of the Bidder or any of its agents, representatives, owners, employees, or parties in interest, including this affiant.

SECTION 00454
DRUG-FREE WORKPLACE CERTIFICATE

I, the undersigned, in accordance with Florida Statute 287.087, hereby certify that Revere Control Systems, Inc. (Print or Type Name of Firm)

- Publishes a written statement notifying that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.
- Informs employees about the dangers of drug abuse in the workplace; the firm's policy of maintaining a drug-free working environment and available drug counseling, rehabilitation, and employee assistance programs; and the penalties that may be imposed upon employees for drug-use violations.
- Gives each employee engaged in providing commodities or contractual services that are under bid or proposal a copy of the statement specified above.
- Notifies the employees that as a condition of working on the commodities or contractual services under bid or proposal, the employee will abide by the terms of the statement and will notify the employer of any conviction of or plea of guilty or nolo contendere to any violation of Chapter 1893 or any controlled substance law of the State of Florida or the United States for a violation occurring in the workplace, no later than 5 days after such conviction, and requires employees to sign copies of such written statement to acknowledge their receipt.
- Imposes a sanction on or requires the satisfactory participation in a drug-abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.
- Makes a good faith effort to continue to maintain a drug-free workplace through the implementation of the drug-free workplace program.

"As a person authorized to sign this statement, I certify that the business, firm, or corporation named above complies fully with the requirements set forth herein."

MELISSA C STEWART NOTARY PUBLIC ALABAMA STATE AT LARGE

SECTION 00455
SWORN STATEMENT UNDER SECTION 287.133(3)(a),
FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES

(To be signed in the presence of a notary public or other officer authorized to administer oaths.)

STATE OF Alabama

COUNTY OF Jefferson

Before me, the undersigned authority, personally appeared Nan Johnson, who, being by me first duly sworn, made the following statement:

1. The business address of Revere Control Systems, Inc.
(firm name of Bidder/Contractor)

is 2240 Rocky Ridge Road, Birmingham, AL 35216.

2. My relationship to Revere Control Systems, Inc.
(firm name of Bidder/Contractor)

is Vice President of Municipal Systems.
(relationship such as sole proprietor, partner, president, vice president)

3. I understand that a "public entity crime" as defined in Section 287.133 of the Florida Statutes includes a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity in Florida or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or such an agency or political subdivision and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

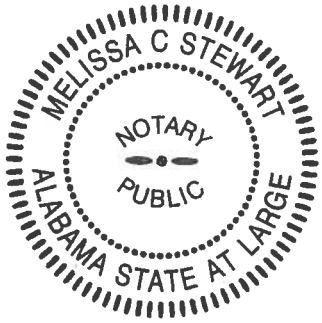
4. I understand that "convicted" or "conviction" is defined by the statute to mean a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

5. I understand that "affiliate" is defined by the statute to mean (1) a predecessor or successor of a person or a corporation convicted of a public entity crime; or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime; or (3) those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate; or (4) a person or corporation who knowingly entered into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months.

6. Neither the Bidder/Contractor nor any officer, director, executive, partner, shareholder, employee, member or agent who is active in the management of the Bidder/Contractor, nor any affiliate of the Bidder/Contractor, has been convicted of public entity crime subsequent to July 1, 1989.

(Draw a line through Paragraph 6 if Paragraph 7 below applies.)

7. ~~There has been a conviction of a public entity crime by the Bidder/Contractor, or an officer, director, executive, partner, shareholder, employee, member or agent of the Bidder/Contractor who is active in the management of the Bidder/Contractor or an affiliate of the Bidder/Contractor. A determination has been made pursuant to Section 287.133(3) by order of the Division of Administrative Hearings that it is not in the public interest for the name of the convicted person or affiliate to appear on the convicted vendor list. The name of the convicted person or affiliate is_____.~~



~~A copy of the order of the Division of Administrative Hearings is attached to this statement.~~

(Draw a line through Paragraph 7 if Paragraph 6 above applies.)

Nan Johnson
(Signature)

Sworn to and subscribed to before me in the State and County first mentioned above on the 8th day of March, 2021.

SECTION 00456
SCRUTINIZED COMPANIES CERTIFICATION FORM

By execution below, I, Nan Johnson, on behalf of Revere Control Systems, Inc. (hereinafter, the "Contractor"), hereby swear or affirm to the following certifications:

The following certifications apply to all procurements:

1. The Contractor has reviewed section 215.4725, Florida Statutes, section 215.473, Florida Statutes and section 287.135, Florida Statutes, and understands the same.
2. The Contractor is not on the Scrutinized Companies that Boycott Israel List nor is the Contractor engaged in a boycott of Israel.
3. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
4. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

If the contract awarded hereunder is for one million dollars or more, the following additional certifications apply:

1. The Contractor is not on the Scrutinized Companies with Activities in Sudan List.
2. The Contractor is not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.
3. The Contractor is not engaged in business operations in Cuba or Syria.
5. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
6. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

CONTRACTOR:
By: Nan Johnson
Name: Nan Johnson
Title: Vice President of Municipal Systems
Date: 3/8/2021

STATE OF ~~FLORIDA~~ Alabama
COUNTY OF Jefferson

The foregoing instrument was sworn to (or affirmed) and subscribed before this 8th day of March, 2021, by Nan Johnson, who is the VP of Municipal Systems of Revere Control Systems, Inc., who is personally known to me or who has produced _____ as identification.

MAJOR PROJECTS COMPLETED

Alabama

January 2021

RCS Job No.	Project Manager	Owner Project	City/County	ST	Architect/ Engineer	Description	W	WW	Year Complete	Total $
K0274	Dave Abel	City of Muscle Shoals: WWTP Renovation & SCADA	Muscle Shoals	AL	Garver Engineers	Instrumentation, SCADA, and network communications for WWTP expansion		X	2011	$372,153
G0168	Gregg Gray	Shelby County Commission: Shelby Co South WTP	Wilsonville	AL	Municipal Consultants	Instrumentation equipment: Five PLC's; RTU's for South, North, and Westover systems; Miscellaneous control panels and workstations	X		2011	$1,712,908
L0399	Nan Johnson	City of Auburn: HC Morgan WPCF Control Systems	Auburn	AL	Revere Control Systems	Wireless Communications, Network Equipment and Configuration, HMI Application		X	2011	$122,464
K0323	Dave Abel	West Morgan/East Lawrence Water Authority: Robert M. Hames WTP Improvements	Hillsboro	AL	InSite Engineering	Upgrade and replace main control PLC, replace SCADA PC, add new vendor controls to SCADA PC, add radio based Internet Server	X		2011	$185,542
M0558 M0559	Nan Johnson	Auburn Water Works Board: James Estes WTF SCADA Replacement	Auburn	AL	Revere Control Systems	PLC Panel design, manufacturing, PLC Programming, HMI Configuration, Startup/Commissioning	X		2012	$186,541
L0930	Dave Abel	Hanceville Water Works & Sewer Board: Hanceville WWTF Upgrade	Hanceville	AL	Goodwin, Mills & Cawood, Inc.	Instrumentation, SCADA, and network communications for WWTP expansion		X	2012	$213,059
K0765	Nan Johnson	City of Dothan: Little Choctawhatchee WWTP	Dothan	AL	Polyengineering, Inc.	Field Instrumentation, PLC Control Panels, Network and Computer Equipment, Software, Site Testing and Commissioning		X	2012	$987,596
L0129	Nan Johnson	City of Orange Beach: Orange Beach Electrical and Controls	Orange Beach	AL	McMillan Engineering Services	Design-Build - Field Instrumentation, MCCs, VFDs, PLC Control Panels, Computer/Network Hardware and Software, PLC and HMI Programming, Startup & Commissioning		X	2012	$2,518,828
M0471	James Noe	Birmingham Water Works Board: New SCADA Radio Sites	Birmingham	AL	Revere Control Systems	RTU Panels and accessories installed in various sites across Jefferson County to read presssure and flowback to the SCADA System	X		2012	$347,809
M0673	Dave Abel	Albertville Municipal Utilities Board: Wastewater & Water Meter Telemetry	Albertville	AL	Revere Control Systems	Wastewater plant computer, HMI, Repeater; two lift stations telemetry; three water meter sites telemetry	X	X	2012	$171,712
M0860	Nan Johnson	Auburn Water Works Board: WTP Well No 3	Auburn	AL	Bayfour Design (Electrical) Baskerville-Donovan (Mechanical)	PLC/RTU Control Panel for Well, Wireless and Network Communications, PLC Programming, HMI Configuration, Startup & Commissioning	X		2012	$119,582

RCS Job No.	Project Manager	Owner Project	City/County	ST	Architect/ Engineer	Description	W	WW	Year Complete	Total $
K0432	James Noe	Birmingham Water Works & Sewer Board: Shades Mountain WTP Phase II	Birmingham	AL	Malcolm Pirney	Professional Services - PLC Control Panels, Computer/Network Hardware, Testing	X		2012	$1,225,933
N0372	Gregg Gray	Arley Water Works Board: Water Upgrade	Arley	AL	Revere Control Systems	Professional Services - PLC Control Panels, Computer/Network Hardware and Software, PLC and HMI Programming, Startup & Commissioning	X		2012	$104,285
M0467	Dave Abel	City of Florence, AL: Cypress Creek WWTP SCADA Improvements	Florence	AL	Municipal Consultants	Upgraded system of the I/A Series© control system at Cypress Creek WWTP		X	2013	$389,100
M0244	Don Dean	City of Marbury, AL: Marbury System Modifications	Marbury	AL	Sherlock, Smith & Adams	Continuing SCADA Support Services as requested by the Owner	X		2013	$107,057
M0799	Nan Johnson	City of Enterprise, AL: Enterprise Telemetry	Enterprise	AL	Polyengineering, Inc.	Field Instrumentation, RTU Control Panels, PLC Programming, HMI Configuration, Radio Configuration, Startup and Commissioning	X		2013	$114,081
N0084	Nan Johnson	City of Auburn, AL: HC Morgan WPCF Improvements	Auburn	AL	CH2M Hill	Field Instrumentation, PLC Control Panels, PLC Programming, HMI Configuration, Startup and Commissioning		X	2013	$239,785
P0252	James Noe	Jefferson County Commission: Valley Creek Hardware	Bessemer	AL	Revere Control Systems	Hardware for PLC and SCADA upgrade at the Dewatering Facility		X	2013	$112,931
N0739	Nan Johnson	Auburn Water Works Board: James Estes WTP Clearwell 4	Auburn	AL	Barge, Waggoner, Sumner & Cannon	PLC Control Panels, PLC Programming, HMI Configuration, Network Infrastructure (Fiber), Installation/Coordination, Startup & Commissioning	X		2013	$263,396
P0104	James Noe	Trussville Utilities Board: Trussville Water System Telemetry	Trussville	AL	Revere Control Systems	RTU Panels, Cellular Communications, PLC Programming, HMI Configuration, Installation, Startup & Commissioning, Training, Continuing Support	X		2014	$215,566
P0105	James Noe	Trussville Utilities Board: Trussville Gas System Telemetry	Trussville	AL	Revere Control Systems	RTU Panels, Cellular Communications, PLC Programming, HMI Configuration, Installation, Startup & Commissioning, Training, Continuing Support	-	-	2014	$215,566
R0223	James Noe	Auburn Water Works Board: Lift Station Improvements	Auburn	AL	Revere Control Systems	RTU Panels, Radio Communications, PLC Programming, HMI Configuration, Installation, Startup & Commissioning, Training, Continuing Support	X		2014	$166,326
P0674	James Noe	Auburn Water Works Board: Lake Ogletree Raw Water Pump Station	Auburn	AL	CH2M Hill	PLC Control Panels, PLC Programming, HMI Configuration, Startup & Commissioning, Owner Training	X		2015	$160,590
R0171	James Noe	Auburn Water Works Board: Lift Station Improvements	Auburn	AL	Revere Control Systems	Upgraded hardware and software for the Radio, PLC and SCADA systems, Startup & Commissioning, Owner Training		X	2015	$232,613
N0674	James Noe	Marshall Space Flight Center: East Area Industrial Water System	Huntsville	AL	Barge, Waggoner, Sumner & Cannon	Industrial water distribution revitalization project: SCADA, Control Panels, Field Equipment, Project Management, Engineering, PLC/HMI Programming, Startup, Training	X		2016	$582,584

RCS Job No.	Project Manager	Owner Project	City/County	ST	Architect/ Engineer	Description	W	WW	Year Complete	Total $
U0156	James Noe	Montgomery Water Works and Sanitary Sewer Board: Montgomery Pump Station	Montgomery	AL	CH2M Hill	PLC hardware, Field Instrumentation, Telemetry RTU Equipment, PLC Programming, Network Equipment, HMI Configuration, Startup & Commissioning, Training		X	2017	$148,897
V0592	Nan Johnson	West Morgan/East Lawrence Water Authority: W Morgan/E Lawrence WTP SCADA	Hillsboro	AL	Insite Engineering	Provided SCADA System modifications for Temporary PFOA and PFOS Treatment System, including PLC Programing, modification of the existing Wonderware HMI application, PLC control panel, communications, startup, support	X		2017	$135,645
W0007	Gregg Gray	Dothan Utilities: Little Choctawhatchee WWTP SCADA Upgrade	Dothan	AL	Revere Control Systems	SCADA System Upgrades: new server hardware with virtualization, client workstations, software upgrades, installation services, testing, documentation, start-up assistance, owner training, technical assistance		X	2017	$117,382
V0488	James Noe	Jefferson County Environmental Services: Cahaba River/Trussville WWTP Improvements Phase II	Trussville	AL	CDM Smith	Instrumentation & Controls Package: new PLCs, RTUs, Control Panels, modification of existing control panels, computer system migration to new control system, field instrumentation and calibration, testing, training		X	2019	$1,491,373
W1059	Gregg Gray	City of Piedmont, AL: Piedmont WTP Upgrade	Piedmont	AL	Utility Engineering Consultants	Radio System Upgrade, Field Instrumentation, PLC Programming, HMI Configuration	X		2019	$195,404
Y0653	Lance Owens	Childersburg Water Sewer & Gas: Telemetry Improvements	Childersburg	AL	Revere Control Systems	Pump Control Panels with Operator Interface Terminals, Cellular Communications and Centralized HMI Application Development	X		2019	$124,839
Y0225	James Noe	Montgomery Water Works & Sanitary Sewer Board: CT Perry WTP Filters 1-8 Automation Upgrades	Montgomery	AL	CH2M Hill	Instrumentation & Control for process systems and fiber optic communciations system: project management, programming, filter control panels, field equipment, on-site services, training	X		2019	$354,232
Y0299	James Noe	Jefferson County Environmental Services: Minor Parkway Pump Station Improvements	Birmingham	AL	CH2M Hill	Field Instrumentation, Control Panels, PLC Programming, HMI Programming, Startup & Commissionin		X	2020	$399,640
Y0437	Lance Owens	City of Cullman: Cullman WTP SCACA Communication & Fiber System	Cullman	AL	Goodwin, Mills & Cawood, Inc.	Updated all WTP PLCs to CompactLogix, Provided New Chemical Building PLC Control Panel, Replaced DH+ Comms with Fiber, Replaced 4 panels in pipe galleries, Provided New Workstations, and added New Chemical Building elements and Flash Mixers to SCADA.	X		2020	$818,037

RCS Job No.	Project Manager	Owner Project	City/County	ST	Architect/ Engineer	Description	W	WW	Year Complete	Total $
W1044	James Noe	Jefferson Cty Environmental Services, Valley Creek	Jefferson County	AL	Hazen & Sawyer	SCADA and PLC for Process Optimization Improvements; Field Instrumentation, Control Panels, PLC Programming, HMI Programming, Training, Startup & Commissioning		X	2020	$1,951,358
Z0807	James Noe	Montgomery Water Works & Sanitary Sewer Board: Montgomery Pump Station Improvements (PS 2 & 33)	Montgomery	AL	Jacobs Engineering Group	Pump Station Improvements project, including new PLC panels, new Pump Control panels, Field Instruments, and SCADA updates		X	2020	$174,982
Y0683	James Noe	City of Alexander City Adams WTP SCADA Improvements	Alexander City	AL	CH2M Hill	WTP SCADA Upgrade, Updated all WTP PLCs with 3 new PLCs, PLC programming and HMI programming	X		2020	$156,077
Z0127	James Noe	Jefferson Cty Environmental Services Jefferson County Improvements	Jefferson County	AL	Revere Control Systems	Electrical & Process Improvements; Field Instrumentation, Control Panels, PLC Programming, HMI Programming, Training, Startup & Commissioning		X	2020	$609,140

Revere Control Systems, Inc.
MAJOR PROJECTS COMPLETED

Arizona

January 2021

RCS Job No.	Project Manager	Owner/Project	City/County	State	Architect/ Engineer	Description	W	WW	Year Complete	Total $
L0610	Nan Johnson	Pima County Water Reclamation Department Ina Road WRF	Pima County	AZ	CH2M Hill	Field Instrumentation, Control Panels, Design, Factory Testing, Startup/Commissioning		X	2014	$3,882,344

Revere Control Systems, Inc.
MAJOR PROJECTS COMPLETED

Colorado

January 2021

RCS Job No.	Project Manager	Owner/Project	City/County	State	Architect/ Engineer	Description	W	WW	Year Complete	Total $
U0082	James Noe	Coca Cola Refreshments: Effluent Monitoring Systems Phase II	Denver	CO	MWH Americas	Furnished, programmed and installed a new PLC Control Panel to control the Effluent pH Neutralization control Project Management, Engineering, PLC/HMI/SCADA Programming, Field Equipment, Installation, Testing, Onsite Services, Training		X	2017	$277,713
Y0581	Jay Wagner	City of Greeley, CO: Greeley Water Polution Control Facility Blower Replacement	Greeley	CO	STANTEC	Upgraded Blower Control Panel PLC from Allen-Bradley PLC 5 to ControlLogix. Implemented very sophisticated blower control logic at PLC and updated iFix SCADA for new blower controls and addition of new blowers.		X	2020	$24,937

Revere Control Systems, Inc.
MAJOR PROJECTS COMPLETED

Florida

January 2021

RCS Job No.	Project Manager	Owner/Project	City/County	State	Architect/ Engineer	Description	W	WW	Year Complete	Total $
K0622	Nan Johnson	City of Sunrise Annual Maintenance Contract	Sunrise	FL	Revere Control Systems, Inc.	Preventative maintenance; equipment repair, maintenance, and calibration services for metering devices for wasterwater plants, water plants, and lift stations; corrective work; master plan for SCADA controls as well as replacement and repair; computers, accessories and software repair and replacement; professional services for SCADA controls, enhancements, upgrades and expansion for wasterwater and water systems, as needed	X	X	2011	$595,699
K0074	Derick Lamar	Pinellas County Board of Commissioners Reclaimed Water Interrupt Service	Pinellas County	FL	McKim & Creed	Reclaim Water Monitoring and Storage Pon Valve Control RTUs with Motorola ACE CPU. Instrumentaiton included Level, Flow, and Pressure.		X	2011	$166,038
L0205	Mitchel Gibbs	Bonita Springs Utilities Snell Lane Ground Storage Tank	Bonita Springs	FL	CH2M Hill	Instrumentation including analytical devices, magmeters, and pressure transmitters, 1 x NEMA 12 Control Panel with A-B PLC, limited spares, and an alternate pressure valve	X		2011	$115,639
J0473	Nan Johnson	Polk County Board of County Commissioners Oak Hills/Providence WPF	Loughman	FL	Post Buckley, Schub & Jernigan, Inc.	Pressure instrumentation; three Motorola well RTU panels; master interface control panel; two SCADA servers and one historical server with workstation; programming for Motorola radio communication, Motorola PLC logic, and Trihedral VTSCADA HMI configuration; field testing, startup, and commissioning services	X		2011	$480,962
K0379	Nan Johnson	Florida Power & Light Loxahatchee East WRF	West Palm Beach	FL	Jordan, Jones & Goulding	Field instrumentation; design and manufacture of three chemical tank level control panels, twelve motor operated valve control panels, and one PLC Control Panel (Siemens S7-300); one workstation with HMI Software (iFix); fiber optic cable; field testing, startup, and commissioning services		X	2011	$474,995
H0567	Nan Johnson	Tohopekaliga Water Authority Stoneybrook South Rapid Infiltration Basin Telemetry	Longwood	FL	Franklin Heart & Reid	Field Instrumentation, RTU Panels, PLC Programming, HMI Configuration, Field Checkout & Startup	X		2011	$229,201
K0278	Nan Johnson	Desoto County, FL: Desoto Correctional Institute	Desoto County	FL	Intertate Engineering	Field Instrumentation, PLC Control Panels, Startup & Commissioning Services	X		2011	$148,351

RCS Job No.	Project Manager	Owner/Project	City/County	State	Architect/ Engineer	Description	W	WW	Year Complete	Total $
L0729	Nan Johnson	City of Sunrise, FL: Sunrise Maintenance Contract	Sunrise	FL	Revere Control Systems, Inc.	SCADA Maintenance Services – Field Instrument Calibrations, Network Equipment and Maintenance	X	X	2011	$361,939
L0115	Nan Johnson	City of Boca Raton, FL: Final Clarifier Refurbishments and Improvements	Boca Raton	FL	Hazen & Sawyer	Field Instrumentation, PLC Panel Modifications, Programming, Startup & Commissioning Services		X	2011	$104,492
M0474	James Noe	Collier County, FL: North County Regional WTP Phase I PLC I/O Replacement	Naples	FL	AECOM Technical Services	Project Management and Engineering Services; Software Configuration and Programming; Testing; Onsite Services/Installation; Training	X		2012	$150,000
M0824	James Noe	Collier County, FL: North County Regional WTP Phase II PLC I/O Replacement	Naples	FL	AECOM Technical Services	Project Management and Engineering Services; Software Configuration and Programming; Testing; Onsite Services/Installation; Training	X		2012	$139,623
L0602	Dave Abel	Seminole County, FL: Regional WTF at Yankee Lakes	Seminole County	FL	Revere Control Systems, Inc.	Furnish and commission instruments, control panels, and add statu and control programming to existing Wonderware SCADA System		X	2012	$145,236
M0227	Nan Johnson	City of Tampa, FL: Sulphur Springs Upper Weil & Pump Station	Tampa	FL	CH2M Hill	Field Instrumentation, Control Panels, PLC Programming, HMI Configuration, Site Testing and Commissioning	X		2012	$185,951
K0641	Dave Abel	Seminole County, FL: Lake Mary Greewood Lakes WRF	Seminole County	FL	Reiss Environmental	Furnish instrumentation, Motorola PLC panels, PLC programming and additions to existing Seminole SCADA system for plant upgrades		X	2012	$606,467
L0756	Jeff Grove	City of West Palm Beach Utilities Department: WTP Automation Improvements	West Palm Beach	FL	Jordan Jones & Goulding	RIO Panels, field instrumentation, insallation	X		2012	$1,451,282
M0029	Dave Abel	Seminole County, FL: Yankee Lakes WRF Phase 2A	Seminole County	FL	AECOM Engineering Corporation	Furnished instrumentation, Motorola PLC panels, PLC programming and additions to existing Seminole SCADA system for plant upgrades		X	2012	$500,731
M0705	Nan Johnson	City of Sunrise, FL: Sunrise Maintenance Contract	Sunrise	FL	Revere Control Systems, Inc.	SCADA Maintenance Services – Field Instrument Calibrations, Network Equipment and Maintenance	X	X	2012	$511,440
L0648	Dave Abel	Seminole County Envirnomental Services: Indian Hills WTP Improvements	Seminole County	FL	Malcolm Pirnie	Provided instruments, Motorola CP and alarm panels, PLC and SCADA programming for effluent pumping and chemical treatment	X		2013	$107,878
M0450	Dave Abel	Polk County Board of County Commissioners: New Mann Road WPF & Palmore Well Interconnect	Polk County	FL	Chastaine-Skillman, Inc.	Provided instruments, (1) Motorola CP, (1) remote well I/O, PLC and SCADA programming for station pumping and tank level controls	X		2013	$204,677
N0489	James Noe	Board of County Commissioners: North County WTP IO Replacement-Ph III	Collier County	FL	AECOM Technical Services	Project Management and Engineering Services; Software Configuration and Programming; Testing; Onsite Services/Installation; Training	X		2013	$143,396

RCS Job No.	Project Manager	Owner/Project	City/County	State	Architect/ Engineer	Description	W	WW	Year Complete	Total $
N0879	James Noe	Board of County Commissioners: Collier County NCRWTP I/O Replacement Phase IV	Collier County	FL	AECOM Technical Services	Project Management and Engineering Services; Software Configuration and Programming; Testing; Onsite Services/Installation; Training	X		2013	$104,717
M0366	Dave Abel	City of St. Petersburg: St. Pete Northeast WRF	St. Petersburg	FL	Revere Control Systems, Inc.	Replaced 4 filter operator stations and main CP. Relocated junction boxes from flood area; replace rusted conduit & wire	X		2013	$146,474
N0737	Mike Coomler	City of Sunrise: Maintenance Contract 2012-2013	Sunrise	FL	Revere Control Systems, Inc.	SCADA Maintenance Services – Field Instrument Calibrations, Network Equipment and Maintenance	X	X	2013	$500,000
P0040	Julie Keller	Polk County Board County Commissioners: Hodge Street WPF	Polk County	FL	Tetra Tech	Field Instrumentation, Control Panels, Design, PLC & OIT Programming, Startup/Commissioning	X		2014	$109,387
P0201	Arthur Thomas	Seminole County Envirnomental Services: Pump Station Upgrades	Seminole County	FL	CH2M Hill	SCADA RTU Control Panels, Startup Services		X	2014	$178,330
P0424	Mike Coomler	City of Sunrise: Springtree WTP and Sawgrass WWTP Flowmeter Replacement	Sunrise	FL	Revere Control Systems, Inc.	Replacement of Venturi Flowmeters with Magnetic Flowmeters – Installation and Startup	X		2014	$220,080
P0740	Nan Johnson	City of Sunrise: SCADA Maintenance	Sunrise	FL	Revere Control Systems, Inc.	SCADA Support and Maintenance; Replacement of Field Instrumentation including Flowmeters, Valves, etc.	X		2014	$581,311
N0731	Nan Johnson	Seminole County Environmental Services: County Club WTP	Seminole County	FL	Reiss Engineering	Field Instrumentation, PLC Control Panels, PLC Programming, HMI Configuration, Startup & Commissioning, Owner Training	X		2014	$1,772,169
N0397	Jeff Grove	City of West Palm Beach: WTP Electrical/Generator Building	West Palm Beach	FL	MWH	Field instrumentation, control panels, programming for a new generator building added to their facility	X		2015	$165,388
N0736	Nan Johnson	City of Boca Raton, FL: Boca Raton WTP SCADA Upgrade	Boca Raton	FL	CDM Smith	Field Instrumentation, PLC Hardware and Control Panel Upgrades/Modifications, HMI Upgrade, Standardization of Tagname Conventions, Startup/Commissioning, Training	X		2015	$1,895,187
R0186	James Noe	City of Gainesville, FL: GRU Murphree WTP	Gainesville	FL	CH2M Hill	Upgraded hardware and software on the PLC and SCADA, Startup & Commissioning, Owner Training	X		2015	$776,721
P0927	Nan Johnson	Seminole County, FL: Seminole County Wastewater Pump Station Radio-RTU Cellular Conversion	Sanford	FL	Atkins North America	RTU Upgrades, HMI Application Development, Cellular Modem/Communications, 300 Remote Sites		X	2015	$2,081,124
R0323	Arthur Thomas	City of Orlando, FL: Lift Station Improvements	Orlando	FL	TetraTech/EDA	Field Instrumentation, Lift station Control Panels, Spare Parts, Engineering Design, Production, Factory Testing, Startup/Commissioning		X	2015	$149,200
P0016	Nan Johnson	Miami-Dade County Water & Sewer Department: South District WWTP Cogen Project	Miami-Dade County	FL	Brown & Caldwell	Field Instrumentation, PLC Control Panel, PLC Programming, HMI Configuration, Factory Testing, Field Testing, Startup & Commissioning		X	2015	$720,236

RCS Job No.	Project Manager	Owner/Project	City/County	State	Architect/ Engineer	Description	W	WW	Year Complete	Total $
R0738	Joey Didona	City of Sunrise, FL: SCADA Maintenance Contract 2014-2015	Sunrise	FL	City of Sunrise	Instrumentation, controls, SCADA, and data management services	X	X	2015	$366,298
R0881	Joey Didona	City of West Palm Beach, FL: West Palm Beach SCADA Services	West Palm Beach	FL	Santis Engineering	Installation, programming, modifications and repair of HMI, operating systems, hardware modifications, and scheduled maintenance to ensure reliable operation of the City's WTP instrumentation system.	X		2015	$147,518
P0794	Nan Johnson	Ashland Chemical, Inc.: Chemical Groundwater Recovery System	Orlando	FL	Arcadis	Instrumentation, Pump Control Panel, PLC Control Panel, PLC Programming, OIT Configuration, Remote Communications, Startup & Commissioning	X		2015	$131,085
R0503	Dave Abel	City of Altamonte Springs: A-First Reuse Augmentation Facility	Altamonte Springs	FL	Tetra Tech	Provided control panels and instruments at SW pump station, RAF and flow valve sites. Programming by Owner's rep. and Central SCADA by Owner	X		2016	$306,267
U0335	Nan Johnson	Bonita Springs Utilities: EWRF Screens and Membrane Replacement	Bonita Springs	FL	CH2M Hill	PLC hardware, PLC programming, HMI Configuration, Startup/Commissioning		X	2016	$115,310
P0402	James Noe	St. Johns County Utility Department: Northwest WWTP Phase I	St. Augustine	FL	CDM Smith	Design, PLC Hardware, Local Control Panel Hardware, Field Equipment, SCADA / Networking Hardware, Startup Services		X	2016	$622,232
R0897	Dave Abel	Orange County Utilities: East Service Area Potable Water & Reclaimed Storage & Repump	Orlando	FL	Reiss Engineering	Design, PLC Panels, Field Instruments, PLC and OIT Programming, Startup Services	X	X	2016	$405,990
U0502	Dave Abel	Brevard County, FL: Barefoot Bay WTP Improvements	Barefoot Bay	FL	Wade Trim, Inc.	Design, PLC and Local Panels, Field Instruments, PLC, OIT and SCADA Programming, Startup Services	X		2016	$214,834
U0708	Nan Johnson	Bonita Springs Utilities: BSU I&C for Wells 33, 34, and 35	Bonita Springs	FL	CH2M Hill	Design, PLC Hardware, PLC Programming, HMI Configuration, Startup Services	X		2016	$194,823
R0761	Dave Abel	Seminole County Board of Commissioners: Pump Station Upgrades	Lake Mary	FL	CHP Corp	Furnished control panels and equpiment for six Lift Stations		X	2016	$254,858
U0511	Joey Didona	West Palm Beach: SCADA Services Amendment 2	West Palm Beach	FL	Santis Engineering	Design of Standard RTU and Pump Control Panels, Development of Standard VTScada HMI Application and RTU Control Logic		X	2016	$266,678

Independent Accountant's Review Report

Board of Directors
Revere Control Systems, Inc.

We have reviewed the accompanying financial statements of Revere Control Systems, Inc. (the Company), which comprise the balance sheets as of June 30, 2018 and 2017, the related statements of income, changes in stockholders' equity and cash flows for the years then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Management's Responsibility for the Financial Statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Accountant's Responsibility
Our responsibility is to conduct the review engagements in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the American Institute of Certified Public Accountants. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Accountant's Conclusion
Based on our reviews, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

Other Matter
The accompanying supplementary information is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements. The supplementary information has been subjected to the review procedures applied in our review of the basic financial statements. We are not aware of any material modifications that should be made to the supplementary information. We have not audited the supplementary information and do not express an opinion on such information.

REVERE CONTROL SYSTEMS, INC.

ACTION BY THE BOARD OF DIRECTORS
BY UNANIMOUS WRITTEN CONSENT IN LIEU OF MEETING

The undersigned, being all members of the Board of Directors of Revere Control Systems, Inc., an Alabama corporation (the "Corporation"), hereby authorize, approve, ratify and consent to the following action:

RESOLVED, that Robert R. Adams, Thomas C. York, T. Rick Braddock, Nanette D. Johnson, and/or Jason J. English be authorized and directed to act on, execute, and deliver any agreements, resolutions, and/or documents required on behalf of the Corporation.

EXECUTED this 15th day of April 2020.

DIRECTORS:

Robert R. Adams

Thomas C. York

Thomas M. Adams

G. Gregory Graves

T. Rick Braddock

Jason W. Leeper

Nanette D. Johnson

Marc D. Handley

President — Administration

Robert R. Adams
President/CEO
Birmingham Office

Experience

- Founded Revere Control Systems in 1980
- Responsibilities include: management of all company functions as well as directing the company's business development program
- Previous experience: 7 years in systems integration operations

Specialty Areas

- Business Administration
- Sales

Training/Certification/Memberships

- Co-founder of the Automation Alliance Group, and nationwide marketing alliance of independent system integrators

Education

- Business curriculum, University of Alabama at Birmingham

Engineering

Tom York, PE
Chief Operating Officer

Industry
- Petrochemical
- Specialty Chemical
- Electrical Power Utility
- Pulp and Paper
- Wire and Cable

Experience
- Joined Revere Control Systems in 2014
- Responsibilities include: project management of large design/build projects; standardization and automation of engineering processes; integration of engineering and construction activities
- Previous experience: 21 years in Executive Management in control system integration and construction implementation; 8 years in Plant Engineering and Maintenance Management for wire and cable manufacturing; 7 years in Project Engineering for metals fabrication, tire and rubber manufacturing, and electrical power generation.
- HMI/SCADA: Wonderware Intouch, Rockwell RSView
- PLC: Allen Bradley
- Drives: Allen Bradley, Siemens
- Instrumentation: Rosemount, Yokogawa, Fisher, Foxboro, Honeywell

Specialty Areas
- Design/Build project implementation (total project scope execution)
- Continuous process control
- Front End Engineering Design (FEED) studies
- Site audit and scope development for complex projects
- Construction engineering (conduit/cable schedules, loop sheets, plot plans, etc.)
- Project management

Training/Certification/Memberships
- Registered Professional Engineer – Colorado #PE.0046953

Education
- BSEE Texas A&M University, College Station, TX

Vice President Administration

Nan Johnson, PMP
Vice President of Municipal Systems
Birmingham Office

Industry
- Water & Wastewater
- Industrial

Experience
- Joined Revere Control Systems in 2007
- Responsibilities include: planning, organizing and directing the activities of Municipal Systems so that company objectives are efficiently achieved, company policies and procedures are adhered to, and high customer and employee satisfaction rates are maintained
- Previous experience: 18 years' experience in water/wastewater systems engineering and project management
- HMI/SCADA: FIX 32, iFIX, Cimplicity, RSView32, Wonderware
- Communications: LAN/WAN, Radio (MAS), Ethernet, Modbus, Serial
- PLC: GE 90-30, 90-70, VersaMax, Rx3i, Allen-Bradley SLC, ControlLogix, MicroLogix
- Instrumentation: Flow, Level, Analytical
- Database: SQL Server
- Other: Networks, Field Startup
- Programming Languages: VisualBasic

Specialty Areas
- HMI Configuration
- Communications/Networks
- Field Startup
- Project Management

Training/Certification/Memberships
- Six Sigma Greenbelt Certification
- Professional Employee Management Development Course (PEMDC)
- Firm Price Job Management (FPJM)
- Contract Awareness and Risk Exposure (CARE)
- Project Management Professional (PMP) Certification Number 1203917

Education
- BS Computer Science, University of South Carolina, Columbia, South Carolina
- Associate of Arts, Anderson College, Anderson, South Carolina

Vice President Administration

Jason Leeper, PE
Vice President of Southwest Operations
Texarkana Office

Industry

- Oil and Gas
- Power
- Specialty Chemical
- Pulp and Paper
- Wood Products
- Mining and Aggregates

Experience

- Joined Revere Control Systems in 2014
- Responsibilities include: planning, organizing, and directing the activities for the Southwest Region so that company objectives are efficiently achieved, company policies and procedures are adhered to, and high customer and employee satisfaction rates are maintained.
- Previous experience: 17 years' experience in industrial automation, electrical engineering, project management, and executive management
- HMI/SCADA: RSView32, FTView, Citect
- Communications: Ethernet, Modbus, ControlNet, Serial
- PLC: Allen Bradley PLC 5, SLC, Logix Platforms
- Drives: AB, ABB, Siemens, Toshiba AC VFD's
- Instrumentation: HART, FF, Profibus
- Power Distribution: 600V-15kV MCCs, Switchgear, Transformers (GE, AB, ABB, Siemens, Eaton CH, SQUARED

Specialty Areas

- Front End Engineering Design (FEED) Studies
- I/E Design
- Commissioning/Startup
- Project Management

Training/Certification/Membership

- Licensed Professional Engineer in Electrical Engineering : AR #14704; AZ # 54293; CA #20144; FL #74158; IL #062.064979; LA #37349; MS #20931; NC #47668; NM #21268; NV #22022; OH #76580; OK #25897; TX #111106; UT #8797623-2202; and WV #19954

Education

- BSEE University of Arkansas, Fayetteville, AR

Information Technology

Marc Handley
Vice President of Strategy Process Continuous Improvement

Experience

- Joined Revere Control Systems in September 2006
- Responsibilities include: Network and website design, security analysis, Server installation and upgrades, administration, optimization, and system maintenance; oversight for technology for the company and IT Department
- Previous experience: Prior to joining Revere, Marc has 7 years previous experience, including the design and implementation of converting from a Novell to Microsoft Network; converting GroupWise to MS Exchange for email; installation and maintenance of Spam and Internet Filters; installation of network applications, SQL Server, backup routines and implementation; provision of on-site technical support for customers including troubleshooting and repair of all types of networking equipment; installation, termination and testing of network cabling projects
- Other industry experience: Information Technology, Education, State and Local Government
- Communications: LAN/WAN, Windows 2000, XP, 7, 8, 10, MS Server 2000, 2003, 2008, 2012, Layer 2 and 3 devices, Wireless infrastructure, TCP/IP
- Database: SQL Server 7, 2000, 2005, 2008
- Other: Core Network Infrastructure, Server 2000, 2003, 2008, 2012, VMWare ESXi, and Network Security
- Programming Languages: Java, Visual Basic Scripting, PHP

Specialty Areas

- MS Server Architecture, Server 2000, 2003, 2008, Exchange 2003, 2007, 2010
- LAN/WAN Windows 2000, 2003, 2008, 2012 & Active Directory
- Network Administration

Training/Certification/Memberships

- Microsoft Certified Information Technology Professional (MCITP)
- Microsoft Certified Technology Specialists (MCTS)
- Microsoft Certified Systems Engineer (MCSE)
- Microsoft Certified Systems Administrator with Messaging (MCSAM)
- Microsoft Certified Systems Administrator (MCSA)
- Microsoft Network Product Specialists (MCNPS)
- Microsoft Certified Product Specialists (MCPS)
- Microsoft Certified Professional (MCP)
- Mikrotik Certified Network Associate (MTCNA)
- Ubiquiti Airmax Certified Administrator (UAC)
- Sun Certified Java Programmer (SCJP)
- Barracuda NG Firewall Certified Security Engineer
- Cisco IMINS – Cisco Certified Industrial Networking Specialist

Education

- Management Information Systems Curriculum, Auburn University, Auburn, Alabama

Vice President Administration

Tom Adams
Vice President of Safety, Quality and Compliance
Birmingham Office

Industry
- Water & Wastewater

Experience
- Joined Revere Control Systems in 1980
- Responsibilities include: oversight of safety and quality improvement programs in all departments of the Company; to provide evaluations, procedures, training, inspections and reporting involved in implementation of the company's Health and Safety Plan; quality inspection for conformance to applicable external and internal codes; control systems design, programming, testing, implementation, service, and training.
- Previous experience: 4 years as a control systems draftsman/production technician
- HMI/SCADA: Wonderware, Genesis, PanelView, iFix
- Communications: Radio (MAS, Spread Spectrum), Leased Line
- PLC: Allen-Bradley, Bristol Babcock, OMRON
- Drives: Allen-Bradley, ABB, Magnetek, Benshaw, Dan Foss
- Instrumentation: Flow, Level, Analytical
- Database: Microsoft Access
- Other: Field Startup
- Programming Languages: Visual Basics

Specialty Areas
- Safety
- Quality Assurance

Training/Certification/Memberships
- OSHA General Industry 10-hour and 30-hour authorized trainer
- Member NFPA
- UL508A, UL6988, UL698 Category NNNY Inspector and Trainer
- ISO9001 trained
- CSIA BP&B internal auditor

Education
- Electrical Engineering curriculum, Jefferson State University, Birmingham, Alabama
- Mechanical Engineering curriculum, University of Alabama, Tuscaloosa, Alabama

Municipal Business Development

Jean Mead
Business Development Manager
Florida Office

Industry

- Water & Wastewater

Experience

- Joined Revere Control Systems in 2018.
- Responsibilities include: development and management of business in Florida; generation of proposals, specifications, and bid pricing; assisting consulting engineers and contractors (contract negotiations); preparation of estimate/bids for instrumentation and control projects for municipal water and wastewater customers
- Previous experience: 20 years experience with a major instrumentation distributor in Florida specifying, quoting and closing municipal and industrial instrumentation projects. 10 years experience working with consulting engineers and owners to qualify for projects; estimating, bidding and closing projects with system integrators and providing project management.

Specialty Areas

- Process Instrumentation

Memberships

- ISA
- AWWA

Education

- Business Administration Curriculum, Polk State College
- Marketing Management Curriculum, Polk State College

Project Management

Peter Basily, PMP
Project Manager
Charlotte Office

Industry
- Water & Wastewater
- Industrial

Experience
- Joined Revere Control Systems in 2018.
- Responsibilities include: oversight of all aspects of projects by planning, executing, monitoring, controlling and closing projects to quality standards within customer expectations and company objectives.
- Previous experience: Ten (10) years' experience as Electrical Design Engineer and Project Manager with experience in medium voltage switchgear, low voltage switchboard and motor control center.
- Equipment: Variable Frequency Drives, Soft Start Motor Controllers, Medium Voltage Switchgear, Motor Control Centers

Specialty Areas
- Medium Voltage Switchgear
- Motor Control Centers
- Variable Frequency Drives
- Project Management

Training/Certification/Memberships
- Project Management Professional (PMP) Certification Number 2050759
- Egyptian Syndicate of Engineers Member Number 07500/73

Education
- B.S. in Communications and Electronics Engineering, Alexandria Higher Institute for Engineering and Technology, Alexandria, Egypt

Engineering

Mark Salchli
Engineering Group Manager
Lakeland Office

Industry
- Water & Wastewater
- Industrial – Specialty Minerals, Facility Management, Food & Beverage

Experience
- Joined Revere Control Systems in 2019.
- Responsibilities include: engineering team management, control systems design, programming, testing, implementation, startup, commissioning and support
- Previous experience: Thirty (30) in industrial automation and controls
- HMI/SCADA: Rockwell Software FactoryTalk View
- Instrumentation: Flow, Pressure, Level
- Communications: Ethernet, Ethernet/IP, ControlNet, Profibus
- PLC: Allen Bradley SLC, ControlLogix, CompactLogix
- Other: Design Management, Support and Troubleshooting

Specialty Areas
- Management of Engineering Team for Automation & Controls Projects
- Variable Frequency Drives

Training/Certification/Memberships
- Certified Power Quality Engineer (CPQ)
- Certified Energy Manager (CEM)
- Certified Six Sigma Green Belt

Education
- BSEET, Northern Kentucky University
- MBA, Thomas Moore College

Engineering

Jack Zaiek
Project Engineer III
Lakeland Office

Industry
- Water & Wastewater
- Industrial

Experience
- Joined Revere Control Systems in 2019.
- Responsibilities include: control systems design, programming, testing, implementation, startup and service.
- Previous experience: Twelve (12) years of experience as Electrical Design, Programming, System Maintenance and Support.
- HMI/SCADA: Rockwell Software RSView, FactoryTalk
- Instrumentation: Flow, Pressure, Level
- Communications: Ethernet, ControlNet
- PLC: Allen Bradley SLC, ControlLogix, CompactLogix
- Other: Field Startup, Support and Troubleshooting

Specialty Areas
- PLC Hardware and Programming
- Safety System Controls

Training/Certification/Memberships
- Rockwell Automation FactoryTalk View SE Programming
- Rockwell Automation Studio 5000 ControlLogix Troubleshooting and Maintenance
- Rockwell Automation Studio 5000 ControlLogix Project Development
- Rockwell Automation Studio 5000 System Fundamentals & Ladder Logic Programming
- Industrial Network Architecture

Education
- BS, I.T.T. Technical Institute – Electromechanical Engineering, Emphasis in Electrical Engineering
- BS – Pontificia Universidad Católica Madre y Maestra (PUCMM)

OSHA's Form 300 (Rev. 01/2004)

Log of Work-Related Injuries and Illnesses

Attention: This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

Year 2016

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

You must record information about every work-related death and about every work-related injury or illness that involves loss of consciousness, restricted work activity or job transfer, days away from work, or medical treatment beyond first aid. You must also record significant work-related injuries and illnesses that are diagnosed by a physician or licensed health care professional. You must also record work-related injuries and illnesses that meet any of the specific recording criteria listed in 29 CFR Part 1904.8 through 1904.12. Feel free to use two lines for a single case if you need to. You must complete an Injury and Illness Incident Report (OSHA Form 301) or equivalent form for each injury or illness recorded on this form. If you're not sure whether a case is recordable, call your local OSHA office for help.

Public reporting burden for this collection of information is estimated to average 14 minutes per response, including time to review the instructions, search and gather the data needed, and complete and review the collection of information. Persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. If you have any comments about these estimates or any other aspects of this data collection, contact: US Department of Labor, OSHA Office of Statistical Analysis, Room N-3644, 200 Constitution Avenue, NW, Washington, DC 20210. Do not send the completed forms to this office.

Be sure to transfer these totals to the Summary page (Form 300A) before you post it.

OSHA's Form 300A (Rev. 01/2004)

Summary of Work-Related Injuries and Illnesses

Year 2016

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

All establishments covered by Part 1904 must complete this Summary page, even if no work-related injuries or illnesses occurred during the year. Remember to review the Log to verify that the entries are complete and accurate before completing this summary.

Using the Log, count the individual entries you made for each category. Then write the totals below, making sure you've added the entries from every page of the Log. If you had no cases, write "0."

Employees, former employees, and their representatives have the right to review the OSHA Form 300 in its entirety. They also have limited access to the OSHA Form 301 or its equivalent. See 29 CFR Part 1904.35, in OSHA's recordkeeping rule, for further details on the access provisions for these forms.

Number of Cases

Total number of deaths	Total number of cases with days away from work	Total number of cases with job transfer or restriction	Total number of other recordable cases

OSHA's Form 300 (Rev. 01/2004)

Log of Work-Related Injuries and Illnesses

Attention: This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

Year 2018

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

You must record information about every work-related death and about every work-related injury or illness that involves loss of consciousness, restricted work activity or job transfer, days away from work, or medical treatment beyond first aid. You must also record significant work-related injuries and illnesses that are diagnosed by a physician or licensed health care professional. You must also record work-related injuries and illnesses that meet any of the specific recording criteria listed in 29 CFR Part 1904.8 through 1904.12. Feel free to use two lines for a single case if you need to. You must complete an Injury and Illness Incident Report (OSHA Form 301) or equivalent form for each injury or illness recorded on this form. If you're not sure whether a case is recordable, call your local OSHA office for help.

Establishment name Revere Control Systems, Inc.

City Birmingham *State* AL

Summary of Work-Related Injuries and Illnesses

Year 2018

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

All establishments covered by Part 1904 must complete this Summary page, even if no work-related injuries or illnesses occurred during the year. Remember to review the Log to verify that the entries are complete and accurate before completing this summary.

Using the Log, count the individual entries you made for each category. Then write the totals below, making sure you've added the entries from every page of the Log. If you had no cases, write "0."

Employees, former employees, and their representatives have the right to review the OSHA Form 300 in its entirety. They also have limited access to the OSHA Form 301 or its equivalent. See 29 CFR Part 1904.35, in OSHA's recordkeeping rule, for further details on the access provisions for these forms.

OSHA's Form 300A (Rev. 01/2004)

Summary of Work-Related Injuries and Illnesses

Year 2017

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

All establishments covered by Part 1904 must complete this Summary page, even if no injuries or illnesses occurred during the year. Remember to review the Log to verify that the entries are complete

Using the Log, count the individual entries you made for each category. Then write the totals below, making sure you've added the entries from every page of the log. If you had no cases write "0."

Employees former employees, and their representatives have the right to review the OSHA Form 300 in its entirety. They also have limited access to the OSHA Form 301 or its equivalent. See 29 CFR 1904.35, in OSHA's Recordkeeping rule, for further details on the access provisions for these forms.

Number of Cases

Total number of deaths	Total number of cases with days away from work	Total number of cases with job transfer or restriction	Total number of other recordable cases
0	0	0	0
(G)	(H)	(I)	(J)

Number of Days

Total number of days away from work	Total number of days of job transfer or restriction
0	0
(K)	(L)

Injury and Illness Types

Total number of...	(M)		(M)
(1) Injury	0	(4) Poisoning	0
(2) Skin Disorder	0	(5) Hearing Loss	0
(3) Respiratory Condition	0	(6) All Other Illnesses	0

Post this Summary page from February 1 to April 30 of the year following the year covered by the form

Public reporting burden for this collection of information is estimated to average 58 minutes per response, including time to review the instruction, search and gather the data needed, and complete and review the collection of information. Persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. If you have any comments about these estimates or any aspects of this data collection, contact: US Department of Labor, OSHA Office of Statistics, Room N-3644, 200 Constitution Ave. NW, Washington, DC 20210. Do not send the completed forms to this office.

OSHA's Form 300 (Rev. 01/2004)

Log of Work-Related Injuries and Illnesses

Attention: This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

Year 2018

U.S. Department of Labor
Occupational Safety and Health Administration

You must record information about every work-related injury or illness that involves loss of consciousness, restricted work activity or job transfer, days away from work, or medical treatment beyond first aid. You must also record significant work-related injuries and illnesses that are diagnosed by a physician or licensed health care professional. You must also record work-related injuries and illnesses that meet any of the specific recording criteria listed in 29 CFR 1904.8 through 1904.12. Feel free to use two lines for a single case if you need to. You must complete an injury and illness incident report (OSHA Form 301) or equivalent form for each injury or illness recorded on this form. If you're not sure whether a case is recordable, call your local OSHA office for help.

Revere Control Systems, Inc. – Company Profile

Established in 1980 in Birmingham, Alabama, Revere Control Systems employs approximately one hundred eighty (180) people with one goal in mind: to be recognized as the preferred automation, communication, and information integrator in the field of Water and Wastewater.

We are experts in Industrial Automation. Our advice, automation engineering, and construction skills are all in-house and bundled together for one purpose: to perform better and faster for our customers with less coordination issues and less risk than any other method or choice.

Facilities

The Revere Control Systems Birmingham complex contains 64,000 square feet of production and administrative office space.

Main Office:	2240 Rocky Ridge Rd., Birmingham, AL 35216 205.824.0004
North Carolina Office:	2331-L Crown Point Executive Drive, Charlotte, NC 28227 704.851.4816
Florida Office:	3810 Drane Field Rd., Ste. 7, Lakeland, FL, 33811 863.226.0219
Texas Office:	2620 Summerhill Road, Texarkana, TX 75503 903.716.7070

Project Bonding

Revere can provide **performance or supply bonding**. Our bonding capacity is $35M. Our bonding company is Hanover Insurance Company; our agent is Joey Bole with Cobbs, Allen & Hall of Birmingham, Alabama (205) 414-8100.

Insurance

Revere carries the following basic insurance coverage:

Workmen's Compensation	$ 1,000,000
Automobile Liability	$ 1,000,000
General Liability	$ 5,000,000
Umbrella Liability	$10,000,000
Cyber Liability	$ 5,000,000
Pollution Liability	$ 2,000,000
Errors & Omissions	$ 5,000,000

Contractor and Business Licenses

Alabama General Contractor License	No. 21662
Alabama Electrical Contractor License	No. 05883
Tennessee Contractor License	No. 40950
Florida General Contractor License	No. CG1526173
Florida Electrical Contractor License	No. EC13008291
Georgia Electrical Contractor License	No. EN217283
Louisiana Electrical Contractor License	No. 39583
Mississippi Electrical Contractor License	No. 17818-MC
North Carolina Electrical Contractor License	No. U.32661
Oklahoma Electrical Contractor License	No. 00171417
South Carolina Mechanical Contractor License	No. M112558
Texas Electrical Contractor License	No. 31584

Revere Control Systems is **authorized to perform engineering** in the following states:

- Alabama Certificate of Authorization Number CA-01318-E
- Florida Certificate of Authorization Number 8769
- Georgia Engineer Firm License Number PEF006354
- Oklahoma Certificate of Authorization Number 7594
- South Carolina Certificate of Authorization Number 3899
- Tennessee Letter of Authorization, File Number 3841
- Texas Certificate of Authorization Number 16762

Engineering Qualifications

Revere has the following qualified staff:

- Fifty Plus (50+) Degreed Engineers, including Professional Engineers with registrations in Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Illinois, Louisiana, Massachusetts, Mississippi, Nevada, New Mexico, North Carolina, Ohio, Oklahoma, South Carolina, Tennessee, Texas, Utah, Virginia, West Virginia, and Wyoming
- Seven (7) Certified Project Management Professionals (PMP)

Senior Managers

- Bob Adams, President
- Tom York, PE, Chief Operating Officer
- Jason English, Chief Financial Officer
- Tom Adams, Vice President of Safety, Quality and Compliance
- Rick Braddock, Vice President of Logistics and Facilities
- Nan Johnson, PMP, Vice President of Municipal Systems
- Jason Leeper, PE, Vice President of Industrial Systems
- David Williams, PE, Vice President of OEM Systems
- Greg Graves, Vice President of Sales & Marketing
- Marc Handley, Vice President of Strategy Process Continuous Improvement
- Lisa Milano, Vice President of Human Resources
- Andy Wilson, Vice President of Construction Services
- Rob Shanks, Director of Pump Automation Control Systems
- Jeff Byers, Director of Information Technology

Core Competencies and Technical Experience

The following represents our core competencies and areas of technical experience and knowledge.

- Water and Wastewater Treatment Facility Controls
- Design and Development of In-Plant Central Supervisory Control and Data Acquisition (SCADA)
- Assessment of Existing Plant Control Systems
- Project Management
- Engineering and CAD for Detailed Control Panel Design – PLC Control Panels, Local Control Panels, RTU Panels, Remote I/O Panels
- Control Panel Assembly, Staging and Testing
- PLC Programming for Process or Functional Control Strategies
- Configuration of Control System Servers (Standalone and Virtual Machines)
- Configuration of Operator Workstations and Thin Client View Nodes
- Human Machine Interface (HMI) Applications for Graphic Representation of Plant Processes, Historical Data Collection and Trending
- Generation of Daily and Monthly Operations and Maintenance Reports
- Design, Testing and Termination of Plant Control System Network Infrastructure – Fiber Optics, CAT6
- Remote Telemetry and Communication Systems – Licensed and Unlicensed Radio, Cellular Platforms
- Radio Path Surveys and Testing – Software and Field Testing
- Installation, Troubleshooting, Maintaining Radio Antennas and Towers
- Calibration, Commissioning of Field Instrumentation – Analytical, Flow, Level, Pressure,
- Retrofit, Upgrade and Modification of Existing Control Panels
- Control System Training for Plant Operations and Maintenance Personnel
- Support Services – Remote Monitoring, Troubleshooting, Preventive and Emergency
- Control Systems for Original Equipment Manufacturers (OEM)
    - Centrifugal Blower Controls
    - Sand Filter Controls
    - Aerators
    - Clarifiers
    - Bar Screens
    - Belt Presses
    - Filter Presses
    - Centrifuges
    - Package Treatment Plant Controls
    - Sequencing Batch Reactor (SBR) Controls
    - Aeration Dissolved Oxygen Basin Controls
    - Reverse Osmosis Controls
    - Power Monitoring and Peak Load Shedding Controls
- Variable Frequency Drives (VFDs)
- Motor Control Centers (MCCs) – Standard, Custom Design/Modifications

Industry / Manufacturer Partnerships and Certifications

Revere has established and maintains partnerships and certifications with the following industry leaders and equipment manufacturers. Certificates reflecting these partnerships are included for reference purposes.

- Control System Integrators Association (CSIA) – Certified Member
- Design-Build Institute of America (DBIA) Associate
- Rockwell Automation PartnerNetwork Solutions Provider
- Schneider Electric Alliance Integration Partnership
- United Laboratories Control Panel Certifications – UL 508A and UL 698
- Wonderware Certified System Integrator Partner
- GE Intelligent Platform Solution Provider
- Inductive Automation Gold Certified Integrator
- Mission Critical Internet of Things (MC-IoT) Value Added Reseller (VAR)
- Trihedral VTScada Certified Solution Partner

CITY OF HALLANDALE BEACH
Reverse Osmosis WTP HMI Upgrade
630 N.W. 2nd Street
Hallandale Beach, FL 33009

Owner Representative(s):

John Fawcett, Water Plant Manager
Phone: (954) 457-1610
E-Mail: jfawcett@cohb.org

Year of Project Completion: 2019

Description of Services Provided

Revere provided two (2) Dell PowerEdge Servers with a Server Rack for the SCADA HMI Application. A new HMI Application was developed using the Trihedral VTScada HMI Software. The application was based on the configuration and functionality of the existing GE Proficy iFix HMI Application.

PLCs throughout the Water Treatment Plant utilized the Allen Bradley ControlLogix PLC hardware platform. The Water Distribution System included a Data Flow System which was interfaced with the new Trihedral VTScada HMI Application. The Trihedral VTScada I/O driver for the Data Flow System was used to establish communication including a redundant configuration for the HMI Servers.

An Allen Bradley Remote I/O Panel was provided by Revere to allow for the interfacing of additional I/O signals for the Fluoride Chemical Feed System, Sodium Hypochlorite Chemical Feed System and the Filter Effluent Turbidity Analyzers.

Revere provided installation services for the SCADA Server Rack including electrical conduit/wire and Ethernet communication cabling.

Contract Amount: $1,833,151.02

Description of Services Provided

Revere served as the prime contractor for the Franklin, Tennessee Water Distribution and Collection System SCADA Improvements Project which included the replacement of the SCADA System using dual redundant communications via licensed radios as the primary mode of communications and cellular modems as the secondary mode of communications. The following represents a detailed description of the contracted scope of work for the project.

- Furnish and install a PC-based SCADA workstation and development laptop, network router and alarm printer at the Public Works Facility.

- Furnish and install a Master remote telemetry unit (RTU) at the Public Works Facility including a new antenna, antenna tower and cabling to establish communications with the SCADA networking equipment.

- Furnish and install a programmable logic controller (PLC) based RTU at each of the remote system sites. Most of the sites require the removal and replacement of an existing RTU. Where possible, the new RTU panel was installed in the same location as the existing RTU and the existing antennas and signal/power wiring was reused. For the sites where this was not possible, the new RTU was installed in an alternate location and the old RTU panels were reconfigured as termination cabinets with new the installation of new antenna cabling and the extension of signal/power wiring.

- Establish dual redundant communication between the Master RTU and the remote sites using a licensed radio communication system as the primary mode for communications. Where required, new antenna poles and towers were installed. Cellular communications was also established as the secondary or backup mode for communications.

- Application engineering services included the following:
  - Programming of the RTU PLCs (Allen Bradley CompactLogix)
  - Configuration of the SCADA network equipment (Cisco, GE MDS, Cradlepoint)
  - Programming, configuration and design of the SCADA HMI software (Trihedral VTScada)
  - Testing, startup and training for the complete SCADA Control System Upgrade

Year of Project Completion: Scheduled 2016
Contract Amount: $4,968,420.00
5Percent Performed by Revere: 50%

Description of Services Provided

Revere has been awarded the contract for the SCADA / CAMO Panel Project in St Bernard Parish Louisiana. We are currently in the early days of a one (1) year contract with completion scheduled for April 2016. Revere is serving as the Prime Contractor for this project. The following tasks are included in the scope of work for this project.

- Establish a cellular SCADA telemetry system allowing for the network of more than one hundred remote lift stations, drainage pump stations and water towers into a single network. The communication protocol will be DNP3 and allow for store and forward capability to the SCADA System located at the Water Treatment Plant and the Munster Wastewater Treatment Plant.
- CAMO Panels will be provided at four (4) lift stations, eleven (11) drainage pump stations and four (4) water tower sites. New Non-CAMO Panels will be provided at seven (7) drainage pump stations and powered by solar energy.
- New field instrumentation and field wiring will be provided at several remote sites.
- Multi-Smart Controller Configuration and HMI Configuration using Trihedral VTScada Software.
- Electrical installation, checkout and commissioning.
- Submittals and Factory Testing.

E-Mail: daughertydd@gru.com

Year of Project Completion: December 2015
Contract Amount: $ 851,145.00
Percent Performed by Revere: 80%

Description of Services Provided

Revere is serving as the Prime Contractor for the SCADA Upgrade Project with a direct contract from Gainesville Regional Utilities. The project consists of the following major tasks:

- Upgrade the existing Allen Bradley PLC-5 Hardware with Allen Bradley ControlLogix Hardware.
- Provide a backup control system for critical control loops using Allen Bradley PICO Controllers.
- Upgrade the existing Plant Control System server and computer workstations.
- Upgrade the existing Plant Control System HMI Software from Intellution Fix 32 to GE Proficy iFix Version 5.8

The Plant Control System network architecture is to be converted from a DH+ Network to an Ethernet based protocol.

A Witnessed Factory Acceptance Test was held with participation from the Owner and Consulting Engineer prior to beginning the onsite installation and commissioning services. The schedule included a forty-eight (48) hour shutdown of the plant for the removal of the existing Allen Bradley PLC-5 hardware and installation of the Allen Bradley ControlLogix PLC Hardware. The plant operated in a manual mode with consistent monitoring by the Operations Staff. Systems were brought online with the Plant Control System as I/O was verified from the field to the upgraded GE Proficy iFix HMI Application.

Fifteen (15) existing Moore Controllers were replaced with Allen Bradley PICO Controllers for critical plant control loops including the Filter Flume Level, High Service Pumps, Reactor-Clarifier Basin Flow, Lime System Flows, CO2 Injection System and Chlorinator Controls.

The existing computer servers and workstations were upgraded with rack-mounted servers including two (2) SCADA Servers, one (1) Thin Client Server and one (1) Historian Server. Four (4) SCADA HMI Control Node Workstations are provided for use as a Development System and a Spare System. Seven (7) HMI View Node Workstations are provided for various locations throughout the plant.

The existing Intellution FIX32 software was upgraded with the GE Proficy iFIx Version 5.8 Software. Graphic development, database configuration, historical trending and reports were provided as part of the upgrade.

The project schedule duration is nine (9) months from the Notice to Proceed through Final Completion. A two (2) year maintenance support contract is included as part of the contracted services which begins upon achieving Substantial Completion.

Ramon Diaz; Construction Mgmt
E-Mail: ramon.diaz@inima.com

Year of Project Completion: Scheduled for June 2015

Contract Amount: $1,399,837.13

PLC Platform: Allen Bradley ControlLogix, MicroLogix
HMI Software: Rockwell FactoryTalk View SE, Historian

Description of Services Provided

Revere provided the System Integration scope of work for the Hialeah RO Water Treatment Facility including field instrumentation PLC and local control panels along with the network and computer hardware and software for the Plant Control System.

The following major equipment items were provided as part of our scope of supply.

- Float Switches
- Pressure Switches / Gauges / Diaphragm Seals
- Pressure Transmitters (Gauge and Differential)
- Electro-Magnetic Flowmeters
- Analytical Instruments (pH, Chlorine, Ammonia, Fluoride, Turbidity, Conductivity)
- Ultrasonic Level Transmitters/Transducers
- Fiber Optic Cable
- Computer Servers and Workstations
- Network/Server Racks
- HMI Software – Rockwell Software FactoryTalk Site Edition
- Wireless Access Points
- One (1) Main Control Panel using the AB ControlLogix PLC Hardware
- Six (6) Remote I/O Panels for installation throughout the plant using the AB Flex I/O
- Six (6) Remote Well RTU Panels using AB MicroLogix PLC Hardware
- One (1) Chemical Truck Unloading Panel
- Master Radio Control Panel

Coordination with various process equipment manufacturers and suppliers was required in order to implement the project and design the process control system. Revere was responsible for developing the HMI Application using the Rockwell Software FactoryTalk Site Edition software. The Control System utilized extensive network switches as manufactured by Allen Bradley. The network infrastructure was based on a fiber optic cabling system that Revere terminated and tested.

A Factory Acceptance Test was conducted at Revere's facility where the system was demonstrated for the Consulting Engineer(s) and Construction Management Team. Revere has provided onsite support to the Construction Management Team for the entire plant control system as they have worked to complete the construction of the plant and placing the plant into full operation.

Joel (J.D.) Arnold; Operations Team Leader
Phone: (919) 362-5502
E-Mail: joel.arnold@townofcary.org

Year of Project Completion: 2015
Contract Amount: $3,023,276.95

Description of Services To Be Provided

Revere provided PLC Control Panels, PLC/HMI Programming, Factory/Field Testing, Electrical Installation Services, Panel Modifications, Startup and Commissioning Services, Owner Training for the Cary/Apex WTF Control System Upgrade Project.

New PLC Control Panels were provided for the following areas using the Allen Bradley ControlLogix and CompactLogix PLC Platform:

- Main Ozone Control Panel (PLC 3-1)
- Five (5) Filter PLC Panels (PLC 2-1 thru PLC 2-5)

The existing Allen Bradley PLC-5 hardware were replaced with Allen Bradley ControlLogix hardware for the following control panels.

- Administration Building PLC Panel (PLC 1-1)
- Hypochlorite Building PLC Panel (PLC 1-2)
- Chemical Building PLC Panel (PLC 1-3)
- Sludge Building PLC Panel (PLC 1-4)
- Ozone Generator PLC Panels (PLC 3-2 and 3-4)
- Ozone Destruct PLC Panels (PLC 3-6 and 3-7)
- Centrifuge PLC Panel (PLC-4A)
- Finished Water Building PLC Panel (PLC-5)
- Electrical Building PLC Panel (PLC-6)
- SuperPulsator PLC Panel (PLC-7)
- Raw Water Pump Station PLC Panel (PLC-8)

The SCADA Network consists of two (2) separate aspects including a PLC segment and a HMI segment. The network design and implementation allows for limiting communication traffic on the PLC network while at the same provided a level of security to protect the plant process from the outside world or everyday computer activities. Revere was responsible for installing, terminating and testing the fiber optic cable and CAT6 cable for the entire network system. Revere was responsible for the software development including the PLC Programming using Rockwell Software RSLogix5000 and converting the GE iFix HMI Application to a Wonderware ArchestrA System Platform Application.

Two (2) Factory Acceptance Tests were performed – one (1) for the Ozone Control System including the Control Panels and local Operator Interface Terminals and one (1) for the Main Plant Control System including the Control Panels, PLC Hardware Upgrades and HMI Application.

Installation of the control system was performed one process area at a time beginning with the Ozone System. Revere worked closely with the Plant Operations Staff during the installation, startup and commissioning phase to insure proper plant operations, minimal down time of key process equipment and thorough testing of the system.

Project Budget: $1,904,000
Final Costs: $1,895,186.94
Original Schedule: Start Date - November 1, 2012; Completion Date - March 9, 2014
Actual Schedule: Start Date - November 1, 2012; Completion Date - December 17, 2014
Percent Performed by Revere: 90%

Description of Services Provided

Revere served as the Prime Contractor for the Boca Raton FL Water Treatment Plant SCADA Upgrade Project to perform the following scope of work.

- Replace all of the Bristol Babcock PLCs with Allen Bradley ControlLogix platform controllers.
- Replace and relocate the Siemens PLC System controlling the Pressure Filter System.
- Programming of the Allen Bradley ControlLogix controllers to match the original Bristol Babcock logic functionality.
- Modification of the existing control panels to replace the Bristol Babcock PLC hardware with Allen Bradley ControlLogix including various components to allow for proper functionality.
- Replacement of several field instruments such as level transmitters.

The Allen Bradley ControlLogix processors were programmed using Rockwell Software's RSLogix 5000. The existing HMI Application was modified to reference the address information for the new Allen Bradley ControlLogix processors and a newly defined tagname convention as coordinated with the Owner.

A detailed Factory Acceptance Test was held at the Revere facility where the system was demonstrated for the Consulting Engineer and the Boca Raton Plant Operations and Maintenance Staff. Modification of the existing controls panels were performed onsite with limited shutdown of various plant areas. The plant remained in operation with portions of the plant operated in manual mode while each area's control panels were upgraded.

Gainesville Regional Utilities
4747 N Main Street
Gainesville, FL 32609

November 13, 2020

To Whom It May Concern:

Gainesville Regional Utilities (GRU) has utilized the services of Revere Controls for many years at several of our water and wastewater facilities. They are currently providing services under our Instrumentation and Controls General Services Agreement (GSA). Under the GSA Revere has provided services related to maintaining, changing, and updating our GE iFix SCADA system. They provide support for our Allan Bradley compact and control logix PLCs. In 2014, Revere Controls provided services to completely replace the SCADA and PLC systems at our only water plant which services nearly 190,000 people in the Gainesville Area.

GRU has enjoyed a long standing and successful relationship to with Revere Controls. Revere exceeds expectations from their project management to their field staff performing the modifications necessary to keep our facilities working well. GRU has been thoroughly satisfied with Revere's performance on these contracts and will continue to use their services in the future. If you have any further questions please feel free to contact me at 352-393-1618.

November 16, 2020

To whom it may concern,

I am writing to recommend Revere Controls for any I&C work project that a City or County Municipality might need. We have been working with Revere controls on several projects over the past few years. In fact, we will be increasing our relationship with them by entering into a very large project for the coming year of upgrading all of our PLC's, system wide.

They do an excellent job, are always punctual, knowledgeable, and courteous with an emphasis on attention to detail. We have always been satisfied with their quality of work and they usually go above and beyond.

I am proudly writing this letter to recommend the services of Revere Controls. If you have any questions, please feel free to contact me.

Thank you,

Patrick S. Shane

ENVIRONMENTAL SERVICES DEPARTMENT

UTILITIES OPERATIONS DIVISION

SEMINOLE COUNTY
FLORIDA'S NATURAL CHOICE

November 12, 2020

To Whom It May Concern,

My name is Elisa Williams, Water Operations Manager for Seminole County Environmental Services – Utilities Division.

I have been working for Seminole County Environmental Services (SEMCO-ES) for at least ten (10) years and even though REVERE Control Systems has been collaborating with SEMCO-ES before I became a part of the division, I personally have had the pleasure of working with REVERE Control Systems in the past five years. REVERE has and is still currently handling almost all of Utilities Operations Programming Operational Support that included SCADA controls, treatment plant immediate process improvements, Lift Station programming/troubleshooting; to name a few. Dan Kistner, who we fondly call our "resident on-call programmer" brought a new level of professionalism to our needs.

Utilities Operations have always been happy with REVERE's performance; our long standing relationship with the company is evidence to this.

I am happy to recommend the services of REVERE Control Systems. If you have any questions, please feel free to contact me.

Sincerely,

Elisa Matarlo Williams
Interim Utilities Division Manager/Water Operations Manager

RE: Bond Capacity

Dear Mr. Adams,

Per your request, I am writing to confirm the bond capacity of your company, Revere Control Systems. Revere Control Systems is capable of bonding single projects up to $15 million and an aggregate of $35 million.

Your surety, The Hanover Insurance Company, is rated "A Excellent" by A.M. Best and has a financial size category of XIV. In addition, Hanover's US Treasury Listing is $143,592,000.

As you know, we highly recommend Revere Control Systems to any owner or general contractor considering the use of it's services.

As is usual, each individual bond request is considered at the time of the request and is subject to normal underwriting criteria.

Please let me know if I can be of any additional assistance.

Sincerely,

Joey Bole, AFSB

PUBLIC SERVICE DEPARTMENT

SCADA SYSTEM UPGARDE
ITB# 2021B-003
Addendum No. 1
February 1, 2021

BIDS DUE: 2:00 PM, Local Time, March 10, 2021

TO ALL VENDORS BIDDING ON THIS PROJECT:

The changes, additions, substitutions, and/or deletions contained in Addendum No. 1 are hereby made a part of the Bid Documents for the **SCADA System Upgrade Project**, fully and completely as if the same were fully set forth herein.

IN THE PLANS

No changes

IN THE SPECIFICATIONS

1. Bid due date has changed from 2:00 PM local time on February 11, 2021 to 2:00 PM local time on March 10, 2021.
2. Due date for the Deadline for Submissions of Questions has changed from 5:00 PM local time on January 29, 2021 to 5:00 PM local time on **February 26, 2021**.

Receipt acknowledged and conditions agreed to the 9th day of March, 2021.

SCADA System Upgrade Main Water Treatment Plant (Main WTP)

Bid No.: 2021B - 003

Addendum No. 2

February 16, 2021

BIDS DUE: 2:00 PM, Local Time, March 10, 2021

TO ALL VENDORS BIDDING ON THIS PROJECT:

The changes, additions, substitutions, and/or deletions contained in Addendum No. 2 are hereby made a part of the Bid Documents for the SCADA System Upgrade Main Water Treatment Plant (Main WTP) fully and completely as if the same were fully set forth herein.

A. QUESTIONS FROM BIDDERS

1. **Question:** Dwg. 39 Sheet E-04 shows the Remote I/O-MCP enclosure located in the southwest corner of the Chemical Building control room between the ATS and outer wall. There is a covered access in the floor (see attached picture) with its edge 19 in. from the backwall. The minimum enclosure depth available is 18 in. and with the requirements for Equipment Pad – Type C on Dwg. 70 Sheet ED-02 to extend a minimum of 2 in. around the enclosure, it would result in the access being partially covered. How do you wish to proceed?

   Answer: Remote I/O – MCP shall be relocated to east end of existing MCCA. Remote I/O- MCP panel shall be revised to wall mounted panel at this location. Drawing 39 shall be revised to indicate this revision.

2. **Question:** Dwg. 32 Sheet I-21 and Dwg. 38 Sheet E-03 show the lift station RTU communicating via fiber optic cable to the Remote I/O-MCP but Dwg. 61

Sheet E-26 shows a radio and antenna connection. Please verify the communication method.
Answer: Communication method shall be via fiber optic.

3. **Question:** The lift station control panel has been retrofitted with a Diversified Electronics Duplex Controller (please see attached pictures). Nearly all the I/O identified in Dwg. 32 Sheet I-21 Dwg. 61 Sheet E-26 are unavailable in its current condition. How do you wish to proceed?
Answer: Existing Main LS Control Panel shall remain as is. All I/O connections from this panel to RTU shall be future.

4. **Question:** Dwg. 40 Sheet E-05 Note 5 calls for the removal and replacement of the level transmitters with matching type. With the customer standardizing on the Vegapuls level sensor throughout their system, could it be used in this process?

   Answer: Existing Filter Level Transmitters shall be replaced in kind per drawing E-05, Note 5. The replacement level transmitter is specified in Section 13700 - Process Instrumentation and Controls, page 8, Article 2.04

5. **Question:** The IO count for the High Service Pump PLC -9-2 will use all available points available on the MicroLogix 1400 and expansion modules. This leaves no spares for future expansion. Can we use the CompactLogix model instead?

   Answer: Yes CompactLogix model may be used.

6. **Question:** Dwg. 27 Sheet I-16 lists the IO for the Remote I/O-WWR panel. The IO count is comparable to that of a standard VOPS lift station RTU. Can the lift station RTU design be used instead of the one called for in Dwg. 62 Sheet E-27? It would provide NEMA 4X integrity along with a proven tolerance to the south Florida heat. There is sufficient space in the layout for future IO expansion and the cost savings would be significant.

   Answer: Remote I/O – WWR Panel shall remain as indicated on Drawings E-12 and E-27.

7. **Question:** What are the specifications for the fiber optic network? Single or multi-mode cable, number of fibers, etc.

   Answer: Fiber Optic Cable shall be as Specified in Section 13710.

8. **Question:** Section 13759 1.01 E States that a UL Field Inspection will required on any UL panel modified during the project. Some of these panel have

already been modified from there original state. What if the panel is out of UL compliance prior to work being done on them? Who's responsible for correcting those?
Answer: UL Field Inspection shall not be required.

9. **Question:** What is the purpose of the Operator Interface? Is it for the local PLC only or to allow the operators to see the entire plant?
Answer: To Allow Operators to see the entire plant.

10. **Question:** Sheet I-12 calls for the existing flow indicators to be reused. How do we build a new FP-4-2 without removing them form the existing panel and bringing them to the shop for installation and wiring?
Answer: Existing Magmeters and wall mounted displays shall remain as is and in operation. These existing devices will not be relocated to new panel FP-4-2.

11. **Question:** Sheet I-12. Please verify we are adding analog speed commands to each of the existing chemical pumps.
Answer: Analog Speed commands are not required to the existing NaOCl pumps.

12. **Question:** Sheet I-12. Are the TU #1,2,3 INF FLOW to be hardwired of transmitted from Remote I/O-MCP to PLC-4-2 via the network?
Answer: These flow signals are transmitted to PLC-4-2 via the network, as noted on drawing I-12.

13. **Question:** Section 13725 4.04 E discusses a local Operator Interface HMI for the FP-4-2, there are none shown in the drawings. Does FP-4-2 get an Operator Interface?
Answer: There is no requirement for an operator interface at panel FP-4-2.

14. **Question:** Sheet I-10 shows hardwired signals from the contact basin VFDs to the Remote I/O-MCP. Doesn't the FP-5-1 monitor those points?
Answer: Yes, and future ethernet cable shall be ran from Remote I/O - MCP to each Transfer Pump VFD.

15. **Question:** Sheet I-13 shows THM FAN CONTROLS hardwired to the Remote I/O-MCP. What is the THM Fan? What is the control scheme?

Answer: I-13 is incorrect THM fans are controlled from FP-5-1, see drawing E-21.

16. **Question:** Sheet I-14 shows BACKWASH BLOWER AND BACKWASH PUMP CONTROLS hardwired to the Remote I/O-MCP. Doesn't FP-5-1 control those points?
Answer: I-14 is incorrect Backwash Blowers and backwash pumps are controlled from FP-5-1, see drawing E-21.

17. **Question:** Sheet E-22. Is the new FP-5-1 going to use the same style cabinet that exists there now?
Answer: Yes. See drawing E-22.

18. **Question:** Do the fiber optic runs fall under the I&C Integrators scope of work?
Answer: I&C Integrator is responsible for all fiber components and hardware to be incorporated with the panels and computer systems. I&C Integrator is responsible for all fiber connections. Fiber cable can be furnished and installed by I&C integrator or Electrical Contractor.

19. **Question:** Drawing E-15 shows video cable 1 ¼" conduit, UPS power ¾" conduit, I-2,4 ¾ "conduit, and I-6 ¾" conduit all noted concealed behind drywall. Will drywall be required at this location? Will furring be required? Please show limit of work required. Will the drywall require painting? Please provide specifications for these trades.
Answer: Proposed conduit/raceways can be concealed above the drop ceiling or installed on walls behind SCADA console or within PVC wire Mold. Exposed wire mold or conduit shall be painted to match wall. Removal/replacement of drywall or furring strips will not be required. Following completion of the SCADA and computer equipment installations the east and north walls of SCADA room shall be painted per Specifications Section 09900 – Protective Coatings, Page 14, System No. 109E.

20. **Question:** Drawing E-29 What PLC hardware is required in "full size rack" noted in replacement PLC 3-8 diagram?
Answer: "Full Size Rack" note is erroneous and shall be deleted. PLC hardware for existing HSP control panel, FP-9-2, shall be as indicated on Drawing E-12.

21. **Question:** Drawing E-05 What is the length of the capacitance probe required for the level transmitters?
Answer: Estimated probe length is 11.0 Feet. Actual length to be confirmed by CONTRACTOR during shop drawing submittal and approval phase.

22. **Question:** Section 03300 1.07 Testing. Verify this testing will be required for small patch pours of sidewalks.
Answer: Testing requirement for concrete patching shall be deleted.

23. **Question:** Please provide specifications for Fiber Optic Cable.

Answer: Fiber optic cable specification has been added to specifications section 13710.

24. **Question:** The Table of Contents list Division 16 Electrical. My documents (Specifications) do not have Sections 16000, 16001 or 16050. Please provide them.
Answer: Missing Specifications sections, 16000, 16001 and 16050 shall be provided via addendum No. 2.

25. **Question:** Please extend the bid date one week.
Answer: Village has extended the bid opening to March 10, 2021, per Addendum No. 1

26. **Question:** Regarding the requirement to have a General Contractor's License, would having a subcontractor with a GC license qualify for this requirement, or does the prime contractor need to have the GC license?

Answer: Prime Bidder/Contractor shall be a Florida Licensed General Contractor per Specifications Section 00200 – Instructions to Bidder's, Page 1, Article 3.01, B.

27. **Question:** The audio was bit garbled during the pre-bid meeting, please confirm the construction budget is $672,000
Answer: Engineer's Opinion of probable construction cost is $ 816,000.

28. **Question:** Please advise when this construction budget was established.

Answer: The Engineer's opinion of probable construction cost was established in September 2019.

29. **Question:** Please provide a list to identify which panels are ControLogix and those that are MicroLogix.
Answer: Recommendations of MicroLogix or ControLogix have been indicated on the network diagrams. It shall be the responsibility of the I&C Integrator select and finalize the design based on individual panel I/O requirements. The selections shall be finalized during the submittal approval process.

30. **Question:** Please make available an I/O list for each corresponding control panel both new and modified.
Answer: I/O requirements are indicated throughout the drawings.

31. **Question:** Please advise the tag count necessary for referenced VT SCADA licenses in section 13750.

Answer: Existing software license tag count is 25,000, proposed upgraded license tag count is 10,000.

32. **Question:** Section 13710 2.07 Industrial PC specified a Phoenix Contact Model 2913108. The response from my supplier. "The requested IPC is obsolete. Please have customer look at our VL2PPC 2000-2402760 or our BL2 PPC1100-1105780. I must point out that the BL2 product only has Windows 10 IOT options." Please advise.

Answer: Industrial PC specification will be updated.

33. **Question:** Will temporary wiring be necessary for any of this work?
Answer: Temporary wiring may be necessary for proper completion of the work, depending on CONTRACTOR's work plan and means and methods.

34. **Question:** Item 1 refers to a failover scheme between SDADA 1 and 2with the operator needing to do nothing to continue operation, but the diagram shows using SCADA 1 as the workstation. Operator will have to move keyboard, mouse and video connections if a failover occurs. Is this the intent of the design?
Answer: Additional monitor, keyboard and mouse will be added for the hot-backup runtime server.

35. **Question:** Item 2 lists requirements related to laptops but there are no actual laptop specs, and the laptops are not depicted on the drawings. Are we providing them with laptops and if so, what do they want and how many of them do they need?
Answer: laptops are not required.

36. **Question:** Item 3 lists requirements related to a workstation. This probably refers to using SCADA 1 as a workstation along with the monitors and mouse and keyboard-need this confirmed by Engineer.
Answer: Correct, these are the interface items for the server. A second group will be added for the backup server, per question 34 above.

B. SPECIFICATIONS

1. Section 00111 – Advertisement for Bid, page 1 of 1, first paragraph, **Change Bid Opening Date "February 11, 2021" to "March 10, 2021".**

2. Section 00451 – Qualification Statement, page 5 of 8, Article 10 Financial Information, **Clarification Made to Highlighted Yellow Paragraph.**

3. Section 13700 – Process Instrumentation and Controls, page 18, Article2.17, paragraph B, **ADD,** "12. Where indicated on drawings, provide interior and exterior white powder coating."

4. Section 13700 – Process Instrumentation and Controls, page 18, Article2.18, paragraph B, **ADD,** "12. Where indicated on drawings, provide interior and exterior white powder coating."

5. Section 13700 – Process Instrumentation and Controls, page 23, Article2.23, paragraph A, **ADD,** "1. None."

6. Section 13710 – Programmable Logic Controller, **DELETE AND REPLACE THIS SECTION IN ITS ENTIRITY.** The following articles were modified or added: 1.06, 2.03, 2.04, 2.05, 2.06, 2.07, 2.08, 2.09, 2.10, 2.11, 2.12,2.13, and 2.14.

7. Section 13711 – Existing SCADA System Modifications, **DELETE AND REPLACE THIS SECTION IN ITS ENTIRITY.** The following articles were modified or added: 2.01 and 2.03.

8. Section 13725 – Loop Functions/Programming Strategies/Protocol, page 19, Article 4.04, E,1, **DELETE** "...local HMI and..."

9. Section 13750 – SCADA System Software, **DELETE AND REPLACE THIS SECTION IN ITS ENTIRITY.** The following articles were modified or added: 1.03 and 2.01.

10. Section 13752 – Computers and Accessories, Page 2, Article 1.02, A, 2, **DELETE THIS ARTICLE IN ITS ENTIRITY.**

11. Section 13752 – Computers and Accessories, Page 3, Article 2.01, B, **ADD THE FOLLOWING:**

12. Section 13759 – Modifications to Existing Field Panels, MCC's and PLC's, Page 1, Article 1.01, E, **DELETE THIS ARTICLE IN ITS ENTIRITY.**

13. Section 16000 – Electrical General Requirements, **ADD THIS SECTION TO THE SPECIFICATIONS BOOKLET.**

14. Section 16001 – Electrical Demolition, **ADD THIS SECTION TO THE SPECIFICATIONS BOOKLET.**

15. Section 16050 – Basic materials and Methods, **ADD THIS SECTION TO THE SPECIFICATIONS BOOKLET.**

C. DRAWINGS

1. The following Drawings have been modified to address the questions from Bidders listed above:

Drawing No. 21 of 70, Sheet I-10, Unit Process 4 – Disinfection (Contact Basin).

Drawing No. 23 of 70, Sheet I-12, Unit Process 4 – Disinfection (NaOCl Feed Pumps).

Drawing No. 24 of 70, Sheet I-13, Unit Process 5 – Filtration.

Drawing No. 25 of 70, Sheet I-14, Unit Process 5 – Filtration.

Drawing No. 32 of 70, Sheet I-21, Unit Process 0 – Support Systems (Main Lift Station).

Drawing No. 38 of 70, Sheet E-03, Electrical Site Plan Details.

Drawing No. 39 of 70, Sheet E-04, Chemical Feed Building Electrical Plan.

Drawing No. 45 of 70, Sheet E-10, Network Diagrams (Sheet 2).

Drawing No. 46 of 70, Sheet E-11, Network Diagrams (Sheet 3).

Drawing No. 47 of 70, Sheet E-12, Network Diagrams (Sheet 4).

Drawing No. 48 of 70, Sheet E-13, Network Diagrams (Sheet 5).

Drawing No. 49 of 70, Sheet E-14, Network Console Details.

Drawing No. 50 of 70, Sheet E-15, Network Riser Diagrams.

Drawing No. 51 of 70, Sheet E-16, FP-4-2 NaOCl Feed System Panel Replacement (Sheet 1).

Drawing No. 52 of 70, Sheet E-17, FP-4-2 NaOCl Feed System Panel Replacement (Sheet 2).

Drawing No. 56 of 70, Sheet E-21, FP-5-1 Filter Control Panel Modifications (Sheet 4).

Drawing No. 58 of 70, Sheet E-23, Remote IO - MCP (Sheet 1).

Drawing No. 59 of 70, Sheet E-24, Remote IO - MCP (Sheet 2).

Drawing No. 60 of 70, Sheet E-25, Remote IO - MCP (Sheet 3).

Drawing No. 61 of 70, Sheet E-26, Main Lift Station Remote Telemetry Unit.

Drawing No. 63 of 70, Sheet E-28, Remote IO – Washwater Recovery (Sheet 2).

Drawing No. 64 of 70, Sheet E-29, MIEX Transfer Control Panel Modifications (Sheet 1).

Drawing No. 65 of 70, Sheet E-30, MIEX Transfer Control Panel Modifications (Sheet 2).

Drawing No. 68 of 70, Sheet E-33, Specific Details – Electrical.

All modifications to the above list of drawings have been identified with a revision triangle.

Receipt acknowledged and conditions agreed to the 9th day of March, 2021.

SCADA System Upgrade Main Water Treatment Plant (Main WTP)

Bid No.: 2021B - 003

Addendum No. 3

March 8, 2021

BIDS DUE: 2:00 PM, Local Time, March 10, 2021

TO ALL VENDORS BIDDING ON THIS PROJECT:

The changes, additions, substitutions, and/or deletions contained in Addendum No. 2 are hereby made a part of the Bid Documents for the SCADA System Upgrade Main Water Treatment Plant (Main WTP) fully and completely as if the same were fully set forth herein.

A. QUESTIONS FROM BIDDERS

1. **Question:** Deskjet Printers don't support 11x17, Officejet appeared to have the cheapest alternative.

   Answer: Provide Officejet or equal.

2. **Question:** "extra long video cables" is hard to price. After a certain length you have to turn to active signal repeating cables, which can extend the price. Same goes with USB devices. A length is really needed.

   Answer: Cable lengths required can be estimated from the scaled drawings of the Bid documents.

3. **Question:** LG and most other leading display companies only make models in 55" and 65", but not 60".

   Answer: Provide a 65" monitor in place of indicated 60" Monitor.

4. **Question:** They want 3 monitors from a server...this isn't a correct usage case for a server. A server is only going to come with 1 VGA. We need a workstation with a GPU to run three monitors for the workstation. I would suggest keeping the servers and adding a workstation under the monitor desk.

   Answer: Provide Dell workstation of equivalent class/configuration as SCADA Servers, with capability to drive multiple video monitors to match system configurations. Provide a dedicated keyboard and mouse for the video workstation and a dedicated keyboard and mouse for the servers. Workstation shall have a client license. Workstation shall be selected by system integrator with approval by ENGINEER during the shop drawing submittal approval process.

5. **Question:** it says Netgear wireless router in the specs, but the drawings only refer to a VPN router and firewall. Netgear doesn't make a business class firewall/vpn device. They have a home device, with some capabilities, but this isn't suggested for a business environment.

   Answer: Provide business class router/firewall/VPN devices as manufactured by Cisco or equal. Model /part number(s) shall be selected by integrator based on system configuration requirements.

6. **Question:** Raid controller presumed to be configured in a mirrored Raid 1.

   Answer: Raid controller shall be configured as Mirrored Raid 1 so data is identically written on two drives, if one drive fails there is an existing mirror copy ready to be used.

B. SPECIFICATIONS

1. No revisions.

C. DRAWINGS

1. No revisions.

All modifications to the above list of drawings have been identified with a revision triangle.

Receipt acknowledged and conditions agreed to the 9th day of March, 2021.

VILLAGE OF PALM SPRINGS
PALM SPRINGS, FL
ITB NO. 2021B-003
SCADA SYSTEM UPGRADE – MAIN WATER TREATMENT PLANT

ADVERTISEMENT FOR BIDS

Electronic sealed Bids for the construction of the **SCADA System Upgrade, Main Water Treatment Plant,** will be received by the **Village of Palm Springs** at the **Office of the Village Clerk until 2:00 PM, local time on February 11, 2021**, at which time the Bids received will be publicly opened and read**. All bids received after the deadline will be returned unopened. T**he Village of Palm Springs will provide for public participation through Gotowebinar.com, a communication media technology (teleconference) for the **Bid Opening.** The Physical Point of Access is Village Hall, located at 226 Cypress Lane, Palm Springs, FL 33461.

Participants can use their telephone or computer mic & speakers (VoIP).
United States (631) 992-3221Access Code# 176-099-922
Registration URL: https://attendee.gotowebinar.com/register/5565251084037966608
Webinar ID: 713-249-811

The Project consists of furnishing all labor, equipment and material for the Main Water Treatment Plant SCADA System Upgrade as described by the Drawings and Specifications. Generally, the work includes minor demolition, installation of new Control panels and SCADA Computers, network improvements, SCADA Software upgrades, programming, electrical, site restoration and all other incidentals as indicated by the drawings and specifications or as required to properly complete the project as planned.

Invitation to Bid documents are available beginning **January 14, 2021**. The Village of Palm Springs utilizes electronic online services for notification, distribution, and submittal of its Solicitation documents. The Village's Solicitation information can be obtained from: (a) Demandstar website – www.Demandstar.com; (b) contact the Village Clerk, Kimberly Wynn, at kwynn@vpsfl.org; (c) call the Village Clerk's office at (561) 965-4010.

Hard copies of bidding Documents may be obtained from Eckler Engineering, Inc. on Mondays through Fridays between the hours of 8:00 AM to 5:00 PM. Bidding Documents are available on compact disc (as portable document format (PDF) files) for a non-refundable charge of $25.00, including shipping via overnight express service. Alternatively, printed Bidding Documents may be obtained from Eckler Engineering, Inc. either via in-person pick-up or via mail, upon receipt of payment for the Bidding Documents. The non-refundable cost of printed Bidding Documents is $160.00 per set, payable to Eckler Engineering, Inc.

Proposers may submit their responses electronically via DemandStar. Proposers also have the option to submit one (1) unbound original, one (1) copy to the Village Clerk at the time and date specified. Sealed Proposals must be marked **"ITB #2021B-003, SCADA SYSTEM UPGRADE – MAIN WATER TREATMENT PLANT"**.

A **Pre-Bid Conference** will be held remotely for this solicitation on **January 26, 2021, at 2:00 PM.** Attendance at the pre-bid conference is not mandatory. The Village of Palm Springs will provide for public participation through Gotowebinar.com, a communication media technology (teleconference) for the **pre-bid conference**. The Physical Point of Access is Village Hall at 226 Cypress Lane, Palm Springs, FL 33461.

Participants can use their telephone or computer mic & speakers (VoIP).

Registration URL: https://attendee.gotowebinar.com/register/409158375791262224
Webinar ID: 601-772-467

Bid security shall be furnished in accordance with the Instructions to Bidders.

Any questions regarding the specifications and Solicitation process must be submitted in writing to the Village Clerk at kwynn@vpsfl.org, Questions and requests for clarification and additional information must be received prior to the Deadline for Submission of Questions on **January 29, 2021,** at 5:00 PM local time.

Pursuant to Section 2-355 of Palm Beach County Ordinance No. 2011-039, and the purchasing policies of the Village of Palm Springs, all Solicitations, once advertised, are under the "Cone of Silence" until the appropriate authority has approved an award recommendation, rejected all responses or some other action by the Village to end the selection process. This limit and requires documentation of communications between potential Bidders and/or Bidders on Village Solicitations, the Village's professional staff, and the Village Council members.

BID DOCUMENTS

GENERAL NOTES

1) ALL CONSTRUCTION AND MATERIALS SHALL CONFORM TO THE STANDARDS AND SPECIFICATIONS OF THE DEPARTMENT OF TRANSPORTATION, FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION, PALM BEACH COUNTY HEALTH DEPARTMENT, FLORIDA BUILDING CODE (LATEST EDITION), AND ALL OTHER LOCAL AND NATIONAL CODES WHERE APPLICABLE.

2) ALL CONSTRUCTION SHALL BE DONE IN A SAFE MANNER, SPECIFICALLY, THE RULES AND REGULATIONS OF THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION AND THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES SHALL BE STRICTLY OBSERVED.

3) ALL ELEVATIONS ON THE DRAWINGS OR REFERENCED IN THE SPECIFICATIONS ARE BASED ON NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88), UNLESS NOTED OTHERWISE.

4) THE CONTRACTOR SHALL OBTAIN THE SERVICES OF A UTILITY LOCATION SERVICE SUCH AS "SUNSHINE STATE ONE CALL OF FLA, INC." AT (800) 432-4770 AT LEAST 48 HOURS PRIOR TO BEGINNING ANY EXCAVATION.

5) EXISTING UTILITY LOCATIONS SHOWN ON THESE DRAWINGS ARE APPROXIMATE. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF EXISTING UTILITIES SHOWN OR FOR ANY EXISTING UTILITIES NOT SHOWN.

6) PRIOR TO BEGINNING CONSTRUCTION, THE CONTRACTOR SHALL VERIFY THE SIZE LOCATION AND MATERIAL OF ALL EXISTING UTILITIES WITHIN THE AREA OF CONSTRUCTION.

7) IF UPON EXCAVATION, AN EXISTING UTILITY IS FOUND TO BE IN CONFLICT WITH THE PROPOSED CONSTRUCTION OR TO BE OF A SIZE OR MATERIAL DIFFERENT FROM THAT SHOWN ON THE DRAWINGS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER.

8) STANDARD SEPARATION STATEMENT:

   A. MAINTAIN A MINIMUM THREE (3) FOOT HORIZONTAL DISTANCE BETWEEN WATER MAINS AND VACUUM SEWER, STORM SEWER, OR RECLAIMED WATER MAINS REGULATED UNDER PART III OF CHAPTER 62-610.

   B. MAINTAIN A MINIMUM SIX (6) FOOT HORIZONTAL DISTANCE BETWEEN WATER MAINS AND GRAVITY SEWER, PRESSURE-TYPE SANITARY SEWER, OR RECLAIMED WATER MAINS NOT REGULATED UNDER PART III OF CHAPTER 62-610.

      THIS DISTANCE CAN BE REDUCED TO THREE (3) FOOT HORIZONTAL DISTANCE WHEN EITHER PIPE IS ENCLOSED IN A WATERTIGHT CASING OR CONCRETE; AND WHEN WATER MAINS ARE LOCATED AT LEAST SIX (6) INCHES ABOVE GRAVITY SEWER MAINS.

   C. MAINTAIN A MINIMUM TEN (10) FOOT HORIZONTAL DISTANCE BETWEEN WATER MAINS AND ONSITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS.

   D. MAINTAIN SIX (6) INCH VERTICAL SEPARATION WHERE WATER MAINS CROSS ABOVE VACUUM SEWER, GRAVITY SEWER, OR STORM SEWER.

   E. MAINTAIN A TWELVE (12) INCH VERTICAL SEPARATION WHERE WATER MAINS CROSS BELOW VACUUM SEWER, GRAVITY SEWER, OR STORM SEWER.

   F. MAINTAIN A TWELVE (12) INCH VERTICAL SEPARATION WHERE WATER MAINS CROSS ABOVE OR BELOW PRESSURE-TYPE SANITARY SEWER, FORCE MAIN, OR RECLAIMED WATER MAINS.

9) THE CONTRACTOR SHALL PERFORM ALL WORK NECESSARY TO LOCATE, EXCAVATE AND PREPARE FOR CONNECTIONS TO THE EXISTING SYSTEMS ALL AS SHOWN ON THE DRAWINGS. THE COST FOR THIS WORK AND FOR THE ACTUAL CONNECTION TO THE EXISTING SYSTEMS SHALL BE INCLUDED IN THE BID PRICE FOR THE PROJECT AND SHALL NOT RESULT IN ANY ADDITIONAL COST TO THE OWNER.

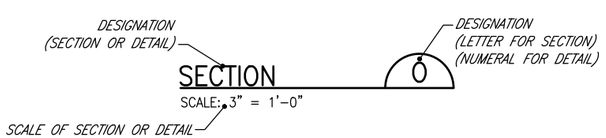
10) CONTRACTOR MUST PROVIDE FOR AND MAINTAIN ADEQUATE ACCESS AT ALL TIMES TO ALL BUSINESSES AND RESIDENCES AFFECTED BY PROGRESS OF THE WORK.

11) PROJECT SITE SAFETY:

   A. THE ENGINEER/OWNER OR THEIR EMPLOYEES HAVE NO AUTHORITY TO EXERCISE ANY CONTROL OVER THE CONTRACTOR, ANY SUB-CONTRACTOR OR OTHER ENTITY OR THEIR EMPLOYEES IN CONNECTION WITH THEIR WORK OR ANY JOBSITE HEALTH OR SAFETY PRECAUTIONS.

   B. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR JOBSITE SAFETY, AND WARRANTS THAT THIS INTENT IS MADE EVIDENT BY THE AGREEMENT BETWEEN OWNER AND CONTRACTOR.

   C. ALL EXISTING OVERHEAD AND UNDERGROUND UTILITIES SHOWN ON THESE DRAWINGS OR ENCOUNTERED THROUGH THE PROGRESSION OF WORK AT THIS PROJECT SITE ARE ASSUMED TO BE LIVE, CONTRACTOR SHALL BE RESPONSIBLE FOR ALL SAFETY PRECAUTIONS WHEN WORKING AROUND EXISTING OVERHEAD OR UNDERGROUND UTILITIES.



12) VALVE BOXES AND MANHOLE RIM ELEVATIONS SHOWN ARE APPROXIMATE. CONTRACTOR SHALL ADJUST VALVE BOX AND MANHOLE RIM ELEVATIONS AS REQUIRED TO MEET FINAL GRADES.

13) ALL PIPE AND PIPE FITTINGS INSTALLED UNDER THIS PROJECT SHALL BE COLOR CODED OR MARKED IN ACCORDANCE WITH SUBPARAGRAPH 62-55.320(21)(B)3, F.A.C.

14) ALL OPEN-CUT PIPE LAYING OPERATIONS SHALL BE COMPLETED IN DRY TRENCH EXCAVATIONS PER SPECIFICATIONS.

DESIGN CRITERIA

VILLAGE OF PALM SPRINGS BUILDING DEPARTMENT REQUIREMENTS:

1) CONTRACTOR SHALL COORDINATE AND OBTAIN ALL PERMITS REQUIRED FOR THE EXECUTION OF THE WORK FROM THE VILLAGE OF PALM SPRINGS BUILDING DEPARTMENT.

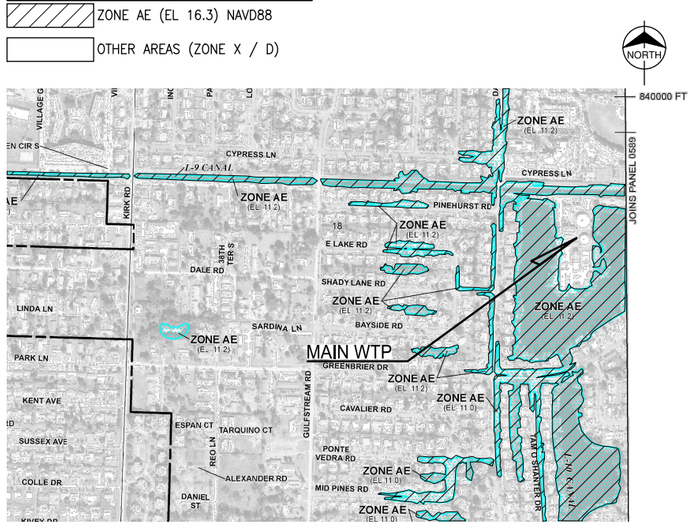
2) CONTRACTOR SHALL REGISTER WITH PALM SPRINGS LAND DEVELOPMENT.

3) FOLLOWING APPROVAL BY ENGINEER, CONTRACTOR SHALL SUBMIT PRODUCT APPROVAL DOCUMENTATION FOR THE FOLLOWING ITEMS TO THE BUILDING DEPARTMENT:
   - NONE REQUIRED.

4) SEPARATE PERMITS WILL BE REQUIRED FOR THE FOLLOWING:
   - OTHER PERMITS AS MAY BE REQUIRED BY BUILDING OFFICIAL.

5) REFER TO SPECIFICATIONS SECTION 01010–SUMMARY OF WORK FOR ADDITIONAL INFORMATION.

FLOOD ELEVATION:



100 YEAR FLOOD ELEVATION:	16.30' NAVD88 (17.78' NGVD29)

(DATA FROM PALM BEACH COUNTY FEMA FLOOD MAP – 12099C0588F) (EFFECTIVE OCT 5, 2017)

LEGEND

ZONE AE (EL 16.3) NAVD88

BUILDING / STRUCTURAL (CONTINUTED)

LIFE SAFETY PLAN ELEMENTS
- MEANS OF EGRESS
  - MINIMUM CLEAR OPENING OF DOORS: 32" (REQUIRED PER FBC 1008.1.1)
  - MINIMUM HEADROOM: 7'–6" (REQUIRED PER FBC 1003.2)
  - MINIMUM DOORWAY HEADROOM: 6'–8" (REQUIRED PER FBC 1008.1.1)
  - MINIMUM STAIR WIDTH: 36" (REQUIRED PER FBC 1009.1)
  - MINIMUM STAIRWAY HEADROOM: 6'–8" (REQUIRED PER FBC 1009.2)
- EXISTS
  - NUMBER OF EXITS REQUIRED: 1 REQUIRED PER SPACE PER FBC 1019.2
  - NUMBER OF EXITS PROVIDED: 1 PER ROOM (MINIMUM)
    2 REQUIRED PER ROOM WHERE INPUT
  - SPECIAL EXIT REQUIREMENTS: CAPACITY TO LARGEST PIECE OF INSTALLED EQUIPMENT IS >117KW
- TRAVEL DISTANCE
  - ALLOWABLE TRAVEL DISTANCE: 50' PER FBC 1029.3 (GROUP F & GROUP F SPECIAL OCCUPANCY)

DESIGN LOADING CRITERIA
- DESIGN LOADS
  - EQUIPMENT: ACTUAL
  - BRIDGE CRANE OR MONORAIL ACTUAL
  - ROOF, SUPERIMPOSED: ACTUAL, 15 PSF MIN.
- LIVE LOADS:
  - ROOF (MIN., UNREDUCED): 20 PSF
  - WALKWAYS AND PLATFORMS: 100 PSF
  - FLOOR: 100 PSF (OR HS20–44, IF APPLIES)
  - PROCESS SLABS: 200 PSF
- IMPACT LOADS
  - TRAVELING CRANES AND HOSTS: 25% OF THE LIFTED LOAD
  - ROTATING EQUIPMENT: 20% OF THE MACHINE WEIGHT
  - RECIPROCATING EQUIPMENT: 50% OF THE MACHINE WEIGHT
- WIND LOADS:
  DESIGN WIND PRESSURE DERIVED FROM ASCE 7–10 PER FBC SECTION 1609. FOR THE FOLLOWING CRITERIA:
  - BASIC WIND SPEED: 180 MPH (3 SECOND GUST)
  - RISK CATEGORY: III
  - EXPOSURE CATEGORY: C
  - INTERNAL PRESSURE COEFFICIENT: ± 0.55
  - DIRECTIONALITY FACTOR: 0.85
- BUOYANCY
  ASSUMED GROUND WATER
  - ELEVATION FOR BUOYANCY LOAD: FINISH GRADE
  - FACTOR OF SAFETY: 2.0
- FOUNDATIONS
  - ALLOWABLE SOIL BEARING CAPACITY: 2500 PSF
- EARTHQUAKE:
  NOT APPLICABLE

MATERIALS OF CONSTRUCITON
- STRUCTURAL CAST–IN–PLACE
  - CONCRETE, MIN. f'c @ 28 DAYS: 4,000 PSI

  - TUBE SECTIONS, ASTM A500, GRADE C, fy: 46,000 PSI
- MASONRY:
  - CMU UNITS, GRADE N–1, COMPRESSIVE STRENGTH: 1,900 PSI (ASTM C90)
  - COMPRESSIVE STRENGTH OF MORTAR, TYPE S: 1,800 PSI (ASTM C270)
  - COMPRESSIVE STRENGTH OF GROUT: 3,000 PSI (ASTM C476)
  - MASONRY UNIT ASSEMBLY, f'm: 1,500 PSI

GEOTECHNICAL REPORT:

NOT APPLICABLE

GENERAL CONDITIONS

ALL STRUCTURAL DRAWINGS SHALL BE USED IN CONJUNCTION WITH THE MECHANICAL, CIVIL, ELECTRICAL AND SHOP DRAWINGS AND SPECIFICATIONS.

THE CONTRACTOR SHALL REVIEW AND VERIFY DIMENSIONS SHOWN IN ALL PLANS AND REVIEW ALL FIELD CONDITIONS THAT MAY AFFECT THE INSTALLATION OF THE FACILITY. SHOULD DISCREPANCIES APPEAR, THE CONTRACTOR SHALL NOTIFY THE ENGINEER IN WRITING TO OBTAIN ENGINEER'S CLARIFICATION BEFORE COMMENCING WITH THE WORK.

FOR ALL ITEMS EMBEDDED IN OR PASSED THROUGH CONCRETE, THE CONTRACTOR SHALL INITIALLY REFER TO MECHANICAL AND ELECTRICAL DRAWINGS FOR TYPE, SIZE, LOCATION AND SPECIAL INSTALLATION REQUIREMENTS FOR THESE ITEMS.

THE CONTRACTOR SHALL TAKE ANY AND ALL NECESSARY MEASURES TO PROTECT EXISTING STRUCTURES FROM DAMAGE WHEN WORKING IN AND AROUND EXISTING STRUCTURES PERFORMING WORK SUCH AS DEMOLITION, FOUNDATION EXCAVATION AND OTHER WORK.

SIZE AND LOCATION OF EQUIPMENT PADS AND ANCHOR BOLTS SHALL BE PER EQUIPMENT MANUFACTURER'S REQUIREMENTS AND APPROVED SUBMITTALS.

ANY EQUIPMENT THAT MAY INDUCE VIBRATION TO THE STRUCTURE SHALL BE ADEQUATELY ISOLATED FROM THE STRUCTURES.

ALL EXPOSED CORNERS OF CONCRETE SHALL HAVE A MINIMUM CHAMFER OF 3/4" UNLESS OTHERWISE NOTED.

THE CONTRACTOR SHALL OBTAIN ENGINEER'S APPROVAL FOR THE LOCATION OF CONSTRUCTION JOINTS THAT ARE NOT SHOWN ON THE DRAWINGS.

REINFORCING STEEL SHALL HAVE THE FOLLOWING CLEAR COVER UNLESS OTHERWISE NOTED:

– CONCRETE CAST AGAINST EARTH	3"
– FORMED SURFACES IN CONTACT WITH SOIL, SEWAGE, WATER OR EXPOSED TO WEATHER	2"
– FORMED SURFACES NOT EXPOSED TO WEATHER OR IN CONTACT WITH SOIL:	
– SLABS AND WALLS	2"
– BEAMS AND COLUMNS	1 1/2"

LAP SPLICES SHALL BE AS SHOWN ON THE DRAWINGS AND SPECIFIED. FOR LAP SPLICES NOT SHOWN ON THE DRAWINGS OR SPECIFIED, THE CONTRACTOR SHALL OBTAIN ENGINEER'S APPROVAL.

FIRE RESISTANCE RATINGS

SEQUENCE OF CONSTRUCTION

GENERAL PROJECT REQUIREMENTS

1. CONTRACTOR SHALL COMPLETE THOROUGH REVIEW OF PROJECT SITE, PROJECT REQUIREMENTS, DRAWINGS AND SPECIFICATIONS TO PREPARE AND SUBMIT A DETAILED SEQUENCE OF CONSTRUCTION AND COORDINATION SUBMITTAL. THIS SUBMITTAL SHALL BE MADE IN ACCORDANCE WITH SECTION 01300 – SUBMITTALS AND COORDINATED WITH THE CONTRACTOR'S OVERALL PROJECT SCHEDULE. THE CONSTRUCTION SEQUENCING AND COORDINATION SUBMITTAL SHALL BE REVIEWED AND APPROVED BY ENGINEER AND OWNER PRIOR TO PROGRESSION OF WORK ON SITE THAT IMPACTS EXISTING REGENERATION SYSTEM OPERATIONS.

SCADA SYSTEM IMPROVEMENTS

GENERAL PROJECT CONSIDERATIONS

WORK ASSOCIATED WITH THIS PROJECT MUST NOT ADVERSELY IMPACT WATER TREATMENT PLANT OPERATIONS BEYOND THE TIME FRAMES SPECIFIED. AS A RESULT, CONTRACTOR MUST COORDINATE WORK AND CONNECTIONS TO THE EXISTING SYSTEM COMPONENTS TO MEET THE FOLLOWING CONDITIONS:

1. EXISTING TREATMENT FACILITY SHALL REMAIN IN OPERATION AT ALL TIMES AS FOLLOWS:
   - MINIMUM CONTINUOUS SOFTENING CAPACITY = 4.0 MGD (2 UNITS)
   - MINIMUM CONTINUOUS FILTRATION CAPACITY = 4.0 MGD (2 FILTER BAYS)
   - MINIMUM CONTINUOUS MIEX CAPACITY = 4.0 MGD
   - MINIMUM CONTINUOUS HIGH SERVICE PUMPING CAPACITY = 10.0 MGD (3 PUMPS)
2. EXISTING SANITARY PUMP STATIONS AND POTABLE WATER WELLS SCADA SHALL REMAIN IN OPERATION AT ALL TIMES.
3. EXISTING CONTROL SYSTEMS SHALL REMAIN IN SERVICE UNTIL PROPOSED SYSTEMS ARE FULLY OPERATIONAL.
4. SHORT TERM COMPLETE FACILITY OR SPECIFIC PROCESS/PANEL SHUTDOWN (NO ELECTRIC POWER) SHALL BE ALLOWED IN ACCORDANCE WITH THE FOLLOWING REQUIREMENTS:
   - DURATION SHALL NOT EXCEED 3 HOURS.
   - SHUTDOWNS MUST BE SCHEDULED BETWEEN THE HOURS OF 9:00 AM AND 12:00 NOON OR 1:00 PM TO 4:00 PM.
   - PROVIDE OWNER MINIMUM COORDINATION NOTICE OF 48 HOURS.

SUGGESTED SEQUENCE OF CONSTRUCTION

1. CONTRACTOR SHALL HAVE THE FREEDOM TO PERFORM CONSTRUCTION AND DEMOLITION IN ANY FASHION AND IN ANY ORDER CONTRACTOR SEES FIT AS LONG AS THE PERFORMANCE OF THE CONTRACT MEETS OR EXCEEDS THE ABOVE GENERAL PROJECT CONSIDERATIONS.
2. COMPLETE SHOP DRAWING PHASE, PROCUREMENT AND DELIVERY (OR HAVE DELIVERY SCHEDULED) FOR ALL MAJOR PIECES OF EQUIPMENT ASSOCIATED WITH THE SCADA SYSTEM UPGRADE.
3. COORDINATE WITH OWNER AND ENGINEER AND PROVIDE PRELIMINARY SCHEDULE OF SYSTEM SHUTDOWN(S) NEEDED TO COMPLETE THE WORK.
4. ALL MATERIAL SHALL BE ON-SITE PRIOR TO SYSTEM SHUTDOWN(S) AND DEMOLITION.
5. COMPLETE ALL WORK THAT IS POSSIBLE BEFORE SHUTDOWN(S) OF THE EXISTING SYSTEMS.
6. REMOVE ALL EXISTING EQUIPMENT, AND ELECTRICAL SYSTEMS AS INDICATED BY DRAWINGS.
7. INSTALL ALL NEW EQUIPMENT, AND ELECTRICAL SYSTEMS.
8. COMPLETE ALL SYSTEM MANUFACTURER, CONFIGURATION, STARTUP AND TRAINING.
9. PLACE ALL NEW SYSTEMS INTO OPERATION.
10. SEQUENCE OF CONSTRUCTION NOTES ARE NOT MEANT TO COVER ALL ASPECTS OF THE DEMOLITION AND CONSTRUCTION PROCESS.

3) FINISH SHALL BE TYPE S-4 AS SPECIFIED IN SECTION 03300-CONCRETE.
4) PROVIDE EQUALLY SPACED CONTRACTION JOINTS @ 25' MAXIMUM SPACING.
5) THICKENED EDGES SHALL BE PROVIDED AT LOCATIONS SHOWN ON DRAWINGS.
6) PROVIDE PREMOLDED JOINT FILLER AT ALL PAVEMENT OBSTRUCTIONS AND AT ALL LOCATIONS THAT PAVEMENT ABUTS STRUCTURES, SIDEWALKS OR OTHER PAVEMENTS. PREMOLDED JOINT FILLER SHALL BE AS SPECIFIED IN SECTION 03251.

GENERAL NOTES

1. THE SCHEDULE SHALL ESTABLISH THE MINIMUM LEVEL OF QUALITY FOR MATERIALS, UNLESS OTHERWISE INDICATED BY THE DRAWINGS OR NOTED IN THE SPECIFICATIONS.
2. THE SCHEDULE SHALL NOT APPLY TO POWER TRANSFORMERS, LIGHT FIXTURES AND LIGHT POLES. THESE ELEMENTS ARE NOTED OR INDICATED ELSEWHERE.
3. PVC COATED RGS WHERE NOTED OR INDICATED ON DRAWINGS.

CONDUIT / RACEWAY IDENTIFICATION LEGEND

TERMINATION EXAMPLE DETAIL

SCALE : N.T.S.

GENERAL ELECTRICAL NOTES

1) ALL CONDUITS AND WIRE SHALL BE LABELED PER STANDARD DETAILS.
2) THE CONTRACTOR SHALL VERIFY EXACT LOCATION OF ELECTRICAL ENCLOSURES AND CONDUIT ENTRANCES OF ALL EQUIPMENT AGAINST APPROVED SHOP DRAWINGS BEFORE STUBBING UP CONDUITS.
3) CONDUIT FOR FUTURE EQUIPMENT OR EXTENSION SHALL BE TERMINATED AS SHOWN IN DETAILS OR AS SPECIFIED. ALL EXPOSED CONDUIT STUB UPS SHALL BE CAPPED.
4) CONNECTION BETWEEN RIGID CONDUIT AND MOTOR TERMINAL BOX SHALL BE LIQUID–TIGHT FLEXIBLE METAL CONDUIT.
5) EXPOSED CONNECTIONS SHALL BE LIQUID–TIGHT FLEXIBLE METAL CONDUIT WITH APPROVED GROUNDING FITTINGS AND SHALL NOT EXCEED 30" IN LENGTH FOR 2" SIZE FITTINGS AND LARGER. MAXIMUM LENGTH OF 18" FOR SIZES 1" AND SMALLER.
6) CONDUITS TERMINATING AT SWITCHBOARD, MOTOR CONTROL CENTER, POWER PANELS, CONTROL CABINETS, ETC., SHALL BE EQUIPPED WITH A GROUNDING BUSHING 'OZ' TYPE 'GB' AND GROUNDED AS INDICATED ON DRAWINGS OR PER NEC SECTION ARTICLE 250.
7) EQUIPMENT SHALL BE INSTALLED IN ACCORDANCE WITH APPROVED SHOP DWG, ADJUSTMENT OR ALTERATIONS SHALL BE MADE WITH ENGINEERS APPROVAL.
8) MOTOR CONTROL CENTERS, SWITCHBOARDS, SWITCHGEAR AND ALL FREE STANDING PANELS SHALL BE SET ON CONCRETE HOUSEKEEPING PAD AS SHOWN IN DETAILS, UNLESS OTHERWISE INDICATED.
9) IN CASE OF INTERFERENCE BETWEEN ELECTRICAL EQUIPMENT SHOWN ON THE DRAWINGS AND OTHER EQUIPMENT OR CONFLICTS, THE CONTRACTOR SHALL NOTIFY THE ENGINEER IN WRITING AND THE ENGINEER SHALL REVIEW THE PROPOSED CHANGES BEFORE THEY ARE MADE.
10) ALL OUTDOOR DEVICES SHALL BE "IN–USE" WEATHERPROOF.
11) ALL RECEPTACLES IN OUTDOOR OR ANTICIPATED WET AREAS SHALL BE GROUND FAULT INTERRUPTER RECEPTACLES.
12) ALL RECEPTACLES SHALL BE MOUNTED 14" ABOVE FLOOR SURFACE UNLESS OTHERWISE INDICATED.
13) LOCATION OF PULLBOXES ARE APPROXIMATE. CONTRACTOR SHALL COORDINATE EXACT LOCATION OF PULL BOXES WITH MECHANICAL PIPING AND/OR OTHER SITE WORK. ANY FIELD ADJUSTMENTS SHALL BE AT NO ADDITIONAL COST TO THE OWNER.
14) CONTRACTOR SHALL PROVIDE PULLBOXES WHERE THEY ARE REQUIRED TO MAKE A WORKABLE INSTALLATION WHETHER INDICATED BY DRAWINGS OR NOT.
15) SEE SPECIFICATIONS DIVISION 16 FOR ADDITIONAL NOTES AND REQUIREMENTS.
16) CONTRACTOR SHALL DUCT SEAL ALL ELECTRICAL CONDUITS ENTERING CONTROL PANELS, SWITCHBOARDS, PANEL BOARDS, SAFETY SWITCHES AND THE LIKE. DUCT SEAL SHALL ALSO BE APPLIED TO CONDUITS ENTERING CHEMICAL AREAS SUCH AS CHLORINE ROOMS AND THE LIKE TO PROHIBIT GAS MICRATION TO OTHER AREAS. DUCT SEAL SHALL BE APPLIED TO CONDUITS AT BOTH ENDS. DUCT SHALL BE PUG DUCT SEAL BY GB ELECTRICAL OR EQUAL.

BID DOCUMENTS

NOTES

1) CONTRACTOR SHALL PROVIDE 13 #14 WIRES FROM THE PLC AT THE PROPOSED MCC-IO CONTROL PANEL TO EACH STARTER BUCKET WHERE THE STARTER IS BEING USED BY A MOTOR OR PUMP LOAD (COORDINATE WITH OWNER AND CONFIRM EXISTING STARTERS BEING USED). LAND THESE WIRES TO THE STARTER BUCKET RUNNING, MOTOR OVERTEMP, MOTOR OVERLOAD, START COMMAND, MCC HOA IN AUTO, MCC HOA IN HAND. IF ONE OF THESE POINTS IS NOT AVAILABLE AT THAT BUCKET THEN LEAVE THE CORRESPONDING WIRES AS SPARES (20" TO 24" SPOOL SO IN THE FUTURE IT MAY BE CONNECTED.

2) AT THE STARTER THAT ARE SPARE AND NOT BEING USED INSTALL THE WIRES AS SPARES (13#14 WIRES) AND LEAVE A SPOOL OF APPROX. 24" FOR FUTURE TERMINATION AT THAT PARTICULAR BUCKET.

3) THE PROPOSED INSTALLATION AT THE EXISTING MCC IS FOR THE #14 CONTROL WIRES FROM THE MULTI-CONDUCTOR CABLES TO BE INSTALLED SO THERE IS ENOUGH SPOOL LEFT THAT THE FURTHEST VERTICAL STARTER BUCKET CAN BE EASILY REACHED AND THE FUTURE DEDICATED 13#14 WIRES CAN BE TERMINATED INSIDE THAT PARTICULAR BUCKET. SO AS MULTI CONDUCTOR CABLES ARE INSTALLED INSIDE THE MCC THEY NEED TO BE LOCATED AS TO MEET THIS CRITERIA OF LANDING THE 13#14s AT THE STARTER BUCKETS BEING USED, AND LEAVE ENOUGH SPOOL FOR THE EXISTING STARTER BUCKETS THAT ARE SPARES.

4) ACTUAL SCHEMATIC COMPONENTS MAY BE SLIGHTLY DIFFERENT, ADJUSTMENT TO ACTUAL FIELD CONDITIONS IS CONSIDERED WORK WITHIN CONTRACT.

MCC SCHEMATIC MODIFICATION (TYPICAL)

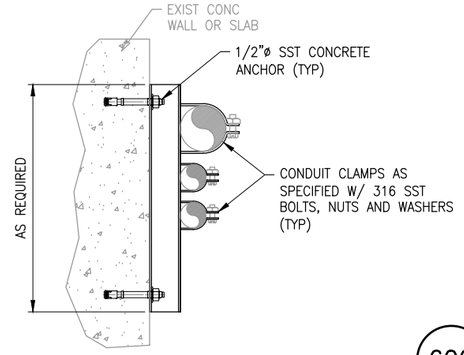
SCADA SYSTEM UPGRADE MAIN WATER TREATMENT PLANT (MAIN WTP)
2021B-003

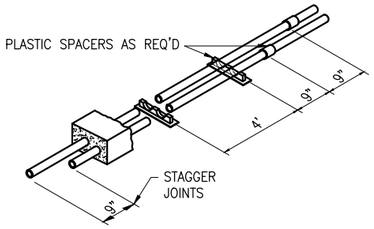
SPECIFIC DETAILS - ELECTRICAL



DWG NO.	68
SHEET	E-33
OF	70
PROJ. NO.	400-077.01
DATE	AUGUST 26, 2020

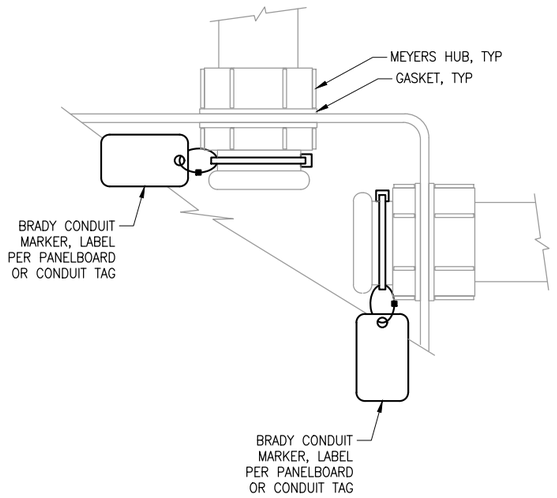
BID DOCUMENTS

File name: C:\Civil 3D Projects\400-077.01 - Scada System Upgrades Main and R. L. Pratt WTP\01_Working (Main)\400-077.01_E-33-MULTI.dwg; Plotted @: 12/23/2020 1:31:04 PM; Scale multiplier: 0.5; Printed by: Matheus Siqueira; Milestone: BID DOCUMENTS



NOTES:
1) THIS DETAIL IS TYPICAL FOR BOTH VERTICAL AND HORIZONTAL MOUNTING.
2) CHANNEL AND ALL SUPPORT DEVICES TO BE FIELD COATED TO MATCH.
3) CHANNELS TO BE SPACED 5' MAXIMUM.
4) ALL MATERIALS SHALL BE 316 SST UNLESS OTHERWISE SPECIFIED.

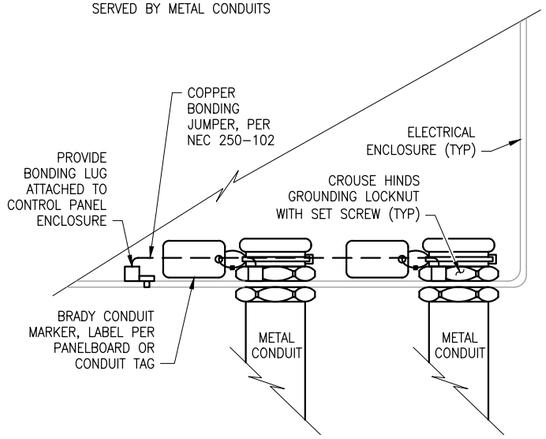
600



INSTALLATION DETAIL

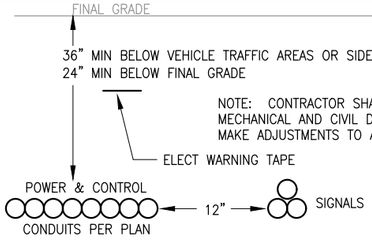
NOTES:
1) QUANTITY AND ARRANGEMENT VARY PER PLAN.
2) POWER AND CONTROL RACEWAYS MAY BE GROUPED TOGETHER.
3) INSTRUMENTATION RACEWAYS WITH 4–20MADC SIGNALS SHALL BE SEPARATED FROM POWER AND CONTROL RACEWAY BY 24" MIN.
4) PROVIDE MINIMUM 3" OF COVERAGE AROUND ALL ENCASED CONDUITS.
5) ENCASEMENT SHALL BE 3000 PSI REGULAR CONCRETE MIX OR FLOWABLE FILL PER SPECIFICATIONS SECTION 03300 – CONCRETE.
6) ADD RED DYE TO COLOR CODE CONCRETE / FLOWABLE FILL TO INDICATE ELECTRICAL DUCT BANK.
7) MINIMUM COVER SHALL BE 24"

601



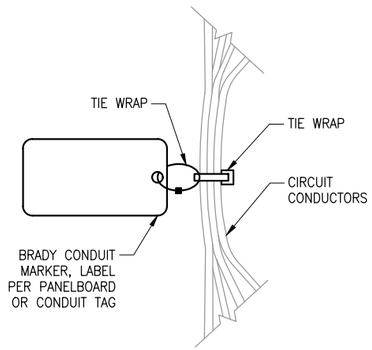
CONCRETE ENCASEMENT

602



CONDUIT DETAIL, OUTDOOR OR DAMP LOCATION

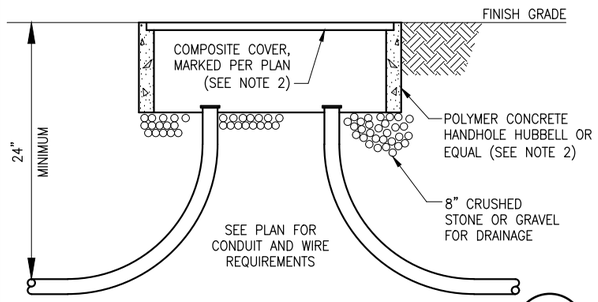
NOTES:
1. PROVIDE FOR ALL ELECTRICAL ENCLOSURES, SERVED BY METAL CONDUITS



604

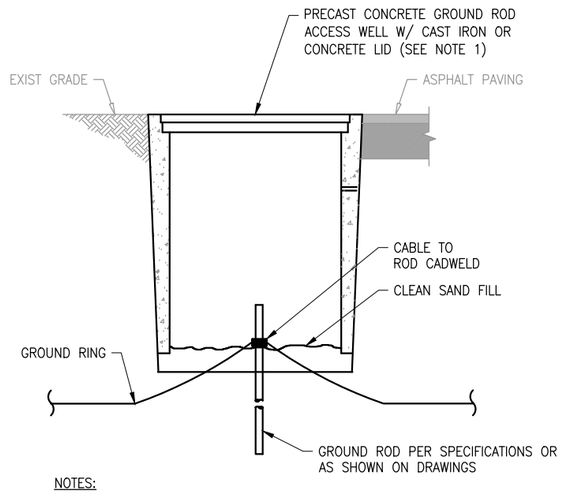
CONDUIT DETAIL, INDOOR

605



DIRECT BURIED CONDUIT

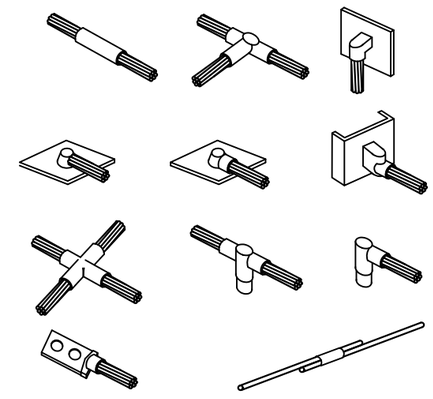
606



CIRCUIT MARKER DETAIL

NOTES:
1) ENCLOSURES, BOXES AND COVERS ARE REQUIRED TO CONFORM TO ALL TEST PROVISIONS OF THE MOST CURRENT ANSI/SCTE 77 "SPECIFICATIONS FOR UNDERGROUND ENCLOSURE" FOR TIER 22 APPLICATIONS. ALL COVERS ARE REQUIRED TO HAVE THE TIER LEVEL RATING EMBOSSED ON THE SURFACE. IN NO ASSEMBLY CAN THE COVER DESIGN LOAD EXCEED THE DESIGN LOAD OF THE BOX. ALL COMPONENTS IN AN ASSEMBLY (BOX & COVER) ARE MANUFACTURED USING MATCHED SURFACE TOOLING.
2) ENCLOSURE SHALL BE PG OR PC STYLE QUAZITE ENCLOSURES, FOR TIER 22 APPLICATIONS. SIZE AND DEPTH PER INSTALLATION REQUIREMENTS, NOTED ON DRAWINGS.
3) COVERS SHALL BE BOLT DOWN, MARKED PER SERVICE (ELECTRICAL OR INSTRUMENTATION).
4) PROVIDE GRADE EXTENSIONS AS APPLICABLE.
5) ALL CONDUITS IN AND OUT OF PULL BOX SHALL HAVE PULL STRINGS.

607



HAND HOLE DETAIL

NOTES:
1) MINIMUM DIAMETER IS 8–1/2", BY MINIMUM 11–3/4" DEEP. MANUFACTURED BY OLD CASTLE PRECAST, INC., OR EQUAL.

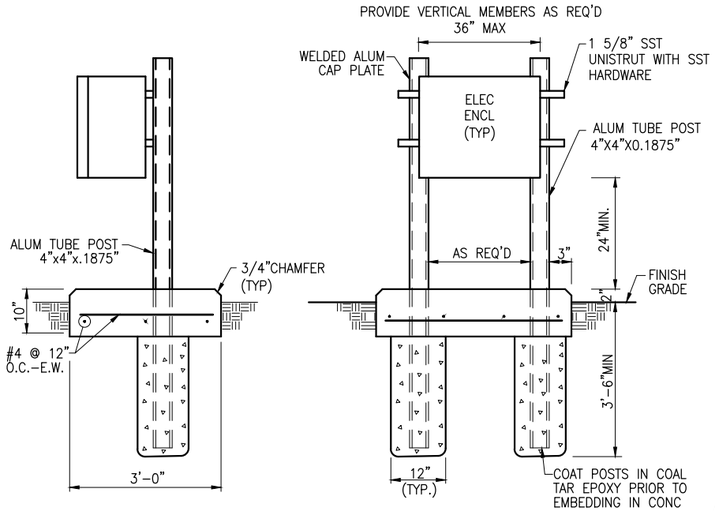
STANDARD DETAILS - ELECTRICAL



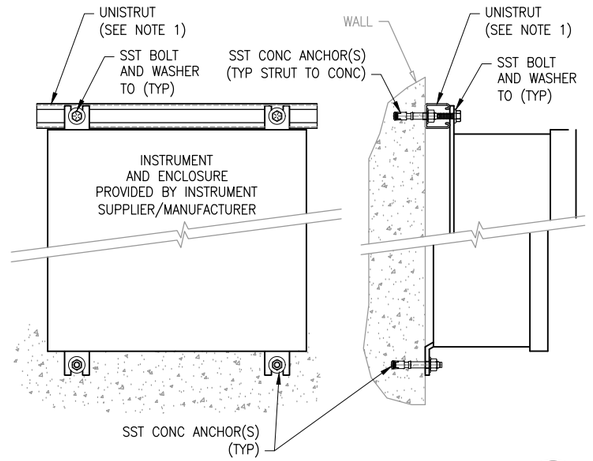
DWG NO. 69 | SHEET ED-01
OF 70 | PROJ. NO. 400-077.01
DATE AUGUST 26, 2020

File name: C:\Civil 3D Projects\400-077.01 - Scada System Upgrades Main and R. L. Pratt WTP\01_Working (Main)\400-077.01_ED-00.dwg; Plotted @: 12/23/2020 1:31:10 PM; Scale multiplier: 0.5; Printed by: Matheus Siqueira; Milestone: BID DOCUMENTS

BID DOCUMENTS

N O T E S:

1. FINAL ASSEMBLY DIMENSION SHALL BE COORDINATED WITH MOUNTED EQUIPMENT SHOP DRAWINGS AND SPACING REQUIREMENTS PER CODE.
2. ALL EQUIPMENT SHALL BE GROUNDED PER DRAWINGS AND APPLICABLE CODE REUIREMENTS.
3. SHOP DRAWINGS REQUIRED FOR ELECTRICAL EQUIPMENT RACK LAYOUT.
4. EQUIPMENT DIMENSIONS VARY.
5. PROVIDE VERTICAL & HORIZONTAL MEMBERS AS MAY BE REQUIRED.
6. DETAIL SHOWS ONE FIELD PANEL; EXPAND VERTICAL & HORIZONTAL MEMBERS FOR MULTIPLE PANELS ON RACK.

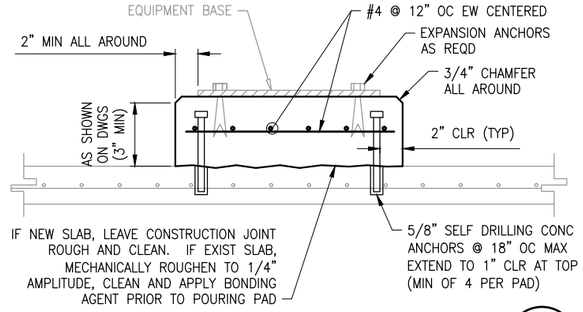


EQUIPMENT RACK

612

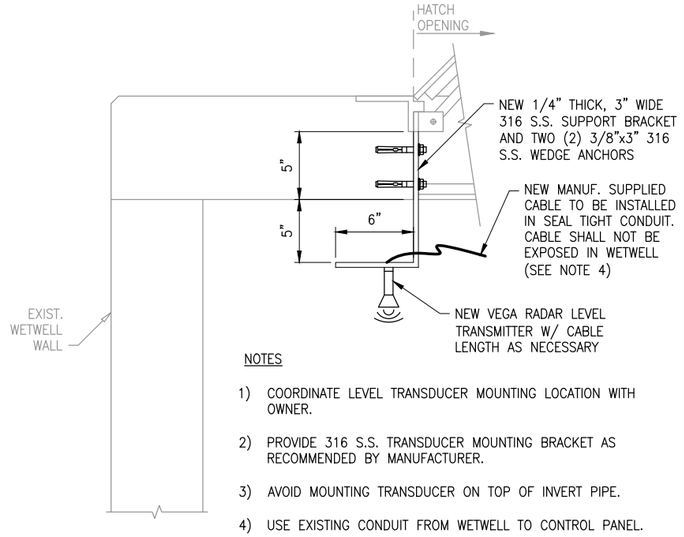
NOTES:

1) PROVIDE SST OR F.R.P. 1-5/8" UNISTRUT WITH SST BOLTS AND NUTS WHERE REQUIRED TO OFFSET INSTRUMENT MOUNT FROM WALL.



WALL MOUNTED ENCLOSURE INSTALLATION

507

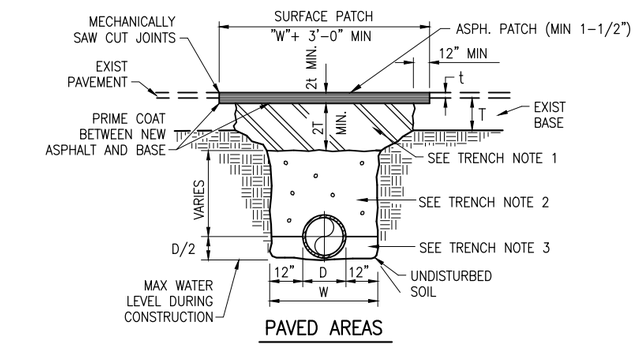


NOTES:

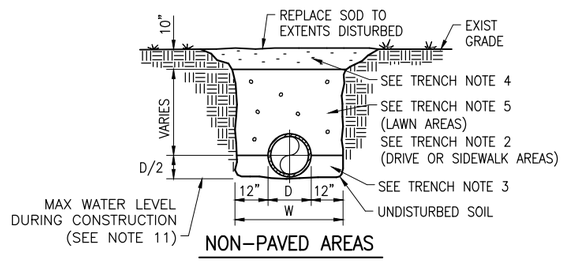
1) PAD SIZE SHALL BE MIN SHOWN ON DETAIL OR DRAWING, OR AS INDICATED BY THE EQUIPMENT MANUFACTURER AND REVIEWED BY THE ENGINEER.
2) EQUIPMENT BASES SHALL BE INSTALLED LEVEL UNLESS SPECIFIED OTHERWISE.
3) SHIM BASES AND BACK OFF TEMPORARY LEVEL NUTS PRIOR TO PLACING GROUT. SHIMS SHALL NOT BE EXPOSED TO VIEW.
4) ANCHOR BOLT TYPE, SIZE, NUMBER, LOCATION AND THREAD PROJECTION SHALL BE AS PER EQUIPMENT MANUFACTURER'S RECOMMENDATIONS AND REVIEWED BY THE ENGINEER. WHERE APPLICABLE ANCHOR BOLTS SHALL BE HELD IN POSITION WITH A TEMPLATE WHILE PAD IS BEING POURED AND CURED.
5) 3/8" TOOLED EDGE IS ACCEPTABLE SUBSTITUTE WITH OWNER / ENGINEER APPROVAL. DO NOT CHAMFER OR TOOL EDGES OF PADS ADJACENT TO WALLS.

EQUIPMENT PAD - TYPE C

358



NOTES



1) COORDINATE LEVEL TRANSDUCER MOUNTING LOCATION WITH OWNER.
2) PROVIDE 316 S.S. TRANSDUCER MOUNTING BRACKET AS RECOMMENDED BY MANUFACTURER.
3) AVOID MOUNTING TRANSDUCER ON TOP OF INVERT PIPE.
4) USE EXISTING CONDUIT FROM WETWELL TO CONTROL PANEL.
5) ALL REFERENCES IN THESE DRAWINGS TO LEVEL TRANSDUCER INSTALLATION, SUBMERSIBLE LEVEL TRANSDUCER INSTALLATION OR SIMILAR SHALL NOW REFERENCE DETAIL #608.

RADAR LEVEL TRANSDUCER INSTALLATION

608

PAVED AREAS

NON-PAVED AREAS

NOTES:

1) PREPARE BASE SECTION, SAW CUT EXISTING PAVEMENT AS APPLICABLE. PRIME COAT, TACK COAT AND PLACE ASPHALT PATCH IMMEDIATELY FOLLOWING PIPE INSTALLATION. BASE MATERIAL SHALL BE TWICE THE THICKNESS OF EXISTING BASE MATERIAL, BUT IN NO CASE BE LESS THAN 12". BASE MATERIAL SHALL BE PLACED IN LIFTS NOT TO EXCEED 8" AND COMPACTED TO 98% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T-180.
2) FILL PLACED IN 8" LIFTS COMPACTED TO 98% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T180.
3) FILL COMPACTED TO 98% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T180.
4) NATURAL TOP SOIL GRADED TO 2" ABOVE EXISTING GRADE WHERE SEEDED & GRADED 1" TO 2" BELOW GRADE WHERE SOD IS REQUIRED.
5) FILL PLACED IN 12" LIFTS (LOOSE MEASURE), COMPACTED TO DENSITY EQUAL TO SURROUNDING MATERIAL BUT NOT LESS THAN 98% OF MAXIMUM DENSITY AS DETERMINED BY AASHTO T180.
6) EXCAVATIONS SHALL BE DEWATERED, WHERE APPLICABLE, TO ENABLE PIPE AND APPURTENANCES TO BE INSTALLED FREE OF WATER.
7) BEDDING AND BACKFILL MATERIAL SHALL BE AS SPECIFIED IN SECTION 02200-EARTHWORK.
8) LIMEROCK BASE SHALL BE AS SPECIFIED IN SECTION 02510-ASPHALTIC PAVEMENT AND BASE.
9) SP 12.5 ASPHALTIC CONCRETE SHALL BE AS SPECIFIED IN SECTION 02510 - ASPHALTIC PAVEMENT AND BASE. PAVEMENT PATCH THICKNESS TO MATCH EXISTING PAVEMENT THICKNESS, BUT IN NO CASE LESS THAN 1-1/2".
10) OUTLINE OF TRENCH EXCAVATION IS FOR ILLUSTRATIVE PURPOSES ONLY. ACTUAL TRENCH WIDTH AND SHAPE WILL VARY WITH SOIL CONDITIONS. TRENCH EXCAVATION SHALL BE IN ACCORDANCE WITH THE "FLORIDA SAFETY ACT" AND OSHA TRENCH EXCAVATION STANDARDS.
11) ALL OPEN-CUT PIPE/CONDUIT LAYING OPERATIONS SHALL BE COMPLETED IN DRY TRENCH EXCAVATIONS PER SPECIFICATIONS.

BIDDING REQUIREMENTS

VILLAGE OF PALM SPRINGS
PALM SPRINGS, FL
ITB NO. 2021B-003
SCADA SYSTEM UPGRADE – MAIN WATER TREATMENT PLANT

ADVERTISEMENT FOR BIDS

Electronic sealed Bids for the construction of the **SCADA System Upgrade, Main Water Treatment Plant,** will be received by the **Village of Palm Springs** at the **Office of the Village Clerk until 2:00 PM, local time on February 11, 2021**, at which time the Bids received will be publicly opened and read**. All bids received after the deadline will be returned unopened. T**he Village of Palm Springs will provide for public participation through Gotowebinar.com, a communication media technology (teleconference) for the **Bid Opening.** The Physical Point of Access is Village Hall, located at 226 Cypress Lane, Palm Springs, FL 33461.

Participants can use their telephone or computer mic & speakers (VoIP).
United States (631) 992-3221Access Code# 176-099-922
Registration URL: https://attendee.gotowebinar.com/register/5565251084037966608
Webinar ID: 713-249-811

The Project consists of furnishing all labor, equipment and material for the Main Water Treatment Plant SCADA System Upgrade as described by the Drawings and Specifications. Generally, the work includes minor demolition, installation of new Control panels and SCADA Computers, network improvements, SCADA Software upgrades, programming, electrical, site restoration and all other incidentals as indicated by the drawings and specifications or as required to properly complete the project as planned.

Invitation to Bid documents are available beginning **January 14, 2021**. The Village of Palm Springs utilizes electronic online services for notification, distribution, and submittal of its Solicitation documents. The Village's Solicitation information can be obtained from: (a) Demandstar website – www.Demandstar.com; (b) contact the Village Clerk, Kimberly Wynn, at kwynn@vpsfl.org; (c) call the Village Clerk's office at (561) 965-4010.

Hard copies of bidding Documents may be obtained from Eckler Engineering, Inc. on Mondays through Fridays between the hours of 8:00 AM to 5:00 PM. Bidding Documents are available on compact disc (as portable document format (PDF) files) for a non-refundable charge of $25.00, including shipping via overnight express service. Alternatively, printed Bidding Documents may be obtained from Eckler Engineering, Inc. either via in-person pick-up or via mail, upon receipt of payment for the Bidding Documents. The non-refundable cost of printed Bidding Documents is $160.00 per set, payable to Eckler Engineering, Inc.

Proposers may submit their responses electronically via DemandStar. Proposers also have the option to submit one (1) unbound original, one (1) copy to the Village Clerk at the time and date specified. Sealed Proposals must be marked **"ITB #2021B-003, SCADA SYSTEM UPGRADE – MAIN WATER TREATMENT PLANT"**.

A **Pre-Bid Conference** will be held remotely for this solicitation on **January 26, 2021, at 2:00 PM.** Attendance at the pre-bid conference is not mandatory. The Village of Palm Springs will provide for public participation through Gotowebinar.com, a communication media technology (teleconference) for the **pre-bid conference**. The Physical Point of Access is Village Hall at 226 Cypress Lane, Palm Springs, FL 33461.

Participants can use their telephone or computer mic & speakers (VoIP).
United States +1 (562) 247-8422 Access Code# 117-702-545
Registration URL: https://attendee.gotowebinar.com/register/409158375791262224
Webinar ID: 601-772-467

Bid security shall be furnished in accordance with the Instructions to Bidders.

Any questions regarding the specifications and Solicitation process must be submitted in writing to the Village Clerk at kwynn@vpsfl.org, Questions and requests for clarification and additional information must be received prior to the Deadline for Submission of Questions on **January 29, 2021,** at 5:00 PM local time.

Pursuant to Section 2-355 of Palm Beach County Ordinance No. 2011-039, and the purchasing policies of the Village of Palm Springs, all Solicitations, once advertised, are under the "Cone of Silence" until the appropriate authority has approved an award recommendation, rejected all responses or some other action by the Village to end the selection process. This limit and requires documentation of communications between potential Bidders and/or Bidders on Village Solicitations, the Village's professional staff, and the Village Council members.

Village of Palm Springs
Kimberly Wynn, Village Clerk

ARTICLE 1 – DEFINED TERMS

1.01 Terms used in these Instructions to Bidders have the meanings indicated in the General Conditions and Supplementary Conditions. Additional terms used in these Instructions to Bidders have the meanings indicated below:

A. *Issuing Office* – The office from which the Bidding Documents are to be issued.

ARTICLE 2 – COPIES OF BIDDING DOCUMENTS

2.01 Complete sets of the Bidding Documents may be obtained from the Issuing Office in the number and format stated in the advertisement or invitation to bid.

2.02 Complete sets of Bidding Documents shall be used in preparing Bids; neither Owner nor Engineer assumes any responsibility for errors or misinterpretations resulting from the use of incomplete sets of Bidding Documents.

2.03 Owner and Engineer, in making copies of Bidding Documents available on the above terms, do so only for the purpose of obtaining Bids for the Work and do not authorize or confer a license for any other use.

ARTICLE 3 – QUALIFICATIONS OF BIDDERS

3.01 To demonstrate Bidder's qualifications to perform the Work, Bidder shall submit with its Bid (a) written evidence establishing its qualifications such as financial data, previous experience, present commitments, and other such information as may be called for in Section 00451, and (b) the following additional information:

A. Evidence of Bidder's authority to do business in the State of Florida.

B. State of Florida general contractor license number (provide current copy).

C. [Subcontractor and Supplier qualification information; coordinate with provisions of Article 12 of these Instructions, "Subcontractors, Suppliers, and Others."]

D. Provide a minimum of five (5) similar projects which have been completed within the past ten (10) years per Section 00451 – Qualification Statement, including project description, final project cost, owner's name, address, and phone number. A similar project shall be defined as utility structure improvement of similar size and complexity.

E. Current Certificate of Insurance per the requirements of Section 00520 – Agreement, Article 10.10.

3.02 A Bidder's failure to submit required qualification information within the times indicated may disqualify Bidder from receiving an award of the Contract.

3.03 No requirement in this Article 3 to submit information will prejudice the right of Owner to seek additional pertinent information regarding Bidder's qualifications.

3.04 Bidder is advised to carefully review those portions of the Bid Form requiring Bidder's representations and certifications.

ARTICLE 4 – SITE AND OTHER AREAS; EXISTING SITE CONDITIONS; EXAMINATION OF SITE; OWNER'S SAFETY PROGRAM; OTHER WORK AT THE SITE

4.01 *Site and Other Areas*

A. The Site is identified in the Bidding Documents. By definition, the Site includes rights-of-way, easements, and other lands furnished by Owner for the use of the Contractor. Any additional lands required for temporary construction facilities, construction equipment, or storage of materials and equipment, and any access needed for such additional lands, are to be obtained and paid for by Contractor.

4.02 *Existing Site Conditions*

A. Subsurface and Physical Conditions; Hazardous Environmental Conditions

1. The Supplementary Conditions identify:

a. those reports known to Owner of explorations and tests of subsurface conditions at or adjacent to the Site, if any.

b. those drawings known to Owner of physical conditions relating to existing surface or subsurface structures at the Site (except Underground Facilities), if any.

2. Owner will make copies of reports and drawings referenced above available to any Bidder on request. These reports and drawings are not part of the Contract Documents, but the Technical Data contained therein upon whose accuracy Bidder is entitled to rely, as provided in the General Conditions, has been identified and established in the Supplementary Conditions. Bidder is responsible for any interpretation or conclusion Bidder draws from any Technical Data or any other data, interpretations, opinions, or information contained in such reports or shown or indicated in such drawings.

3. If the Supplementary Conditions do not identify Technical Data, the default definition of Technical Data set forth in Article 1 of the General Conditions will apply.

B. Underground Facilities: Information and data shown or indicated in the Bidding Documents with respect to existing Underground Facilities at or adjacent to the Site are set forth in the Contract Documents and are based upon information and data furnished to Owner and Engineer by owners of such Underground Facilities, including Owner, or others.

C. Adequacy of Data: Provisions concerning responsibilities for the adequacy of data furnished to prospective Bidders with respect to subsurface conditions, other physical conditions, and Underground Facilities, and possible changes in the Bidding Documents due to differing or unanticipated subsurface or physical conditions appear in Paragraphs 5.03, 5.04, and 5.05 of the General Conditions. Provisions concerning responsibilities for the adequacy of data furnished to prospective Bidders with respect to a Hazardous Environmental Condition at the Site, if any, and possible changes in the Contract Documents due to any Hazardous Environmental Condition uncovered or revealed at the Site which was not shown or indicated in the Drawings or Specifications or identified in the Contract Documents to be within the scope of the Work, appear in Paragraph 5.06 of the General Conditions.

4.03 *Site Visit and Testing by Bidders*

A. On request, the Owner will provide the Bidder access to the Site visit during normal working hours. Bidder shall not disturb any ongoing operations at the Site.

B. On request, and to the extent Owner has control over the Site, and schedule permitting, the Owner will provide Bidder access to the Site to conduct such additional examinations,

investigations, explorations, tests, and studies as Bidder deems necessary for preparing and submitting a successful Bid. Owner will not have any obligation to grant such access if doing so is not practical because of existing operations, security or safety concerns, or restraints on Owner's authority regarding the Site.

C. Bidder shall comply with all applicable Laws and Regulations regarding excavation and location of utilities, obtain all permits, and comply with all terms and conditions established by Owner or by property owners or other entities controlling the Site with respect to schedule, access, existing operations, security, liability insurance, and applicable safety programs.

D. Bidder shall fill all holes and clean up and restore the Site to its former condition upon completion of such explorations, investigations, tests, and studies.

E. Bidder shall not disturb any ongoing operations at the Site.

ARTICLE 5 – BIDDER'S REPRESENTATIONS

5.01 It is the responsibility of each Bidder before submitting a Bid to:

A. examine and carefully study the Bidding Documents, and any data and reference items identified in the Bidding Documents;

B. visit the Site, conduct a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and satisfy itself as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work;

C. become familiar with and satisfy itself as to all Laws and Regulations that may affect cost, progress, and performance of the Work;

D. carefully study all: (1) reports of explorations and tests of subsurface conditions at or adjacent to the Site and all drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings, and (2) reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings;

E. consider the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and the Site-related reports and drawings identified in the Bidding Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder; and (3) Bidder's safety precautions and programs;

F. agree, based on the information and observations referred to in the preceding paragraph, that at the time of submitting its Bid no further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of its Bid for performance of the Work at the price bid and within the times required, and in accordance with the other terms and conditions of the Bidding Documents;

G. become aware of the general nature of the work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents;

H. promptly give Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder discovers in the Bidding Documents and confirm that the written resolution thereof by Engineer is acceptable to Bidder;

I. determine that the Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance and furnishing of the Work; and

J. agree that the submission of a Bid will constitute an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article, that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

ARTICLE 6 – PRE-BID CONFERENCE

6.01 A pre-Bid conference will be held at the time and location stated in the invitation or advertisement to bid. Representatives of Owner and Engineer will be present to discuss the Project. Bidders are encouraged to attend and participate in the conference. Owner will transmit to all prospective Bidders of record such Addenda as Owner and Engineer considers necessary in response to questions arising at the conference. Oral statements may not be relied upon and will not be binding or legally effective.

ARTICLE 7 – INTERPRETATIONS AND ADDENDA

7.01 All questions about the meaning or intent of the Bidding Documents are to be submitted to Owner in writing to the email address stated in the invitation or advertisement to bid. Interpretations or clarifications considered necessary by Owner or Engineer in response to such questions will be issued by Addenda delivered to all parties recorded as having received the Bidding Documents. Questions received less than seven days prior to the date for opening of Bids may not be answered. Only questions answered by Addenda will be binding. Oral and other interpretations or clarifications will be without legal effect.

7.02 Addenda may be issued to clarify, correct, supplement, or change the Bidding Documents.

ARTICLE 8 – BID SECURITY

8.01 A Bid must be accompanied by Bid security made payable to Owner in an amount of 5 percent of Bidder's maximum Bid price (determined by adding the base bid and all alternates) and in the form of a certified check, bank money order, or a Bid bond (on the form included in the Bidding Documents) issued by a surety meeting the requirements of Paragraphs 6.01 and 6.02 of the General Conditions.

8.02 The Bid security of the apparent Successful Bidder will be retained until Owner awards the contract to such Bidder, and such Bidder has executed the Contract Documents, furnished the required contract security, and met the other conditions of the Notice of Award, whereupon the Bid security will be released. If the Successful Bidder fails to execute and deliver the Contract Documents and furnish the required contract security within 15 days after the Notice of Award, Owner may consider Bidder to be in default, annul the Notice of Award, and the Bid security of that Bidder will be forfeited. Such forfeiture shall be Owner's exclusive remedy if Bidder defaults.

8.03 The Bid security of other Bidders that Owner believes to have a reasonable chance of receiving the award may be retained by Owner until the earlier of seven days after the Effective Date of

the Contract or 121 days after the Bid opening, whereupon Bid security furnished by such Bidders will be released.

8.04 Bid security of other Bidders that Owner believes do not have a reasonable chance of receiving the award will be released within seven days after the Bid opening.

ARTICLE 9 – CONTRACT TIMES

9.01 The number of days within which, or the dates by which, the Work is to be substantially completed, and completed and ready for final payment, are set forth in the Agreement.

ARTICLE 10 – LIQUIDATED DAMAGES

10.01 Provisions for liquidated damages, if any, for failure to timely attain a Milestone, Substantial Completion, or completion of the Work in readiness for final payment, are set forth in the Agreement.

ARTICLE 11 – SUBSTITUTE AND "OR-EQUAL" ITEMS

11.01 Not used.

11.02 All prices that Bidder sets forth in its Bid shall be based on the presumption that the Contractor will furnish the materials and equipment specified or described in the Bidding Documents, as supplemented by Addenda. Any assumptions regarding the possibility of post-Bid approvals of "or-equal" or substitution requests are made at Bidder's sole risk.

ARTICLE 12 – SUBCONTRACTORS, SUPPLIERS, AND OTHERS

12.01 A Bidder shall be prepared to retain specific Subcontractors, Suppliers, or other individuals or entities for the performance of the Work if required by the Bidding Documents (most commonly in the Specifications) to do so. If a prospective Bidder objects to retaining any such Subcontractor, Supplier, or other individual or entity, and the concern is not relieved by an Addendum, then the prospective Bidder should refrain from submitting a Bid.

12.02 Subsequent to the submittal of the Bid, Owner may not require the Successful Bidder or Contractor to retain any Subcontractor, Supplier, or other individual or entity against which Contractor has reasonable objection.

12.03 Unless otherwise required to be submitted with the Bid, the apparent Successful Bidder, and any other Bidder so requested, shall within five days after Bid opening, submit to Owner a list of the Subcontractors or Suppliers for which such identification is required

Such list shall be accompanied by an experience statement with pertinent information regarding similar projects and other evidence of qualification for each such Subcontractor, Supplier, or other individual or entity. If Owner or Engineer, after due investigation, has reasonable objection to any proposed Subcontractor, Supplier, individual, or entity, Owner may, before the Notice of Award is given, request apparent Successful Bidder to submit an acceptable substitute, in which case apparent Successful Bidder shall submit a substitute, Bidder's Bid price will be increased (or decreased) by the difference in cost occasioned by such substitution, and Owner may consider such price adjustment in evaluating Bids and making the Contract award.

12.04 If apparent Successful Bidder declines to make any such substitution, Owner may award the Contract to the next lowest Bidder that proposes to use acceptable Subcontractors, Suppliers, or other individuals or entities. Declining to make requested substitutions will constitute grounds for forfeiture of the Bid security of any Bidder. Any Subcontractor, Supplier, individual, or entity

so listed and against which Owner or Engineer makes no written objection prior to the giving of the Notice of Award will be deemed acceptable to Owner and Engineer subject to subsequent revocation of such acceptance as provided in Paragraph 7.06 of the General Conditions.

ARTICLE 13 – PREPARATION OF BID

13.01 The Bid Form is included with the Bidding Documents.

A. All blanks on the Bid Form shall be completed in ink and the Bid Form signed in ink. Erasures or alterations shall be initialed in ink by the person signing the Bid Form. A Bid price shall be indicated for each section, Bid item, alternate, adjustment unit price item, and unit price item listed therein.

B. If the Bid Form expressly indicates that submitting pricing on a specific alternate item is optional, and Bidder elects to not furnish pricing for such optional alternate item, then Bidder may enter the words "No Bid" or "Not Applicable."

13.02 A Bid by a corporation shall be executed in the corporate name by a corporate officer (whose title must appear under the signature), accompanied by evidence of authority to sign. The corporate address and state of incorporation shall be shown.

13.03 A Bid by a partnership shall be executed in the partnership name and signed by a partner (whose title must appear under the signature), accompanied by evidence of authority to sign. The partnership's address for receiving notices shall be shown.

13.04 A Bid by a limited liability company shall be executed in the name of the firm by a member or other authorized person and accompanied by evidence of authority to sign. The state of formation of the firm and the firm's address for receiving notices shall be shown.

13.05 A Bid by an individual shall show the Bidder's name and address for receiving notices.

13.06 A Bid by a joint venture shall be executed by an authorized representative of each joint venturer in the manner indicated on the Bid Form. The joint venture's address for receiving notices shall be shown.

13.07 All names shall be printed in ink below the signatures.

13.08 The Bid shall contain an acknowledgment of receipt of all Addenda, the numbers of which shall be filled in on the Bid Form.

13.09 Postal and e-mail addresses and telephone number for communications regarding the Bid shall be shown.

13.10 The Bid shall contain evidence of Bidder's authority and qualification to do business in the state where the Project is located, or Bidder shall covenant in writing to obtain such authority and qualification prior to award of the Contract and attach such covenant to the Bid. Bidder's state contractor license number, if any, shall also be shown on the Bid Form.

ARTICLE 14 – BASIS OF BID

14.01 *Lump Sum*

A. Bidders shall submit a Bid on a lump sum basis as set forth in the Bid Form.

14.02 *Unit Price*

A. Bidders shall submit a Bid on a unit price basis for each item of Work listed in the unit price section of the Bid Form.

B. The “Bid Price” (sometimes referred to as the extended price) for each unit price Bid item will be the product of the “Estimated Quantity” (which Owner or its representative has set forth in the Bid Form) for the item and the corresponding “Bid Unit Price” offered by the Bidder. The total of all unit price Bid items will be the sum of these “Bid Prices”; such total will be used by Owner for Bid comparison purposes. The final quantities and Contract Price will be determined in accordance with Paragraph 13.03 of the General Conditions.

C. Discrepancies between the multiplication of units of Work and unit prices will be resolved in favor of the unit prices. Discrepancies between the indicated sum of any column of figures and the correct sum thereof will be resolved in favor of the correct sum.

14.03 *Allowances*

A. For cash allowances the Bid price shall include such amounts as the Bidder deems proper for Contractor's overhead, costs, profit, and other expenses on account of cash allowances, if any, named in the Contract Documents, in accordance with Paragraph 13.02.B of the General Conditions.

ARTICLE 15 – SUBMITTAL OF BID

15.01 With each copy of the Bidding Documents, a Bidder is furnished one separate unbound copy of the Bid Form, and, if required, the Bid Bond Form. The unbound copy of the Bid Form is to be completed and submitted with the Bid security and the other documents required to be submitted under the terms of Article 7 of the Bid Form.

15.02 A Bid shall be received no later than the date and time prescribed and at the place indicated in the advertisement or invitation to bid and shall be enclosed in a plainly marked package with the Project title (and, if applicable, the designated portion of the Project for which the Bid is submitted), the name and address of Bidder, and shall be accompanied by the Bid security and other required documents. If a Bid is sent by mail or other delivery system, the sealed envelope containing the Bid shall be enclosed in a separate package plainly marked on the outside with the notation “BID ENCLOSED.” A mailed Bid shall be addressed to 226 Cypress Lane, Palm Springs, FL 33461.

15.03 Bids received after the date and time prescribed for the opening of bids, or not submitted at the correct location or in the designated manner, will not be accepted and will be returned to the Bidder unopened.

15.04 The following documents shall be submitted with and made a part of the Bid:

Section 00400 Bid Submission checklist
Section 00410 Bid Form
Section 00430 Bid Bond
Section 00431 Tabulation of Subcontractor and Suppliers
Section 00440 Florida Trench Safety Act Certification
Section 00451 Qualifications Statement
Section 00452 Bidder’s Statement of Disputes, Litigation, Arbitration, and Surety Completion
Section 00453 Noncollusion Affidavit
Section 00454 Drug-Free Workplace Certificate
Section 00455 Sworn Statement on Public Entity Crimes
Section 00456 Scrutinized Companies Certification Form
Certificate of Insurance

ARTICLE 16 – MODIFICATION AND WITHDRAWAL OF BID

16.01 A Bid may be withdrawn by an appropriate document duly executed in the same manner that a Bid must be executed and delivered to the place where Bids are to be submitted prior to the date and time for the opening of Bids. Upon receipt of such notice, the unopened Bid will be returned to the Bidder.

16.02 If a Bidder wishes to modify its Bid prior to Bid opening, Bidder must withdraw its initial Bid in the manner specified in Paragraph 16.01 and submit a new Bid prior to the date and time for the opening of Bids.

16.03 If within 24 hours after Bids are opened any Bidder files a duly signed written notice with Owner and promptly thereafter demonstrates to the reasonable satisfaction of Owner that there was a material and substantial mistake in the preparation of its Bid, that Bidder may withdraw its Bid, and the Bid security will be returned. Thereafter, if the Work is rebid, that Bidder will be disqualified from further bidding on the Work.

ARTICLE 17 – OPENING OF BIDS

17.01 Bids will be opened at the time and place indicated in the advertisement or invitation to bid and, unless obviously non-responsive, read aloud publicly. An abstract of the amounts of the base Bids and major alternates, if any, will be made available to Bidders after the opening of Bids.

ARTICLE 18 – BIDS TO REMAIN SUBJECT TO ACCEPTANCE

18.01 All Bids will remain subject to acceptance for the period of time stated in the Bid Form, but Owner may, in its sole discretion, release any Bid and return the Bid security prior to the end of this period.

ARTICLE 19 – EVALUATION OF BIDS AND AWARD OF CONTRACT

19.01 Owner reserves the right to reject any or all Bids, including without limitation, nonconforming, nonresponsive, unbalanced, or conditional Bids. Owner will reject the Bid of any Bidder that Owner finds, after reasonable inquiry and evaluation, to not be responsible. If Bidder purports to add terms or conditions to its Bid, takes exception to any provision of the Bidding Documents, or attempts to alter the contents of the Contract Documents for purposes of the Bid, then the Owner will reject the Bid as nonresponsive; provided that Owner also reserves the right to waive all minor informalities not involving price, time, or changes in the Work.

19.02 If Owner awards the contract for the Work, such award shall be to the responsible Bidder submitting the lowest responsive Bid.

19.03 Evaluation of Bids

A. In evaluating Bids, Owner will consider whether or not the Bids comply with the prescribed requirements, and such alternates, unit prices, and other data, as may be requested in the Bid Form or prior to the Notice of Award.

19.04 In evaluating whether a Bidder is responsible, Owner will consider the qualifications of the Bidder and may consider the qualifications and experience of Subcontractors and Suppliers proposed for those portions of the Work for which the identity of Subcontractors and Suppliers must be submitted as provided in the Bidding Documents.

19.05 Owner may conduct such investigations as Owner deems necessary to establish the responsibility, qualifications, and financial ability of Bidders and any proposed Subcontractors or Suppliers.

ARTICLE 20 – BONDS AND INSURANCE

20.01 Article 6 of the General Conditions, as may be modified by the Supplementary Conditions, sets forth Owner's requirements as to performance and payment bonds and insurance. When the Successful Bidder delivers the Agreement (executed by Successful Bidder) to Owner, it shall be accompanied by required bonds and insurance documentation.

ARTICLE 21 – SIGNING OF AGREEMENT

21.01 When Owner issues a Notice of Award to the Successful Bidder, it shall be accompanied by the unexecuted counterparts of the Agreement along with the other Contract Documents as identified in the Agreement. Within 15 days thereafter, Successful Bidder shall execute and deliver the required number of counterparts of the Agreement (and any bonds and insurance documentation required to be delivered by the Contract Documents) to Owner. Within ten days thereafter, Owner shall deliver one fully executed counterpart of the Agreement to Successful Bidder, together with printed and electronic copies of the Contract Documents as stated in Paragraph 2.02 of the General Conditions.

ARTICLE 22 – SALES AND USE TAX

22.01 CONTRACTOR is responsible for all sales and use taxes applicable to this project.

SECTION 00400

BID SUBMISSION CHECKLIST

Project Name: **SCADA SYSTEM UPGRADE, MAIN WATER TREATMENT PLANT**

Bid Number: **2021B-003**

Bidder=s Name: _____

The following items must be submitted in the following order with your bid:

1. 9 Completed Section 00400 - Bid Submission Checklist.

2. 9 Completed Section 00410 - Bid Form.

3. 9 Completed Section 00430 - Bid Bond, complete with Power of Attorney.

4. 9 Completed Section 00431 – Tabulation of Subcontractors and Suppliers.

5. 9 Completed Section 00440 – Florida Trench Safety Act Certification.

6. 9 Completed Section 00451 –Qualifications Statement.

7. 9 Completed Section 00452 – Bidder's Statement of Disputes, Litigation, Arbitration, and Surety Completion – Last Three (3) Years

8. 9 Completed Section 00453 - Non-Collusive Affidavit.

9. 9 Completed Section 00454 - Drug-Free Workplace.

10. 9 Completed Section 00455 - Public Entity Crimes.

11. 9 Completed Section 00456 - Scrutinized Companies Certification Form.

12. 9 Provide requested bidder qualification information per Section 00200 - Instructions to Bidders, Articles 3.1, 3.2, 3.3, and 3.4.

13. 9 Current insurance certificate showing that bidder can meet the insurance requirements per Specification Section 00815 - Supplementary Conditions, Article SC-5.04 and SC-5.06, A.

14. 9 Signed copy of all Addenda.

Submit one (1) original and two (2) copies of all documents listed above. Original shall be clearly marked Original.

Failure to provide the above listed items may result in your bid being deemed non-responsive.

END OF SECTION

SECTION 00410

BID FORM

ARTICLE 1 – BID RECIPIENT

1.01 This Bid is submitted to:

Village of Palm Springs
226 Cypress Lane
Palm Springs, FL 33461

1.02 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2 – BIDDER'S ACKNOWLEDGEMENTS

2.01 Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security. This Bid will remain subject to acceptance for 120 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

ARTICLE 3 – BIDDER'S REPRESENTATIONS

3.01 In submitting this Bid, Bidder represents that:

A. Bidder has examined and carefully studied the Bidding Documents, and any data and reference items identified in the Bidding Documents, and hereby acknowledges receipt of the following Addenda:

Addendum No.	Addendum, Date

B. Bidder has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and satisfied itself as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Bidder is familiar with and has satisfied itself as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Not used.

E. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and any Site-related reports and drawings identified in the Bidding Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and

performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder; and (3) Bidder's safety precautions and programs.

F. Bidder agrees, based on the information and observations referred to in the preceding paragraph, that no further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of this Bid for performance of the Work at the price bid and within the times required, and in accordance with the other terms and conditions of the Bidding Documents.

G. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

H. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and confirms that the written resolution thereof by Engineer is acceptable to Bidder.

I. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance and furnishing of the Work.

J. The submission of this Bid constitutes an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article, and that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

ARTICLE 4 – BIDDER'S CERTIFICATION

4.01 Bidder certifies that:

A. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation;

B. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid;

C. Bidder has not solicited or induced any individual or entity to refrain from bidding; and

D. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 4.01.D:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the e execution of the Contract.

ARTICLE 5 – BASIS OF BID

5.01 Bidder will complete the Work in accordance with the Contract Documents for the following price(s):

Lump Sum Bid Price	$
Lump Sum Contingency Allowance (Section 01010, 1.05)	$ 50,000.00

Total of Lump Sum Price $ _____

_____

(written)

ARTICLE 6 – TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete within 270 calendar days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 300 calendar days after the date when the Contract Times commence to run.

6.02 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 7 – ATTACHMENTS TO THIS BID

7.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. List of Proposed Subcontractors;

C. List of Proposed Suppliers;

D. List of Project References;

E. Evidence of authority to do business in the state of the Project;

F. Contractor's License Number;

G. Required Bidder Qualification Statement with supporting data; and

H. Documentation per Section 00200 – Instructions to bidders, page 8, Article 15.04.

ARTICLE 8 – DEFINED TERMS

8.01 The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

_____	_____
Title	Title
Attest: _____	Attest: _____
Signature	Signature
Title	Title

Note: Addresses are to be used for giving any required notice.
Provide execution by any additional parties, such as joint venturers, if necessary.

1. Bidder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to pay to Owner upon default of Bidder the penal sum set forth on the face of this Bond. Payment of the penal sum is the extent of Bidder's and Surety's liability. Recovery of such penal sum under the terms of this Bond shall be Owner's sole and exclusive remedy upon default of Bidder.

2. Default of Bidder shall occur upon the failure of Bidder to deliver within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents.

3. This obligation shall be null and void if:

3.1 Owner accepts Bidder's Bid and Bidder delivers within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents, or

3.2 All Bids are rejected by Owner, or

3.3 Owner fails to issue a Notice of Award to Bidder within the time specified in the Bidding Documents (or any extension thereof agreed to in writing by Bidder and, if applicable, consented to by Surety when required by Paragraph 5 hereof).

4. Payment under this Bond will be due and payable upon default of Bidder and within 30 calendar days after receipt by Bidder and Surety of written notice of default from Owner, which notice will be given with reasonable promptness, identifying this Bond and the Project and including a statement of the amount due.

5. Surety waives notice of any and all defenses based on or arising out of any time extension to issue Notice of Award agreed to in writing by Owner and Bidder, provided that the total time for issuing Notice of Award including extensions shall not in the aggregate exceed 120 days from the Bid due date without Surety's written consent.

6. No suit or action shall be commenced under this Bond prior to 30 calendar days after the notice of default required in Paragraph 4 above is received by Bidder and Surety and in no case later than one year after the Bid due date.

7. Any suit or action under this Bond shall be commenced only in a court of competent jurisdiction located in the state in which the Project is located.

8. Notices required hereunder shall be in writing and sent to Bidder and Surety at their respective addresses shown on the face of this Bond. Such notices may be sent by personal delivery, commercial courier, or by United States Registered or Certified Mail, return receipt requested, postage pre-paid, and shall be deemed to be effective upon receipt by the party concerned.

9. Surety shall cause to be attached to this Bond a current and effective Power of Attorney evidencing the authority of the officer, agent, or representative who executed this Bond on behalf of Surety to execute, seal, and deliver such Bond and bind the Surety thereby.

10. This Bond is intended to conform to all applicable statutory requirements. Any applicable requirement of any applicable statute that has been omitted from this Bond shall be deemed to be included herein as if set forth at length. If any provision of this Bond conflicts with any applicable statute, then the provision of said statute shall govern and the remainder of this Bond that is not in conflict therewith shall continue in full force and effect.

11. The term “Bid” as used herein includes a Bid, offer, or proposal as applicable.

SECTION 00431
TABULATION OF SUBCONTRACTORS AND SUPPLIERS

The Undersigned states that the following is a full and complete list of the proposed subcontractors and suppliers on this Project and the class of work to be performed by each and that such list will not be added to nor altered without written consent of the Owner through the Engineer.

INCLUDE AS AN ATTACHMENT AN AUDITED BALANCE SHEET FOR EACH OF THE LAST 3 YEARS

11. CONSTRUCTION EXPERIENCE:

Current Experience:

List on **Schedule A** all uncompleted projects currently under contract (If Joint Venture list each participant's projects separately).

Previous Experience:

List on **Schedule B** all projects completed within the last 5 Years (If Joint Venture list each participant's projects separately).

Has firm listed in Section 1 ever failed to complete a construction contract awarded to it?

☐ YES ☐ NO

If YES, attach as an Attachment details including Project Owner's contact information.

Has any Corporate Officer, Partner, Joint Venture participant or Proprietor ever failed to complete a construction contract awarded to them in their name or when acting as a principal of another entity?

☐ YES ☐ NO

If YES, attach as an Attachment details including Project Owner's contact information.

Are there any judgments, claims, disputes or litigation pending or outstanding involving the firm listed in Section 1 or any of its officers (or any of its partners if a partnership or any of the individual entities if a joint venture)?

☐ YES ☐ NO

If YES, attach as an Attachment details including Project Owner's contact information.

12. SAFETY PROGRAM:

SECTION 00454
DRUG-FREE WORKPLACE CERTIFICATE

I, the undersigned, in accordance with Florida Statute 287.087, hereby certify that _____
_____(Print or Type Name of Firm)

- Publishes a written statement notifying that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.

- Informs employees about the dangers of drug abuse in the workplace; the firm's policy of maintaining a drug-free working environment and available drug counseling, rehabilitation, and employee assistance programs; and the penalties that may be imposed upon employees for drug-use violations.

- Gives each employee engaged in providing commodities or contractual services that are under bid or proposal a copy of the statement specified above.

- Notifies the employees that as a condition of working on the commodities or contractual services under bid or proposal, the employee will abide by the terms of the statement and will notify the employer of any conviction of or plea of guilty or nolo contendere to any violation of Chapter 1893 or any controlled substance law of the State of Florida or the United States for a violation occurring in the workplace, no later than 5 days after such conviction, and requires employees to sign copies of such written statement to acknowledge their receipt.

- Imposes a sanction on or requires the satisfactory participation in a drug-abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.

- Makes a good faith effort to continue to maintain a drug-free workplace through the implementation of the drug-free workplace program.

"As a person authorized to sign this statement, I certify that the business, firm, or corporation named above complies fully with the requirements set forth herein."

SECTION 00455
SWORN STATEMENT UNDER SECTION 287.133(3)(a),
FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES

(To be signed in the presence of a notary public or other officer authorized to administer oaths.)

STATE OF _____

COUNTY OF _____

Before me, the undersigned authority, personally appeared _____, who, being by me first duly sworn, made the following statement:

1. The business address of _____
(firm name of Bidder/Contractor)

is _____.

2. My relationship to _____
(firm name of Bidder/Contractor)

is _____.
(relationship such as sole proprietor, partner, president, vice president)

3. I understand that a "public entity crime" as defined in Section 287.133 of the Florida Statutes includes a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity in Florida or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or such an agency or political subdivision and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

4. I understand that "convicted" or "conviction" is defined by the statute to mean a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

5. I understand that "affiliate" is defined by the statute to mean (1) a predecessor or successor of a person or a corporation convicted of a public entity crime; or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime; or (3) those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate; or (4) a person or corporation who knowingly entered into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months.

6. Neither the Bidder/Contractor nor any officer, director, executive, partner, shareholder, employee, member or agent who is active in the management of the Bidder/Contractor, nor any affiliate of the Bidder/Contractor, has been convicted of public entity crime subsequent to July 1, 1989.

(Draw a line through Paragraph 6 if Paragraph 7 below applies.)

7. There has been a conviction of a public entity crime by the Bidder/Contractor, or an officer, director, executive, partner, shareholder, employee, member or agent of the Bidder/Contractor who is active in the management of the Bidder/Contractor or an affiliate of the Bidder/Contractor. A determination has been made pursuant to Section 287.133(3) by order of the Division of Administrative Hearings that it is not in the public interest for the name of the convicted person or affiliate to appear on the convicted vendor list. The name of the convicted person or affiliate is _____.

A copy of the order of the Division of Administrative Hearings is attached to this statement.

(Draw a line through Paragraph 7 if Paragraph 6 above applies.)

SECTION 00456
SCRUTINIZED COMPANIES CERTIFICATION FORM

By execution below, I, _____, on behalf of _____ (hereinafter, the "Contractor"), hereby swear or affirm to the following certifications:

The following certifications apply to all procurements:

1. The Contractor has reviewed section 215.4725, Florida Statutes, section 215.473, Florida Statutes and section 287.135, Florida Statutes, and understands the same.
2. The Contractor is not on the Scrutinized Companies that Boycott Israel List nor is the Contractor engaged in a boycott of Israel.
3. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
4. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

If the contract awarded hereunder is for one million dollars or more, the following additional certifications apply:

1. The Contractor is not on the Scrutinized Companies with Activities in Sudan List.
2. The Contractor is not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.
3. The Contractor is not engaged in business operations in Cuba or Syria.
5. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
6. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

Copy: Engineer

SECTION 00520
AGREEMENT
BETWEEN OWNER AND CONTRACTOR
FOR CONSTRUCTION CONTRACT (STIPULATED PRICE)

THIS AGREEMENT is by and between Village of Palm Springs ("Owner") and

("Contractor").

Owner and Contractor hereby agree as follows:

ARTICLE 1 – WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows: The Project consists of furnishing all labor, equipment and material for the SCADA System Improvements/Upgrade as described by the Drawings and Specifications. Generally, the work includes minor demolition, new control panels, modification to existing control panels, new computers/network equipment, software upgrades, electrical, site restoration and all other incidentals as indicated by the drawings and specifications or as required to properly complete the project as planned.

ARTICLE 2 – THE PROJECT

2.01 The Project, of which the Work under the Contract Documents is a part, is generally described as follows: **SCADA System Upgrade – Main Water Treatment Plant.**

ARTICLE 3 – ENGINEER

3.01 The part of the Project that pertains to the Work has been designed by Eckler Engineering, Inc.

3.02 The Owner has retained Eckler Engineering, Inc. ("Engineer") to act as Owner's representative, assume all duties and responsibilities, and have the rights and authority assigned to Engineer in the Contract Documents in connection with the completion of the Work in accordance with the Contract Documents.

ARTICLE 4 – CONTRACT TIMES

4.01 *Time of the Essence*

A. All time limits for Milestones, if any, Substantial Completion, and completion and readiness for final payment as stated in the Contract Documents are of the essence of the Contract.

4.02 *Contract Times: Days*

A. The Work will be substantially completed within 270 days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 300 days after the date when the Contract Times commence to run.

4.03 *Liquidated Damages*

A. Contractor and Owner recognize that time is of the essence as stated in Paragraph 4.01 above and that Owner will suffer financial and other losses if the Work is not completed

and Milestones not achieved within the times specified in Paragraph 4.02 above, plus any extensions thereof allowed in accordance with the Contract. The parties also recognize the delays, expense, and difficulties involved in proving in a legal or arbitration proceeding the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

1. Substantial Completion: Contractor shall pay Owner $500.00 for each day that expires after the time (as duly adjusted pursuant to the Contract) specified in Paragraph 4.02.A above for Substantial Completion until the Work is substantially complete.
2. Completion of Remaining Work: After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract) for completion and readiness for final payment, Contractor shall pay Owner $500.00 for each day that expires after such time until the Work is completed and ready for final payment.
3. Liquidated damages for failing to timely attain Substantial Completion and final completion are not additive and will not be imposed concurrently.

4.04 *Special Damages*

A. In addition to the amount provided for liquidated damages, Contractor shall reimburse Owner (1) for any fines or penalties imposed on Owner as a direct result of the Contractor's failure to attain Substantial Completion according to the Contract Times.

ARTICLE 5 – CONTRACT PRICE

5.01 Owner shall pay Contractor for completion of the Work in accordance with the Contract Documents the amounts that follow, subject to adjustment under the Contract:

A. For all Work other than Unit Price Work, a lump sum of: $_____.

All specific cash allowances are included in the above price in accordance with Paragraph 13.02 of the General Conditions.

B. For all Unit Price Work, an amount equal to the sum of the extended prices (established for each separately identified item of Unit Price Work by multiplying the unit price times the actual quantity of that item):

Unit Price Work					
Item No.	**Description**	**Unit**	**Estimated Quantity**	**Unit Price**	**Extended Price**
	Not Applicable				
Total of all Extended Prices for Unit Price Work (subject to final adjustment based on actual quantities)					$ N/A

The extended prices for Unit Price Work set forth as of the Effective Date of the Contract are based on estimated quantities. As provided in Paragraph 13.03 of the General Conditions, estimated quantities are not guaranteed, and determinations of actual quantities and classifications are to be made by Engineer.

C. Total of Lump Sum Amount and Unit Price Work (subject to final Unit Price adjustment) $_____.

D. For all Work, at the prices stated in Contractor's Bid, attached hereto as an exhibit.

ARTICLE 6 – PAYMENT PROCEDURES

6.01 *Submittal and Processing of Payments*

A. Contractor shall submit Applications for Payment in accordance with Article 15 of the General Conditions. Applications for Payment will be processed by Engineer as provided in the General Conditions.

6.02 *Progress Payments; Retainage*

A. Owner shall make progress payments on account of the Contract Price on the basis of Contractor's Applications for Payment on or about the 20th day of each month during performance of the Work as provided in Paragraph 6.02.A.1 below, provided that such Applications for Payment have been submitted in a timely manner and otherwise meet the requirements of the Contract. All such payments will be measured by the Schedule of Values established as provided in the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no Schedule of Values, as provided elsewhere in the Contract.

1. Prior to Substantial Completion, progress payments will be made in an amount equal to the percentage indicated below but, in each case, less the aggregate of payments previously made and less such amounts as Owner may withhold, including but not limited to liquidated damages, in accordance with the Contract

a. 90 percent of Work completed (with the balance being retainage). If the Work has been 50 percent completed as determined by Engineer, and if the character and progress of the Work have been satisfactory to Owner and Engineer, then as long as the character and progress of the Work remain satisfactory to Owner and Engineer, the retainage will be reduced in accordance with Florida Statute 218.735; and

b. 90 percent of cost of materials and equipment not incorporated in the Work (with the balance being retainage).

B. Upon Substantial Completion, Owner shall pay an amount sufficient to increase total payments to Contractor to 100 percent of the Work completed, less such amounts set off by Owner pursuant to Paragraph 15.01.E of the General Conditions, and less 200 percent of Engineer's estimate of the value of Work to be completed or corrected as shown on the punch list of items to be completed or corrected prior to final payment.

6.03 *Final Payment*

A. Upon final completion and acceptance of the Work in accordance with Paragraph 15.06 of the General Conditions, Owner shall pay the remainder of the Contract Price as recommended by Engineer as provided in said Paragraph 15.06.

ARTICLE 7 – INTEREST

7.01 All amounts not paid when due shall bear interest at the rate of 0 percent per annum.

ARTICLE 8 – CONTRACTOR'S REPRESENTATIONS

8.01 In order to induce Owner to enter into this Contract, Contractor makes the following representations:

A. Contractor has examined and carefully studied the Contract Documents, and any data and reference items identified in the Contract Documents.

B. Contractor has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and is satisfied as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Contractor is familiar with and is satisfied as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Contractor has carefully studied all: (1) reports of explorations and tests of subsurface conditions at or adjacent to the Site and all drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings, and (2) reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings.

E. Contractor has considered the information known to Contractor itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Contract Documents; and the Site-related reports and drawings identified in the Contract Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor; and (3) Contractor's safety precautions and programs.

F. Based on the information and observations referred to in the preceding paragraph, Contractor agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

G. Contractor is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Contract Documents.

H. Contractor has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Contractor has discovered in the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

I. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

J. Contractor's entry into this Contract constitutes an incontrovertible representation by Contractor that without exception all prices in the Agreement are premised upon performing and furnishing the Work required by the Contract Documents.

ARTICLE 9 – CONTRACT DOCUMENTS

9.01 *Contents*

A. The Contract Documents consist of the following:

1. This Agreement (pages 1 to ___, inclusive).
2. Performance bond (pages ___ to ___, inclusive).
3. Payment bond (pages ___ to ___, inclusive).
4. Other bonds.
    a. ___ (pages ___ to ___, inclusive).
    b. ___ (pages ___ to ___, inclusive).
    c. ___ (pages ___ to ___, inclusive).
5. General Conditions (pages ___ to ___, inclusive).
6. Supplementary Conditions (pages ___ to ___, inclusive).
7. Specifications as listed in the table of contents of the Project Manual.
8. Drawings (not attached but incorporated by reference) consisting of ___ sheets with each sheet bearing the following general title: ___ **[or]** the Drawings listed on the attached sheet index.
9. Addenda (numbers ___ to ___, inclusive).
10. Exhibits to this Agreement (enumerated as follows):
    a. Contractor's Bid (pages ___ to ___, inclusive).
11. The following which may be delivered or issued on or after the Effective Date of the Contract and are not attached hereto:
    a. Notice to Proceed.
    b. Work Change Directives.
    c. Change Orders.
    d. Field Orders.

B. The documents listed in Paragraph 9.01.A are attached to this Agreement (except as expressly noted otherwise above).

C. There are no Contract Documents other than those listed above in this Article 9.

D. The Contract Documents may only be amended, modified, or supplemented as provided in the General Conditions.

ARTICLE 10 – MISCELLANEOUS

10.01 *Terms*

A. Terms used in this Agreement will have the meanings stated in the General Conditions and the Supplementary Conditions.

10.02 *Assignment of Contract*

A. Unless expressly agreed to elsewhere in the Contract, no assignment by a party hereto of any rights under or interests in the Contract will be binding on another party hereto without the written consent of the party sought to be bound; and, specifically but without limitation, money that may become due and money that is due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents.

10.03 *Successors and Assigns*

A. Owner and Contractor each binds itself, its successors, assigns, and legal representatives to the other party hereto, its successors, assigns, and legal representatives in respect to all covenants, agreements, and obligations contained in the Contract Documents.

10.04 *Severability*

A. Any provision or part of the Contract Documents held to be void or unenforceable under any Law or Regulation shall be deemed stricken, and all remaining provisions shall continue to be valid and binding upon Owner and Contractor, who agree that the Contract Documents shall be reformed to replace such stricken provision or part thereof with a valid and enforceable provision that comes as close as possible to expressing the intention of the stricken provision.

10.05 *Contractor's Certifications*

A. Contractor certifies that it has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for or in executing the Contract. For the purposes of this Paragraph 10.05:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process or in the Contract execution;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process or the execution of the Contract to the detriment of Owner, (b) to establish Bid or Contract prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish Bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

10.06 *Indemnity*

A. The parties recognize that the CONTRACTOR is an independent contractor. The CONTRACTOR agrees to assume liability for and indemnify, hold harmless, and defend the VILLAGE, its council members, mayor, officers, employees, agents, and attorneys of, from, and against all liability and expense, including reasonable attorney's fees, in connection with any and all claims, demands, damages, actions, causes of action, and suits in equity of whatever kind or nature, including claims for personal injury, property damage, equitable relief, or loss of use, to the extent caused by the negligence, recklessness, or intentionally

wrongful conduct of the CONTRACTOR, its agents, officers, Contractors, subcontractors, employees, or anyone else utilized by the CONTRACTOR in the performance of this Contract. The CONTRACTOR's liability hereunder shall include all attorney's fees and costs incurred by the VILLAGE in the enforcement of this indemnification provision. This includes claims made by the employees of the CONTRACTOR against the VILLAGE and the CONTRACTOR hereby waives its entitlement, if any, to immunity under Section 440.11, Florida Statutes. The obligations contained in this provision shall survive termination of this Contract and shall not be limited by the amount of any insurance required to be obtained or maintained under this Contract.

B. Subject to the limitations set forth in this Section, CONTRACTOR shall assume control of the defense of any claim asserted by a third party against the VILLAGE and, in connection with such defense, shall appoint lead counsel, in each case at the CONTRACTOR's expense. The VILLAGE shall have the right, at its option, to participate in the defense of any third party claim, without relieving CONTRACTOR of any of its obligations hereunder. If the CONTRACTOR assumes control of the defense of any third party claim in accordance with this paragraph, the CONTRACTOR shall obtain the prior written consent of the VILLAGE before entering into any settlement of such claim. Notwithstanding anything to the contrary in this Section, the CONTRACTOR shall not assume or maintain control of the defense of any third party claim, but shall pay the fees of counsel retained by the VILLAGE and all expenses, including experts' fees, if (i) an adverse determination with respect to the third party claim would, in the good faith judgment of the VILLAGE, be detrimental in any material respect to the VILLAGE's reputation; (ii) the third party claim seeks an injunction or equitable relief against the VILLAGE; or (iii) the CONTRACTOR has failed or is failing to prosecute or defend vigorously the third party claim. Each party shall cooperate, and cause its agents to cooperate, in the defense or prosecution of any third party claim and shall furnish or cause to be furnished such records and information, and attend such conferences, discovery proceedings, hearings, trials, or appeals, as may be reasonably requested in connection therewith.

C. It is the specific intent of the parties hereto that the foregoing indemnification complies with Section 725.06, Florida Statutes, as amended. CONTRACTOR expressly agrees that it will not claim, and waives any claim, that this indemnification violates Section 725.06, Florida Statues. Nothing contained in the foregoing indemnification shall be construed as a waiver of any immunity or limitation of liability the VILLAGE may have under the doctrine of sovereign immunity or Section 768.28, Florida Statutes.

10.07 *Governing Law and Remedies*

A. The validity of this Agreement and of any of its terms or provisions, as well as the rights and duties of the parties hereunder, shall be governed by the laws of the State of Florida and venue for any and all disputes related to or arising from this Agreement shall be in Palm Beach County, Florida.

B. No remedy herein conferred upon any party is intended to be exclusive of any other remedy, and each and every such remedy shall be cumulative and shall be in addition to every other remedy given hereunder or now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder shall preclude any other or further exercise thereof.

10.08 *Office of the Inspector General*

A. Palm Beach County has established the Office of the Inspector General, which is authorized and empowered to review past, present, and proposed County programs, contracts,

transactions, accounts and records. The Inspector General (IG) has the power to subpoena witnesses, administer oaths, require the production of records, and monitor existing projects and programs. The Inspector General may, on a random basis, perform audits on all Village contracts.

10.09 *Public Records*

A. The CONTRACTOR shall comply with Florida's Public Records Laws, Chapter 119, Florida Statutes, and, if it is acting on behalf of the VILLAGE as provided under section 119.011(2), the CONTRACTOR specifically agrees to:

1. Keep and maintain public records required by the VILLAGE to perform the services under this Agreement.

2. Upon request from the VILLAGE's custodian of public records, provide the VILLAGE with a copy of the requested records or allow the records to be inspected or copied within a reasonable tie at a cost that does not exceed the cost provided in this Chapter 119, Florida Statutes, or as otherwise provided by law.

3. Ensure that said public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Agreement term and following completion of the Agreement, if the CONTRACTOR does not transfer the records to the VILLAGE.

4. Upon the completion of the Agreement, transfer, at no cost, to the VILLAGE all public records in possession of the CONTRACTOR or keep and maintain public records required by the VILLAGE to perform the services. If the CONTRACTOR transfers all public records to the VILLAGE upon completion of the Agreement, the CONTRACTOR shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the CONTRACTOR keeps and maintains public records upon completion of the Agreement, the CONTRACTOR shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the VILLAGE, upon request from the VILLAGE's custodian of public records, in a format that is compatible with the information technology systems of the Village.

10.10 *Insurance*

A. The limits of liability for insurance required by Paragraph 6.03 of the General Conditions shall provide coverage for not less that the following amounts or greater where required by Law and Regulations:

1. Workers' Compensation, and related coverages under Paragraphs 6.03.A.1 and A.2 of the General Conditions:

a.	State	Statutory
b.	Applicable Federal	Statutory
c.	Employer Liability:	
	Bodily injury, each accident	$1,000,000
	Bodily injury by disease, each employee	$500,000
	Bodily injury/disease aggregate	$1,000,000
	Foreign voluntary worker compensation	Statutory

2. Contractor's Commercial General Liability under Paragraphs 6.03.B and 6.03.C of the General Conditions:

a.	General Aggregate	$2,000,000
b.	Products – Completed Operations Aggregate	$2,000,000
c.	Personal and Advertising Injury	$1,000,000
d.	Each Occurrence (Bodily Injury and Property Damage)	$1,000,000

3. Automobile Liability under paragraph 6.03.D of the General Conditions:

a.	Bodily Injury:	
	Each Person	$500,000
	Each Accident	$1,000,000
b.	Property Damage:	
	Each Incident	$1,000,000

4. Umbrella of Excess Liability under paragraph 6.03.E of the General Conditions:

a.	Excess or Umbrella Liability		
	1)	General Aggregate	$5,000,000
	2)	Each Occurrence	$1,000,000

5. Contractor's Pollution Liability under paragraph 6.03.F of the General Conditions:

a.	Contractor's Pollution Liability		
	1)	General Aggregate	$2,000,000
	2)	Each Occurrence	$1,000,000

6. Additional Insureds include the respective officers, partners, directors, employees, agents, consultants, and subconsultants of the following firms and municipal government(s):

   a. Village of Palm Springs

10.11 *Audit By Village*

A. The CONTRACTOR shall permit the VILLAGE, or any authorized representatives of the VILLAGE, at all reasonable times, access to and the right to examine all records, books, papers or documents related to the CONTRACTOR's performance under this Agreement including, but not limited to, expenses for sub-contractors, agents or assistants, direct and indirect charges for work performed and detailed documentation for all such work performed or to be performed under this Agreement.

10.12 *Copies of Data/Documents*

A. Copies or original documents prepared by the CONTRACTOR in relation to work associated with this Agreement shall be provided to the VILLAGE. Data collected, stored, and/or provided shall be in a form acceptable to the VILLAGE and agreed upon by the VILLAGE.

10.13 *Ownership*

A. Each and every report, draft, work product, map, record, and other document reproduced, prepared, or caused to be prepared by the CONTRACTOR pursuant to or in connection with this Agreement shall be the exclusive property of the VILLAGE.

10.14 *Limitations of Liability*

A. Under no circumstances shall either party be liable to the other for any consequential, incidental, special, punitive, or any other form of indirect or non-compensatory damages.

10.15 *Enforcement Costs*

A. All parties shall be responsible for their own attorneys' fees, court costs and expenses if any legal action or other proceeding is brought for any dispute, disagreement, or issue of construction or interpretation arising hereunder whether relating to the Agreement's execution, validity, the obligations provided therein, or performance of this Agreement, or because of an alleged breach, default or misrepresentation in connection with any provisions of this Agreement.

10.16 *Copyrights and/or Patent Rights*

A. CONTRACTOR warrants that there has been no violation of copyrights and/or patent rights in the manufacturing, producing or selling of the goods, shipped or ordered, as a result of this Agreement and the CONTRACTOR agrees to hold the Village harmless from any and all liability, loss, or expense occasioned by any such violation.

10.17 *Protection of Property*

A. The CONTRACTOR shall at all times guard against damage or loss to the property of the VILLAGE or of other vendors or contractors and shall be held responsible for replacing or repairing any such loss or damage. The VILLAGE may withhold payment or make such deductions as deemed necessary to insure reimbursement or replacement for loss or damage to property through negligence of the successful CONTRACTOR or its agents. The CONTRACTOR shall be responsible to safeguard all of their property such as tools and equipment while on site. The VILLAGE will not be held responsible for any loss of CONTRACTOR property due to theft or vandalism.

10.18 *Damage to Persons or Property*

A. The responsibility for all damage to person or property arising out of or on account of Scope of Work done under this Contract shall rest upon the CONTRACTOR.

10.19 *Discrimination*

A. The CONTRACTOR warrants and represents that all of its employees are treated equally during employment without regard to race, color, religion, disability, sex, age, national origin, ancestry, political affiliation, marital status, handicap, or sexual orientation. Further, CONTRACTOR shall not discriminate or permit discrimination against any employee or an applicant for employment on the basis of race, color, sex, religion, political affiliation, natural origin, ancestry, marital status, sexual orientation or handicap.

10.20 *Construction Defects*

A. PURSUANT TO SECTION 558.005, FLORIDA STATUTES, ANY CLAIMS FOR CONSTRUCTION DEFECTS ARE NOT SUBJECT TO THE NOTICE AND CURE PROVISIONS OF CHAPTER 558, FLORIDA STATUTES.

IN WITNESS WHEREOF, Owner and Contractor have signed this Agreement.

This Agreement will be effective on _____ (which is the Effective Date of the Contract).

Notes: (1) Provide supplemental execution by any additional parties, such as joint venturers. (2) Any singular reference to Contractor, Surety, Owner, or other party shall be considered plural where applicable.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner for the performance of the Construction Contract, which is incorporated herein by reference.

2. If the Contractor performs the Construction Contract, the Surety and the Contractor shall have no obligation under this Bond, except when applicable to participate in a conference as provided in Paragraph 3.

3. If there is no Owner Default under the Construction Contract, the Surety's obligation under this Bond shall arise after:

3.1 The Owner first provides notice to the Contractor and the Surety that the Owner is considering declaring a Contractor Default. Such notice shall indicate whether the Owner is requesting a conference among the Owner, Contractor, and Surety to discuss the Contractor's performance. If the Owner does not request a conference, the Surety may, within five (5) business days after receipt of the Owner's notice, request such a conference. If the Surety timely requests a conference, the Owner shall attend. Unless the Owner agrees otherwise, any conference requested under this Paragraph 3.1 shall be held within ten (10) business days of the Surety's receipt of the Owner's notice. If the Owner, the Contractor, and the Surety agree, the Contractor shall be allowed a reasonable time to perform the Construction Contract, but such an agreement shall not waive the Owner's right, if any, subsequently to declare a Contractor Default;

3.2 The Owner declares a Contractor Default, terminates the Construction Contract and notifies the Surety; and

3.3 The Owner has agreed to pay the Balance of the Contract Price in accordance with the terms of the Construction Contract to the Surety or to a contractor selected to perform the Construction Contract.

4. Failure on the part of the Owner to comply with the notice requirement in Paragraph 3.1 shall not constitute a failure to comply with a condition precedent to the Surety's obligations, or release the Surety from its obligations, except to the extent the Surety demonstrates actual prejudice.

5. When the Owner has satisfied the conditions of Paragraph 3, the Surety shall promptly and at the Surety's expense take one of the following actions:

5.1 Arrange for the Contractor, with the consent of the Owner, to perform and complete the Construction Contract;

5.2 Undertake to perform and complete the Construction Contract itself, through its agents or independent contractors;

5.3 Obtain bids or negotiated proposals from qualified contractors acceptable to the Owner for a contract for performance and completion of the Construction Contract, arrange for a contract to be prepared for execution by the Owner and a contractor selected with the Owners concurrence, to be secured with performance and payment bonds executed by a qualified surety equivalent to the bonds issued on the Construction Contract, and pay to the Owner the amount of damages as described in Paragraph 7 in excess of the Balance of the Contract Price incurred by the Owner as a result of the Contractor Default; or

5.4 Waive its right to perform and complete, arrange for completion, or obtain a new contractor, and with reasonable promptness under the circumstances:

5.4.1 After investigation, determine the amount for which it may be liable to the Owner and, as soon as practicable after the amount is determined, make payment to the Owner; or

5.4.2 Deny liability in whole or in part and notify the Owner, citing the reasons for denial.

6. If the Surety does not proceed as provided in Paragraph 5 with reasonable promptness, the Surety shall be deemed to be in default on this Bond seven days after receipt of an additional written notice from the Owner to the Surety demanding that the Surety perform its obligations under this Bond, and the Owner shall be entitled to enforce any remedy available to the Owner. If the Surety proceeds as provided in Paragraph 5.4, and the Owner refuses the payment or the Surety has denied liability, in whole or in part, without further notice the Owner shall be entitled to enforce any remedy available to the Owner.

7. If the Surety elects to act under Paragraph 5.1, 5.2, or 5.3, then the responsibilities of the Surety to the Owner shall not be greater than those of the Contractor under the Construction Contract, and the responsibilities of the Owner to the Surety shall not be greater than those of the Owner under the Construction Contract. Subject to the commitment by the Owner to pay the Balance of the Contract Price, the Surety is obligated, without duplication for:

7.1 the responsibilities of the Contractor for correction of defective work and completion of the Construction Contract;

7.2 additional legal, design professional, and delay costs resulting from the Contractor's Default, and resulting from the actions or failure to act of the Surety under Paragraph 5; and

7.3 liquidated damages, or if no liquidated damages are specified in the Construction Contract, actual damages caused by delayed performance or non-performance of the Contractor.

8. If the Surety elects to act under Paragraph 5.1, 5.3, or 5.4, the Surety's liability is limited to the amount of this Bond.

9. The Surety shall not be liable to the Owner or others for obligations of the Contractor that are unrelated to the Construction Contract, and the Balance of the Contract Price shall not be reduced or set off on account of any such unrelated obligations. No right of action shall accrue on this Bond to any person or entity other than the Owner or its heirs, executors, administrators, successors, and assigns.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

10. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

11. Any proceeding, legal or equitable, under this Bond may be instituted in any court of competent jurisdiction in the location in which the work or part of the work is located and shall be instituted within two years after a declaration of Contractor Default or within two years after the Contractor ceased working or within two years after the Surety refuses or fails to perform its obligations under this Bond, whichever occurs first. If the provisions of this paragraph are void or prohibited by law, the minimum periods of limitations available to sureties as a defense in the jurisdiction of the suit shall be applicable.

12. Notice to the Surety, the Owner, or the Contractor shall be mailed or delivered to the address shown on the page on which their signature appears.

13. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted here from and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

14. Definitions

14.1 Balance of the Contract Price: The total amount payable by the Owner to the Contractor under the Construction Contract after all proper adjustments have been made including allowance for the Contractor for any amounts received or to be received by the Owner in settlement of insurance or other claims for damages to which the Contractor is entitled, reduced by all valid and proper payments made to or on behalf of the Contractor under the Construction Contract.

14.2 Construction Contract: The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and changes made to the agreement and the Contract Documents.

14.3 Contractor Default: Failure of the Contractor, which has not been remedied or waived, to perform or otherwise to comply with a material term of the Construction Contract.

14.4 Owner Default: Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

14.5 Contract Documents: All the documents that comprise the agreement between the Owner and Contractor.

15. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

Notes: (1) Provide supplemental execution by any additional parties, such as joint venturers. (2) Any singular reference to Contractor, Surety, Owner, or other party shall be considered plural where applicable.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner to pay for labor, materials, and equipment furnished for use in the performance of the Construction Contract, which is incorporated herein by reference, subject to the following terms.

2. If the Contractor promptly makes payment of all sums due to Claimants, and defends, indemnifies, and holds harmless the Owner from claims, demands, liens, or suits by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, then the Surety and the Contractor shall have no obligation under this Bond.

3. If there is no Owner Default under the Construction Contract, the Surety's obligation to the Owner under this Bond shall arise after the Owner has promptly notified the Contractor and the Surety (at the address described in Paragraph 13) of claims, demands, liens, or suits against the Owner or the Owner's property by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, and tendered defense of such claims, demands, liens, or suits to the Contractor and the Surety.

4. When the Owner has satisfied the conditions in Paragraph 3, the Surety shall promptly and at the Surety's expense defend, indemnify, and hold harmless the Owner against a duly tendered claim, demand, lien, or suit.

5. The Surety's obligations to a Claimant under this Bond shall arise after the following:

    5.1 Claimants who do not have a direct contract with the Contractor,

        5.1.1 have furnished a written notice of non-payment to the Contractor, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were, or equipment was, furnished or supplied or for whom the labor was done or performed, within ninety (90) days after having last performed labor or last furnished materials or equipment included in the Claim; and

        5.1.2 have sent a Claim to the Surety (at the address described in Paragraph 13).

    5.2 Claimants who are employed by or have a direct contract with the Contractor have sent a Claim to the Surety (at the address described in Paragraph 13).

6. If a notice of non-payment required by Paragraph 5.1.1 is given by the Owner to the Contractor, that is sufficient to satisfy a Claimant's obligation to furnish a written notice of non-payment under Paragraph 5.1.1.

7. When a Claimant has satisfied the conditions of Paragraph 5.1 or 5.2, whichever is applicable, the Surety shall promptly and at the Surety's expense take the following actions:

    7.1 Send an answer to the Claimant, with a copy to the Owner, within sixty (60) days after receipt of the Claim, stating the amounts that are undisputed and the basis for challenging any amounts that are disputed; and

    7.2 Pay or arrange for payment of any undisputed amounts.

    7.3 The Surety's failure to discharge its obligations under Paragraph 7.1 or 7.2 shall not be deemed to constitute a waiver of defenses the Surety or Contractor may have or acquire as to a Claim, except as to undisputed amounts for which the Surety and Claimant have reached agreement. If, however, the Surety fails to discharge its obligations under Paragraph 7.1 or 7.2, the Surety shall indemnify the Claimant for the reasonable attorney's fees the Claimant incurs thereafter to recover any sums found to be due and owing to the Claimant.

8. The Surety's total obligation shall not exceed the amount of this Bond, plus the amount of reasonable attorney's fees provided under Paragraph 7.3, and the amount of this Bond shall be credited for any payments made in good faith by the Surety.

9. Amounts owed by the Owner to the Contractor under the Construction Contract shall be used for the performance of the Construction Contract and to satisfy claims, if any, under any construction performance bond. By the Contractor furnishing and the Owner accepting this Bond, they agree that all funds earned by the Contractor in the performance of the Construction Contract are dedicated to satisfy obligations of the Contractor and Surety under this Bond, subject to the Owner's priority to use the funds for the completion of the work.

10. The Surety shall not be liable to the Owner, Claimants, or others for obligations of the Contractor that are unrelated to the Construction Contract. The Owner shall not be liable for the payment of any costs or expenses of any Claimant under this Bond, and shall have under this Bond no obligation to make payments to or give notice on behalf of Claimants, or otherwise have any obligations to Claimants under this Bond.

11. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

12. No suit or action shall be commenced by a Claimant under this Bond other than in a court of competent jurisdiction in the state in which the project that is the subject of the Construction Contract is located or after the expiration of one year from the date (1) on which the Claimant sent a Claim to the Surety pursuant to Paragraph 5.1.2 or 5.2, or (2) on which the last labor or service was performed by anyone or the last materials or equipment were furnished by anyone under the Construction Contract, whichever of (1) or (2) first occurs. If the provisions of this paragraph are void or prohibited by law, the minimum period of limitation available to sureties as a defense in the jurisdiction of the suit shall be applicable.

13. Notice and Claims to the Surety, the Owner, or the Contractor shall be mailed or delivered to the address shown on the page on which their signature appears. Actual receipt of notice or Claims, however accomplished, shall be sufficient compliance as of the date received.

14. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

15. Upon requests by any person or entity appearing to be a potential beneficiary of this Bond, the Contractor and Owner shall promptly furnish a copy of this Bond or shall permit a copy to be made.

16. **Definitions**

16.1 **Claim:** A written statement by the Claimant including at a minimum:

1. The name of the Claimant;
2. The name of the person for whom the labor was done, or materials or equipment furnished;
3. A copy of the agreement or purchase order pursuant to which labor, materials, or equipment was furnished for use in the performance of the Construction Contract;
4. A brief description of the labor, materials, or equipment furnished;
5. The date on which the Claimant last performed labor or last furnished materials or equipment for use in the performance of the Construction Contract;
6. The total amount earned by the Claimant for labor, materials, or equipment furnished as of the date of the Claim;
7. The total amount of previous payments received by the Claimant; and
8. The total amount due and unpaid to the Claimant for labor, materials, or equipment furnished as of the date of the Claim.

16.2 **Claimant:** An individual or entity having a direct contract with the Contractor or with a subcontractor of the Contractor to furnish labor, materials, or equipment for use in the performance of the Construction Contract. The term Claimant also includes any individual or entity that has rightfully asserted a claim under an applicable mechanic's lien or similar statute against the real property upon which the Project is located. The intent of this Bond shall be to include without limitation in the terms of "labor, materials, or equipment" that part of the water, gas, power, light, heat, oil, gasoline, telephone service, or rental equipment used in the Construction Contract, architectural and engineering services required for performance of the work of the Contractor and the Contractor's subcontractors, and all other items for which a mechanic's lien may be asserted in the jurisdiction where the labor, materials, or equipment were furnished.

16.3 **Construction Contract:** The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and all changes made to the agreement and the Contract Documents.

16.4 **Owner Default**: Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

16.5 **Contract Documents:** All the documents that comprise the agreement between the Owner and Contractor.

17. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

18. Modifications to this Bond are as follows:

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

These General Conditions have been prepared for use with the Agreement Between Owner and Contractor for Construction Contract (EJCDC® C-520, Stipulated Sum, or C-525, Cost-Plus, 2013 Editions). Their provisions are interrelated and a change in one may necessitate a change in the other.

To prepare supplementary conditions that are coordinated with the General Conditions, use EJCDC's Guide to the Preparation of Supplementary Conditions (EJCDC® C-800, 2013 Edition). The full EJCDC Construction series of documents is discussed in the Commentary on the 2013 EJCDC Construction Documents (EJCDC® C-001, 2013 Edition).

ARTICLE 1 – DEFINITIONS AND TERMINOLOGY

1.01 *Defined Terms*

A. Wherever used in the Bidding Requirements or Contract Documents, a term printed with initial capital letters, including the term's singular and plural forms, will have the meaning indicated in the definitions below. In addition to terms specifically defined, terms with initial capital letters in the Contract Documents include references to identified articles and paragraphs, and the titles of other documents or forms.

1. *Addenda*—Written or graphic instruments issued prior to the opening of Bids which clarify, correct, or change the Bidding Requirements or the proposed Contract Documents.

2. *Agreement*—The written instrument, executed by Owner and Contractor, that sets forth the Contract Price and Contract Times, identifies the parties and the Engineer, and designates the specific items that are Contract Documents.

3. *Application for Payment*—The form acceptable to Engineer which is to be used by Contractor during the course of the Work in requesting progress or final payments and which is to be accompanied by such supporting documentation as is required by the Contract Documents.

4. *Bid*—The offer of a Bidder submitted on the prescribed form setting forth the prices for the Work to be performed.

5. *Bidder*—An individual or entity that submits a Bid to Owner.

6. *Bidding Documents*—The Bidding Requirements, the proposed Contract Documents, and all Addenda.

7. *Bidding Requirements*—The advertisement or invitation to bid, Instructions to Bidders, Bid Bond or other Bid security, if any, the Bid Form, and the Bid with any attachments.

8. *Change Order*—A document which is signed by Contractor and Owner and authorizes an addition, deletion, or revision in the Work or an adjustment in the Contract Price or the Contract Times, or other revision to the Contract, issued on or after the Effective Date of the Contract.

9. *Change Proposal*—A written request by Contractor, duly submitted in compliance with the procedural requirements set forth herein, seeking an adjustment in Contract Price or Contract Times, or both; contesting an initial decision by Engineer concerning the requirements of the Contract Documents or the acceptability of Work under the Contract Documents; challenging a set-off against payments due; or seeking other relief with respect to the terms of the Contract.

10. *Claim*—(a) A demand or assertion by Owner directly to Contractor, duly submitted in compliance with the procedural requirements set forth herein: seeking an adjustment of Contract Price or Contract Times, or both; contesting an initial decision by Engineer concerning the requirements of the Contract Documents or the acceptability of Work under the Contract Documents; contesting Engineer's decision regarding a Change Proposal; seeking resolution of a contractual issue that Engineer has declined to address; or seeking other relief with respect to the terms of the Contract; or (b) a demand or assertion by Contractor directly to Owner, duly submitted in compliance with the procedural requirements set forth herein, contesting Engineer's decision regarding a Change Proposal; or seeking resolution of a contractual issue that Engineer

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

has declined to address. A demand for money or services by a third party is not a Claim.

11. *Constituent of Concern*—Asbestos, petroleum, radioactive materials, polychlorinated biphenyls (PCBs), hazardous waste, and any substance, product, waste, or other material of any nature whatsoever that is or becomes listed, regulated, or addressed pursuant to (a) the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. §§9601 et seq. ("CERCLA"); (b) the Hazardous Materials Transportation Act, 49 U.S.C. §§5101 et seq.; (c) the Resource Conservation and Recovery Act, 42 U.S.C. §§6901 et seq. ("RCRA"); (d) the Toxic Substances Control Act, 15 U.S.C. §§2601 et seq.; (e) the Clean Water Act, 33 U.S.C. §§1251 et seq.; (f) the Clean Air Act, 42 U.S.C. §§7401 et seq.; or (g) any other federal, state, or local statute, law, rule, regulation, ordinance, resolution, code, order, or decree regulating, relating to, or imposing liability or standards of conduct concerning, any hazardous, toxic, or dangerous waste, substance, or material.

12. *Contract*—The entire and integrated written contract between the Owner and Contractor concerning the Work.

13. *Contract Documents*—Those items so designated in the Agreement, and which together comprise the Contract.

14. *Contract Price*—The money that Owner has agreed to pay Contractor for completion of the Work in accordance with the Contract Documents. .

15. *Contract Times*—The number of days or the dates by which Contractor shall: (a) achieve Milestones, if any; (b) achieve Substantial Completion; and (c) complete the Work.

16. *Contractor*—The individual or entity with which Owner has contracted for performance of the Work.

17. *Cost of the Work*—See Paragraph 13.01 for definition.

18. *Drawings*—The part of the Contract that graphically shows the scope, extent, and character of the Work to be performed by Contractor.

19. *Effective Date of the Contract*—The date, indicated in the Agreement, on which the Contract becomes effective.

20. *Engineer*—The individual or entity named as such in the Agreement.

21. *Field Order*—A written order issued by Engineer which requires minor changes in the Work but does not change the Contract Price or the Contract Times.

22. *Hazardous Environmental Condition*—The presence at the Site of Constituents of Concern in such quantities or circumstances that may present a danger to persons or property exposed thereto. The presence at the Site of materials that are necessary for the execution of the Work, or that are to be incorporated in the Work, and that are controlled and contained pursuant to industry practices, Laws and Regulations, and the requirements of the Contract, does not establish a Hazardous Environmental Condition.

23. *Laws and Regulations; Laws or Regulations*—Any and all applicable laws, statutes, rules, regulations, ordinances, codes, and orders of any and all governmental bodies, agencies, authorities, and courts having jurisdiction.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

24. *Liens*—Charges, security interests, or encumbrances upon Contract-related funds, real property, or personal property.

25. *Milestone*—A principal event in the performance of the Work that the Contract requires Contractor to achieve by an intermediate completion date or by a time prior to Substantial Completion of all the Work.

26. *Notice of Award*—The written notice by Owner to a Bidder of Owner's acceptance of the Bid.

27. *Notice to Proceed*—A written notice by Owner to Contractor fixing the date on which the Contract Times will commence to run and on which Contractor shall start to perform the Work.

28. *Owner*—The individual or entity with which Contractor has contracted regarding the Work, and which has agreed to pay Contractor for the performance of the Work, pursuant to the terms of the Contract.

29. *Progress Schedule*—A schedule, prepared and maintained by Contractor, describing the sequence and duration of the activities comprising the Contractor's plan to accomplish the Work within the Contract Times.

30. *Project*—The total undertaking to be accomplished for Owner by engineers, contractors, and others, including planning, study, design, construction, testing, commissioning, and start-up, and of which the Work to be performed under the Contract Documents is a part.

31. *Project Manual*—The written documents prepared for, or made available for, procuring and constructing the Work, including but not limited to the Bidding Documents or other construction procurement documents, geotechnical and existing conditions information, the Agreement, bond forms, General Conditions, Supplementary Conditions, and Specifications. The contents of the Project Manual may be bound in one or more volumes.

32. *Resident Project Representative*—The authorized representative of Engineer assigned to assist Engineer at the Site. As used herein, the term Resident Project Representative or "RPR" includes any assistants or field staff of Resident Project Representative.

33. *Samples*—Physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and that establish the standards by which such portion of the Work will be judged.

34. *Schedule of Submittals*—A schedule, prepared and maintained by Contractor, of required submittals and the time requirements for Engineer's review of the submittals and the performance of related construction activities.

35. *Schedule of Values*—A schedule, prepared and maintained by Contractor, allocating portions of the Contract Price to various portions of the Work and used as the basis for reviewing Contractor's Applications for Payment.

36. *Shop Drawings*—All drawings, diagrams, illustrations, schedules, and other data or information that are specifically prepared or assembled by or for Contractor and submitted by Contractor to illustrate some portion of the Work. Shop Drawings, whether approved or not, are not Drawings and are not Contract Documents.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

37. *Site*—Lands or areas indicated in the Contract Documents as being furnished by Owner upon which the Work is to be performed, including rights-of-way and easements, and such other lands furnished by Owner which are designated for the use of Contractor.

38. *Specifications*—The part of the Contract that consists of written requirements for materials, equipment, systems, standards, and workmanship as applied to the Work, and certain administrative requirements and procedural matters applicable to the Work.

39. *Subcontractor*—An individual or entity having a direct contract with Contractor or with any other Subcontractor for the performance of a part of the Work.

40. *Substantial Completion*—The time at which the Work (or a specified part thereof) has progressed to the point where, in the opinion of Engineer, the Work (or a specified part thereof) is sufficiently complete, in accordance with the Contract Documents, so that the Work (or a specified part thereof) can be utilized for the purposes for which it is intended. The terms "substantially complete" and "substantially completed" as applied to all or part of the Work refer to Substantial Completion thereof.

41. *Successful Bidder*—The Bidder whose Bid the Owner accepts, and to which the Owner makes an award of contract, subject to stated conditions.

42. *Supplementary Conditions*—The part of the Contract that amends or supplements these General Conditions.

43. *Supplier*—A manufacturer, fabricator, supplier, distributor, materialman, or vendor having a direct contract with Contractor or with any Subcontractor to furnish materials or equipment to be incorporated in the Work by Contractor or a Subcontractor.

44. *Technical Data*—Those items expressly identified as Technical Data in the Supplementary Conditions, with respect to either (a) subsurface conditions at the Site, or physical conditions relating to existing surface or subsurface structures at the Site (except Underground Facilities) or (b) Hazardous Environmental Conditions at the Site. If no such express identifications of Technical Data have been made with respect to conditions at the Site, then the data contained in boring logs, recorded measurements of subsurface water levels, laboratory test results, and other factual, objective information regarding conditions at the Site that are set forth in any geotechnical or environmental report prepared for the Project and made available to Contractor are hereby defined as Technical Data with respect to conditions at the Site under Paragraphs 5.03, 5.04, and 5.06.

45. *Underground Facilities*—All underground pipelines, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any encasements containing such facilities, including but not limited to those that convey electricity, gases, steam, liquid petroleum products, telephone or other communications, fiber optic transmissions, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.

46. *Unit Price Work*—Work to be paid for on the basis of unit prices.

47. *Work*—The entire construction or the various separately identifiable parts thereof required to be provided under the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce such construction; furnishing, installing, and incorporating all materials and equipment into such construction; and may include related services such as testing, start-up, and commissioning, all as required by the Contract Documents.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

48. *Work Change Directive*—A written directive to Contractor issued on or after the Effective Date of the Contract, signed by Owner and recommended by Engineer, ordering an addition, deletion, or revision in the Work.

1.02 *Terminology*

A. The words and terms discussed in the following paragraphs are not defined but, when used in the Bidding Requirements or Contract Documents, have the indicated meaning.

B. *Intent of Certain Terms or Adjectives*:

1. The Contract Documents include the terms "as allowed," "as approved," "as ordered," "as directed" or terms of like effect or import to authorize an exercise of professional judgment by Engineer. In addition, the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect or import are used to describe an action or determination of Engineer as to the Work. It is intended that such exercise of professional judgment, action, or determination will be solely to evaluate, in general, the Work for compliance with the information in the Contract Documents and with the design concept of the Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term or adjective is not intended to and shall not be effective to assign to Engineer any duty or authority to supervise or direct the performance of the Work, or any duty or authority to undertake responsibility contrary to the provisions of Article 10 or any other provision of the Contract Documents.

C. *Day*:

1. The word "day" means a calendar day of 24 hours measured from midnight to the next midnight.

D. *Defective*:

1. The word "defective," when modifying the word "Work," refers to Work that is unsatisfactory, faulty, or deficient in that it:

a. does not conform to the Contract Documents; or

b. does not meet the requirements of any applicable inspection, reference standard, test, or approval referred to in the Contract Documents; or

c. has been damaged prior to Engineer's recommendation of final payment (unless responsibility for the protection thereof has been assumed by Owner at Substantial Completion in accordance with Paragraph 15.03 or 15.04).

E. *Furnish, Install, Perform, Provide*:

1. The word "furnish," when used in connection with services, materials, or equipment, shall mean to supply and deliver said services, materials, or equipment to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

2. The word "install," when used in connection with services, materials, or equipment, shall mean to put into use or place in final position said services, materials, or equipment complete and ready for intended use.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. The words “perform” or “provide,” when used in connection with services, materials, or equipment, shall mean to furnish and install said services, materials, or equipment complete and ready for intended use.

4. If the Contract Documents establish an obligation of Contractor with respect to specific services, materials, or equipment, but do not expressly use any of the four words “furnish,” “install,” “perform,” or “provide,” then Contractor shall furnish and install said services, materials, or equipment complete and ready for intended use.

F. Unless stated otherwise in the Contract Documents, words or phrases that have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2 – PRELIMINARY MATTERS

2.01 *Delivery of Bonds and Evidence of Insurance*

A. *Bonds*: When Contractor delivers the executed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner such bonds as Contractor may be required to furnish.

B. *Evidence of Contractor’s Insurance*: When Contractor delivers the executed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner, with copies to each named insured and additional insured (as identified in the Supplementary Conditions or elsewhere in the Contract), the certificates and other evidence of insurance required to be provided by Contractor in accordance with Article 6.

C. *Evidence of Owner’s Insurance*: After receipt of the executed counterparts of the Agreement and all required bonds and insurance documentation, Owner shall promptly deliver to Contractor, with copies to each named insured and additional insured (as identified in the Supplementary Conditions or otherwise), the certificates and other evidence of insurance required to be provided by Owner under Article 6.

2.02 *Copies of Documents*

A. Owner shall furnish to Contractor four printed copies of the Contract (including one fully executed counterpart of the Agreement), and one copy in electronic portable document format (PDF). Additional printed copies will be furnished upon request at the cost of reproduction.

B. Owner shall maintain and safeguard at least one original printed record version of the Contract, including Drawings and Specifications signed and sealed by Engineer and other design professionals. Owner shall make such original printed record version of the Contract available to Contractor for review. Owner may delegate the responsibilities under this provision to Engineer.

2.03 *Before Starting Construction*

A. *Preliminary Schedules*: Within 10 days after the Effective Date of the Contract (or as otherwise specifically required by the Contract Documents), Contractor shall submit to Engineer for timely review:

1. a preliminary Progress Schedule indicating the times (numbers of days or dates) for starting and completing the various stages of the Work, including any Milestones specified in the Contract;

2. a preliminary Schedule of Submittals; and

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. a preliminary Schedule of Values for all of the Work which includes quantities and prices of items which when added together equal the Contract Price and subdivides the Work into component parts in sufficient detail to serve as the basis for progress payments during performance of the Work. Such prices will include an appropriate amount of overhead and profit applicable to each item of Work.

2.04 *Preconstruction Conference; Designation of Authorized Representatives*

A. Before any Work at the Site is started, a conference attended by Owner, Contractor, Engineer, and others as appropriate will be held to establish a working understanding among the parties as to the Work and to discuss the schedules referred to in Paragraph 2.03.A, procedures for handling Shop Drawings, Samples, and other submittals, processing Applications for Payment, electronic or digital transmittals, and maintaining required records.

B. At this conference Owner and Contractor each shall designate, in writing, a specific individual to act as its authorized representative with respect to the services and responsibilities under the Contract. Such individuals shall have the authority to transmit and receive information, render decisions relative to the Contract, and otherwise act on behalf of each respective party.

2.05 *Initial Acceptance of Schedules*

A. At least 10 days before submission of the first Application for Payment a conference, attended by Contractor, Engineer, and others as appropriate, will be held to review for acceptability to Engineer as provided below the schedules submitted in accordance with Paragraph 2.03.A. Contractor shall have an additional 10 days to make corrections and adjustments and to complete and resubmit the schedules. No progress payment shall be made to Contractor until acceptable schedules are submitted to Engineer.

1. The Progress Schedule will be acceptable to Engineer if it provides an orderly progression of the Work to completion within the Contract Times. Such acceptance will not impose on Engineer responsibility for the Progress Schedule, for sequencing, scheduling, or progress of the Work, nor interfere with or relieve Contractor from Contractor's full responsibility therefor.

2. Contractor's Schedule of Submittals will be acceptable to Engineer if it provides a workable arrangement for reviewing and processing the required submittals.

3. Contractor's Schedule of Values will be acceptable to Engineer as to form and substance if it provides a reasonable allocation of the Contract Price to the component parts of the Work.

2.06 *Electronic Transmittals*

A. Except as otherwise stated elsewhere in the Contract, the Owner, Engineer, and Contractor may transmit, and shall accept, Project-related correspondence, text, data, documents, drawings, information, and graphics, including but not limited to Shop Drawings and other submittals, in electronic media or digital format, either directly, or through access to a secure Project website.

B. If the Contract does not establish protocols for electronic or digital transmittals, then Owner, Engineer, and Contractor shall jointly develop such protocols.

C. When transmitting items in electronic media or digital format, the transmitting party makes no representations as to long term compatibility, usability, or readability of the items resulting from the recipient's use of software application packages, operating systems, or

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

computer hardware differing from those used in the drafting or transmittal of the items, or from those established in applicable transmittal protocols.

ARTICLE 3 – DOCUMENTS: INTENT, REQUIREMENTS, REUSE

3.01 *Intent*

A. The Contract Documents are complementary; what is required by one is as binding as if required by all.

B. It is the intent of the Contract Documents to describe a functionally complete project (or part thereof) to be constructed in accordance with the Contract Documents.

C. Unless otherwise stated in the Contract Documents, if there is a discrepancy between the electronic or digital versions of the Contract Documents (including any printed copies derived from such electronic or digital versions) and the printed record version, the printed record version shall govern.

D. The Contract supersedes prior negotiations, representations, and agreements, whether written or oral.

E. Engineer will issue clarifications and interpretations of the Contract Documents as provided herein.

3.02 *Reference Standards*

A. Standards Specifications, Codes, Laws and Regulations

1. Reference in the Contract Documents to standard specifications, manuals, reference standards, or codes of any technical society, organization, or association, or to Laws or Regulations, whether such reference be specific or by implication, shall mean the standard specification, manual, reference standard, code, or Laws or Regulations in effect at the time of opening of Bids (or on the Effective Date of the Contract if there were no Bids), except as may be otherwise specifically stated in the Contract Documents.

2. No provision of any such standard specification, manual, reference standard, or code, or any instruction of a Supplier, shall be effective to change the duties or responsibilities of Owner, Contractor, or Engineer, or any of their subcontractors, consultants, agents, or employees, from those set forth in the part of the Contract Documents prepared by or for Engineer. No such provision or instruction shall be effective to assign to Owner, Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility inconsistent with the provisions of the part of the Contract Documents prepared by or for Engineer.

3.03 *Reporting and Resolving Discrepancies*

A. *Reporting Discrepancies*:

1. *Contractor's Verification of Figures and Field Measurements*: Before undertaking each part of the Work, Contractor shall carefully study the Contract Documents, and check and verify pertinent figures and dimensions therein, particularly with respect to applicable field measurements. Contractor shall promptly report in writing to Engineer any conflict, error, ambiguity, or discrepancy that Contractor discovers, or has actual knowledge of, and shall not proceed with any Work affected thereby until the conflict,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

error, ambiguity, or discrepancy is resolved, by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract Documents issued pursuant to Paragraph 11.01.

2. *Contractor's Review of Contract Documents*: If, before or during the performance of the Work, Contractor discovers any conflict, error, ambiguity, or discrepancy within the Contract Documents, or between the Contract Documents and (a) any applicable Law or Regulation, (b) actual field conditions, (c) any standard specification, manual, reference standard, or code, or (d) any instruction of any Supplier, then Contractor shall promptly report it to Engineer in writing. Contractor shall not proceed with the Work affected thereby (except in an emergency as required by Paragraph 7.15) until the conflict, error, ambiguity, or discrepancy is resolved, by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract Documents issued pursuant to Paragraph 11.01.

3. Contractor shall not be liable to Owner or Engineer for failure to report any conflict, error, ambiguity, or discrepancy in the Contract Documents unless Contractor had actual knowledge thereof.

B. *Resolving Discrepancies*:

1. Except as may be otherwise specifically stated in the Contract Documents, the provisions of the part of the Contract Documents prepared by or for Engineer shall take precedence in resolving any conflict, error, ambiguity, or discrepancy between such provisions of the Contract Documents and:

a. the provisions of any standard specification, manual, reference standard, or code, or the instruction of any Supplier (whether or not specifically incorporated by reference as a Contract Document); or

b. the provisions of any Laws or Regulations applicable to the performance of the Work (unless such an interpretation of the provisions of the Contract Documents would result in violation of such Law or Regulation).

3.04 *Requirements of the Contract Documents*

A. During the performance of the Work and until final payment, Contractor and Owner shall submit to the Engineer all matters in question concerning the requirements of the Contract Documents (sometimes referred to as requests for information or interpretation—RFIs), or relating to the acceptability of the Work under the Contract Documents, as soon as possible after such matters arise. Engineer will be the initial interpreter of the requirements of the Contract Documents, and judge of the acceptability of the Work thereunder.

B. Engineer will, with reasonable promptness, render a written clarification, interpretation, or decision on the issue submitted, or initiate an amendment or supplement to the Contract Documents. Engineer's written clarification, interpretation, or decision will be final and binding on Contractor, unless it appeals by submitting a Change Proposal, and on Owner, unless it appeals by filing a Claim.

C. If a submitted matter in question concerns terms and conditions of the Contract Documents that do not involve (1) the performance or acceptability of the Work under the Contract Documents, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, then Engineer will promptly give written notice to Owner and Contractor that Engineer is unable to provide a decision or interpretation. If Owner and Contractor are unable to agree on resolution of such a matter in question, either party may pursue resolution as provided in Article 12.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3.05 *Reuse of Documents*

A. Contractor and its Subcontractors and Suppliers shall not:

1. have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Engineer or its consultants, including electronic media editions, or reuse any such Drawings, Specifications, other documents, or copies thereof on extensions of the Project or any other project without written consent of Owner and Engineer and specific written verification or adaptation by Engineer; or

2. have or acquire any title or ownership rights in any other Contract Documents, reuse any such Contract Documents for any purpose without Owner's express written consent, or violate any copyrights pertaining to such Contract Documents.

B. The prohibitions of this Paragraph 3.05 will survive final payment, or termination of the Contract. Nothing herein shall preclude Contractor from retaining copies of the Contract Documents for record purposes.

ARTICLE 4 – COMMENCEMENT AND PROGRESS OF THE WORK

4.01 *Commencement of Contract Times; Notice to Proceed*

A. The Contract Times will commence to run on the thirtieth day after the Effective Date of the Contract or, if a Notice to Proceed is given, on the day indicated in the Notice to Proceed. A Notice to Proceed may be given at any time within 30 days after the Effective Date of the Contract. In no event will the Contract Times commence to run later than the sixtieth day after the day of Bid opening or the thirtieth day after the Effective Date of the Contract, whichever date is earlier.

4.02 *Starting the Work*

A. Contractor shall start to perform the Work on the date when the Contract Times commence to run. No Work shall be done at the Site prior to such date.

4.03 *Reference Points*

A. Owner shall provide engineering surveys to establish reference points for construction which in Engineer's judgment are necessary to enable Contractor to proceed with the Work. Contractor shall be responsible for laying out the Work, shall protect and preserve the established reference points and property monuments, and shall make no changes or relocations without the prior written approval of Owner. Contractor shall report to Engineer whenever any reference point or property monument is lost or destroyed or requires relocation because of necessary changes in grades or locations, and shall be responsible for the accurate replacement or relocation of such reference points or property monuments by professionally qualified personnel.

4.04 *Progress Schedule*

A. Contractor shall adhere to the Progress Schedule established in accordance with Paragraph 2.05 as it may be adjusted from time to time as provided below.

1. Contractor shall submit to Engineer for acceptance (to the extent indicated in Paragraph 2.05) proposed adjustments in the Progress Schedule that will not result in changing the Contract Times.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. Proposed adjustments in the Progress Schedule that will change the Contract Times shall be submitted in accordance with the requirements of Article 11.

B. Contractor shall carry on the Work and adhere to the Progress Schedule during all disputes or disagreements with Owner. No Work shall be delayed or postponed pending resolution of any disputes or disagreements, or during any appeal process, except as permitted by Paragraph 16.04, or as Owner and Contractor may otherwise agree in writing.

4.05 *Delays in Contractor's Progress*

A. If Owner, Engineer, or anyone for whom Owner is responsible, delays, disrupts, or interferes with the performance or progress of the Work, then Contractor shall be entitled to an equitable adjustment in the Contract Times and Contract Price. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times.

B. Contractor shall not be entitled to an adjustment in Contract Price or Contract Times for delay, disruption, or interference caused by or within the control of Contractor. Delay, disruption, and interference attributable to and within the control of a Subcontractor or Supplier shall be deemed to be within the control of Contractor.

C. If Contractor's performance or progress is delayed, disrupted, or interfered with by unanticipated causes not the fault of and beyond the control of Owner, Contractor, and those for which they are responsible, then Contractor shall be entitled to an equitable adjustment in Contract Times. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times. Such an adjustment shall be Contractor's sole and exclusive remedy for the delays, disruption, and interference described in this paragraph. Causes of delay, disruption, or interference that may give rise to an adjustment in Contract Times under this paragraph include but are not limited to the following:

1. severe and unavoidable natural catastrophes such as fires, floods, epidemics, and earthquakes;

2. abnormal weather conditions;

3. acts or failures to act of utility owners (other than those performing other work at or adjacent to the Site by arrangement with the Owner, as contemplated in Article 8); and

4. acts of war or terrorism.

D. Delays, disruption, and interference to the performance or progress of the Work resulting from the existence of a differing subsurface or physical condition, an Underground Facility that was not shown or indicated by the Contract Documents, or not shown or indicated with reasonable accuracy, and those resulting from Hazardous Environmental Conditions, are governed by Article 5.

E. Paragraph 8.03 governs delays, disruption, and interference to the performance or progress of the Work resulting from the performance of certain other work at or adjacent to the Site.

F. Contractor shall not be entitled to an adjustment in Contract Price or Contract Times for any delay, disruption, or interference if such delay is concurrent with a delay, disruption, or interference caused by or within the control of Contractor.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

G. Contractor must submit any Change Proposal seeking an adjustment in Contract Price or Contract Times under this paragraph within 30 days of the commencement of the delaying, disrupting, or interfering event.

ARTICLE 5 – AVAILABILITY OF LANDS; SUBSURFACE AND PHYSICAL CONDITIONS; HAZARDOUS ENVIRONMENTAL CONDITIONS

5.01 *Availability of Lands*

A. Owner shall furnish the Site. Owner shall notify Contractor of any encumbrances or restrictions not of general application but specifically related to use of the Site with which Contractor must comply in performing the Work.

B. Upon reasonable written request, Owner shall furnish Contractor with a current statement of record legal title and legal description of the lands upon which permanent improvements are to be made and Owner's interest therein as necessary for giving notice of or filing a mechanic's or construction lien against such lands in accordance with applicable Laws and Regulations.

C. Contractor shall provide for all additional lands and access thereto that may be required for temporary construction facilities or storage of materials and equipment.

5.02 *Use of Site and Other Areas*

A. *Limitation on Use of Site and Other Areas*:

1. Contractor shall confine construction equipment, temporary construction facilities, the storage of materials and equipment, and the operations of workers to the Site, adjacent areas that Contractor has arranged to use through construction easements or otherwise, and other adjacent areas permitted by Laws and Regulations, and shall not unreasonably encumber the Site and such other adjacent areas with construction equipment or other materials or equipment. Contractor shall assume full responsibility for (a) damage to the Site; (b) damage to any such other adjacent areas used for Contractor's operations; (c) damage to any other adjacent land or areas; and (d) for injuries and losses sustained by the owners or occupants of any such land or areas; provided that such damage or injuries result from the performance of the Work or from other actions or conduct of the Contractor or those for which Contractor is responsible.

2. If a damage or injury claim is made by the owner or occupant of any such land or area because of the performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible, Contractor shall (a) take immediate corrective or remedial action as required by Paragraph 7.12, or otherwise; (b) promptly attempt to settle the claim as to all parties through negotiations with such owner or occupant, or otherwise resolve the claim by arbitration or other dispute resolution proceeding, or at law; and (c) to the fullest extent permitted by Laws and Regulations, indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against any such claim, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any claim or action, legal or equitable, brought by any such owner or occupant against Owner, Engineer, or any other party indemnified hereunder to the extent caused directly or indirectly, in whole or in part

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

by, or based upon, Contractor's performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible.

B. *Removal of Debris During Performance of the Work*: During the progress of the Work the Contractor shall keep the Site and other adjacent areas free from accumulations of waste materials, rubbish, and other debris. Removal and disposal of such waste materials, rubbish, and other debris shall conform to applicable Laws and Regulations.

C. *Cleaning*: Prior to Substantial Completion of the Work Contractor shall clean the Site and the Work and make it ready for utilization by Owner. At the completion of the Work Contractor shall remove from the Site and adjacent areas all tools, appliances, construction equipment and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

D. *Loading of Structures*: Contractor shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall Contractor subject any part of the Work or adjacent structures or land to stresses or pressures that will endanger them.

5.03 *Subsurface and Physical Conditions*

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. those reports known to Owner of explorations and tests of subsurface conditions at or adjacent to the Site;

2. those drawings known to Owner of physical conditions relating to existing surface or subsurface structures at the Site (except Underground Facilities); and

3. Technical Data contained in such reports and drawings.

B. *Reliance by Contractor on Technical Data Authorized*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely upon the accuracy of the Technical Data (as defined in Article 1) contained in any geotechnical or environmental report prepared for the Project and made available to Contractor. Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto; or

2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or

3. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions, or information.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.04 *Differing Subsurface or Physical Conditions*

A. *Notice by Contractor*: If Contractor believes that any subsurface or physical condition that is uncovered or revealed at the Site either:

1. is of such a nature as to establish that any Technical Data on which Contractor is entitled to rely as provided in Paragraph 5.03 is materially inaccurate; or

2. is of such a nature as to require a change in the Drawings or Specifications; or

3. differs materially from that shown or indicated in the Contract Documents; or

4. is of an unusual nature, and differs materially from conditions ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents;

then Contractor shall, promptly after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), notify Owner and Engineer in writing about such condition. Contractor shall not further disturb such condition or perform any Work in connection therewith (except with respect to an emergency) until receipt of a written statement permitting Contractor to do so.

B. *Engineer's Review*: After receipt of written notice as required by the preceding paragraph, Engineer will promptly review the subsurface or physical condition in question; determine the necessity of Owner's obtaining additional exploration or tests with respect to the condition; conclude whether the condition falls within any one or more of the differing site condition categories in Paragraph 5.04.A above; obtain any pertinent cost or schedule information from Contractor; prepare recommendations to Owner regarding the Contractor's resumption of Work in connection with the subsurface or physical condition in question and the need for any change in the Drawings or Specifications; and advise Owner in writing of Engineer's findings, conclusions, and recommendations.

C. *Owner's Statement to Contractor Regarding Site Condition*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the subsurface or physical condition in question, addressing the resumption of Work in connection with such condition, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations, in whole or in part.

D. *Possible Price and Times Adjustments*:

1. Contractor shall be entitled to an equitable adjustment in Contract Price or Contract Times, or both, to the extent that the existence of a differing subsurface or physical condition, or any related delay, disruption, or interference, causes an increase or decrease in Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

a. such condition must fall within any one or more of the categories described in Paragraph 5.04.A;

b. with respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03; and,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

c. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times.

2. Contractor shall not be entitled to any adjustment in the Contract Price or Contract Times with respect to a subsurface or physical condition if:

a. Contractor knew of the existence of such condition at the time Contractor made a commitment to Owner with respect to Contract Price and Contract Times by the submission of a Bid or becoming bound under a negotiated contract, or otherwise; or

b. the existence of such condition reasonably could have been discovered or revealed as a result of any examination, investigation, exploration, test, or study of the Site and contiguous areas expressly required by the Bidding Requirements or Contract Documents to be conducted by or for Contractor prior to Contractor's making such commitment; or

c. Contractor failed to give the written notice as required by Paragraph 5.04.A.

3. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, or both, then any such adjustment shall be set forth in a Change Order.

4. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, or both, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the subsurface or physical condition in question.

5.05 *Underground Facilities*

A. *Contractor's Responsibilities*: The information and data shown or indicated in the Contract Documents with respect to existing Underground Facilities at or adjacent to the Site is based on information and data furnished to Owner or Engineer by the owners of such Underground Facilities, including Owner, or by others. Unless it is otherwise expressly provided in the Supplementary Conditions:

1. Owner and Engineer do not warrant or guarantee the accuracy or completeness of any such information or data provided by others; and

2. the cost of all of the following will be included in the Contract Price, and Contractor shall have full responsibility for:

a. reviewing and checking all information and data regarding existing Underground Facilities at the Site;

b. locating all Underground Facilities shown or indicated in the Contract Documents as being at the Site;

c. coordination of the Work with the owners (including Owner) of such Underground Facilities, during construction; and

d. the safety and protection of all existing Underground Facilities at the Site, and repairing any damage thereto resulting from the Work.

B. *Notice by Contractor*: If Contractor believes that an Underground Facility that is uncovered or revealed at the Site was not shown or indicated in the Contract Documents, or was not shown or indicated with reasonable accuracy, then Contractor shall, promptly after

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

becoming aware thereof and before further disturbing conditions affected thereby or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), identify the owner of such Underground Facility and give written notice to that owner and to Owner and Engineer.

C. *Engineer's Review*: Engineer will promptly review the Underground Facility and conclude whether such Underground Facility was not shown or indicated in the Contract Documents, or was not shown or indicated with reasonable accuracy; obtain any pertinent cost or schedule information from Contractor; prepare recommendations to Owner regarding the Contractor's resumption of Work in connection with the Underground Facility in question; determine the extent, if any, to which a change is required in the Drawings or Specifications to reflect and document the consequences of the existence or location of the Underground Facility; and advise Owner in writing of Engineer's findings, conclusions, and recommendations. During such time, Contractor shall be responsible for the safety and protection of such Underground Facility.

D. *Owner's Statement to Contractor Regarding Underground Facility*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the Underground Facility in question, addressing the resumption of Work in connection with such Underground Facility, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations in whole or in part.

E. *Possible Price and Times Adjustments*:

1. Contractor shall be entitled to an equitable adjustment in the Contract Price or Contract Times, or both, to the extent that any existing Underground Facility at the Site that was not shown or indicated in the Contract Documents, or was not shown or indicated with reasonable accuracy, or any related delay, disruption, or interference, causes an increase or decrease in Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

    a. Contractor did not know of and could not reasonably have been expected to be aware of or to have anticipated the existence or actual location of the Underground Facility in question;

    b. With respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03;

    c. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times; and

    d. Contractor gave the notice required in Paragraph 5.05.B.

2. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, or both, then any such adjustment shall be set forth in a Change Order.

3. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, or both, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the Underground Facility in question.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.06 *Hazardous Environmental Conditions at Site*

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. those reports and drawings known to Owner relating to Hazardous Environmental Conditions that have been identified at or adjacent to the Site; and

2. Technical Data contained in such reports and drawings.

B. *Reliance by Contractor on Technical Data Authorized*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely on the accuracy of the Technical Data (as defined in Article 1) contained in any geotechnical or environmental report prepared for the Project and made available to Contractor. Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences and procedures of construction to be employed by Contractor and safety precautions and programs incident thereto; or

2. other data, interpretations, opinions and information contained in such reports or shown or indicated in such drawings; or

3. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions or information.

C. Contractor shall not be responsible for removing or remediating any Hazardous Environmental Condition encountered, uncovered, or revealed at the Site unless such removal or remediation is expressly identified in the Contract Documents to be within the scope of the Work.

D. Contractor shall be responsible for controlling, containing, and duly removing all Constituents of Concern brought to the Site by Contractor, Subcontractors, Suppliers, or anyone else for whom Contractor is responsible, and for any associated costs; and for the costs of removing and remediating any Hazardous Environmental Condition created by the presence of any such Constituents of Concern.

E. If Contractor encounters, uncovers, or reveals a Hazardous Environmental Condition whose removal or remediation is not expressly identified in the Contract Documents as being within the scope of the Work, or if Contractor or anyone for whom Contractor is responsible creates a Hazardous Environmental Condition, then Contractor shall immediately: (1) secure or otherwise isolate such condition; (2) stop all Work in connection with such condition and in any area affected thereby (except in an emergency as required by Paragraph 7.15); and (3) notify Owner and Engineer (and promptly thereafter confirm such notice in writing). Owner shall promptly consult with Engineer concerning the necessity for Owner to retain a qualified expert to evaluate such condition or take corrective action, if any. Promptly after consulting with Engineer, Owner shall take such actions as are necessary to permit Owner to timely obtain required permits and provide Contractor the written notice required by Paragraph 5.06.F. If Contractor or anyone for whom Contractor is responsible created the Hazardous Environmental Condition in question, then Owner may remove and remediate the Hazardous Environmental Condition, and impose a set-off against payments to account for the associated costs.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

F. Contractor shall not resume Work in connection with such Hazardous Environmental Condition or in any affected area until after Owner has obtained any required permits related thereto, and delivered written notice to Contractor either (1) specifying that such condition and any affected area is or has been rendered safe for the resumption of Work, or (2) specifying any special conditions under which such Work may be resumed safely.

G. If Owner and Contractor cannot agree as to entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times, or both, as a result of such Work stoppage or such special conditions under which Work is agreed to be resumed by Contractor, then within 30 days of Owner's written notice regarding the resumption of Work, Contractor may submit a Change Proposal, or Owner may impose a set-off.

H. If after receipt of such written notice Contractor does not agree to resume such Work based on a reasonable belief it is unsafe, or does not agree to resume such Work under such special conditions, then Owner may order the portion of the Work that is in the area affected by such condition to be deleted from the Work, following the contractual change procedures in Article 11. Owner may have such deleted portion of the Work performed by Owner's own forces or others in accordance with Article 8.

I. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition, provided that such Hazardous Environmental Condition (1) was not shown or indicated in the Drawings, Specifications, or other Contract Documents, identified as Technical Data entitled to limited reliance pursuant to Paragraph 5.06.B, or identified in the Contract Documents to be included within the scope of the Work, and (2) was not created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.I shall obligate Owner to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

J. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to the failure to control, contain, or remove a Constituent of Concern brought to the Site by Contractor or by anyone for whom Contractor is responsible, or to a Hazardous Environmental Condition created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.J shall obligate Contractor to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

K. The provisions of Paragraphs 5.03, 5.04, and 5.05 do not apply to the presence of Constituents of Concern or to a Hazardous Environmental Condition uncovered or revealed at the Site.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 6 – BONDS AND INSURANCE

6.01 *Performance, Payment, and Other Bonds*

A. Contractor shall furnish a performance bond and a payment bond, each in an amount at least equal to the Contract Price, as security for the faithful performance and payment of all of Contractor's obligations under the Contract. These bonds shall remain in effect until one year after the date when final payment becomes due or until completion of the correction period specified in Paragraph 15.08, whichever is later, except as provided otherwise by Laws or Regulations, the Supplementary Conditions, or other specific provisions of the Contract. Contractor shall also furnish such other bonds as are required by the Supplementary Conditions or other specific provisions of the Contract.

B. All bonds shall be in the form prescribed by the Contract except as provided otherwise by Laws or Regulations, and shall be executed by such sureties as are named in "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Circular 570 (as amended and supplemented) by the Financial Management Service, Surety Bond Branch, U.S. Department of the Treasury. A bond signed by an agent or attorney-in-fact must be accompanied by a certified copy of that individual's authority to bind the surety. The evidence of authority shall show that it is effective on the date the agent or attorney-in-fact signed the accompanying bond.

C. Contractor shall obtain the required bonds from surety companies that are duly licensed or authorized in the jurisdiction in which the Project is located to issue bonds in the required amounts.

D. If the surety on a bond furnished by Contractor is declared bankrupt or becomes insolvent, or its right to do business is terminated in any state or jurisdiction where any part of the Project is located, or the surety ceases to meet the requirements above, then Contractor shall promptly notify Owner and Engineer and shall, within 20 days after the event giving rise to such notification, provide another bond and surety, both of which shall comply with the bond and surety requirements above.

E. If Contractor has failed to obtain a required bond, Owner may exclude the Contractor from the Site and exercise Owner's termination rights under Article 16.

F. Upon request, Owner shall provide a copy of the payment bond to any Subcontractor, Supplier, or other person or entity claiming to have furnished labor or materials used in the performance of the Work.

6.02 *Insurance—General Provisions*

A. Owner and Contractor shall obtain and maintain insurance as required in this Article and in the Supplementary Conditions.

B. All insurance required by the Contract to be purchased and maintained by Owner or Contractor shall be obtained from insurance companies that are duly licensed or authorized, in the state or jurisdiction in which the Project is located, to issue insurance policies for the required limits and coverages. Unless a different standard is indicated in the Supplementary Conditions, all companies that provide insurance policies required under this Contract shall have an A.M. Best rating of A-VII or better.

C. Contractor shall deliver to Owner, with copies to each named insured and additional insured (as identified in this Article, in the Supplementary Conditions, or elsewhere in the Contract), certificates of insurance establishing that Contractor has obtained and is

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

maintaining the policies, coverages, and endorsements required by the Contract. Upon request by Owner or any other insured, Contractor shall also furnish other evidence of such required insurance, including but not limited to copies of policies and endorsements, and documentation of applicable self-insured retentions and deductibles. Contractor may block out (redact) any confidential premium or pricing information contained in any policy or endorsement furnished under this provision.

D. Owner shall deliver to Contractor, with copies to each named insured and additional insured (as identified in this Article, the Supplementary Conditions, or elsewhere in the Contract), certificates of insurance establishing that Owner has obtained and is maintaining the policies, coverages, and endorsements required of Owner by the Contract (if any). Upon request by Contractor or any other insured, Owner shall also provide other evidence of such required insurance (if any), including but not limited to copies of policies and endorsements, and documentation of applicable self-insured retentions and deductibles. Owner may block out (redact) any confidential premium or pricing information contained in any policy or endorsement furnished under this provision.

E. Failure of Owner or Contractor to demand such certificates or other evidence of the other party's full compliance with these insurance requirements, or failure of Owner or Contractor to identify a deficiency in compliance from the evidence provided, shall not be construed as a waiver of the other party's obligation to obtain and maintain such insurance.

F. If either party does not purchase or maintain all of the insurance required of such party by the Contract, such party shall notify the other party in writing of such failure to purchase prior to the start of the Work, or of such failure to maintain prior to any change in the required coverage.

G. If Contractor has failed to obtain and maintain required insurance, Owner may exclude the Contractor from the Site, impose an appropriate set-off against payment, and exercise Owner's termination rights under Article 16.

H. Without prejudice to any other right or remedy, if a party has failed to obtain required insurance, the other party may elect to obtain equivalent insurance to protect such other party's interests at the expense of the party who was required to provide such coverage, and the Contract Price shall be adjusted accordingly.

I. Owner does not represent that insurance coverage and limits established in this Contract necessarily will be adequate to protect Contractor or Contractor's interests.

J. The insurance and insurance limits required herein shall not be deemed as a limitation on Contractor's liability under the indemnities granted to Owner and other individuals and entities in the Contract.

6.03 *Contractor's Insurance*

A. *Workers' Compensation*: Contractor shall purchase and maintain workers' compensation and employer's liability insurance for:

1. claims under workers' compensation, disability benefits, and other similar employee benefit acts.

2. United States Longshoreman and Harbor Workers' Compensation Act and Jones Act coverage (if applicable).

3. claims for damages because of bodily injury, occupational sickness or disease, or death of Contractor's employees (by stop-gap endorsement in monopolist worker's compensation states).

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

4. Foreign voluntary worker compensation (if applicable).

B. *Commercial General Liability—Claims Covered*: Contractor shall purchase and maintain commercial general liability insurance, covering all operations by or on behalf of Contractor, on an occurrence basis, against:

1. claims for damages because of bodily injury, sickness or disease, or death of any person other than Contractor's employees.

2. claims for damages insured by reasonably available personal injury liability coverage.

3. claims for damages, other than to the Work itself, because of injury to or destruction of tangible property wherever located, including loss of use resulting therefrom.

C. *Commercial General Liability—Form and Content*: Contractor's commercial liability policy shall be written on a 1996 (or later) ISO commercial general liability form (occurrence form) and include the following coverages and endorsements:

1. Products and completed operations coverage:

a. Such insurance shall be maintained for three years after final payment.

b. Contractor shall furnish Owner and each other additional insured (as identified in the Supplementary Conditions or elsewhere in the Contract) evidence of continuation of such insurance at final payment and three years thereafter.

2. Blanket contractual liability coverage, to the extent permitted by law, including but not limited to coverage of Contractor's contractual indemnity obligations in Paragraph 7.18.

3. Broad form property damage coverage.

4. Severability of interest.

5. Underground, explosion, and collapse coverage.

6. Personal injury coverage.

7. Additional insured endorsements that include both ongoing operations and products and completed operations coverage through ISO Endorsements CG 20 10 10 01 and CG 20 37 10 01 (together); or CG 20 10 07 04 and CG 20 37 07 04 (together); or their equivalent.

8. For design professional additional insureds, ISO Endorsement CG 20 32 07 04, "Additional Insured—Engineers, Architects or Surveyors Not Engaged by the Named Insured" or its equivalent.

D. *Automobile liability*: Contractor shall purchase and maintain automobile liability insurance against claims for damages because of bodily injury or death of any person or property damage arising out of the ownership, maintenance, or use of any motor vehicle. The automobile liability policy shall be written on an occurrence basis.

E. *Umbrella or excess liability*: Contractor shall purchase and maintain umbrella or excess liability insurance written over the underlying employer's liability, commercial general liability, and automobile liability insurance described in the paragraphs above. Subject to industry-standard exclusions, the coverage afforded shall follow form as to each and every one of the underlying policies.

F. *Contractor's pollution liability insurance*: Contractor shall purchase and maintain a policy covering third-party injury and property damage claims, including clean-up costs, as a result

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

of pollution conditions arising from Contractor's operations and completed operations. This insurance shall be maintained for no less than three years after final completion.

G. *Additional insureds*: The Contractor's commercial general liability, automobile liability, umbrella or excess, and pollution liability policies shall include and list as additional insureds Owner and Engineer, and any individuals or entities identified in the Supplementary Conditions; include coverage for the respective officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of all such additional insureds; and the insurance afforded to these additional insureds shall provide primary coverage for all claims covered thereby (including as applicable those arising from both ongoing and completed operations) on a non-contributory basis. Contractor shall obtain all necessary endorsements to support these requirements.

H. *Contractor's professional liability insurance*: If Contractor will provide or furnish professional services under this Contract, through a delegation of professional design services or otherwise, then Contractor shall be responsible for purchasing and maintaining applicable professional liability insurance. This insurance shall provide protection against claims arising out of performance of professional design or related services, and caused by a negligent error, omission, or act for which the insured party is legally liable. It shall be maintained throughout the duration of the Contract and for a minimum of two years after Substantial Completion. If such professional design services are performed by a Subcontractor, and not by Contractor itself, then the requirements of this paragraph may be satisfied through the purchasing and maintenance of such insurance by such Subcontractor.

I. *General provisions*: The policies of insurance required by this Paragraph 6.03 shall:

1. include at least the specific coverages provided in this Article.

2. be written for not less than the limits of liability provided in this Article and in the Supplementary Conditions, or required by Laws or Regulations, whichever is greater.

3. contain a provision or endorsement that the coverage afforded will not be canceled, materially changed, or renewal refused until at least 10 days prior written notice has been given to Contractor. Within three days of receipt of any such written notice, Contractor shall provide a copy of the notice to Owner, Engineer, and each other insured under the policy.

4. remain in effect at least until final payment (and longer if expressly required in this Article) and at all times thereafter when Contractor may be correcting, removing, or replacing defective Work as a warranty or correction obligation, or otherwise, or returning to the Site to conduct other tasks arising from the Contract Documents.

5. be appropriate for the Work being performed and provide protection from claims that may arise out of or result from Contractor's performance of the Work and Contractor's other obligations under the Contract Documents, whether it is to be performed by Contractor, any Subcontractor or Supplier, or by anyone directly or indirectly employed by any of them to perform any of the Work, or by anyone for whose acts any of them may be liable.

J. The coverage requirements for specific policies of insurance must be met by such policies, and not by reference to excess or umbrella insurance provided in other policies.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

6.04 *Owner's Liability Insurance*

A. In addition to the insurance required to be provided by Contractor under Paragraph 6.03, Owner, at Owner's option, may purchase and maintain at Owner's expense Owner's own liability insurance as will protect Owner against claims which may arise from operations under the Contract Documents.

B. Owner's liability policies, if any, operate separately and independently from policies required to be provided by Contractor, and Contractor cannot rely upon Owner's liability policies for any of Contractor's obligations to the Owner, Engineer, or third parties.

6.05 *Property Insurance*

A. *Builder's Risk*: Unless otherwise provided in the Supplementary Conditions, Contractor shall purchase and maintain builder's risk insurance upon the Work on a completed value basis, in the amount of the full insurable replacement cost thereof (subject to such deductible amounts as may be provided in the Supplementary Conditions or required by Laws and Regulations). This insurance shall:

1. include the Owner and Contractor as named insureds, and all Subcontractors, and any individuals or entities required by the Supplementary Conditions to be insured under such builder's risk policy, as insureds or named insureds. For purposes of the remainder of this Paragraph 6.05, Paragraphs 6.06 and 6.07, and any corresponding Supplementary Conditions, the parties required to be insured shall collectively be referred to as "insureds."

2. be written on a builder's risk "all risk" policy form that shall at least include insurance for physical loss or damage to the Work, temporary buildings, falsework, and materials and equipment in transit, and shall insure against at least the following perils or causes of loss: fire; lightning; windstorm; riot; civil commotion; terrorism; vehicle impact; aircraft; smoke; theft; vandalism and malicious mischief; mechanical breakdown, boiler explosion, and artificially generated electric current; earthquake; volcanic activity, and other earth movement; flood; collapse; explosion; debris removal; demolition occasioned by enforcement of Laws and Regulations; water damage (other than that caused by flood); and such other perils or causes of loss as may be specifically required by the Supplementary Conditions. If insurance against mechanical breakdown, boiler explosion, and artificially generated electric current; earthquake; volcanic activity, and other earth movement; or flood, are not commercially available under builder's risk policies, by endorsement or otherwise, such insurance may be provided through other insurance policies acceptable to Owner and Contractor.

3. cover, as insured property, at least the following: (a) the Work and all materials, supplies, machinery, apparatus, equipment, fixtures, and other property of a similar nature that are to be incorporated into or used in the preparation, fabrication, construction, erection, or completion of the Work, including Owner-furnished or assigned property; (b) spare parts inventory required within the scope of the Contract; and (c) temporary works which are not intended to form part of the permanent constructed Work but which are intended to provide working access to the Site, or to the Work under construction, or which are intended to provide temporary support for the Work under construction, including scaffolding, form work, fences, shoring, falsework, and temporary structures.

4. cover expenses incurred in the repair or replacement of any insured property (including but not limited to fees and charges of engineers and architects).

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5. extend to cover damage or loss to insured property while in temporary storage at the Site or in a storage location outside the Site (but not including property stored at the premises of a manufacturer or Supplier).

6. extend to cover damage or loss to insured property while in transit.

7. allow for partial occupation or use of the Work by Owner, such that those portions of the Work that are not yet occupied or used by Owner shall remain covered by the builder's risk insurance.

8. allow for the waiver of the insurer's subrogation rights, as set forth below.

9. provide primary coverage for all losses and damages caused by the perils or causes of loss covered.

10. not include a co-insurance clause.

11. include an exception for ensuing losses from physical damage or loss with respect to any defective workmanship, design, or materials exclusions.

12. include performance/hot testing and start-up.

13. be maintained in effect, subject to the provisions herein regarding Substantial Completion and partial occupancy or use of the Work by Owner, until the Work is complete.

B. *Notice of Cancellation or Change*: All the policies of insurance (and the certificates or other evidence thereof) required to be purchased and maintained in accordance with this Paragraph 6.05 will contain a provision or endorsement that the coverage afforded will not be canceled or materially changed or renewal refused until at least 10 days prior written notice has been given to the purchasing policyholder. Within three days of receipt of any such written notice, the purchasing policyholder shall provide a copy of the notice to each other insured.

C. *Deductibles*: The purchaser of any required builder's risk or property insurance shall pay for costs not covered because of the application of a policy deductible.

D. *Partial Occupancy or Use by Owner*: If Owner will occupy or use a portion or portions of the Work prior to Substantial Completion of all the Work as provided in Paragraph 15.04, then Owner (directly, if it is the purchaser of the builder's risk policy, or through Contractor) will provide notice of such occupancy or use to the builder's risk insurer. The builder's risk insurance shall not be canceled or permitted to lapse on account of any such partial use or occupancy; rather, those portions of the Work that are occupied or used by Owner may come off the builder's risk policy, while those portions of the Work not yet occupied or used by Owner shall remain covered by the builder's risk insurance.

E. *Additional Insurance*: If Contractor elects to obtain other special insurance to be included in or supplement the builder's risk or property insurance policies provided under this Paragraph 6.05, it may do so at Contractor's expense.

F. *Insurance of Other Property*: If the express insurance provisions of the Contract do not require or address the insurance of a property item or interest, such as tools, construction equipment, or other personal property owned by Contractor, a Subcontractor, or an employee of Contractor or a Subcontractor, then the entity or individual owning such property item will be responsible for deciding whether to insure it, and if so in what amount.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

6.06 *Waiver of Rights*

A. All policies purchased in accordance with Paragraph 6.05, expressly including the builder's risk policy, shall contain provisions to the effect that in the event of payment of any loss or damage the insurers will have no rights of recovery against any insureds thereunder, or against Engineer or its consultants, or their officers, directors, members, partners, employees, agents, consultants, or subcontractors. Owner and Contractor waive all rights against each other and the respective officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, or resulting from any of the perils or causes of loss covered by such policies and any other property insurance applicable to the Work; and, in addition, waive all such rights against Engineer, its consultants, all Subcontractors, all individuals or entities identified in the Supplementary Conditions as insureds, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, under such policies for losses and damages so caused. None of the above waivers shall extend to the rights that any party making such waiver may have to the proceeds of insurance held by Owner or Contractor as trustee or fiduciary, or otherwise payable under any policy so issued.

B. Owner waives all rights against Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, for:

1. loss due to business interruption, loss of use, or other consequential loss extending beyond direct physical loss or damage to Owner's property or the Work caused by, arising out of, or resulting from fire or other perils whether or not insured by Owner; and

2. loss or damage to the completed Project or part thereof caused by, arising out of, or resulting from fire or other insured peril or cause of loss covered by any property insurance maintained on the completed Project or part thereof by Owner during partial occupancy or use pursuant to Paragraph 15.04, after Substantial Completion pursuant to Paragraph 15.03, or after final payment pursuant to Paragraph 15.06.

C. Any insurance policy maintained by Owner covering any loss, damage or consequential loss referred to in Paragraph 6.06.B shall contain provisions to the effect that in the event of payment of any such loss, damage, or consequential loss, the insurers will have no rights of recovery against Contractor, Subcontractors, or Engineer, or the officers, directors, members, partners, employees, agents, consultants, or subcontractors of each and any of them.

D. Contractor shall be responsible for assuring that the agreement under which a Subcontractor performs a portion of the Work contains provisions whereby the Subcontractor waives all rights against Owner, Contractor, all individuals or entities identified in the Supplementary Conditions as insureds, the Engineer and its consultants, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, relating to, or resulting from any of the perils or causes of loss covered by builder's risk insurance and any other property insurance applicable to the Work.

6.07 *Receipt and Application of Property Insurance Proceeds*

A. Any insured loss under the builder's risk and other policies of insurance required by Paragraph 6.05 will be adjusted and settled with the named insured that purchased the

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

policy. Such named insured shall act as fiduciary for the other insureds, and give notice to such other insureds that adjustment and settlement of a claim is in progress. Any other insured may state its position regarding a claim for insured loss in writing within 15 days after notice of such claim.

B. Proceeds for such insured losses may be made payable by the insurer either jointly to multiple insureds, or to the named insured that purchased the policy in its own right and as fiduciary for other insureds, subject to the requirements of any applicable mortgage clause. A named insured receiving insurance proceeds under the builder's risk and other policies of insurance required by Paragraph 6.05 shall distribute such proceeds in accordance with such agreement as the parties in interest may reach, or as otherwise required under the dispute resolution provisions of this Contract or applicable Laws and Regulations.

C. If no other special agreement is reached, the damaged Work shall be repaired or replaced, the money so received applied on account thereof, and the Work and the cost thereof covered by Change Order, if needed.

ARTICLE 7 – CONTRACTOR'S RESPONSIBILITIES

7.01 *Supervision and Superintendence*

A. Contractor shall supervise, inspect, and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents. Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction.

B. At all times during the progress of the Work, Contractor shall assign a competent resident superintendent who shall not be replaced without written notice to Owner and Engineer except under extraordinary circumstances.

7.02 *Labor; Working Hours*

A. Contractor shall provide competent, suitably qualified personnel to survey and lay out the Work and perform construction as required by the Contract Documents. Contractor shall at all times maintain good discipline and order at the Site.

B. Except as otherwise required for the safety or protection of persons or the Work or property at the Site or adjacent thereto, and except as otherwise stated in the Contract Documents, all Work at the Site shall be performed during regular working hours, Monday through Friday. Contractor will not perform Work on a Saturday, Sunday, or any legal holiday. Contractor may perform Work outside regular working hours or on Saturdays, Sundays, or legal holidays only with Owner's written consent, which will not be unreasonably withheld.

7.03 *Services, Materials, and Equipment*

A. Unless otherwise specified in the Contract Documents, Contractor shall provide and assume full responsibility for all services, materials, equipment, labor, transportation, construction equipment and machinery, tools, appliances, fuel, power, light, heat, telephone, water, sanitary facilities, temporary facilities, and all other facilities and incidentals necessary for the performance, testing, start up, and completion of the Work, whether or not such items are specifically called for in the Contract Documents.

B. All materials and equipment incorporated into the Work shall be of good quality and new, except as otherwise provided in the Contract Documents. All special warranties and

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

guarantees required by the Specifications shall expressly run to the benefit of Owner. If required by Engineer, Contractor shall furnish satisfactory evidence (including reports of required tests) as to the source, kind, and quality of materials and equipment.

C. All materials and equipment shall be stored, applied, installed, connected, erected, protected, used, cleaned, and conditioned in accordance with instructions of the applicable Supplier, except as otherwise may be provided in the Contract Documents.

7.04 *"Or Equals"*

A. Whenever an item of material or equipment is specified or described in the Contract Documents by using the name of a proprietary item or the name of a particular Supplier, the Contract Price has been based upon Contractor furnishing such item as specified. The specification or description of such an item is intended to establish the type, function, appearance, and quality required. Unless the specification or description contains or is followed by words reading that no like, equivalent, or "or equal" item is permitted, Contractor may request that Engineer authorize the use of other items of material or equipment, or items from other proposed suppliers under the circumstances described below.

1. If Engineer in its sole discretion determines that an item of material or equipment proposed by Contractor is functionally equal to that named and sufficiently similar so that no change in related Work will be required, Engineer shall deem it an "or equal" item. For the purposes of this paragraph, a proposed item of material or equipment will be considered functionally equal to an item so named if:

a. in the exercise of reasonable judgment Engineer determines that:

1) it is at least equal in materials of construction, quality, durability, appearance, strength, and design characteristics;

2) it will reliably perform at least equally well the function and achieve the results imposed by the design concept of the completed Project as a functioning whole;

3) it has a proven record of performance and availability of responsive service; and

4) it is not objectionable to Owner.

b. Contractor certifies that, if approved and incorporated into the Work:

1) there will be no increase in cost to the Owner or increase in Contract Times; and

2) it will conform substantially to the detailed requirements of the item named in the Contract Documents.

B. *Contractor's Expense*: Contractor shall provide all data in support of any proposed "or equal" item at Contractor's expense.

C. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each "or-equal" request. Engineer may require Contractor to furnish additional data about the proposed "or-equal" item. Engineer will be the sole judge of acceptability. No "or-equal" item will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an "or-equal", which will be evidenced by an approved Shop Drawing or other written communication. Engineer will advise Contractor in writing of any negative determination.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. *Effect of Engineer's Determination*: Neither approval nor denial of an "or-equal" request shall result in any change in Contract Price. The Engineer's denial of an "or-equal" request shall be final and binding, and may not be reversed through an appeal under any provision of the Contract Documents.

E. *Treatment as a Substitution Request*: If Engineer determines that an item of material or equipment proposed by Contractor does not qualify as an "or-equal" item, Contractor may request that Engineer considered the proposed item as a substitute pursuant to Paragraph 7.05.

7.05 *Substitutes*

A. Unless the specification or description of an item of material or equipment required to be furnished under the Contract Documents contains or is followed by words reading that no substitution is permitted, Contractor may request that Engineer authorize the use of other items of material or equipment under the circumstances described below. To the extent possible such requests shall be made before commencement of related construction at the Site.

1. Contractor shall submit sufficient information as provided below to allow Engineer to determine if the item of material or equipment proposed is functionally equivalent to that named and an acceptable substitute therefor. Engineer will not accept requests for review of proposed substitute items of material or equipment from anyone other than Contractor.

2. The requirements for review by Engineer will be as set forth in Paragraph 7.05.B, as supplemented by the Specifications, and as Engineer may decide is appropriate under the circumstances.

3. Contractor shall make written application to Engineer for review of a proposed substitute item of material or equipment that Contractor seeks to furnish or use. The application:

a. shall certify that the proposed substitute item will:

1) perform adequately the functions and achieve the results called for by the general design,

2) be similar in substance to that specified, and

3) be suited to the same use as that specified.

b. will state:

1) the extent, if any, to which the use of the proposed substitute item will necessitate a change in Contract Times,

2) whether use of the proposed substitute item in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with Owner for other work on the Project) to adapt the design to the proposed substitute item, and

3) whether incorporation or use of the proposed substitute item in connection with the Work is subject to payment of any license fee or royalty.

c. will identify:

1) all variations of the proposed substitute item from that specified, and

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2) available engineering, sales, maintenance, repair, and replacement services.

d. shall contain an itemized estimate of all costs or credits that will result directly or indirectly from use of such substitute item, including but not limited to changes in Contract Price, shared savings, costs of redesign, and claims of other contractors affected by any resulting change.

B. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each substitute request, and to obtain comments and direction from Owner. Engineer may require Contractor to furnish additional data about the proposed substitute item. Engineer will be the sole judge of acceptability. No substitute will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an acceptable substitute. Engineer's determination will be evidenced by a Field Order or a proposed Change Order accounting for the substitution itself and all related impacts, including changes in Contract Price or Contract Times. Engineer will advise Contractor in writing of any negative determination.

C. *Special Guarantee*: Owner may require Contractor to furnish at Contractor's expense a special performance guarantee or other surety with respect to any substitute.

D. *Reimbursement of Engineer's Cost*: Engineer will record Engineer's costs in evaluating a substitute proposed or submitted by Contractor. Whether or not Engineer approves a substitute so proposed or submitted by Contractor, Contractor shall reimburse Owner for the reasonable charges of Engineer for evaluating each such proposed substitute. Contractor shall also reimburse Owner for the reasonable charges of Engineer for making changes in the Contract Documents (or in the provisions of any other direct contract with Owner) resulting from the acceptance of each proposed substitute.

E. *Contractor's Expense*: Contractor shall provide all data in support of any proposed substitute at Contractor's expense.

F. *Effect of Engineer's Determination*: If Engineer approves the substitution request, Contractor shall execute the proposed Change Order and proceed with the substitution. The Engineer's denial of a substitution request shall be final and binding, and may not be reversed through an appeal under any provision of the Contract Documents. Contractor may challenge the scope of reimbursement costs imposed under Paragraph 7.05.D, by timely submittal of a Change Proposal.

7.06 *Concerning Subcontractors, Suppliers, and Others*

A. Contractor may retain Subcontractors and Suppliers for the performance of parts of the Work. Such Subcontractors and Suppliers must be acceptable to Owner.

B. Contractor shall retain specific Subcontractors, Suppliers, or other individuals or entities for the performance of designated parts of the Work if required by the Contract to do so.

C. Subsequent to the submittal of Contractor's Bid or final negotiation of the terms of the Contract, Owner may not require Contractor to retain any Subcontractor, Supplier, or other individual or entity to furnish or perform any of the Work against which Contractor has reasonable objection.

D. Prior to entry into any binding subcontract or purchase order, Contractor shall submit to Owner the identity of the proposed Subcontractor or Supplier (unless Owner has already deemed such proposed Subcontractor or Supplier acceptable, during the bidding process or otherwise). Such proposed Subcontractor or Supplier shall be deemed acceptable to Owner unless Owner raises a substantive, reasonable objection within five days.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. Owner may require the replacement of any Subcontractor, Supplier, or other individual or entity retained by Contractor to perform any part of the Work. Owner also may require Contractor to retain specific replacements; provided, however, that Owner may not require a replacement to which Contractor has a reasonable objection. If Contractor has submitted the identity of certain Subcontractors, Suppliers, or other individuals or entities for acceptance by Owner, and Owner has accepted it (either in writing or by failing to make written objection thereto), then Owner may subsequently revoke the acceptance of any such Subcontractor, Supplier, or other individual or entity so identified solely on the basis of substantive, reasonable objection after due investigation. Contractor shall submit an acceptable replacement for the rejected Subcontractor, Supplier, or other individual or entity.

F. If Owner requires the replacement of any Subcontractor, Supplier, or other individual or entity retained by Contractor to perform any part of the Work, then Contractor shall be entitled to an adjustment in Contract Price or Contract Times, or both, with respect to the replacement; and Contractor shall initiate a Change Proposal for such adjustment within 30 days of Owner's requirement of replacement.

G. No acceptance by Owner of any such Subcontractor, Supplier, or other individual or entity, whether initially or as a replacement, shall constitute a waiver of the right of Owner to the completion of the Work in accordance with the Contract Documents.

H. On a monthly basis Contractor shall submit to Engineer a complete list of all Subcontractors and Suppliers having a direct contract with Contractor, and of all other Subcontractors and Suppliers known to Contractor at the time of submittal.

I. Contractor shall be fully responsible to Owner and Engineer for all acts and omissions of the Subcontractors, Suppliers, and other individuals or entities performing or furnishing any of the Work just as Contractor is responsible for Contractor's own acts and omissions.

J. Contractor shall be solely responsible for scheduling and coordinating the work of Subcontractors, Suppliers, and all other individuals or entities performing or furnishing any of the Work.

K. Contractor shall restrict all Subcontractors, Suppliers, and such other individuals or entities performing or furnishing any of the Work from communicating with Engineer or Owner, except through Contractor or in case of an emergency, or as otherwise expressly allowed herein.

L. The divisions and sections of the Specifications and the identifications of any Drawings shall not control Contractor in dividing the Work among Subcontractors or Suppliers or delineating the Work to be performed by any specific trade.

M. All Work performed for Contractor by a Subcontractor or Supplier shall be pursuant to an appropriate contractual agreement that specifically binds the Subcontractor or Supplier to the applicable terms and conditions of the Contract Documents for the benefit of Owner and Engineer.

N. Owner may furnish to any Subcontractor or Supplier, to the extent practicable, information about amounts paid to Contractor on account of Work performed for Contractor by the particular Subcontractor or Supplier.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

O. Nothing in the Contract Documents:

1. shall create for the benefit of any such Subcontractor, Supplier, or other individual or entity any contractual relationship between Owner or Engineer and any such Subcontractor, Supplier, or other individual or entity; nor

2. shall create any obligation on the part of Owner or Engineer to pay or to see to the payment of any money due any such Subcontractor, Supplier, or other individual or entity except as may otherwise be required by Laws and Regulations.

7.07 *Patent Fees and Royalties*

A. Contractor shall pay all license fees and royalties and assume all costs incident to the use in the performance of the Work or the incorporation in the Work of any invention, design, process, product, or device which is the subject of patent rights or copyrights held by others. If a particular invention, design, process, product, or device is specified in the Contract Documents for use in the performance of the Work and if, to the actual knowledge of Owner or Engineer, its use is subject to patent rights or copyrights calling for the payment of any license fee or royalty to others, the existence of such rights shall be disclosed by Owner in the Contract Documents.

B. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, and its officers, directors, members, partners, employees, agents, consultants, and subcontractors from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device specified in the Contract Documents, but not identified as being subject to payment of any license fee or royalty to others required by patent rights or copyrights.

C. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device not specified in the Contract Documents.

7.08 *Permits*

A. Unless otherwise provided in the Contract Documents, Contractor shall obtain and pay for all construction permits and licenses. Owner shall assist Contractor, when necessary, in obtaining such permits and licenses. Contractor shall pay all governmental charges and inspection fees necessary for the prosecution of the Work which are applicable at the time of the submission of Contractor's Bid (or when Contractor became bound under a negotiated contract). Owner shall pay all charges of utility owners for connections for providing permanent service to the Work

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.09 *Taxes*

A. Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid by Contractor in accordance with the Laws and Regulations of the place of the Project which are applicable during the performance of the Work.

7.10 *Laws and Regulations*

A. Contractor shall give all notices required by and shall comply with all Laws and Regulations applicable to the performance of the Work. Except where otherwise expressly required by applicable Laws and Regulations, neither Owner nor Engineer shall be responsible for monitoring Contractor's compliance with any Laws or Regulations.

B. If Contractor performs any Work or takes any other action knowing or having reason to know that it is contrary to Laws or Regulations, Contractor shall bear all resulting costs and losses, and shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such Work or other action. It shall not be Contractor's responsibility to make certain that the Work described in the Contract Documents is in accordance with Laws and Regulations, but this shall not relieve Contractor of Contractor's obligations under Paragraph 3.03.

C. Owner or Contractor may give notice to the other party of any changes after the submission of Contractor's Bid (or after the date when Contractor became bound under a negotiated contract) in Laws or Regulations having an effect on the cost or time of performance of the Work, including but not limited to changes in Laws or Regulations having an effect on procuring permits and on sales, use, value-added, consumption, and other similar taxes. If Owner and Contractor are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times resulting from such changes, then within 30 days of such notice Contractor may submit a Change Proposal, or Owner may initiate a Claim.

7.11 *Record Documents*

A. Contractor shall maintain in a safe place at the Site one printed record copy of all Drawings, Specifications, Addenda, Change Orders, Work Change Directives, Field Orders, written interpretations and clarifications, and approved Shop Drawings. Contractor shall keep such record documents in good order and annotate them to show changes made during construction. These record documents, together with all approved Samples, will be available to Engineer for reference. Upon completion of the Work, Contractor shall deliver these record documents to Engineer.

7.12 *Safety and Protection*

A. Contractor shall be solely responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the Work. Such responsibility does not relieve Subcontractors of their responsibility for the safety of persons or property in the performance of their work, nor for compliance with applicable safety Laws and Regulations. Contractor shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury, or loss to:

1. all persons on the Site or who may be affected by the Work;

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. all the Work and materials and equipment to be incorporated therein, whether in storage on or off the Site; and

3. other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures, other work in progress, utilities, and Underground Facilities not designated for removal, relocation, or replacement in the course of construction.

B. Contractor shall comply with all applicable Laws and Regulations relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection. Contractor shall notify Owner; the owners of adjacent property, Underground Facilities, and other utilities; and other contractors and utility owners performing work at or adjacent to the Site, when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property or work in progress.

C. Contractor shall comply with the applicable requirements of Owner's safety programs, if any. The Supplementary Conditions identify any Owner's safety programs that are applicable to the Work.

D. Contractor shall inform Owner and Engineer of the specific requirements of Contractor's safety program with which Owner's and Engineer's employees and representatives must comply while at the Site.

E. All damage, injury, or loss to any property referred to in Paragraph 7.12.A.2 or 7.12.A.3 caused, directly or indirectly, in whole or in part, by Contractor, any Subcontractor, Supplier, or any other individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, shall be remedied by Contractor at its expense (except damage or loss attributable to the fault of Drawings or Specifications or to the acts or omissions of Owner or Engineer or anyone employed by any of them, or anyone for whose acts any of them may be liable, and not attributable, directly or indirectly, in whole or in part, to the fault or negligence of Contractor or any Subcontractor, Supplier, or other individual or entity directly or indirectly employed by any of them).

F. Contractor's duties and responsibilities for safety and protection shall continue until such time as all the Work is completed and Engineer has issued a notice to Owner and Contractor in accordance with Paragraph 15.06.B that the Work is acceptable (except as otherwise expressly provided in connection with Substantial Completion).

G. Contractor's duties and responsibilities for safety and protection shall resume whenever Contractor or any Subcontractor or Supplier returns to the Site to fulfill warranty or correction obligations, or to conduct other tasks arising from the Contract Documents.

7.13 *Safety Representative*

A. Contractor shall designate a qualified and experienced safety representative at the Site whose duties and responsibilities shall be the prevention of accidents and the maintaining and supervising of safety precautions and programs.

7.14 *Hazard Communication Programs*

A. Contractor shall be responsible for coordinating any exchange of material safety data sheets or other hazard communication information required to be made available to or

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

exchanged between or among employers at the Site in accordance with Laws or Regulations.

7.15 *Emergencies*

A. In emergencies affecting the safety or protection of persons or the Work or property at the Site or adjacent thereto, Contractor is obligated to act to prevent threatened damage, injury, or loss. Contractor shall give Engineer prompt written notice if Contractor believes that any significant changes in the Work or variations from the Contract Documents have been caused thereby or are required as a result thereof. If Engineer determines that a change in the Contract Documents is required because of the action taken by Contractor in response to such an emergency, a Work Change Directive or Change Order will be issued.

7.16 *Shop Drawings, Samples, and Other Submittals*

A. *Shop Drawing and Sample Submittal Requirements*:

1. Before submitting a Shop Drawing or Sample, Contractor shall have:

a. reviewed and coordinated the Shop Drawing or Sample with other Shop Drawings and Samples and with the requirements of the Work and the Contract Documents;

b. determined and verified all field measurements, quantities, dimensions, specified performance and design criteria, installation requirements, materials, catalog numbers, and similar information with respect thereto;

c. determined and verified the suitability of all materials and equipment offered with respect to the indicated application, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work; and

d. determined and verified all information relative to Contractor's responsibilities for means, methods, techniques, sequences, and procedures of construction, and safety precautions and programs incident thereto.

2. Each submittal shall bear a stamp or specific written certification that Contractor has satisfied Contractor's obligations under the Contract Documents with respect to Contractor's review of that submittal, and that Contractor approves the submittal.

3. With each submittal, Contractor shall give Engineer specific written notice of any variations that the Shop Drawing or Sample may have from the requirements of the Contract Documents. This notice shall be set forth in a written communication separate from the Shop Drawings or Sample submittal; and, in addition, in the case of Shop Drawings by a specific notation made on each Shop Drawing submitted to Engineer for review and approval of each such variation.

B. *Submittal Procedures for Shop Drawings and Samples*: Contractor shall submit Shop Drawings and Samples to Engineer for review and approval in accordance with the accepted Schedule of Submittals. Each submittal will be identified as Engineer may require.

1. *Shop Drawings*:

a. Contractor shall submit the number of copies required in the Specifications.

b. Data shown on the Shop Drawings will be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show Engineer the services, materials, and equipment Contractor proposes to

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

provide and to enable Engineer to review the information for the limited purposes required by Paragraph 7.16.D.

2. *Samples*:

   a. Contractor shall submit the number of Samples required in the Specifications.

   b. Contractor shall clearly identify each Sample as to material, Supplier, pertinent data such as catalog numbers, the use for which intended and other data as Engineer may require to enable Engineer to review the submittal for the limited purposes required by Paragraph 7.16.D.

3. Where a Shop Drawing or Sample is required by the Contract Documents or the Schedule of Submittals, any related Work performed prior to Engineer's review and approval of the pertinent submittal will be at the sole expense and responsibility of Contractor.

C. *Other Submittals*: Contractor shall submit other submittals to Engineer in accordance with the accepted Schedule of Submittals, and pursuant to the applicable terms of the Specifications.

D. *Engineer's Review*:

1. Engineer will provide timely review of Shop Drawings and Samples in accordance with the Schedule of Submittals acceptable to Engineer. Engineer's review and approval will be only to determine if the items covered by the submittals will, after installation or incorporation in the Work, conform to the information given in the Contract Documents and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

2. Engineer's review and approval will not extend to means, methods, techniques, sequences, or procedures of construction or to safety precautions or programs incident thereto.

3. Engineer's review and approval of a separate item as such will not indicate approval of the assembly in which the item functions.

4. Engineer's review and approval of a Shop Drawing or Sample shall not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless Contractor has complied with the requirements of Paragraph 7.16.A.3 and Engineer has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample. Engineer will document any such approved variation from the requirements of the Contract Documents in a Field Order.

5. Engineer's review and approval of a Shop Drawing or Sample shall not relieve Contractor from responsibility for complying with the requirements of Paragraph 7.16.A and B.

6. Engineer's review and approval of a Shop Drawing or Sample, or of a variation from the requirements of the Contract Documents, shall not, under any circumstances, change the Contract Times or Contract Price, unless such changes are included in a Change Order.

7. Neither Engineer's receipt, review, acceptance or approval of a Shop Drawing, Sample, or other submittal shall result in such item becoming a Contract Document.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8. Contractor shall perform the Work in compliance with the requirements and commitments set forth in approved Shop Drawings and Samples, subject to the provisions of Paragraph 7.16.D.4.

E. *Resubmittal Procedures*:

1. Contractor shall make corrections required by Engineer and shall return the required number of corrected copies of Shop Drawings and submit, as required, new Samples for review and approval. Contractor shall direct specific attention in writing to revisions other than the corrections called for by Engineer on previous submittals.

2. Contractor shall furnish required submittals with sufficient information and accuracy to obtain required approval of an item with no more than three submittals. Engineer will record Engineer's time for reviewing a fourth or subsequent submittal of a Shop Drawings, sample, or other item requiring approval, and Contractor shall be responsible for Engineer's charges to Owner for such time. Owner may impose a set-off against payments due to Contractor to secure reimbursement for such charges.

3. If Contractor requests a change of a previously approved submittal item, Contractor shall be responsible for Engineer's charges to Owner for its review time, and Owner may impose a set-off against payments due to Contractor to secure reimbursement for such charges, unless the need for such change is beyond the control of Contractor.

7.17 *Contractor's General Warranty and Guarantee*

A. Contractor warrants and guarantees to Owner that all Work will be in accordance with the Contract Documents and will not be defective. Engineer and its officers, directors, members, partners, employees, agents, consultants, and subcontractors shall be entitled to rely on Contractor's warranty and guarantee.

B. Contractor's warranty and guarantee hereunder excludes defects or damage caused by:

1. abuse, modification, or improper maintenance or operation by persons other than Contractor, Subcontractors, Suppliers, or any other individual or entity for whom Contractor is responsible; or

2. normal wear and tear under normal usage.

C. Contractor's obligation to perform and complete the Work in accordance with the Contract Documents shall be absolute. None of the following will constitute an acceptance of Work that is not in accordance with the Contract Documents or a release of Contractor's obligation to perform the Work in accordance with the Contract Documents:

1. observations by Engineer;

2. recommendation by Engineer or payment by Owner of any progress or final payment;

3. the issuance of a certificate of Substantial Completion by Engineer or any payment related thereto by Owner;

4. use or occupancy of the Work or any part thereof by Owner;

5. any review and approval of a Shop Drawing or Sample submittal;

6. the issuance of a notice of acceptability by Engineer;

7. any inspection, test, or approval by others; or

8. any correction of defective Work by Owner.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. If the Contract requires the Contractor to accept the assignment of a contract entered into by Owner, then the specific warranties, guarantees, and correction obligations contained in the assigned contract shall govern with respect to Contractor's performance obligations to Owner for the Work described in the assigned contract.

7.18 *Indemnification*

A. To the fullest extent permitted by Laws and Regulations, and in addition to any other obligations of Contractor under the Contract or otherwise, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to the performance of the Work, provided that any such claim, cost, loss, or damage is attributable to bodily injury, sickness, disease, or death, or to injury to or destruction of tangible property (other than the Work itself), including the loss of use resulting therefrom but only to the extent caused by any negligent act or omission of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work or anyone for whose acts any of them may be liable.

B. In any and all claims against Owner or Engineer or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors by any employee (or the survivor or personal representative of such employee) of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, the indemnification obligation under Paragraph 7.18.A shall not be limited in any way by any limitation on the amount or type of damages, compensation, or benefits payable by or for Contractor or any such Subcontractor, Supplier, or other individual or entity under workers' compensation acts, disability benefit acts, or other employee benefit acts.

C. The indemnification obligations of Contractor under Paragraph 7.18.A shall not extend to the liability of Engineer and Engineer's officers, directors, members, partners, employees, agents, consultants and subcontractors arising out of:

1. the preparation or approval of, or the failure to prepare or approve maps, Drawings, opinions, reports, surveys, Change Orders, designs, or Specifications; or

2. giving directions or instructions, or failing to give them, if that is the primary cause of the injury or damage.

7.19 *Delegation of Professional Design Services*

A. Contractor will not be required to provide professional design services unless such services are specifically required by the Contract Documents for a portion of the Work or unless such services are required to carry out Contractor's responsibilities for construction means, methods, techniques, sequences and procedures. Contractor shall not be required to provide professional services in violation of applicable Laws and Regulations.

B. If professional design services or certifications by a design professional related to systems, materials, or equipment are specifically required of Contractor by the Contract Documents, Owner and Engineer will specify all performance and design criteria that such services must satisfy. Contractor shall cause such services or certifications to be provided by a properly licensed professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, and other submittals prepared by such professional. Shop

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Drawings and other submittals related to the Work designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to Engineer.

C. Owner and Engineer shall be entitled to rely upon the adequacy, accuracy, and completeness of the services, certifications, or approvals performed by such design professionals, provided Owner and Engineer have specified to Contractor all performance and design criteria that such services must satisfy.

D. Pursuant to this paragraph, Engineer's review and approval of design calculations and design drawings will be only for the limited purpose of checking for conformance with performance and design criteria given and the design concept expressed in the Contract Documents. Engineer's review and approval of Shop Drawings and other submittals (except design calculations and design drawings) will be only for the purpose stated in Paragraph 7.16.D.1.

E. Contractor shall not be responsible for the adequacy of the performance or design criteria specified by Owner or Engineer.

ARTICLE 8 – OTHER WORK AT THE SITE

8.01 *Other Work*

A. In addition to and apart from the Work under the Contract Documents, the Owner may perform other work at or adjacent to the Site. Such other work may be performed by Owner's employees, or through contracts between the Owner and third parties. Owner may also arrange to have third-party utility owners perform work on their utilities and facilities at or adjacent to the Site.

B. If Owner performs other work at or adjacent to the Site with Owner's employees, or through contracts for such other work, then Owner shall give Contractor written notice thereof prior to starting any such other work. If Owner has advance information regarding the start of any utility work at or adjacent to the Site, Owner shall provide such information to Contractor.

C. Contractor shall afford each other contractor that performs such other work, each utility owner performing other work, and Owner, if Owner is performing other work with Owner's employees, proper and safe access to the Site, and provide a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such other work. Contractor shall do all cutting, fitting, and patching of the Work that may be required to properly connect or otherwise make its several parts come together and properly integrate with such other work. Contractor shall not endanger any work of others by cutting, excavating, or otherwise altering such work; provided, however, that Contractor may cut or alter others' work with the written consent of Engineer and the others whose work will be affected.

D. If the proper execution or results of any part of Contractor's Work depends upon work performed by others under this Article 8, Contractor shall inspect such other work and promptly report to Engineer in writing any delays, defects, or deficiencies in such other work that render it unavailable or unsuitable for the proper execution and results of Contractor's Work. Contractor's failure to so report will constitute an acceptance of such other work as fit and proper for integration with Contractor's Work except for latent defects and deficiencies in such other work.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8.02 *Coordination*

A. If Owner intends to contract with others for the performance of other work at or adjacent to the Site, to perform other work at or adjacent to the Site with Owner's employees, or to arrange to have utility owners perform work at or adjacent to the Site, the following will be set forth in the Supplementary Conditions or provided to Contractor prior to the start of any such other work:

1. the identity of the individual or entity that will have authority and responsibility for coordination of the activities among the various contractors;

2. an itemization of the specific matters to be covered by such authority and responsibility; and

3. the extent of such authority and responsibilities.

B. Unless otherwise provided in the Supplementary Conditions, Owner shall have sole authority and responsibility for such coordination.

8.03 *Legal Relationships*

A. If, in the course of performing other work at or adjacent to the Site for Owner, the Owner's employees, any other contractor working for Owner, or any utility owner for whom the Owner is responsible causes damage to the Work or to the property of Contractor or its Subcontractors, or delays, disrupts, interferes with, or increases the scope or cost of the performance of the Work, through actions or inaction, then Contractor shall be entitled to an equitable adjustment in the Contract Price or the Contract Times, or both. Contractor must submit any Change Proposal seeking an equitable adjustment in the Contract Price or the Contract Times under this paragraph within 30 days of the damaging, delaying, disrupting, or interfering event. The entitlement to, and extent of, any such equitable adjustment shall take into account information (if any) regarding such other work that was provided to Contractor in the Contract Documents prior to the submittal of the Bid or the final negotiation of the terms of the Contract. When applicable, any such equitable adjustment in Contract Price shall be conditioned on Contractor assigning to Owner all Contractor's rights against such other contractor or utility owner with respect to the damage, delay, disruption, or interference that is the subject of the adjustment. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times.

B. Contractor shall take reasonable and customary measures to avoid damaging, delaying, disrupting, or interfering with the work of Owner, any other contractor, or any utility owner performing other work at or adjacent to the Site. If Contractor fails to take such measures and as a result damages, delays, disrupts, or interferes with the work of any such other contractor or utility owner, then Owner may impose a set-off against payments due to Contractor, and assign to such other contractor or utility owner the Owner's contractual rights against Contractor with respect to the breach of the obligations set forth in this paragraph.

C. When Owner is performing other work at or adjacent to the Site with Owner's employees, Contractor shall be liable to Owner for damage to such other work, and for the reasonable direct delay, disruption, and interference costs incurred by Owner as a result of Contractor's failure to take reasonable and customary measures with respect to Owner's other work. In response to such damage, delay, disruption, or interference, Owner may impose a set-off against payments due to Contractor.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. If Contractor damages, delays, disrupts, or interferes with the work of any other contractor, or any utility owner performing other work at or adjacent to the Site, through Contractor's failure to take reasonable and customary measures to avoid such impacts, or if any claim arising out of Contractor's actions, inactions, or negligence in performance of the Work at or adjacent to the Site is made by any such other contractor or utility owner against Contractor, Owner, or Engineer, then Contractor shall (1) promptly attempt to settle the claim as to all parties through negotiations with such other contractor or utility owner, or otherwise resolve the claim by arbitration or other dispute resolution proceeding or at law, and (2) indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against any such claims, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such damage, delay, disruption, or interference.

ARTICLE 9 – OWNER'S RESPONSIBILITIES

9.01 *Communications to Contractor*

A. Except as otherwise provided in these General Conditions, Owner shall issue all communications to Contractor through Engineer.

9.02 *Replacement of Engineer*

A. Owner may at its discretion appoint an engineer to replace Engineer, provided Contractor makes no reasonable objection to the replacement engineer. The replacement engineer's status under the Contract Documents shall be that of the former Engineer.

9.03 *Furnish Data*

A. Owner shall promptly furnish the data required of Owner under the Contract Documents.

9.04 *Pay When Due*

A. Owner shall make payments to Contractor when they are due as provided in the Agreement.

9.05 *Lands and Easements; Reports, Tests, and Drawings*

A. Owner's duties with respect to providing lands and easements are set forth in Paragraph 5.01.

B. Owner's duties with respect to providing engineering surveys to establish reference points are set forth in Paragraph 4.03.

C. Article 5 refers to Owner's identifying and making available to Contractor copies of reports of explorations and tests of conditions at the Site, and drawings of physical conditions relating to existing surface or subsurface structures at the Site.

9.06 *Insurance*

A. Owner's responsibilities, if any, with respect to purchasing and maintaining liability and property insurance are set forth in Article 6.

9.07 *Change Orders*

A. Owner's responsibilities with respect to Change Orders are set forth in Article 11.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

9.08 *Inspections, Tests, and Approvals*

A. Owner's responsibility with respect to certain inspections, tests, and approvals is set forth in Paragraph 14.02.B.

9.09 *Limitations on Owner's Responsibilities*

A. The Owner shall not supervise, direct, or have control or authority over, nor be responsible for, Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Owner will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

9.10 *Undisclosed Hazardous Environmental Condition*

A. Owner's responsibility in respect to an undisclosed Hazardous Environmental Condition is set forth in Paragraph 5.06.

9.11 *Evidence of Financial Arrangements*

A. Upon request of Contractor, Owner shall furnish Contractor reasonable evidence that financial arrangements have been made to satisfy Owner's obligations under the Contract Documents (including obligations under proposed changes in the Work).

9.12 *Safety Programs*

A. While at the Site, Owner's employees and representatives shall comply with the specific applicable requirements of Contractor's safety programs of which Owner has been informed.

B. Owner shall furnish copies of any applicable Owner safety programs to Contractor.

ARTICLE 10 – ENGINEER'S STATUS DURING CONSTRUCTION

10.01 *Owner's Representative*

A. Engineer will be Owner's representative during the construction period. The duties and responsibilities and the limitations of authority of Engineer as Owner's representative during construction are set forth in the Contract.

10.02 *Visits to Site*

A. Engineer will make visits to the Site at intervals appropriate to the various stages of construction as Engineer deems necessary in order to observe as an experienced and qualified design professional the progress that has been made and the quality of the various aspects of Contractor's executed Work. Based on information obtained during such visits and observations, Engineer, for the benefit of Owner, will determine, in general, if the Work is proceeding in accordance with the Contract Documents. Engineer will not be required to make exhaustive or continuous inspections on the Site to check the quality or quantity of the Work. Engineer's efforts will be directed toward providing for Owner a greater degree of confidence that the completed Work will conform generally to the Contract Documents. On the basis of such visits and observations, Engineer will keep Owner informed of the progress of the Work and will endeavor to guard Owner against defective Work.

B. Engineer's visits and observations are subject to all the limitations on Engineer's authority and responsibility set forth in Paragraph 10.08. Particularly, but without limitation, during

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

or as a result of Engineer's visits or observations of Contractor's Work, Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work.

10.03 *Project Representative*

A. If Owner and Engineer have agreed that Engineer will furnish a Resident Project Representative to represent Engineer at the Site and assist Engineer in observing the progress and quality of the Work, then the authority and responsibilities of any such Resident Project Representative will be as provided in the Supplementary Conditions, and limitations on the responsibilities thereof will be as provided in Paragraph 10.08. If Owner designates another representative or agent to represent Owner at the Site who is not Engineer's consultant, agent, or employee, the responsibilities and authority and limitations thereon of such other individual or entity will be as provided in the Supplementary Conditions.

10.04 *Rejecting Defective Work*

A. Engineer has the authority to reject Work in accordance with Article 14.

10.05 *Shop Drawings, Change Orders and Payments*

A. Engineer's authority, and limitations thereof, as to Shop Drawings and Samples, are set forth in Paragraph 7.16.

B. Engineer's authority, and limitations thereof, as to design calculations and design drawings submitted in response to a delegation of professional design services, if any, are set forth in Paragraph 7.19.

C. Engineer's authority as to Change Orders is set forth in Article 11.

D. Engineer's authority as to Applications for Payment is set forth in Article 15.

10.06 *Determinations for Unit Price Work*

A. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor as set forth in Paragraph 13.03.

10.07 *Decisions on Requirements of Contract Documents and Acceptability of Work*

A. Engineer will render decisions regarding the requirements of the Contract Documents, and judge the acceptability of the Work, pursuant to the specific procedures set forth herein for initial interpretations, Change Proposals, and acceptance of the Work. In rendering such decisions and judgments, Engineer will not show partiality to Owner or Contractor, and will not be liable to Owner, Contractor, or others in connection with any proceedings, interpretations, decisions, or judgments conducted or rendered in good faith.

10.08 *Limitations on Engineer's Authority and Responsibilities*

A. Neither Engineer's authority or responsibility under this Article 10 or under any other provision of the Contract, nor any decision made by Engineer in good faith either to exercise or not exercise such authority or responsibility or the undertaking, exercise, or performance of any authority or responsibility by Engineer, shall create, impose, or give rise to any duty in contract, tort, or otherwise owed by Engineer to Contractor, any Subcontractor, any Supplier, any other individual or entity, or to any surety for or employee or agent of any of them.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Engineer will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

C. Engineer will not be responsible for the acts or omissions of Contractor or of any Subcontractor, any Supplier, or of any other individual or entity performing any of the Work.

D. Engineer's review of the final Application for Payment and accompanying documentation and all maintenance and operating instructions, schedules, guarantees, bonds, certificates of inspection, tests and approvals, and other documentation required to be delivered by Paragraph 15.06.A will only be to determine generally that their content complies with the requirements of, and in the case of certificates of inspections, tests, and approvals, that the results certified indicate compliance with the Contract Documents.

E. The limitations upon authority and responsibility set forth in this Paragraph 10.08 shall also apply to the Resident Project Representative, if any.

10.09 *Compliance with Safety Program*

A. While at the Site, Engineer's employees and representatives will comply with the specific applicable requirements of Owner's and Contractor's safety programs (if any) of which Engineer has been informed.

ARTICLE 11 – AMENDING THE CONTRACT DOCUMENTS; CHANGES IN THE WORK

11.01 *Amending and Supplementing Contract Documents*

A. The Contract Documents may be amended or supplemented by a Change Order, a Work Change Directive, or a Field Order.

1. *Change Orders*:

a. If an amendment or supplement to the Contract Documents includes a change in the Contract Price or the Contract Times, such amendment or supplement must be set forth in a Change Order. A Change Order also may be used to establish amendments and supplements of the Contract Documents that do not affect the Contract Price or Contract Times.

b. Owner and Contractor may amend those terms and conditions of the Contract Documents that do not involve (1) the performance or acceptability of the Work, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, without the recommendation of the Engineer. Such an amendment shall be set forth in a Change Order.

2. *Work Change Directives*: A Work Change Directive will not change the Contract Price or the Contract Times but is evidence that the parties expect that the modification ordered or documented by a Work Change Directive will be incorporated in a subsequently issued Change Order, following negotiations by the parties as to the Work Change Directive's effect, if any, on the Contract Price and Contract Times; or, if negotiations are unsuccessful, by a determination under the terms of the Contract Documents governing adjustments, expressly including Paragraph 11.04 regarding change of Contract Price. Contractor must submit any Change Proposal seeking an

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

adjustment of the Contract Price or the Contract Times, or both, no later than 30 days after the completion of the Work set out in the Work Change Directive. Owner must submit any Claim seeking an adjustment of the Contract Price or the Contract Times, or both, no later than 60 days after issuance of the Work Change Directive.

3. *Field Orders*: Engineer may authorize minor changes in the Work if the changes do not involve an adjustment in the Contract Price or the Contract Times and are compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents. Such changes will be accomplished by a Field Order and will be binding on Owner and also on Contractor, which shall perform the Work involved promptly. If Contractor believes that a Field Order justifies an adjustment in the Contract Price or Contract Times, or both, then before proceeding with the Work at issue, Contractor shall submit a Change Proposal as provided herein.

11.02 *Owner-Authorized Changes in the Work*

A. Without invalidating the Contract and without notice to any surety, Owner may, at any time or from time to time, order additions, deletions, or revisions in the Work. Such changes shall be supported by Engineer's recommendation, to the extent the change involves the design (as set forth in the Drawings, Specifications, or otherwise), or other engineering or technical matters. Such changes may be accomplished by a Change Order, if Owner and Contractor have agreed as to the effect, if any, of the changes on Contract Times or Contract Price; or by a Work Change Directive. Upon receipt of any such document, Contractor shall promptly proceed with the Work involved; or, in the case of a deletion in the Work, promptly cease construction activities with respect to such deleted Work. Added or revised Work shall be performed under the applicable conditions of the Contract Documents. Nothing in this paragraph shall obligate Contractor to undertake work that Contractor reasonably concludes cannot be performed in a manner consistent with Contractor's safety obligations under the Contract Documents or Laws and Regulations.

11.03 *Unauthorized Changes in the Work*

A. Contractor shall not be entitled to an increase in the Contract Price or an extension of the Contract Times with respect to any work performed that is not required by the Contract Documents, as amended, modified, or supplemented, except in the case of an emergency as provided in Paragraph 7.15 or in the case of uncovering Work as provided in Paragraph 14.05.

11.04 *Change of Contract Price*

A. The Contract Price may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Price shall comply with the provisions of Paragraph 11.06. Any Claim for an adjustment of Contract Price shall comply with the provisions of Article 12.

B. An adjustment in the Contract Price will be determined as follows:

1. where the Work involved is covered by unit prices contained in the Contract Documents, then by application of such unit prices to the quantities of the items involved (subject to the provisions of Paragraph 13.03); or

2. where the Work involved is not covered by unit prices contained in the Contract Documents, then by a mutually agreed lump sum (which may include an allowance for overhead and profit not necessarily in accordance with Paragraph 11.04.C.2); or

3. where the Work involved is not covered by unit prices contained in the Contract Documents and the parties do not reach mutual agreement to a lump sum, then on

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

the basis of the Cost of the Work (determined as provided in Paragraph 13.01) plus a Contractor's fee for overhead and profit (determined as provided in Paragraph 11.04.C).

C. *Contractor's Fee*: When applicable, the Contractor's fee for overhead and profit shall be determined as follows:

1. a mutually acceptable fixed fee; or

2. if a fixed fee is not agreed upon, then a fee based on the following percentages of the various portions of the Cost of the Work:

a. for costs incurred under Paragraphs 13.01.B.1 and 13.01.B.2, the Contractor's fee shall be 15 percent;

b. for costs incurred under Paragraph 13.01.B.3, the Contractor's fee shall be five percent;

c. where one or more tiers of subcontracts are on the basis of Cost of the Work plus a fee and no fixed fee is agreed upon, the intent of Paragraphs 11.04.C.2.a and 11.04.C.2.b is that the Contractor's fee shall be based on: (1) a fee of 15 percent of the costs incurred under Paragraphs 13.01.A.1 and 13.01.A.2 by the Subcontractor that actually performs the Work, at whatever tier, and (2) with respect to Contractor itself and to any Subcontractors of a tier higher than that of the Subcontractor that actually performs the Work, a fee of five percent of the amount (fee plus underlying costs incurred) attributable to the next lower tier Subcontractor; provided, however, that for any such subcontracted work the maximum total fee to be paid by Owner shall be no greater than 27 percent of the costs incurred by the Subcontractor that actually performs the work;

d. no fee shall be payable on the basis of costs itemized under Paragraphs 13.01.B.4, 13.01.B.5, and 13.01.C;

e. the amount of credit to be allowed by Contractor to Owner for any change which results in a net decrease in cost will be the amount of the actual net decrease in cost plus a deduction in Contractor's fee by an amount equal to five percent of such net decrease; and

f. when both additions and credits are involved in any one change, the adjustment in Contractor's fee shall be computed on the basis of the net change in accordance with Paragraphs 11.04.C.2.a through 11.04.C.2.e, inclusive.

11.05 *Change of Contract Times*

A. The Contract Times may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Times shall comply with the provisions of Paragraph 11.06. Any Claim for an adjustment in the Contract Times shall comply with the provisions of Article 12.

B. An adjustment of the Contract Times shall be subject to the limitations set forth in Paragraph 4.05, concerning delays in Contractor's progress.

11.06 *Change Proposals*

A. Contractor shall submit a Change Proposal to Engineer to request an adjustment in the Contract Times or Contract Price; appeal an initial decision by Engineer concerning the requirements of the Contract Documents or relating to the acceptability of the Work under the Contract Documents; contest a set-off against payment due; or seek other relief under

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

the Contract. The Change Proposal shall specify any proposed change in Contract Times or Contract Price, or both, or other proposed relief, and explain the reason for the proposed change, with citations to any governing or applicable provisions of the Contract Documents.

1. *Procedures*: Contractor shall submit each Change Proposal to Engineer promptly (but in no event later than 30 days) after the start of the event giving rise thereto, or after such initial decision. The Contractor shall submit supporting data, including the proposed change in Contract Price or Contract Time (if any), to the Engineer and Owner within 15 days after the submittal of the Change Proposal. The supporting data shall be accompanied by a written statement that the supporting data are accurate and complete, and that any requested time or price adjustment is the entire adjustment to which Contractor believes it is entitled as a result of said event. Engineer will advise Owner regarding the Change Proposal, and consider any comments or response from Owner regarding the Change Proposal.

2. *Engineer's Action*: Engineer will review each Change Proposal and, within 30 days after receipt of the Contractor's supporting data, either deny the Change Proposal in whole, approve it in whole, or deny it in part and approve it in part. Such actions shall be in writing, with a copy provided to Owner and Contractor. If Engineer does not take action on the Change Proposal within 30 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of Engineer's inaction the Change Proposal is deemed denied, thereby commencing the time for appeal of the denial under Article 12.

3. *Binding Decision*: Engineer's decision will be final and binding upon Owner and Contractor, unless Owner or Contractor appeals the decision by filing a Claim under Article 12.

B. *Resolution of Certain Change Proposals*: If the Change Proposal does not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters, then Engineer will notify the parties that the Engineer is unable to resolve the Change Proposal. For purposes of further resolution of such a Change Proposal, such notice shall be deemed a denial, and Contractor may choose to seek resolution under the terms of Article 12.

11.07 *Execution of Change Orders*

A. Owner and Contractor shall execute appropriate Change Orders covering:

1. changes in the Contract Price or Contract Times which are agreed to by the parties, including any undisputed sum or amount of time for Work actually performed in accordance with a Work Change Directive;

2. changes in Contract Price resulting from an Owner set-off, unless Contractor has duly contested such set-off;

3. changes in the Work which are: (a) ordered by Owner pursuant to Paragraph 11.02, (b) required because of Owner's acceptance of defective Work under Paragraph 14.04 or Owner's correction of defective Work under Paragraph 14.07, or (c) agreed to by the parties, subject to the need for Engineer's recommendation if the change in the Work involves the design (as set forth in the Drawings, Specifications, or otherwise), or other engineering or technical matters; and

4. changes in the Contract Price or Contract Times, or other changes, which embody the substance of any final and binding results under Paragraph 11.06, or Article 12.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If Owner or Contractor refuses to execute a Change Order that is required to be executed under the terms of this Paragraph 11.07, it shall be deemed to be of full force and effect, as if fully executed.

11.08 *Notification to Surety*

A. If the provisions of any bond require notice to be given to a surety of any change affecting the general scope of the Work or the provisions of the Contract Documents (including, but not limited to, Contract Price or Contract Times), the giving of any such notice will be Contractor's responsibility. The amount of each applicable bond will be adjusted to reflect the effect of any such change.

ARTICLE 12 – CLAIMS

12.01 *Claims*

A. *Claims Process*: The following disputes between Owner and Contractor shall be submitted to the Claims process set forth in this Article:

1. Appeals by Owner or Contractor of Engineer's decisions regarding Change Proposals;

2. Owner demands for adjustments in the Contract Price or Contract Times, or other relief under the Contract Documents; and

3. Disputes that Engineer has been unable to address because they do not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters.

B. *Submittal of Claim*: The party submitting a Claim shall deliver it directly to the other party to the Contract promptly (but in no event later than 30 days) after the start of the event giving rise thereto; in the case of appeals regarding Change Proposals within 30 days of the decision under appeal. The party submitting the Claim shall also furnish a copy to the Engineer, for its information only. The responsibility to substantiate a Claim shall rest with the party making the Claim. In the case of a Claim by Contractor seeking an increase in the Contract Times or Contract Price, or both, Contractor shall certify that the Claim is made in good faith, that the supporting data are accurate and complete, and that to the best of Contractor's knowledge and belief the amount of time or money requested accurately reflects the full amount to which Contractor is entitled.

C. *Review and Resolution*: The party receiving a Claim shall review it thoroughly, giving full consideration to its merits. The two parties shall seek to resolve the Claim through the exchange of information and direct negotiations. The parties may extend the time for resolving the Claim by mutual agreement. All actions taken on a Claim shall be stated in writing and submitted to the other party, with a copy to Engineer.

D. *Mediation*:

1. At any time after initiation of a Claim, Owner and Contractor may mutually agree to mediation of the underlying dispute. The agreement to mediate shall stay the Claim submittal and response process.

2. If Owner and Contractor agree to mediation, then after 60 days from such agreement, either Owner or Contractor may unilaterally terminate the mediation process, and the Claim submittal and decision process shall resume as of the date of the termination. If the mediation proceeds but is unsuccessful in resolving the dispute, the Claim

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

submittal and decision process shall resume as of the date of the conclusion of the mediation, as determined by the mediator.

3. Owner and Contractor shall each pay one-half of the mediator's fees and costs.

E. *Partial Approval*: If the party receiving a Claim approves the Claim in part and denies it in part, such action shall be final and binding unless within 30 days of such action the other party invokes the procedure set forth in Article 17 for final resolution of disputes.

F. *Denial of Claim*: If efforts to resolve a Claim are not successful, the party receiving the Claim may deny it by giving written notice of denial to the other party. If the receiving party does not take action on the Claim within 90 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of the inaction, the Claim is deemed denied, thereby commencing the time for appeal of the denial. A denial of the Claim shall be final and binding unless within 30 days of the denial the other party invokes the procedure set forth in Article 17 for the final resolution of disputes.

G. *Final and Binding Results*: If the parties reach a mutual agreement regarding a Claim, whether through approval of the Claim, direct negotiations, mediation, or otherwise; or if a Claim is approved in part and denied in part, or denied in full, and such actions become final and binding; then the results of the agreement or action on the Claim shall be incorporated in a Change Order to the extent they affect the Contract, including the Work, the Contract Times, or the Contract Price.

ARTICLE 13 – COST OF THE WORK; ALLOWANCES; UNIT PRICE WORK

13.01 *Cost of the Work*

A. *Purposes for Determination of Cost of the Work*: The term Cost of the Work means the sum of all costs necessary for the proper performance of the Work at issue, as further defined below. The provisions of this Paragraph 13.01 are used for two distinct purposes:

1. To determine Cost of the Work when Cost of the Work is a component of the Contract Price, under cost-plus-fee, time-and-materials, or other cost-based terms; or

2. To determine the value of a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price. When the value of any such adjustment is determined on the basis of Cost of the Work, Contractor is entitled only to those additional or incremental costs required because of the change in the Work or because of the event giving rise to the adjustment.

B. *Costs Included*: Except as otherwise may be agreed to in writing by Owner, costs included in the Cost of the Work shall be in amounts no higher than those prevailing in the locality of the Project, shall not include any of the costs itemized in Paragraph 13.01.C, and shall include only the following items:

1. Payroll costs for employees in the direct employ of Contractor in the performance of the Work under schedules of job classifications agreed upon by Owner and Contractor. Such employees shall include, without limitation, superintendents, foremen, and other personnel employed full time on the Work. Payroll costs for employees not employed full time on the Work shall be apportioned on the basis of their time spent on the Work. Payroll costs shall include, but not be limited to, salaries and wages plus the cost of fringe benefits, which shall include social security contributions, unemployment, excise, and payroll taxes, workers' compensation, health and retirement benefits, bonuses, sick leave, and vacation and holiday pay applicable

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

thereto. The expenses of performing Work outside of regular working hours, on Saturday, Sunday, or legal holidays, shall be included in the above to the extent authorized by Owner.

2. Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and Suppliers' field services required in connection therewith. All cash discounts shall accrue to Contractor unless Owner deposits funds with Contractor with which to make payments, in which case the cash discounts shall accrue to Owner. All trade discounts, rebates, and refunds and returns from sale of surplus materials and equipment shall accrue to Owner, and Contractor shall make provisions so that they may be obtained.

3. Payments made by Contractor to Subcontractors for Work performed by Subcontractors. If required by Owner, Contractor shall obtain competitive bids from subcontractors acceptable to Owner and Contractor and shall deliver such bids to Owner, who will then determine, with the advice of Engineer, which bids, if any, will be acceptable. If any subcontract provides that the Subcontractor is to be paid on the basis of Cost of the Work plus a fee, the Subcontractor's Cost of the Work and fee shall be determined in the same manner as Contractor's Cost of the Work and fee as provided in this Paragraph 13.01.

4. Costs of special consultants (including but not limited to engineers, architects, testing laboratories, surveyors, attorneys, and accountants) employed for services specifically related to the Work.

5. Supplemental costs including the following:

    a. The proportion of necessary transportation, travel, and subsistence expenses of Contractor's employees incurred in discharge of duties connected with the Work.

    b. Cost, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office, and temporary facilities at the Site, and hand tools not owned by the workers, which are consumed in the performance of the Work, and cost, less market value, of such items used but not consumed which remain the property of Contractor.

    c. Rentals of all construction equipment and machinery, and the parts thereof, whether rented from Contractor or others in accordance with rental agreements approved by Owner with the advice of Engineer, and the costs of transportation, loading, unloading, assembly, dismantling, and removal thereof. All such costs shall be in accordance with the terms of said rental agreements. The rental of any such equipment, machinery, or parts shall cease when the use thereof is no longer necessary for the Work.

    d. Sales, consumer, use, and other similar taxes related to the Work, and for which Contractor is liable, as imposed by Laws and Regulations.

    e. Deposits lost for causes other than negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, and royalty payments and fees for permits and licenses.

    f. Losses and damages (and related expenses) caused by damage to the Work, not compensated by insurance or otherwise, sustained by Contractor in connection with the performance of the Work (except losses and damages within the deductible amounts of property insurance established in accordance with Paragraph 6.05), provided such losses and damages have resulted from causes

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

other than the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable. Such losses shall include settlements made with the written consent and approval of Owner. No such losses, damages, and expenses shall be included in the Cost of the Work for the purpose of determining Contractor's fee.

g. The cost of utilities, fuel, and sanitary facilities at the Site.

h. Minor expenses such as communication service at the Site, express and courier services, and similar petty cash items in connection with the Work.

i. The costs of premiums for all bonds and insurance that Contractor is required by the Contract Documents to purchase and maintain.

C. *Costs Excluded*: The term Cost of the Work shall not include any of the following items:

1. Payroll costs and other compensation of Contractor's officers, executives, principals (of partnerships and sole proprietorships), general managers, safety managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expediters, timekeepers, clerks, and other personnel employed by Contractor, whether at the Site or in Contractor's principal or branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications referred to in Paragraph 13.01.B.1 or specifically covered by Paragraph 13.01.B.4. The payroll costs and other compensation excluded here are to be considered administrative costs covered by the Contractor's fee.

2. Expenses of Contractor's principal and branch offices other than Contractor's office at the Site.

3. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.

4. Costs due to the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including but not limited to, the correction of defective Work, disposal of materials or equipment wrongly supplied, and making good any damage to property.

5. Other overhead or general expense costs of any kind and the costs of any item not specifically and expressly included in Paragraph 13.01.B.

D. *Contractor's Fee*: When the Work as a whole is performed on the basis of cost-plus, Contractor's fee shall be determined as set forth in the Agreement. When the value of any Work covered by a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price is determined on the basis of Cost of the Work, Contractor's fee shall be determined as set forth in Paragraph 11.04.C.

E. *Documentation*: Whenever the Cost of the Work for any purpose is to be determined pursuant to this Article 13, Contractor will establish and maintain records thereof in accordance with generally accepted accounting practices and submit in a form acceptable to Engineer an itemized cost breakdown together with supporting data.

13.02 *Allowances*

A. It is understood that Contractor has included in the Contract Price all allowances so named in the Contract Documents and shall cause the Work so covered to be performed for such sums and by such persons or entities as may be acceptable to Owner and Engineer.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. *Cash Allowances*: Contractor agrees that:

1. the cash allowances include the cost to Contractor (less any applicable trade discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes; and

2. Contractor's costs for unloading and handling on the Site, labor, installation, overhead, profit, and other expenses contemplated for the cash allowances have been included in the Contract Price and not in the allowances, and no demand for additional payment on account of any of the foregoing will be valid.

C. *Contingency Allowance*: Contractor agrees that a contingency allowance, if any, is for the sole use of Owner to cover unanticipated costs.

D. Prior to final payment, an appropriate Change Order will be issued as recommended by Engineer to reflect actual amounts due Contractor on account of Work covered by allowances, and the Contract Price shall be correspondingly adjusted.

13.03 *Unit Price Work*

A. Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include for all Unit Price Work an amount equal to the sum of the unit price for each separately identified item of Unit Price Work times the estimated quantity of each item as indicated in the Agreement.

B. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Payments to Contractor for Unit Price Work will be based on actual quantities.

C. Each unit price will be deemed to include an amount considered by Contractor to be adequate to cover Contractor's overhead and profit for each separately identified item.

D. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor. Engineer will review with Contractor the Engineer's preliminary determinations on such matters before rendering a written decision thereon (by recommendation of an Application for Payment or otherwise). Engineer's written decision thereon will be final and binding (except as modified by Engineer to reflect changed factual conditions or more accurate data) upon Owner and Contractor, subject to the provisions of the following paragraph.

E. Within 30 days of Engineer's written decision under the preceding paragraph, Contractor may submit a Change Proposal, or Owner may file a Claim, seeking an adjustment in the Contract Price if:

1. the quantity of any item of Unit Price Work performed by Contractor differs materially and significantly from the estimated quantity of such item indicated in the Agreement;

2. there is no corresponding adjustment with respect to any other item of Work; and

3. Contractor believes that it is entitled to an increase in Contract Price as a result of having incurred additional expense or Owner believes that Owner is entitled to a decrease in Contract Price, and the parties are unable to agree as to the amount of any such increase or decrease.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 14 – TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

14.01 *Access to Work*

A. Owner, Engineer, their consultants and other representatives and personnel of Owner, independent testing laboratories, and authorities having jurisdiction will have access to the Site and the Work at reasonable times for their observation, inspection, and testing. Contractor shall provide them proper and safe conditions for such access and advise them of Contractor's safety procedures and programs so that they may comply therewith as applicable.

14.02 *Tests, Inspections, and Approvals*

A. Contractor shall give Engineer timely notice of readiness of the Work (or specific parts thereof) for all required inspections and tests, and shall cooperate with inspection and testing personnel to facilitate required inspections and tests.

B. Owner shall retain and pay for the services of an independent inspector, testing laboratory, or other qualified individual or entity to perform all inspections and tests expressly required by the Contract Documents to be furnished and paid for by Owner, except that costs incurred in connection with tests or inspections of covered Work shall be governed by the provisions of Paragraph 14.05.

C. If Laws or Regulations of any public body having jurisdiction require any Work (or part thereof) specifically to be inspected, tested, or approved by an employee or other representative of such public body, Contractor shall assume full responsibility for arranging and obtaining such inspections, tests, or approvals, pay all costs in connection therewith, and furnish Engineer the required certificates of inspection or approval.

D. Contractor shall be responsible for arranging, obtaining, and paying for all inspections and tests required:

1. by the Contract Documents, unless the Contract Documents expressly allocate responsibility for a specific inspection or test to Owner;

2. to attain Owner's and Engineer's acceptance of materials or equipment to be incorporated in the Work;

3. by manufacturers of equipment furnished under the Contract Documents;

4. for testing, adjusting, and balancing of mechanical, electrical, and other equipment to be incorporated into the Work; and

5. for acceptance of materials, mix designs, or equipment submitted for approval prior to Contractor's purchase thereof for incorporation in the Work.

Such inspections and tests shall be performed by independent inspectors, testing laboratories, or other qualified individuals or entities acceptable to Owner and Engineer.

E. If the Contract Documents require the Work (or part thereof) to be approved by Owner, Engineer, or another designated individual or entity, then Contractor shall assume full responsibility for arranging and obtaining such approvals.

F. If any Work (or the work of others) that is to be inspected, tested, or approved is covered by Contractor without written concurrence of Engineer, Contractor shall, if requested by Engineer, uncover such Work for observation. Such uncovering shall be at Contractor's expense unless Contractor had given Engineer timely notice of Contractor's intention to

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

cover the same and Engineer had not acted with reasonable promptness in response to such notice.

14.03 *Defective Work*

A. *Contractor's Obligation*: It is Contractor's obligation to assure that the Work is not defective.

B. *Engineer's Authority*: Engineer has the authority to determine whether Work is defective, and to reject defective Work.

C. *Notice of Defects*: Prompt notice of all defective Work of which Owner or Engineer has actual knowledge will be given to Contractor.

D. *Correction, or Removal and Replacement*: Promptly after receipt of written notice of defective Work, Contractor shall correct all such defective Work, whether or not fabricated, installed, or completed, or, if Engineer has rejected the defective Work, remove it from the Project and replace it with Work that is not defective.

E. *Preservation of Warranties*: When correcting defective Work, Contractor shall take no action that would void or otherwise impair Owner's special warranty and guarantee, if any, on said Work.

F. *Costs and Damages*: In addition to its correction, removal, and replacement obligations with respect to defective Work, Contractor shall pay all claims, costs, losses, and damages arising out of or relating to defective Work, including but not limited to the cost of the inspection, testing, correction, removal, replacement, or reconstruction of such defective Work, fines levied against Owner by governmental authorities because the Work is defective, and the costs of repair or replacement of work of others resulting from defective Work. Prior to final payment, if Owner and Contractor are unable to agree as to the measure of such claims, costs, losses, and damages resulting from defective Work, then Owner may impose a reasonable set-off against payments due under Article 15.

14.04 *Acceptance of Defective Work*

A. If, instead of requiring correction or removal and replacement of defective Work, Owner prefers to accept it, Owner may do so (subject, if such acceptance occurs prior to final payment, to Engineer's confirmation that such acceptance is in general accord with the design intent and applicable engineering principles, and will not endanger public safety). Contractor shall pay all claims, costs, losses, and damages attributable to Owner's evaluation of and determination to accept such defective Work (such costs to be approved by Engineer as to reasonableness), and for the diminished value of the Work to the extent not otherwise paid by Contractor. If any such acceptance occurs prior to final payment, the necessary revisions in the Contract Documents with respect to the Work shall be incorporated in a Change Order. If the parties are unable to agree as to the decrease in the Contract Price, reflecting the diminished value of Work so accepted, then Owner may impose a reasonable set-off against payments due under Article 15. If the acceptance of defective Work occurs after final payment, Contractor shall pay an appropriate amount to Owner.

14.05 *Uncovering Work*

A. Engineer has the authority to require additional inspection or testing of the Work, whether or not the Work is fabricated, installed, or completed.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If any Work is covered contrary to the written request of Engineer, then Contractor shall, if requested by Engineer, uncover such Work for Engineer's observation, and then replace the covering, all at Contractor's expense.

C. If Engineer considers it necessary or advisable that covered Work be observed by Engineer or inspected or tested by others, then Contractor, at Engineer's request, shall uncover, expose, or otherwise make available for observation, inspection, or testing as Engineer may require, that portion of the Work in question, and provide all necessary labor, material, and equipment.

1. If it is found that the uncovered Work is defective, Contractor shall be responsible for all claims, costs, losses, and damages arising out of or relating to such uncovering, exposure, observation, inspection, and testing, and of satisfactory replacement or reconstruction (including but not limited to all costs of repair or replacement of work of others); and pending Contractor's full discharge of this responsibility the Owner shall be entitled to impose a reasonable set-off against payments due under Article 15.

2. If the uncovered Work is not found to be defective, Contractor shall be allowed an increase in the Contract Price or an extension of the Contract Times, or both, directly attributable to such uncovering, exposure, observation, inspection, testing, replacement, and reconstruction. If the parties are unable to agree as to the amount or extent thereof, then Contractor may submit a Change Proposal within 30 days of the determination that the Work is not defective.

14.06 *Owner May Stop the Work*

A. If the Work is defective, or Contractor fails to supply sufficient skilled workers or suitable materials or equipment, or fails to perform the Work in such a way that the completed Work will conform to the Contract Documents, then Owner may order Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, this right of Owner to stop the Work shall not give rise to any duty on the part of Owner to exercise this right for the benefit of Contractor, any Subcontractor, any Supplier, any other individual or entity, or any surety for, or employee or agent of any of them.

14.07 *Owner May Correct Defective Work*

A. If Contractor fails within a reasonable time after written notice from Engineer to correct defective Work, or to remove and replace rejected Work as required by Engineer, or if Contractor fails to perform the Work in accordance with the Contract Documents, or if Contractor fails to comply with any other provision of the Contract Documents, then Owner may, after seven days written notice to Contractor, correct or remedy any such deficiency.

B. In exercising the rights and remedies under this Paragraph 14.07, Owner shall proceed expeditiously. In connection with such corrective or remedial action, Owner may exclude Contractor from all or part of the Site, take possession of all or part of the Work and suspend Contractor's services related thereto, and incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere. Contractor shall allow Owner, Owner's representatives, agents and employees, Owner's other contractors, and Engineer and Engineer's consultants access to the Site to enable Owner to exercise the rights and remedies under this paragraph.

C. All claims, costs, losses, and damages incurred or sustained by Owner in exercising the rights and remedies under this Paragraph 14.07 will be charged against Contractor as set-offs against payments due under Article 15. Such claims, costs, losses and damages will

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of Contractor's defective Work.

D. Contractor shall not be allowed an extension of the Contract Times because of any delay in the performance of the Work attributable to the exercise by Owner of Owner's rights and remedies under this Paragraph 14.07.

ARTICLE 15 – PAYMENTS TO CONTRACTOR; SET-OFFS; COMPLETION; CORRECTION PERIOD

15.01 *Progress Payments*

A. *Basis for Progress Payments*: The Schedule of Values established as provided in Article 2 will serve as the basis for progress payments and will be incorporated into a form of Application for Payment acceptable to Engineer. Progress payments on account of Unit Price Work will be based on the number of units completed during the pay period, as determined under the provisions of Paragraph 13.03. Progress payments for cost-based Work will be based on Cost of the Work completed by Contractor during the pay period.

B. *Applications for Payments*:

1. At least 20 days before the date established in the Agreement for each progress payment (but not more often than once a month), Contractor shall submit to Engineer for review an Application for Payment filled out and signed by Contractor covering the Work completed as of the date of the Application and accompanied by such supporting documentation as is required by the Contract Documents. If payment is requested on the basis of materials and equipment not incorporated in the Work but delivered and suitably stored at the Site or at another location agreed to in writing, the Application for Payment shall also be accompanied by a bill of sale, invoice, or other documentation warranting that Owner has received the materials and equipment free and clear of all Liens, and evidence that the materials and equipment are covered by appropriate property insurance, a warehouse bond, or other arrangements to protect Owner's interest therein, all of which must be satisfactory to Owner.

2. Beginning with the second Application for Payment, each Application shall include an affidavit of Contractor stating that all previous progress payments received on account of the Work have been applied on account to discharge Contractor's legitimate obligations associated with prior Applications for Payment.

3. The amount of retainage with respect to progress payments will be as stipulated in the Agreement.

C. *Review of Applications*:

1. Engineer will, within 10 days after receipt of each Application for Payment, including each resubmittal, either indicate in writing a recommendation of payment and present the Application to Owner, or return the Application to Contractor indicating in writing Engineer's reasons for refusing to recommend payment. In the latter case, Contractor may make the necessary corrections and resubmit the Application.

2. Engineer's recommendation of any payment requested in an Application for Payment will constitute a representation by Engineer to Owner, based on Engineer's observations of the executed Work as an experienced and qualified design professional, and on Engineer's review of the Application for Payment and the accompanying data and schedules, that to the best of Engineer's knowledge, information and belief:

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

a. the Work has progressed to the point indicated;

b. the quality of the Work is generally in accordance with the Contract Documents (subject to an evaluation of the Work as a functioning whole prior to or upon Substantial Completion, the results of any subsequent tests called for in the Contract Documents, a final determination of quantities and classifications for Unit Price Work under Paragraph 13.03, and any other qualifications stated in the recommendation); and

c. the conditions precedent to Contractor's being entitled to such payment appear to have been fulfilled in so far as it is Engineer's responsibility to observe the Work.

3. By recommending any such payment Engineer will not thereby be deemed to have represented that:

a. inspections made to check the quality or the quantity of the Work as it has been performed have been exhaustive, extended to every aspect of the Work in progress, or involved detailed inspections of the Work beyond the responsibilities specifically assigned to Engineer in the Contract; or

b. there may not be other matters or issues between the parties that might entitle Contractor to be paid additionally by Owner or entitle Owner to withhold payment to Contractor.

4. Neither Engineer's review of Contractor's Work for the purposes of recommending payments nor Engineer's recommendation of any payment, including final payment, will impose responsibility on Engineer:

a. to supervise, direct, or control the Work, or

b. for the means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or

c. for Contractor's failure to comply with Laws and Regulations applicable to Contractor's performance of the Work, or

d. to make any examination to ascertain how or for what purposes Contractor has used the money paid on account of the Contract Price, or

e. to determine that title to any of the Work, materials, or equipment has passed to Owner free and clear of any Liens.

5. Engineer may refuse to recommend the whole or any part of any payment if, in Engineer's opinion, it would be incorrect to make the representations to Owner stated in Paragraph 15.01.C.2.

6. Engineer will recommend reductions in payment (set-offs) necessary in Engineer's opinion to protect Owner from loss because:

a. the Work is defective, requiring correction or replacement;

b. the Contract Price has been reduced by Change Orders;

c. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible; or

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

e. Engineer has actual knowledge of the occurrence of any of the events that would constitute a default by Contractor and therefore justify termination for cause under the Contract Documents.

D. *Payment Becomes Due*:

1. Ten days after presentation of the Application for Payment to Owner with Engineer's recommendation, the amount recommended (subject to any Owner set-offs) will become due, and when due will be paid by Owner to Contractor.

E. *Reductions in Payment by Owner*:

1. In addition to any reductions in payment (set-offs) recommended by Engineer, Owner is entitled to impose a set-off against payment based on any of the following:

a. claims have been made against Owner on account of Contractor's conduct in the performance or furnishing of the Work, or Owner has incurred costs, losses, or damages on account of Contractor's conduct in the performance or furnishing of the Work, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, non-compliance with Laws and Regulations, and patent infringement;

b. Contractor has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with other work at or adjacent to the Site;

c. Contractor has failed to provide and maintain required bonds or insurance;

d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. Owner has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. the Work is defective, requiring correction or replacement;

g. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

h. the Contract Price has been reduced by Change Orders;

i. an event that would constitute a default by Contractor and therefore justify a termination for cause has occurred;

j. liquidated damages have accrued as a result of Contractor's failure to achieve Milestones, Substantial Completion, or final completion of the Work;

k. Liens have been filed in connection with the Work, except where Contractor has delivered a specific bond satisfactory to Owner to secure the satisfaction and discharge of such Liens;

l. there are other items entitling Owner to a set off against the amount recommended.

2. If Owner imposes any set-off against payment, whether based on its own knowledge or on the written recommendations of Engineer, Owner will give Contractor immediate written notice (with a copy to Engineer) stating the reasons for such action and the specific amount of the reduction, and promptly pay Contractor any amount

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

remaining after deduction of the amount so withheld. Owner shall promptly pay Contractor the amount so withheld, or any adjustment thereto agreed to by Owner and Contractor, if Contractor remedies the reasons for such action. The reduction imposed shall be binding on Contractor unless it duly submits a Change Proposal contesting the reduction.

3. Upon a subsequent determination that Owner's refusal of payment was not justified, the amount wrongfully withheld shall be treated as an amount due as determined by Paragraph 15.01.C.1 and subject to interest as provided in the Agreement.

15.02 *Contractor's Warranty of Title*

A. Contractor warrants and guarantees that title to all Work, materials, and equipment furnished under the Contract will pass to Owner free and clear of (1) all Liens and other title defects, and (2) all patent, licensing, copyright, or royalty obligations, no later than seven days after the time of payment by Owner.

15.03 *Substantial Completion*

A. When Contractor considers the entire Work ready for its intended use Contractor shall notify Owner and Engineer in writing that the entire Work is substantially complete and request that Engineer issue a certificate of Substantial Completion. Contractor shall at the same time submit to Owner and Engineer an initial draft of punch list items to be completed or corrected before final payment.

B. Promptly after Contractor's notification, Owner, Contractor, and Engineer shall make an inspection of the Work to determine the status of completion. If Engineer does not consider the Work substantially complete, Engineer will notify Contractor in writing giving the reasons therefor.

C. If Engineer considers the Work substantially complete, Engineer will deliver to Owner a preliminary certificate of Substantial Completion which shall fix the date of Substantial Completion. Engineer shall attach to the certificate a punch list of items to be completed or corrected before final payment. Owner shall have seven days after receipt of the preliminary certificate during which to make written objection to Engineer as to any provisions of the certificate or attached punch list. If, after considering the objections to the provisions of the preliminary certificate, Engineer concludes that the Work is not substantially complete, Engineer will, within 14 days after submission of the preliminary certificate to Owner, notify Contractor in writing that the Work is not substantially complete, stating the reasons therefor. If Owner does not object to the provisions of the certificate, or if despite consideration of Owner's objections Engineer concludes that the Work is substantially complete, then Engineer will, within said 14 days, execute and deliver to Owner and Contractor a final certificate of Substantial Completion (with a revised punch list of items to be completed or corrected) reflecting such changes from the preliminary certificate as Engineer believes justified after consideration of any objections from Owner.

D. At the time of receipt of the preliminary certificate of Substantial Completion, Owner and Contractor will confer regarding Owner's use or occupancy of the Work following Substantial Completion, review the builder's risk insurance policy with respect to the end of the builder's risk coverage, and confirm the transition to coverage of the Work under a permanent property insurance policy held by Owner. Unless Owner and Contractor agree otherwise in writing, Owner shall bear responsibility for security, operation, protection of the Work, property insurance, maintenance, heat, and utilities upon Owner's use or occupancy of the Work.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. After Substantial Completion the Contractor shall promptly begin work on the punch list of items to be completed or corrected prior to final payment. In appropriate cases Contractor may submit monthly Applications for Payment for completed punch list items, following the progress payment procedures set forth above.

F. Owner shall have the right to exclude Contractor from the Site after the date of Substantial Completion subject to allowing Contractor reasonable access to remove its property and complete or correct items on the punch list.

15.04 *Partial Use or Occupancy*

A. Prior to Substantial Completion of all the Work, Owner may use or occupy any substantially completed part of the Work which has specifically been identified in the Contract Documents, or which Owner, Engineer, and Contractor agree constitutes a separately functioning and usable part of the Work that can be used by Owner for its intended purpose without significant interference with Contractor's performance of the remainder of the Work, subject to the following conditions:

1. At any time Owner may request in writing that Contractor permit Owner to use or occupy any such part of the Work that Owner believes to be substantially complete. If and when Contractor agrees that such part of the Work is substantially complete, Contractor, Owner, and Engineer will follow the procedures of Paragraph 15.03.A through E for that part of the Work.

2. At any time Contractor may notify Owner and Engineer in writing that Contractor considers any such part of the Work substantially complete and request Engineer to issue a certificate of Substantial Completion for that part of the Work.

3. Within a reasonable time after either such request, Owner, Contractor, and Engineer shall make an inspection of that part of the Work to determine its status of completion. If Engineer does not consider that part of the Work to be substantially complete, Engineer will notify Owner and Contractor in writing giving the reasons therefor. If Engineer considers that part of the Work to be substantially complete, the provisions of Paragraph 15.03 will apply with respect to certification of Substantial Completion of that part of the Work and the division of responsibility in respect thereof and access thereto.

4. No use or occupancy or separate operation of part of the Work may occur prior to compliance with the requirements of Paragraph 6.05 regarding builder's risk or other property insurance.

15.05 *Final Inspection*

A. Upon written notice from Contractor that the entire Work or an agreed portion thereof is complete, Engineer will promptly make a final inspection with Owner and Contractor and will notify Contractor in writing of all particulars in which this inspection reveals that the Work, or agreed portion thereof, is incomplete or defective. Contractor shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

15.06 *Final Payment*

A. *Application for Payment*:

1. After Contractor has, in the opinion of Engineer, satisfactorily completed all corrections identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, bonds, certificates or other evidence of insurance, certificates of

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

inspection, annotated record documents (as provided in Paragraph 7.11), and other documents, Contractor may make application for final payment.

2. The final Application for Payment shall be accompanied (except as previously delivered) by:

   a. all documentation called for in the Contract Documents;

   b. consent of the surety, if any, to final payment;

   c. satisfactory evidence that all title issues have been resolved such that title to all Work, materials, and equipment has passed to Owner free and clear of any Liens or other title defects, or will so pass upon final payment.

   d. a list of all disputes that Contractor believes are unsettled; and

   e. complete and legally effective releases or waivers (satisfactory to Owner) of all Lien rights arising out of the Work, and of Liens filed in connection with the Work.

3. In lieu of the releases or waivers of Liens specified in Paragraph 15.06.A.2 and as approved by Owner, Contractor may furnish receipts or releases in full and an affidavit of Contractor that: (a) the releases and receipts include all labor, services, material, and equipment for which a Lien could be filed; and (b) all payrolls, material and equipment bills, and other indebtedness connected with the Work for which Owner might in any way be responsible, or which might in any way result in liens or other burdens on Owner's property, have been paid or otherwise satisfied. If any Subcontractor or Supplier fails to furnish such a release or receipt in full, Contractor may furnish a bond or other collateral satisfactory to Owner to indemnify Owner against any Lien, or Owner at its option may issue joint checks payable to Contractor and specified Subcontractors and Suppliers.

B. *Engineer's Review of Application and Acceptance*:

1. If, on the basis of Engineer's observation of the Work during construction and final inspection, and Engineer's review of the final Application for Payment and accompanying documentation as required by the Contract Documents, Engineer is satisfied that the Work has been completed and Contractor's other obligations under the Contract have been fulfilled, Engineer will, within ten days after receipt of the final Application for Payment, indicate in writing Engineer's recommendation of final payment and present the Application for Payment to Owner for payment. Such recommendation shall account for any set-offs against payment that are necessary in Engineer's opinion to protect Owner from loss for the reasons stated above with respect to progress payments. At the same time Engineer will also give written notice to Owner and Contractor that the Work is acceptable, subject to the provisions of Paragraph 15.07. Otherwise, Engineer will return the Application for Payment to Contractor, indicating in writing the reasons for refusing to recommend final payment, in which case Contractor shall make the necessary corrections and resubmit the Application for Payment.

C. *Completion of Work*: The Work is complete (subject to surviving obligations) when it is ready for final payment as established by the Engineer's written recommendation of final payment.

D. *Payment Becomes Due*: Thirty days after the presentation to Owner of the final Application for Payment and accompanying documentation, the amount recommended by Engineer (less any further sum Owner is entitled to set off against Engineer's recommendation,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

including but not limited to set-offs for liquidated damages and set-offs allowed under the provisions above with respect to progress payments) will become due and shall be paid by Owner to Contractor.

15.07 *Waiver of Claims*

A. The making of final payment will not constitute a waiver by Owner of claims or rights against Contractor. Owner expressly reserves claims and rights arising from unsettled Liens, from defective Work appearing after final inspection pursuant to Paragraph 15.05, from Contractor's failure to comply with the Contract Documents or the terms of any special guarantees specified therein, from outstanding Claims by Owner, or from Contractor's continuing obligations under the Contract Documents.

B. The acceptance of final payment by Contractor will constitute a waiver by Contractor of all claims and rights against Owner other than those pending matters that have been duly submitted or appealed under the provisions of Article 17.

15.08 *Correction Period*

A. If within one year after the date of Substantial Completion (or such longer period of time as may be prescribed by the terms of any applicable special guarantee required by the Contract Documents, or by any specific provision of the Contract Documents), any Work is found to be defective, or if the repair of any damages to the Site, adjacent areas that Contractor has arranged to use through construction easements or otherwise, and other adjacent areas used by Contractor as permitted by Laws and Regulations, is found to be defective, then Contractor shall promptly, without cost to Owner and in accordance with Owner's written instructions:

1. correct the defective repairs to the Site or such other adjacent areas;

2. correct such defective Work;

3. if the defective Work has been rejected by Owner, remove it from the Project and replace it with Work that is not defective, and

4. satisfactorily correct or repair or remove and replace any damage to other Work, to the work of others, or to other land or areas resulting therefrom.

B. If Contractor does not promptly comply with the terms of Owner's written instructions, or in an emergency where delay would cause serious risk of loss or damage, Owner may have the defective Work corrected or repaired or may have the rejected Work removed and replaced. Contractor shall pay all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such correction or repair or such removal and replacement (including but not limited to all costs of repair or replacement of work of others).

C. In special circumstances where a particular item of equipment is placed in continuous service before Substantial Completion of all the Work, the correction period for that item may start to run from an earlier date if so provided in the Specifications.

D. Where defective Work (and damage to other Work resulting therefrom) has been corrected or removed and replaced under this paragraph, the correction period hereunder with respect to such Work will be extended for an additional period of one year after such correction or removal and replacement has been satisfactorily completed.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. Contractor's obligations under this paragraph are in addition to all other obligations and warranties. The provisions of this paragraph shall not be construed as a substitute for, or a waiver of, the provisions of any applicable statute of limitation or repose.

ARTICLE 16 – SUSPENSION OF WORK AND TERMINATION

16.01 *Owner May Suspend Work*

A. At any time and without cause, Owner may suspend the Work or any portion thereof for a period of not more than 90 consecutive days by written notice to Contractor and Engineer. Such notice will fix the date on which Work will be resumed. Contractor shall resume the Work on the date so fixed. Contractor shall be entitled to an adjustment in the Contract Price or an extension of the Contract Times, or both, directly attributable to any such suspension. Any Change Proposal seeking such adjustments shall be submitted no later than 30 days after the date fixed for resumption of Work.

16.02 *Owner May Terminate for Cause*

A. The occurrence of any one or more of the following events will constitute a default by Contractor and justify termination for cause:

1. Contractor's persistent failure to perform the Work in accordance with the Contract Documents (including, but not limited to, failure to supply sufficient skilled workers or suitable materials or equipment or failure to adhere to the Progress Schedule);

2. Failure of Contractor to perform or otherwise to comply with a material term of the Contract Documents;

3. Contractor's disregard of Laws or Regulations of any public body having jurisdiction; or

4. Contractor's repeated disregard of the authority of Owner or Engineer.

B. If one or more of the events identified in Paragraph 16.02.A occurs, then after giving Contractor (and any surety) ten days written notice that Owner is considering a declaration that Contractor is in default and termination of the contract, Owner may proceed to:

1. declare Contractor to be in default, and give Contractor (and any surety) notice that the Contract is terminated; and

2. enforce the rights available to Owner under any applicable performance bond.

C. Subject to the terms and operation of any applicable performance bond, if Owner has terminated the Contract for cause, Owner may exclude Contractor from the Site, take possession of the Work, incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere, and complete the Work as Owner may deem expedient.

D. Owner may not proceed with termination of the Contract under Paragraph 16.02.B if Contractor within seven days of receipt of notice of intent to terminate begins to correct its failure to perform and proceeds diligently to cure such failure.

E. If Owner proceeds as provided in Paragraph 16.02.B, Contractor shall not be entitled to receive any further payment until the Work is completed. If the unpaid balance of the Contract Price exceeds the cost to complete the Work, including all related claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals) sustained by Owner, such excess will be paid to Contractor. If the cost to complete the Work including such related claims, costs, losses,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

and damages exceeds such unpaid balance, Contractor shall pay the difference to Owner. Such claims, costs, losses, and damages incurred by Owner will be reviewed by Engineer as to their reasonableness and, when so approved by Engineer, incorporated in a Change Order. When exercising any rights or remedies under this paragraph, Owner shall not be required to obtain the lowest price for the Work performed.

F. Where Contractor's services have been so terminated by Owner, the termination will not affect any rights or remedies of Owner against Contractor then existing or which may thereafter accrue, or any rights or remedies of Owner against Contractor or any surety under any payment bond or performance bond. Any retention or payment of money due Contractor by Owner will not release Contractor from liability.

G. If and to the extent that Contractor has provided a performance bond under the provisions of Paragraph 6.01.A, the provisions of that bond shall govern over any inconsistent provisions of Paragraphs 16.02.B and 16.02.D.

16.03 *Owner May Terminate For Convenience*

A. Upon seven days written notice to Contractor and Engineer, Owner may, without cause and without prejudice to any other right or remedy of Owner, terminate the Contract. In such case, Contractor shall be paid for (without duplication of any items):

1. completed and acceptable Work executed in accordance with the Contract Documents prior to the effective date of termination, including fair and reasonable sums for overhead and profit on such Work;

2. expenses sustained prior to the effective date of termination in performing services and furnishing labor, materials, or equipment as required by the Contract Documents in connection with uncompleted Work, plus fair and reasonable sums for overhead and profit on such expenses; and

3. other reasonable expenses directly attributable to termination, including costs incurred to prepare a termination for convenience cost proposal.

B. Contractor shall not be paid on account of loss of anticipated overhead, profits, or revenue, or other economic loss arising out of or resulting from such termination.

16.04 *Contractor May Stop Work or Terminate*

A. If, through no act or fault of Contractor, (1) the Work is suspended for more than 90 consecutive days by Owner or under an order of court or other public authority, or (2) Engineer fails to act on any Application for Payment within 30 days after it is submitted, or (3) Owner fails for 30 days to pay Contractor any sum finally determined to be due, then Contractor may, upon seven days written notice to Owner and Engineer, and provided Owner or Engineer do not remedy such suspension or failure within that time, terminate the contract and recover from Owner payment on the same terms as provided in Paragraph 16.03.

B. In lieu of terminating the Contract and without prejudice to any other right or remedy, if Engineer has failed to act on an Application for Payment within 30 days after it is submitted, or Owner has failed for 30 days to pay Contractor any sum finally determined to be due, Contractor may, seven days after written notice to Owner and Engineer, stop the Work until payment is made of all such amounts due Contractor, including interest thereon. The provisions of this paragraph are not intended to preclude Contractor from submitting a Change Proposal for an adjustment in Contract Price or Contract Times or otherwise for

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

expenses or damage directly attributable to Contractor's stopping the Work as permitted by this paragraph.

ARTICLE 17 – FINAL RESOLUTION OF DISPUTES

17.01 *Methods and Procedures*

A. *Disputes Subject to Final Resolution*: The following disputed matters are subject to final resolution under the provisions of this Article:

1. A timely appeal of an approval in part and denial in part of a Claim, or of a denial in full; and

2. Disputes between Owner and Contractor concerning the Work or obligations under the Contract Documents, and arising after final payment has been made.

B. *Final Resolution of Disputes*: For any dispute subject to resolution under this Article, Owner or Contractor may:

1. elect in writing to invoke the dispute resolution process provided for in the Supplementary Conditions; or

2. agree with the other party to submit the dispute to another dispute resolution process; or

3. if no dispute resolution process is provided for in the Supplementary Conditions or mutually agreed to, give written notice to the other party of the intent to submit the dispute to a court of competent jurisdiction.

ARTICLE 18 – MISCELLANEOUS

18.01 *Giving Notice*

A. Whenever any provision of the Contract Documents requires the giving of written notice, it will be deemed to have been validly given if:

1. delivered in person, by a commercial courier service or otherwise, to the individual or to a member of the firm or to an officer of the corporation for which it is intended; or

2. delivered at or sent by registered or certified mail, postage prepaid, to the last business address known to the sender of the notice.

18.02 *Computation of Times*

A. When any period of time is referred to in the Contract by days, it will be computed to exclude the first and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a day made a legal holiday by the law of the applicable jurisdiction, such day will be omitted from the computation.

18.03 *Cumulative Remedies*

A. The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto are in addition to, and are not to be construed in any way as a limitation of, any rights and remedies available to any or all of them which are otherwise imposed or available by Laws or Regulations, by special warranty or guarantee, or by other provisions of the Contract. The provisions of this paragraph will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

18.04 *Limitation of Damages*

A. With respect to any and all Change Proposals, Claims, disputes subject to final resolution, and other matters at issue, neither Owner nor Engineer, nor any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, shall be liable to Contractor for any claims, costs, losses, or damages sustained by Contractor on or in connection with any other project or anticipated project.

18.05 *No Waiver*

A. A party's non-enforcement of any provision shall not constitute a waiver of that provision, nor shall it affect the enforceability of that provision or of the remainder of this Contract.

18.06 *Survival of Obligations*

A. All representations, indemnifications, warranties, and guarantees made in, required by, or given in accordance with the Contract, as well as all continuing obligations indicated in the Contract, will survive final payment, completion, and acceptance of the Work or termination or completion of the Contract or termination of the services of Contractor.

18.07 *Controlling Law*

A. This Contract is to be governed by the law of the state in which the Project is located.

18.08 *Headings*

A. Article and paragraph headings are inserted for convenience only and do not constitute parts of these General Conditions.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

SUPPLEMENTARY CONDITIONS

These Supplementary Conditions amend or supplement the Standard General Conditions of the Construction Contract, EJCDC® C-700 (2013 Edition). All provisions that are not so amended or supplemented remain in full force and effect.

The terms used in these Supplementary Conditions have the meanings stated in the General Conditions. Additional terms used in these Supplementary Conditions have the meanings stated below, which are applicable to both the singular and plural thereof.

The address system used in these Supplementary Conditions is the same as the address system used in the General Conditions, with the prefix "SC" added thereto.

ARTICLE 1 – DEFINITIONS AND TERMINOLOGY

SC-1.01 Defined Terms

SC-1.01. Add to the list of definitions in Paragraph 1.01.A by inserting the following as numbered items in their proper alphabetical positions:

SURETY – The person, firm, or corporation which is bound by the contract bonds with and for Contractor (Principal); and which is held and firmly bound unto Owner for the conditions of obligations set forth in said bonds.

ARTICLE 2 – PRELIMINARY MATTERS

SC-2.01 Delivery of Bonds and Evidence of Insurance

SC-2.01 Delete Paragraphs 2.01 B. in their entirety and insert the following in their place:

B. Evidence of Contractor's Insurance: When Contractor delivers the executed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner copies of the policies of insurance (including all endorsements, and identification of applicable self-insured retentions and deductibles) required to be provided by Contractor in Article 6. Contractor may block out (redact) any confidential premium or pricing information contained in any policy or endorsement furnished under this provision.

SC-2.01 Delete Paragraphs 2.01 C. in its entirety.

SC-2.03 Before Starting Construction

SC-2.03 Amend the second sentence of Paragraph 2.03.A to read as follows:

At the Preconstruction Conference (or as otherwise specifically required by the Contract Documents), Contractor shall submit to Engineer for timely review

ARTICLE 4 – PRELIMINARY MATTERS

SC-4.01 Commencement of Contract Times; Notice to Proceed

SC-4.01 Amend the third sentence of Paragraph 4.01 A. to read as follows:

A. In no event will the Contract Times commence to run later than the one hundred eightieth day after the day of Bid opening or the ninetieth day after the Effective Date of the Contract, whichever date is earlier.

ARTICLE 5 – AVAILABILITY OF LANDS; SUBSURFACE AND PHYSICAL CONDITIONS; HAZARDOUS ENVIRONMENTAL CONDITIONS

SC-5.01 Availability of Lands

SC-5.01 Add the following to the end of paragraph 5.01.C:

Contractor shall obtain said land rights at his own expense and without liability to the Owner. Contractor shall not enter upon private property without first obtaining written permission from the rightful property owner.

SC-5.03 Subsurface and Physical Conditions

SC 5.03 Delete Paragraphs 5.03.A and 5.03.B in their entirety and insert the following:

A. No reports of explorations or tests of subsurface conditions at or adjacent to the Site, or drawings of physical conditions relating to existing surface or subsurface structures at the Site, are known to Owner.

SC-5.06 Hazardous Environmental Conditions

SC 5.06 Delete Paragraphs 5.06.A and 5.06.B in their entirety and insert the following:

A. No reports or drawings related to Hazardous Environmental Conditions at the Site are known to Owner.

B. Not Used.

SC-5.06 Delete Paragraph 5.06 I. in its entirety.

SC 5.06 Amend the first paragraph of 5.06.J of the General Conditions by changing "(including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs)" to "(including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or other dispute resolution costs)"

ARTICLE 6 – BONDS AND INSURANCE

SC-6.01 Performance, Payment, and Other Bonds

SC 6.01 Delete Paragraph 6.01.B in its entirety and insert the following:

B. All Bonds shall be in the form prescribed by the Contract Documents or other form approved by Owner. All else notwithstanding, the terms of all Bonds shall be substantially in the form prescribed by Chapter 255, Florida Statutes. All Bonds shall be executed by Contractor and a corporate bonding company licensed to transact such business in the State of Florida and named on the

current list of "Surety Companies Acceptable on Federal Bonds" as published in the Treasury Department Circular Number 570. Contractor will cause the Bonds to be recorded with the Clerk of the Circuit Court in the county in which the Work is to be performed. Failure to execute bonds in the form prescribed may constitute nonresponsiveness on the part of Contractor. The expense for all Bonds shall be Contractor's responsibility.

SC-6.02 Insurance—General Provisions

SC-6.02 Add the following paragraph immediately after Paragraph 6.02.B:

1. Certificates of insurance shall be issued by a company with a Best's rating of at least B+ authorized to do business in the State of Florida. Owner must approve non-rated insurers. If used, Owner shall be shown as the Certificate Holder, Engineer as Additional Insured and provide for a 30-day cancellation notice.

SC-6.02 Delete Paragraph 6.02 D. in its entirety.

SC-6.02 Add the following paragraphs immediately after Paragraph 6.02.J:

K. No work shall be commenced under this contract until the required Certificate(s) have been provided. Work shall not continue after expiration (or cancellation) until new Certificate(s) have been provided. Non-continuance of work after expiration (or cancellation) of Certificate(s) will not constitute a delay beyond Contractor's control as defined in paragraph 4.05.

L. Contractor shall arrange for its insurers' policies to include, or be endorsed to include, a severability of interest/cross liability provision, so that Owner will be treated as if a separate policy were in existence, but without increasing the policy limits.

M. Contractor's deductibles/self-insured retentions shall be disclosed to Owner and may be disapproved by the latter. They shall be reduced or eliminated at the option of Owner. Contractor is responsible for the amount of any deductible or self-insured retention.

N. Insurance required of Contractor or any other insurance of Contractor shall be considered primary and insurance or self-insurance of Owner shall be considered excess, as may be applicable to claims that arise out of this contract.

O. The Contractor shall either (a) require each subcontractor to procure and maintain the same coverage as required of the Contractor, or (b) insure the activities of subcontractors in his own policy.

SC-6.05.A. Add the following to the list of items in Paragraph 6.05.A, as numbered items:

14. include for the benefit of Owner loss of profits and soft cost coverage including, without limitation, fixed expenses and debt service for a minimum of 12 months with a maximum deductible of 30 days, plus attorneys fees and engineering or other consultants' fees, if not otherwise covered;

15. include by express endorsement coverage of damage to Contractor's equipment.

ARTICLE 7 – CONTRACTOR'S RESPONSIBILITIES

SC-7.02 Labor; Working Hours

SC-7.02.B. Amend the first and second sentences of Paragraph 7.02.B to state "…all Work at the Site shall be performed during regular working hours, 7:00 AM through 5:00 PM. Contractor will not perform Work on a Saturday, Sunday, or any legal holiday recognized by the Owner without prior written approval by the Owner. The Owner recognizes the following legal holidays:

New Year's Day (January 1)
Martin Luther King Jr. Day (3rd Monday in January)
President's Day (3rd Monday in February)
Good Friday
Memorial Day (Last Monday of May)
Independence Day (July 4)
Labor Day (1st Monday of September)
Veteran's Day (November 11)
Thanksgiving Day (4th Thursday of November)
Day After Thanksgiving (4th Friday of November)
Christmas Eve (December 24)
Christmas Day (December 25)
New Year's Eve (December 31)"

SC-7.02.C. Add the following new paragraph immediately after Paragraph 7.02.B:

Contractor shall be responsible for the cost of any overtime pay or other expense incurred by the Owner for Engineer's services (including those of the Resident Project Representative, if any), Owner's representative, and construction observation services, occasioned by the performance of Work outside of regular working hours as defined in the Contract Documents. If Contractor is responsible but does not pay, or if the parties are unable to agree as to the amount owed, then Owner may impose a reasonable set-off against payments due under Article 15.

SC-7.07 Delete Paragraph 7.07 B. in its entirety.

SC-7.11 Record Documents

SC-7.11.A. Add the following new paragraph immediately after Paragraph 7.11.A:

Annotation of record documents shall be legible, precise, and complete as determined by Engineer. Record drawings shall also meet all additional requirements if any as specified in the Contract Documents including providing an electronic CAD version.

SC-7.12 Safety and Protection

SC-7.12.A. Add the following new paragraph immediately after Paragraph 7.12.A.3:

4. Contractor shall be responsible at all times for precautions to achieve the protection of all persons, including employees and property. Contractor shall make special effort to detect hazardous conditions and shall take prompt action where necessary to avoid accident, injury, or property damage. OSHA and all other applicable safety laws and ordinances shall be followed as well as American National Standards Institute Safety Standards. All accidents, injuries,

claims, or potential claims shall be reported promptly to Owner.

SC-7.16 Shop Drawings, Samples, and Other Submittals

SC-7.16.E. Add the following new paragraph immediately after Paragraph 7.16.E.1:

2. Contractor shall reimburse Owner for the charges of Engineer and Engineer's Consultants for costs generated as a result of more than two submittals of any one Shop Drawing or Sample being required for evaluation due to rejection for noncompliance of the original submittal or for lack of information required by the Contract Documents. Owner's reimbursement for the charges shall be a deduction from Contractor's Partial Payment(s).

SC-7.18 Indemnification

SC-7.18 Delete in its entirety

ARTICLE 9 – OWNER'S RESPONSIBILITIES

SC-9.02 Replacement of Engineer

SC-9.02 Amend paragraph 9.02 of the General Conditions by striking out the following words: ",provided the Contractor makes no reasonable objection."

SC-9.11 Evidence of Financial Arrangements

SC-9.11 Delete in its entirety

ARTICLE 10 – ENGINEER'S STATUS DURING CONSTRUCTION

SC-10.03 Project Representative

SC-10.03 Add the following new paragraphs immediately after Paragraph 10.03.A:

B. The Resident Project Representative (RPR) will be Engineer's representative at the Site, will act as directed by and under the supervision of Engineer, and will confer with Engineer regarding RPR's actions.

1. General: RPR's dealings in matters pertaining to the Work in general shall be with Engineer and Contractor. RPR's dealings with Subcontractors shall only be through or with the full knowledge and approval of Contractor. RPR shall generally communicate with Owner only with the knowledge of and under the direction of Engineer.

2. Schedules: Review the progress schedule, schedule of Shop Drawing and Sample submittals, and Schedule of Values prepared by Contractor and consult with Engineer concerning acceptability.

3. Conferences and Meetings: Attend meetings with Contractor, such as preconstruction conferences, progress meetings, job conferences, and other Project-related meetings, and prepare and circulate copies of minutes thereof.

4. Liaison:

a. Serve as Engineer's liaison with Contractor. Working principally through Contractor's authorized representative or designee, assist in

providing information regarding the provisions and intent of the Contract Documents.

b. Assist Engineer in serving as Owner's liaison with Contractor when Contractor's operations affect Owner's on-Site operations.

c. Assist in obtaining from Owner additional details or information, when required for proper execution of the Work.

5. Interpretation of Contract Documents: Report to Engineer when clarifications and interpretations of the Contract Documents are needed and transmit to Contractor clarifications and interpretations as issued by Engineer.

6. Shop Drawings and Samples:

a. **Record date of receipt of Samples and Contractor-approved Shop Drawings.**

b. Receive Samples which are furnished at the Site by Contractor, and notify Engineer of availability of Samples for examination.

c. Advise Engineer and Contractor of the commencement of any portion of the Work requiring a Shop Drawing or Sample submittal for which RPR believes that the submittal has not been approved by Engineer.

7. Modifications: Consider and evaluate Contractor's suggestions for modifications in Drawings or Specifications and report such suggestions, together with RPR's recommendations, if any, to Engineer. Transmit to Contractor in writing decisions as issued by Engineer.

8. Review of Work and Rejection of Defective Work:

a. Conduct on-Site observations of Contractor's work in progress to assist Engineer in determining if the Work is in general proceeding in accordance with the Contract Documents.

b. Report to Engineer whenever RPR believes that any part of Contractor's work in progress is defective, will not produce a completed Project that conforms generally to the Contract Documents, or will imperil the integrity of the design concept of the completed Project as a functioning whole as indicated in the Contract Documents, or has been damaged, or does not meet the requirements of any inspection, test or approval required to be made; and advise Engineer of that part of work in progress that RPR believes should be corrected or rejected or should be uncovered for observation, or requires special testing, inspection or approval.

9. Inspections, Tests, and System Start-ups:

a. Verify that tests, equipment, and systems start-ups and operating and maintenance training are conducted in the presence of appropriate Owner's personnel, and that Contractor maintains adequate records thereof.

b. Observe, record, and report to Engineer appropriate details relative to the test procedures and systems start-ups.

10. **Records:**

    a. **Prepare a daily report or keep a diary or log book, recording Contractor's hours on the Site, Subcontractors present at the Site, weather conditions, data relative to questions of Change Orders, Field Orders, Work Change Directives, or changed conditions, Site visitors, deliveries of equipment or materials, daily activities, decisions, observations in general, and specific observations in more detail as in the case of observing test procedures; and send copies to Engineer.**

    b. **Record names, addresses, fax numbers, e-mail addresses, web site locations, and telephone numbers of all Contractors, Subcontractors, and major Suppliers of materials and equipment.**

    c. **Maintain records for use in preparing Project documentation.**

11. **Reports:**

    a. **Furnish to Engineer periodic reports as required of progress of the Work and of Contractor's compliance with the Progress Schedule and schedule of Shop Drawing and Sample submittals.**

    b. **Draft and recommend to Engineer proposed Change Orders, Work Change Directives, and Field Orders. Obtain backup material from Contractor.**

    c. **Immediately notify Engineer of the occurrence of any Site accidents, emergencies, acts of God endangering the Work, force majeure or delay events, damage to property by fire or other causes, or the discovery of any Constituent of Concern or Hazardous Environmental Condition.**

12. **Payment Requests: Review applications for payment with Contractor for compliance with the established procedure for their submission and forward with recommendations to Engineer, noting particularly the relationship of the payment requested to the Schedule of Values, Work completed, and materials and equipment delivered at the Site but not incorporated in the Work.**

13. **Certificates, Operation and Maintenance Manuals: During the course of the Work, verify that materials and equipment certificates, operation and maintenance manuals and other data required by the Contract Documents to be assembled and furnished by Contractor are applicable to the items actually installed and in accordance with the Contract Documents, and have these documents delivered to Engineer for review and forwarding to Owner prior to payment for that part of the Work.**

14. **Completion:**

    a. **Participate in Engineer's visits to the Site to determine Substantial Completion, assist in the determination of Substantial Completion and the preparation of a punch list of items to be completed or corrected.**

    b. **Participate in Engineer's final visit to the Site to determine completion of the Work, in the company of Owner and Contractor, and prepare a final punch list of items to be completed and deficiencies to be remedied.**

c. Observe whether all items on the final list have been completed or corrected and make recommendations to Engineer concerning acceptance and issuance of the notice of acceptability of the work.

C. The RPR shall not:

1. Authorize any deviation from the Contract Documents or substitution of materials or equipment (including "or-equal" items).

2. Exceed limitations of Engineer's authority as set forth in the Contract Documents.

3. Undertake any of the responsibilities of Contractor, Subcontractors, or Suppliers.

4. Advise on, issue directions relative to, or assume control over any aspect of the means, methods, techniques, sequences or procedures of Contractor's work.

5. Advise on, issue directions regarding, or assume control over security or safety practices, precautions, and programs in connection with the activities or operations of Owner or Contractor.

6. Participate in specialized field or laboratory tests or inspections conducted off-site by others except as specifically authorized by Engineer.

7. Accept Shop Drawing or Sample submittals from anyone other than Contractor.

8. Authorize Owner to occupy the Project in whole or in part.

ARTICLE 12 – CLAIMS

SC-12.01 Claims

SC 12.01.B **Amend the first sentence of paragraph 12.01.B of the General Conditions by changing "(but in no event later than 30 days)" to "(but in no event later than 90 days for the Owner and no later than 10 days for the Contractor)".**

ARTICLE 13 – COST OF THE WORK; ALLOWANCES; UNIT PRICE WORK

SC-13.01 Cost of the Work

SC 13.01.B.5.c **Add the following to the end of Paragraph 13.01.B.5.c:**

In no case shall rates exceed those published by the current edition of Data Quest Incorporated titled, Rental Rate Blue Book for Construction Equipment, and other procedures established by Florida Department of Transportation.

SC 13.01.B.5.f **Amend the first sentence of paragraph 13.01.B.5.f by striking out the following words: "(except losses and damages within the deductible amounts of property insurance established in accordance with Paragraph 6.05)."**

SC 13.01.B.5.i **Add the following new paragraphs immediately after paragraph 13.01.B.5.i:**

j. The cost of compliance with current local, state and federal safety regulations.

SC-13.03 Unit Price Work

SC 13.03.E **Delete Paragraph 13.03.E in its entirety and insert the following in its place:**

E. The unit price of an item of Unit Price Work shall be subject to reevaluation and adjustment by the Owner under the following conditions:

1. if the extended price of a particular item of Unit Price Work amounts to 25 percent or more of the Contract Price (based on estimated quantities at the time of Contract formation) and the variation in the quantity of that particular item of Unit Price Work actually furnished or performed by Contractor differs by more than 25 percent from the estimated quantity of such item indicated in the Agreement; and

2. if there is no corresponding adjustment with respect to any other item of Work; and

3. if Owner believes that the quantity variation entitles Owner to an adjustment in the unit price, Owner may make a Claim, seeking an adjustment in the Contract Price.

SC 13.03.E **Add the following new paragraphs immediately after Paragraph 13.03.E:**

F. Owner reserves the right to delete any Unit Price Work with the change, if any, in the Contract Price or in the Contract Times determined in accordance with Article 11.

ARTICLE 14 –TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

SC-14.02 Tests, Inspections, and Approvals

SC 14.02.A Add the following to the end of Paragraph 14.02.A:

Contractor shall reimburse Owner for the charges of Engineer and Engineer's Consultants for all costs due to work not being ready for tests and/or inspections when the Contractor has notified Engineer that work is ready for tests and/or inspections. Contractor shall reimburse Owner for all failed tests and subsequent retests. Partial payments payable to Contractor shall be distributed, first to reimburse the Owner for such charges, with the balance distributed to the Contractor in accordance with the Contract Documents.

ARTICLE 15 – PAYMENTS TO CONTRACTOR; SET-OFFS; COMPLETION; CORRECTION PERIOD

SC-15.01 Progress Payments

SC 15.01.B.2 Delete Paragraph 15.01.B.2 in its entirety and insert the following in its place:

Beginning with the second Application for Payment, each Application shall include an affidavit of Contractor certifying that Contractor has disbursed to all subcontractors and suppliers having an interest in the contract their pro rata shares of the payment out of previous progress payments received by Contractor for all work completed and materials furnished in the previous period, less a retainage withheld by Contractor pursuant to an agreement with a subcontractor. Contractor shall provide a waiver of lien for all stored materials with the second application for payment after submitting application for payment. If the waiver of lien is not provided, current application for payment will be reduced by the value of the stored materials until said time waiver of lien is received or stored materials become incorporated in the Work. Within 30 days of receipt for the final progress payment or any other payments received thereafter except the final payment, Contractor shall pay all subcontractors and suppliers having an interest in the contract their pro rata shares of the payment for all work completed and materials furnished.

SC-15.01 Progress Payments

SC 15.01.D.1 Change Paragraph 15.01.D.1 to read as follows:

After presentation of the Application for Payment to the Owner with Engineer's recommendation, the amount recommended will (subject to the provisions of paragraph 15.01.C) become due and when due, will be paid by Owner to Contractor within thirty (30) days.

SC-15.03 Substantial Completion

SC 15.03.B Add the following new subparagraph to Paragraph 15.03.B:

1. If some or all of the Work has been determined not to be at a point of Substantial Completion and will require re-inspection or re-testing by Engineer, the cost of such re-inspection or re-testing, including the cost of time, travel and living expenses, shall be paid by Contractor to Owner. If Contractor does not pay, or the parties are unable to agree as to the amount owed, then Owner may impose a reasonable set-off against payments due under Article 15.

CERTIFICATE OF SUBSTANTIAL COMPLETION

Owner:	Village of Palm Springs	Owner's Task Order No.:	227
Contractor:		Contractor's Project No.:	
Engineer:	Eckler Engineering, Inc.	Engineer's Project No.:	400-077.01
Project:	SCADA System Upgrade Main Water Treatment Plant	Contract Name:	SCADA System Upgrade Main Water Treatment Plant

This [preliminary] [final] Certificate of Substantial Completion applies to:

☐ All Work ☐ The following specified portions of the Work:

Date of Substantial Completion

The Work to which this Certificate applies has been inspected by authorized representatives of Owner, Contractor, and Engineer, and found to be substantially complete. The Date of Substantial Completion of the Work or portion thereof designated above is hereby established, subject to the provisions of the Contract pertaining to Substantial Completion. The date of Substantial Completion in the final Certificate of Substantial Completion marks the commencement of the contractual correction period and applicable warranties required by the Contract.

A punch list of items to be completed or corrected is attached to this Certificate. This list may not be all-inclusive, and the failure to include any items on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract.

The responsibilities between Owner and Contractor for security, operation, safety, maintenance, heat, utilities, insurance, and warranties upon Owner's use or occupancy of the Work shall be as provided in the Contract, except as amended as follows: *[Note: Amendments of contractual responsibilities recorded in this Certificate should be the product of mutual agreement of Owner and Contractor; see Paragraph 15.03.D of the General Conditions.]*

Amendments to Owner's responsibilities: ☐ None ☐ As follows

Amendments to Contractor's responsibilities: ☐ None ☐ As follows:

The following documents are attached to and made a part of this Certificate: *[punch list; others]*

This Certificate does not constitute an acceptance of Work not in accordance with the Contract Documents, nor is it a release of Contractor's obligation to complete the Work in accordance with the Contract.

PART 5

SPECIFICATIONS

SECTION 01005

GENERAL REQUIREMENTS

PART 1 GENERAL

1.01 WORK INCLUDED

A. Written and drawn Work specified in these Contract Documents are the sole responsibility of the CONTRACTOR.

B. Provide materials, equipment, and incidentals necessary for proper completion of the Work required by the Specifications and as shown on the Drawings, using qualified labor and supervision.

C. Summary of Work can be found in Section 01010 - Summary of Work. Obtain and pay for required permits. Perform and complete the work in the manner best calculated to promote rapid construction consistent with safety of life and property and to the satisfaction of the ENGINEER and OWNER, and in strict accordance with the Contract Documents. Clean up the work and maintain it during and after construction, until accepted, perform work and pay costs incidental thereto. Repair or restore structures and property that may be damaged or disturbed during performance of the work.

D. The cost of incidental work described in these GENERAL REQUIREMENTS, for which there are no specific Contract Items, shall be considered as part of the general cost of doing the work and shall be included in the prices for the various Contract Items. No additional payment will be made therefor.

E. Provide and maintain such modern plant, tools, and equipment as may be necessary, to perform in a satisfactory and acceptable manner all the work required by this Contract. Only equipment of established reputation and proven efficiency shall be used.

F. The CONTRACTOR is solely responsible for the adequacy of his workmanship, materials, and equipment, prior review of the ENGINEER notwithstanding.

1.02 WORK TO BE PERFORMED BY OTHERS

A. During the construction period for this project, the OWNER (either with his own forces or under a separate contract) may be performing work that will require the cooperation of the CONTRACTORs in scheduling and coordination to avoid conflicts.

1.03 PUBLIC UTILITY INSTALLATIONS AND STRUCTURES

A. Public utility installations and structures shall be understood to include poles, tracks, pipes, wires, conduits, house service connections, vaults, manholes, other appurtenances, and facilities pertaining thereto whether owned or controlled by the OWNER, other governmental bodies or privately owned by individuals, firms, and corporations, used to serve the public with transportation, traffic control, gas, electricity, telephone, cable TV, sewerage collection, drainage collection, potable water, irrigation water, and other public and private property which may be affected by the work shall be deemed included hereunder.

B. The Contract Documents contain data relative to existing public utility installations and structures above and below the ground surface. These data are not guaranteed as to their completeness or accuracy and it is the responsibility of the CONTRACTOR to make his own investigations to inform himself fully of the character, condition and extent of all such installations and structures as may be encountered and as may affect the construction operations.

C. Protect public utility installations and structures from damage during the work. Arrange construction operations as to avoid damage to these facilities. Provide required protective devices and construction including but not limited to temporary pipe supports at CONTRACTOR expense. Repair existing public utilities damaged by the CONTRACTOR which are shown on the Plans or have been located in the field by the utility, at CONTRACTOR expense, as directed by the ENGINEER. No separate payment shall be made for such protective devices or repairs to public utility installations or structures.

D. The CONTRACTOR is solely and directly responsible to the OWNER and operators of such properties for any damage, injury, expense, loss, inconvenience, delay, suits, actions, and claims of any character brought because of any injuries or damage which may result from the construction operations under this Contract.

E. Neither the OWNER nor its officers or agents will be responsible to the CONTRACTOR for damages as a result of the Contractor's failure to protect utilities encountered in the work.

F. Public utility installations or structures owned or controlled by the OWNER or another governmental body which are shown on the Drawings to be removed, relocated, replaced or rebuilt by the CONTRACTOR shall be considered as a part of the general cost of doing the work and shall be included in the prices bid for the various contract items. No separate payment shall be made therefore.

G. Where public utility installations or structures owned or controlled by the OWNER, another governmental body or public agency are encountered during the course of the work, and are not indicated on the Drawings or in the Specifications, and when, in the opinion of the ENGINEER, removal, relocation, replacement, or rebuilding is necessary to complete the work under this Contract, such work shall be accomplished by the utility having jurisdiction, or such work may be ordered, in writing by the utility for the CONTRACTOR to accomplish. If such work is accomplished by the utility having jurisdiction, it will be carried out expeditiously and the CONTRACTOR shall give full cooperation to permit the utility to complete the removal, relocation, replacement or rebuilding as required. If such work is accomplished by the CONTRACTOR, it will be paid for as extra work as provided in the Agreement.

H. In the event of interruption to domestic water, sewer, storm drain, or other utility services as a result of accidental breakage due to construction operations, promptly notify the proper authority. Cooperate with said authority in restoration of service as promptly as possible and bear all costs of repair. In no case shall interruption of any water or utility service be allowed to exist outside working hours unless prior approval is granted.

I. During performance of the work employ approved methods, exercise reasonable care and skill so as to avoid unnecessary delay, injury, damage, and destruction of public utility installations and structures, avoid unnecessary interference with, or interruption of, public utility services, and cooperate fully with the OWNERs thereof to that end.

J. Perform maintenance, repair, removal, relocation, or rebuilding of public utility installations and structures, when accomplished by the CONTRACTOR as specified, by methods approved by the owner of the utility.

K. Provide written notice to OWNER and other governmental utility departments and other OWNERs of public utilities of the location of his proposed construction operations, at least forty-eight hours in advance of breaking ground in any area or on any unit of the work. This can be accomplished by making the appropriate contact with the following utility companies:

Name of Utility	Responsible Authority	Telephone No.
Sunshine State One Call of Florida, Inc.	General Utility Location	(800) 432-4770

1.04 TEMPORARY SHUTDOWN OF EXISTING OPERATIONS AND UTILITIES

A. Connections to existing services or utilities, or other work that requires the temporary shutdown of any existing operations or utilities shall be planned in detail with appropriate scheduling of the Work and coordinated with the OWNER or ENGINEER. The approved schedule for shutdown or restart shall be indicated on the CONTRACTOR's Progress Schedule, and advance notice shall be given in order that the OWNER or ENGINEER may witness the shutdown, tie-in and startup and coordinate with affected people.

B. Materials and equipment (including emergency equipment) necessary to expedite the tie-in shall be on hand prior to the shutdown of existing services or utilities.

1.05 INTERFERING STRUCTURES

A. Take necessary precautions to prevent damage to existing structures whether on the surface, aboveground or underground. An attempt has been made to show major structures on the Drawings. The completeness and accuracy of information shown cannot be guaranteed, and it is presented simply as a guide to avoid know possible difficulties.

B. Protect underground and above ground existing structures from damage, whether or not they lie within the limits of the existing right-of-way and/or additional right-of-way and easements obtained by the OWNER. Where such existing fences, gates, barns, sheds, buildings or any other structure must be removed during construction, restore to their original condition to the satisfaction of the property owner involved at the CONTRACTOR's own expense. Notify the ENGINEER of any damaged underground structure and make repairs or replacements before backfilling.

C. Without additional compensation, the CONTRACTOR may remove and replace in a condition good as or better than original, such small

miscellaneous structures as fences, mailboxes and signposts that interfere with the CONTRACTOR's operations.

1.06 FIELD RELOCATION

A. During the progress of construction, it is expected that minor relocations of the work may be necessary. Such relocations shall be made only by direction of the ENGINEER. If existing structures are encountered which prevent the construction, and which are not properly shown on the drawings, notify the ENGINEER before continuing with the construction in order that the ENGINEER my make such field revisions as necessary to avoid conflict with the existing structures. If the structure is encountered, and shall proceed with the construction despite this interference, he shall do so at his own risk.

1.07 EASEMENTS

A. Where portions of the work are located on public or private property, easements and permits will be obtained by the OWNER. Easements will provide for the use of property for construction purposes to the extent indicated on the easements. Copies of these easements and permits are available upon request to the OWNER. It shall be the CONTRACTOR's responsibility to determine the adequacy of the easement obtained in every case and to abide by all requirements and provisions of the easement or permit. The CONTRACTOR shall confine his construction operations to within the easement limits or street right-of-way limits or make special arrangements with the property owners or appropriate public agency for the additional area required. Any damage to property, either inside or outside the limits of the easements provided by the OWNER, shall be the responsibility of the CONTRACTOR as specified herein. The CONTRACTOR shall remove, protect and replace all fences or other items encountered on public or private property. Before final payment will be authorized by the ENGINEER, the CONTRACTOR will be required to furnish the OWNER with written releases from property owners or public agencies where side agreements or special easements have been made by the CONTRACTOR of where the CONTRACTOR's operations, for any reason, have not been kept within the construction right-of-way obtained by the OWNER.

B. It is anticipated that the required easements and permits will be obtained before construction is started. However should the procurement of any easement or permit be delayed, the CONTRACTOR shall schedule and perform the work around these areas until such time as the easement or permit has been secured.

1.08 LAND MONUMENTS

A. Notify the ENGINEER of any existing federal, state, county, city and private land monuments encountered. Private monuments that are within 5 feet of the trench centerline shall be preserved, or replaced by a licensed surveyor at the CONTRACTOR's expense. Notify the ENGINEER when government monuments are encountered at least 2 weeks in advance of the proposed construction in order that the ENGINEER will have ample opportunity to notify the proper authority and reference these monuments for later replacement.

1.09 DRAWINGS AND SPECIFICATIONS

A. Drawings

The Drawings referred to in the Contract Documents bear the general project name and number as shown in the Invitation to Bid.

When obtaining data and information from the Drawings, figures shall be used in preference to scaled dimensions, and large scale drawings in preference to small scale drawings.

B. Copies furnished to CONTRACTOR

After the Contract has been executed, the CONTRACTOR will be furnished with three (3) sets of paper prints, the same size as the original drawings and three (3) copies of the Specifications. Additional copies of the Plans and Specifications, when requested, may be furnished to the CONTRACTOR at cost of reproduction.

The CONTRACTOR shall furnish each of the subcontractors, manufacturers, and material men such copies of the Contract Documents as may be required for their work.

C. Supplementary Drawings

When, in the opinion of the ENGINEER, it becomes necessary to explain more fully the work to be done or to illustrate the work further or to show any changes which may be required, drawings known as Supplementary Drawings, with specifications pertaining thereto, will be prepared by the ENGINEER and five (5) paper prints thereof will be given to the CONTRACTOR.

The Supplementary Drawings shall be binding upon the CONTRACTOR with the same force as the Drawings. Where such Supplementary Drawings require either less or more than the estimated quantities of work, credit to the OWNER or compensation therefor to the CONTRACTOR shall be subject to the terms of the Agreement.

D. CONTRACTOR To Check Drawings and Data

Verify all dimensions, quantities and details shown on the Drawings, Supplementary Drawings, schedules, Specifications or other data received from the ENGINEER, and shall notify him of all errors, omissions, conflicts, and discrepancies found therein. Failure to discover or correct errors, conflicts or discrepancies shall not relieve the CONTRACTOR of full responsibility for unsatisfactory work, faulty construction or improper operation resulting therefrom nor from rectifying such conditions at his own expense. He will not be allowed to take advantage of any errors or omissions, as full instructions will be furnished by the ENGINEER, should such errors or omissions be discovered. All schedules are given for the convenience of the ENGINEER and the CONTRACTOR and are not guaranteed to be complete. The CONTRACTOR shall assume all responsibility for the making of estimates of the size, kind, and quality of materials and equipment included in work to be done under the Contract.

E. Specifications

Each Technical Specification Section consists of three parts: General, Products and Execution. The General part contains General Requirements which govern the Work. Products and Execution modify and supplement these by detailed requirements for the work and shall always govern whenever there appears to be a conflict.

F. Intent

All work called for in the Specifications applicable to this Contract, but not shown on the Drawings in their present form, or vice versa, shall be of like effect as if shown or mentioned in both. Work not specified in either the Drawings or in the Specifications, but involved in carrying out their intent or in the complete and proper execution of the work, is required and shall be performed by the CONTRACTOR as though it were specifically delineated or described.

The apparent silence of the Specifications as to any detail, or the apparent omission from them of a detailed description concerning any work to be done and materials to be furnished, shall be regarded as meaning that only the best general practice is to prevail and that only material and workmanship of the best quality is to be used, and interpretation of these Specifications shall be made upon that basis.

1.10 MATERIALS AND EQUIPMENT

A. General

Materials and equipment to be incorporated in the Work must be new and unused. The use of reconditioned or refurbished materials and equipment will not be allowed.

B. Manufacturer

The names of proposed manufacturers, material men, suppliers and dealers who are to furnish materials, fixtures, equipment, appliances or other fittings shall be submitted to the ENGINEER for review as early as possible, to afford proper investigation and checking. Such review must be obtained before Shop Drawings will be checked. No manufacturer will be acceptable to furnish any materials under this Contract unless it shall be of good reputation and have a plant of ample capacity. Manufacturers shall, upon the request of the ENGINEER, be required to submit evidence that it has manufactured a similar product to the one specified and that it has been previously used for a like purpose for a sufficient length of time to demonstrate its satisfactory performance.

All transactions with the manufacturers or subcontractors shall be through the CONTRACTOR, unless the contractor shall request, in writing to the ENGINEER, that the manufacturer or subcontractor deal directly with the ENGINEER. Any such transactions shall not in any way release the CONTRACTOR from his full responsibility under this Contract.

Any two or more pieces of material or equipment of the same kind, type or classification, and being used for identical types of service shall be made by the same manufacturer.

C. Delivery

Deliver materials in ample quantities to insure the most speedy and uninterrupted progress of the work so as to complete the work within the allotted time. Also coordinate deliveries in order to avoid delay in, or impediment of, the progress of the work of any related CONTRACTOR.

D. Tools and Accessories

Unless otherwise stated in the Contract Documents, furnish with each type, kind or size of equipment, one complete set of suitably marked high grade special tools and appliances which may be needed to adjust, operate, maintain or repair the equipment. Such tools and appliances shall be furnished in painted steel cases, properly labeled and equipped with good grade cylinder locks and duplicate keys.

Furnish spare parts as specified.

Provide with each piece of equipment a substantial nameplate, securely fastened in place and clearly inscribed with the manufacturer's name, year of manufacture, serial number, weight and principal rating data.

E. Installation of Equipment

Have on hand sufficient proper equipment and machinery of ample capacity to facilitate the work and to handle all emergencies normally encountered in work of this character.

Erect equipment in a neat and workmanlike manner on the foundations at the locations and elevations shown on the Drawings. Correctly align, level, and adjust equipment for satisfactory operation and install so that proper and necessary connections can be made readily between the various units.

F. Service of Manufacturer's ENGINEER

The Contract prices for equipment shall include the cost of furnishing a competent and experienced engineer or superintendent who shall represent the manufacturer and shall assist the CONTRACTOR, when required, to install, adjust, test and place in operation the equipment in conformity with the Contract Documents. After the equipment is placed in permanent operation by the OWNER, such engineer or superintendent shall make all adjustments and tests required by the ENGINEER to prove that such equipment is proper and in satisfactory operating condition, and shall instruct such personnel as may be designated by the OWNER in the proper operation and maintenance of such equipment.

1.11 INSPECTION AND TESTING

A. General

Inspection and testing of materials will be performed by a representative of the OWNER unless otherwise specified.

For tests specified to be made by the CONTRACTOR, the testing personnel shall make the necessary inspections and tests and the reports thereof shall be in such form as will facilitate checking to determine compliance with the Contract Documents. Five copies of the reports shall be submitted and authoritative certification thereof must be furnished to the ENGINEER as a prerequisite for the acceptance of any material or equipment.

If, in the making of any test of any material or equipment, it is ascertained by the ENGINEER that the material or equipment does not comply with the Contract, the CONTRACTOR will be notified thereof and he will be directed to refrain from delivering said material or equipment, or to remove it promptly from the site or from the work and replace it with acceptable material, without cost to the OWNER.

Tests of electrical and mechanical equipment and appliances shall be conducted in accordance with recognized test codes of the ANSI, ASME, or the IEEE, except as may otherwise be stated herein.

The CONTRACTOR shall be fully responsible for the proper operation of equipment during tests and instruction periods and shall neither have nor make any claim for damage which may occur to equipment prior to the time when the OWNER formally takes over the operation thereof.

B. Costs

Inspection and testing of materials furnished under this Contract will be performed by the OWNER or duly authorized inspection engineers or inspection bureaus without cost to the CONTRACTOR, unless otherwise expressly specified.

The cost of shop and field tests of equipment and of certain other tests specifically called for in the Contract Documents shall be borne by the CONTRACTOR and such costs shall be deemed to be included in the Contract price.

Materials and equipment submitted by the CONTRACTOR as the equivalent to those specifically named in the Contract may be tested by the OWNER for compliance. The CONTRACTOR shall reimburse the OWNER for the expenditures incurred in making such tests on materials and equipment which are rejected for non-compliance.

C. Inspection of Materials

Give notice in writing to the ENGINEER, sufficiently in advance of intention to commence the manufacture or preparation of materials especially manufactured or prepared for use in or as part of the permanent construction. Such notice shall contain a request for inspection, the date of commencement and the expected date of completion of the manufacture or preparation of materials. Upon receipt of such notice, the ENGINEER will arrange to have a representative present at such times during the manufacture as may be necessary to inspect the materials or he will notify the CONTRACTOR that the inspection will be made at a point other than the point of manufacture, or he will notify the CONTRACTOR that inspection will be waived. The CONTRACTOR must comply with these provisions before shipping any material. Such inspection shall not release the CONTRACTOR from the responsibility for furnishing materials meeting the requirements of the Contract Documents.

D. Certificate of Manufacture

When inspection is waived or when the ENGINEER so requires, the CONTRACTOR shall furnish to him authoritative evidence in the form of Certificates of Manufacture that the materials to be used in the work have been manufactured and tested in conformity with the Contract Documents. These certificates shall be notarized and shall include copies of the results of physical tests and chemical analyses, where necessary, that have been made directly on the product or on similar products of the manufacturer.

E. Shop Tests of Operating Equipment

Test each piece of equipment for which pressure, duty, capacity, rating, efficiency, performance, function, or special requirements are specified in the shop of the maker in a manner which shall conclusively prove that its characteristics comply fully with the requirements of the Contract documents. No such equipment shall be shipped to the work until the ENGINEER notifies the CONTRACTOR, in writing, that the results of such tests are acceptable.

Five copies of the manufacturer's actual test data and interpreted results thereof, accompanied by a certificate of authenticity sworn to by a responsible official of the manufacturing company, shall be forwarded to the ENGINEER for approval.

The cost of shop tests and of furnishing manufacturer's preliminary and shop test data of operating equipment shall be borne by the CONTRACTOR.

F. Preliminary Field Tests

As soon as conditions permit, provide materials, equipment, and incidentals necessary for proper completion of the preliminary field tests of equipment, using qualified labor and supervision. If the preliminary field tests disclose any equipment furnished under this Contract which does not comply with the requirements of the Contract Documents, the CONTRACTOR shall, prior to the acceptance tests, make all changes, adjustments and replacements required. The supplier and furnishing contractor shall assist in the preliminary field tests as applicable.

G. Final Field Tests

Upon completion of the work and prior to final payment, all equipment and piping installed under this Contract shall be subjected to acceptance tests as specified or required to prove compliance with the Contract Documents.

Provide materials, equipment, fuel, energy, water, and incidentals necessary for proper completion of the acceptance tests and final field tests required by the Specifications and as shown on the Drawings, using qualified labor and supervision.

H. Failure of Tests

Any defects in the materials and equipment or their failure to meet the tests, guarantees or requirements of the Contract Documents shall

be promptly corrected by the CONTRACTOR by replacements or otherwise. The decision of the ENGINEER as to whether or not the CONTRACTOR has fulfilled his obligations under the Contract shall be final and conclusive. If the CONTRACTOR fails to make these corrections or if the improved materials and equipment, when tested, shall again fail to meet the guarantees or specified requirements, the OWNER, notwithstanding its partial payment for work, and materials and equipment, may reject the materials and equipment and may order the CONTRACTOR to remove them from the site at his own expense.

If the failure during testing is fully or partly due to the equipment provided by the CONTRACTOR, as determined by the ENGINEER, the Furnishing CONTRACTOR shall make all required improvements at no cost to the OWNER.

In case the OWNER rejects any materials and equipment, then the CONTRACTOR shall replace the rejected materials and equipment within a reasonable time. If he fails to do so, the OWNER may, after the expiration of a period of thirty (30) calendar days after giving him notice in writing, proceed to replace such rejected materials and equipment, and the cost thereof shall be deducted from any compensation due or which may become due the CONTRACTOR under his Contract.

The OWNER agrees to obtain other equipment within a reasonable time and the CONTRACTOR agrees that the OWNER may use the equipment furnished by him without rental or other charges until the new equipment is obtained.

I. Final Inspection

During such final inspections, the work shall be clean and free from water. In no case will the final estimate be prepared until the CONTRACTOR has complied with all requirements set forth and the ENGINEER has made his final inspection of the entire work and is satisfied that the entire work is properly and satisfactorily constructed in accordance with the requirements of the Contract documents.

1.12 TEMPORARY STRUCTURES

A. Responsibility for Temporary Structures

In accepting the Contract, the CONTRACTOR assumes full responsibility for the sufficiency and safety of all temporary structures or work and for any damage which may result from their failure or their improper construction, maintenance or operation and will indemnify and save harmless the OWNER and ENGINEER from all claims, suits or actions and damages or costs of every description arising by reason of failure to comply with the above provisions.

1.13 TEMPORARY SAFETY SERVICES

A. Accident Prevention

Precautions shall be exercised at all times for the protection of person and property. The safety provisions of applicable laws, building and construction codes shall be observed. Comply with the U.S. Department of Labor Safety and Health Regulations for construction promulgated under the Occupational Safety and Health Act

of 1970 (PL 910-596), and under Section 107 of the contract Work. Hours and Safety Standards Act (PL 91-54), except where state and local safety standards exceed the federal requirements and except where state safety standards have been approved by the Secretary of labor in accordance with provisions of the Occupational Safety and Health Act, shall be complied with.

B. First Aid

Keep at each location where work is in progress, a completely equipped first aid kit and provide ready access thereto at all times when men are employed on the work.

1.14 TRAFFIC MAINTENANCE AND SAFETY

A. Comply with all rules and regulation of the state, county and city authorities regarding closing or restricting the use of public streets or highways. No public or private road shall be closed, except by express permission of the OWNER. Conduct the work so as to assure the least possible obstruction to traffic and normal commercial pursuits. Protect all obstructions within traveled roadways by installing approved signs, barricades and lights where necessary for the safety of the public. The convenience of the general public and residents adjacent to the project and the protection of persons and property are of prime importance and shall be provided for in an adequate and satisfactory manner.

B. Where traffic will pass over trenches after they are backfilled and before they are paved, the top of the trench shall be maintained in a condition that will allow normal vehicular traffic to pass over. Temporary access driveways must be provided where required. Cleanup operations shall follow immediately behind backfilling and the work site shall be kept in an orderly condition at all times.

C. When flagmen and guards are required by regulation or when deemed necessary for safety, they shall be furnished with approved orange wearing apparel and other regulation traffic-control devices.

1.15 PROTECTION OF PROPERTY

A. Protect stored materials, cultivated trees and crops and other items located adjacent to the proposed work. Notify property owners affected by the construction at least 48 hours in advance of the time construction begins. During construction operations, construct and maintain such facilities as may be required to provide access by all property owners to their property. No person shall be cut off from access to his residence or place of business for a period exceeding 8 hours, unless the CONTRACTOR has made special arrangements with the affected persons.

1.16 ACCESS FOR POLICE, FIRE, AND POSTAL SERVICE

A. Notify the fire department and police department before closing any street or portion thereof. No closing shall be made without the OWNER's approval. Notify said departments when the streets are again passable for emergency vehicles. Do not block off emergency vehicle access to consecutive arterial crossings or dead-end streets, in excess of 300 linear feet, without special written permission from

the fire department. Conduct operations with the least interference to fire equipment access and at no time prevent such access.

B. The CONTRACTOR shall lease a night emergency telephone number or numbers with the police department so that contact may be made easily at all times in case of barricade and flare trouble or other emergencies.

C. Maintain postal service facilities in accordance with the requirements of the U.S. Postal Service. Move mailboxes to temporary locations designated by the U.S. Postal Service and at the completion of the work in each area, replace them in their original location and in a condition satisfactory to the U.S. Postal Service.

1.17 SITE RESTORATION AND CLEANUP

A. At all times during the work, keep the premises clean and orderly and upon completion of the work, repair all damage caused by equipment and leave the project free of rubbish or excess materials of any kind.

B. Stockpile excavated materials in a manner that will cause the least damage to adjacent lawns, grassed areas, gardens, shrubbery, or fences, regardless of whether these are on private property or on state, county or city rights-of-way. Remove all excavated materials from grassed and planted areas and leave these surfaces in a condition equivalent to their original conditions.

C. All existing drainage ditches and culverts shall be reopened and graded and natural drainage restored. Restore culverts broken or damaged to their original condition and location.

D. Upon completion of pipe laying and backfilling operations, hand-rake and drag all former grassed and planted areas leaving all disturbed areas free from rocks, gravel, clay or any other foreign materials and ready, in all aspects, for planting. The finished surface shall conform to the original surface and shall be free-draining and free from holes, ruts, rough spots or other surface features detrimental to a seeded area.

E. No trees, except those specifically shown on the Drawings to be removed, shall be removed without the express approval of the ENGINEER. Removed trees will be disposed of off the work site by the CONTRACTOR.

F. Originally seeded areas outside dedicated rights-of-way or easements shall be fertilized and reseeded with first-quality seed or planted with new sod as approved by the property owner. All ground preparation, reseeding and sodding shall be done in accordance with the best accepted practices for lawn planting. The CONTRACTOR shall be responsible for obtaining a satisfactory grass turf acceptable to the property owner.

G. Thoroughly clean all spilled dirt, gravel or other foreign material caused by the construction operations from all streets and roads at the conclusion of each day's operation.

1.18 PRESERVATION OF IRRIGATION AND DRAINAGE DITCHES

A. Arrange schedules so that construction will not interfere with the irrigation of cultivated lands or pasturelands. Construction may proceed during the irrigation season provided the CONTRACTOR constructs, at his own expense, temporary irrigation ditches, turnouts and miscellaneous structures acceptable to the owner of the property.

B. After backfilling of the trenches, restore all irrigation and storm drain ditches destroyed, damaged or otherwise modified during construction to a condition equivalent, in the opinion of the ENGINEER, to the condition of the ditch before construction. Ditches to be reconstructed shall be built in their original locations.

1.19 LINES AND GRADES

A. Grade

All work under this Contract shall be constructed in accordance with the lines and grades shown on the Plans, or as given by the ENGINEER. The full responsibility for keeping alignment and grade shall rest upon the CONTRACTOR.

B. Surveys

Furnish and maintain stakes and other such materials, and give such assistance, including qualified helpers, as may be required by the ENGINEER for setting reference marks. Check such reference marks by such means as deemed necessary and, before using them, call the ENGINEER's attention to any inaccuracies. Establish all working or construction lines and grades as required from the reference marks set by the ENGINEER, and be solely responsible for the accuracy thereof. Lines and grades are subject to the check and review of the ENGINEER.

Keep the ENGINEER informed a reasonable time in advance as to need for line and grade reference marks, in order that they may be furnished and all necessary measurements made for record and payment with the minimum of inconvenience to the ENGINEER or of delay to the CONTRACTOR.

It is the intention not to delay the Work for the establishment of reference marks but, when necessary, working operations shall be suspended for such reasonable time as the ENGINEER may require for this purpose.

C. Safeguarding Marks

Safeguard all points, stakes, grade marks, monuments and bench marks made or established on the work, bear the cost of reestablishing them if disturbed, and bear the entire expense of rectifying work improperly installed due to not maintaining or protecting or to removing without authorization such established points, stakes and marks. Safeguard all existing and known property corners, monuments and marks adjacent to but not related to the work and, if required, bear the cost of reestablishing them if disturbed or destroyed.

D. Datum Plane

All elevations indicated or specified refer to the North American Vertical Datum of 1988 (NAVD 88), unless otherwise noted.

1.21 PROTECTION OF WORK AND PUBLIC

A. Barriers and Lights

During the prosecution of the work, put up and maintain, at all times, such barriers and lights as will effectually prevent accidents. Provide suitable barricades, yellow lights, "danger" or "caution" or "street closed" signs and watchmen at all places where the work causes obstructions to the normal traffic or constitutes in any way a hazard to the public.

B. Noise

Eliminate noise to as great as extent as practicable at all times. Air compressing plants shall be equipped with silencers and the exhaust of all gasoline motors or other power equipment shall be provided with mufflers. In the vicinity of hospitals and schools, special care shall be used to avoid noise or other nuisances. Strictly observe all local regulations and ordinances covering noise control.

Except in the event of an emergency, no work shall be done between the hours of 7:00 P.M. and 7:00 A.M., or on Saturdays, Sundays, or legal holidays. If the proper and efficient prosecution of the work requires operations during these hours, written permission of the ENGINEER shall be obtained before starting such items of the work.

C. Access to Public Services

Neither the materials excavated nor the materials or plant used in the construction of the work shall be so placed as to prevent free access to all fire hydrants, valves or manholes.

D. Dust Prevention

Give all unpaved streets, roads, detours or haul roads used in the construction area an approved dust-preventative treatment or periodically water to prevent dust. Applicable environmental regulations for dust prevention shall be strictly enforced.

1.22 CUTTING AND PATCHING

A. Do all cutting, fitting or patching of this portion of the Work that may be required to make the several parts thereof join and coordinate in a manner satisfactory to the ENGINEER and in accordance with the Drawings and Specifications. The Work must be done by competent workmen skilled in the trade required by the restoration.

1.23 CLEANING

A. During construction of the Work, keep the site of the Work and adjacent premises as free from material, debris and rubbish as is practicable and remove same from any portion of the site if, in the

opinion of the ENGINEER, such material, debris, or rubbish constitutes a nuisance or is objectionable.

Remove from the site all surplus materials and temporary structures when no further need therefore develops. Clean up all spillage and incur all associated costs including, but not limited to, costs related to repair and maintenance resulting from damages of such spills.

B. Final Cleaning

At the conclusion of the work, all erection plant, tools, temporary structures and materials belonging to the CONTRACTOR shall be promptly taken away, and remove and promptly dispose of all water, dirt, rubbish or any other foreign substances.

Thoroughly clean all equipment and materials installed and deliver such materials and equipment undamaged in a bright, clean, polished and new operating condition.

1.24 MISCELLANEOUS

A. Protection Against Siltation and Bank Erosion
1. Arrange operations to minimize siltation and bank erosion on construction sites and on existing or proposed water courses and drainage ditches.
2. Remove any siltation deposits and correct any erosion problems as recommended by the ENGINEER which results from the construction operations.

B. Protection of Wetland Areas

Properly dispose of all surplus material, including spoil, in accordance with Local, State and Federal regulations. Under no circumstances shall surplus material be disposed of in wetland areas as defined by the Florida Department of Environmental Regulation.

C. Existing Facilities

The work shall be so conducted to maintain existing facilities in operation insofar as is possible. Requirements and schedules of operations for maintaining existing facilities in service during construction shall be as described in the Specific Provisions.

D. Use of Chemicals

All chemicals used during project construction or furnished for project operation, whether herbicide, pesticide, disinfection, polymer, reactant, or of other classification, must show approval of either EPA or USDA. Use of all such chemicals and disposal of residues shall be in strict conformance with instructions.

E. Use of Explosives

The use of any type of explosive to carry out any portion of the work is strictly prohibited.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

Not Used.

END OF SECTION

SECTION 01010

SUMMARY OF WORK

PART 1 GENERAL

1.01 WORK INCLUDED

A. All of the work under this contract is located at the following site:

Village Main WTP: 360 Davis Road, Palm Springs, FL 33461

B. Furnish all labor, materials, equipment, tools, services and incidentals to complete all work required by these Specifications and as shown on the Drawings.

C. Perform the work complete, in place, and ready for continuous service, and include repairs, testing, permits, cleanup, replacements and restoration required as a result of damages caused during this construction.

D. All materials, equipment, skills, tools and labor which are reasonably and properly inferable and necessary for the proper completion of the work in a substantial manner and in compliance with the requirements stated or implied by these Specifications or Drawings shall be furnished and installed by the CONTRACTOR whether specifically indicated in the Contract Documents or not.

E. Comply with all Municipal, County, State, Federal, and other codes which are applicable to the proposed construction work.

1.02 GENERAL DESCRIPTION OF WORK

A. The project consists of upgrades and expansion of existing SCADA system and network at the Main Water Treatment Plant.

1.03 DETAILED DESCRIPTION OF COMPONENTS

A. Removal of existing equipment and components indicated by Drawings.

B. Furnish and install new control panels and remote I/O panels.

C. Furnish and install new fiber optic SCADA network.

D. Upgrade of SCADA head end network and computer systems per Drawings and Specifications.

E. SCADA system software upgrade inclusive of all programming.

F. Electrical Work.

G. Site restoration as indicated on the drawings and specified herein.

H. Provide all required survey work for layout, construction and record data.

I. Professional preconstruction video-audio tape of existing conditions of project impact areas as specified in Section 01720 - Project Record Drawings.

J. Coordinate and complete all permitting as specified herein.

K. Provide all required record drawings and other record documents.

L. All other required work whether implied or incidental to the proper completion of the project.

1.04 CONTRACT TIME

A. Contract times as specified in the Bid form and Agreement are as follows:

1. Substantial Completion = 270 calendar days from Notice to Proceed.
2. Final Completion = 30 calendar days from Date of Substantial Completion.

1.05 ALLOWANCES

A. The CONTRACTOR shall include in the Bid, the Lump Sum allowances itemized below to establish a fund which shall be used only by the CONTRACTOR with the specific approval of the ENGINEER to pay the cost of items not called for in these Specifications which cannot be anticipated at the time of Bidding. Payment for items of allowance shall be made in accordance with Article 11 of the General Conditions. Any unused balance of allowance shall revert to the OWNER upon completion of the Work.

BID ITEM	DESCRIPTION	AMOUNT
4.	Miscellaneous Work Allowance	$50,000.00
	TOTAL	$50,000.00

B. Additional contract time for providing miscellaneous work shall be as requested by CONTRACTOR and as approved by OWNER and ENGINEER.

1.06 PERMITS

A. The OWNER has obtained permits for the design and construction of these facilities from the following agencies:

1. None required.

B. Pursuant to the Public Bid Disclosure Act, the permits and fees which the CONTRACTOR must apply for, obtain and pay prior to or during this project are as follows:

1. Palm Springs Building Permit (Main WTP).

2. Register with Palm Springs Building Department, fees waived.

3. The CONTRACTOR shall verify all requirements, obtain and pay for all permits required for the demolition and disposal work required by this project.

4. Other permits may also be required for the Work from local, County, State or Federal authorities.

5. All associated permit fees (where not waived) shall be paid by the CONTRACTOR. Permit fees shall be reimbursed by payment through the Contract Miscellaneous Work Allowance.

6. ENGINEER shall furnish all required signed/sealed drawings necessary for permit submittals at the CONTRACTOR's request.

1.07 SPECIAL PROJECT CONSIDERATIONS

A. Work associated with this project must not adversely impact operation of Village water treatment plants or services to the Village of Palm Springs' residents. As a result, CONTRACTOR must coordinate the work to meet the following conditions:

1. Keep project area(s) clean, neat and clear of debris.

2. Maintain access for vehicles and staff throughout plant sites.

3. Facility is an active water treatment plant site. As a result, the following conditions must be met:

a. Minimum treatment capacity shall be maintained as follows:

Main WTP = 4.0 MGD

b. Minimum high service pumping operation shall be maintained as follows:

Main WTP = 4 of 5 pumps

4. Existing SCADA system computers shall remain in service and functional until new systems have been commissioned and are operational.

5. In the event the work requires a short term system shutdown, notification and a review meeting shall be scheduled with OWNER and ENGINEER a minimum of three (3) days in advance.

1.08 ALTERNATE ITEMS

A. The OWNER may require the following alternate items in the event they become necessary for the successful completion of this project:

1. None.

B. Alternate item(s) shall not be included or utilized in the bid evaluation process. If alternates are to be accepted, they will be added prior to the recommendation of award based on available funding at the time.

PART 2 PRODUCTS - Not Used.

PART 3 EXECUTION - Not Used.

END OF SECTION

SECTION 01050

FIELD ENGINEERING

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers all work required for the verification of preconstruction conditions, layout of proposed utility improvements, quality control and data gathering for the preparation of post-construction record drawings.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01300 - Submittals.

B. Section 01720 - Project Record Documents.

1.03 SUBMITTALS

A. Submit name, address and telephone number of Florida Registered Land Surveyor before starting work.

B. Submit copies of all post-construction record drawings and certificate signed by the approved Florida Registered Land Surveyor indicating that the elevations and locations of the work are as the work was constructed.

1.04 DEFINITIONS

A. Location: "As-Built" location (northing, easting coordinate) relative to plant site grid as indicated on Drawings.

B. Elevation: "As-Built" elevation relative to the North American Vertical Datum of 1988 (NAVD 88) and bench marks as indicated on drawings. The NAVD 88 datum is used unless noted otherwise in drawings.

C. Major Deflection: Change in horizontal or vertical alignment greater than 12-inches accomplished without the use of fittings.

D. Valve Elevation: "As-Built" elevation of valve operating nut.

1.05 QUALITY ASSURANCE

A. Land surveyor employed shall be registered in the State of Florida and acceptable to Engineer.

B. Where applicable, employ a professional engineer of the discipline required per specifications or for specific purpose on project, licensed in the State of Florida.

1.06 PROJECT RECORD DOCUMENTS DATA

A. Maintain a complete and accurate log of control and survey data for project record documents as project progresses.

B. Upon completion of the project or other intervals as requested by ENGINEER, submit certified "as-built" site survey data of the project improvements. Scale shall be same as ENGINEER's drawings and ENGINEER's drawings may be used as a base for surveyor's field data (redline markups).

C. The following data shall be provided as a minimum:

1. Locations of all new structures.

2. Provide "As-Built" information of all pertinent elevations and coordinates as shown on the Drawings.

3. Locations and elevations of all new yard piping fittings and valves greater than 3 inches in diameter.

4. Provide locations and general elevation of new yard piping less than 3 inches in diameter.

5. Location and elevation of all connections to existing systems.

6. Locations and elevations of all other site improvements, as applicable, such as but not limited to sidewalks, curbs and roadways.

7. Locations and elevations of re-established survey control points.

D. Submit final record drawings prior to final pay application at completion of project as specified in Section 01700 - Contract Closeout.

E. Record Drawings shall be prepared and submitted as specified in Section 01720 - Project Record Documents.

PART 2 PRODUCTS

NOT USED

PART 3 EXECUTION

3.01 EXAMINATION

A. Verify locations of survey control points and bench marks prior to starting work. Promptly notify ENGINEER of any discrepancies discovered.

3.02 SURVEY REFERENCE POINTS

A. Protect survey control points prior to starting site work; preserve permanent reference points during construction. Make no changes without prior written notice to ENGINEER.

B. Promptly report to ENGINEER the loss or destruction of any reference point or relocation required because of changes in grades or other reasons. Replace dislocated survey control points based on original survey control.

C. Provide affidavit from approved Florida Registered Surveyor that all survey control points were re-established following completion of construction.

3.03 SURVEY REQUIREMENTS

A. ENGINEER will furnish CONTRACTOR with horizontal and vertical control information. Responsibility for construction of the Work to correct dimensions, alignment and grade shall be CONTRACTOR's. Additional control points, as applicable, shall be provided for and established by CONTRACTOR's surveyor.

B. Establish locations and elevations of proposed improvements. Locate and lay out by instrumentation and similar appropriate means:

1. All utility improvements including locations and elevations.

2. Site improvements including: stakes for grading, fill and pavement.
3. Structure foundations, column locations and structure elevations.
4. Controlling lines and elevations as required for mechanical and electrical improvements.

C. Periodically verify layouts by same means indicated above.

D. In the event that pipe or other mechanical feature cannot be left exposed for surveyor to obtain "as-built" information, CONTRACTOR shall place PVC pipe at all major changes in horizontal or vertical alignment and at all locations required that will be buried. PVC pipe shall be of a diameter suitable for the insertion of a surveyor's rod and shall extend from finish grade to the top center of pipe, fitting, location, etc.

E. PVC pipe for survey data shall be removed by CONTRACTOR after survey data has been obtained.

3.04 SURVEYS FOR MEASUREMENT AND PAYMENT

A. Final project record drawings with "as-built" information of the installed utility systems components and structures of completed project shall be submitted and approved by ENGINEER prior to application for final payment.

B. Current Aas-built@ information shall be available for ENGINEER=s use for evaluation of partial pay requests.

Should ENGINEER find that the record drawings are incomplete at the time of partial pay request, then ENGINEER=s recommendation of payment may be withheld until record drawing deficiencies are corrected.

END OF SECTION

SECTION 01200

PROJECT MEETINGS

PART 1 GENERAL

1.01 WORK INCLUDED

A. The ENGINEER shall schedule and administer pre-construction meeting, periodic progress meetings, and specially called meetings throughout the progress of the work. ENGINEER shall also:

1. Prepare agenda for meetings.
2. Make physical arrangement for meetings.
3. Preside at meetings.
4. Prepare and distribute minutes of the meetings.

B. Representatives of contractors, subcontractors and suppliers attending meetings shall be qualified and authorized to act on behalf of the entity each represents.

C. The CONTRACTOR shall attend meetings to ascertain that work is expedited consistent with Contract Documents and construction schedules.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 00100 - Instructions to Bidders.

B. Section 01300 - Submittals.

C. Section 01720 - Project Record Documents.

1.03 PRECONSTRUCTION CONFERENCE

A. Schedule a preconstruction meeting no later than 20 days after date of Notice to Proceed.

B. Location: A central site, convenient for all parties, designated by the ENGINEER.

C. Attendance:
1. OWNER's Representative.
2. ENGINEER and his Professional Consultants.
3. Resident Project Representative.
4. CONTRACTOR's Superintendent.
5. Major subcontractors.
6. Major suppliers.
7. Utilities.
8. Others as appropriate.

D. Suggested Agenda:
1. Distribution and discussion of:
    a. List of major subcontractors and suppliers.
    b. Projected Construction Schedules.
2. Critical work sequencing.
3. Major equipment deliveries and priorities.
4. Project Coordination.
    a. Designation of responsible personnel.

5. Procedures and processing of:
    a. Field orders.
    b. Requests for Information (RFI).
    c. Requests for Proposal (RFP).
    d. Submittals.
    e. Change Orders.
    f. Applications for Payment.
6. Adequacy of distribution of Contract Documents.
7. Procedures for maintaining Record Documents.
8. Use of premises:
    a. Office, work and storage areas.
    b. OWNER's requirements.
9. Construction facilities, controls and construction aids.
10. Temporary utilities.
11. Housekeeping procedures.
12. Check of required Bond and Insurance certifications.
13. Liquidated damages.
14. Request for a weekly job meeting for all involved.
15. Laboratory testing of material requirements.
16. Inventory of material stored on site provision.
17. Other Items as applicable.

1.04 PROGRESS MEETINGS

A. ENGINEER will schedule and administer Project meetings throughout progress of the Work at maximum monthly intervals, specially called meetings and pre-installation conferences.

B. ENGINEER will make physical arrangements for meetings, prepare agenda with copies for participants, preside at meetings, record minutes, and distribute copies within two days to ENGINEER, participants, and those affected by decisions made at meetings.

C. Location: Project field office of CONTRACTOR or ENGINEER or a central site convenient to all parties.

D. Attendance:
    1. ENGINEER, and his professional consultants as needed.
    2. Subcontractors as appropriate to the agenda.
    3. Suppliers as appropriate to the agenda.
    4. Others as appropriate.

E. Suggested Agenda:
    1. Review, approval of minutes of previous meeting.
    2. Review of work progress since previous meeting.
    3. Field observations, problems, conflicts.
    4. Problems which impede Construction Schedule.
    5. Review of off-site fabrication, delivery schedules.
    6. Corrective measures and procedures to regain projected schedule.
    7. Revisions to Construction Schedule.
    8. Progress, schedule, during succeeding work period.
    9. Coordination of schedules.
    10. Review submittal schedules; expedite as required.
    11. Maintenance of quality standards.
    12. Pending changes and substitutions.
    13. Review proposed changes for:
        a. Effect on Construction Schedule and on completion date.
        b. Effect on other contracts of the Project.
    14. Other business.

15. Construction schedule.
16. Critical/long lead items.

F. The CONTRACTOR is to attend progress meetings and is to study previous meeting minutes and current agenda items, in order to be prepared to discuss pertinent topics such as deliveries of materials and equipment, progress of the work, etc.

G. The CONTRACTOR is to provide a current submittal log at each progress meeting in accordance with Section 01300 - Submittals.

1.05 PRE-INSTALLATION CONFERENCES

A. When required in individual specification Section, a pre-installation conference will be arranged prior to commencing work of the Section.

B. Require attendance of entities directly affecting, or affected by, work of the Section.

C. Review conditions of installation, preparation and installation procedures, and coordination with related work.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

Not Used.

END OF SECTION

SECTION 01300

SUBMITTALS

PART 1 GENERAL

1.01 WORK INCLUDED

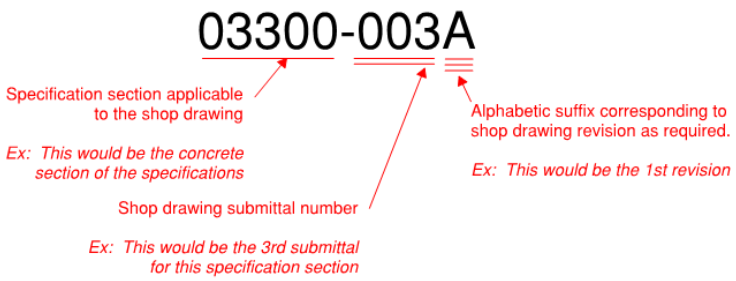
A. Prepare and submit construction progress schedules, proposed products list, shop drawings, product data, samples, manufacturers' instructions, and manufacturers' certificates, complete and in accordance with the Contract Documents.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 00705 - GENERAL CONDITIONS.

B. Section 00815 - Supplementary Conditions.

C. Section 01700 - Contract Closeout.



D. Section 01720 - Project Record Documents.

E. Individual Specification Sections: Additional specific requirements for submitted data.

1.03 SUBMITTAL PROCEDURES

A. Transmit each submittal with ENGINEER accepted form. Electronic submittals (via email) are preferred.

B. Sequentially number the transmittal forms. Resubmittals to have original number with an alphabetic suffix.

C. Identify Project, CONTRACTOR, Subcontractor or supplier; pertinent Drawing sheet and detail number(s), and specification Section number, as appropriate.

D. Drawings and schedules shall be checked and coordinated with the work of all trades involved, before they are submitted for review by the ENGINEER and shall bear the CONTRACTOR's stamp of approval as evidence of such checking and coordination. Drawings or schedules submitted without this stamp of approval shall be returned to the CONTRACTOR for resubmission.

E. Schedule submittals to expedite the Project, and deliver to ENGINEER at Eckler Engineering, Inc., 4700 Riverside Drive, Suite 110, Coral Springs, Florida 33067 and allow 20 days for review. Electronic

submittals shall be emailed to Eckler Engineering=s project manager for review.

F. If submittal documents/shop drawings show variations from Contract requirements because of standard shop practice or for other reasons, describe such variations in the letter of transmittal. If acceptable, proper adjustment in the Contract shall be implemented where appropriate. Failure to describe such variations does not relieve the CONTRACTOR of the responsibility for executing the work in accordance with the Contract, even though such drawings have been reviewed.

G. Each Shop Drawing shall have a blank area 3-1/2 inches by 3-1/2 inches, located adjacent to the title block. The title block shall display the following:
1. Number and title of the drawing.
2. Date of drawing or revision.
3. Name of project building or facility.
4. Name of contractor and subcontractor submitting drawing.
5. Clear identification of contents and location of the work.
6. Specification title and number.
7. Specification Section.
8. Applicable Drawing Number.

H. Revise and resubmit submittals as required; identify all changes made since previous submittal.

I. Distribute copies of reviewed submittals to concerned parties. Instruct parties to promptly report any inability to comply with provisions.

J. Requirements in this Section are in addition to any specific requirements for submittals specified in other Divisions and Sections of these Contract Documents.

1.04 CONSTRUCTION PROGRESS SCHEDULES

A. Submit initial progress schedule in triplicate within 15 days after date established in the Notice to Proceed for ENGINEER review.

B. Revise and resubmit as required.

C. Submit revised schedules with each Application for Payment, identifying changes since previous version.

D. Submit computer generated network analysis diagram using the critical path method, generally as outlined in Associated General Contractors of America (AGC) publication "The Use of CPM in Construction - A Manual for General Contractors and the Construction Industry".

E. Show complete sequence of construction by activity, identifying Work of separate stages and other logically grouped activities. Indicate the early and late start, early and late finish, float dates, and duration.

F. Indicate estimated percentage of completion for each item of Work at each submission.

G. Indicate submittal dates required for shop drawings, product data, samples, and product delivery dates, including those furnished by the OWNER and under Allowances.

1.05 PROPOSED PRODUCTS LIST

A. Within 30 days after date established in the Notice to Proceed, submit a complete list of major products proposed for use, with name of manufacturer, trade name, and model number of each product.

B. For products specified only by reference standards, give manufacturer, trade name, model or catalog designation, and reference standards.

1.06 SHOP DRAWINGS

A. Submit the number of copies which CONTRACTOR requires, plus three copies, which will be retained by ENGINEER (maximum of eight).

B. After review, distribute in accordance with Article on Procedures above and for Record Documents described in Section 01720 - Project Record Documents.

C. When used in the Contract Documents, the term "Shop Drawings" shall be considered to mean, in addition to the definition in Section 00705 - GENERAL CONDITIONS, Contractor's drawings plans for material and equipment which become an integral part of the Project. These drawings shall be complete and detailed. Shop Drawings shall consist of fabrication, erection and setting drawings and schedule drawings, manufacturer's scale drawings, and wiring and control diagrams. Cuts, catalogs, pamphlets, descriptive literature, and performance and test data, shall be considered only as supportive to required Shop Drawings as defined above.

D. Data on materials and equipment include, without limitation, materials and equipment lists, catalog data sheets, cuts, performance curves, diagrams, materials of construction and similar descriptive material. Materials and equipment lists shall give, for each item thereon, the name and location of the supplier or manufacturer, trade name, catalog reference, size, finish and all other pertinent data.

E. For all mechanical and electrical equipment furnished, provide a list including the equipment name, address, telephone number of the manufacturer's representative and service company so that service and/or spare parts can be readily obtained.

F. All manufacturers or equipment suppliers who proposed to furnish equipment or products shall submit an installation list to the ENGINEER along with the required shop drawings. The installation list shall include at least five installations where identical equipment has been installed and has been in operation for a period of at least one (1) year.

G. **Only the ENGINEER will utilize the color "red" in marking Shop Drawing submittals.**

1.07 PRODUCT DATA

A. Submit the number of copies which the CONTRACTOR requires, plus four copies which will be retained by the ENGINEER (with a maximum of eight).

B. Mark each copy to identify applicable products, models, options, and other data. Supplement manufacturers' standard data to provide information unique to this Project.

C. After review, distribute in accordance with Article on Procedures above and provide copies for Record Documents described in Section 01720 - Project Record Documents.

1.08 SAMPLES

A. Submit samples to illustrate functional and aesthetic characteristics of the Product, with integral parts and attachment devices. Coordinate sample submittals for interfacing work.

B. Submit samples of finishes in custom colors selected, textures, and patterns for ENGINEER's selection.

C. Include identification on each sample, with full Project information.

D. Submit the number or samples specified in individual specification Sections; one of which will be retained by ENGINEER.

E. Samples not destroyed in testing shall be sent to the ENGINEER or stored at the site of the work. Accepted samples of the hardware in good condition will be marked for identification and may be used in the work. Materials and equipment incorporated in the work shall match the accepted samples. Samples which failed testing or are not accepted will be returned to the CONTRACTOR at his expense, if so requested at time of submission.

1.09 MANUFACTURER'S INSTRUCTIONS

A. When specified in individual specification Sections, submit manufacturers' printed instructions for delivery, storage, assembly, installation, start-up, adjusting, and finishing, in quantities specified for Product Data.

B. Identify conflicts between manufacturers' instructions and Contract Documents.

1.10 MANUFACTURER'S CERTIFICATES

A. When specified in individual specification Sections, submit manufacturers' certificate to ENGINEER for review, in quantities specified for Product Data.

B. Indicate material or Product conforms to or exceeds specified requirements. Submit supporting reference date, affidavits, and certifications as appropriate.

C. Certificates may be recent or previous test results on material or Product, but must be acceptable to ENGINEER.

PART 3 EXECUTION

Not Used.

END OF SECTION

SECTION 01400

QUALITY CONTROL

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers the work as required to provide and/or coordinate:

1. Quality assurance and control of installation.

2. References.

3. Field samples.

4. Inspection and testing laboratory services.

5. Manufacturers' field services and reports.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01300 - Submittals

1.03 REFERENCES

A. Conform to reference standards by date of current issue on date for receiving bids.

B. Should specified reference standards conflict with Contract Documents, request clarification from ENGINEER before proceeding.

C. The contractual relationship of the parties to the Contract shall not be altered from the Contract Documents by mention or inference otherwise in any reference document.

1.04 QUALITY ASSURANCE/CONTROL OF INSTALLATION

A. Monitor quality control over suppliers, manufacturers, products, services, site conditions, and workmanship, to produce Work of specified quality.

B. Comply fully with manufacturers' instructions, including each step in sequence.

C. Should manufacturers' instructions conflict with Contract Documents, request clarification from ENGINEER before proceeding.

D. Comply with specified standards as a minimum quality for the Work except when more stringent tolerances, codes, or specified requirements indicate higher standards or more precise workmanship.

E. Perform work by persons qualified to produce workmanship of specified quality.

F. Secure Products in place with positive anchorage devices designed and sized to withstand stresses, vibration, physical distortion or disfigurement.

1.05 FIELD SAMPLES

A. Install field samples at the site as required by individual specification Sections for review.

B. Acceptable samples represent a quality level for the Work.

C. Where field sample is specified in individual Sections to be removed, clear area after field sample has been accepted by ENGINEER.

1.06 INSPECTION AND TESTING LABORATORY SERVICES

A. OWNER will appoint, employ, and pay for services of an independent firm to perform inspection and testing of earthwork, concrete, road base, and asphalt.

B. The independent firm will perform inspections, tests, and other services specified in individual specification Sections and as required by the ENGINEER.

C. Reports will be submitted by the independent firm to the ENGINEER indicating observations and results of tests and indicating compliance or non-compliance with Contract Documents. Number of signed/sealed reports required shall be established at preconstruction meeting.

D. Cooperate with independent firm; furnish samples of materials, design mix, equipment, tools, storage and assistance as requested.
   1. Notify ENGINEER and independent firm 24 hours prior to expected time for operations requiring services.
   2. Make arrangements with independent firm and pay for additional samples and tests required for CONTRACTOR's use.

E. Retesting required because of non-conformance to specified requirements shall be performed by the same independent firm on instructions by the ENGINEER. Payment for retesting will be charged to the CONTRACTOR by deducting inspection or testing charges from the Contract Sum/Price.

1.07 MANUFACTURERS' FIELD SERVICES AND REPORTS

A. Submit qualifications of manufacturer’s representative to ENGINEER 30 days in advance of required observations. Manufacturer’s representative subject to acceptance of ENGINEER.

B. When specified in individual specification Sections, require material or Product suppliers or manufacturers to provide qualified staff personnel to observe site conditions, conditions of surfaces and installation, quality of workmanship, start-up of equipment, test, adjust, and balance of equipment and place equipment into operation as applicable, and to initiate instructions when necessary.

C. Individuals to report observations and site decisions or instructions given to applicators or installers that are supplemental or contrary to manufacturers' written instructions.

D. Submit report in triplicate within 30 days of observation to ENGINEER for review.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

Not Used.

END OF SECTION

SECTION 01500

CONSTRUCTION FACILITIES AND TEMPORARY CONTROLS

PART 1 GENERAL

1.01 WORK INCLUDED

A. Temporary Utilities: Electricity, lighting, heat, ventilation, telephone service, water, and sanitary facilities.

B. Temporary Controls: Enclosures and fencing, protection of the Work, road closings, traffic control, temporary bypass sanitary pumping, confined space entry requirements, stormwater management (NPDES), and water control.

C. Construction Facilities: Access roads, parking, progress cleaning, and temporary buildings.

D. Some of the items specified herein are not specifically required for the project. However, these items may be provided as required for the convenience of the CONTRACTOR or as required for proper completion of the Work.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 02500 - Restoration and Cleanup.

1.03 TEMPORARY ELECTRICITY

A. Existing facility electrical power service can be used for construction trailers, storage areas and general construction purposes. CONTRACTOR may use the existing and upgraded electrical services.

B. Existing permanent convenience receptacles may be utilized during construction for small power tools and lighting local to Work.

C. CONTRACTOR will not be charged for electrical service used.

D. Provide connections to existing facilities, sized to provide service required for power and lighting, as required.

E. Provide properly configured NEMA polarized outlets to prevent insertion of 110-120 volt plugs into higher voltage outlets. For connection of power tools and equipment, provide outlets equipped with ground-fault circuit interrupters, reset button and pilot light, as required.

F. Provide grounded extension cords. Use "hard-service" cords where exposed to abrasion and traffic. Provide waterproof connectors to connect separate lengths of electric cords if more than one length is required.

G. Provide general service lighting as required for adequate illumination. Provide guard cages or tempered glass bulb/fixture

enclosures, where exposed to breakage. Provide exterior rated fixtures where exposed to moisture.

1.04 TEMPORARY LIGHTING (AS APPLICABLE)

A. Provide and maintain 1 watt/sq ft lighting to exterior staging and storage areas after dark for security purposes.

B. Maintain lighting and provide routine repairs.

1.05 TEMPORARY VENTILATION

A. Ventilate enclosed areas to assist cure of materials, to dissipate humidity, and to prevent accumulation of dust, fumes, vapors, or gases.

1.06 CONFINED SPACE ENTRY REQUIREMENTS

A. CONTRACTOR shall obtain all entry permits and provide all equipment and procedures as required to meet confined space entry requirements in accordance with the following legal authorities:

1. Occupational Safety and Health Act (OSHA), Title 29 CFR 1910.146 "Permit Required Confined Spaces".

2. Florida Statute - Chapter 38 T-20 Section .035. "Hazardous Atmospheres in Confined Spaces".

1.07 TEMPORARY WATER SERVICE (AS APPLICABLE)

A. Provide and maintain suitable quality water service, as required, for construction operations.

B. All water used must be metered by OWNER, but CONTRACTOR will not be charged for the metered water use.

C. Extend branch piping with outlets located so water is available by hoses with threaded connections.

D. Make arrangements with OWNER for obtaining meter.

E. Provide reduced pressure principle backflow preventer, Watts Series 909, or equal, for all temporary water services.

1.08 TEMPORARY SANITARY FACILITIES

A. Provide self-contained, single-occupant toilet units of the chemical, aerated recirculation, or combustion type, properly vented and fully enclosed in a fiberglass or other approved non-absorbent shell.

1.09 TEMPORARY CONSTRUCTION FENCING

A. Construction Fence: Commercial grade chain link fence or bright orange-colored, high density, polyethylene safety fence. Minimum fence height shall be 4 feet.

B. Provide construction fence to secure entire construction area at all times when CONTRACTOR's personnel are not present.

C. Gates shall be provided with padlocks.

1.10 CONTRACTOR'S FIELD OFFICES AND STORAGE TRAILERS/CONTAINERS

A. Office: Weather-tight, with lighting, electrical outlets, heating, cooling and ventilating equipment, sanitation facilities, and equipped with sturdy furniture.

B. Provide space for project meetings with table and chairs to accommodate 8 persons.

C. Provide private space (lockable room), desk, chair, and filing cabinet for ENGINEER'S USE.

D. Locate offices and sheds a minimum distance of 30 feet from new structures and proposed underground construction.

E. Recommended location for CONTRACTOR’s office trailer and storage facilities shall be indicated on drawings.

1.11 PROTECTION OF INSTALLED WORK

A. Protect installed Work and provide special protection where specified in individual specification Sections.

B. Provide temporary and removable protection for installed Products. Control activity in immediate work area to minimize damage.

C. Prohibit traffic from landscaped areas.

1.12 PARKING

A. Temporary parking areas for CONTRACTOR’s and ENGINEER’s project personnel shall be indicated on Drawings.

1.13 PROJECT IDENTIFICATION (WHEN INDICATED ON DRAWINGS)

A. Provide minimum 6'-6"w x 5'-0"h project sign of exterior grade plywood and wood frame construction, painted, with exhibit lettering by a professional sign painter to ENGINEER's design and colors. Sign shall withstand weathering, fading, and chipping for the duration of construction. General design as required for the project sign shall be as shown on the Drawings.

B. List title of Project, names of OWNER, ENGINEER, professional sub-consultants and CONTRACTOR.

C. Erect on site at location established by OWNER and ENGINEER.

D. No other signs are allowed without OWNER permission except those required by applicable law.

E. Submit sketch of project sign in accordance with Section 01300 - Submittals.

1.14 FIRE EXTINGUISHERS

A. Provide portable UL-rated, Class A fire extinguishers for temporary offices and similar spaces. In other locations, provide portable UL-rated Class ABC dry chemical extinguishers or a combination of NFPA recommended Classes for the exposure. Comply with NFPA 10 and 241 for classification, extinguishing agent and size required by location and class of fire exposure.

1.15 PROTECTION OF EXISTING STRUCTURES

A. CONTRACTOR shall provide screens or other such means to prevent splatter of concrete, paint or other such substance from staining or damaging the nearby existing structures, equipment or vehicles.

B. CONTRACTOR shall be responsible for cleaning and repairing all damages caused by overspray.

1.16 FUEL STORAGE

A. All fuel or other such regulated substances stored on site by CONTRACTOR shall be done so in accordance with the rules and regulations of the Palm Beach County Department of Environmental Resources Management.

1.17 PROGRESS CLEANING

A. Maintain areas free of waste materials, debris, and rubbish. Maintain sites in a clean and orderly condition.

B. Broom and vacuum clean interior areas prior to start of surface finishing and continue cleaning to eliminate dust.

C. Remove waste materials, debris, and rubbish from sites weekly and dispose of at an approved site.

1.18 REMOVAL OF TEMPORARY UTILITIES, FACILITIES, AND CONTROLS

A. Remove temporary above grade or buried utilities, equipment, facilities, materials, prior to Final Inspection.

B. Clean and repair damage caused by installation or use of temporary work.

C. Restore existing facilities used during construction to original condition. Restore permanent facilities used during construction to specified condition.

1.19 CONSTRUCTION DEBRIS DISPOSAL

A. Dumpster and/or roll-off container service shall be provided by CONTRACTOR.

B. Other lawful debris haul-off (dump trucks) by CONTRACTOR.

PART 2 PRODUCTS

END OF SECTION

SECTION 01505

MOBILIZATION/DEMOBILIZATION

PART 1 GENERAL

1.01 WORK INCLUDED

A. Mobilization shall include obtaining of all permits, insurance, and bonds; moving onto site of equipment; temporary buildings, and other construction facilities; all as required for proper performance and completion of the Work. Mobilization shall include but not be limited to the following principal items:

1. Moving onto site of CONTRACTOR's labor and equipment required for first month's operation.

2. Providing field office trailers with all specified furnishings and utility services and appurtenances, if required by specifications.

3. Providing on-site sanitary facilities, potable water facilities and electrical service, as specified.

4. Submittal of all required insurance certificates, bonds and work progress schedules.

5. Obtaining all required permits.

6. Posting all OSHA required notices and establishment of safety programs.

7. Have CONTRACTOR's superintendent at job site full time.

8. Project identification sign (When required by the Drawings).

B. Demobilization shall include but not be limited to the following principle items:

1. Removal of all temporary construction facilities.

2. Removal of all equipment and excess materials.

3. Cleanup and restoration of the site to conditions existing prior to construction.

1.02 PAYMENT FOR MOBILIZATION/DEMOBILIZATION

A. CONTRACTOR's attention is directed to the condition that no payment for mobilization/demobilization, or any part thereof, will be recommended for payment under the Contract until all Mobilization/Demobilization items listed above have been completed as specified.

B. As soon as practicable after receipt of Notice to Proceed, CONTRACTOR shall submit a breakdown to ENGINEER for review, which shall show estimated value of each major component of mobilization/demobilization. When reviewed by ENGINEER, breakdown will be basis for initial progress payments in which Mobilization is included.

C. It shall be understood that the Mobilization/Demobilization item on Lump Sum Base Bid Breakdown includes a sum paid by OWNER to CONTRACTOR in recognition of CONTRACTOR's indemnification obligations. CONTRACTOR shall acknowledge payment of such consideration by letter to OWNER.

PART 2 PRODUCTS

END OF SECTION

SECTION 01700

CONTRACT CLOSEOUT

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers the work as related to contract closeout procedures, final inspection, CONTRACTOR's closeout submittals and final application for payment.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01720 - Project Record Documents.

B. Individual Sections - Testing and Closeout Requirements.

1.03 SUBSTANTIAL COMPLETION

A. When CONTRACTOR considers the Work is substantially complete, he shall submit to the ENGINEER:
   1. A written notice that the Work, or designated portion thereof, is substantially complete.
   2. A list of items to be completed or corrected.

B. Within a reasonable time after receipt of such notice, the ENGINEER will make an inspection to determine the status of completion.

C. Should the ENGINEER determine that the Work is not substantially complete:
   1. The ENGINEER will promptly notify the CONTRACTOR in writing, giving the reasons therefor.
   2. CONTRACTOR shall remedy the deficiencies in the Work, and send a second written notice of substantial completion to the ENGINEER.
   3. The ENGINEER will reinspect the Work.

D. When the ENGINEER finds that the Work is substantially complete, he will:
   1. Prepare and deliver to OWNER a tentative Certificate of Substantial Completion on NSPE Form 1910-8-D, with a tentative list of items to be completed or corrected before final payment.
   2. After consideration of any objections made by the OWNER as provided in GENERAL CONDITIONS, and when the ENGINEER considers the Work substantially complete, he will execute and deliver to the OWNER and the CONTRACTOR a definite Certificate of Substantial Completion with a revised tentative list of items to be completed or corrected.

1.04 FINAL COMPLETION

A. When CONTRACTOR considers the Work is complete, he shall submit written certification that:
   1. Contract Documents have been reviewed.
   2. Work has been inspected for compliance with Contract Documents.
   3. Work has been completed in accordance with Contract Documents.
   4. Equipment and systems have been tested in the presence of the OWNER's representative and are operational.

5. Work is completed and ready for final inspection.

B. The ENGINEER will make an inspection to verify the status of completion with reasonable promptness after receipt of such certification.

C. Should the ENGINEER consider that the Work is incomplete or defective:
   1. The ENGINEER will promptly notify the CONTRACTOR in writing, listing the incomplete or defective work.
   2. CONTRACTOR shall take immediate steps to remedy the stated deficiencies, and send a second written certification to the ENGINEER that the Work is complete.
   3. The ENGINEER will reinspect the Work.

D. When the ENGINEER finds that the Work is acceptable under the Contract Documents, he shall request the CONTRACTOR to make final closeout submittals.

1.05 REINSPECTION FEES

A. Should the ENGINEER perform reinspections due to failure of the Work to comply with the claims of status of completion made by the CONTRACTOR:
   1. OWNER will deduct the amount of such compensation from the final payment to the CONTRACTOR.

1.06 CONTRACTOR'S CLOSEOUT SUBMITTALS TO ENGINEER

A. Evidence of Payment and Release of Liens: To requirements of GENERAL and SUPPLEMENTARY CONDITIONS.

B. Certificate of Insurance for Products and Completed Operations.

C. Consent of Surety for Final Payment.

1.07 FINAL ADJUSTMENT OF ACCOUNTS

A. Submit a final statement of accounting to the ENGINEER.

B. Statement shall reflect all adjustments to the contract Sum:
   1. The original Contract Sum.
   2. Additions and deductions resulting from:
      a. Previous Change Orders.
      b. Allowances.
      c. Unit Prices.
      d. Deductions for uncorrected Work.
      e. Penalties and Bonuses.
      f. Deductions for liquidated damages.
      g. Deductions for reinspection payments.
      h. Other adjustments.
   3. Total Contract Sum, as adjusted.
   4. Previous payments.
   5. Sum remaining due.

C. ENGINEER will prepare a final Change Order, reflecting recommended adjustments to the Contract Sum which were not previously made by Change Order(s).

1.08 FINAL APPLICATION FOR PAYMENT

A. ENGINEER shall send written request directing CONTRACTOR to make final application for payment once the following conditions have been met:

1. All work per contract has been satisfactorily completed.

2. All contract closeout deliverables have been submitted by CONTRACTOR and approved by ENGINEER.

3. The requirements of all permits obtained by OWNER and CONTRACTOR have been satisfied.

4. All closeout submittals per Article 1.06 above have been delivered to ENGINEER.

5. Final contract change order has been approved.

B. CONTRACTOR shall submit the final Application for Payment in accordance with procedures and requirements stated in the Conditions of the Contract.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

Not Used.

END OF SECTION

SECTION 01720

PROJECT RECORD DOCUMENTS

PART 1 GENERAL

1.01 WORK INCLUDED

A. Collect, maintain, and provide the required record documents and samples for the project, including record drawings, and construction photographs.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 00705 - GENERAL CONDITIONS

B. Section 00815 - Supplementary Conditions.

C. Section 01300 - Submittals.

D. Section 01700 - Contract Closeout

E. Individual Specification Sections: Manufacturer's certificates and certificates of inspections and samples.

1.03 SUBMITTALS

A. At Contract closeout, deliver Record Documents and samples under provisions of Section 01700 - Contract Closeout.

B. Submittal quantities shall be as follows:

1. Final Record Drawings - two (2) sets.
2. Construction photographs - two (2) sets with CD’s.
1. Preconstruction audio/video DVD - two (2) copies.

C. Submittals shall be made in accordance with the requirements of Section 01300 - Submittals.

1.04 DEFINITIONS

A. ZONE OF INFLUENCE: Area in which surface and/or underground facilities or features will be disturbed by progress of work.

1.05 MAINTENANCE OF DOCUMENTS AND SAMPLES

A. In addition to requirements in GENERAL CONDITIONS, maintain at the site for OWNER one record copy of:
1. Contract Drawings.
2. Specifications.
3. Addenda.
4. Change Orders and other modifications to the Contract.
5. ENGINEER's field orders or written instructions.
6. Reviewed shop drawings, product data, and samples.
7. Field test records.
8. Inspection certificates.
9. Manufacturer's certificates.
10. Construction photographs.

B. Store Record Documents and samples apart from documents used for construction. Provide organized, dry, secure storage for Record Documents.

C. Label Record Documents and samples in accordance with Section number listings in Table of Contents of this Project Manual. Label each document "PROJECT RECORD" in neat, large, printed letters.

D. Maintain Record Documents in a clean, dry and legible condition. Do not use Record Documents for construction purposes.

E. Keep Record Documents and samples available for inspection by ENGINEER.

1.06 RECORDING (RECORD DATA)

A. Record information on a set of blackline drawings and in a copy of the Contract Documents (Specifications) Book provided by ENGINEER.

B. Provide color marking pens for recording information. Color coding system used shall be approved by ENGINEER. Recommended color coding system as follows:

Green = Deleted Item or Work
Red = Revised Item or Work
Blue = Notation or Clarification

C. Record information concurrently with construction progress. Do not conceal any work until required information is recorded.

D. Contract Drawings and Shop Drawings: Legibly mark each item to record actual construction, including:
1. Horizontal locations and vertical elevations of bridge and appurtenances, structure corners, paving corners and other site improvements per Section 01050 - Field Engineering.
2. Measured locations of internal utilities and appurtenances concealed in construction, referenced to visible and accessible features of construction.
3. Field changes of dimension and detail of all disciplines.
4. Changes made by Modifications of all disciplines.
5. Details not on original Contract Drawings of all disciplines.
6. References to related shop drawings and Modifications of all disciplines.
7. Show field location and relative elevation of all located existing underground facilities not shown on contract drawings.
8. Show field location and relative elevation confirming all located existing underground facilities shown on drawings.
9. Dimensional changes to drawings.
10. Revisions to details shown on drawings.
11. Depths of foundations.
12. Locations and depths of underground utilities.
13. Revisions to routing of piping and conduits.
14. Revisions to electrical circuitry.
15. Actual equipment locations.
16. Duct size and routing.
17. Locations of concealed internal utilities.
18. Changes made by Change Order or Construction Change Directive.
19. Details not on the original Contract Drawings.
20. Field records for variable and concealed conditions.

21. Record information on the Work that is shown only schematically.
22. In general, document all revisions/modifications to contract documents.

E. Specifications: Legibly mark each item to record actual construction, including:
1. Manufacturer, trade name, and catalog number of each product actually installed, paying particular attention to optional items and substitute items.
2. Changes made by Addenda and Modifications.

F. Other Documents: Maintain manufacturer's certifications, inspection certifications, and field test records, required by individual Specification sections.

1.07 CONSTRUCTION PHOTOGRAPHS

A. Provide photographs in color showing the preconstruction conditions, construction progress, and the post-construction conditions.

B. Photographs shall be taken by an experienced photographer.

C. The photographer shall be equipped to take interior/exterior photographs as directed by the ENGINEER.

D. Photographs shall be taken throughout the construction process and show excavations, piping details, construction which will ultimately be hidden from view and the final completion. Provide sufficient quantity of photographs to adequately detail construction.

E. Provide two (2) sets of construction photographs. These prints shall measure 3-1/2" x 5". All prints shall be mounted in plastic photographic binders. Also provide two (2) CD’s with all photos.

F. Identify each print with the date, orientation of view, and a description of the view.

G. Deliver CD’s and two sets of prints, all in three-ring binders and sequentially labeled to the ENGINEER upon completion of the project. Binders shall be labeled to indicate project name and number, contractor, owner, engineer and year of project.

1.08 COLOR AUDIO-VISUAL PRECONSTRUCTION RECORD

A. General

1. Prior to commencing work, CONTRACTOR shall have a continuous color audio-video DVD recording taken along entire length of Project to serve as a record of preconstruction conditions. No work shall begin prior to review and acceptance of video covering the work area(s) by ENGINEER. ENGINEER shall have authority to reject all or any portion of the video DVD not conforming to specifications and order that it be redone at no additional charge. CONTRACTOR shall reschedule unacceptable coverage within five days after being notified. ENGINEER shall designate those areas, if any, to be omitted from or added to audio-video coverage. DVD recordings shall not be made more than 90 days prior to work in any area. All DVD(s) and written records shall become property of OWNER.

2. CONTRACTOR shall engage services of a professional videographer. Color audio-video DVD(s) shall be prepared by a responsible commercial firm known to be skilled and regularly engaged in the business of preconstruction color audio-video documentation. Electrographer shall furnish to ENGINEER a list of all equipment to be used for audio-video recording, i.e. manufacturer's name, model number, specifications and other pertinent information. Additional information to be furnished by electrographer is the names and addresses of two references that electrographer has performed color audio-video recording for projects of a similar nature within the last 12 months.

B. Audio-Video DVD(s)

1. Audio-video DVD(s) shall be new. Reprocessed DVD(s) will not be acceptable. The DVD(s) shall be compatible for playback with a standard DVD player, -R or +R format.

C. Equipment

1. All equipment, accessories, materials and labor to perform this service shall be furnished by CONTRACTOR.

2. Total audio-video system shall reproduce bright, sharp, clear pictures with accurate colors and shall be free from distortion, or any other form of imperfection. The audio portion of recording shall reproduce commentary of camera operator with proper volume, clarity and be free from distortion and interruptions.

3. When conventional wheeled vehicles are used, distance from the camera lens to ground shall not be less than 12 feet. In some instances, audio-video coverage may be required in areas not accessible by conventional wheeled vehicles. Such coverage shall be obtained by walking or special conveyance acceptable to ENGINEER.

4. Color video camera used in the recording system shall have horizontal resolution of 300 lines at center, a luminance signal to noise ratio of 45 db ad a minimum illumination requirement of 25 foot-candles.

D. Recorded Information - Audio

1. Each DVD shall begin with current date, project name and municipality (or owner) and be followed by general location, i.e., name of street, house address, viewing side and direction of progress. Audio track shall consist of an original living recording. The recording shall contain the narrative commentary of electrographer, recorded simultaneously with his fixed elevation video record of zone of influence of construction.

E. Recorded Information - Video

1. All video recordings must, by electronic means, display continuously and simultaneously, generated with actual taping, transparent digital information to include the date and time of recording and station numbers as shown on the Drawings. The date

information shall contain the hours, minutes and seconds. Additional information shall be displayed periodically. Such information shall include nut not be limited to project name, contract umber, name of street, house address, direction of travel and the viewing side. This transparent information shall appear on the extreme upper left hand third of the screen.

2. All recording shall be done during times of good visibility. No recording shall be done during precipitation, mist or fog. The recording shall only be done when sufficient sunlight is present to properly illuminate the subjects of recording and to produce bright, sharp video recordings of those subjects.

3. The rate of speed in the general direction of travel of the vehicle used during recording shall not exceed 44 feet per minute. Panning, zoom-in and zoom-out rates shall be sufficiently controlled to maintain a clear view of the object.

4. Video coverage shall include all surface features located within the zone of influence of construction supported by appropriate audio coverage. Such coverage shall include, but not be limited to existing driveways, sidewalks, curbs, pavements, ditches, mailboxes, landscaping, culverts, fences, signs, structures, and headwalls within the area covered.

PART 2 PRODUCTS

END OF SECTION

SECTION 01730

OPERATION AND MAINTENANCE DATA

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers the work required to prepare and submit operation and maintenance manuals for the project, complete all in accordance with the Contract Documents.

B. Some of the items specified herein are not specifically required for the project. However, these items shall be provided as required for the proper completion of the Work.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01010 - Summary of Work.

B. Section 01740 - Warranties and Bonds.

1.03 SUBMITTALS

A. Submit two copies of preliminary draft or proposed formats and outlines of contents prior to substantial completion of Work. ENGINEER will review draft and return one copy with comments.

B. Submit two (2) copies of completed volumes in final form 15 days prior to final completion. Copy will be returned with ENGINEER comments. Revise content of documents as required prior to final submittal.

D. Submit four (4) copies of revised volumes of data in final form within ten days after final completion.

1.04 QUALITY ASSURANCE

A. Prepare instructions and data by personnel experienced in maintenance and operation of described products.

1.05 GENERAL FORMAT (EACH VOLUME)

A. Prepare data in the form of an instructional manual.

B. Binders: Commercial quality, 8-1/2 x 11 inch three-ring binders with hardback, cleanable, plastic covers; 3 inch maximum ring size. When multiple binders are used, correlate data into related consistent groupings.

C. Cover: Identify each binder with typed or printed title OPERATION AND MAINTENANCE INSTRUCTIONS; list title of Project; identify subject matter of contents.

D. Arrange content by process flow under section numbers and sequence of Table of Contents of this Project Manual.

E. Provide tabbed fly leaf for each separate product and system, with typed description of product and major component parts of equipment.

F. Text: Manufacturer's printed data, or typewritten data on 20 pound paper.

G. Drawings: Provide with reinforced punched binder tab. Bind in with text; fold larger drawings to size of text pages.

1.06 OPERATION AND MAINTENANCE MANUALS (EACH VOLUME)

A. Provide title of Project; owner's name; names, addresses, and telephone numbers of ENGINEER, subconsultants, and CONTRACTOR with name of responsible parties; schedule of products and systems, indexed to content of the volume.

B. Table of Contents: schedule of contents and systems, indexed to each volume.

C. For Each Product or System: List names, addresses and telephone numbers of Subcontractors and suppliers, including local source of supplies and replacement parts.

D. Product Data: Mark each sheet to clearly identify specific products and component parts, and data applicable to installation. Delete inapplicable information.

E. Drawings: Supplement product data to illustrate relations of component parts of equipment and systems, to show control and flow diagrams. Do not use Project Record Documents as maintenance drawings.

F. Type Text: As required to supplement product data. Provide logical sequence of instructions for each procedure, incorporating manufacturer's instructions.

1.07 EQUIPMENT AND SYSTEMS DATA

A. Each Item of Equipment and Each System: Include description of unit or system, and component parts. Identify function, normal operating characteristics, and limiting conditions. Include performance curves, with engineering data and tests, and complete nomenclature and commercial number of replaceable parts.

B. Panelboard Circuit Directories: Provide electrical service characteristics, controls and communications.

C. Operating Procedures: Include start-up, break-in, and routine normal operating instructions and sequences. Include regulation, control, stopping, shut-down, and emergency instructions. Include summer, winter, and any special operating instructions.

D. Maintenance Requirements: Include routine procedures and guide for trouble-shooting; disassembly, repair, and reassembly instructions; and alignment, adjusting, balancing, and checking instructions.

E. Provide servicing and lubrication schedule, and list of lubricants required.

F. Include manufacturer's printed operation and maintenance instructions.

G. Include sequence of operation by controls manufacturer.

H. Provide original manufacturer's parts list, illustrations, assembly drawings, and diagrams required for maintenance.

I. Provide control diagrams by controls manufacturer as installed. Include coded wiring as installed.

J. Provide CONTRACTOR's coordination drawings, with coded piping diagrams as installed.

K. Provide charts of valve tag numbers, with location and function of each valve, keyed to flow and control diagrams.

L. Provide list of original manufacturer's spare parts, current prices, and recommended quantities to be maintained in storage.

M. Additional Requirements: As specified in individual Product specification sections.

N. Provide a listing in Table of Contents for design data, with tabbed fly sheet and space for insertion of data.

1.08 INSTRUCTION OF OWNER PERSONNEL

A. Before final inspection, instruct OWNER's designated personnel in operation, adjustment, and maintenance of products, equipment, and systems, at agreed upon times.

B. Use operation and maintenance manuals as basis for instruction. Review contents of manual with personnel in detail to explain all aspects of operation and maintenance.

C. Prepare and insert additional data in Operation and Maintenance Manual when need for such data becomes apparent during instruction.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

SECTION 01740

WARRANTIES AND BONDS

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers the work required to prepare and submit all warranty and bond information required by these Contract Documents.

B. Warranties and bonds required shall be as specified in the individual specification sections and Section 00705 - GENERAL CONDITIONS.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 00100 - Instructions to Bidders.

B. Section 00705 - General Conditions.

C. Section 01700 - Contract Closeout.

D. Individual Specification Sections: Warranties required for specific Products or Work.

1.03 FORMAT OF SUBMITTALS

A. Bind in commercial quality, 8-1/2 x 11 three-ring side binders with hardback, cleanable, plastic covers. Provide two copies of completed binders.

B. Label cover of each binder with typed or printed title WARRANTIES AND BONDS, with title of Project; date; project owner; name, address and telephone number of CONTRACTOR and ENGINEER.

C. Table of Contents: Neatly typed, in the sequence of the Table of Contents of these Specifications, with each item identified with the number and title of the specification section in which specified, and the name of the Product or work item.

D. Separate each warranty or bond with index tab sheets keyed to the Table of Contents listing. Provide full information, using separate typed sheets as necessary. List Subcontractor, supplier, and manufacturer, with name, address, and telephone number of responsible principal.

E. Provide dates of beginning and ending of warranty period, bond or service and maintenance contracts.

1.04 PREPARATION OF SUBMITTALS

A. Obtain warranties and bonds, executed in duplicate by responsible Subcontractors, suppliers, and manufacturers, within ten days after completion of the applicable item or work. Except for items put into use with Owner's permission, leave date of beginning of time of warranty blank until the Date of Substantial completion is determined.

B. Verify that documents are in proper form, contain full information, and are notarized.

C. Co-execute submittals when required.

D. Retain warranties and bonds until time specified for submittal.

1.05 TIME OF SUBMITTALS

A. For equipment or component parts of equipment put into service during construction with Owner's permission, submit documents within ten days after acceptance.

B. Make other submittals within ten days after Date of Substantial Completion, prior to final Application for Payment.

C. For items of Work when acceptance is delayed beyond Date of Substantial Completion, submit within ten days after acceptance, listing the date of acceptance as the beginning of the warranty period.

SECTION 02021

EXISTING UNDERGROUND/ABOVEGROUND FACILITY LOCATION/VERIFICATION

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers all work required for the field location and verification of existing underground and aboveground facilities prior to commencing work at the specific area(s) of the project site(s).

B. See CONDITIONS OF THE CONTRACT and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 00705 - General Conditions.

B. Section 01005 - General Requirements.

C. Section 01300 - Submittals.

1.03 SUBMITTALS

A. Prior to beginning work submit to the ENGINEER a proposed order of construction broken down by project site(s)/area(s) referencing proposed piping and conduit system(s) as shown on the drawings.

B. Prior to beginning work in an area, CONTRACTOR shall submit to the ENGINEER the existing underground facility verification report specified in this section detailing any conflicts discovered and the extent of the area verified. Where no conflicts are discovered, the report shall still be submitted with ANO CONFLICT@ marked.

C. Reports shall be submitted in the format attached at the end of this Section.

D. Submittals shall be made in accordance with the requirements of Section 01300 - Submittals.

1.04 DEFINITIONS

A. Underground Facilities: Existing underground facilities (as defined in Section 00705, Article 4, 4.04, A and B), inclusive of wires/cables, conduits, poles, guy wires, piping (water mains, reclaimed mains, force mains, sanitary sewer storm sewer), vaults, manholes, headwalls, catch basins, and the like.

Underground facilities shall be inclusive of shown or indicated facilities and not shown or indicated facilities, as defined.

B. Aboveground Facilities: Existing facilities above existing grades or finished floor, inclusive of pipes, conduits, junction boxes, structures and other locations that require CONTRACTOR to coordinate work to connect to existing feature or facility.

1.05 EXISTING UNDERGROUND FACILITIES LOCATIONS VERIFICATION

A. The CONTRACTOR shall obtain the services of a utility location service such as ASunshine State One Call of Florida, Inc.@, where applicable, and the CONTRACTOR shall utilize the OWNER=s utility locate personnel on OWNER property.

B. After completion of utility locations but prior to beginning construction, CONTRACTOR shall walk site and check for potential conflicts with existing underground and aboveground facilities.

C. Walk-thru of site shall be completed prior to beginning construction.

D. If potential conflicts are identified, then the existing facility shall be potholed and the exact location, size, configuration, elevation(s), and material of construction shall be verified by the CONTRACTOR. Potholing shall be completed to fully ascertain the impact of underground facility. It shall be understood that a parallel facility may require potholing along the full length of the proposed installation.

This work shall be included within the scope of this contract, all at no additional cost to the OWNER.

E. CONTRACTOR shall submit to ENGINEER an existing facility location verification report for each project area. Where no conflicts are discovered, the report shall still be submitted with ANO CONFLICT(S)@ indicated.

1.06 ENGINEER=S REVIEW

A. ENGINEER shall review the CONTRACTOR=s submitted existing facility location verification reports.

B. Should a conflict be discovered, ENGINEER shall promptly provide written recommendation to address conflict in accordance with the Contract Documents.

C. Should the resolution of a conflict require a change in scope (time or cost), revision shall be addressed in accordance with the Contract documents.

1.07 PAYMENT

A. Payment for work specified herein shall be included in the lump sum base bid.

1.08 COMPLIANCE

A. Should CONTRACTOR proceed with work prior to completion of facility location verification, CONTRACTOR will be proceeding at their own risk and resolution of conflicts will not be paid for by the OWNER.

B. Should a conflict be found that could not have been discovered through existing facility location verification process specified herein, the conflict will be addressed in accordance with the Contract Documents.

1.09 ABOVEGROUND FACILITY LOCATION VERIFICATION

A. All work to confirm tie-in locations above grade or connections to existing facilities above grade shall be considered within the scope of contract. No scheduled or additional payment will be made for this work.

SECTION 02072

DEMOLITION

PART 1 GENERAL

1.01 WORK INCLUDED

A. The CONTRACTOR shall furnish all labor, materials, equipment, and incidentals required for demolition, removal and disposal Work as shown on the Contract Drawings and as specified herein.

B. Work shall include, but not limited to, the demolition and removal of existing structures, equipment, and other existing site improvements as necessary to install the new Work as shown on the Contract Drawings and as specified herein. Demolition includes structural concrete, foundations, walls, structural steel, metals, masonry, attachments, appurtenances, piping, electrical and mechanical equipment, paving, curbs, walks, and similar existing facilities.

C. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. Building Codes

1. Florida Building Code, Latest Edition.

B. Reference Standards

1. ANSI A10.6 Safety Standards for Demolition.

1.03 SUBMITTALS

A. Submittals shall be made in accordance with the requirements of Section 01300 - Submittals.

B. Submit proposed demolition procedures and schedule of Work.

C. Project record Drawings shall show limits of partial demolition as applicable.

PART 2 PRODUCTS

Not Used.

PART 3 EXECUTION

3.01 GENERAL

A. Protect existing structures and equipment which are not to be altered.

B. All materials and equipment removed from existing Work shall become the property of the CONTRACTOR except for those which the OWNER has identified and marked for OWNER's use. All materials and equipment marked by the OWNER to remain the OWNER's shall be carefully removed by the CONTRACTOR so as not to be damaged, cleaned and stored on or adjacent to the site in a protected place specified by the ENGINEER or OWNER or loaded onto trucks provided by the OWNER.

The OWNER has preliminarily marked the following items to be salvaged:

1. As noted on drawings.

C. The CONTRACTOR shall dispose of all demolition materials, equipment, debris, and all other items not marked by the OWNER to remain as his, off the site and in conformance with all existing applicable laws and regulations.

D. Pollution Controls

1. Use water sprinkling, temporary enclosures, and other suitable methods to limit the amount of dust and dirt rising and scattering in the air to the lowest practical level. Comply with governing regulations pertaining to environmental protection.

a. Do not use water when it may create hazardous or objectionable conditions such as flooding, pollution, and groundwater contamination.

b. Clean adjacent structures, facilities and improvements of dust, dirt and debris caused by demolition operations.

E. Material generated from demolition shall not be used as backfill.

3.02 STRUCTURAL DEMOLITION (GENERAL)

A. The CONTRACTOR shall completely remove all structures as shown on the Contract Drawings unless otherwise directed by the ENGINEER.

B. All concrete, brick, tile, concrete block, roofing materials, reinforcement, structural or miscellaneous metals, plaster, wire mesh and other items contained in or upon the structure shall be removed and taken from the site, unless otherwise approved by the ENGINEER.

3.03 ELECTRICAL DEMOLITION

A. Electrical demolition requirements shall be as specified in Section 16001 - Electrical Demolition.

3.04 MECHANICAL AND EQUIPMENT DEMOLITION (GENERAL)

A. CONTRACTOR shall completely remove all mechanical and/or equipment items as shown on the drawings.

B. The general demolition scope shall include the following minimum requirements whether indicated on plans or not:

1. Remove exposed ancillary piping and valves.

2. Remove pipe/equipment hangers and support systems which are not needed as a result of the demolition.

3. To the fullest extent possible all required systems shall remain operational. CONTRACTOR shall replace and/or repair existing facilities to remain which may be damaged due to equipment removals.

3.05 SPECIFIC DEMOLITION REQUIREMENTS

A. Specific demolition requirements shall be as indicated on drawings.

3.06 CLEAN-UP AND DISPOSAL

A. CONTRACTOR shall remove from the site all debris resulting from the demolition operations as it accumulates. Upon completion of the Work, all materials, equipment, waste and debris of every sort shall be removed and the premises shall be left clean, neat and orderly.

B. All materials and debris resulting from demolition and removal operations shall be disposed of off-site in an authorized, permitted disposal site.

C. Dumpster and/or roll-off container service shall be provided by CONTRACTOR from local franchise.

D. Other lawful debris haul-off (dump trucks) by CONTRACTOR.

END OF SECTION

SECTION 02200

EARTHWORK

PART 1 GENERAL

1.01 WORK INCLUDED

A. The work of this Section includes all earthwork required for construction of the Project. Such earthwork shall include, but not be limited to, the loosening, removing, loading, transporting, depositing, and compacting in its final location of all materials, wet and dry, as required for the purposes of completing the work specified in the Contract Documents, which shall include, but not be limited to, the furnishing, placing, and removing of sheeting and bracing necessary to safely support the sides of all excavation; all pumping, ditching, draining, and other required measures for the removal or exclusion of water from the excavation; the supporting of structures above and below the ground; all backfilling around structures and all backfilling of trenches and pits; the disposal of excess excavated materials; borrow of materials to make up deficiencies for fills; and all other incidental earthwork, all in accordance with the requirements of the Contract Documents.

B. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01400 - Quality Control.

1.03 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. Commercial Standards (Latest Revision):

ASTM D 422	Method for Particle-Size Analysis of Soils.
ASTM D 698	Test Methods for Moisture-Density Relations of Soils and Soil-Aggregate Mixtures, Using 5.5-lb (2.49-kg) hammer and 12-in. (304.8-mm) Drop.
ASTM D 1140	Test Method for Density of Soil in Place by the Sand Cone Method.
ASTM D 1557	Test methods for Moisture-Density Relations of Soils and Soil-Aggregate Mixtures Using 10-lb (4.54-kg) hammer and 18-in. (457-mm) Drop.
ASTM D 1633	Test Method for Compressive Strength of Molded Soil-Cement Cylinders.
ASTM D 2419	Test Method for Sand Equivalent Value of Soils and Fine Aggregate.
ASTM D 2487	Classification of Soils for Engineering Purposes.

ASTM D 2901	Test Method for Cement Content of Freshly-Mixed Soil-Cement.
ASTM D 2922	Test Methods for Density of Soil and Soil-Aggregate in Place by Nuclear Methods (Shallow Depth).
ASTM D 4253	Test Methods for Maximum Index Density of Soils Using a Vibratory Table.
ASTM D 4254	Test Methods for Minimum Index Density of Soils and Calculation of Relative Density.

1.04 TRENCH SAFETY

A. The CONTRACTOR's attention is directed to the "Florida Trench Safety Act" which mandates the provisions of Subpart P, Section 1926.650 of the OSHA Safety and Health Standards for Construction, which require that all trenches of depth greater than 5 feet shall be shored or sloped to the angle of repose.

B. Submit information in accordance with Section 01300 - Submittals, detailing the method of trench safety to be implemented. Submittal should include geotechnical investigation results if required.

1.05 QUALITY ASSURANCE

A. General: All soils testing will be done by a testing laboratory of the OWNER's choice at the OWNER's expense except as specified in Paragraph 1.05C below.

B. Where soil material is required to be compacted to a percentage of maximum density, the maximum density at optimum moisture content will be determined in accordance with ASTM D 1557. Where cohesionless, free draining soil material is required to be compacted to a percentage of relative density, the calculation of relative density will be determined in accordance with ASTM D 4253 and D 4254. Field density in-place tests will be performed in accordance with ASTM D 1556, ASTM D 2922, or by such other means acceptable to the ENGINEER.

C. In case the tests of the fill or backfill show non-compliance with the required density, the CONTRACTOR shall accomplish such remedy as may be required to insure compliance. Subsequent testing to show compliance shall be by a testing laboratory selected by the OWNER and shall be at the CONTRACTOR's expense.

D. Particle size analysis of soils and aggregates will be performed using ASTM D 422.

E. Determination of sand equivalent value will be performed using ASTM D 2419.

F. Unified Soil Classification System: References in these specifications to soil classification types and standards set forth in ASTM D 2487 shall have the meanings and definitions indicated in the chart illustrated at the end of this Section. The chart is reproduced herein for the convenience of the CONTRACTOR only, and no

limitation, amendment, or modification is intended thereby. The CONTRACTOR shall be bound by all applicable provisions of said ASTM D 2487 in the interpretation of soil classifications.

PART 2 PRODUCTS

2.01 SUITABLE FILL AND BACKFILL MATERIAL REQUIREMENTS

A. General: Fill, backfill, and embankment materials shall be suitable selected or processed clean, fine earth, rock, or sand, free from grass, roots, brush, or other vegetation.

B. Fill and backfill materials to be placed within 6 inches of any structure or pipe shall be free of rocks or unbroken masses of earth materials having a maximum dimension larger than 3 inches.

C. Suitable Materials: Soils not classified as unsuitable as defined in Paragraph entitled, "Unsuitable Material" herein, are defined as suitable materials and may be used in fills, backfilling, and embankment construction subject to the specified limitations. In addition, when acceptable to the ENGINEER, some of the material listed as unsuitable may be used when thoroughly mixed with suitable material to form a stable composite.

D. Suitable materials may be obtained from on-site excavations, may be processed on-site materials, or may be imported. If imported materials are required to meet the requirements of this Section or to meet the quantity requirements of the project the CONTRACTOR shall provide the imported materials within the scope of the Contract, unless a unit price item is included for imported materials in the bidding schedule.

E. The following types of suitable materials are designated and defined as follows:

1. Type A: Crushed limerock or sand with 100 percent passing a 1-inch sieve and a sand equivalent value not less than 50.
2. Type B: Crushed limerock or sand with 100 percent passing a ½-inch sieve and a sand equivalent value not less than 50.
3. Type C: Sand with 100 percent passing a 3/8-inch sieve, at least 90 percent passing a Number 4 sieve, and a sand equivalent value not less than 30.
4. Type D: Crushed limerock with 100 percent passing a 1-inch sieve and not more than 10 percent passing a Number 4 sieve.
5. Type E: Crushed limerock with 100 percent passing a 3/4-inch sieve and not more than 10 percent passing a Number 4 sieve.
6. Type F: Crushed limerock meeting the following gradation requirements:

Sieve Size	Percentage Passing
2-inch	100
1-1/2-inch	90 - 100
1-inch	20 - 55
3/4-inch	0 - 15
No. 200	0 - 3

7. Type G: Crushed rock aggregate base material of such nature that it can be compacted readily by watering and rolling to form a firm, stable base for pavements. At least 97% of the material shall pass a 3-1/2 inch screen and the material shall be

uniformly graded uniformly down to the 200 sieve. The liquid limit shall not exceed 35 and the plastic index shall not exceed 10. For stabilized base, the material shall meet all of the above requirements except that 97% shall pass a 1-1/2 inch screen.

8. Type H: Drainrock shall be crushed rock or gravel, durable and free from slaking or decomposition under the action of alternate wetting or drying. The material shall be uniformly graded and shall meet the following gradation requirements:

Sieve Size	Percentage Passing
1-inch	100
3/4-inch	90 - 100
3/8-inch	40 - 100
No. 4	25 - 40
No. 8	18 - 33
No. 30	5 - 15
No. 50	0 - 7
No. 200	0 - 3

The drainrock shall have a sand equivalent value not less than 75.

9. Type I: Any other suitable material as defined in Paragraph 2.01, herein.

10. Type J: Material which consists of Type H material, or any mixture of Types B, C, G, and H materials which has been cement-treated so that the cement content of the material is not less than 5 percent by weight when tested in accordance with ASTM D 2901. The ultimate compressive strength at 28 days shall be not less than 400 psi when tested in accordance with ASTM D1633.

11. Type K: Stockpiled topsoil material which has been obtained at the site by removing soil to a depth not exceeding 2 feet. Removal of the topsoil shall be done after the area has been stripped of vegetation and debris as specified.

2.02 UNSUITABLE MATERIAL

A. Unsuitable soils for fill material shall include soils which, when classified under ASTM D 2487, fall in the classifications of Pt, OH, CH, MH, HL, or SC.

B. In addition, any soil which cannot be compacted sufficiently to achieve the percentage of maximum density specified for the intended use, shall be classed as unsuitable material.

2.03 USE OF FILL, BACKFILL, AND EMBANKMENT MATERIAL TYPES

A. Use the types of materials designated herein for all required fill, backfill, and embankment construction hereunder.

B. Where these Specifications conflict with the requirements of any local agency having jurisdiction, or with the requirements of a material manufacturer, the ENGINEER shall be immediately notified. In case of conflict therewith, the CONTRACTOR shall use the most stringent requirement, as determined by the ENGINEER.

C. Fill and backfill types shall be used in accordance with the following provisions:
   1. Embankment fills shall be constructed of Type I material, as defined in Paragraph 2.01E, herein, or any mixture of Type I and Type A through Type H materials.
   2. Pipe zone backfill, as defined under "Pipe and Utility Trench Backfill" herein, shall consist of the following materials for each pipe material listed below. Where pipelines are installed on grades exceeding 4 percent, and where backfill materials are graded such that there is less than 10 percent passing a Number 4 sieve, trench plugs of Type J material shall be provided at minimum intervals of 200 feet.
      a. Mortar coated pipe and concrete pipe, shall be provided Type A, B, C, D, or E pipe zone backfill material.
      b. Coal tar enamel coated pipe, polyethylene encased pipe, tape wrapped pipe, and other non-mortar coated pipe shall be backfilled with Type C pipe zone backfill material.
      c. Plastic pipe and PVC pipe shall be backfilled with Types B, C, or E pipe zone backfill material.
   3. Trench zone backfill for pipelines as defined under "Pipe and Utility Trench Backfill" shall be Type I backfill material or any of Types A through H backfill materials or any mixture thereof.
   4. Final backfill material for pipelines under paved areas, as defined under "Pipe and Utility Trench Backfill" shall be Type G backfill material. Final backfill under areas not paved shall be the same materials as that used for trench backfill, except that Type K material shall be used for final backfill in agricultural areas unless otherwise shown or specified.
   5. Trench backfill and final backfill for pipelines under structures shall be the same material as used in the pipe zone, except where concrete encasement is required by the Contract Documents.
   6. Aggregate base materials under pavements shall be Type G material constructed to the thicknesses shown or specified.
   7. Backfill around structures shall be Type I material, or Types A through Type H materials, or any mixture thereof.
   8. Backfill materials beneath structures shall be as follows:
      a. Drainrock materials under reservoirs or other water retaining structures with underdrain systems shall be Type H material.
      b. Under concrete reservoirs or other water retaining structures without underdrain systems, Types G or H materials shall be used.
      c. Under structures where groundwater must be removed to allow placement of concrete, Type F material shall be used.
      d. Under all other structures, Type D, E, G, or H material shall be used.
   9. Backfill used to replace pipeline trench over-excavation shall be a layer of Type F material with a 6-inch top filter layer of Type E material for wet trench conditions or the same material as used for the pipe zone backfill if the trench conditions are not wet.
   10. The top 6 inches of fill on reservoir roofs, embankment fills around reservoirs, and all other embankment fills shall consist of Type K material, topsoil.
   11. Where specified or shown, pea gravel shall be Type E material, gradations.

PART 3 EXECUTION

3.01 REMOVAL OF WATER

A. Provide and operate equipment adequate to keep all excavations and trenches free of water. Remove all water during periods when concrete is being deposited, when pipe is being laid, during the placing of backfill, and at such other times as required for efficient and safe execution of the Work. Avoid settlement or damage to adjacent property. Dispose of water in a manner that will not damage adjacent property. When dewatering open excavations, dewater from outside the structural limits and from a point below the bottom of the excavation when possible. Design dewatering system to prevent removal of fines from existing ground.

B. CONTRACTOR shall determine all requirements, make all necessary arrangements and obtain all permits which may be required for dewatering operations.

3.02 STRUCTURE, ROADWAY, AND EMBANKMENT EXCAVATION

A. General: Except where specifically provided to the contrary, excavation shall include the removal of all materials of whatever nature encountered, including all obstructions of any nature that would interfere with the proper execution and completion of the work. The removal of said materials shall conform to the lines and grades shown or ordered. Furnish, place, and maintain all supports and shoring that may be required for the sides of the excavations, and all pumping, ditching, or other measures for the removal or exclusion of water. Dispose of storm water, groundwater, and wastewater reaching the site of the Work from any source so as to prevent damage to the Work or adjoining property. Excavations shall be sloped or otherwise supported in a safe manner in accordance with applicable State safety requirements and the requirements of OSHA Safety and Health Standards for Construction (29CFR1926).

B. Excavation Beneath Structures and Embankments: Except where otherwise specified for a particular structure or ordered by the ENGINEER, excavation shall be carried to the grade of the bottom of the footing or slab. Where shown or ordered, areas beneath structures or fills shall be over-excavated. The subgrade areas beneath embankments shall be excavated to remove not less than the top 6 inches of original material and where such subgrade is sloped, the original material shall be benched. When such over-excavation is shown, both over-excavation and subsequent backfill to the required grade shall be performed by the CONTRACTOR. When such over-excavation is not shown but is ordered by the ENGINEER, such over-excavation and any resulting backfill will be paid for under a separate unit price bid item if such bid item has been established; otherwise payment will be made in accordance with a negotiated price. After the required excavation or over-excavation has been completed, the exposed surface shall be scarified to a depth of 6 inches, brought to optimum moisture content, and rolled with heavy compaction equipment to obtain 95 percent of maximum density.

C. Excavation Beneath Paved Areas: Excavation under areas to be paved shall extend to the bottom of the aggregate base, if such base is called for; otherwise it shall extend for the paving thickness. After the required excavation has been completed, the exposed

surface shall be scarified, brought to optimum moisture content, and rolled with heavy compaction equipment to obtain 95 percent of maximum density.

D. Notification of Engineer: Notify the ENGINEER at least 3 days in advance of completion of any structure excavation and allow the ENGINEER a review period of at least one day before the exposed foundation is scarified and compacted or is covered with backfill or with any construction materials.

3.03 PIPELINE AND UTILITY TRENCH EXCAVATION

A. General: Unless otherwise shown or ordered, excavation for pipelines and utilities shall be open-cut trenches. Trench widths shall be kept as narrow as is practical for the method of pipe zone densification and trench safety selected by the CONTRACTOR, but shall have a minimum width at the bottom of the trench equal to the outside diameter of the pipe plus 24 inches for mechanical compaction methods and 18 inches for water consolidation methods. The maximum width at the top of the pipe shall be equal to the outside diameter of the pipe plus 36 inches for pipe diameters 18-inches and larger and to the outside diameter of the pipe plus 24 inches for pipe diameters less than 18-inches.

B. Trench Bottom: Except when pipe bedding is required, the bottom of the trench shall be excavated uniformly to the grade of the bottom of the pipe. The trench bottom shall be given a final trim, such that each pipe section when first laid will be continually in contact with the ground along the extreme bottom of the pipe. Rounding out the trench to form a cradle for the pipe will not be required.

C. Open Trench: The maximum amount of open trench permitted in any one location shall be 500 feet, or the length necessary to accommodate the amount of pipe installed in a single day, whichever is less. All trenches shall be fully backfilled at the end of each day or, in lieu thereof, shall be covered by heavy steel plates adequately braced and capable of supporting vehicular traffic in those locations where it is impractical to backfill at the end of each day. The above requirements for backfilling or use of steel plate will be waived in cases where the trench is located further than 100 feet from any traveled roadway or occupied structure. In such cases, however, barricades and warning lights meeting OSHA requirements shall be provided and maintained.

D. Trench Over-Excavation: Where the Drawings indicate that trenches shall be over-excavated, they shall be excavated to the depth shown, and then backfilled to the grade of the bottom of the pipe.

E. Over-Excavation: When ordered by the ENGINEER, whether indicated on the Drawings or not, trenches shall be over-excavated beyond the depth shown. Such over-excavation shall be to the depth ordered. The trench shall then be backfilled to the grade of the bottom of the pipe. All work specified in this Section shall be performed within the scope of the Contract when the over-excavation ordered by the ENGINEER is less than 6 inches below the limits shown. When the over-excavation ordered by the ENGINEER is 6 inches or greater below the limits shown, additional payment will be made to the CONTRACTOR for that portion of the work which is located below said 6-inch

distance. Said additional payment will be made under separate unit price bid items for over-excavation and bedding if such bid items have been established; otherwise payment will be made in accordance with a negotiated price.

F. Where pipelines are to be installed in embankment or structure fills, the fill shall be constructed to a level at least one foot above the top of the pipe before the trench is excavated.

3.04 OVER-EXCAVATION NOT ORDERED, SPECIFIED, OR SHOWN

A. Any over-excavation carried below the grade ordered, specified, or shown, shall be backfilled to the required grade with the specified material and compaction. Such work shall be performed by the CONTRACTOR at its own expense.

3.05 EXCAVATION IN VICINITY OF TREES

A. Except where trees are shown to be removed, trees shall be protected from injury during construction operations. No tree roots over 2 inches in diameter shall be cut without express permission of the ENGINEER. Trees shall be supported during excavation by any means previously reviewed by the ENGINEER.

3.06 ROCK EXCAVATION

A. CONTRACTOR shall review existing site conditions and available geotechnical exploration reports to confirm the presence of and depth of rock that may be encountered as the result of excavation.

B. Prior to bid, an excavation contractor knowledgeable with limestone and other rock formations local to project should be retained by CONTRACTOR to independently evaluate the formation to determine the appropriate excavation equipment and methods to be used.

C. Cost of all rock excavation and disposal of unsuitable rock material shall be included in CONTRACTOR’s bid.

3.07 DISPOSAL OF EXCESS EXCAVATED MATERIAL

A. Remove and dispose of all excess excavated material at a site selected by the OWNER and reviewed by the ENGINEER.

3.08 BACKFILL - GENERAL

A. Backfill shall not be dropped directly upon any structure or pipe. Backfill shall not be placed around or upon any structure until the concrete has attained sufficient strength to withstand the loads imposed. Backfill around water retaining structures shall not be placed until the structures have been tested, and the structures shall be full of water while backfill is being placed.

B. Except for drainrock materials being placed in over-excavated areas or trenches, backfill shall be placed after all water is removed from the excavation.

3.09 PLACING AND SPREADING OF BACKFILL MATERIALS

A. Backfill materials shall be placed and spread evenly in layers. When compaction is achieved using mechanical equipment the layers shall be evenly spread so that when compacted each layer shall not exceed 12- inches in thickness. When compaction is achieved using flooding and jetting methods, each layer shall not exceed 3 feet in thickness after compaction.

B. During spreading each layer shall be thoroughly mixed as necessary to promote uniformity of material in each layer. Pipe zone backfill materials shall be manually spread around and under the pipe so that when compacted the pipe zone backfill will provide uniform bearing and side support.

C. Where the backfill material moisture content is below the optimum moisture content water shall be added before or during spreading until the property moisture content is achieved.

D. Where the backfill material moisture content is too high to permit the specified degree of compaction the material shall be dried until the moisture content is satisfactory.

3.10 COMPACTION OF FILL, BACKFILL, AND EMBANKMENT MATERIALS

A. Each layer of Types A, B, C, G, H, I, and K backfill materials as defined in Paragraph 2.01E, herein, where the material is graded such that at least 10 percent passes a No. 4 sieve, shall be mechanically compacted to the specified percentage of maximum density. Equipment that is consistently capable of achieving the required degree of compaction shall be used and each layer shall be compacted over its entire area while the material is at the required moisture content.

B. Each layer of Type D, E, F, and J backfill materials shall be compacted by means of at least 2 passes from a flat plate vibratory compactor. When such materials are used for pipe zone backfill, vibratory compaction shall be used at the top of the pipe zone or at vertical intervals of 24 inches, whichever is the least distance from the subgrade.

C. Flooding, ponding, or jetting shall not be used for fill on roads, backfill around structures, backfill around reservoir walls, for final backfill materials, or aggregate base materials.

D. Pipe zone backfill materials that are granular may be compacted by a combination of flooding and vibration using concrete vibrators or by jetting, when acceptable to the ENGINEER.

E. Pipeline trench zone backfill materials, containing 5 percent or less of material passing a No. 200 sieve, may be compacted using flooding and jetting or vibration if the CONTRACTOR uses effective procedures that yield the specified compaction test results. Flooding and jetting shall not be done in such a manner that the pipe or nearby utilities are damaged, in areas of poorly draining or expansive soils, or where the use of the procedure is prohibited by any agency having jurisdiction over the street or right-of-way. Suitable jet pipes or immersible vibrators shall be used so that each backfill layer is saturated and consolidated to its full depth before the next layer is placed. Jet pipes shall be kept at least 6

inches away from the pipe where the backfill is being consolidated and 2 feet away from other pipes or utilities.

F. Equipment weighing more than 10,000 pounds shall not be used closer to walls than a horizontal distance equal to the depth of the fill at that time. Hand operated power compaction equipment shall be used where use of heavier equipment is impractical or restricted due to weight limitations.

G. Compaction Requirements: The following compaction test requirements shall be in accordance with ASTM D 1557 for Type A, B, C, G, H, I, and K materials. Where agency or utility company requirements govern, the highest compaction standards shall apply.

Location or Use of Fill	Percentage Of Maximum Density
Pipe zone backfill portion above bedding for flexible pipe.	95
Pipe zone backfill bedding and over-excavated zones under bedding/ pipe for flexible pipe.	95
Pipe zone backfill portion above bedding for rigid pipe.	95
Pipe zone backfill bedding and over-excavated zones under bedding/ pipe for rigid pipe.	95
Final backfill, beneath paved areas or structures.	98
Final backfill, not beneath paved areas or structures.	90
Trench zone backfill.	90
Embankments.	90
Embankments, beneath paved areas of structures.	98
Backfill beneath structures, reservoirs.	98
Backfill around structures, on reservoir or structure roof.	80
Topsoil (Type K material)	80
Aggregate base (Type G material)	98

H. Trench Backfill Requirements: The pipe has been structurally designed based upon the trench configuration specified in Section 3.03A, herein.

I. Maintain the indicated trench cross section up to a horizontal plane lying 6 inches above the top of the pipe.

J. If, at any location under said horizontal plane, the trench walls we sloped or exceed the maximum trench widths indicated in the Contract Documents are exceeded, the pipe zone backfill shall be "improved" or the pipe class increased as specified herein, within the scope of the Contract. "Improved" backfill shall mean sand backfill or other equivalent materials acceptable to the ENGINEER.

K. If the allowable deflection specified for the pipe is exceeded, expose and reround or replace the pipe, repair all damaged lining and coating, and reinstall the pipe zone material and trench backfill as specified within the scope of the Contract.

3.11 PIPE AND UTILITY TRENCH BACKFILL

A. Pipe Zone Backfill: The pipe zone is defined as that portion of the vertical trench cross-section lying between a plane 6 inches below the bottom surface of the pipe, i.e., the trench subgrade, and a plane at a point 6 inches above the top surface of the pipe. The bedding for flexible pipe is defined as that portion of pipe zone backfill material between the trench subgrade and the bottom of the pipe. The bedding for rigid pipe is defined as that portion of the pipe zone backfill material between the trench subgrade and a level line which varies from the bottom of the pipe to the springline as shown.

B. Bedding shall be provided for all sewers, drainage pipelines, and other gravity flow pipelines in accordance with the details shown on the Drawings and materials specified herein.

C. Where bedding is required after compaction of the bedding, perform a final trim using a stringline for establishing grade, such that each pipe section when first laid will be continually in contact with the bedding along the extreme bottom of the pipe.

D. The pipe zone shall be backfilled with the specified backfill material. Exercise care to prevent damage to the pipeline coating, cathodic bonds, or the pipe itself during the installation and backfill operations.

E. Trench Zone Backfill: After the pipe zone backfill has been placed as specified above, and after all excess water has completely drained from the trench, backfilling of the trench zone may proceed. The trench zone is defined as that portion of the vertical trench cross-section lying between a plane 6 inches above the top surface of the pipe and a plane at a point 18 inches below the finished surface grade, or if the trench is under pavement, 18 inches below the roadway subgrade. If flooding, ponding, or jetting is used the pipe shall be filled with water to prevent flotation.

F. Final Backfill: Final backfill is all backfill in the trench cross-sectional area within 10 inches of finished grade, or if the trench is under pavement, all backfill to the roadway base restoration.

3.12 EMBANKMENT CONSTRUCTION

A. The area where an embankment is to be constructed shall be cleared of all vegetation, roots and foreign material. Following this, the

surface shall be moistened, scarified to a depth of 6 inches, and rolled or otherwise mechanically compacted to 95 percent of maximum density under structures and paved areas, and 90 percent of maximum density elsewhere.

B. Where embankment or structure fills are constructed over pipelines, the first 4 feet of fill over the pipe shall be constructed using light placement and compaction equipment that does not damage the pipe.

3.13 FIELD DENSITY AND MOISTURE TESTS

A. Notify the OWNER-provided independent soil testing company to determine the in-place density and moisture content of the subgrade and compacted fill by any one or combination of the following methods: ASTM D 1556, D 3017, or D 2922. The CONTRACTOR shall cooperate with this testing work by leveling small test areas as designated by the soil testing company. These test results, certified by the soil testing company and reviewed by the ENGINEER, shall indicate that the actual soil compaction found meets these Specifications. Testing will occur as the work progresses and compliance with the Specifications is required prior to final acceptance and payment for the work.

B. A minimum of one test every 200 cubic yards of fill, one test per every 2,000 square feet of subgrade, or 4 tests per lift, whichever is larger in number of tests, shall be conducted.

C. The OWNER shall pay for the initial testing. Any retesting required to show compliance with these Specifications shall be paid by CONTRACTOR within the Scope of the Contract.

END OF SECTION

SECTION 02500

RESTORATION AND CLEANUP

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers the work necessary to provide and coordinate the restoration and cleanup of areas disturbed during construction.

B. All areas disturbed or damaged during construction shall be restored to conditions existing prior to the work.

C. See GENERAL CONDITIONS and Division 1, General Requirements, which contain information and requirements that apply to the work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 02510 - Asphaltic Concrete Pavement and Base.

B. Section 02630 - Concrete Sidewalks, Drives and Curbs.

1.03 SUBMITTALS

A. Documentation to confirm conformance of materials with the requirements of this specification.

B. Submittals shall be made in accordance with the GENERAL CONDITIONS.

1.04 LIMITS OF RESTORATION

A. All areas disturbed by progress of work and/or CONTRACTOR’s operations shall be restored to limits disturbed unless noted otherwise on drawings.

B. Proposed new sidewalks, paving, sod, landscaping, and the like shall be completed as shown on the drawings.

PART 2 PRODUCTS

2.01 ASPHALTIC CONCRETE PAVEMENT AND BASE

A. Materials shall be as specified in Section 02510 - Asphaltic Concrete Pavement and Base.

2.02 CONCRETE PAVEMENT

A. Materials for concrete driveway approaches, sidewalks and curbs shall be as specified in Section 02630 - Concrete sidewalks, Drives and Curbs.

2.03 SOD

A. Sod shall be of firm texture having a compacted growth and good root development. Sod is to contain no weeds or undesirable native grasses and be free from fungus, vermin and diseases. Sod to be not less than two (2) years old. Provide sod capable of growth and development when planted (viable, not dormant).

B. Sod shall be selected to match the existing varieties and types encountered, as applicable. Sod shall be Bahia for non-irrigated areas and Floratam for irrigated areas.

C. Sod selection shall be approved in field by resident project representative.

2.04 LANDSCAPING

A. All existing landscaping damaged or disturbed by CONTRACTOR shall be replaced in kind by the CONTRACTOR as directed in field by the resident project representative. All such work shall be considered incidental restoration and covered under the work required by this contract.

B. Preconstruction video tape shall be used to assist in landscape restoration requirements.

C. New landscaping improvements shall be as noted on drawings.

2.05 MISCELLANEOUS LANDSCAPING MATERIALS

A. Water

1. Water shall be potable from municipal water supplies or from wastewater reuse system (where available).

B. Fertilizer

1. New ground covers: Fertilize with an approved fertilizer of fifty percent (50%) or greater organic 6-6-6 or 8-8-8 with minor elements including, but not limited to, iron, zinc and manganese.

2.06 CLEANING MATERIALS

A. Use materials which will not create hazards to health or property, and which will not damage surfaces.

B. Use only materials and methods recommended by manufacturer of material or equipment being cleaned.

PART 3 EXECUTION

3.01 ASPHALTIC CONCRETE PAVEMENT

A. Restore asphaltic concrete as shown on the Drawings and specified in Section 02510 - Asphaltic Concrete Pavement and Base.

3.02 CONCRETE PAVEMENT RESTORATION

A. Restore concrete drives, sidewalks and curbs as shown on the Drawings and specified in Section 02630 - Concrete Sidewalks, Driveways and Curbs.

3.03 SODDING

A. Sod shall be placed as indicated on Drawings or to the extent to achieve the conditions existing prior to the work. General sod limits are as follows:

1. All unpaved areas disturbed within the project site shall be prepared and sodded as specified herein.

2. Other areas indicated on drawings within the project site shall be prepared and sodded as specified herein.

B. Properly prepare subgrade prior to placing sod. Remove excess materials, hand rake and level as necessary to place sod evenly and at grades to match adjacent existing surfaces. Finish sod installation shall provide unimpeded sheet flow of surface water drainage.

C. Lay sod to form a solid mass with tight-fitting joints. Butt ends and sides of sod strips. Do not overlap. Stagger strips to offset joints in courses. Tamp or roll sod lightly to insure uniform contact with subgrade. Fill minor cracks between pieces of sod with sifted soil.

D. Where necessary to prevent slippage of new installed sod, peg or pin sod securely using 1" x 1" x 6" wood pegs, driven flush with top of sod.

E. Water sod thoroughly with a fine spray immediately after installation.

F. Do not install sod on Friday, Saturday or Sunday, unless provisions are made to water manually or automatically.

3.04 LANDSCAPING RESTORATION

A. All landscaping that has been disturbed or damaged shall be replaced to match existing. The restoration work shall be as per directions of the resident project representative.

3.05 IRRIGATION SYSTEM RESTORATION

A. Repair existing sprinkler heads, irrigation equipment and piping at the existing site to conditions and coverage existing prior to work. Materials shall be as specified in Section 15400 - Plumbing.

3.06 CLEANING

A. In addition to removal of debris and cleaning specified in other sections, clean interior and exterior exposed-to-view surfaces.

B. Remove temporary protection and labels not required to remain.

C. Clean finishes free of dust, stains, films and other foreign substances.

D. Clean transparent and glossy materials to a polished condition; remove foreign substances. Polish reflective surfaces to a clear shine.

E. Clean surfaces of equipment; remove excess lubrication.

F. Clean ventilating louvers of dust and debris.

G. Maintain cleaning until Final Completion.

H. Remove waste, debris, and surplus materials from site. Clean grounds; remove stains, spills, and foreign substances from paved areas and sweep clean. Rake clean other exterior surfaces.

3.07 SOD AND LANDSCAPING MAINTENANCE

A. CONTRACTOR shall be responsible for maintaining all newly sodded areas and new landscaping through final completion of the project. Maintenance shall include but not be limited to irrigation and mowing.

B. CONTRACTOR may make arrangements with the individual property owners to complete landscaping maintenance. However, CONTRACTOR shall remain responsible for landscaping maintenance through final completion.

C. All sod or other landscaping improvements found dead prior to final completion shall be replaced by CONTRACTOR at no additional cost to the OWNER.

3.08 RESTORATION REQUIREMENTS (GENERAL)

A. Remove all debris generated by work from site.

B. Restore all existing paved areas (to remain) that are impacted by work in accordance with standard details as applicable.

C. Pave all areas as indicated by the drawings.

D. Sod all lawn areas disturbed by work in accordance with these specifications.

E. Provide new landscaping improvements as noted on the drawings.

F. Where applicable, repair existing sprinkler heads, irrigation equipment and piping at the site to conditions and coverage existing prior to work. Materials shall match existing. Existing sprinkler heads shall be reused.

END OF SECTION

SECTION 02510

ASPHALTIC PAVEMENT AND BASE

PART 1 GENERAL

1.01 WORK INCLUDED

A. Perform all work associated with Asphaltic Concrete Pavement and Base as shown and as specified herein including all labor, materials, equipment supplies, and facilities associated with providing a finished product satisfying all the requirements of the Contract Documents.

B. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01400 - Quality Control.

B. Section 02200 - Earthwork.

1.03 REFERENCE SPECIFICATIONS, CODES, AND STANDARDS

A. Commercial Standards: References in these specifications to "Standard Specifications" shall mean the "Standard Specifications for Road and Bridge Construction," Florida Department of Transportation, latest edition.

1.04 SUBMITTALS

A. Submit, in writing, materials testing reports, job-mix formulas, and other pertinent information acceptable to the ENGINEER demonstrating that materials and methods proposed for use will comply with the provisions of this Section in accordance with Section 01300 - Submittals.

B. Suitability Tests of Proposed Materials: Tests for conformance with the Specifications shall be performed prior to start of the work. The samples shall be identified to show the name of the material, aggregate source, name of the supplier, contract number, and the segment of the WORK where the material represented by the sample is to be used. Results of all tests shall be submitted to the ENGINEER for review. Materials to be tested shall include aggregate base, coarse and fine aggregate for paving mixtures, mineral filler, and asphalt cement.

C. Trial Batch: Before placing any paving material, a testing laboratory acceptable to the ENGINEER shall prepare a trial batch of asphalt concrete for each job-mix formula to be used for the Work. The trial batch shall be prepared using the aggregates and asphalt cement proposed, and acceptable to the ENGINEER. The compacted trial batch shall provide a basis for computing the voids ratio, provide an indication of the optimum asphalt content, and establish a basis for controlling compaction during construction. The cost of not more than two laboratory trial batch tests will be borne by the TRIBE but the CONTRACTOR shall furnish the materials at no cost. Any additional

trial batch testing required shall be performed at the expense of the CONTRACTOR within the Scope of the Contract.

1.05 QUALITY CONTROL

A. Testing by an independent testing firm, employed by OWNER, will be required to verify proper placement and compaction of the subbase, base and pavement sections.

B. Inspection and testing laboratory services shall be as specified in Section 01400 - Quality Control.

PART 2 PRODUCTS

2.01 LIMEROCK BASE

A. Materials for limerock base shall be as specified in Section 911 of the Standard Specifications.

B. Limerock material shall have an average LBR value of not less than 100.

2.02 PRIME COAT

A. Prime coat material shall be cut-back asphalt grade RC-70 or RC-250 meeting the requirements of Section 916-3.

B. Sand cover shall be applied over prime coat if traffic will be using area before final paving is laid.

2.03 TACK COAT

A. Tack coat material shall be as specified in Section 300-2.3 of the Standard Specifications.

2.04 ASPHALTIC CONCRETE

A. Type S-I Asphaltic Concrete conforming to all applicable requirements of Sections 320, 330 and 331 of the Standard Specifications.

B. Substitute asphaltic concrete types may be used providing they meet or exceed the stability of Type S-I and the cost does not exceed that of Type S-I.

C. Where indicated by drawings, Type S-III Asphaltic Concrete conforming to all applicable requirements of Sections 320, 330 and 333 of the Standard Specifications, may be used for overlay purposes.

D. Superpave (SP) and Friction Course (FC) mixes shall conform to all applicable requirements of Sections 234, 334, and 337 of the FDOT Standard Specifications.

E. Application Schedule:

Application	Village	FDOT
Overlay	1" FC 9.5	1-1/2" FC 12.5
Patch	1-1/2" SP 12.5	1-1/2" SP 12.5

2.05 TRAFFIC CONTROL MARKINGS

A. Thermoplastic stripes and markings shall be as specified in Section 711 of the Standard Specifications.

B. Reflective pavement markers shall be as specified in Section 706 of the Standard Specifications.

C. Signing shall be as specified in Section 700 of the Standard Specifications.

D. Project Application Schedule:

1. Reflective markers shall be 3M raised pavement markers, 290 Series, or equal. Marker type (one way or two way) and color shall be selected per application location.

2. Temporary traffic marking paint shall be Sherwin-Williams Hotline Fast Dry Waterborne Traffic Marking Paint, or equal.

3. Final Thermoplastic traffic markings shall be as manufactured by Crown Technology, LLC, or equal:

White = Tuffline White Alkyd with glass spheres
Yellow = Ecotherm Yellow alkyd with glass spheres

PART 3 EXECUTION

3.01 SUBGRADE PREPARATION

A. The subgrade shall be prepared as specified in the Section 02200 - Earthwork as applicable to roadways. The surface of the subgrade after compaction shall be hard, uniform, smooth and true to grade and cross-section. Subgrade for pavement shall not vary more than 0.02 foot from the specified grade and cross section. Subgrade for base material shall not vary more than 0.04 foot from the specified grade and cross section. Compaction on Subgrade shall be 98% of the maximum density as determined by AASHTO T180 in the upper 12 inches.

3.02 LIMEROCK BASE

A. Limerock base shall be provided where shown and to the thickness shown. Imported aggregate bases shall be delivered to the job site as uniform mixtures and each layer shall be spread in one operation. Segregation shall be avoided and the base shall be free of pockets of coarse or fine material. Where the required thickness is 6 inches or less, the base materials may be spread and compacted in one course. Where the required thickness is more than 6 inches, the base material shall be spread and compacted in two or more courses of approximately equal thickness and the maximum compacted thickness of any one course shall not exceed 8 inches. The relative compaction of each course of limerock base shall be not less than 98 percent of maximum density at optimum moisture content when measured in accordance with ASTM D 1557. The compacted surface of the finished limerock base shall be hard, uniform, smooth and at any point shall not vary more than 0.02 feet from the specified grade or cross section.

B. Requirements for limerock base other than those above shall be as specified by Section 200 of the Standard Specifications.

3.03 PRIME COAT

A. Prime coat shall be applied when the limerock base meets the specified density requirements and the moisture content of the top half of the base does not exceed 90 percent of the optimum moisture of the base material. At the time of priming, the limerock base shall be firm, unyielding and in such a condition that no undue distortion will occur.

B. Prime coat shall be applied according to Section 300-7 of the Standard Specifications.

3.04 TACK COAT

A. A tack coat shall be applied to the base and to the contact surfaces of all cold pavement joints, curbs, gutters, manholes and the like before the asphalt pavement is placed. Care shall be taken to prevent the application of tack coat material to surfaces that will not be in contact with the new asphaltic concrete pavement.

B. Tack coat shall be applied in accordance with Section 300-8 of the Standard Specifications.

3.05 ASPHALTIC CONCRETE PLACEMENT, SPREADING AND COMPACTION

A. Paving shall be as specified in Section 330 of the Standard Specifications and the specifications herein.

B. At the time of placement and compaction at the Work site, the temperature of mixture shall be within $\pm$30E F of the mix design temperature.

C. Asphalt concrete shall not be placed when the atmospheric temperature is below 40 degrees F or during unsuitable weather.

D. The asphaltic concrete shall be evenly spread upon the subgrade, base or milled pavement to such a depth that, after rolling, it will be of the specified cross section and grade of the course being constructed.

E. The depositing, distributing, and spreading of the asphalt concrete shall be accomplished in a single, continuous operation by means of a self-propelled mechanical spreading and finishing machine designed especially for that purpose. The machine shall be equipped with a screed or strike-off assembly capable of being accurately regulated and adjusted to distribute a layer of the material to a definite predetermined thickness. When paving is of a size or in a location that use of a self-propelled machine is impractical the ENGINEER may waive the self-propelled requirement.

F. Spreading, once commenced, must be continuous without interruption.

G. The mix shall be compacted immediately after placing as follows:

1. Initial rolling with a steel-wheeled tandem roller, steel three-wheeled roller, vibratory roller, or a pneumatic-tired roller shall follow the paver as closely as possible.

2. Intermediate rolling with a pneumatic-tired roller shall be done immediately behind the initial rolling.

3. Final rolling with a steel-wheeled tandem roller shall eliminate marks from previous rolling.

4. In areas too small for rollers a vibrating plate compactor or hand tamper shall be used to achieve thorough compaction.

H. Upon completion, the pavement shall be true to grade and cross-section. When a 10-foot straightedge is laid on the finished surface parallel to the center of the paved area, the surface shall not vary from the edge of the straightedge more than 1/8-inch except at intersections or changes of grade. In the transverse direction, the surface shall not vary from the edge of the straightedge more than 1/4 inch.

I. The relative density of the asphaltic pavement surface after compaction shall be 98 percent of the density obtained by using ASTM D 1188 or D 2726. A properly calibrated nuclear asphalt testing device may be used for determining the field density of compacted asphalt concrete, or slabs or cores shall be laboratory tested in accordance with ASTM D 1188.

3.06 TRAFFIC CONTROL MARKING RESTORATION

A. CONTRACTOR shall be responsible for restoring all traffic striping, reflective markers and signing which are damaged or disturbed during construction.

B. The intent is to restore traffic control to the plan and markings existing prior to construction.

C. Restoration shall conform with all applicable requirements of Sections 706, 710 and 711 of the Standard Specifications.

D. Where a roadway section will be reopened prior to application of traffic markings, the following conditions must be met:

1. Temporary traffic markings must be in place prior to reopening road.

2. Temporary traffic markings are allowable for the ninety (90) day waiting period prior to overlay.

3.07 MILLING EXISTING ASPHALTIC PAVEMENT

A. Where milling is required by the drawings, such milling shall be completed in accordance with Section 327 of the Standard Specifications.

B. Depth of milling required shall be as noted on the drawings.

C. Milling equipment shall meet the requirements of Section 327 of the Standard Specifications.

D. Surface shall be swept immediately following completion of milling operations.

E. Milled material generated as result of milling operations shall be removed from site and lawfully disposed of by CONTRACTOR.

3.08 GENERAL PAVING REQUIREMENTS BY WORK REQUIREMENT

A. Asphaltic pavement patch:

1. Patches to existing asphaltic pavement areas shall be completed per the standard details shown on the drawings.

2. Patching may be completed prior to or after milling at the option of the CONTRACTOR.

3. Horizontal and vertical dimensions of the patching section components shall meet the minimum requirements of the standard details and applicable specifications herein.

4. Subgrade preparation, placement and compaction of base, placement and compaction of asphalt course(s) shall be completed in accordance with the requirements of these specifications. Patch area only require initial and final compaction with roller or vibratory plate.

5. Quality control and acceptance requirements shall be as specified herein.

B. New asphaltic concrete pavement and base sections/areas

1. New asphaltic concrete pavement and base sections/areas shall be completed per the standard details shown on the drawings.

2. Horizontal and vertical dimensions of the new pavement section components shall meet the minimum requirements of the standard details, the drawing dimensions and applicable specifications herein.

3. Subgrade preparation, placement and compaction of base, placement and compaction of asphalt course(s) shall be completed in accordance with the requirements of these specifications.

4. Quality control and acceptance requirements shall be as specified herein.

C. New asphaltic concrete overlay areas

1. New asphaltic concrete pavement overlay areas shall be completed per the standard details shown on the drawings.

2. All new pavement patches within the proposed overlay areas shall have been completed a minimum of thirty (30) days prior to placement of overlay.

3. Where required by the drawings the milling requirement must be successfully completed in accordance with these specifications prior to placement of the asphaltic overlay.

4. Horizontal and vertical dimensions of the new pavement overlay shall meet the minimum requirements of the standard details, the drawing dimensions and applicable specifications herein.

5. Placement and compaction of asphalt overlay shall be completed in accordance with the requirements of these specifications.

6. Quality control and acceptance requirements shall be as specified herein.

3.09 QUALITY CONTROL CONFIRMATION REQUIREMENTS

A. The OWNER=s independent testing firm will monitor all pavement operations per these specifications including but not limited to:

1. Subgrade preparation and compaction.

2. Base course preparation and compaction.

3. Delivery/placement temperature of asphalt paving mixture.

4. Placement and compaction of asphaltic concrete.

5. Confirmation of completion of work per the specified horizontal and vertical grade tolerances.

3.10 ACCEPTANCE OF COMPLETED PAVEMENT WORK

A. New pavement (patch, new area or overlay) will be accepted following confirmation that the pavement meets the requirements of the drawings and these specifications as confirmed by the OWNER=s independent testing firm.

B. New Pavement (patch, new area or overlay) found not meeting the requirements of the drawings and these specifications shall be corrected by CONTRACTOR at no cost to OWNER. Correction may require removal and replacement of asphaltic concrete, base course and/or subgrade as directed by ENGINEER based on recommendations of OWNER=s independent testing firm.

END OF SECTION

SECTION 02630

CONCRETE SIDEWALKS, DRIVES AND CURBS

PART 1 GENERAL

1.01 WORK INCLUDED

A. This Section covers work necessary to construct, replace or repair concrete sidewalks, drives/roadways and curbs as required for this project.

B. Removed or damaged sidewalks, drives and curbs shall be replaced in the same location and to the same dimensions as were the originals unless instructed differently by OWNER or ENGINEER.

C. See CONDITIONS OF THE CONTRACT and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 02200 - Earthwork.

B. Section 03300 - Concrete.

PART 2 PRODUCTS

2.01 FORMS

A. Materials for forms shall be 2-inch dressed lumber straight and free from defects or standard metal forms may be used. Where short-radius forms are required, 1-inch dressed lumber or plywood may be used. Provide stakes and bracing materials as required to hold forms securely in place.

2.02 EXPANSION JOINT FILLER

A. Expansion joint filler shall be ½-inch thick, preformed asphalt-impregnated, expansion joint material conforming to ASTM D 994.

2.03 REINFORCEMENT

A. Welded wire fabric shall conform to ASTM A185 and be sized as indicated on the Drawings.

B. Deformed reinforcing bars shall conform to ASTM A615 and be sized as indicated on the Drawings.

1. Grade: 60
2. Minimum yield strength: 60,000 psi

2.04 CONCRETE

A. Concrete for sidewalks, drive/roadways and curbs shall be a specified in Section 03300 - Concrete.

2.05 CURING COMPOUND

A. Liquid membrane-forming curing compound shall be clear or translucent, suitable for spray application and shall conform to ASTM C 309, Type 1.

PART 3 EXECUTION

3.01 PREPARATION OF SUBGRADE

A. Bring the areas on which sidewalks, drives and curbs are to be constructed to required grade and compact by sprinkling and rolling or mechanical tamping. As depressions occur, refill with suitable material and recompact until the surface is at the proper grade. The upper 12 inches of subgrade or fill shall be compacted to 98 percent of maximum density at optimum moisture content as determined by ASTM D 1557.

3.02 SETTING FORMS

A. Construct forms to the shape, lines, grades, and dimensions called for on the Drawings. Stake wood or steel forms securely in place, true to line and grade.

B. Brace forms to prevent change of shape or movement in any direction resulting from the weight of the concrete during placement. Construct short-radius curved forms to exact radius. Tops of forms shall not depart from gradeline more than 1/8 inch when checked with a 10-foot straightedge. Alignment of straight sections shall not vary more than 1/8 inch in 10 feet.

3.03 SIDEWALK CONSTRUCTION

A. Sidewalks shall be 4 inches thick except where shown otherwise on the Drawings.

B. At locations where the new sidewalk is to abut existing concrete, saw concrete for a depth of 2 inches and chip the old concrete back to sound material on a straight line, clean the surface, and apply a neat cement paste just prior to pouring the new sidewalk.

C. Place preformed asphalt expansion joints at intervals not exceeding 45 feet and around posts, poles, valve boxes, manholes or other objects protruding through the sidewalk.

D. Provide expansion and contraction joints transversely to the walks at intervals as shown on the drawings. Expansion and contraction joints shall be straight and at right angles to the surface of the walk.

E. Place, process, finish and cure concrete in conformance with the applicable requirements of ACI 614 and this Specification. Where the requirements differ, the high shall govern.

F. Broom the surface with a fine-hair broom at right angles to the length of the walk and tool at all edges, joints and markings. Mark the walks transversely at 5-foot intervals with a jointing tool. Upon completion of the finishing, apply an approved curing compound to exposed surfaces. Protect the sidewalk from damage for a period of 7 days.

3.04 DRIVE/ROADWAY CONSTRUCTION

A. Drives/roadways shall be constructed and reinforced as indicated on the Drawings.

B. Place reinforcement as required by Drawings.

C. Place pre-formed expansion joint material where new drive/roadway will abut existing drive/roadway and around valve boxes, manholes or other objects protruding through the drive/roadway.

D. Broom the surface with a fine-hair broom at right angles to the length of the drive/roadway and tool all edges and joints. Upon completion of finishing, apply an approved curing compound to exposed surfaces.

E. Provide saw cut contraction joints as per standard details.

3.05 CURB CONSTRUCTION

A. Prepare adjacent, existing curb surfaces as described herein for sidewalk construction.

B. Construct curbs to match existing type as shown on the Drawings.

END OF SECTION

SECTION 03300

CONCRETE

PART 1 GENERAL

1.01 WORK INCLUDED

A. This section covers all work necessary for providing, testing and placing ready mix concrete.

B. See CONDITIONS OF THE CONTRACT and Division 1, GENERAL REQUIREMENTS, which contain information and requirements which apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01400 - Quality Control.

1.03 REFERENCE STANDARDS, CODES AND SPECIFICATIONS (AS REFERENCED IN FLORIDA BUILDING CODE))

A. ACI 214 “Guide to Evaluation of Strength Test Results of Concrete”.

B. ACI 318 "Building Code Requirement for Reinforced Concrete".

C. ASTM C31 "Standard Method for Making and Curing Concrete Compressive and Flexure Test Specimens in the Field".

D. ASTM C33 "Standard Specification for Concrete Aggregates".

E. ASTM C94 "Standard Specification for Ready-Mix Concrete".

1.04 SUBMITTALS

A. Submittals shall be in accordance with Section 01300 - Submittals and shall include the following:

1. Concrete mix designs and trial mix laboratory reports.
2. Manufacturer's certification of admixtures.
3. Contractor's schedule and sequence of placement.
4. All Test Results.
5. Drawings showing locations of construction joints.

1.05 QUALITY ASSURANCE

A. Submit certificates of mill reports on all foreign cements for review by ENGINEER before batching concrete.

B. Secure the services of a reputable manufacturer for counseling regarding the use of any specified admixture.

C. The ENGINEER shall have access to and have the right to inspect all batch plants, cement mills, and supply facilities of suppliers, manufacturers, subcontractors, and contractors providing products included in these Specifications. Batch plants shall have current certification that all weighing scales have been tested and are within the tolerances as set forth in the National Bureau of Standards Handbook No. 44.

1.06 CERTIFICATION

A. Submit batch delivery tickets to the ENGINEER in compliance with and in accordance to ASTM C94.

1.07 TESTING

A. Performed by an acceptable Engineering Laboratory at OWNER's expense. CONTRACTOR shall assist in the collection of samples. Any retests shall be within the Scope of the Contract.

B. Criteria:

1. Each test: not less than 5 cylinders; retain one after 28 days.
2. One test for every 50 consecutive cubic yards of concrete cast.
3. Furnish ENGINEER with 4 certified copies of tests made of 2 at 7 days and 2 at 28 days.
4. Slump test, concrete temperature and entrained air test shall be completed for each set.

C. Questionable strength of in-place concrete:

1. Additional tests may be ordered by the ENGINEER.
2. Execute the core tests in accordance with ASTM C42 procedure.
3. Costs of additional tests showing strength of in-place concrete conforming to design criteria are the responsibility of the OWNER.
4. Costs of additional tests showing noncompliance with the design criteria are the responsibility of the CONTRACTOR.
5. Additional items at CONTRACTOR's expense:

    a. Provide load tests as directed by the ENGINEER.
    b. Reinforce structure as directed or remove and replace all under strength concrete structure in place.

PART 2 PRODUCTS

2.01 MATERIALS

A. Cement

1. Portland cement Type I or Type II conforming to ASTM C 150. In addition, the tricalcium aluminate content of Type I cement shall not exceed 12 percent.

2. Type I or Type II cement, at the Contractor's option, may be used for nonhydraulic structures.

3. Type II cement or Type I cement, in combination with pozzolan (fly ash) as hereinafter specified, shall be used for all hydraulic structures and sanitary sewer structures.

B. Water: potable, salt free conforming to ASTM C94.

C. Fine Aggregate (Regular): salt free and clean, conforming to ASTM C33.

Fine Aggregate (Pump): salt free and clean, conforming to FDOT 902.

D. Coarse Aggregate (Regular): salt free and clean, conforming to ASTM C33, maximum size 1 1/2-inch (3/4-inch for water retaining structures).

Coarse Aggregate (Pump): Salt free and clean, size #89, FDOT 901.

E. All aggregates: quarried/mined in fresh water only.

F. Screenings: Screenings meeting the requirements of FDOT 902-5 may be substituted for fine aggregates.

2.02 MIXES

A. Fillets, thrust blocks, sidewalks, curbs and miscellaneous non-structural slabs on grade.

1. 28 day compressive strength: 3000 p.s.i.
2. Admixture: As required below, use only specified product.
3. Slump: 5 inches, ± 1 inch.
4. Entrained air content (ASTM C 231): 0 percent.

B. Structural (walls, columns, beams, footings, floor slabs and elevated slabs) and precast concrete:
1. 28 day compressive strength: 4000 p.s.i., minimum, or as illustrated on the Drawings.
   a. Strengths noted on the Drawings take precedence over herein specified amounts.
2. Water-cement ratio: w/c ≤ 0.4.
3. Slump: 5 inches, ± 1 inch.
4. Entrained air Content (ASTM C231): 0 percent.
5. Admixture: As required below, use only specified products.

C. Pavement (Drives/Roadways):

1. 28 day compressive strength: 4000 p.s.i.
2. Water-cement ratio: w/c ≤ 0.5.
3. Slump: 5 inches, ± 1 inch.
4. Entrained air Content (ASTM C231): 0 percent
5. Admixture: As required below, use only specified products.

D. Flowable Fill

1. Cement: 50 to 100 lbs/Cy. (As indicated on drawings.)
2. Pozzolan (Flyash): 0 to 600 lbs/Cy.
3. Fine Aggregate: 2750 lb/Cy.
4. Water: 500 lbs/Cy. (Maximum)

E. Curbs

1. 28 day compressive strength: 3000 psi
2. Slump: 2-inches, ± 1-inch.
3. Entrained Air Content (ASTM C231): 0 percent.
4. Admixtures: As required below, use only specified products.

2.03 ADMIXTURE

A. Air-Entraining

1. Provide air-entraining admixture in all concrete. Admixture shall conform to ASTM C 260, except it shall be nontoxic after 30 days

and shall contain no chlorides. Furnish manufacturer's compliance statement for these requirements.

B. Water-Reducing

1. All concrete shall contain a water-reducing admixture. The admixture shall conform to ASTM C 494, Type A or Type D, except it shall contain no chlorides, shall be nontoxic after 30 days, and shall be compatible with the air-entraining admixtures. The amount of admixture added to the concrete shall be in accordance with the manufacturer's recommendations. Furnish a compliance statement that the admixture used satisfies all requirements of this Specification.

C. Pozzolan (Fly-Ash)

1. The pozzolan to be used in combination with Type I cement, as previously specified for use in all hydraulic structures and sewers, shall be Class C or Class F fly ash conforming to ASTM C 618-78 and furnish test data confirming that the fly ash in combination with the cement to be used meets all strength requirements, is compatible with air-entraining agents and other additives, and provides increased sulfate resistance equivalent to or better than Type II cement.

2.04 CURING COMPOUNDS

A. Normal placement without special finish; approved products:
1. Master Builders Company: "Masterseal".
2. Sonneborn-Contech: "Kure-N'Seal".

2.05 DEFORMED REINFORCING BARS

A. ASTM A615: "Standard Specification for Deformed and Plain Billet-Steel Bars for concrete Reinforcement".
1. Grade: 60
2. Minimum yield strength: 60,000 p.s.i.

B. Sizes shall be as indicated on the Drawings.

2.06 WELDED WIRE FABRIC

A. Welded wire fabric shall conform to ASTM A1064.

2.07 EXPANSION JOINT FILLER

A. Expansion joint filler shall be 1/2-inch thick, preformed asphalt-impregnated, expansion joint material conforming to ASTM D994.

2.08 ACCESSORIES

A. Tie wires shall be 16-gauge, black, soft-annealed wire.

B. Bar supports shall be of proper type for us intended. Bar supports in beams and slabs exposed to view after stripping shall be galvanized or plastic coated. Use concrete supports for reinforcing in concrete placed on grade.

PART 3 EXECUTION

3.01 EXAMINATION

A. Place no concrete until all reinforcing steel, pipes, inserts, sleeves, etc., have been set in place and reviewed by the ENGINEER. Notify the ENGINEER of scheduled pours 24 hours prior to placement.

3.02 PLACING

A. Place concrete expeditiously in clean forms that are not hot to the touch; spray forms with water just prior to placing concrete. Before placing concrete directly against earth, install vapor barrier to prevent water absorption, secure reinforcement in position, inspect, and approve before placing concrete. Do not rest runways for transporting concrete on the reinforcing steel. Deposit concrete as nearly as practical in final position; and, do not allow concrete to drop freely more than 5 feet. Place all concrete during daylight, unless otherwise authorized. Where reinforcing steel above the top of the cast is coated with concrete while placing below, remove all concrete from such reinforcing steel after the placing is complete and prior to the next cast.

B. Place slabs-on-grade carefully to avoid damages to the vapor barrier.

3.03 CONSOLIDATION

A. Consolidate concrete in layers by internal vibrating equipment, supplemented by hand rodding and tamping as required. Do not use vibrators to move the concrete laterally inside the forms.

B. Maintain internal vibrators at speed of at least 5000 impulses per minute when submerged in concrete. Maintain at least 1 spare vibrator in working condition at site at all times.

C. Limit duration of vibration to time necessary to produce satisfactory consolidation without causing segregation. In no case more than 15 seconds per square foot of exposed surface. Move the vibrator constantly and place in each specific spot only once.

3.04 JOINTS

A. Construction joints:

1. Locate as illustrated on the Drawings and as reviewed by the ENGINEER for slabs.
2. Key joints.

B. Expansion Joints: Place pre-formed expansion joints as indicated on the Drawings.

3.05 CURING

A. Begin curing of concrete as soon as practicable after placing, but not more than 3 hours thereafter.

B. Begin curing of the structural elements immediately after removal of forms.

C. Apply curing compounds as specified.

3.06 FINISHES

A. Formed surfaces:

1. Patching: immediately after stripping forms, patch all defective areas with mortar similar to the concrete mix; but, without coarse aggregate. Patch minor honeycombs, bulges and other minor defects as designed by the ENGINEER, only where exposed to view. Clean, dampen, and fill all the holes with patching mortar.

a. Major defective areas, as judged by the ENGINEER, including those resulting from the leakage of forms, excessive honeycombs, large bulges, and large offsets at form joints: chip away to a depth of at least 1/4 inch; and, the surfaces that are to be patched coat with an epoxy-polysulfide adhesive. Press patching mortar in for a complete bond and finish to match adjacent areas.

b. Minor defective areas, as judged by the ENGINEER, including honeycombs, air bubbles, holes resulting from removal of ties and those resulting from leakage of forms: patch with grout without resorting to chipping. Minor bulges and offsets at form joints: finish as specified herein below.

2. Finishes; locations:

a. Rough or board finish: for all concrete surfaces not exposed to public view.

3. Finishes; definitions:

a. Rough or board finish: reasonably true to line and plane. Tie holes and defects patched, and the fins exceeding 1/4 inch rubbed down, otherwise, surfaces may be left with texture imparted by forms.

B. Unformed surfaces (flatwork):

1. Finishes:

a. General: grade and screed slab to exact elevation, as required. After screeding, tamp mixture thoroughly to drive the coarse aggregate down from surfaces and apply finish specified hereinafter.

b. Light Broom or power trowel finish: slab on grade as noted on drawings.

2. Finishes; definition:

a. Broom finish: finish with light street type broom as soon as surface water sheen has disappeared.

3.07 FIELD QUALITY CONTROL

A. Only ready mixed concrete in accordance with ASTM C94 will be accepted.

B. Place all concrete within 1-1/2 hours after introduction of water to mix.

C. Under no circumstances may additional water be added to mix.

D. Discard unused concrete older than 1-1/2 hours. Retempering is prohibited.

END OF SECTION

SECTION 03600

GROUT

PART 1 GENERAL

1.01 WORK INCLUDED

A. Furnish all materials for grout in accordance with the provisions of this Section and form, mix, place, cure, repair, finish, and do all other work as required to produce finished grout, all in accordance with the requirements of the Contract Documents.

B. The following types of grout shall be covered in this Section:

1. Non-Shrink Grout.
2. Cement Grout.
3. Epoxy Grout.

C. All items specified herein this section may not be specifically required for this project. CONTRACTOR shall coordinate the requirements of this section with the drawings for proper completion of the Work.

D. Like items of materials provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, maintenance, replacement and service.

E. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, for information and requirements which apply to the Work specified in this Section and that are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 03300 - Concrete.

1.03 REFERENCE SPECIFICATIONS, CODES, AND STANDARDS

A. Specifications, codes, and standards shall be as specified in Section 03300 - Concrete and as referred to herein.

B. Additional Commercial Standards (Latest Revision):

CRD-C 621-82B Corps of Engineers Specifications for Non-shrink grout.

ASTM C 109-80 Standard test methods for compressive strength of hydraulic cement mortars (using 2-in or 50-mm cube specimens).

ASTM C 531-81 Test method for linear shrinkage and coefficient of thermal expansion of chemical-resistant mortars, grouts and monolithic surfacings.

ASTM C 579-82 Test methods for compressive strength of chemical-resistant mortars and monolithic surfacings.

ASTM C 827-82 Standard test method for early volume change of cementitious mixtures.

ASTM C 696-79 Test method for coefficient of linear thermal expansion of plastics.

1.04 SUBMITTALS

A. Submit certified test results verifying the compressive strength, shrinkage, and expansion requirements specified herein; and manufacturer's handling, placement and appropriate uses for each type of non-shrink and epoxy grout used in the Work.

PART 2 PRODUCTS

2.01 CEMENT GROUT

A. Cement Grout: Cement grout shall be composed of one part cement, three parts sand, and the minimum amount of water necessary to obtain the desired consistency. Where needed to match the color of adjacent concrete, white Portland cement shall be blended with regular cement as needed. The minimum compressive strength at 28 days shall be 4000 psi.

B. Cement grout materials shall be as specified in Section 03300 - Concrete.

2.02 PREPACKAGED GROUTS

A. Non-Shrink Grout

1. Non-shrink grout shall be a prepackaged, inorganic, non-gas liberating, non-metallic, cement-based grout requiring only the addition of water. Manufacturer's instructions shall be printed on each bag or other container in which the materials are packaged. The specific formulation for each class of non-shrink grout specified herein shall be that recommended by the manufacturer for the particular application.

2. Class A non-shrink grouts shall have a minimum 28 day compressive strength of 5000 psi; shall have no shrinkage (0.0 percent) and a maximum 4.0 percent expansion in the plastic state when tested in accordance with ASTM C-827; and shall have no shrinkage (0.0 percent) and a maximum of 0.2 percent expansion in the hardened state when tested in accordance with CRD C 621.

3. Class B non-shrink grouts shall have a minimum 28 day compressive strength of 5000 psi and shall meet the requirements of CRD C 621.

4. Application
   a. Class A non-shrink grout shall be used for the repair of all holes and defects in concrete members which are water bearing or in contact with soil or other fill material, grouting under all equipment base plates, and at all locations where grout is specified in the Contract Documents; except for those applications for Class B non-shrink grout and epoxy grout specified herein. Class A non-shrink grout may be used in place of Class B non-shrink grout for all applications.

b. Class B non-shrink grout shall be used for the repair of all holes and defects in concrete members which are not water-bearing and not in contact with soil or other fill material, grouting under all base plates for structural steel members, and grouting railing posts in place.

c. Grouting equipment installations.

5. Material shall be Bonsal F77 non-shrink, non-metallic high performance cementitious grout, or equal.

B. Epoxy Grout

1. Epoxy grout shall be a pourable, non-shrink, 100 percent solids system. The epoxy grout system shall have three components: resin, hardener, and specially blended aggregate, all premeasured and prepackaged. The resin component shall not contain any nonreactive diluents. Resins containing butyl glycidyl ether (BGE) or other highly volatile and hazardous reactive diluents are not acceptable. Variation of component ratios is not permitted unless specifically recommended by the manufacturer. Manufacturer's instructions shall be printed on each container in which the materials are packaged.

2. The chemical formulation of the epoxy grout shall be that recommended by the manufacturer for the particular application.

3. The mixed epoxy grout system shall have a minimum working life of 45 minutes at 75 degrees F.

4. The epoxy grout shall develop a compressive strength of 5000 psi in 24 hours and 10,000 psi in seven days when tested in accordance with ASTM C 579, Method B. There shall be no shrinkage (0.0 percent) and a maximum 4.0 percent expansion when tested in accordance with ASTM C 827.

5. The epoxy grout shall exhibit a minimum effective bearing area of 95 percent. This shall be determined by a test consisting of filling a 2-inch diameter by 4-inch high metal cylinder mold covered with a glass plate coated with a release agent. A weight shall be placed on the glass plate. At 24 hours after casting, the weight and plate shall be removed and the area in plan of all voids measured. The surface of the grout shall be probed with a sharp instrument to locate all voids.

6. The peak exotherm of a 2-inch diameter by 4-inch high cylinder shall not exceed 95 degrees F when tested with 75 degree F material at laboratory temperature. The epoxy grout shall exhibit a maximum thermal coefficient of 30 x 10^{-6} inches/inch/degree F when tested according to ASTM C 531 or ASTM D 696.

7. Application:

a. Epoxy grout shall be used to embed all anchor bolts and reinforcing steel required to be set in grout and for all other applications required in the Contract Documents.

b. Grouting equipment installations.

8. Material should be Escoweld 7505E/7530, Epoxy grout, or equal.

2.03 CURING MATERIALS

A. Curing materials shall be as specified in the Section entitled, 03300 - Concrete, for cement grout and as recommended by the manufacturer of prepackaged grouts.

2.04 CONSISTENCY

A. The consistency of grouts shall be that necessary to completely fill the space to be grouted for the particular application. Dry pack consistency is such that the grout is plastic and moldable but will not flow. Where "dry pack" is called for in the Contract Documents, it shall mean a grout of that consistency; the type of grout to be used shall be as specified herein for the particular application.

2.05 MEASUREMENT OF INGREDIENTS

A. Measurements for cement grout shall be made accurately by volume using containers. Shovel measurement will not be allowed.

B. Prepackaged grouts shall have ingredients measured by means recommended by the manufacturer.

PART 3 EXECUTION

3.01 GENERAL

A. All surface preparation, curing, and protection of cement grout shall be as specified in Section 03300 - Concrete. The finish of the grout surface shall match that of the adjacent concrete.

B. The manufacturer of Class A non-shrink grout and epoxy grout shall provide on-site technical assistance upon request.

C. All mixing, surface preparation, handling, placing, consolidation and other means of execution for prepackaged grouts shall be done according to the instructions and recommendations of the manufacturer.

3.02 CONSOLIDATION

A. Grout shall be placed in such a manner for the consistency necessary for each application so as to assure that the space to be grouted is completely filled.

END OF SECTION

SECTION 05500

FABRICATED METALWORK AND CASTINGS

PART 1 GENERAL

1.01 WORK INCLUDED

A. This Section covers the Work necessary to furnish and install, complete, all fabricated metalwork and castings.

B. Like items of materials provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, maintenance, and replacement.

C. All items specified herein this section may not be specifically required for this project. CONTRACTOR shall coordinate the requirements of this section with the drawings for proper completion of the Work.

D. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 09900 - Protective Coatings.

1.03 SUBMITTALS

A. Submittals shall be made in accordance with Section 01300 - Submittals.

B. Submittal data shall include, but not be limited to:

1. Shop drawings, including calculations where required.
2. Test pieces and samples.
3. Certificates, test reports, etc.
4. Color samples of abrasive nosings.

PART 2 PRODUCTS

2.01 GENERAL

A. The use of a manufacturer's name and model or catalog number is for the purpose of establishing the standard of quality and general configuration desired only. Products of other manufacturers will be considered in accordance with GENERAL CONDITIONS.

B. Unless otherwise indicated, all materials shall conform to the latest issue of the following ASTM Specifications:

Item	ASTM Specification
Steel Shapes and Plates	A36, A501
Zinc (Hot Galvanized) Coatings of Fabricated Steel	ASTM A 123

Item	ASTM Specification
Stainless Steel	
Bars and Shapes	A276, Type 316
Steel Plate, Sheet, and Strip	A167, Type 316
Bolts	A193, Type 316
Nuts	A194, Type 316
Aluminum, Structural Shapes	Alloy 6061-T6; conform to referenced specifications and ASTM sections found in the Aluminum Association current Construction Manual Series
Connection Bolts for Steel Members	A325-F
Galvanized Bolts	A307, A 153
Connection Bolts for Wood Members	A307
Connection Bolts for Aluminum	A2024-T4, or use appropriate stainless steel
Cast Iron	A48, Class 30

C. The miscellaneous metalwork and castings indicated on the Drawings, or required to secure the various parts together and provide a complete installation, shall be included under this section. The tabulation of items herein is not intended to be all-inclusive, and it shall be the CONTRACTOR'S responsibility to provide all metalwork and castings shown, specified, or which case reasonably be inferred as necessary to complete the project.

2.02 STEEL ANCHOR BOLTS (NONSUBMERGED USE)

A. One-half-inch minimum diameter with hex nuts, or as shown. Bolts and nuts shall be steel as specified hereinbefore.

2.03 STAINLESS STEEL ANCHOR BOLTS (SUBMERGED USE)

A. ASTM A193, Type 316 stainless steel anchor bolt, 2-inch minimum diameter with hex nuts, or size as shown.

B. Submerged use is defined as any connection to concrete from point 1 foot 6 inches above the maximum water surface in a water-holding basin and any connection below that point.

2.04 STAINLESS STEEL FASTENERS LUBRICANT (ANTI-SEIZING)

A. Where stainless steel nuts and machined bolts, anchor bolts, concrete anchors, and all other threaded fasteners are used, CONTRACTOR shall apply an anti-seizing lubricant to the threads prior to making up the connections. The lubricant shall contain substantial amounts of molybdenum disulfide, graphite, mica, talic, or copper.

2.05 MACHINE ANCHOR BOLTS

A. For equipment with motors 3 horsepower or greater, fabricate as shown or as required. Size of fastening stud and anchor bolts as required by equipment manufacturer, stainless.

B. All machine anchor bolts, nuts and washers shall be stainless steel.

2.06 ADHESIVE ANCHORS

A. Adhesive anchors shall be Parabond capsule anchors with 316 stainless steel stud, nuts, and washers, as manufactured by Molly Division, 504 Mt. Laurel Avenue, Temple, PA 19560; heavy-duty adhesive anchor with HBP adhesive cartridge and has 316 stainless steel anchor rod assembly as manufactured by Hilti, Inc., PO Box 45400, Tulsa, OK 74145, or equal.

B. Adhesive anchors shall be used for anchoring all metal components at or below a point 1 foot 6 inches above the peak (maximum) water surface elevations in water-holding structures. For embedded anchors refer to stainless steel anchors as hereinbefore specified.

2.07 SHELL-TYPE ANCHOR

A. Shell-type anchors shall be self-drilling or non-drilling Red Head anchors as manufactured by the Phillips Drill Company, or equal.

2.08 WEDGE ANCHORS

A. Wedge anchors shall be Red Head wedge-type anchors as manufactured by the Phillips Drill Company, Parabolt anchors as manufactured by the Molly Division of Emhart Corporation, or equal.

2.09 EXPANSION ANCHORS

A. Stainless steel expansion anchors shall be a pre-assembled heavy duty sleeve style undercut anchor with an internal hex head meeting the requirements of ASTM A276 and A493. The stainless steel components shall be manufactured from Type 303 or 304 stainless steel. Anchors shall be Kwik Bolt II expansion anchors as manufactured by Hilti, Inc., or equal.

2.10 MASONRY ANCHORS

A. 3/16" or 1/4" Tapcon or Hilti Kwik-Con II anchors. Head type and embedment per installation requirements.

B. Allowed at locations approved by ENGINEER only.

2.11 PIPE SLEEVES

A. ASTM A120 standard weight steel pipe. Where shown, fabricate seepage rings of 1/4-inch steel plate extending 2 inches from pipe and weld continuously to pipe around complete circumference. Galvanize after fabrication. Support pipe sleeves by form work to prevent contact with reinforcing steel. Do not weld reinforcing to pipe sleeves.

2.12 STRUCTURAL STEEL COMPONENTS

A. Provide all structural steel components of the sizes, materials and weights shown. All connections shall be welded, unless otherwise shown on the Drawings and as specified herein.

2.13 MACHINE BOLTS, INSERTS, AND FASTENERS

A. Machine bolts, inserts, and fasteners permanently embedded in concrete shall be Type 316 stainless steel.

B. Machine bolts, inserts, and fasteners not permanently embedded in concrete, but located outdoors in well wet floors, walls, and ceilings; chemical handling areas; equipment rooms subject to drainage, leakage, and washdown; and in galleries and trenches, shall be Type 316 stainless steel.

C. Machine bolts, inserts, and fasteners not permanently embedded in concrete, but located indoors where washdown, leakage, and drainage are not likely to occur (e.g., in personnel buildings excluding laboratories, on motor floors, in electrical equipment rooms, and in control rooms), may be galvanized steel, ASTM A 153.

2.14 NEOPRENE GASKET

A. Unless otherwise indicated, Rubatex No. R-411-N, (ASTM D 1056-RE-41-E), soft, closed-cell, neoprene gasket material, as manufactured by Rubatex Division of Great American Industries, Bedford, VA; equivalent as manufactured by Garlock Manufacturing, San Francisco, CA; or equal. The material shall be suitable for exposure to chlorine, lime and other chemicals typically used in water treatment. Thickness shall be as indicated, but in no case less than 1/4-inch. Gaskets shall be furnished without skin coat on either side. Provided two spare gaskets for each location shown requiring neoprene gaskets.

PART 3 EXECUTION

3.01 GENERAL

A. Workmanship and finish of all metalwork specified under this section shall be the highest grade and equal to the best practice of modern shops for the respective work. Exposed surfaces shall have smooth finish and sharp, well-defined lines. Provide all necessary rabbets, lugs, and brackets to that the work can be assembled in a neat, substantial manner. Conceal fastenings where practical. Drill metalwork and countersink holes as required for attaching hardware or other materials. Fabricate materials as specified weld connections, except where bolting is directed. Items requiring special fabrication methods are mentioned herein. Fabrication of all other items shall be of equal quality. Methods of fabrication not otherwise specified or shown shall be adequate for the stresses and as directed by the ENGINEER.

B. Grind all exposed edges of welds smooth on walkways, guardrails, hand-rails, stairways, channel door frames, steel column bases, and where indicated on the Drawings. All sharp edges shall be rounded to a 1/8-

inch minimum radius; all burrs, jagged edges, and surface defects shall be ground smooth.

C. Welds and adjacent areas shall be prepared such that there is (1) no undercutting or reverse ridges on the weld bead, (2) no weld spatter on or adjacent to the weld or any other area to be painted, and (3) no sharp peaks or ridges along the weld bead. All embedded pieces of electrode or wire shall be ground flush with the adjacent surface of the weld bead.

D. Aluminum: Fabricate aluminum as shown, and in accordance with the Aluminum Association Standards and the manufacturer's recommendations as reviewed. Grind smooth sheared edges exposed in the finished work.

3.02 WELDING

A. The technique or welding employed, appearance, quality of welds made, and the methods of correcting defective Work shall conform to codes for Arc and Gas Welding in Building Construction of the AWS and AISC. Surfaces to be welded shall be free from loose scale, rust, grease, paint, and other foreign material, except that mill scale which will withstand vigorous wire brushing may remain. A light film of linseed oil may likewise be disregarded. No welding shall be done when the temperature of the base metal is lower than zero degrees F. Finished members shall be true to line and free from twists.

B. All welding operators shall be qualified in accordance with the requirements of current AWS Standard Qualification Procedure D1.1, Chapter 5, and welders of structural and reinforcing steel shall be certified for all positions of welding in accordance with such procedure. Qualification tests shall be run by a recognized testing laboratory at the CONTRACTOR'S expense.

C. All welding operators shall be subject to examination for requalification using the equipment, materials, and electrodes employed in the execution of the Contract Work. Such requalification, if ordered by the ENGINEER, shall be done at the expense of the CONTRACTOR.

D. Aluminum: Aluminum shall be welded with Gas Metal Arc (MIG) or Gas Tungsten Arc (TIG) processes in accordance with the manufacturer's recommendations as approved, and in accordance with the recommendations of the American Welding Society contained in the Welding Handbook, as last revised. Grind smooth all exposed aluminum welds.

3.03 INSTALLATION OF FABRICATED METALWORK

A. Install in accordance with the shop drawings, the Drawings, and these Specifications. Perform field welding and erection work by skilled mechanics. Install fabricated metalwork plumb or level as applicable. The completed installations shall, in all cases, be rigid, substantial, and neat in appearance. Erect structural steel in accordance with the applicable portions of AISC Code of Standard Practice, except as modified. Install commercially manufactured products in accordance with manufacturer's recommendations as approved.

B. Aluminum: Erection of aluminum shall be in accordance with the Aluminum Association. Mill markings shall not be removed from

concealed surfaces. Exposed surfaces not otherwise coated shall have the inked or painted identification marks removed after the material has been inspected and approved by the ENGINEER.

3.04 ANCHOR BOLTS

A. All anchor bolts shall be accurately located and held in place with templates at the time the concrete is poured.

3.05 GALVANIZING AND REPAIR

A. Galvanizing of steel plates, shapes, bars (and products fabricated from these items), and strip 1/8-inch thick or thicker, shall conform to ASTM A123. Pipe, welded or seamless steel, shall conform to ASTM A120. Material thinner than 1/8 inch shall either be galvanized before fabrication in conformance with the requirements of ASTM A 525, Coating Designation G 1`0; after fabrication, in conformance with the requirements of ASTM A 123, except that the weight of zinc coating shall average not less than 1.2 ounces per square foot of actual surface area with no individual specimen having a weight of less than 1.0 ounce. Unless otherwise provided, galvanizing shall be done before or after fabrication, for material which is thinner than 1/8 inch, at the option of the CONTRACTOR. Galvanizing will not be required for stainless steel, monel metal, and similar corrosion-resistant parts.

B. In like manner, galvanizing of iron and steel hardware, and nuts and bolts, shall conform to ASTM A 153. Galvanizing shall be performed after fabrication. Galvanizing of tapped holes will not be required.

C. Fabrication shall include all operations such as shearing, cutting, punching, forming, drilling, milling, bending, welding, and riveting.

D. Components of bolted assemblies shall be galvanized separately before assembly.

E. The minimum pitch diameter of the threaded portion of all bolts, anchor bars, or studs shall conform to ANSI B1.1, having a Class 2A tolerance before galvanizing. After galvanizing, the pit diameter of the nuts or other internally threaded parts may be tapped over ANSI B1.1, Class 2B tolerance, by the following maximum amounts:

3/8-inch through 9/16-inch	0.016-inch oversize
5/8-inch through 1-inch	0.023-inch oversize
1-1/8-inch and larger	0.033-inch oversize

F. Galvanized surfaces which are specifically to be painted shall not be chemically treated after galvanizing, and prior to cleaning and painting.

G. Except for inlet grates not otherwise required to be welded, all edges of tightly contacting surfaces, where galvanized is required, shall be completely sealed by welding before galvanizing.

H. Galvanized surfaces that are abraded or damaged at any time after the application of the zinc coating shall be repaired by SP 1) and hand or power tool (Steel Structures Painting Council SP 1 or SP 3) the damaged areas, removing all loose and cracked coating after which the cleaned areas shall be painted with one of the following coatings:

1. One coat of Inorganic Zinc Silicate (MIL-P-23236, Class 3).
2. Two coats of Galvanizing Repair Paint (MIL-P-21035).
3. Two coats of Zinc Dust Paint (MIL-E-15145, Formula 102).

I. Paint should be applied to a cleaned surface. Abrasive blasting is required for inorganic zinc silicate.

3.06 ELECTROLYTIC PROTECTION

A. Aluminum in contact with or embedded in concrete shall be provided with an electrolysis protective material. The protective material shall be applied to the aluminum surface which will be in contact with the dissimilar material. Protective system shall be System No. 27 as specified in Section 09900 - Protective Coatings.

B. Aluminum in contact with steel shall be provided with an electrolysis protective material. The protective material shall be neoprene gasket as specified herein.

3.07 PAINTING

A. Thoroughly clean all ferrous metal items not galvanized and give a shop coat of metal primer. Preparation of surfaces and application of primer shall be in accordance with the paint manufacturer's printed directions and recommendations as reviewed and in accordance with Section 09900 - Protective Coatings, utilizing the appropriate painting system.

3.08 PREPARATION FOR SHIPMENT

A. Insofar as is practical, the items provided hereunder shall be factory assembled. The parts and assemblies that are of necessity shipped unassembled, shall be packaged and clearly tagged in a manner that will protect the materials from damage, and facilitate the identification and final assembly in the field.

END OF SECTION

SECTION 07900

SEALANTS

PART 1 GENERAL

1.01 WORK INCLUDED

A. This Section covers the work necessary to furnish all labor, materials and equipment required to provide all joint sealants as shown on the drawings and specified herein.

B. All items specified herein this section may not be specifically required for this project. CONTRACTOR shall coordinate the requirements of this section with the drawings for proper completion of the Work.

C. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 09900 - Protective Coatings.

1.03 SUBMITTAL

A. Submittals shall be made in accordance with the requirements of Section 01300 - Submittals. In addition, the following specific information shall be submitted:

1. Manufacturer's product data.
2. Submit small sample of materials proposed for use showing color specified. Samples shall be accompanied by Certificate of Compliance with applicable reference standards.
3. Submit applicator's Affidavit of Qualification Compliance.

1.04 DELIVERY, STORAGE AND HANDLING

A. Deliver all sealants to jobsite in sealed containers, each bearing manufacturer's name and product description.

B. Provide for storage of sealant materials as recommended by manufacturer.

1.05 PROJECT CONDITIONS

A. The ambient temperature shall be 40E to 100EF, when a sealant is applied.

B. Allow sealants a minimum curing time of one (1) week prior to total water immersion.

1.06 SEQUENCING AND SCHEDULING

A. Schedule sealant installation to coincide and expedite work specified in Section 09900 - Protective Coatings.

PART 2 PRODUCTS

2.01 GENERAL

A. Sealants shall be approved for use in contact with potable water where required by specific application.

2.02 SINGLE COMPONENT SEALANT

A. Sealant shall be one-part polyurethane conforming to Federal Specification TT-S-00230C and ASTM C-920, Type II Class A, Non-Sag Elastomeric Sealant.

B. Color shall be selected from manufacturer’s standards to match color of adjacent surfaces, where applicable.

C. Sealant shall be Sikaflex-1A as manufactured by Sika or equal.

2.03 TWO COMPONENT SEALANT

A. Sealant shall be two-component, premium grade, polyurethane-based, conforming to Federal Specification TT-S-00227E and ASTM C-920, Non-Sag (NS) or self-leveling (SL) Elastomeric Sealant.

B. Color shall be selected from manufacturer’s standards to match color of adjacent surfaces, where applicable.

C. Sealant shall be Sikaflex-2C, NS/SL as manufactured by Sika or equal.

2.04 JOINT BACKING (BACKER ROD)

A. Closed-cell polyethylene foam rod conforming to ASTM D1751 and compatible to specified sealant. Size and use shall be as recommended by manufacturer.

2.05 PRIMER

A. Material shall be as recommended by sealant manufacturer where required for adhesion of sealant to joint substrate, as applicable.

2.06 BOND BREAKER

A. Bond breaker shall be polyethylene tape or other plastic tape as recommended by sealant manufacturer for preventing bond between sealant to back (3rd) surface of joint substrate or joint backing.

PART 3 EXECUTION

3.01 PREPARATION

A. Elastomeric sealants shall be applied in accordance with ASTM C962.

B. All surfaces to be sealed shall be clean, dry, sound and free of dust, loose mortar and all other foreign material.

3.02 INSTALLATION

A. Apply sealant materials, bond breaker and primer in strict compliance with the manufacturer's printed instructions as applicable to products and indicated applications.

3.03 CLEANUP

A. Surfaces adjacent to sealed joints shall be cleaned of smears, excess sealant materials or other soiling resulting from the sealing application. At no additional cost to OWNER, replace or repair to OWNER's satisfaction any damaged surfaces resulting from sealing.

END OF SECTION

SECTION 09900

PROTECTIVE COATINGS

PART 1 GENERAL

1.01 WORK INCLUDED

A. This Section covers the work required to provide all labor, materials, equipment and incidentals to perform all of the necessary surface preparation and painting required to complete this contract in its entirety.

B. It is the intent of this specification to paint all concrete exposed miscellaneous ferrous metals, pipes, fittings, valves, equipment and all other work obviously required to be painted unless otherwise specified. Minor items omitted in the schedule of Work shall be included in the Work of this Section where they come within the general intent of the Specifications as stated herein.

C. The following surfaces or items are not required to be painted:

1. Aluminum: gratings, checkered plates, hatches, handrails, toeboards, stairways and walkways (except as required for electrolytic protection).

2. Stainless Steel, brass and bronze.

3. Piping buried in the ground or embedded in concrete.

4. Ducts, pipes and other miscellaneous items covered with insulation or plastic coated.

5. Concealed surfaces of pipe and crawl spaces.

6. Finish hardware.

7. Nonferrous architectural metals, unless specifically noted otherwise.

8. Packing glands and other adjustable parts and nameplates of mechanical equipment.

9. All manufactured painted electrical equipment (switchgear, transformers, motor control centers, control panels, etc.).

D. All items specified herein this section may not be specifically required for this project. CONTRACTOR shall coordinate the requirements of this section with the drawings for proper completion of the Work.

E. Like items of materials provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, maintenance, replacement and service.

F. See CONTRACT CONDITIONS and Division 1, General Requirements, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

1. Section 07900 - Sealants.

2. Finish Schedules on Drawings.

1.03 ABBREVIATIONS

A. The abbreviations and definitions listed below, when used in this Section shall have the following meanings:

ANSI	American National Standards Institute
ASTM	American Society of Testing Materials
AWWA	American Water Works Association
DFT	Dry Film Thickness
FRP	Fiberglass Reinforced Plastic
HCL	Hydrochloric Acid
MDFT	Minimum Dry Film Thickness
MDFTPC	Minimum Dry Film Thickness Per Coat
mil	Thousandths of an Inch
MIL-P	Military Specification - Paint
NACE	National Association of Corrosion Engineers
NSF	National Sanitary Foundation
OSHA	Occupational Safety and Health Administration
SFPG	Square Feet Per Gallon
SFPGPC	Square Feet Per Gallon Per Coat
SP	Surface Preparation
SSPC	Steel Structures Painting Council

1.04 SUBMITTALS

A. Submittals shall be made in accordance with the requirements specified in Section 01300 - Submittals.

B. Submittals will be made with the coating system data sheet included at the end of this section.

C. The following shall be submitted for each proposed coating system: manufacturer's specifications, surface preparation details, application procedures, technical data sheets and dry film thickness or coverage.

D. Schedule of Painting Operations: The CONTRACTOR shall include a complete Schedule of Painting Operations with the overall project schedule.

1.05 QUALITY ASSURANCE

A. The paint manufacturer shall provide a representative to visit the jobsite at intervals during surface preparation and painting as may be required for product application quality assurance and to determine compliance with Manufacturer's instructions and these Specifications, and as may be necessary to resolve field problems attributable to, or associated with, the manufacturer's products furnished under this Contract.

1.06 INSPECTION

A. The CONTRACTOR shall give the ENGINEER a minimum of three (3) days advance notice of the completion of any surface preparation work or start of coating application work.

B. Before application of the base (prime) coat and each succeeding coat, all surfaces to be painted shall be inspected by ENGINEER. Any and all defects or deficiencies shall be corrected by the CONTRACTOR before application of any subsequent coating.

C. Coating applications shall be checked for required MDFT as per these specifications. All coated surfaces failing to meet the MDFT requirements shall be rejected.

D. For all coatings subject to immersion, consult the coatings manufacturer's written instructions for time required after system application before immersion.

E. Inspection by the ENGINEER or the waiver of inspection of any particular portion of the Work shall not be construed to relieve the CONTRACTOR of his responsibility to perform the Work in accordance with these Specifications.

F. All equipment required for discontinuity (Holiday) testing of steel substrates and continuity verification of concrete substrates shall be furnished and operated by the painting contractor.

1.07 PAINT DELIVERY AND STORAGE

A. All materials shall be new and shall be delivered to the project site in unopened containers that plainly show, at the time of use, the designated name, date of manufacture, color, and name of manufacturer. Paints shall be stored in a suitable protected area that is heated or cooled as required to maintain temperatures within the range recommended by the paint manufacturer.

B. All paint or other such regulated substances stored on site by CONTRACTOR shall be done so in accordance with the rules and regulations of the Florida Department of Environmental Protection regarding secondary containment and the Broward County Department of Planning and Environmental Protection.

1.08 PROJECT SITE CONDITIONS

A. The location of this project requires observance and conformance with EPA Volatile Organic Compound (VOC) restrictions. EPA limits the content of VOC's in painting materials to 3.5 lbs./gallon. Information regarding the VOC content of proposed paints will be required during submittals.

1.09 WARRANTY

A. CONTRACTOR shall warrant to the OWNER and guarantee the work under this Section against defective workmanship and materials for a period of two (2) years commencing on the final contract date of final acceptance of the project.

B. Warranties shall be submitted in accordance with Section 01740-Warranties and Bonds.

PART 2 PRODUCTS

2.01 GENERAL

A. All products used in immersion service or in contact with potable water shall be ANSI/NSF certified for use in contact with potable water.

B. Products containing lead will not be allowed. Oil shall be pure boiled linseed oil.

2.02 PAINT MATERIALS

A. Products shall be manufactured by Tnemec Company, Inc., Carboline, BASF, Xypex Chemical Corporation, C.I.M. Industries, Inc., or equal.

B. The following paint products are used for the basis of establishing the desired quality expected for the project.

PRODUCT TYPE	TNEMEC COMPANY, INC. PRODUCT NAME	CARBOLINE PRODUCT NAME
Epoxy (Non-Potable)	Series 66 Hi-Build Epoxoline	Carboguard 890
Epoxy (Potable)	Series N140 Pota-Pox Plus	Carboguard 891HS
Polyurethane	Series 73 Endura-Shield	Carbothane 134HG
Acrylic Emulsion (Low Gloss)	Series 6 Tneme-Cryl	Sanitile 155
Water Borne Acrylic Epoxy (Semi Gloss)	Series 113 H.B. Tneme-Tufcoat	Sanitile 255
Epoxy Waterborne Cementitious Acrylic	Series 130-6602 Envirofill	Sanitile 100
Epoxy Mastic	Series 135 Chembuild	Carbomastic 615
Acrylic Polymer (Semi-Gloss)	Series 1028 Enduratone	Carbocrylic 3359
Waterborne Acrylic Bonding Primer		Carbocylic 120
Polyamine Epoxy (Primer)	Series 201 Epoxoprime	Semstone 110
Polyamidoamine Epoxy (Non-Potable)	Series N69 Hi-Build Epoxoline II	Carboguard 890
Polyamide Epoxy Coal Tar	46H-413 Hi-Build Tneme-Tar	Bitumastic 300M

PRODUCT TYPE	TNEMEC COMPANY, INC. PRODUCT NAME	CARBOLINE PRODUCT NAME
Polyamine Novolac Epoxy	Series 282 Tneme-Glaze	Semstone 145 or 145SL (Floors)
Epoxy Block Filler	Series 1254 Epoxoblock WB	Sanitile 600
Colored Quartz-Filled Modified Polyamine Epoxy	Series 222 Deco-Tread	Sanitile 920
Modified Polyamine Epoxy	Series 284 Deco-Clear	Sanitile 922 (Clear)
Aliphatic Polyester Polyurethane	Series 295 Clear CRU	Sanitile 865
Epoxy Modified Cementitious Mortar	Series 218 MortarClad	Carboguard 510 or 510SG
Fiber Reinforced Epoxy	Series 270 Stranlok	Semstone 145
Waterborne Epoxy-Amine Adduct (Floor)	Series 287 Enviro-Tread	Carboguard 655
Aliphatic Polyester Polyurethane (Floor)	Series 290 CRU	Carbothane 133HB
Glass Bead Additive	Series 211-212 Glass Beads	Contact Supplier
Cycloaliphatic Amine Epoxy	Series 104 H.S. Epoxy	Carboguard 890
Modified Amine Epoxy (Trowel Grade)	Series 215 Surfacing Epoxy or 510	Carboguard 501
Modified Polyamine Epoxy (Surfacer)	Series 215 Surfacing Epoxy	Carboguard 501, 510 or 510SG
Epoxy Mortar	Series 237 Power-Tread	CarboGuard 510 or 510SG

PRODUCT TYPE	BASF PRODUCT NAME
Cementitious Coating	Thoroseal

PRODUCT TYPE	XYPEX CHEMICAL CORP. PRODUCT NAME
Crystaline Waterproofing (Concentrate)	Xypex Concentrate
Crystaline Waterproofing (Modified)	Xypex Modified

PRODUCT TYPE	C.I.M. Industries, Inc. PRODUCT NAME
Epoxy Primer (Special)	CIM 61BG
Trowel Grade Liner	CIM 1061

2.03 EXTRA PAINT

A. Furnish one (1) unopened container of each type and each color of paint used, properly marked for future use by OWNER. Minimum size of one (1) gallon.

2.04 PIPE IDENTIFICATION LABELS

A. Piping systems larger than 1" diameter

1. Stick-on pipe labels shall be durable self-adhesive vinyl, meeting ANSI A13.1 for background color and lettering height as follows:

Pipe Diameter	Letter Height
1" to 2-1/2"	3/4"
2-5/8" to 6"	1-1/4"
8" and above	2-1/2"

2. Custom flow stream identification color and text shall be provided per the flow stream requirements noted on the drawings.

3. Flow detection arrow(s) shall be incorporated with each custom label. Above 6" diameter pipe flow arrows shall be provided around pipe circumference.

4. Labels for color code painted pipe shall have a clear background with black letters and flow direction arrows.

5. Stick-on pipe labels shall be as provided by Brady, Craftmark, Seton, or equal.

B. Piping systems 1" diameter and smaller

1. Labels shall be reusable plastic snap-on markers as manufactured by Brady, Craftmark, Seton, or equal.

2. Custom flow stream identification text with flow direction arrow shall be provided per the flow stream requirements noted on the drawings.

C. Piping Systems Larger Than 3" Diameter (Alternative)

1. Black stencil painted letters, all capitals meeting the following heights:

Pipe Diameter	Letter Height
4" to 10"	1-1/4"
12" and above	2-1/2"

2. Paint for stenciling shall be black, same top coat as the specified coating system.

3. Flow direction arrows shall also be included.

PART 3 EXECUTION

3.01 PROTECTION OF SURFACES NOT TO BE PAINTED

A. Mask or otherwise protect hardware, lighting fixtures, switch plates, aluminum surfaces, machined surfaces, couplings, shafts, bearings, nameplates and all other surfaces not intended to be painted which cannot be removed.

B. Provide drop cloths to prevent paint materials from falling on or marring adjacent surfaces.

C. Protect working parts of mechanical and electrical equipment from damage during surface preparation and painting processes. Openings in motors shall be masked to prevent paint and other materials from entering motors.

D. Protection of Existing Structures, Residences, or Vehicles

1. CONTRACTOR shall provide screens or other such means to prevent splatter of concrete, paint or other such substance from staining or damaging the nearby existing structures, residences or vehicles.

2. CONTRACTOR shall be responsible for cleaning and repairing all damages caused by overspray.

3.02 ENVIRONMENTAL CONDITIONS

A. Paint shall not be applied in temperatures exceeding the manufacturer's recommended maximum and minimum allowable, nor under adverse conditions such as dust, smoke-laden atmosphere, damp or humid weather.

3.03 SAFETY

A. Painting shall be performed in strict accordance with the safety recommendations of the paint manufacturer; with the safety recommendations of the National Association of Corrosion Engineers contained in the publication, Manual for Painter Safety; Federal, State, and local agencies having jurisdiction.

B. Ultimate responsibility for safety is the CONTRACTOR's.

3.04 PREPARATION OF FERROUS METAL SURFACES

A. All surfaces to be coated shall be prepared as specified herein and shall be dry and clean before coating. Specific surface preparation shall be specified for the individual coating systems.

B. Standards for Ferrous Metal Surfaces Preparation

1. SSPC-SP-1 Chemical and/or Solvent Cleaning

Remove all grease, oil, salt, acid, alkali, dirt, dust, wax, fat, foreign matter and contaminates, etc. by one of the following methods: steam cleaning, alkaline cleaning, or volatile solvent cleaning.

2. SSPC-SP-2 Hand Tool Cleaning

Removal of loose rust, loose mill scale and loose paint to a clean sound substrate by hand chipping, scraping, sanding and wire brushing.

3. SSPC-SP-3 Power Tool Cleaning

Removal of loose rust, loose mill scale and loose paint to a clean sound substrate by power tool chipping, descaling, sanding, wire brushing and grinding.

4. SSPC-SP-4 Flame Cleaning

Dehydrating and removal of rust, loose mill scale and some light mill scale by use of flame, followed by wire brushing.

5. SSPC-SP-5 (NACE-1) White Metal Blast Cleaning

Complete removal of all mill scale, rust scale, previous coating, etc., leaving the surface a uniform gray-white color.

6. SSPC-SP-6 (NACE-3) Commercial Grade Blast Cleaning

Complete removal of all dirt, rust scale, mill scale, foreign matter and previous coating, etc., leaving only shadows and/or streaks caused by rust stain and mill scale oxides. At least 66% of each square inch of surface area is to be free of all visible residues, except slight discoloration.

7. SSPC-SP-7 (NACE-4) Brush-Off Blast Cleaning

Removal of rust scale, loose mill scale, loose rust and loose coatings, leaving tightly-bonded mill scale, rust and previous coatings. On concrete surfaces, brush-off blast cleaning shall remove all laitance, form oils and solid contaminates. Blasting should be performed sufficiently close to the surface so as to open up surface voids, bugholes, air pockets and other subsurface irregularities, but so as not to expose underlying aggregate.

8. SSPC-SP-8 Pickling

Complete removal of rust and mill scale by acid pickling, duplex pickling or electrolytic pickling (may reduce the resistance of the surface to corrosion, if not to be primed immediately).

9. SSPC-SP-10 (NACE-2) Near-White Metal Blast Cleaning

Removal of all rust scale, mill scale, previous coating, etc., leaving only light stains from rust, mill scale and small specks of previous coating. At least 95% of each square inch of surface area is to be free of all visible residues, and the remainder shall be limited to slight discoloration.

10. SSPC-SP-11-87 Power Tool Cleaning to Bare Metal

    Complete removal of rust, rust scale, mill scale, foreign matter and previous coatings, etc. to a standard as specified on a Commercial Grade Blast Cleaning (SSPC-SP-6, NACE-3) by means of power tools that will provide the proper degree of cleaning and surface profile.

C. Ferrous metal shall be blasted unless otherwise specified. Blasting shall be done with a centrifugal wheel or compressed air blasting equipment, using proper abrasives to attain an average profile depth of 1.5 mils. Do not reuse sand or flint abrasives. Shot abrasives must be thoroughly clean of contamination before reuse. Blow dust and grit from surface with clean, dry air. Coat within 8 hours or before rust contamination occurs.

D. Shop-Finished Surfaces: All shop-coated surfaces shall be protected from damage and corrosion before and after installation by treating damaged areas immediately upon detection. Abraded or corroded spots on shop-coated surfaces shall be prepared in accordance with SSPC-SP2 (Hand Tool Cleaning) and then touched up with the same materials as the shop coat. All shop coated surfaces which are faded, discolored, or which require more than minor touch-up in the opinion of the ENGINEER shall be repainted. Cut edges of galvanized sheets and exposed threads and cut ends of galvanized piping, electrical conduit, and metal pipe sleeves, not to be finished painted, shall be cleaned in accordance with SSPC-SP1 (Solvent Cleaned) and primed with zinc dust-zinc oxide metal primer.

E. Pre-Blast Cleaning Requirements

All oil, grease, welding fluxes, and other surface contaminants shall be removed prior to blast cleaning. Preblast cleaning methods shall use steam, open flame, hot water, or cold water with appropriate detergent additives followed with clean water rinsing.

Small isolated areas shall be cleaned as above or solvent cleaned with suitable solvents and clean cloths.

All sharp edges shall be rounded or chamfered and all burrs, jagged edges, and surface defects shall be ground smooth.

Welds and adjacent areas shall be prepared such that there is: (1) no undercutting or reverse ridges on the weld bead, (2) no weld spatter on or adjacent to the weld or any other area to be painted and (3) no sharp peaks or ridges along the weld bead. All embedded pieces of electrode or wire shall be ground flush with the adjacent surface of the weld bead.

3.05 PREPARATION OF CONCRETE AND MASONRY SURFACES

1. All surfaces to be coated shall be prepared as specified herein and shall be dry and clean before coating. Specific surface preparation shall be specified for the individual coating systems.

2. Standards for concrete/masonry surface preparation shall be as defined and specified by guideline No. 03732 (latest revision) as published by the International Concrete Repair Institute.

3. Concrete and masonry surfaces shall be prepared in accordance with the International Concrete Repair Institute Guideline No. 03732 to provide the specified Concrete Surface Profile CSP 2 - CSP 9, and the recommendations of the repair, coating and lining manufacturer. According to ICRI, surface preparation methods that may result in a CSP 1 - CSP 9, include acid etching, detergent scrubbing, low-pressure water blasting, abrasive (sand) blasting, and high and ultra high pressure water jetting.

   Concrete and masonry surface preparation method shall be as selected by CONTRACTOR to meet the specified concrete surface profile requirement and the other specified surface preparation requirements.

4. The Concrete Surface Profile (CSP) requirements shall be as follows:
   1. ICRI CSP 1 - Acid Etched.
   2. ICRI CSP 2 - Grinding.
   3. ICRI CSP 3 - Light Shot Blast.
   4. ICRI CSP 4 - Light Scarification.
   5. ICRI CSP 5 - Medium Shot Blast.
   6. ICRI CSP 6 - Medium Scarification.
   7. ICRI CSP 7 - Heavy Abrasive Blast.
   8. ICRI CSP 8 - Scabbled.
   9. ICRI CSP 9 - Heavy Scarification.

   These classifications are to be used to determine depth of surface profile and are not intended to dictate surface preparation method to be employed.

3.06 PREPARATION OF EXISTING COATED SURFACES

A. Existing coated surfaces to be painted shall be detergent washed and fresh water rinsed. Loose, abraded, or damaged coatings shall be cleaned to substrate by SSPC-SP2 (Hand Tool Cleaning) or SSPC-SP3 (Power Tool Cleaning). Surrounding intact coating shall be feathered. One spot coat of the specified primer shall be applied to bare areas overlapping the prepared existing coating. One full finish coat of the specified material shall be applied overall.

B. The exact nature of the existing coatings is not known in all cases; and, while it is assumed that they have oxidized sufficiently to prevent lifting or peeling when overcoated with the paints specified, the compatibility shall be checked by application to a small area prior to starting the painting. If lifting or other problems occur, request instructions from the ENGINEER.

3.07 SHOP PAINTING

A. All fabricated steel work and equipment shall receive at the factory at least one shop coat of prime paint compatible with the paint system required by these Specifications. Surface preparation prior to shop painting shall be as specified. Finish coats may be applied in the shop if acceptable to the ENGINEER. All shop painted items shall be properly packaged and stored until they are incorporated in the Work. Any painted surfaces that are damaged during handling, transporting,

storage or installation shall be cleaned, scraped and patched before field painting begins. Work shall be equal to the original painting received at the shop. Equipment or steel work that is to be assembled on the site shall likewise receive a minimum of one shop coat of paint at the factory. Surfaces of exposed members that will be inaccessible after erection shall be prepared and painted before erection.

B. The CONTRACTOR shall specify the shop paints to be applied when ordering equipment in order to assure compatibility of shop paints with field paints. The paints and surface preparation used for shop coating shall be identified on shop drawings submitted to the ENGINEER for review.

C. Shop finish coats may be the standard finish as ordinarily applied by the manufacturer if it can be demonstrated to the ENGINEER that the paint system is equal to and compatible with the paint system specified. However, all pumps, motors, valves, pipe and other equipment shall receive at least one field applied finish coat after installation.

3.08 COATING SYSTEM INDEX

A. The following is a general index to the Coating System descriptions contained herein:

SYSTEM NUMBER	TITLE
1E	Submerged Metal - Potable Water (Existing/Shop Primed)
4E	Exposed Metal (Existing/Shop Primed) - Highly Corrosive
7E	Interior Metal (Existing/Shop Primed) - Highly Corrosive.
23E	Chemical Resistant Wall (Concrete and Masonry) - Existing
24	Exposed FRP, PVC
24E	Exposed FRP, PVC (Existing)
25	Interior FRP, PVC
25E	Interior FRP, PVC (Existing)
27	Aluminum and Dissimilar Metal Insulation
109E	Existing Interior Concrete and Masonry
111E	Existing Exterior Stucco Cementitious Coating (Flat)

3.09 COATING SYSTEMS

A. **System No. 1E - Submerged Metal-Potable Water (Existing/Shop Primed)**

Surface Preparation:	Abrasive blast clean steel to an SSPC-SP10 (near white metal blast).
Prime Coat:	Epoxy (Potable) 6.0 - 8.0 mils DFT.
Stripe Coat:	Epoxy (Potable) 4.0 - 6.0 mils DFT at all weld seams, flanges and edges.
Top Coat:	Epoxy (Potable) at 6.0 - 8.0 mills DFT.
MDFT:	14 mils for the two (2) coat system.
Color:	White.

B. System No. 4E - Exposed Metal (Existing/Shop Primed) – Highly Corrosive.

Surface Preparation:	Remove all dirt, oil, grease, chemicals by
Surface Preparation: (Existing)	High pressure water blasting. Remove all rust and loose damaged paint by abrasive blast cleaning per SSPC-SP7 (Brush Off Blast) or by SSPC-SP2 & 3 Hand & Power Tool Cleaning.
Surface Preparation: (Shop Primed)	Piping, fittings, and valves shall be shop Primed in accordance with Specification Sections 15005 and 15100. Equipment, pumps and motors shall be shop primed per applicable Specification Sections.
Spot Prime:	Spot prime all bare metal areas with an epoxy mastic at 5.0 mils DFT.
Prime Coat:	Epoxy Mastic 5.0 Mils DFT.
Top Coat:	Polyurethane 3.0 Mils DFT.
Sealant:	Apply single component sealant as specified in Section 07900 - Sealants, at location where two pieces of steel overlap, between flanges, at bolts, etc.
MDFT:	8.0 Mils for the two (2) coat system.
Color:	Color as scheduled on drawings.

C. System No. 7E - Interior Metal (Existing/Shop Primed) - Highly Corrosive.

Surface Preparation: (Existing)	Remove all dirt, oil, grease, chemicals by High pressure water blasting. Remove all rust and loose damaged paint by abrasive blast cleaning per SSPC-SP7 (Brush Off Blast) or by SSPC-SP2 & 3 Hand & Power Tool Cleaning.
Surface Preparation: (Shop Primed)	Piping, fittings, and valves shall be shop Primed in accordance with Specification Sections 15005 and 15100. Equipment, pumps and motors shall be shop primed per applicable Specification Sections.
Spot Prime (Existing):	Spot prime all bare metal areas with an epoxy mastic at 5.0 mils DFT.
Prime Coat:	Epoxy (Non-Potable) 7.0 Mils DFT.
Top Coat:	Epoxy (Non-Potable) 3.0 Mils DFT.
MDFT:	10.0 Mils for the two (2) coat system.
Color:	As scheduled on Drawings.

D. System No. 23E - Chemical Resistant Wall (Concrete Masonry)-Existing

Surface Preparation:	Remove all dirt, oil, grease, chemicals and loose paint by high pressure water blasting (3500 PSI with a turbo tip). Remove as much of the topcoats from the block filler as possible. All remaining topcoat must be tightly adhering. Feather all edges of remaining topcoat.
Top Coat:	Two (2) coats Waterborne Acrylic Epoxy (Semi-Gloss) at 4.0 - 6.0 mils DFT per coat.
Color:	As scheduled on Drawings.

E. System No. 24 - Exposed FRP, PVC.

Surface Preparation:	Solvent cleaning, SSPC-SP1, to remove soluble contaminants. Remove all insuluble contaminants or foreign materials by hand, SSPC-SP2, or Power Tool Cleaning, SSPC-SP3.
Prime Coat:	Epoxy (non-potable) at 2.0 - 4.0 Mils DFT.
Top Coat:	High Build Acrylic Polyurethane at 2.0 - 4.0 Mils DFT.
MDFT:	6.0 Mils for two (2) coat system.
Color:	As scheduled on Drawings.

F. System No. 24E - Exposed FRP, PVC (Existing)

Surface Preparation:	Remove all dirt, oil, grease, chemicals and loose paint by high pressure water blasting (min 3500 PSI) and scraping. Feather all edges. Lightly sand or abrade to roughen and de-gloss existing surface.
Prime Coat:	Epoxy (Non-Potable) 3.0 Mils DFT.
Top Coat:	Polyurethane 2.0 Mils DFT.
Color:	As scheduled on drawings.

G. System No. 25 - Interior FRP, PVC.

Surface Preparation:	Solvent cleaning, SSPC-SP1, to remove soluble contaminants. Remove all insoluble contaminants or foreign materials by hand, SSPC-SP2, or Power Tool Cleaning, SSPC-SP3.
Prime Coat:	Epoxy (Non-Potable) 3.0 Mils DFT.
Top Coat:	Epoxy (Non-Potable) 3.0 Mils DFT.
MDFT:	6.0 Mils for the two (2) coat system.
Color:	As scheduled on Drawings.

H. System No. 25E - Interior FRP, PVC (Existing)

Surface Preparation:	Solvent cleaning, SSPC-SP1, to remove soluble contaminants. Remove all insoluble contaminants or foreign materials by hand, SSPC-SP2, or Power Tool Cleaning, SSPC-SP3. Lightly sand or abrade to roughen and de-gloss existing surface.
Prime Coat:	Epoxy (Non-Potable) 3.0 Mils DFT.
Top Coat:	Epoxy (Non-Potable) 3.0 Mils DFT.
MDFT:	6.0 Mils for the two (2) coat system.
Color:	As scheduled on Drawings.

I. System No. 27 - Aluminum and Dissimilar Metal Insulation

Surface Preparation:	Scarify surface.
Top Coat:	Polyamide Epoxy Coal Tar at 10.0 mils DFT.
MDFT:	10.0 mils for one (1) coat system.
Color:	Black.

J. System No. 109E - Existing Interior Concrete and Masonry (Semi-Gloss)

Surface Preparation:	Remove all dirt, oil, grease, chemicals and loose paint by high pressure water blasting (3500 PSI with a turbo tip). Remove as much of the topcoats from the block filler as possible. All remaining topcoat must be tightly adhering. Feather all edges of remaining topcoat.
Surface Profile:	ICRI CSP 1
Patching:	Patch all existing holes in walls with non-shrink grout as specified in Section 03600 - Grout.
Caulking:	Prepare and fill all surface cracks (# 1/4-inch) with sealant as specified in Section 07900 - Sealants. Caulk all doors, louvers, and fans.
Spot Prime:	Acrylic Emulsion (low gloss) at 254 SFPGPC or Waterborne Acrylic Bonding Primer at 1.0-2.0 mils DFT.
Top Coat:	Two (2) coats Acrylic Polymer (Semi-Gloss) at 254 SFPGPC.
Color:	As scheduled on drawings.

K. System No. 111E - Existing Stucco Cementitious Coating (Flat)

Surface Preparation:	Remove all dirt, oil, grease, chemicals and loose paint by high pressure water blasting (min. 3500 PSI).
Surface Profile:	ICRI CSP 1
Caulking:	Prepare and fill all surface cracks (# 1/4-inch) with sealant as specified in Section 07900 - Sealants. Caulk all doors, louvers, and fans.
Patching:	Patch all existing holes (or holes resulting from work) in walls with non- shrink grout as specified in Section 03600 - Grout.
Cementitious Repair:	Thoroseal plaster mix with sponge finish. (For damaged areas greater than 3-inch diameter)
Prime:	Acrylic Emulsion (Low Gloss) at 2.0-3.0 Mils (287 SFPGPC)
Top Coat:	Acrylic Emulsion (Low Gloss) at 2.0-3.0 Mils (287 SFPGPC).
Color:	As scheduled on drawings.

3.10 UNIDENTIFIED SURFACES

A. Any surfaces not specifically named in the Schedule and not specifically excluded or exempted shall be prepared, primed and painted in the manner and with materials consistent with these Specifications. The ENGINEER shall select which of the manufacturer's products, whether the type is indicated herein or not, shall be used for such unidentified surfaces. This painting shall be done within the Scope of the Contract.

3.11 WORKMANSHIP

A. On metal surfaces apply each coat of paint at the rate specified by the manufacturer to achieve the minimum dry mil thickness required. If material has thickened or must be diluted for application by spray gun, the coating shall be built up to the same film thickness achieved with undiluted material. One gallon of paint as originally furnished by the manufacturer shall not cover a greater area when applied by spray gun than when applied unthinned by the application of an additional coat(s). On masonry, application rates will vary according to surface texture, however, in no case shall the manufacturer's stated coverage rate be exceeded. On porous surfaces, it shall be the painter's responsibility to achieve a protective and decorative finish either by decreasing the coverage rate or by applying additional coats of paint.

B. All safety equipment shall be painted in accordance with OSHA Standards as approved.

C. Materials shall be mixed in proper containers of adequate capacity. All materials shall be thoroughly stirred before use and shall be kept stirred while using. No unauthorized thinners or other materials shall be added to any paint.

D. Only skilled painters shall be used on the Work and specialists shall be employed where required.

E. Steel members, metal castings, mechanical and electrical equipment and other metals which are shop primed before delivery at the site will not require a prime coat on the job. All piping and other bare metals to be painted shall receive one coat of primer before exposure to the weather, and this prime coat shall be the first coat as specified in the painting schedule.

F. Finish surfaces shall not show brush marks or other irregularities. Undercoats shall be thoroughly and uniformly sanded with No. 00 sandpaper or equal to remove defects and provide a smooth even surface. Top and bottom edges of doors shall be painted and all exterior trim shall be back-primed before installation.

G. Painting shall be continuous and shall be accomplished in an orderly manner so as to facilitate inspection. All exterior concrete and masonry painting shall be performed in one continuous manner structure by structure. Materials subject to weathering shall be prime coated as quickly as possible. Surfaces of exposed members that will by inaccessible after erection shall be cleaned and painted before erection.

H. Before final acceptance of the Work, all damaged surfaces of paint shall be cleaned and repainted as directed by the ENGINEER.

3.12 APPLICATION SCHEDULE

A. Coating systems shall be used at locations as scheduled on the drawings.

B. **System No. 27 - Aluminum and dissimilar metal insulation.** This system shall be used on all aluminum in contact with concrete. Insulate all contacting dissimilar metals with this system. Neoprene pads may be substituted to insulate aluminum from concrete or aluminum from steel.

3.13 COLOR CODING FOR PIPES AND EQUIPMENT

A. All existing piping, valves, and equipment that are repainted shall be color coded. When color coding is specified, it shall consist of color code painting and lettering identification of all exposed conduits, trough items and pipelines for the transport of gases, air, liquid and semi-liquids including all accessories such as valves, insulated pipe coverings, fittings, junction boxes, bus bars, connectors and all operating accessories which are integral to be whole function mechanical pipe and electrical conduit system.

B. All hangers and pipe support floor stands shall be painted. The system shall be painted up to but not including the flanges attached to the mechanical equipment nor the flexible conduit connected to electrical equipment. Colors shall be as noted in the Finish Schedules.

C. All systems which are an integral part of the equipment that is originating from the equipment and returning to the same piece of equipment, shall be painted between and up to but not including the fixed flanges or connections on the equipment.

D. Color coding requirements are as indicated by the Finish Schedules contained in the Drawings.

E. CONTRACTOR shall submit proposed schedule for color coding pipes and equipment for approval by ENGINEER/OWNER.

3.14 PIPE LABELING

A. All exposed piping repainted shall be labeled to indicate flow stream and direction of flow.

B. Labels shall be installed following completion of specified protective coating system application.

C. Maximum spacing between labels shall be 10'-0" on center.

D. In locations where pipes are horizontally or vertically stacked, pipe labels shall be arranged in similar.

3.15 CLEAN UP

A. It shall be the responsibility of the Contractor to collect and dispose of properly, all waste materials from the site in accordance with all requirements of the Federal, State and local Environment Protection Agencies.

B. At completion of the Work, remove all paint where spilled, splashed, splattered, sprayed or smeared on all surfaces, including glass, light fixtures, hardware, equipment, painted and unpainted surfaces.

C. After completion of all painting, the Contractor shall remove from the job site all painting equipment, surplus materials and debris resulting from this Work.

SECTION 13700

PROCESS INSTRUMENTATION AND CONTROLS

PART 1 GENERAL

1.01 WORK INCLUDED

A. Provide all engineering, labor, materials and equipment to furnish, install, adjust, test, document and start-up all process instrumentation and controls as shown on the Drawings and specified herein, complete.

B. The process instrumentation and control system specified herein shall be a complete system.

C. Like items of equipment provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

D. All items specified herein this Section may not be specifically required for this project. I&C INTEGRATOR shall coordinate the requirements of this Section with the work required for proper completion of the project.

E. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements which apply to the work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13710 – Programmable Logic Controller.

B. Section 13711 - Existing SCADA System Modifications.

C. Section 13712 – Local HMI System Development.

D. Section 13725 - Loop Functions/Programming Strategies/Protocols.

E. Section 13751 - RTU Sub System.

F. Section 13752 – Computers and Accessories.

G. Section 13753 – Computer Consoles and Accessories.

H. Section 13759 – Modifications to Existing Panels and MCC’s.

I. Division 16 – Electrical.

1.03 REFERENCE SPECIFICATIONS, CODES AND STANDARDS

A. ISA Standards and Practices for Instrumentation - Current Edition.

1.04 DEFINITIONS

A. The instrumentation and control (I&C) integrator shall be a single firm, under direct contract and direction of the CONTRACTOR. The

I&C INTEGRATOR shall assume complete responsibility for the engineering, furnishing, technical advice on, certification as to correctness of installation, final connections to, adjusting, documenting, testing and start-up of the process instrumentation and control system(s) shown on the Drawings and specified herein. The I&C INTEGRATOR may have the electrical subcontractor make final connections of the I&C system(s), but the I&C INTEGRATOR shall be fully responsible for these connections.

B. CONTRACTOR, as distinct from the I&C INTEGRATOR, shall provide all additional materials and labor necessary to supplement the materials and labor provided by the I&C INTEGRATOR as necessary to satisfy the requirements of this project.

C. System acceptance shall be defined as the point in time when:

1. All submittals and documentation have been submitted, reviewed and accepted.

2. The complete system of instrumentation and controls has successfully completed all testing requirements specified herein.

3. All OWNER's staff personnel training has been completed.

1.05 SYSTEM INSTALLATION RESPONSIBILITY

A. The CONTRACTOR shall be ultimately responsible for the complete and proper installation of the process instrumentation and control system. The CONTRACTOR shall either include installation within the scope of the I&C INTEGRATOR's contract or shall provide for the installation by an experienced I&C system installer, acceptable to ENGINEER.

1.06 SUBMITTALS

A. Submittals shall be in accordance with Section 01300 - Submittals.

B. Catalog information, descriptive literature, wiring diagrams, and shop drawings on all controllers, recorders, indicators, transmitters, primary elements, flow measuring equipment and appurtenances, gauges, and all other components of the system shall be provided.

C. Individual data (or specification) sheets shall be provided for all components provided under this section. The purpose of these data sheets is to supplement the generalized catalog information provided by citing all specific features for each specific component (e.g.: scale range, materials of construction, special options included, etc.). Each component data sheet shall bear the component name and instrument tag number designation shown on the Drawings and Specifications.

D. Catalog information on all electrical devices furnished under this section.

E. Shop Drawings and catalog material for all control panels and enclosures.

F. Panel elementary diagrams of prewired panels. Diagrams shall be similar to those diagrams shown on the Drawings, but with the addition of all switched analog signals and all auxiliary devices such as relays, alarms, fuses, lights, fans, heaters, etc. Drawings shall include all terminal numbers.

G. Plumbing diagrams of preplumbed panels and interconnecting plumbing diagrams.

H. Interconnecting wiring diagrams, showing all component and panel terminal board identification numbers and external wire numbers. This diagram shall include all intermediate terminations between field elements and panels (e.g., terminal junction boxes, motor control centers, etc.). This diagram shall be coordinated with the Electrical Subcontractor and shall bear his mark showing that this has been done. Diagrams, device designations, and symbols shall be in accordance with NEMA ICA 1-101.

I. A tabulation of steady state air consumption of each pneumatic instrument (as applicable).

J. Loop diagrams, which shall consist of an individual wiring and/or plumbing diagram for each analog loop showing all terminal numbers, the location of the dc power supply, the location of any booster relays or common dropping resistors, etc. The loop diagrams shall meet the minimum requirements of ISA S5.4 plus the following requirements: each loop diagram shall be divided into three areas for identification of element locations: panel face, back-of-panel, and field, respectively. On each diagram present a tabular summary of: (a) the output capability of the transmitting instruments, (b) the input impedance of each receiving instrument, ©) an estimate of the loop wiring impedance based on the wire sizes and lengths shown, (d) the total loop impedance, and (e) reserve output capacity. Loop diagrams shall be on individual 8-1/2-inch by 11-inch or 11-inch by 17-inch Drawings.

K. Systems testing, calibration and adjustment procedures along with the proposed calibration, adjustment and check-out forms for this project.

L. Operation and maintenance manual including operating and maintenance information and specifications for all components specified under this Section. Submitted literature shall be of sufficient detail so as to facilitate the operation, removal, installation, adjustment, calibration and maintenance of each component specified in this Section. O&M Manuals shall include internal wiring diagrams for all panels. Wiring diagrams shall show all terminal block number designations and wire numbers.

Operation and Maintenance Manual shall also include the following:

1. Detailed descriptive control strategies and start/stop sequences in narrative English.

2. Description of equipment protection, interlocks and alarm settings.

3. Detailed descriptive instructions for clearing and resetting alarm functions.

4. Details descriptions of normal, bypass and emergency operation procedures.

5. Final instrumentation technician field settings.

6. Final drawings in Autocad format.

M. The I&C INTEGRATOR shall submit one set of as-built Drawings in Autocad format of all process and instrumentation diagrams. P&ID's shall be same format as in Contract Documents.

N. All test results, system calibration and adjustment settings shall be submitted to ENGINEER for review prior to the introduction of current to the system of individual components.

1.07 QUALITY ASSURANCE

A. The CONTRACTOR's attention is directed to the fact that the instrumentation and control functions result in an integrated system. Therefore, it is the intention of this specification that all controls and instruments including panel assemblies, will be provided, furnished, assembled and shipped, along with installation supervision, inspection and start-up by one Instrumentation integrator which has a minimum of five (5) years of experience on installations of similar complexity even though individual control and instrumentation components may be the standard products of separate manufacturing companies.

B. Since many control items and instrumentation devices involve the assembly and interlocking functions of many individual parts, solenoids, pressure switches, timing relays, relays, switches, push buttons, contacts, dials, charts, clocks, pens, etc., the functional system descriptions contained herein are given to allow the Instrumentation Subcontractor to choose the proper components and to assemble them so as to provide a rugged, low maintenance, easy cleaning, reliable mechanism suitable for the temperature, salt spray and humidity conditions of the South Florida coastal area and which will perform the described function(s).

C. All of the equipment furnished by the Instrumentation integrator shall be the latest and proven design. Specifications and Drawings call attention to certain features, but do not purport to cover all details entering into the design of the instrumentation system. The completed system shall be compatible with the functions required and the equipment furnished by the CONTRACTOR.

1.08 SEQUENCING AND SCHEDULING

A. Every effort shall be made to minimize interference with the OWNER's existing plant operation. Should any shutdown, total or partial, be required, it shall be scheduled and coordinated with the OWNER and his approval must be obtained prior to the shutdown.

B. The I&C INTEGRATOR shall obtain from the CONTRACTOR the required information on those primary elements, valves, valve actuators and other control equipment or devices that are required to be interfaced with, but are not provided within the context of this section.

C. The I&C INTEGRATOR shall coordinate his work with the CONTRACTOR to ensure that all components provided under this section are properly installed; the proper type, size and number of control wires and conduits are provided and installed; the proper type, size and number of pneumatic tubes with their conduits are provided and installed and proper electrical circuits are provided for all components and systems.

1.09 DELIVERY, STORAGE AND HANDLING

A. Proper shipping, storage and handling procedures shall be followed as recommended by the equipment MANUFACTURER and as specified herein.

B. All parts shall be properly protected so that no damage or deterioration will occur during shipment, normal unloading, storage and installation.

C. All equipment and parts must be properly protected against any damage during a prolonged storage period at the site. Proper job site storage is the responsibility of the CONTRACTOR.

D. Factory assembled parts and components shall not be dismantled for shipment unless permission is received in writing from the ENGINEER. This provision shall not apply if the items are too large to be shipped in a completely assembled condition.

E. Finished iron or steel surfaces not painted shall be properly protected to prevent rust and corrosion.

F. Each box or package shall be properly marked to show its net weight in addition to its contents.

1.10 WARRANTY

A. The manufacturer, I&C INTEGRATOR, and CONTRACTOR shall warrant the equipment being supplied to the OWNER against all defects in workmanship and materials for a period of two (2) year(s). Warranty period shall commence on Substantial Completion date as outlined in the GENERAL CONDITIONS. Warranties for all equipment installed under this contract shall run concurrently.

B. The MANUFACTURER's warranty period shall run concurrently with the CONTRACTOR's warranty period. No exception to this provision shall be allowed. The CONTRACTOR shall be responsible for proper storage of the equipment so as to remain in an "as shipped" condition. If the equipment remains in storage at the job site for longer than six (6) months, before installation, the CONTRACTOR may be required to provide factory service personnel for a complete inspection of the equipment. Any work necessary to restore the equipment to an "as shipped" condition will be the responsibility of the CONTRACTOR.

1.11 TEST PROCEDURE DEVELOPMENT AND DOCUMENTATION

A. I&C INTEGRATOR shall prepare and submit to the ENGINEER for review, a detailed description of the test procedures that he proposed to perform to demonstrate conformance of the complete system of instrumentation and controls to this Specification.

B. It is recommended that the I&C INTEGRATOR develop the test procedures in two steps by first submitting general descriptions and outlines of the tests and then, upon receipt of approval, submit the required detailed procedures and forms.

C. Operational Acceptance Tests

1. The I&C INTEGRATOR shall prepare check-off sheet(s) for each loop and an instrument calibration sheet for each active I & C element (except simple hand switches, lights, etc.). These check-off and data sheets shall form the basis for these operational tests and this documentation.

2. Each loop check-off sheet shall cite the following information and shall provide spaces for sign-off on individual items and on the completed loop by the I&C INTEGRATOR:

   a. Project name;
   b. Loop number;
   c. For each element: Tag number, description, manufacturer and model number, installation bulletin, and Specification sheet number;
   d. Loop description;
   e. Installation check;
   f. Termination check;
   g. Calibration check;
   h. Adjustment check;
   i. Space for comments;
   j. Space for loop sign-off by I&C INTEGRATOR and date.

3. Each instrument calibration sheet shall provide the following information and a space for sign-off on individual items and on the completed unit by the I&C INTEGRATOR:

   a. Project name;
   b. Loop number;
   c. Tag number;
   d. Manufacturer;
   e. Model number;
   f. Serial number;
   g. Calibration range;
   h. Calibration data: Input, output, and error at 10 percent, 50 percent and 90 percent of span;
   i. Switch setting, contact action, and dead band for discrete elements;
   j. Space for comments;
   k. Space for sign-off by I&C INTEGRATOR and date.

D. Functional Acceptance Tests

The I&C INTEGRATOR shall prepare two types of test forms as follows:

1. For those functions that can be demonstrated on a loop-by-loop basis, the form shall include:

   a. Project name;
   b. Loop number;
   c. Loop description;
   d. Test procedure description;
   e. For each component: Tag number, description, manufacturer, and data sheet number;
   f. Space for sign-off and date by both I&C INTEGRATOR and ENGINEER.

2. For those functions that cannot be demonstrated on a loop-by-loop basis, the test form shall be a listing of the specific tests to be conducted. With each test description the following information shall be included:

   a. Spec page and paragraph of function demonstrated;
   b. Description of function;
   c. Space for sign-off and date by both I&C INTEGRATOR and ENGINEER.

PART 2 PRODUCTS

2.01 GENERAL

A. The process instrumentation and control system shall provide all of the functions as described herein Section 13725 for each loop and as shown by the electrical and P & ID Drawings. Major equipment items are specified for each loop. However, it shall be the responsibility of the I&C INTEGRATOR to provide all items of equipment, whether indicated or not, that are necessary to effect the required loop performance.

B. Display and control loops are shown on the Drawings.

C. Control panel(s) shall be provided with a U.L. label and be manufactured by a U.L. 508A panel manufacturer. Panel manufacturer shall submit proof of current enrollment in U.L.’s custom builder’s program.

D. Process instrumentation and controls systems subcontractor shall be one of the following:

1. C. C. Control Corporation
   1235 Parklane South
   Jupiter, FL 33458
   561/748-3737

2. Revere Control Systems, Inc.
   2240 Rocky Ridge Road
   Birmingham, AL 35216
   615/604-1579

3. Or equal.

2.02 L8 LEVEL SWITCH, FLOAT TYPE WITH INTEGRAL SWITCH

A. Direct-acting float type consisting of a mercury switch enclosed in a float and connected to a two-conductor, combination support and signal cable. The entire assembly shall form a completely watertight and impact-resistant unit. Floats shall be of chemical-resistant polypropylene material or other corrosion-resistant material. Cable shall be rugged and flexible with heavy neoprene or PVC jacket. The actuation/deactuation differential shall not exceed 1-inch. The mercury switch shall be rated at 5 amps at 120 VAC. Units shall be pipe mounted or suspended type as noted and provided with 30 feet of cable unless otherwise noted. Each pipe mounted type shall be provided with a clamp to secure the cable to its support pipe, 2 feet of stainless steel support pipe and stainless steel pipe mounting clamps.

B. Each suspended type shall be provided with necessary brackets and clamps to suspend the unit from the top of a tank or vessel. The suspended type shall include an integral or attached weight assembly for stabilization and positive operation of the unit. All mounting clamps shall be PVC or Neoprene.

C. Units shall be Anchor Scientific, Type S, or equal.

2.03 L8E LEVEL SWITCH, FLOAT TYPE WITH INTEGRAL SWITCH (NON-MERCURY)

A. Direct-acting float type consisting of a mercury free switch enclosed in a float and connected to a two-conductor, combination support and signal cable. The entire assembly shall form a completely watertight and impact-resistant unit. Floats shall be of chemical-resistant polypropylene material or other corrosion-resistant material. Cable shall be rugged and flexible with heavy neoprene or PVC jacket. The actuation/deactuation differential shall not exceed 1-inch. The switch shall be rated at 5 amps at 120 VAC. Units shall be pipe mounted or suspended type as noted and provided with 30 feet of cable unless otherwise noted. Each pipe mounted type shall be provided with a clamp to secure the cable to its support pipe, 2 feet of stainless steel support pipe and stainless steel pipe mounting clamps.

B. Each suspended type shall be provided with necessary brackets and clamps to suspend the unit from the top of a tank or vessel. The suspended type shall include an integral or attached weight assembly for stabilization and positive operation of the unit. All mounting clamps shall be PVC or Neoprene.

C. Units shall be Eco Float Model G as manufactured by Anchor Scientific, or equal.

2.04 L10 LEVEL TRANSMITTER

A. The 2-wire smart RF Admittance/Capacitance continuous level transmitter shall produce a HART compatible output of 4-20 mA that is proportional to level. It shall be capable of making the measurement independent of changes in material density and not be

affected by the presence of material clinging to the sensing element, a feature called Cote-Shield™. The measurement shall be free from the effects of changes in temperature, density, foam or acoustic noise in the vapor space above the level. System configuration and calibration can be accomplished from a PC based software with a HART Communication modem connected anywhere in the 2-wire loop. Configuration may be entered in user's choice of engineering units and system calibration can be accomplished by entering any two known level points, not necessarily empty and full. The output shall be compatible with the HART Protocol specification revision 5 or later.

B. The electronic unit shall be equipped with a built-in keypad and display module for ease of configuration and troubleshooting. The electronic unit shall be capable of operating in harsh environments with temperature ranges from -40°F to 167°F (-40°C to 75°C) and be protected from corrosion with a NEMA 4X rated housing. The system shall have the most versatile probe selection in the industry (over 125 standard probes) with varying process temperature and pressure (up to 537°C/1000°F and 690 Bar/10,000 PSI).

C. The electronic unit shall be a single device capable of use over a wide range of level applications by having an auto-ranging capacitance of 1 to 45,000 pF (PRO model) or 20 to 7,000 pF (LITE model). The electronic unit shall have provision for field changeable damping time and phasing (PRO model) in the event the measurement requires such changes to optimize the system performance. The output signal shall be free from effects of Radio Frequency Interference (RFI) when plant radios (walkie-talkies) are in the vicinity of the level transmitter. Further, the system shall be free from harmful effects of static electricity on the sensing element with discharges up to 4,000V being tolerated without damage.

D. Stainless Steel mounting bracket shall be provided by instrument manufacturer, as shown on drawings.

E. Unit shall be Drexelbrook Model Universal IV or equal.

2.05 L16 RADAR LEVEL SENSOR W/REMOTE DISPLAY

A. VEGAPULS 61, Radar Sensor for continuous level measurement of liquids. Part Number: PSWL61.XXBX6HKBX.

B. VEGADIS 82, External Loop Powered Display and Adjustment unit. Part Number: DIS82.IXHKINACK.

C. Wet well mounting bracket for radar sensor shall be type 316 stainless steel.

D. External display unit shall be mounted within existing pump control panel or RTU panel.

2.06 L20 ULTRASONIC LEVEL TRANSDUCER

A. Features shall minimally include:

1. Continuous Level Measurement.

2. Displays: High-contrast 4 digit, 18 mm LCDs, 5 LEDs.

3. Resolution: The greater of ±0.1% of range or 2mm.

4. Accuracy: to ±0.25% of range.

5. Rate Limit: Programmable from 0 to 9999 units/min.

6. Measurement Range: 0.3 to 10m (33 ft) using ST-H transducer.

7. Blanking: From .3m (1 ft).

8. Range Extension: Adjustable as a % of span.

9. Temperature Range: Electronics -20˚C to 50˚C (-4˚F to 122˚F); process temperature limits: -40˚ to 73˚C (-40˚ to 163˚F).

10. Power Supply: 100/115/200/230 Vac ±15% stab selectable (50/60 Hz, 15 VA max).

11. Packaging: Standard Unit - Polycarbonate CSA type 4/NEMA 4, IP65 rated enclosure; 160 x 240 x 82mm (6.3 x 9.5 x 3.2 in).

12. Access Programmer: ABS enclosure with polycarbonate membrane keypad, 102 x 66 x 25 mm (4 x 2.6 x 1 in.) Ultralife lithium power cell.

13. Output: 4-20 mADC, 2 wire, 24 VDC.

B. Unit shall be Siemens/Milltronics Hydroranger.

2.07 L25 ULTRASONIC LEVEL SYSTEM

A. Two-channel continuous level transmitter employing ultrasonic level measuring principle. It shall control (2) analog and digital output signals proportional to level, differential level, distance, volume or flow rate.

B. The level measuring system shall have maximum range of at least 30 ft. (9.1 m) on liquid applications with a near zone of 12 inches (305 mm). The accuracy shall be 0.15% of sensor range with a resolution of no less than 1/8th inch (3 mm).

C. 115 VAC, 60-Hz.

D. The output signals shall be (2) active 4-20 mA into a maximum 1000 ohms loop resistance, or digital outputs.

E. System shall have six (6) SPDT relays rated to 5A at 250 VAC. Each relay will be operated by a software assignable set point with a 0-100% adjustable dead band for open and close. Each relay will be assignable for control or alarm. There shall be an acknowledge push-button on the front panel for acknowledging alarm set points. All set points and relays can be assigned to either of the two input channels in any combination. Relays can be assigned for fault conditions of 3.7 mA or 22 mA error signals. Relays may be assigned for Batch Sample Activation with a programmable momentary dry contact closure

duration. Each relay will have a visible indication on the display denoting the relay state; configured or un-configured, energized or de-energized.

F. The 2-channel electronic transmitter shall be housed in a rugged Fiberglass Reinforced Polyester (FRP) indicating housing rated to NEMA 4X (IP-66) for corrosion resistance and wash down service.

G. The sensor(s) shall be completely encapsulated in a CPVC housing rated to NEMA 4X, NEMA 6/6P, IP-68, with a 25 ft. sealed flying lead. The sensor shall be capable of full submersion.

H. The sensor(s) shall be supplied with a 25-foot flying lead allowing field termination and sensor lead extension via a standard 2-wire twisted shielded pair. The sensor(s) shall be capable of being remotely mounted up to 1200 feet from the transmitter. The sensor(s) shall be supplied with a 3/4" and 2" NPT or 2" BSP process connection and be capable of being recessed in a 2 inch diameter nozzle up to 18 inches (0.45 m), which shall permit the system to measure level, volume or distance to the top of the vessel.

I. The recommended operating temperature range for the sensor shall be from -40 F to 158 F . The electronic unit shall be capable of ambient temperature ranges of —40 F to 158 F. An internal temperature sensor shall provide temperature compensation for variations in the speed of sound due to temperature changes and shall be automatic over the entire operating range of the system.

J. The electronic unit shall employ a nominal 50KHz operating frequency with a 10° acoustic beam angle (+/- 5° from transducer centerline).

K. System configuration shall be accomplished through a standard integral display with a 4-key, environmentally sealed membrane keypad and a 2-line, 7-digit, LCD display for level, distance, volume, flow, totalization, temperature or milliamp output. The user may select any (or all) display parameters (level, distance, flow, etc.) and toggle to each or configure to continuously scroll through all display selections. Echo strength will be displayed concurrent with displayed level data. The system shall be capable of displaying level data in the following engineering units: feet, inches, meters, centimeters, millimeters, gallons per minute, cubic meters per hour, or percent. The configuration menu shall be password protected to prevent unauthorized changes.

L. System software will support level, distance, volume and open channel flow rates for the following flumes and weirs: Parshall flumes, Rectangular weirs (with and without end contractions, Trapezoidal (Cippoletti) weirs, Trapezoidal flumes, V-Notch weirs, Leopold-Lagco flumes, PalmerBowlus flumes, Compound weirs, "H" flumes. A 21-point strapping table is included for user-defined vessels, weirs and flumes. The system shall incorporate two (2) totalizers, one (1) nonresettable and one (1) user resettable. The 2-channel system will also support differential level in a channel #1 vs. channel #2 scheme for standard applications such as traveling bar screen or submerged flow calculations and display.

M. Each system shall be supplied with SmartGainTM - a patented technique of automatically ignoring interfering signal reflections from non-level echoes and internal vessel obstructions, such as ladders, agitator blades and pipes, without user intervention. The system shall be capable of being configured with or without level being present in the vessel.

N. The system shall also be capable of making a measurement in a pipe up to a 30 ft. range. The pipe can be the same length as the measurement range or shorter than the measurement range and the pipe can be as small as 2" diameter.

O. The level measuring system shall be suitable for sensor installations in Class I, Div. 1 or Zone 0, or Zone 1 hazardous areas. The electronic enclosure will be suitable for Class I, Div. 2 (Zone 2) installations.

P. The manufacturer shall have 24 hours 7 days per week worldwide technical support and start up assistance capabilities.

Q. The continuous ultrasonic level system shall be of the following model: AMETEK Drexelbrook USonic-R™ Series Ultrasonic Level System, or equal.

R. Mounting brackets shall be provided by instrument manufacturer as shown on drawings.

2.08 M7 MISCELLANEOUS ELECTRICAL

A. Circuit Breakers
   1. For motor short circuit and overcurrent protection, circuit breaker shall be Square D with poles, voltage, rating and AIC as indicated on the drawings. Units shall interrupt the maximum prospective fault current available.
   2. For control circuits, units shall be Square D with poles, voltage and ratings as indicated on the drawings. Units shall interrupt the maximum prospective fault current available.

B. Fuses
   1. Bussman 600 volt, dual element type.

C. Control Relays
   1. Control relays shall be programmable.
   2. Omron, IDEC or equal.

D. Indicator Lights
   1. Square-D trans type 6 volt, Class 9001, Type K, push to test, or equal.
   2. Lens color shall be as noted.
   3. Single or dual indicator lights shall be as noted herein.
   4. Provide finger-safe contact blocks.

E. Selector Switches.
   1. Square-D, Class 9001, Type K, or equal.
   2. Operators shall be black knob type or key switch, 3-position or 2-position, as noted.
   3. Selector switches shall be spring return where noted.
   3. Provide finger safe contact blocks.

F. Pushbuttons.
   1. Square-D Class 9001, Type K, pushbutton, or equal.
   2. Provide finger safe contact blocks.
   3. Non-illuminated pushbuttons shall be black.

G. Elapsed Time Meter
   1. Hour meter, non-reset type, Cramer 635K, or equal.

H. Ground Fault Duplex Receptacle
   1. Leviton Duplex Receptacle or equal.
   2. AC receptacle box shall be Steel City 58351-1/2 or equal.
   3. Covers shall be Steel City 58-C-5, or equal.

I. Motor Starter
   1. Square D 8536 motor starters with NEMA rated contactors, minimum size 1 or as indicated on drawings. Provide overload blocks with overloads as required.
   2. Provide auxiliary contacts as required.
   3. Reset buttons Square D 9066-RA1, or equal.

J. Duplex Alternating Relay
   1. Diversified Electronics, ARA-120-ADA, Duplex Alternator or equal.

K. Phase Monitor
   1. Diversified or equal with auto reset.

L. Surge and Lightning Arrestors
   1. All control panels shall be provided with surge and lightning arrestors as specified.
   2. Power
      a. Surge arrestor shall be GE Tranquell, 9L18BBB301
   3. Lightning Surge Suppressor
      a. Lightning surge suppressors shall be Easton/IT Protector, model and series number to be determined by control panel manufacturer.
   4. Signal
      a. Panel surge arrestors (PSA) shall be Edco PC 642C Series, 2 channel or equal.
      b. Field surge arrestors (FSA) shall be Edco SS64 Series, pipe style or equal.
   5. Discrete signals
      a. Provide surge arrestor for discrete I/O.
      b. Surge arrestors shall be provided regardless of drawing indication.

M. Generator Receptacles
   1. Crouse Hinds AR20412-S22, 4 pole, 3 wire with ground, 200A, 600V reverse service with back box, for use on 480V systems.
   2. Russel Stol JRS 1044FR, 4 pole, 4 wire, with ground, 100 amp, 600V, reverse service for use on 240V systems.
   3. Angle Adaptor selected by amperage rating shall be provided for all generator receptacles.
   4. Coordinate with OWNER for exact model number before ordering. Match Owner=s standards.

N. LED Lamp
   1. Phoenix Contact, or equal.

O. High level alarm light
   1. Red, 120v, MAJOR, CVP1OR, or equal.
   2. Alarm light guard, Major, VGD-1, or equal.

P. Flasher
   1. 90 FPM, 120v.
   2. SSAC, FS127, or equal.

Q. Alarm Horn
   1. 120v, 103 dB.
   B. Faraday, or equal.

R. Ground Lug
   1. #1/0 Wire Ilsco AU-O, or equal.

S. Intrinsically Safe Relay (Barrier Relay)
   1. Barrier relays shall be SAF-PAK as manufactured by GEMS Sensors, for use in hazardous areas, with intrinsically safe-sensing circuit. Units shall be UL approved for use in Class I, Division 2, environments.

T. Time Delay Relays
   1. Time delay relays shall be programmable with adjustable ranges, DIP switch settable.
   2. Omron or equal.

U. Pump Cycle Counter
   1. 120V, electromechanical counter with reset button.
   2. Four digit display min.
   3. Redington Model P2 - 4904, or equal.

V. Ground Fault Monitor
   1. Bender GF monitor relay with SPDT output, 120 VAC, adjustable pickup, adjustable time delay separate CT, Model RCM460 Y Series, or equal.

W. Current Transmitter
   1. AT Series Current Transducer Model No.: AT2-420-24L-FR, as manufactured by NK Technologies.

X. Surge Protection Device (SPD
   1. Eaton Innovate Technology, EXQ080-3Y201.

Y. Operator Control Stations

   1. Allen-Bradley 30 mm, 800T Series, or equal, die cast aluminum, type 4 enclosure for surface mounting with:

      a. One (1) On/Off 800T selector switch

      b. One (1) 800T indicator lamp as scheduled herein.

Z. Audio/Visual Alarm

1. Audible/visual alarm kit with NEMA 4X box with 110 decibel horn, 40 watt flasher and red lens.

2. Audible/visual alarm shall be INGRAM AS115CLX40FS, or equal.

2.09 P4 PRESSURE GAUGE

A. Units shall be bellows or Bourdon tube actuated pressure gauges. Gauges shall be stem mounted with 4-1/2-inch dial size, unless otherwise noted. Casing material shall be black phenol with threaded polypropylene ring. Scale range shall be as noted and accuracy shall be plus or minus ½ percent of span.

B. The sensing element material shall be phosphor-bronze, unless otherwise noted.

C. Provide diaphragm seals as specified herein for all gauges in contact with fluids other than potable water.

D. Units with ranges below 10 psi shall be bellows actuated and shall be Ashcroft "General Service Series 1180", or equal.

E. Units with ranges above 10 psi shall be Bourdon tube actuated and shall be Ashcroft "Duraguage Type 1279", or equal.

2.10 P6 PRESSURE SEAL, DIAPHRAGM

A. Units shall consist of corrosion-resistant lower housing and diaphragm and instrument mounting upper housing. Lower housing shall have NPT female process and flushing connections and shall be 316 stainless steel, unless other noted. Diaphragm shall be 316 stainless steel unless otherwise noted. Upper housing shall have bleed screw NPT female instrument connection. Filling fluid shall be as noted.

B. Where noted, capillary assembly shall be furnished to connect diaphragm seal to instrument with length as noted.

C. Wherever practical, pressure seal shall be factory filled and assembled to primary element (i.e., pressure switch, pressure transmitter, ...).

D. Units shall be Ashcrost Type 101, or equal.

2.11 P7, PRESSURE SENSOR

A. Materials of construction:

1. Stainless Steel Body.

2. Stainless Steel 150 lb. Flanges.

3. Sleeve shall be Teflon coated Buna-N.

4. Fill fluid shall be Ethylene Glycol and water (200°F max).

B. Pressure sensor shall be Red Valve Series 48 or equal.

2.12 P9 ELECTRONIC PRESSURE INDICATING/TRANSMITTER (GAUGE)

A. Instrument shall be a field-mounted pressure transmitter for measuring gauge pressure and transmitting a liner 4 to 20 mA dc output for use in a standard 24 vdc supply voltage system.

B. The instrument range shall be fully adjustable throughout the span limit. Accuracy shall be ± 0.1% of Span.

C. All process-wetted parts of the instrument shall be Type 316 stainless steel. The transmitter shall be protected by a gasketed, weatherproof NEMA 4X enclosure. The transmitter shall be approved for use in hazardous locations (nonincendive for Class I and Class II, Division 2 locations; intrinsically safe or explosion proof for Class I and Class II, Division 1 locations). Housing finish shall be epoxy.

D. Transmitter shall include an integral special scaling analog meter and a stainless steel bleed valve.

E. Transmitter shall have a ½-inch NPT male thread process connection.

F. Transmitter shall be provided with integral mounting bracket and hardware for installation location as shown on Drawings.

G. Transmitter shall be Model 3051 pressure transmitter as manufactured by Rosemount, Inc.

H. When specified herein, the P9 electronic pressure indicating/transmitter (gauge) shall be provided with the specified diaphragm or pressure sensor. The pressure indicating/transmitter shall be factory mounted to the diaphragm or pressure sensor. The completed assembly shall be factory calibrated and tested to the specified instrument range.

2.13 S26 DIGITAL INDICATOR/TOTALIZER

A. Precision Digital Corporation or equal with 4-1/2 digit, 0.56" LED Display. Display ranges shall be as specified herein.

B. Unit shall provide for instantaneous and totalized process parameter readout. Integral front toggle switch shall be provided to select instantaneous or total process parameter readout. An integral front reset switch shall be provided for the total process parameter readout.

C. Unit shall have a designated area on the instrument face for identification of the unit with an engraved laminated plastic nameplate (service legend). Units shall operate on 24V dc power, unless otherwise noted.

2.14 X1 CONTROL POWER TRANSFORMER

A. Square D, Type KF, Class 9070, 50 VA (or minimum as indicated by the drawings); applies to 480 volts control panels.

2.15 Z1 PROXIMITY SWITCH

A. UL Listed, flush or surface mounted contact switch. Contacts shall be hermetically sealed.

B. Rated for 120V, Allen-Bradley 802M, or equal.

2.16 Z2 MAGNETIC PROXIMITY SWITCH

A. UL listed magnet actuated proximity sensor, 120V, 3 amp, limit switch, Square D SG08003, or equal.

B. Sensing magnet shall be Square D 7093, or equal.

2.17 FIELD PANEL CONSTRUCTION (ENCLPS)

A. Field panels shall be UL Listed, modified, NEMA 3R, Type 316 Stainless Steel enclosure with padlockable draw latches or 3-point padlockable handles conforming to the requirements of the National Electrical Manufacturer's Association.

B. In addition to the NEMA 3R standard, the panel shall conform to the following requirements:

1. Minimum metal thickness shall be 14-gauge.

2. All doors shall be rubber-gasketed with continuous hinge.

3. Provide Type 316 stainless steel drip shield.

4. Provide aluminum dead front panel for component mounting as shown on drawings.

5. Cabinet shall be mounted as indicated on the Drawings. Provide mounting ears as required. Field drilling of cabinet is prohibited.

6. Print pocket (full, 2 or 1/4 size) and one (1) set of reduced drawings shall be provided on interior side of door. (This requirement may be deleted where indicated on drawings.)

7. Minimum overall dimensions shall be as indicated by Drawings or as required by UL subject 508A for industrial control panels.

8. Provide door stop kits for outer cabinet door and dead front door.

9. Provide ARC flash label per N.E.C.

10. Where indicated on drawings, provide Lexan glass view window.

11. Where indicated on drawings, provide 316 SST sunshields and standoffs.

C. Cabinet enclosure shall be as manufactured by Hoffman, Wiegman, or equal.

2.18 FIELD PANEL CONSTRUCTION (ENCL 1- WALL MOUNT SST)

A. Field panels shall be UL Listed, modified, NEMA 3R, Type 316 Stainless Steel enclosure with padlockable draw latches or 3-point padlockable handles conforming to the requirements of the National Electrical Manufacturer's Association.

B. In addition to the NEMA 3R standard, the panel shall conform to the following requirements:

1. Minimum metal thickness shall be 14-gauge.

2. All doors shall be rubber-gasketed with continuous hinge.

3. Provide Type 316 stainless steel drip shield.

4. Provide aluminum dead front panel for component mounting as shown on drawings.

5. Cabinet shall be mounted as indicated on the Drawings. Provide mounting ears as required. Field drilling of cabinet is prohibited.

6. Print pocket (full, ½ or 1/4 size) and one (1) set of reduced drawings shall be provided on interior side of door. (This requirement may be deleted where indicated on drawings.)

7. Minimum overall dimensions shall be as indicated by Drawings or as required by UL subject 508A for industrial control panels.

8. Provide door stop kits for outer cabinet door and dead front door.

9. Provide ARC flash label per N.E.C.

10. Where indicated on drawings, provide Lexan glass view window.

11. Where indicated on drawings, provide 316 SST sunshields and standoffs.

12. Where indicated on drawings panels shall be designed to permit continuous operation of all components mounted therein with panel ambient temperatures of up to 105 degrees F. Panels shall be provided with louvers and forced ventilation as required to prevent temperature buildup due to electrical devices mounted in or on the panel. Forced ventilation fans shall be provided with washable or replaceable filters. Fan motors shall operate on 120-volt, 60-Hz power.

Provide a filtered fan package and exhaust grill kit. Mount exhaust fan on upper side of panel. Fan shall be capable of 350

CFM (minimum). Fan shall be manufactured by McLean Midwest, or equal.

Fan discharges shall be equipped with Type 304 or 316 stainless steel weather hoods.

Provide a thermostat controlled 120V electric heater to prevent accumulation of moisture within enclosure.

Limit control and ventilation system noise to a maximum of 80 dB at 40 feet from enclosure.

C. Cabinet enclosure shall be as manufactured by Hoffman, Wiegman, or equal.

2.19 FIELD PANEL CONSTRUCTION (ENCL 2 - FREE STANDING)

A. Panel shall be UL Listed, NEMA 12 Steel enclosure with 3-point padlockable handles conforming to the requirements of the National Electrical Manufacturer's Association.

B. Panel shall be constructed with external dimensions as shown on the Drawings. Instrument arrangement shall be as shown with minor modifications as required by the particular equipment furnished. Modifications shall be subject to the approval of the ENGINEER.

C. Fabricate each panel from sheet steel with one-piece, 10-gauge, steel front and 14-gauge steel sides, back, and top. The panels shall be so constructed that no seams or boltheads are visible when viewed from the front. Panel cutouts for instruments and other devices (e.g., lights and switches) shall be cut, punched, or drilled and smoothly finished with rounded edges.

D. Provide steel angle stiffeners on the back of the panel face to prevent panel deflection under instrument loading or operation. Internally, the panels shall be supplied with a structural steel framework for instrument support purposes and panel bracing. The internal framework shall permit panel lifting without racking or distortion. Provide removable lifting rings designed to facilitate simple, safe rigging and lifting of the panel during installation. Plugs shall be provided and shall unobtrusively fill the panel lifting ring holes when substituted for the lift rings after installation is complete. Where two or more panels are shown mounted immediately adjacent to one another, they shall be securely bolted together with their front faces parallel.

E. Each panel shall be provided with full height, fully gasketed access doors where shown. Doors shall be provided with three-point latches, Southco Type 44; or equal. Latching mechanism shall be keylocking. Front and side access doors shall be as shown. All panel access doors shall be provided with full length, continuous, piano type, steel hinges with stainless steel pins.

F. Provide door stop kits for all panel doors.

G. Freestanding panels shall be provided with switched 100-watt incandescent back-of-panel lights. One light shall be provided for

every 4 feet of panel width and shall be mounted inside and in the top of the back-of-panel area.

H. Freestanding panels shall be provided with a 15-amp, 120-volt, service outlet circuit within the back-of-panel area. The circuit shall be provided with 20-ampere molded case circuit breaker with toggle operator to switch the circuit on and off. Circuit shall be provided with three-wire, 120-volt, 15-ampere, duplex receptacles one for every 4 feet of panel width (two minimum per panel) and spaced evenly along the back-of-panel area.

I. All panels shall be designed to permit continuous operation of all components mounted therein with panel ambient temperatures of up to 105 degrees F. Panels shall be provided with louvers and/or forced ventilation as required to prevent temperature buildup due to electrical devices mounted in or on the panel. Except for panels mounted with their backs directly adjacent to a wall, louvers shall be stamped sheet metal construction. For panels mounted with their backs directly adjacent to a wall, louvers shall be on the sides. Forced ventilation fans, where used, shall be provided with washable or replaceable filters. Fan motors shall operate on 120-volt, 60-Hz power.

J. Provide ARC flash label per N.E.C.

K. Cabinet enclosure shall be as manufactured by Hoffman, Wiegman, or equal.

2.20 FIELD PANEL CONSTRUCTION (ENCL 3 - FREE STANDING SST)

A. Control panel shall be free standing UL Listed, modified, NEMA 3R, Type 304 or 316 stainless steel (see drawings) enclosure with 3-point padlockable handles conforming to the requirements of the National Electrical Manufacturer’s Association.

B. In addition to the NEMA 3R standard, the panel shall conform to the following requirements:

1. Minimum metal thickness shall be 12-gauge.

2. All doors shall be rubber-gasketed with continuous hinge.

3. Provide aluminum dead front and back plate panel for component mounting as shown on Drawings.

4. Print pocket and one (1) set of reduced drawings shall be provided on interior side of one door.

5. Minimum overall dimensions shall be as noted on Drawings or as required by UL Subject 508A for industrial control panels.

6. Provide door stop kits for outer cabinet doors and deadfront doors.

7. Limit control and ventilation system noise to a maximum of 80 dB at 40 feet from enclosure.

8. Where indicated on drawings, provide Type 316 stainless steel sun shields on panel doors, sides, and top.

9. All panels shall be designed to permit continuous operation of all components mounted therein with panel ambient temperatures of up to 105 degrees F. Panels shall be provided with louvers and forced ventilation as required to prevent temperature buildup due to electrical devices mounted in or on the panel. Forced ventilation fans shall be provided with washable or replaceable filters. Fan motors shall operate on 120-volt, 60-Hz power.

   Provide a filtered fan package and exhaust grill kit. Mount exhaust fan on upper side of panel. Fan shall be capable of 350 CFM (minimum). Fan shall be manufactured by McLean Midwest, or equal.

   Fan discharges shall be equipped with Type 304 or 316 stainless steel weather hoods.

   Provide a thermostat controlled 120V electric heater to prevent accumulation of moisture within enclosure.

10. Cabinet shall be mounted as indicated on the Drawings. Provide mounting tabs as required. Field drilling of cabinet is prohibited.

11. Cabinet enclosure shall be designed to withstand pressures in accordance with ASCE 7- (current edition) per Florida Building Code Section 1609. (Criteria shall be as noted on Drawings.) Panel manufacturer shall provide stiffeners and mounting angles as required.

12. Interior and exterior coating of cabinet and cabinet accessories (hoods, etc.) shall be as noted on drawings.

13. Provide ARC flash label per N.E.C.

C. Cabinet enclosure shall be as manufactured by Hoffman, Wiegman, or equal.

2.21 PANEL ELECTRICAL

A. Wiring

1. All electrical wiring shall be in accordance with the applicable requirements of Division 16 - Electrical. Wires shall be 600-volt class, PVC insulated stranded copper and shall be of the sizes required for the current to be carried, but not below 14 AWG enclosed in either sheet metal raceway or plastic wiring duct. Wiring for signal circuits shall be twisted shielded pairs not smaller than No. 16 AWG, and be separated at least 6 inches from any power wiring.

2. All panel wiring shall be labeled with T&B Shrink-Kon HVM marker system.

B. Terminal Blocks

1. Terminal blocks shall be one-piece molded plastic blocks with screw type terminals and barriers rated for 300 volts. Terminals shall be double sided. Terminals shall have permanent, legible identification.

2. Wires shall be terminated at the terminal blocks. Lugs shall be of the appropriate size for the terminal block screws and for the number and size of the wires terminated.

3. Terminals shall be Allen Bradley 1492 series, or equal.

4. Allow 20% extra terminals for spares.

C. Power Supplies

1. Provide dc power supplies as required to power instruments requiring external dc power.

2. Power supplies shall convert 120V ac, 60-Hz power to dc power of the appropriate voltage(s) with sufficient voltage regulation and ripple control to assure that the instruments being supplied can operate within their required tolerances.

3. Output overvoltage and overcurrent protective devices shall be provided with the power supply to protect the instruments from damage due to power supply failure and to protect the power supply from damage due to external failure. Provide NEMA 1 enclosure for all power supplies. Power supplies shall be mounted such that dissipated heat does not adversely affect other components.

D. Wire Ducts

1. Wire duct shall be Panduit, or equal.

E. Miscellaneous Features

1. Provide LED courtesy light, convenience outlet, lightning arrestor, surge arrestor, loop power supplies (with surge protection specified herein), circuit breakers and power supply.

2. Items required shall be as indicated on the drawings.

2.22 NAMEPLATES, NAME TAGS AND SERVICE LEGENDS

A. All components provided under this section, both field and panel mounted, shall be provided with permanently mounted name tags bearing the entire ISA tag number of the components. Panel mounted tags shall be plastic; field mounted tags shall be stamped stainless steel.

B. Circuit breakers and all dead front panel items shall be clearly labeled by name, not tag number. Nameplates are defined as inscribed laminated plastic plates mounted under or near a panel face mounted instrument. Service legends are defined as inscribed laminated plastic integrally mounted on a panel face mounted instrument.

C. Service legends and nameplates shall be engraved, rigid, laminated plastic. Service legends and nameplates shall be fastened to the panel by screws or with a specially applied adhesive. Fastening shall not depend only on the adhesive backing of the nameplate. Unless otherwise noted, color shall be black with white letters and letter height shall be 3/16-inch.

D. Field mounted tags shall be 16-gauge, 304 stainless steel with 3/16-inch high characters.

E. Each panel shall be provided with a cabinet face mounted laminated nameplate as specified above. Unless otherwise noted, color shall be black with white letters 2-inch high.

2.23 SPARE PARTS

A. Furnish the manufacturer's recommended spare parts including at least the following:

1.

B. All parts shall be furnished in containers which are clearly marked and identified as to the contents.

C. Provide spare parts bill of materials with submittals for approval.

PART 3 EXECUTION

3.01 GENERAL

A. Install materials and equipment in a workmanlike manner utilizing craftsmen skilled in the particular trade. Provide work which has a neat and finished appearance.

B. Electrical work shall be performed in compliance with these Specifications. Where these Specifications and the Drawings do not delineate precise installation procedures, API RP 550 shall be used as a guide to installation procedures.

C. Coordinate I&C work with the OWNER, the CONTRACTOR and work of other trades to avoid conflicts, errors, delays and unnecessary interference with operation of the existing plant(s) during construction.

3.02 PROTECTION OF EQUIPMENT

A. Throughout this Contract, the Contractor shall provide protection for materials and equipment against loss or damage and from the effects of weather. Prior to installation, store items in indoor, dry locations. Provide heating in storage areas for items subject to corrosion under damp conditions. Specific storage requirements shall be in accordance with the ENGINEER-reviewed I&C INTEGRATOR's recommendations.

3.03 EQUIPMENT INSTALLATION

A. Follow manufacturers' installation instructions explicitly, unless otherwise indicated. Wherever any conflict arises between manufacturers' instructions, and these Contract Documents, follow ENGINEER's decision, at no additional cost to OWNER. Keep copy of manufacturers' instructions on the job site available for review at all times.

3.04 ELECTRIC CONTROL AND SIGNAL WIRING

A. Control and signal wiring external to the control panels and all power wiring shall conform to the requirements of Division 16 - Electrical.

B. Control and signal wiring in control panels shall be restrained by plastic ties or ducts. Hinge wiring shall be secured at each end so that any bending or twisting will be around the longitudinal axis of the wire and the bend area shall be protected with a sleeve.

C. Arrange wiring neatly, cut to proper length and remove surplus wire. Provide abrasion protection for any wire bundles which pass through holes or across edges of sheet metal.

D. Wiring shall not be spliced or tapped except at device terminals or terminal blocks.

E. Panels and panel mounted equipment shall be assembled as far as possible at the I&C INTEGRATOR's plant. No work, other than correction of minor defects or minor transit damage, shall be done on the panels at the job site.

F. I&C INTEGRATOR shall observe and advise on the installation to the extent required to certify in writing that the equipment will perform as required.

3.05 MANUFACTURER'S SERVICES

A. The supervisory services of a factory-trained service engineer who is specifically trained on the type of equipment herein specified shall be provided for a period specified below during construction to assist the CONTRACTOR in the location of sleeves; methods of installing conduits and special cable; mounting, piping and wiring of one of each type of device and the method of protecting all of the equipment prior to placing it into service. Upon completion of the installation, the services of the above service engineer shall be provided for a period specified below for calibration and start-up of the equipment. The minimum days specified below do not relieve the Instrumentation Subcontractor from providing sufficient service to place the system into satisfactory operation.

Event	Duration (Minimum)
Construction/Installation Assistance	Five (5) Eight (8) Hour Man Days
I&C System(s) Startup/Calibration	Five (5) Eight (8) Hour Man Days
OWNER Personnel Instruction	Five (5) Eight (8) Hour Man Days

B. No form of energy shall be turned on to any part of the instrumentation system prior to receipt by the ENGINEER of a certified statement of approval of the installation from the CONTRACTOR containing his supplier's authorization for energizing the system.

C. A factory trained service engineer shall be provided for placing the system into operation. After the system is being operated by the OWNER's personnel, the service engineer shall return for a one-day instruction course in the maintenance and operation of the system.

D. All instrumentation shall be calibrated in the presence of the ENGINEER in accordance with the range and accuracy specified herein. Certified test reports shall be filed with the ENGINEER.

3.06 TESTING

A. All elements of the Instrumentation and Control system shall be tested to demonstrate that the total system satisfies all of the requirements of this specification.

B. All special testing materials and equipment shall be provided by the I&C INTEGRATOR. Where it is not practical to test with real process variables, the I&C INTEGRATOR shall provide suitable means of simulation. These simulation techniques shall be subject to the approval of the ENGINEER.

C. The I&C INTEGRATOR shall coordinate all of his testing with the CONTRACTOR and all other associated subcontractors.

D. As a minimum, the testing shall include the following:

1. Factory Tests

    a. All analog panels and panel assemblies shall be tested for proper operation at the I&C INTEGRATOR's factory prior to the shipment of any system element to the site. Results of the factory tests shall be recorded and submitted for approval before shipment of any panel or panel assembly to the project site.

2. Operational Acceptance Tests

    a. The objective of these tests is to demonstrate that the system of Process Instrumentation and Control is READY for final operation.

b. The I & C System shall be checked for proper installation, adjusted, and calibrated on a loop-by-loop basis to verify that it is ready to function as specified.

c. All system elements shall be checked to verify that they have been installed properly and that all terminations have been made correctly.

d. All discrete elements and systems shall have their set points adjusted and shall be checked for proper operation (e.g., interlock functions, contact closure on rising/falling P.V., etc.).

e. All continuous elements and systems shall have three-point calibrations performed. All controller tuning constants shall be adjusted to preliminary settings.

f. The OPERATIONAL ACCEPTANCE TESTS shall be completed prior to starting the FUNCTIONAL ACCEPTANCE TESTS. The actual testing program shall be conducted in accordance with prior approved procedures and shall be documented as required hereinafter.

3. Functional Acceptance Tests

a. The objective of these tests is to demonstrate that the system of Instrumentation and Controls is operating and complying with the specified performance requirements.

b. A witnessed, FUNCTIONAL ACCEPTANCE TEST shall be performed on the complete system of Instrumentation and Controls. Each function shall be demonstrated to the satisfaction of the ENGINEER on a loop-by-loop and/or paragraph-by-paragraph basis.

c. Each test shall be witnessed and signed off by both the I&C INTEGRATOR and the ENGINEER upon satisfactory completion.

d. The actual testing program shall be conducted in accordance with prior approved procedures and shall be documented as required hereinafter.

e. The I&C INTEGRATOR shall notify the ENGINEER at least 2 weeks prior to the date of the FUNCTIONAL ACCEPTANCE TEST.

3.07 CLEAN-UP

A. Keep the premises free from accumulation of waste material or rubbish. Upon completion of work, remove materials, scraps, and debris from premises and from interior and exterior of all devices and equipment. Touch-up scratches, scrapes, or chips in interior and exterior surfaces of devices and equipment with finishes matching as nearly as possible the type, color, consistency and type of surface of the original finish.

PART 4 LOOP SPECIFICATIONS

4.01 LOOP SPECIFICATIONS

A. Control loop requirements shall be as specified in Section 13725 - Loop functions/Programming Strategies/Protocols and as shown by the Drawings.

END OF SECTION

SECTION 13710

PROGRAMMABLE LOGIC CONTROLLER

PART 1 GENERAL

1.01 WORK INCLUDED

A. Furnish, install, program, and document the Programmable Logic Control (PLC) system(s) including hardware, software, and dead front-mounted operator interface for a complete and functional system as specified herein and shown on the drawings.

B. The new PLC system shall be an integral component of the instrumentation and control system.

C. Provide complete I/O system including racks, power supplies, cables, connectors, terminals, interposing relays, signal conditioners, signal isolators, and the like.

D. Provide equipment and PLC developed files including manuals and disks for proper communication. Include PLC located equipment, interposing equipment, cable (length as required), connectors, and the like. Contractor shall utilize his computer for startup and testing. After successful startup, provide all developed software to the OWNER.

E. Provide programming, field debugging, testing and documentation.

F. In order to establish sole source responsibility for the Instrumentation and Control (I&C) System, the I&C Integrator shall be responsible for systems and subsystems provided.

G. The PLC system shall operate with the local HMI down.

H. All operator settings shall be documented if modified at start-up.

I. Like items of equipment provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

J. See CONDITIONS OF THE CONTRACT and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13700 - Process Instrumentation and Controls.

B. Section 13725 - Loop Functions/Programming Strategies/Protocol.

C. Division 16 - Electrical.

1.03 SUBMITTALS

A. Provide submittals in accordance with the requirements of Section 01300 - Submittals, and the following:

1. Provide a complete PLC program coordinated with the work specified in these Sections. Provide PLC program with other submittal data.

2. A single I&C supplier shall prepare and submit through the CONTRACTOR, complete and organized program printouts including fully annotated ladder diagrams and reports I/O schedules, I/O addresses, Rack assignments Communication channel/drop assignments. I/O and register assignments shall be provided to allow for a complete system. As a minimum, one spare I/O communications channel shall be provide for future I/O register racks.

3. During the period of preparation of this submittal, the CONTRACTOR shall authorize direct informal liaison between his single I&C Supplier and the ENGINEER for exchange of technical information. As a result of this liaison certain minor refinements and revisions in the systems as specified may be authorized informally by the Engineer, but these shall not alter the scope of the work or cause increase or decrease in the Contract price. During this informal exchange no oral statement by the ENGINEER shall be construed to give formal approval of any component or method, nor shall any statement be construed to grant formal exception to, or variation from these specifications.

4. The original and backup copy of the developed files shall be provided on CD. Electronic copy (CD) shall contain the final, as installed, debugged version of all developed files.

5. PLC programming shall be submitted and approved by ENGINEER prior to implementation.

B. Complete sets of Operation and Maintenance Manuals shall be submitted in accordance with Section 01730 - Operation and Maintenance Data. O & M Manuals shall be provided prior to start-up. Within the manual:

1. Provide copies of submittal data, complete.

2. Provide Engineering shop drawings.

3. Provide print out of final PLC(s) programming.

4. Provide print out of final PLC(s) I/O list.

5. Provide print out of final operator interface parameters.

6. Provide annotated rung, word and bit comments.

7. Provide any and all documentation so that OWNER may modify program.

C. Submit warranty information in accordance with Section 01740 - Warranties and Bonds.

D. As part of the responsibility as assigned by the CONTRACTOR, the PLC System supplier shall prepare and submit through the CONTRACTOR, complete and organized program printouts including fully annotated ladder diagrams and reports, I/O schedules, I/O addresses, Rack assignments, Communication channel/drop assignments.

1.04 QUALITY ASSURANCE

A. Equipment software and programming furnished under this specification shall be new and unused, shall be the product of a manufacturer having a successful record of manufacturing and servicing the equipment specified herein for a minimum of five (5) years.

1.05 WARRANTY

A. The manufacturer, I&C Integrator and CONTRACTOR shall warrant the equipment being supplied to the OWNER against all defects in

workmanship, programming, and materials for a period of two (2) year(s). Warranty period shall commence on Substantial Completion date as outlined in the GENERAL CONDITIONS. Warranties for all equipment installed under this contract shall run concurrently.

B. The MANUFACTURER's and I&C Integrator warranty period shall run concurrently with the CONTRACTOR's warranty period. No exception to this provision shall be allowed. The CONTRACTOR shall be responsible for proper storage of the equipment so as to remain in an "as shipped" condition. If the equipment remains in storage at the job site for longer than six (6) months, before installation, the CONTRACTOR shall provide factory service personnel for a complete inspection of the equipment. Any work necessary to restore the equipment to an "as shipped" condition will be the responsibility of the CONTRACTOR.

1.06 DEFINITIONS

A. The following abbreviations/definitions shall be defined as follows:

1. PLC-HSP = PLC at High Service Pump Area Control Panel, (HSP ACP).

2. PLC-SLUDGE = PLC at Sludge Remote I/O Panel.

B. The following terms shall be defined as follows:

1. I&C Vendor = Shall be same as I&C integrator per Section 13700 - Process Instrumentation and Controls.

PART 2 PRODUCTS

2.01 GENERAL

A. Provide programmable logic controller (PLC) as manufactured by Allen Bradley and as indicated by the drawings, no equal.

B. System must be able to handle online programming changes without shutting down or impacting process control.

2.02 POWER SUPPLY

A. Provide a battery backed power supply sized to power all PLC equipment. Include cables, connectors, and the like, as indicated on drawings.

2.03 RACKS

A. Provide full size racks, quantity as required for use with all processor, communications, and I/O cards. Provide a minimum of 3 spare I/O spaces in rack for future I/O or communications cards.

2.04 PROCESSOR

A. Provide Allen Bradley Control Logix family as indicated by the drawings.

B. Provide exceptions as indicated by the drawings.

2.05 I/O MODULES.

A. Discrete input module shall be 16 point min. with input voltage, 120vac or less. Provide a minimum of 2 modules in racks.

B. Discrete output modules shall be 16 point min. with output voltage, 120vac or less. Provide slave relays for each DO point for control of remote equipment. Provide a minimum of 2 modules in racks.

C. Analog input modules shall be 4 point, 24 vDC, 4-20 mADC, isolated. Provide a minimum of 2 modules in racks.

D. Analog output modules shall be 4 point, 24 vDC, 4-20 mADC, isolated, self powered. Provide a minimum of 1 module in racks.

E. Interposing relays or other required modules shall be provided as required to isolate the PLC from sensed or controlled equipment.

F. Refer to drawings. Provide all I/O as indicated. Add additional I/O as required for a complete and functional system. Provide total 25 % spare I/O of each type used, including panel surge arrester wired to labeled terminals for future use.

2.06 COMMUNICATION MODULE

A Provide communications module as indicated by the drawings.

2.07 OPERATOR INTERFACE (INDUSTRIAL PC)

A. Local HMI workstation(s) shall minimally include the following:

1. Phoenix Contact Industrial PC Product Model Number 2913108, or current equal.

   a. 21.5" backlit integrated LCD Touch Screen

   b. Storage: 80GB Solid State Drive

   c. Processor: 1.6GHz Intel Atom, Enhanced CPU

   d. Memory: 2GB, DDR SODIMM

   e. I/O: 2 Serial ports, 1 Parallel, 4 USB 2.0 ports, 2 Gigabit LAN ethernet ports.

   f. Power: 24 VDC ∀ 20%

   g. Operating System: Windows 7, 64-bit, English

   h. Mounting: Panel Mount

   i. Other equipment as may be required

B. Unit shall be front panel mounted or deadfront panel mounted as indicated on drawings.

2.08 OPERATOR INTERFACE SOFTWARE

A. The following software shall be installed on the operator interface (Industrial PC):

1. VT Trihedral SCADA Software, or equal.

2. OWNER shall be named in all software licenses.

3. Software shall include development package.

4. Include all necessary drivers and appurtenant software.

5. Minimum I/O tag count shall be 500.

B. Software shall communicate with specified Allen-Bradley Control Logix PLC.

C. Refer to drawings for additional information.

2.09 INDUSTRIAL ETHERNET SWITCHES

A. Provide WAGO 852112, or equal.

B. Provide units per the drawings as a minimum.

C. Provide all ancillary equipment and connectors as may be required.

2.10 PLC SYSTEM SPARE PARTS

A. Furnish the manufacturer's recommended spare parts including at least the following:

1. None required.

B. All parts shall be furnished in containers which are clearly marked and identified as to the contents.

C. Provide spare parts bill of materials with submittals for approval.

PART 3 EXECUTION

3.01 PLC I/O SCHEDULE

A. Provide PLC I/O schedule.

Refer to the P&I diagram, schematic diagrams and control strategies. Provide I/O per these requirements.
DI denotes Discrete Input
DO denotes Discrete Output
AI denotes Analog Input
AO denotes Analog Output

3.02 PROGRAMMING STRATEGIES, GENERAL REQUIREMENTS

A. Provide all programming to fully implement the following control strategies to produce output and receive input from the instrumentation and control system.

B. Programming strategies shall be as specified in Section 13725.

3.03 LOCAL HMI HARDWARE AND PROGRAM

A. All local HMI hardware and programming shall be provided by the I&C Vendor.

B. Provide all programming and software configuration of the local HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

C. General programming shall include but not be limited to the following:

1. Graphic display of all discrete and analog data.
2. Reporting of all discrete and analog data.
3. Alarm reception and acknowledgment of the alarms.

D. Refer to the programming strategies in Section 13725.

3.04 DOCUMENTATION

A. Include fully annotated ladder diagrams and other reports in the O&M manuals reflecting final corrections. Other required reports shall include but not be limited to bit, word, timer, counter, and memory usage reports.

B. Provide the typewritten program description from the I&C Vendor in the O&M manuals. Include in the description the program name, date, preparer/programmer, preparing company, etc. Include the overall structure and function of the program in the processing section of the description. Describe the program run stream and a detailed description of how the program operates. Describe input and output elements.

C. Describe how fault sensing is achieved and the actions required from operators to acknowledge or clear faults.

D. After successful software start up the I&C Vendor shall deliver to the OWNER all corrected ladder diagrams and reports as listed above as part of the O&M manuals. I&C Vendor shall also provide to the OWNER on disk all annotated, developed files. The OWNER becomes the Owner of such files.

3.05 TESTING

A. Shop simulate programming before downloading to the PLC. Check elements of the program in the presence of the ENGINEER and to the ENGINEER=s satisfaction. The I&C Vendor shall provided programmers on site with instrument technicians for the purposes of startup and testing of the system software.

3.06 I&C INTEGRATOR FIELD SERVICES

A. The services of a factory-trained service engineer who is specifically trained on the type of equipment herein specified shall be provided for the period(s) specified below during construction to assist the CONTRACTOR. Upon completion of the installation, the services of the above service engineer shall be provided for the minimum periods specified below for modifications and start-up of the equipment. The minimum days specified below do not relieve the Instrumentation Vendor from providing sufficient service to place the system into satisfactory operation.

Event	Duration (Minimum)
Construction/Installation Assistance	One (1) Eight (8) Hour Man Days
PLC System(s) Startup/Modifications	Two (2) Eight (8) Hour Man Days
OWNER Personnel Instruction	One (1) Eight (8) Hour Man Days

B. No form of energy shall be turned on to any part of the instrumentation system prior to receipt by the ENGINEER of a certified statement of approval of the installation from the CONTRACTOR containing his supplier's authorization for energizing the system.

C. A factory trained service engineer shall be provided for placing the system into operation. After the system is being operated by the OWNER's personnel, the service engineer shall return for instruction course in the maintenance and operation of the system.

END OF SECTION

SECTION 13711

EXISTING SCADA SYSTEM MODIFICATIONS

PART 1 GENERAL

1.01 WORK INCLUDED

A. The CONTRACTOR shall coordinate and furnish all labor and materials to modify the existing SCADA System including all hardware and programming revisions for a complete and functional system. Modification(s) shall include:

1. Addition of RTU's, remote I/O panels, new PLC's, new hardware and software as specified herein and shown on drawings.

B. Provide all equipment and re-developed PLC software files including manuals and disks for proper communication. Include all PLC located equipment, PC located equipment, interposing equipment, cable (length as required), connectors and the like. CONTRACTOR shall utilize his computer for startup and testing. After successful startup, all re-developed software shall be provided to the OWNER. PLC software and SCADA software shall be loaded onto the OWNER=s computers. Backup copies of all developed files shall be provided to OWNER on CD.

C. All programming, field debugging and testing shall be provided.

D. In order to establish sole source responsibility for the Instrumentation and Control (I&C) System, the CONTRACTOR shall be responsible for all systems and subsystems provided and coordination of work completed by I&C Integrator.

E. SCADA node package for East Industrial SCADA computer shall be Trihedral VT SCADA, latest version.

F. Provide SCADA development of new East Booster Station screens (I/O, status and alarms) at Main WTP SCADA system.

G. Like items of equipment provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

H. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13700 - Process Instrumentation and Controls.

B. Section 13725 - Loop Functions/Programming Strategies/Protocol.

1.03 SUBMITTALS

A. Submittals shall be made in accordance with the requirements of Section 01300 - Submittals.

1. It is incumbent upon the CONTRACTOR to coordinate the work specified in these Sections so that a complete SCADA program will be provided.

2. As part of the responsibility as assigned by the CONTRACTOR, the PLC/RTU System supplier shall prepare and submit through the CONTRACTOR, complete and organized program printouts including

fully annotated ladder diagrams and reports, I/O schedules, I/O addresses, Rack assignments, Communication channel/drop assignments.

3. During the period of preparation of this submittal, the CONTRACTOR shall authorize direct informal liaison between his single I&C Integrator and the ENGINEER for exchange of technical information. As a result of this liaison certain minor refinements and revisions in the systems as specified may be authorized informally by the ENGINEER, but these shall not alter the scope of the work or cause increase or decrease in the Contract price. During this informal exchange no oral statement by the ENGINEER shall be construed to give formal approval of any component or method, nor shall any statement be construed to grant formal exception to, or variation from these specifications.

4. The original and backup copy of the developed files shall be provided on CD-Rom.

B. Complete sets of Operation and Maintenance Manuals shall be submitted in accordance with Section 01730 - Operation and Maintenance Data. O & M Manuals shall be provided prior to start-up.

1. Manuals shall contain copies of submittal data.

2. Manuals shall contain all Engineering shop drawings with all field modification revisions.

3. Provide print out of final SCADA database programming.

4. Provide print out of final SCADA database I/O list.

5. Provide print out of final operator interface parameters.

C. Warranty information shall be submitted in accordance with Section 01740 - Warranties and Bonds.

1.04 QUALITY ASSURANCE

A. Work specified herein shall be performed by the same I&C Integrator as listed in Section 13700.

1.05 WARRANTY

A. The CONTRACTOR shall warrant all equipment and programming for a period of two (2) year(s) from the date of project substantial completion.

PART 2 PRODUCTS

2.01 PLC SYSTEM

A. PLC systems are based on Allen-Bradley Micrologix family of components per Section 13710.

B. New field wiring terminations for new field equipment and instrumentation shall be as shown on the drawings and field coordinated with the approved shop drawings.

C. All PLC programming shall be provided using existing system software in agreement with the OWNER=s copy.

2.02 EXISTING COMPUTER OPERATOR INTERFACE

A. Existing computer hardware and software systems shall be replaced with programming modifications as specified herein.

2.03 SCADA NODE LICENSE

A. Provide a Trihedral VT SCADA XXX I/O Tag Count SCADA Node updated license for each site(s).

B. Client license shall be registered in OWNER=s name.

C. Client license shall match capabilities of existing SCADA software.

D. I/O SCADA database shall reside in the _____.

E. All SCADA programming at WTP site shall be provided using Trihedral VT SCADA software in agreement with the Phase III WTP Improvements project. Copies shall be loaded onto the development, runtime, and client computers.

F. Provide backup of all developed files on CD.

2.04 SPARE PARTS

A. Furnish the following spare parts:

1. None required.

B. All parts shall be furnished in containers which are clearly marked and identified as to the contents.

C. Provide spare parts bill of materials with submittals for approval.

PART 3 EXECUTION

3.01 PLC I/O SCHEDULE

A. Provide SCADA Database I/O schedule.

Refer to the P&I diagram, schematic diagrams and control strategies. Provide I/O per these requirements.
DI denotes Discrete Input
DO denotes Discrete Output
AI denotes Analog Input
AO denotes Analog Output

3.02 PLC PROGRAMMING STRATEGIES, GENERAL REQUIREMENTS

A. Existing PLC(s) programming shall be modified to meet the functional requirements specified in Section 13725 - Loop Functions, Programming Strategies/Protocol.

3.03 COMPUTER OPERATOR INTERFACE AND PLC MODIFICATIONS (WTP SCADA HMI)

A. Provide all programming and software modifications of the existing WTP SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

B. General programming shall include but not be limited to the following:

1. Graphic display of all new and existing discrete and analog data.
2. Reporting of all new and existing discrete and analog data.
3. Alarm reception and acknowledgment of the new and existing alarms.
4. Control output of data from central computer to PLC-1 per P&I diagram and these specifications.
5. Software modifications shall be similar to and consistent with the existing computer operator interface.

C. Specific function revisions shall be as follows:

1. Functional requirements specified in Section 13725 - Loop Functions/Programming Strategies/Protocol.

3.04 DOCUMENTATION

A. Fully annotated ladder diagrams, screen design graphics and other reports and documentation shall be included in the O&M manuals reflecting final corrections. Other required reports shall include but not be limited to bit, word, timer, counter and memory usage reports.

B. The CONTRACTOR shall provide the typewritten program description in the O&M manuals. The description shall include the program name, date, preparer/programmer, preparing company etc. The processing section of the description shall include the overall structure and function of the program. Describe the program run stream and a detailed description of how the program operates. Describe all input and outputs elements.

C. Describe how fault sensing is achieved and the actions required from operators to acknowledge or clear faults.

D. After successful software start up the CONTRACTOR shall deliver to the OWNER all corrected ladder diagrams and reports as listed above as part of the O&M manuals. CONTRACTOR shall also provide to the OWNER on disk all annotated, developed files. The OWNER becomes the Owner of such files.

3.05 TESTING

A. All programming shall be shop simulated as much as possible before downloading to the existing systems. All elements of the program shall be checked in the presence of the ENGINEER and to his satisfaction. The CONTRACTOR shall provide programmers on site with instrument technicians for the purposes of startup and testing of the system software.

B. A minimum of five (5) man day(s) at each facility shall be provided for on-site testing.

3.06 START UP MODIFICATIONS

A. Programming modifications may be required during startup per the OWNER/ENGINEER=S requirements.

B. Provide an additional one (1) man day(s) of programming time at each site for these changes. These man days shall be in addition to time for changes required by Contract scope.

END OF SECTION

SECTION 13712

LOCAL HMI SYSTEM DEVELOPMENT

PART 1 GENERAL

1.01 WORK INCLUDED

A. The CONTRACTOR shall coordinate and furnish all labor and materials for the local HMI and PLC System including all hardware and programming for a complete and functional system.

B. Provide all equipment and HMI and PLC software files including manuals and disks for proper communication. Include all PLC located equipment, interposing equipment, cable (length as required), connectors and the like. CONTRACTOR shall utilize his computer for startup and testing. After successful startup, all re-developed software shall be provided to the OWNER. PLC software and HMI shall be loaded onto the OWNER=s computers. Backup copies of all developed files shall be provided to OWNER on CD.

C. All programming, field debugging and testing shall be provided.

D. In order to establish sole source responsibility for the Instrumentation and Control (I&C) System, the CONTRACTOR shall be responsible for all systems and subsystems provided and coordination of work by I&C INTEGRATOR.

E. Like items of equipment provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

F. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13700 - Process Instrumentation and Controls.

B. Section 13710 - Programmable Logic Controller.

C. Section 13725 - Loop Functions/Programming Strategies/Protocols.

D. Section 13751 - RTU Sub System.

E. Section 13752 - Computers and Accessories.

1.03 SUBMITTALS

A. Submittals shall be made in accordance with the requirements of Section 01300 - Submittals.

1. It is incumbent upon the CONTRACTOR to coordinate the work specified in these Sections so that a complete PLC and local HMI program will be provided. PLC program shall be provided with other submittal data.

2. During the period of preparation of this submittal, the CONTRACTOR shall authorize direct informal liaison between their I&C Integrator and the ENGINEER for exchange of technical information. As a result of this liaison certain minor refinements and revisions in the systems as specified may be authorized informally by the

ENGINEER, but these shall not alter the scope of the work or cause increase or decrease in the Contract price. During this informal exchange no oral statement by the ENGINEER shall be construed to give formal approval of any component or method, nor shall any statement be construed to grant formal exception to, or variation from these specifications.

3. The original and backup copy of the developed files shall be provided on CD-Rom.

B. Submit proposed HMI screen designs for approval prior to implementation.

C. Warranty information shall be submitted in accordance with Section 01740 - Warranties and Bonds.

1.04 QUALITY ASSURANCE

A. Work specified herein shall be performed by the same I&C Integrator as listed and completing the work specified in Section 13700.

1.05 WARRANTY

A. The CONTRACTOR shall warrant all equipment and programming for a period of two (2) year(s) from the date of project final completion.

PART 2 PRODUCTS

2.01 LOCAL HMI

A. Local HMI components specified with the PLC system. Refer to Section 13710.

B. Operator work station HMI components are specified in Section 13752 - Computers and Accessories.

2.02 SPARE PARTS

A. Furnish the manufacturer's recommended spare parts including at least the following:

1. None required.

B. All parts shall be furnished in containers which are clearly marked and identified as to the contents.

C. Provide spare parts bill of materials with submittals for approval.

PART 3 EXECUTION

3.01 I/O SCHEDULE

A. Provide I/O schedule.

Refer to the P&I diagram(s), schematic diagrams and control strategies.
Provide I/O per these requirements.
DI denotes Discrete Input
DO denotes Discrete Output
AI denotes Analog Input
AO denotes Analog Output

3.02 LOCAL SCADA HMI (GENERAL)

A. Provide all programming and software configuration of the new PLC(s) local HMI program to implement the requirements for a complete and

functional system as specified herein and shown on drawings for the following:

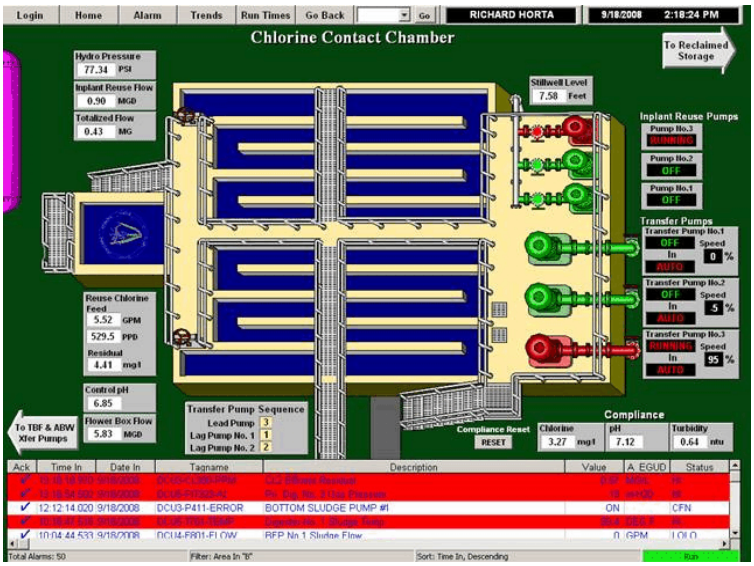
1. All new operator interface locations.

B. General programming shall include but not be limited to the following:

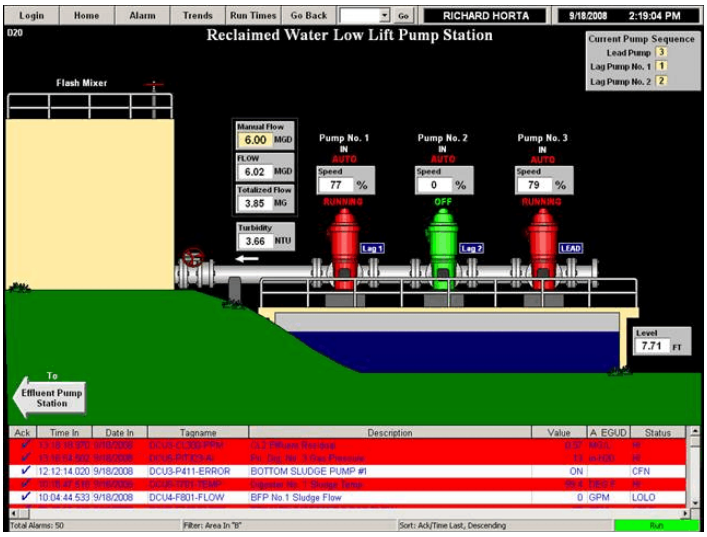
1. Graphic display of all discrete and analog data.
2. Reporting of all discrete and analog data.
3. Alarm reception and acknowledgment of the alarms.

3.03 LOCAL SCADA HMI (VILLAGE CONVENTIONS)

A. HMI Color and Wording Conventions



Equipment Status/Condition	Color	Descriptor	Comments
Off in Hand	Red	Off	In this condition, the equipment can only be controlled locally from the control panel
On in Hand	Green	Running	In this condition, the equipment can only be controlled locally from the control panel
Fault in Hand	Yellow	Failed	
Off in Remote	Red	Off	In this condition, the equipment is in auto and can be controlled from the HMI
On in Remote	Green	Running	In this condition, the equipment is in auto and can be controlled from the HMI
Closed in Hand	Red	Closed	In this condition, the equipment can only be controlled locally from the control panel
Open in Hand	Green	Open	In this condition, the equipment can only be controlled locally from the control panel
Fault in Hand	Yellow	Failed	
Closed in Remote	Red	Closed	In this condition, the equipment is in auto and can be controlled from the HMI
Open in Remote	Green	Open	In this condition, the equipment is in auto and can be controlled from the HMI
Fault in Remote	Yellow	Failed	
When Valve Opening or Closing	Magenta	Transition	



B. PLC tags shall use the I-drawings as the reference for the tag names.

Example: Pump with the name P-1120-1:

1. P-1120-1-Status for Run status
2. P-1120-1-Fault for the Fault status
3. P-1120-1-Auto for Auto/Manual status
4. P-1120-1-Remote for Local/Remote status

C. HMI screen format examples. The navigation bar is on top and the alarm summary is on the bottom of the screen.

3.04 DOCUMENTATION

A. Fully annotated screen design graphics and other reports and documentation shall be included in the O&M manuals reflecting final

corrections. Other required reports shall include but not be limited to bit, word, timer, counter and memory usage reports.

B. The CONTRACTOR shall provide the typewritten program description in the O&M manuals. The description shall include the program name, date, preparer/programmer, preparing company etc. The processing section of the description shall include the overall structure and function of the program. Describe the program run stream and a detailed description of how the program operates. Describe all input and outputs elements.

C. Describe how fault sensing is achieved and the actions required from operators to acknowledge or clear faults.

D. After successful software start up the CONTRACTOR shall deliver to the OWNER all corrected ladder diagrams and reports as listed above as part of the O&M manuals. CONTRACTOR shall also provide to the OWNER on disk all annotated, developed files. The OWNER becomes the OWNER of such files.

3.05 TESTING

A. All programming shall be shop simulated as much as possible before downloading to the PLC. All elements of the program shall be checked in the presence of the ENGINEER and to his satisfaction. The CONTRACTOR shall provide programmers on site with instrument technicians for the purposes of startup and testing of the system software.

3.06 START UP MODIFICATIONS

A. Programming modifications may be required during startup per the VILLAGE/ENGINEER=S requirements.

END OF SECTION

SECTION 13725

LOOP FUNCTIONS/PROGRAMMING STRATEGIES/PROTOCOL

PART 1 GENERAL

1.01 WORK INCLUDED

A. This Section covers the instrumentation loop functions, PLC, RTU, and HMI programming strategies and protocols.

B. In order to establish sole source responsibility for the Instrumentation and Control (I&C) System, the I&C vendor/subcontractor shall be responsible for systems and subsystems provided.

C. This specification section shall define the general programming parameters for HMI improvements.

D. All operator settings shall be documented as modified at start-up.

E. See CONDITIONS OF THE CONTRACT and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 01010 - Summary of Work.

B. Section 13700 - Process Instrumentation and Controls.

C. Section 13710 - Programmable Logic Controllers.

D. Section 13712 - Local HMI System Development.

E. Section 13751 - RTU Subsystem.

F. Section 13752 - Computers and Accessories.

1.03 DEFINITIONS

A. The following abbreviations/definitions shall be defined as follows:

1. DI = Discrete Input
2. DO = Discrete Output
3. AI = Analog Input
4. AO = Analog Output
5. HMI = Human Machine Interface
6. RTU = Remote Telemetry Unit with Programmable Logic Controller (PLC)

1.04 LOOP SPECIFICATION FORMAT

A. General

1. The P & Ids and these Specifications are not intended to completely depict all of the functional requirements of the control systems provided under this Section. The filter system supplier shall provide all instrumentation and controls necessary to provide safe and operable systems. The specific control systems proposed shall be subject to the review and approval of the ENGINEER.

B. "Functions" specify the functional performance of the loop and includes a description of any functional interlocks to be provided by the I&C

subcontractor. For more precise information on a loop's functional interlocks, refer to the Drawings.

C. "Components" specify the major components to be provided for a loop. Each component is identified by three pieces of information: tag number, component identification code and component name and options.

D. Tag numbers example HS-1-2-3C

HS = Instrumentation designation: Hand Switch
1 = Unit Process Number

2 = Loop Number
3 = Unit or Item Number
C = Sequential Modifier: Switch Location C

Tag numbering is further defined on the drawings.

E. Component identification code is an alphanumeric code used to reference a particular component specification within this section.

F. Component name and options are listed as required for each specific requirement. One particular nomenclature has been used to define the action of discrete devices about their set points.

"Rising" - in reference to a set point means that the contacts are closed for all process variable values above that point.

"Falling"- in reference to a set point means that contacts are closed for all process variable values below that point.

1.05 PROGRAMMING STRATEGIES, GENERAL REQUIREMENTS

A. Provide all programming to fully implement the following control strategies to produce output and receive input from the instrumentation and control system.

1.06 SUBMITTALS

A. Submittals shall be in accordance with Section 01300 - Submittals.

B. Provide submittal to demonstrate understanding and completion of the work covered by this section.

C. Submittal shall include proposed HMI screens for ENGINEER/OWNER review and approval.

PART 2 PRODUCTS

2.01 INSTRUMENTATION AND SCADA SYSTEM COMPONENTS

A. Instrumentation components shall be as specified in Section 13700 - Process Instrumentation and Controls.

B. PLC components shall be as specified in Section 13710 – Programmable Logic Controller.

C. RTU components shall be as specified in Section 13751 - RTU Subsystem.

PART 3 EXECUTION

NOT USED

PART 4 LOOP FUNCTIONS/PROGRAMMING STRATEGIES/PROTOCOL

4.01 DUPLEX WASTEWATER PUMPING (EXISTING CONTROL PANEL)

A. Field Functions:

1. Existing duplex PS control panel shall remain and all functions shall remain except as modified herein below.

2. Modify existing systems to incorporate/interface with new RTU.

3. Provide RTU power supply and other components to meet all function requirements.

4. Provisions shall be made for the following system monitoring functions:

a. Provide continuous 4-20 mA DC signal to RTU from level transmitter (LT) corresponding wet well level.

b. Provide continuous 4-20 mA DC signal to RTU from Pump No. 1 current transmitter (IIT-1) corresponding to pump amperage draw.

c. Provide continuous 4-20 mA DC signal to RTU from Pump No. 2 current transmitter (IIT-2) corresponding to pump amperage draw.

5. Provisions shall be made for the following future system monitoring functions:

a. Provide continuous 4-20 mA DC signal to RTU from future combustible gas detector (CGD) corresponding to percent LEL in wet well.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options
RTU BKR	M7	RTU Breaker 20 Amp

Tag Number	Component Identification Code	Component Name and Options
LT	L16	Radar Level Sensor Range: Depth of Wet well
GFM(2)	M7	Ground Fault Monitor
IIT-(2)	M7	Current Transmitter (Amps)

C. RTU Strategies:

1. Constant Speed Pump(s) Operation

a. Pump(s) shall start when pump(s) call signal is received from RTU after a time delay. This will be considered normal operation based on wet well level.

   Pump(s) shall be stopped when pump(s) call signal is discontinued from RTU after a time delay.

b. Backup float actuated operation shall be provided by existing local control panel.

2. System Status and Faults (Normal via SCADA)

a. When discrete signal is received at RTU from PM following a time delay, a phase monitor alarm shall be issued to existing SCADA network via RTU.

b. When discrete signal is received at RTU from MS-1 or MS-2 of pump(s) on following a time delay, a pump(s) run shall be issued to existing SCADA network via RTU.

c. When discrete signal is received at RTU from CR4 of high high wet well level following a time delay, a high high wet well level shall be issued to existing SCADA network via RTU.

d. When a discrete signal is received at RTU from CR51 (overtemp), SFR1 (seal failure), or CR8 (ground fault) following a time delay, the individual alarm shall be issued to existing SCADA network via RTU.

   Upon receipt of overtemp, seal fault, or ground fault signal, Pump shall be removed from ready status and not allowed to run. Pump shall return to ready status and allowed to run after the overtemp and ground fault discrete signal has been discontinued.

e. When a discrete signal is received at RTU from CR52 (overtemp), SFR2 (seal failure), or CR9 (ground fault) following a time delay, the individual alarm shall be issued to existing SCADA network via RTU.

   Upon receipt of overtemp, seal fault, or ground fault signal, Pump shall be removed from ready status and not allowed to run. Pump shall return to ready status and allowed to run after the overtemp and ground fault discrete signal has been discontinued.

f. When discrete signal is received at RTU from intruder switch(s) ZS following a time delay, an intruder alarm signal shall be issued to existing SCADA via RTU. Intruder alarm shall be reset by one of the following actions:

   i. Signal from intruder switch(s) is discontinued.

   ii. Acknowledgment of alarm via the existing SCADA network.

g. RTU shall receive and monitor 4-20 mA DC signal from the following devices:

Tag	**Variable**
LT	Water Level in Wet well
IIT-1	Pump No. 1 Current Draw
IIT-2	Pump No. 2 Current Draw

Continuous analog signal corresponding to the variables shall be issued to existing SCADA network via RTU.

h. RTU shall receive and monitor 4-20 mA DC signal from the following future devices:

Tag	Variable
CGD	Percent LEL in Wet well

Continuous analog signal corresponding to each of these variables shall be issued to existing SCADA network via RTU.

i. When discrete signal is received from CR01 on loss of RTU panel power following a time delay, a loss of RTU power alarm shall be issued to existing SCADA network via RTU.

j. RTU shall monitor position of each pump H-0-A switch. When switch is in auto, a switch in auto position shall be issue to existing SCADA network via RTU.

k. RTU shall internally monitor its own diagnostic protocols. When any of these protocols are out of specification following a time delay, a RTU trouble signal shall be issued to existing SCADA network via RTU. Signal shall be discontinued when condition is corrected.

D. Internal RTU Program Adjustable Software Values.

Description	Range, Initial Setting
1. Pump start/stop time delay	0-60 sec, 10 sec
2. RTU Fault Output time delay	0-60 sec, 30 sec
3. RTU Fault Reset Time Delay	0-60 sec, 30 sec
4. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the existing SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of all new and existing discrete and analog data.
b. Reporting of all new and existing discrete and analog data.
c. Alarm reception and acknowledgment of the new and existing alarms.
d. Control output of data from central computer to RTU=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. General Alarm Logging and Reset.

i. Log all alarm received.
ii. Display all received alarms, graphically.
iii. Provide alarm acknowledgment.

b. Provide display and alarm function of all alarms and faults indicated on drawing(s) and specified herein.

c. Provide and display status indication for pump(s). This shall include running non-resettable runtime total.

d. Provide and display variable (analog) status functions.

i. Functions shall be shown graphically and numerically.
ii. Daily totalizer shall be provided for flow variable. Totalizer shall reset to zero at midnight and transfer total daily value to previous day reading.
iii. Provide for all analogs indicated on P&ID drawings.

e. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

f. Sewage Pump Auto/Manual/Off Control

An auto/manual/off selector shall be provided for each pump.

Manual
i. When manual mode is selected, additional on-screen start/stop functions will appear.
ii. Operator can use the pump start/stop command to control selected pump(s) via SCADA.

Auto Mode
i. When auto mode is selected, additional on-screen start/stop functions will appear.
ii. Operator shall input RTU operational level setpoints for ALead Pump Start@; ALag Pump Start@; AHigh Level Alarm@; AAll Pumps Off@.

Off Mode
i. When off mode is selected, no additional screens will appear and no commands will be issued.

g. Wet well Level Status Monitoring
i. Operator can enter a setpoint for level. The SCADA system will alarm output AWARNING WET WELL LEVEL APPROACHING OVERFLOW CONDITION@.
ii. When level is exceeded, alarm will be issued.
iii. When level drops below setpoint, alarm output will be discontinued after time delay.

h. The following adjustable parameters shall be provided at SCADA HMI:

Description	Range, Initial Setting
i. Lead Pump Start	Wet well Depth (Ft), TBD
ii. Lag Pump Start	Wet well Depth (Ft), TBD
iii. All Pumps Off	Wet well Depth (Ft), TBD
iv. High Level Alarm	Wet well Depth (Ft), TBD
v. Warning Wet well Level Approaching Overflow Condition	Wet well Depth (Ft), TBD

4.02 DUPLEX WASTEWATER PUMPING (WITH NEW CONTROL PANEL)

A. Field Functions:

1. Provide hand/off/auto for each pump. Operation is same for each pump.

   In hand mode, pump runs.

   In off mode, pump will not run.
   In auto mode, pump runs as directed by RTU logic per drawings. Level control for pump operation shall be via level transmitter. Lead pump position shall alternate on each pump stop condition.

   Pump can be remotely started as directed by RTU when hand switch is in the auto position only.

2. Pump run status, RL-X, pump run time, ETM-X, and pump starts (cycle count, KKI-X) shall be indicated. Pump run status shall also be provided to RTU.

3. Receive a discrete signal on over-temperature from pump manufacturer=s internal temperature switch. Indicate pump overtemp, OT-X locally. Over temperature alarm shall also be issued to RTU. Signal shall discontinue once condition has cleared.

4. Receive a discrete signal on seal failure from pump manufacturer=s seal failure module (SFM-X). Indicate pump seal failure locally. Seal failure alarm shall also be issued to RTU. Signal shall discontinue once condition has cleared.

5. Receive a discrete signal from FS2 on high high level in wet well and locally indicate high high level visually (HLA) and audibly (AH). High high level alarm shall also be issued to RTU.

   Provide pushbutton reset to silence local alarm.

   Float shall be self-resetting and output signals shall discontinue on reset.

   High level alarm float shall also backup start the pumps.

6. Receive a discrete signal from FS1 on low low level in wet well.

   Low low level float shall also backup stop both pumps.

7. Receive a discrete signal on ground fault from ground fault monitor and locally indicate. Ground fault alarm shall also be issued to RTU. Signal shall discontinue once condition has cleared.

8. Upon opening of front panel door, intruder alarm switch ZS shall provide a discrete signal to RTU. System shall reset upon closing door which opens CR7.

9. Provide fluorescent courtesy lamp, convenience outlet, all indicated breakers, relays, terminal strips, wiring, power supplies, wire duct, lightning arrestor, surge capacitor, fuses, control power transformer, RTU power supply, and other components to meet all function requirements. Refer to 3-line diagrams and control schematics in drawings.

10. Monitor phase of normal and emergency power supply. When any power leg is out of phase, indicate locally, interrupt controls and stop pump(s). Phase monitor shall auto reset. Power supply to control panel shall be as indicated on drawings. Phase failure indication shall also be provided to RTU.

    Discontinue discrete signal to RTU on phase monitor reset.

11. Provisions shall be made for the following system monitoring functions:

    a. Provide continuous 4-20 mA DC signal to RTU from level transmitter (LT) corresponding wet well level.

    b. Provide continuous 4-20 mA DC signal to RTU from Pump No. 1 current transmitter (IIT-1) corresponding to pump amperage draw.

    c. Provide continuous 4-20 mA DC signal to RTU from Pump No. 2 current transmitter (IIT-2) corresponding to pump amperage draw.

12. Provisions shall be made for the following future system monitoring functions:

    a. Provide continuous 4-20 mA DC signal to RTU from future combustible gas detector (CGD) corresponding to percent LEL in wet well.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options
GR	M7	Generator Receptacle
LA	M7	Lightning Arrestor
SC	M7	Surge Capacitor
MS(2)	M7	Pump Motor Starter w/Solid State Overload
CCB	M7	Control Circuit Breaker 20 Amp
DRB	M7	Duplex Receptacle Breaker 20 amp
RTU	M7	RTU Breaker 20 Amp
GFDR	M7	Ground Fault Duplex Receptacle
PM	M7	Phase Monitor
AL1	M7	Indicator Light, Amber = Fail
HS(2)	M7	Selector Switch (Hand/Off/Auto)
ETM(2)	M7	Elapsed Time Meter
RL(2)	M7	Indicator Light, Green = Run

MB(2)	M7	Pump Motor Breaker (Amperage Rating indicated on drawings)

MCB/ECB	M7	Main and emergency circuit breakers w/mechanical interlock (amperage ratings indicated on drawings)

Tag Number	Component Identification Code	Component Name and Options
FL	M7	Fluorescent Lamp
CPT	X1	Control Power Transformer (480 volt panels only)
FS2	L8	Float Switch, Rising
FS1	L8	Float Switch, Falling
ISR1,2	M7	Intrinsically Safe Relay
FLA	M7	Flasher
HLA	M7	High Level Alarm, Globe Type
ASB	M7	Pushbutton, Black
AH	M7	Alarm Horn
AUX	M7	Auxiliary Breaker 20 amp (where noted on drawings only)
KKI(2)	M7	Pump Cycle Counter
ALT	M7	Duplex Alternator
SFM(2)		Seal Fail Module
OT-(2)	M7	Indicator Light, Red = Overtemp
SF(2)	M7	Indicator Light, Red = Seal Fail
ZS	Z1	Intrusion Switch
IT	X1	Isolation Transformer 120V:24V
GF-(2)	M7	Indicator Light, Red = Ground Fault
LT	L16	Submersible Level Transmitter Range: Depth of Wet well
GFM(2)	See Drawings	Ground Fault Monitor
IIT-(2)	See Drawings	Current Transmitter (Amps)

C. RTU Strategies:

1. Constant Speed Pump(s) Operation

a. Pump(s) shall start when pump(s) call signal is received from RTU after a time delay. This will be considered normal operation based on wet well level.

Pump(s) shall be stopped when pump(s) call signal is discontinued from RTU after a time delay.

b. Backup float actuated operation shall be provided by local control panel.

2. System Status and Faults (Normal via SCADA)

a. When discrete signal is received at RTU from PM following a time delay, a phase monitor alarm shall be issued to existing SCADA network via RTU.

b. When discrete signal is received at RTU from MS-1 or MS-2 of pump(s) on following a time delay, a pump(s) run shall be issued to existing SCADA network via RTU.

c. When discrete signal is received at RTU from CR4 of high high wet well level following a time delay, a high high wet well level shall be issued to existing SCADA network via RTU.

d. When a discrete signal is received at RTU from CR51 (overtemp), SFR1 (seal failure), or CR8 (ground fault) following a time delay, the individual alarm shall be issued to existing SCADA network via RTU.

Upon receipt of overtemp or ground fault signal, Pump shall be removed from ready status and not allowed to run. Pump shall return to ready status and allowed to run after the overtemp and ground fault discrete signal has been discontinued.

e. When a discrete signal is received at RTU from CR52 (overtemp), SFR2 (seal failure), or CR9 (ground fault) following a time delay, the individual alarm shall be issued to existing SCADA network via RTU.

Upon receipt of overtemp or ground fault signal, Pump shall be removed from ready status and not allowed to run. Pump shall return to ready status and allowed to run after the overtemp and ground fault discrete signal has been discontinued.

f. When discrete signal is received at RTU from intruder switch(s) ZS following a time delay, an intruder alarm signal shall be issued to existing SCADA via RTU. Intruder alarm shall be reset by one of the following actions:

i. Signal from intruder switch(s) is discontinued.

ii. Acknowledgment of alarm via the existing SCADA network.

g. RTU shall receive and monitor 4-20 mA DC signal from the following devices:

Tag	**Variable**
LT	Water Level in Wet well
IIT-1	Pump No. 1 Current Draw
IIT-2	Pump No. 2 Current Draw

Continuous analog signal corresponding to the variables shall be issued to existing SCADA network via RTU.

h. RTU shall receive and monitor 4-20 mA DC signal from the following future devices:

Tag	**Variable**
CGD	Percent LEL in Wet well

Continuous analog signal corresponding to each of these variables shall be issued to existing SCADA network via RTU.

i. When discrete signal is received from CR01 on loss of RTU panel power following a time delay, a loss of RTU power alarm shall be issued to existing SCADA network via RTU.

j. RTU shall monitor position of each pump H-0-A switch. When switch is in auto, a switch in auto position shall be issue to existing SCADA network via RTU.

k. RTU shall internally monitor its own diagnostic protocols. When any of these protocols are out of specification following a time delay, a RTU trouble signal shall be issued to existing SCADA network via RTU. Signal shall be discontinued when condition is corrected.

D. Internal RTU Program Adjustable Software Values.

Description	Range, Initial Setting
1. Pump start/stop time delay	0-60 sec, 10 sec
2. RTU Fault Output time delay	0-60 sec, 30 sec
3. RTU Fault Reset Time Delay	0-60 sec, 30 sec
4. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the existing SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of all new and existing discrete and analog data.
b. Reporting of all new and existing discrete and analog data.
c. Alarm reception and acknowledgment of the new and existing alarms.
d. Control output of data from central computer to RTU=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. General Alarm Logging and Reset.

i. Log all alarm received.
ii. Display all received alarms, graphically.
iii. Provide alarm acknowledgment.

b. Provide display and alarm function of all alarms and faults indicated on drawing(s) and specified herein.

c. Provide and display status indication for pump(s). This shall include running non-resettable runtime total.

d. Provide and display variable (analog) status functions.

i. Functions shall be shown graphically and numerically.
ii. Daily totalizer shall be provided for flow variable. Totalizer shall reset to zero at midnight and transfer total daily value to previous day reading.
iii. Provide for all analogs indicated on P&ID drawings.

e. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

f. Sewage Pump Auto/Manual/Off Control

An auto/manual/off selector shall be provided for each pump.

Manual
i. When manual mode is selected, additional on-screen start/stop functions will appear.
ii. Operator can use the pump start/stop command to control selected pump(s) via SCADA.

Auto Mode
i. When auto mode is selected, additional on-screen start/stop functions will appear.
ii. Operator shall input RTU operational level setpoints for ALead Pump Start@; ALag Pump Start@; AHigh Level Alarm@; AAll Pumps Off@.

Off Mode
i. When off mode is selected, no additional screens will appear and no commands will be issued.

g. Wet well Level Status Monitoring
i. Operator can enter a setpoint for level. The SCADA system will alarm output AWARNING WET WELL LEVEL APPROACHING OVERFLOW CONDITION@.
ii. When level is exceeded, alarm will be issued.
iii. When level drops below setpoint, alarm output will be discontinued after time delay.

h. The following adjustable parameters shall be provided at SCADA HMI:

Description	Range, Initial Setting
i. Lead Pump Start	Wet well Depth (Ft), TBD
ii. Lag Pump Start	Wet well Depth (Ft), TBD
iii. All Pumps Off	Wet well Depth (Ft), TBD
iv. High Level Alarm	Wet well Depth (Ft), TBD
v. Warning Wet well Level Approaching Overflow Condition	Wet well Depth (Ft), TBD

4.03 UNIT PROCESS X DISINFECTION (NaOCl STORAGE)

(Main WTP, X = 4)
(R. L. Pratt WTP, X = 0)

A. Field Functions:

1. Existing functions at Tank Fill Panel, FP-X-1, shall remain as shown on drawings.

2. Provide discrete signal from existing float switch LSH-X-2-1 to PLC-X-1 upon high level in sodium hypochlorite storage area containment. Condition shall be self-resetting.

3. Provide continuous 4-20 mA DC signal from existing sodium hypochlorite storage tank level indicating transmitter LE/LIT-X-2-(2) to PLC corresponding to liquid level in the tanks.

B. Field Components:

Tag Number	**Component ID Code**	**Component Name Options and Notes**
LE/LIT-X-2-(2)	Existing	Ultrasonic Level Transmitter Range: 0-12 Feet
PLC-X-2	Section 13710	Programmable Logic Controller

Tag Number	**Component ID Code**	**Component Name Options and Notes**
Network Communication Components	Section 13710	Ethernet Switches, Fiber Connections and other communications accessories per drawings
FP-X-2	Encl 2	NEMA 12, Freestanding

Existing components shall remain in place and in service.

C. PLC Strategies

1. Existing Sodium Hypochlorite Fill Panel (FP-X-1).

   a. PLC shall receive and monitor 4-20 mA DC signal from existing LE/LIT-X-2-(2) corresponding to liquid level in sodium hypochlorite storage tanks. Continuous 4-20 mA DC signal corresponding to liquid level in tanks shall be issued to existing LI-X-1-2 at FP-X-1.

   b. When level in NaOCl tank(s) level rises above **FULL NAOCL DELIVERY LEVEL SETPOINT**, following a time delay, a full delivery discrete signal shall be issued to existing LH-X-1-1 and LAH-X-1-1 at FP-X-1.

2. Sodium Hypochlorite Storage

   a. PLC shall receive and monitor a 4-20 mA DC signal from existing LE/LIT-X-2-(2) corresponding to liquid level in sodium hypochlorite storage tank(s). Continuous analog

value corresponding to sodium hypochlorite tank level(s) shall be issued to WTP HMI via SCADA network.

b. When discrete signal is received at PLC from existing float LSH-X-2-1 following a time delay, a high level containment area alarm shall be issued to WTP HMI via SCADA network.

c. When level in NaOCl tank(s) level drops below the **LOW TANK LEVEL ALARM SETPOINT** following a time delay, a low NaOCl tank(s) alarm shall be issued to WTP HMI via SCADA network.

d. PLC-Chemical shall calculate volume (gallons) remaining in NaOCl storage tanks by multiplying the depth of liquid remaining in tanks by **GALLONS OF LIQUID PER FOOT SETPOINT** and issue the calculated result to WTP HMI via SCADA network.

D. Internal PLC Program Adjustable Software Values

Description	Range, Initial Setting
1. PLC Fault Output time delay	0-60 sec, 30 sec
2. PLC Fault Reset Time Delay	0-60 sec, 30 sec
3. Other display/parameter elements shall be provided as required.	

E. WTP HMI

1. The following adjustable parameters shall be available at local HMI and WTP HMI:

Description	Range, Initial Setting
FULL NAOCL DELIVERY LEVEL SETPOINT	0-12 Ft, TBD
LOW TANK LEVEL ALARM SETPOINT	0-12 Ft, 3
GALLONS OF LIQUID PER FOOT SETPOINT	0-1000 Gallons, TBD

2. Provide all programming and software modifications for the WTP SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

3. General programming shall include but not be limited to the following:

a. Graphic display of all new and existing discrete and analog data.
b. Reporting of all new and existing discrete and analog data.
c. Alarm reception and acknowledgment of the new and existing alarms.
d. Control output of data from central computer to PLC’s per P&I diagram and these specifications.

4. Specific Functions shall be as follows:

a. General Alarm Logging and Acknowledgment.

i. Log all alarm received.
ii. Display all received alarms, graphically.
iii. Provide alarm acknowledgment.

b. Provide display and alarm function of all alarms and faults indicated on P&ID drawing(s).

c. Provide and display variable (analog) status functions.

i. Functions shall be shown graphically and numerically.
ii. Provide for all analogs indicated on P&ID drawings.

d. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5. Last Input Local or WTP HMI

a. The last input update shall be overwritten. Data can be input local or via WTP HMI. Last input shall overwrite the previous input. Current data input shall be displayed local and at WTP HMI.

4.04 UNIT PROCESS X DISINFECTION (NaOCl FEED PUMPS)

A. Field Functions:

1. Provide at FP-X-2 a selector switch, HS-X-3-(X), for each NaOCl feed pump. Functions are same for each pump as follows:

In “Off”, pump will not run.
In “Hand”, pump will run.
In “Auto”, pump will start/stop as directed by PLC.

B. Field Components:

Tag Number	Component ID Code	Component Name Options and Notes
PLC-X-2	Section 13710	Programmable Logic Controller
Network Communication Components	Section 13710	Ethernet Switches, Fiber Connections and other communications accessories per drawings
FP-X-2	Encl 2	NEMA 12, Freestanding
HS-X-3-(X)	M7	Selector Switch Hand-Off-Auto
MS-X-3-(X)	M7	Motor Starter

C. PLC Strategies

1. PLC-X-2 shall receive and monitor 4-20 mA DC signals from the skid mounted components. Continuous analog values shall be issued to WTP HMI via SCADA network corresponding to the following parameters:

   a. Existing FE/FIT-X-3-(X), NaOCl flow.

2. When discrete signal is received at PLC-X-2 from MS-X-3-(X) following a time delay, pump run status indication shall be issued to WTP HMI via SCADA network.

3. When discrete signal is received at PLC-X-2 from MS-X-3-(X) following a time delay, pump fault indication shall be issued to WTP HMI via SCADA network.

4. NaOCl Feed Pumps (On/Off)

   a. Operation shall be same for each pump. There are two operational modes, auto or manual.

      Manual Mode

      When “Manual” start signal is received at PLC-X-2 from WTP HMI via SCADA network, a discrete signal shall be issued to MS-X-3-(X) via HS-X-3-(X) calling the selected pump to run.

      When “Manual” start signal is discontinued to PLC-X-2 from WTP HMI via SCADA network, the output shall be discontinued and selected pump shall stop.

      Auto Mode

      When “Auto” mode is selected, a start signal will be received at PLC-X-2 from WTP HMI via SCADA network when flow is detected influent to a treatment unit issuing a discrete start signal to MS-X-3-(X) via HS-X-3-(X) calling the selected pump to run.

      Auto mode start signal will discontinue when no influent flow is detected to the treatment units discontinuing the output and stopping the pump.

5. NaOCl Feed Pumps (Pacing)

   a. NaOCl feed pacing shall be same for each feed pump. There are two operational modes for each pump, auto or manual. Operation is same for each as follows:

      Manual Mode

      Manual (pacing) signal shall be received at PLC-X-2 from WTP HMI via SCADA network. Manual setpoint (pacing signal) shall be issued to P-X-3-(X).

      When manual (pacing) signal is discontinued to PLC-X-2 from WTP HMI via SCADA network, the manual setpoint shall go to zero (0)%.

Auto Mode

When auto signal is received at PLC-X-2 from WTP HMI via SCADA network, pacing signal shall be output to P-X-3-(X) based on calculation following a time delay.

Pacing signal output shall be calculated as follows:

- The following input selections shall be received at PLC-NaOCl from WTP HMI via SCADA network.

  i. **TREATMENT UNIT FLOW REFERENCE SELECTION**

  ii. **NaOCl DOSAGE SETPOINT**

  iii. **MAXIMUM NaOCl RATE AVAILABLE**

  iv. **NaOCl DELIVERY CONCENTRATION**

  v. **TIME DELAY IN PERCENT SCALE REFERENCE RECALCULATION**

- Pacing signal output shall be calculated as follows:

  Percent Scale Reference (AO) = **NaOCl DOSAGE SETPOINT** X **TREATMENT UNIT FLOW REFERENCE SELECTION** (MGD) X 8.34 LB/Gal ÷9.74 LB/Gal ÷ **NaOCl DELIVERY CONCENTRATION** ÷ 24 Hours ÷ **MAXIMUM NaOCl AVAILABLE** X 100

  Example:

  TREATMENT UNIT FLOW REFERENCE SELECTION = 2.0 MGD
  NaOCl D0SAGE SETPOINT = 10.0 mg/l
  MAXIMUM NaOCl RATE AVAILABLE = 20 GPH
  NaOCl DELIVERY CONCENTRATION = 12% = 0.12

  Percent Scale Reference = 10 X 2 X 8.34 ÷ 9.74 ÷ 0.12 ÷ 24 ÷ 20 X 100 = 31.24%

  Recalculate following **TIME DELAY IN PERCENT SCALE REFERENCE CALCULATION**

  When ‘‘Auto’’ signal is discontinued to PLC-X-2 from WTP HMI via SCADA network, the pacing signal shall go to 0% and the call signal shall be discontinued.

D. Internal PLC Program Adjustable Software Values

Description	Range, Initial Setting
1. PLC Fault Output time delay	0-60 sec, 30 sec
2. PLC Fault Reset Time Delay	0-60 sec, 30 sec
3. Other display/parameter elements shall Be provided as required.	

E. Local Operator Interface HMI

1. The following adjustable parameters shall be available at local HMI and WTP HMI:

Description	Range, Initial Setting
TREATMENT UNIT FLOW REFERENCE SELECTION	1, 2, 3, :1
NaOCl DOSAGE SETPOINT	0-20 mg/l, 10
MAXIMUM NaOCl RATE AVAILABLE	0-20 gph, 15
NaOCl DELIVERY CONCENTRATION	0-15%, 12
TIME DELAY IN PERCENT SCALE REFERENCE RE-CALCULATION	0-30 Min, 3

F. WTP HMI

1. Provide all programming and software modifications for the WTP SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of all new and existing discrete and analog data.
   b. Reporting of all new and existing discrete and analog data.
   c. Alarm reception and acknowledgment of the new and existing alarms.
   d. Control output of data from central computer to PLC’s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

   a. General Alarm Logging and Acknowledgment.

      i. Log all alarm received.
      ii. Display all received alarms, graphically.
      iii. Provide alarm acknowledgment.

   b. Provide display and alarm function of all alarms and faults indicated on P&ID drawing(s).

   c. Provide and display status indication for pump(s). This shall include running non-resettable runtime total.

   d. Provide and display variable (analog) status functions.

      i. Functions shall be shown graphically and numerically.
      ii. Daily totalizer shall be provided for flow variable at each valve. Totalizer value shall be converted to pounds of chemical feed per day and a daily totalizer shall be provided for pounds per day from each pump. A totalizer summing the total pounds per day fed shall be provided and shall reset to zero at midnight and transfer total daily value to previous day reading.
      iii. Provide for all analogs indicated on P&ID drawings.

   e. Trending and Record keeping

      i. All data (analog) and events (alarm and status) shall

be stored for trending and records.

f. Auto/Manual control for NaOCl feed pumps (typ).

Manual Mode

i. When ‘‘Manual’’ mode is selected, the corresponding pump shall be called. Additional on screen pump start/stop command will appear.

Auto Mode

i. When ‘‘Auto’’ mode is selected, the corresponding pump shall be called and energized when influent plant flow is detected.

g. Pacing signal commands shall be as specified herein and shown on P&ID drawings.

4. Last Input Local or WTP HMI

a. The last input update shall be overwritten. Data can be input local or via WTP HMI. Last input shall overwrite the previous input. Current data input shall be displayed local and at WTP HMI.

4.05 REMOTE I/O PANEL(S)

A. Field Functions

1. I/O Panel(s) shall accept points per drawings.

2. Modify existing systems to incorporate/interface with new PLC(s).

B. Field Components:

Tag Number	Component ID Code	Component Name and Options
PLC(s)	Section 13710	Programmable Logic Controller
Network Communication Components	Section 13710	Ethernet Switches, Fiber Connections, and other Communications Accessories per drawings
Remote IO-Panel(s) (Interior Location)	Encl 2	NEMA 12, Freestanding
Remote IO-Panel(s) (Exterior Location)	Encl 1	NEMA 3R, SST

C. PLC Strategies

1. Specified herein Part 5 and as shown on the drawings.

PART 5 HMI FUNCTION CODES

5.01 HMI-1 FLOW DISPLAY

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new PLC.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. PLC shall receive and monitor 4-20 mA DC signal from the following devices:

Originating Field Instrument	Process Variable
Scheduled on Drawings	Flow

Continuous analog signal corresponding to the variables shall be issued to SCADA network via PLC.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of analog flow data.
   b. Reporting of all analog flow data.
   c. Alarm reception and acknowledgment of the new and existing alarms.
   d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.
   e. Units of measure and range per HMI function criteria tables. See drawings.

3. Specific Functions shall be as follows:

   a. Provide and display variable (analog) status functions.

      i. Functions shall be shown graphically and numerically.
      ii. Daily totalizer shall be provided for flow variable. Totalizer shall reset to zero at midnight and transfer total daily value to previous day reading.
      iii. Provide for all analogs indicated on P&ID drawings.

b. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.02 HMI-2 FLOW SUMMATION

A. Field Functions:

1. Existing functions shall remain as shown on drawings.

2. Modify existing systems to incorporate/interface with new PLC.

B. Field components:

1. Existing components shall remain in place and in service.

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies

1. None.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of analog data.
b. Reporting of all data.
c. Alarm reception and acknowledgment of the alarms.
d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.
e. Units of measure and range per HMI function criteria table. See drawings.

3. Specific Functions shall be as follows:

a. Provide and display variable (analog) status functions.

i. Functions shall be shown graphically and numerically.
ii. Daily totalizer shall be provided for flow variable. Totalizer shall reset to zero at midnight and transfer total daily value to previous day reading.
iii. Provide for summation of all analogs indicated on P&ID drawings.

ii. Provide for all analogs indicated on P&ID drawings.

b. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.04 HMI-4 DISCRETE CONTACT ALARM

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new PLC.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. PLC shall receive discrete signals from the following devices:

Originating Field Panel, Field Instrument, or Similar Device	Alarm or Status Input
Scheduled on Drawings	Scheduled on Drawings

Discrete signals shall be issued to SCADA network via PLC.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of discrete data.
b. Reporting of discrete data.
c. Alarm reception and acknowledgment of alarms.
d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. General Alarm Logging and Acknowledgment.

i. Log all alarms received.
ii. Display all received alarms, graphically.
iii. Provide alarm acknowledgment.

b. Provide display and alarm function of all alarms and faults indicated on P&ID drawing(s).

c. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.05 HMI-5 PROCESS VARIABLE DISPLAY

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new PLC.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. PLC shall receive and monitor 4-20 mA DC signal from the following devices:

Originating Field Instrument	Process Variable
Scheduled on Drawings	Scheduled on Drawings

Continuous analog signal corresponding to the above schedule variables shall be issued to SCADA network via PLC.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of analog process variable data.
b. Reporting of analog process variable data.
c. Alarm reception and acknowledgment of alarms.

d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. Provide and display variable (analog) status functions.

i. Functions shall be shown graphically and numerically.
ii. Provide for all analogs indicated on P&ID drawings.

b. HMI shall provide and display the following relative to the process variable:

i. High or low process variable condition alarm based on HMI setpoints.
ii. Conditions to be shown graphically and numerically.
iii. Provide all indications shown on P&ID drawings.
iv. Setpoint range shall match process variable range.

c. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.06 HMI-6 VARIABLE SPEED PUMPING SYSTEM

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. PLC shall receive and monitor 4-20 mA DC signal from the following devices:

Originating Field Instrument	Process Variable
Scheduled on Drawings	Scheduled on Drawings

Continuous analog signal corresponding to the above schedule variables shall be issued to SCADA network via PLC.

2. Existing PLC strategies and programming shall be re-established.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of all new and existing discrete and analog data.
   b. Reporting of all new and existing discrete and analog data.
   c. Alarm reception and acknowledgment of the new and existing alarms.
   d. Control output of data from central computer to PLC's per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

   a. General Alarm Logging and Acknowledgment.

      i. Log all alarm received.
      ii. Display all received alarms, graphically.
      iii. Provide alarm acknowledgment.

   b. Provide display and alarm function of all alarms and faults indicated on P&ID drawing(s).

   c. Provide and display status indication for pump(s). This shall include running non-resettable runtime total.

   d. Provide and display variable (analog) status functions.

      i. Functions shall be shown graphically and numerically.
      ii. Daily totalizer shall be provided for flow variable. Totalizer shall reset to zero at midnight and transfer total daily value to previous day reading.
      iii. Provide for all analogs indicated on P&ID drawings.

   e. Trending and Record keeping

      i. All data (analog) and events (alarm and status) shall be stored for trending and records.

   f. Pump Position Selection and Alternation

      i. When alternation selection mode is initiated, additional on-screen commands will appear:

         - Pump 1 = Lead, Fol1, Fol2, Fol3, Fol4
         - Pump 2 = Lead, Fol1, Fol2, Fol3, Fol4
         - Pump 3 = Lead, Fol1, Fol2, Fol3, Fol4
         - Pump 4 = Lead, Fol1, Fol2, Fol3, Fol4
         - Pump X = Lead, Fol1, Fol2, Fol3, Fol4, Fo1X

      ii. Pumps will remain in selected order and alternate one position as directed by PLC on alternation time setting.

   g. Hand/Off/Auto control for pumps (typ)

      <u>Off Mode</u>

      i. When ''Off'' mode is selected, no remote operation is requested.

Hand Mode

i. When ''Hand'' mode is selected, the corresponding pump/VFD shall be called and energized. Additional on-screen pump speed setpoint (0-100%) command will appear.

Auto Mode

i. When ''Auto'' mode is selected, the corresponding pump/VFD shall be called and energized as directed by PLC-HSP. The following additional on-screen commands will appear:

- Operator interface command related to pumping as specified herein.

4. Last Input Local or WTP HMI

a. The last input update shall be overwritten. Data can be input local or via WTP HMI. Last input shall overwrite the previous input. Current data input shall be displayed local and at WTP HMI.

5.07 HMI-7 CONSTANT SPEED PUMP OR BLOWER SYSTEM

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of all new and existing discrete and analog data.

b. Reporting of all new and existing discrete and analog data.
c. Alarm reception and acknowledgment of the new and existing alarms.
d. Control output of data from central computer to PLC's per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. General Alarm Logging and Acknowledgment.

i. Log all alarm received.
ii. Display all received alarms, graphically.
iii. Provide alarm acknowledgment.

b. Provide display and alarm function of all alarms and faults indicated on P&ID drawing(s).

c. Provide and display status indication for pump(s). This shall include running non-resettable runtime total.

d. Provide and display variable (analog) status functions.

i. Functions shall be shown graphically and numerically.
ii. Daily totalizer shall be provided for flow variable. Totalizer shall reset to zero at midnight and transfer total daily value to previous day reading.
iii. Provide for all analogs indicated on P&ID drawings.

e. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

f. Pump Position Selection and Alternation

i. When alternation selection mode is initiated, additional on-screen commands will appear:

- Pump 1 = Lead, Fol1, Fol2, Fol3, Fol4
- Pump 2 = Lead, Fol1, Fol2, Fol3, Fol4
- Pump 3 = Lead, Fol1, Fol2, Fol3, Fol4
- Pump 4 = Lead, Fol1, Fol2, Fol3, Fol4
- Pump X = Lead, Fol1, Fol2, Fol3, Fol4, Fo1X

ii. Pumps will remain in selected order and alternate one position as directed by PLC on alternation time setting.

g. Hand/Off/Auto control for pumps (typ)

<u>Off Mode</u>

i. When ''Off'' mode is selected, no remote operation is requested.

<u>Hand Mode</u>

i. When ''Hand'' mode is selected, the corresponding pump shall be called and energized.

<u>Auto Mode</u>

i. When ''Auto'' mode is selected, the corresponding pump shall be called and energized as directed by PLC.

4. Last Input Local or WTP HMI

   a. The last input update shall be overwritten. Data can be input local or via WTP HMI. Last input shall overwrite the previous input. Current data input shall be displayed local and at WTP HMI.

5.08 HMI-8 PRESSURE DISPLAY

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new PLC.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. PLC shall receive and monitor 4-20 mA DC signal from the following devices:

Originating Field Instrument	Process Variable
Scheduled on Drawings	Pressure

Continuous analog signal corresponding to the above schedule variables shall be issued to SCADA network via PLC.

2. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of analog pressure data.
   b. Reporting of analog pressure data.
   c. Alarm reception and acknowledgment of alarms.
   d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. Provide and display variable (analog) status functions.

i. Functions shall be shown graphically and numerically.
ii. Provide for all analogs indicated on P&ID drawings.

b. HMI shall provide and display the following relative to the process variable:

i. High or low process variable condition alarm based on HMI setpoints.
ii. Conditions to be shown graphically and numerically.
iii. Provide all indications shown on P&ID drawings.
iv. Setpoint range shall match process variable range.

c. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.09 HMI-9 OPEN/CLOSE VALVE CONTROL

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of analog discrete and data.
b. Reporting of analog discrete and data.
c. Alarm reception and acknowledgment of alarms.
d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. General alarm logging and acknowledgment.

i. Log all alarms received.
ii. Display all received alarms graphically.
iii. Provide alarm acknowledgment.

b. Provide display and alarm function of all alarms and faults indicated on P&ID drawings.

c. Provide and display open/close status indication for valve(s).

d. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

e. Hand/Off/Auto Control for Valves

Off Mode

i. When ''Off'' mode is selected, no remote operation is requested.

Hand Mode

i. When ''Hand'' mode is selected, the corresponding valve shall be operated via HMI commands. Additional on screen ''Open'' and ''Close'' commands shall appear.

Auto Mode

i. When ''Auto'' mode is selected, the corresponding valve shall be operated under PLC control.

5.10 HMI-10 EQUIPMENT RUN INDICATION

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	**Component Identification Code**	**Component Name and Options**

Field instruments are existing.

C. PLC Strategies:

1. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec

2. Other display/parameter elements shall Be provided as required.

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

a. Graphic display of all new and existing discrete and analog data.
b. Reporting of all new and existing discrete and analog data.
c. Alarm reception and acknowledgment of the new and existing alarms.
d. Control output of data from central computer to PLC's per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

a. General Alarm Logging and Acknowledgment.

i. Log all alarm received.
ii. Display all received alarms, graphically.
iii. Provide alarm acknowledgment.

b. Provide display and alarm function of all alarms and faults indicated on P&ID drawing(s).

c. Provide and display status indication for equipment. This shall include running non-resettable runtime total.

d. Trending and Record keeping

i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.11 HMI-11 CHEMICAL STORAGE TANK (NO MIXING)

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	**Component Identification Code**	**Component Name and Options**

Field instruments are existing.

C. PLC Strategies:

1. PLC shall receive and monitor 4-20 mA DC signal from the following devices:

Originating Field Instrument	**Process Variable**
Scheduled on Drawings	Tank Level

Continuous analog signal corresponding to the above schedule variables shall be issued to SCADA network via PLC.

2. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of analog level data.
   b. Reporting of analog level data.
   c. Alarm reception and acknowledgment of alarms.
   d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

   a. Provide and display variable (analog) status functions.

      i. Functions shall be shown graphically and numerically.
      ii. Provide for all analogs indicated on P&ID drawings.

   b. HMI shall provide and display the following relative to the level variable:

      i. Convert measured tank liquid depth to volume in gallons. Calculation shall be based on tank geometry and equivalent gallons per foot.

      ii. Display volume graphically and numerically.

      iii. Indicate when tank level reaches re-order level. Setpoint range shall match tank depth.

      iv. Calculate and display volume of chemical used current day and previous day. Displays shall self-reset at 12:00 AM (midnight).

      v. Calculate and display pounds of chemical used current day and previous day. Displays shall self-reset at 12:00 AM (midnight). ENGINEER shall provide volume to weight conversion factors by chemical.

   c. Trending and Record keeping

      i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.12 HMI-12 CHEMICAL FEED PUMP (POSITIVE DISPLACEMENT DIAPHRAGM)

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. PLC strategies per Article 4.04, C, herein.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. HMI programming per Article 4.04, F, herein.

5.13 HMI-13 CHEMICAL FEED FLOW MEASUREMENT

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. PLC shall receive and monitor 4-20 mA DC signal from the following devices:

Originating Field Instrument	Process Variable
Scheduled on Drawings	Chemical Flow

Continuous analog signal corresponding to the above schedule variables shall be issued to SCADA network via PLC.

2. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of analog flow data.
   b. Reporting of analog flow data.
   c. Alarm reception and acknowledgment of alarms.
   d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

   a. Provide and display variable (analog) status functions.

      i. Functions shall be shown graphically and numerically.
      ii. Provide for all analogs indicated on P&ID drawings.

   b. HMI shall provide and display the following relative to NaOCl flow measurement:

      i. Daily totalizer in gallons for each flow meter for current day and previous day. Data resets and transfers at 12:00 AM (midnight).

      ii. Daily totalizer summation of all flow meters for current day and previous day. Data resets and transfers at 12:00 AM (midnight).

      iii. Convert all totalizer values to pounds of chemical fed current and previous day. Data resets and transfers at 12:00 AM (midnight).

      iv. Daily totalizers shall reset to zero at midnight and transfer totals to previous day.

   c. Trending and Record keeping

      i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.14 HMI-14 DISCRETE OPEN/CLOSE VALVE STATUS (NO CONTROL)

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of analog discrete and data.
   b. Reporting of analog discrete and data.
   c. Alarm reception and acknowledgment of alarms.
   d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

   a. General alarm logging and acknowledgment.

      i. Log all alarms received.
      ii. Display all received alarms graphically.
      iii. Provide alarm acknowledgment.

   b. Provide display and alarm function of all alarms and faults indicated on P&ID drawings.

   c. Provide and display open/close status indication for valve(s).

   d. Trending and Record keeping

      i. All data (analog) and events (alarm and status) shall be stored for trending and records.

5.15 HMI-15 DISCRETE EVENT INDICATION

A. Field Functions:

1. Function(s) shall remain except as modified herein.

2. Modify existing systems to incorporate/interface with new HMI.

B. Field Components:

Tag Number	Component Identification Code	Component Name and Options

Field instruments are existing.

C. PLC Strategies:

1. Existing PLC strategies and programming shall remain and/or be re-established with new system components.

D. Internal PLC Program Adjustable Software Values.

Description	Range, Initial Setting
1. PLC Fault Reset Time Delay	0-60 sec, 30 sec
2. Other display/parameter elements shall Be provided as required.	

E. HMI

1. Provide all programming and software modifications for the SCADA HMI program to implement the requirements for a complete and functional system as specified herein and shown on drawings.

2. General programming shall include but not be limited to the following:

   a. Graphic display of discrete event data.
   b. Reporting of discrete event data.
   c. Alarm reception and acknowledgment of alarms.
   d. Control output of data from central computer to PLC=s per P&I diagram and these specifications.

3. Specific Functions shall be as follows:

   a. Provide and display discrete status functions.

      i. Functions shall be shown graphically and numerically.
      ii. Provide for all discrete event indication(s) indicated on P&ID drawings.

   b. Trending and Record keeping

      i. All events (alarm and status) shall be stored for trending and records.

END OF SECTION

SECTION 13750

SCADA SYSTEM SOFTWARE

PART 1 GENERAL

1.01 WORK INCLUDED

A. Provide new SCADA software. I&C INTEGRATOR shall use his own development key. Provide all software drivers as may be required. Include drivers for all indicated equipment, including future equipment.

A. Computer and SCADA system integration shall be provided by the I&C INTEGRATOR.

C. Provide all software and firmware for a complete and functional system.

D. Provide programming, labor, and all documentation for a complete system. The OWNER shall be the licensed Owner of all software and developed files.

E. The computer system shall exchange data from the RTU system, remote field panels and the remote area panels, and indicated future systems. Provide dynamic screen displays, reports, alarm handling and alarm logging and all human machine interface to the I&C system. See also the RTU specification.

F. Other software and programming functions shall be provided as may be required.

G. See the drawings. Provide SCADA programming as may be required.

H. Provide primary and secondary units as hot backup.

I. See CONDITIONS OF THE CONTRACT and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13725 - Loop Functions/Programming Strategies/Protocol.

B. Section 13752 - Computers and Accessories.

1.03 SOFTWARE LICENSE INVENTORY AND REQUIREMENTS

A. The following table quantifies the number and type(s) of software licenses needed and existing at each facility.

VT SCADA Software License Inventory/Requirements				
License Type	Main WTP		R. L. Pratt WTP	
	Existing	Required	Existing	Required
Runtime	Existing Licenses to be replaced	1 Per Server	Existing Licenses to be replaced	1 Per Server
Development	Existing Licenses to be replaced	1	Existing Licenses to be replaced	1
Client/New Nodes	Existing Licenses to be replaced	1 per industrial PC	Existing Licenses to be replaced	1 per industrial PC

A. See Drawings for additional licensing requirements. I&C INTEGRATOR to confirm all SCADA licensing requirements.

PART 2 PRODUCTS

2.01 SCADA SOFTWARE (MANUFACTURER)

A. The specifications are written around VT SCADA as manufactured by Trihedral.

B. Reuse or expand existing software and licenses where applicable.

C. System shall include:

1. Advanced Polling Management
2. Full Redundancy
3. Historical Data Viewer
4. Alarms
5. Rich Graphic Capabilities
6. Display Creation Tools
7. Auto-Generated SCADA Displays
8. Security
9. Report Generator
10. Water/Wastewater Reports
11. Open Architecture
12. High-Efficiency Tag Development
13. VTS Alarm Dialer and WAP Server

D. All applicable licenses shall be in OWNER=s name and provided to OWNER upon project completion.

2.02 SCADA SOFTWARE (GENERAL)

A. All I/O associated with the systems shall be represented in the SCADA system as well as derived tags. System development shall be consistent with the Owner's existing conventions. See also Section 13725. The following generic features shall be provided. If discrepancies arise; Section 13725 shall take precedence.

B. Alarm Processing

1. Alarm conditions shall automatically be brought to the operator's attention audibly and visually on the PC. The video terminal shall have reserved section for alarm display and/or a dedicated screen for displaying alarms. The capabilities of the specified software shall be utilized, including color changes, audible and visual annunciations, alarm logging to disk with time and date stamp, alarm acknowledgment written to disk with time and date stamp, alarm report generation upon operator demand shall be provided. Audible and flashing visual annunciation shall remain until acknowledgment by the operator. Non-flashing visual alarm shall remain until alarm clears. Alarms shall be provided with automatic reset.

C. Dynamic Screen Displays

1. Color dynamic screen displays shall be provided. All I/O as well as derived values and alarms shall be utilized and displayed on one or more screens. System developer shall use good judgment in developing logically oriented screens depicting the process. Dynamic bar graphs with text shall be used to represent analog values such as levels, alarm levels shall represent graphically and with text. Diagrams shall be developed to represent piping, pumps and the like. Consistent OWNER conventions shall be used regarding normally open/close states, alarm/normal states, running/non-running states for all equipment with I/O associated with it.

2. Provide man machine interface via keyboard and/or mouse. Operator shall have the ability to control all equipment. Control shall minimally include start/stop indicated equipment in the automatic mode. Control shall be provided to all equipment.

3. Operator shall have the status of all setpoints and the ability to modify those setpoints, timers and the like.

4. Color print outs of proposed screens shall be submitted for review and approval.

5. The screens of HMI shall depict the process as indicated by the Drawings.

   The following shall be provided as a minimum:

   a. The minimum screen shall be equal to and represent the "I" sheets.

6. All I/O shall be represented in the SCADA. Refer to the drawings and other specifications.

7. Provide historical and real time trending.

D. Detailed report generations shall be provided showing useful information for water applications. Report on demand as well as scheduled reports shall be provided. Coordinate with OWNER and provide reports per OWNER's requirements.

E. Submit reports for approval.

F. Provide data recording as indicated by the drawings or as noted.

G. Provide reports of data as may be directed by the OWNER.

1. Provide two (2) additional periodic reports as directed by the OWNER at start up.

H. Data Logging - Provide Historian

1. Provide data and trend logging of all analog parameters including but not limited to:

a. Levels

b. Pressures

c. Flows

d. Intrusion

I. SCADA reports shall be available on demand. All analog values shall be logged with a time and date stamp so that detailed interrogation of the data base shall be provided.

J. If there is a large fire flow at 8:00 pm, the OWNER shall have the ability to view the data as a historical trend or as discrete values for any period. Care shall be used to record dynamic data more often and less dynamic data less often.

1. Pressure at 8:00 was 50 psi

2. Flow at 8:00 was 4000 gpm

3. This data shall be available as a historical trend and display in graphic form.

K. Historical data retrieval and trending shall be available for all analog data. The Operator shall have the select parameter and period for display. The Operator shall have the ability to "drill down" in time resolution and display the data in greater resolution.

L. Provide system data storage archiving protocol. Provide instruction on how data is to be archived.

2.03 HARDWARE

A. Provide new hardware where indicated by drawings and other specifications.

2.04 DRIVERS

A. Provide all driver systems.

B. Provide drivers for Allen-Bradley as a minimum.

PART 3 EXECUTION

3.01 PROGRAMMING AND CONFIGURATION (GENERAL)

A. Program and configure all SCADA and PLC Software.

B. Functional programming shall reside in the PLC system. SCADA interface shall reside in the computer system.

C. I&C INTEGRATOR shall configure system so the SCADA 1 and SCADA 2 are hot backups to each other. The video, keyboard and mouse connections shall work from either system. Under normal operation the video, keyboard and mouse shall be connected to SCADA 1.

D. When SCADA 1 fails, all the functions shall be available in SCADA 2 (and vice-versa). Operators shall disconnect the video, keyboard and mouse and shall reconnect it to SCADA 2. An alarm shall be issued. No data shall be lost.

3.02 LOAD

A. Load the SCADA system and indicated software.

3.03 TEST ALL SCADA SOFTWARE

A. Include testing of all software elements.

1. Test all I/O by primary element action, for example lift floats and confirm state change. Allow levels to rise and confirm analog data.

2. Test all trending and alarm screens.

B. Confirm all Operator control buttons.

C. Provide password protection of control. Coordinate with the OWNER.

3.04 PROVIDE SOFTWARE TO OWNER

A. Provide one (1) copy of all licensed, store bought software to the OWNER.

B. Provide two (2) copies of all final developed files to the OWNER.

END OF SECTION

SECTION 13751

RTU SUBSYSTEM

PART 1 GENERAL

1.01 WORK INCLUDED

A. Provide all engineering, labor, materials, and equipment to furnish, install, adjust, test, startup, and document a fully functional RTU Subsystem as shown on the drawings and specified herein.

B. All equipment, software and programming furnished under this specification shall be new and unused, shall be the product of a manufacturer having a successful record of manufacturing and servicing the equipment specified herein for a minimum of five (5) years.

C. Like items of equipment provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

D. All items specified herein this Section may not be specifically required for this project. I&C INTEGRATOR shall coordinate the requirements of this Section with the work required for proper completion of the project.

E. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements which apply to the work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13725 - Loop Functions/Programming Strategies/Protocol.

B. Division 16 - Electrical.

1.03 GENERAL SCOPE REQUIREMENTS

A. Standard RTU shall be installed and configured at each location indicated on drawings.

B. RTU functions shall be as specified in Section 13725 - Loop Functions/Programming Strategies/Protocol.

PART 2 PRODUCTS

2.01 GENERAL

A. RTU panel(s) shall be provided with a UL508 label and be manufactured by a UL508 panel manufacturer. Panel manufacturer shall submit proof of enrollment in U.L.=s custom builder=s program.

B. RTU panels shall be manufactured and provided by the I&C INTEGRATOR.

2.02 PROGRAMMABLE LOGIC CONTROLLER (PLC)

A. PLC shall be Micrologix 1400, 1766 Family as manufactured by Rockwell Automation, Inc.

2.03 RADIO/MODEM SYSTEM

A. Not applicable.

2.04 ANTENNA AND ACCESSORIES

A. Not applicable.

2.05 BACKUP BATTERY

A. 12 Volt, 7 amp hour backup battery.

B. Battery shall be Power-Sonic, PS-1270, or equal.

2.06 RTU ENCLOSURE

A. RTU panels shall be UL Listed, modified, NEMA 3R, Type 304 Stainless Steel enclosure with padlockable draw latches or 3-point padlockable handles conforming to the requirements of the National Electrical Manufacturer's Association.

B. In addition to the NEMA 3R standard, the panel shall conform to the following requirements:

1. Minimum metal thickness shall be 14-gauge.

2. All doors shall be rubber-gasketed with continuous hinge.

3. Provide Type 304 stainless steel drip shield.

4. Provide aluminum dead front panel for component mounting as shown on drawings.

5. Cabinet shall be mounted as indicated on the Drawings. Provide mounting ears as required. Field drilling of cabinet is prohibited.

6. Print pocket (full, 2 or 1/4 size) and one (1) set of reduced drawings shall be provided on interior side of door. (This requirement may be deleted where indicated on drawings.)

7. Minimum overall dimensions shall be as indicated by Drawings or as required by UL subject 508A for industrial control panels.

8. Provide door stop kits for outer cabinet door and dead front door.

9. Provide ARC flash label per N.E.C.

10. Enclosure shall have exterior white powder coat

C. Cabinet enclosure shall be as manufactured by Hoffman, or equal.

2.07 MISCELLANEOUS RTU COMPONENTS

A. 12 VDC power supply shall be Model MDR-60-12 as manufactured by Meanwell, or equal.

B. 12 to 24 VDC converter shall be Model S-25A-24 as manufactured by Meanwell, or equal.

C. RF surge suppressor shall be Part Number IS-B50LN-C2 as manufactured by Polyphaser Corporation, or equal.

D. Loop surge suppressors shall be Part Number DRS-036 as manufactured by EDCO, or equal.

E. Terminals shall be Dinnectors, DN-T10A, or equal.

F. Fuse holders shall be Bussman, CHM1D, or equal.

G. Fuses shall be Bussman, or equal.

H. Door switch shall be Square D, 9007AP221, or equal.

I. Other miscellaneous components not specified herein shall be as specified in Section 13700 - Process Instrumentation and Controls.

2.08 PANEL ELECTRICAL

A. Wiring

1. All electrical wiring shall be in accordance with the applicable requirements of Division 16 - Electrical. Wires shall be 600-volt class, PVC insulated stranded copper and shall be of the sizes required for the current to be carried, but not below 16 AWG enclosed in either sheet metal raceway or plastic wiring duct. Wiring for signal circuits shall be twisted shielded pairs not smaller than No. 18 AWG, and be separated at least 6 inches from any power wiring.

2. All panel wiring shall be labeled with T&B Shrink-Kon HVM marker system. Wire marker numbers shall agree with control panel provided terminals.

B. Terminal Blocks

1. Terminal numbers and wire numbers shall agree.

C. Wire Ducts

1. Wire duct shall be by Panduit, or equal.

D. Miscellaneous Features

1. Provide fluorescent courtesy light, convenience outlet, lightning arrestor, surge arrestor, loop power supplies (with surge protection specified herein), circuit breakers and power supply.

2. Items required shall be as indicated on the drawings.

2.09 NAMEPLATES, NAME TAGS AND SERVICE LEGENDS

A. All components provided under this section, both field and panel mounted, shall be provided with permanently mounted name tags bearing the entire ISA tag number of the components. Panel mounted tags shall be plastic; field mounted tags shall be stamped stainless steel.

B. Circuit breakers and all dead front panel items shall be clearly labeled by name, no tag number. Nameplates are defined as inscribed laminated plastic plates mounted under or near a panel face mounted instrument. Service legends are defined as inscribed laminated plastic integrally mounted on a panel face mounted instrument.

C. Service legends and nameplates shall be engraved, rigid, laminated plastic. Service legends and nameplates shall be fastened to the panel by screws or with a specially applied adhesive. Fastening shall not depend only on the adhesive backing of the nameplate. Unless otherwise noted, color shall be black with white letters and letter height shall be 3/16-inch.

D. Field mounted tags shall be 16-gauge, 304 stainless steel with 3/16-inch high characters.

E. Each panel shall be provided with a cabinet face mounted laminated nameplate as specified above. Unless otherwise noted, color shall be black with white letters 2-inch high.

2.10 SPARE PARTS

A. Furnish the manufacturer's recommended spare parts including at least the following:

1. None required.

B. All parts shall be furnished in containers which are clearly marked and identified as to the contents.

C. Provide spare parts bill of materials with submittals for approval.

PART 3 EXECUTION

3.01 GENERAL

A. New RTU(s) shall be installed at locations per Drawings.

PART 4 LOOP SPECIFICATIONS

4.01 LOOP SPECIFICATIONS

A. Control loop requirements shall be as specified in Section 13725 - Loop functions/Programming Strategies/Protocols and as shown by the Drawings.

END OF SECTION

SECTION 13752

COMPUTERS AND ACCESSORIES

PART 1 GENERAL

1.01 WORK INCLUDED

A. Provide all hardware, SCADA software, labor and all documentation for a complete system. The OWNER shall be the licensed OWNER of all hardware and software. Work shall include but not be limited to the following:

1. Computer Systems.

2. Operating System.

3. Input/Output subsystem as required.

4. Communications equipment.

5. Cables and Connectors.

6. Provide and configure all drivers as a minimum:

   a. Allen Bradley
   b. Others as indicated or necessary for proper execution of work.

B. The computer system shall exchange data with SCADA system, PLC network and radio network.

C. The PC shall also have the capacity to perform general purpose data processing tasks without interfering with the prescribed use.

D. Coordinate with the OWNER/ENGINEER prior to the time of purchase. These specifications shall establish the level of quality for bidding purposes. Provide the latest version systems.

E. Upgrade specified or indicated hardware to run the specified software as may be required.

F. Like items of equipment provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

G. See CONDITIONS OF THE CONTRACT and Division 1, GENERAL REQUIREMENTS, which contain information and requirements that apply to the Work specified herein and are mandatory for this project.

1.02 GENERAL SCOPE REQUIREMENTS

A. Computer system(s) and all accessories to accommodate or serve the needs of the RTU and SCADA system. This shall be a performance based specification and shall include the elements as indicated by the drawings or as specified in these specifications. The following minimum performance levels shall be provided, installed and made functional by the CONTRACTOR.

1. Provide servers as indicated. The SCADA system shall operate with any one server down without operator intervention.

2. The CONTRACTOR shall provide laptops for the OWNER's use. SCADA system development software shall be installed. The laptops shall go through the firewall of the virtual private network (VPN) and access the data base contained in the operating server. The intent is to allow the operator to take the laptops home and to use the laptops, if present, at the plant. Provide all labor and materials to accomplish this.

3. Refer to the electrical drawings ("E" sheets) which indicate general quantities of equipment and components to be provided. Provide all computer related hardware and software for a fully functional system.

1.03 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13750 - SCADA System Software.

B. Section 13753 - Operator Console(s) and Accessories.

1.04 SUBMITTALS

A. Submittals shall be made in accordance with the requirements of Section 01300 - Submittals.

B. Shall clearly indicate conformance to the requirements of this specification. Along with standard literature, detailed system schematics and drawings shall be provided. A recommended spare parts list shall be provided.

C. Complete set of Operation and Maintenance Manuals shall be submitted in accordance with Section 01730 - Operation and Maintenance Data. O & M Manuals shall be provided prior to start-up.

D. Warranty information shall be submitted in accordance with Section 01740 - Warranties and Bonds.

1.05 DELIVERY, STORAGE, AND HANDLING

A. Proper shipping, storage and handling procedures shall be followed as recommended by the equipment MANUFACTURER and as specified herein.

B. All parts shall be properly protected so that no damage or deterioration will occur during shipment, normal unloading, storage and installation.

C. All equipment and parts must be properly protected against any damage during a prolonged storage period at the site. Proper job site storage is the responsibility of the CONTRACTOR.

D. Factory assembled parts and components shall not be dismantled for shipment unless permission is received in writing from the ENGINEER. This provision shall not apply if the items are too large to be shipped in a completely assembled condition.

E. Each box or package shall be properly marked to show its net weight in addition to its contents.

1.06 WARRANTY

A. The manufacturer, I&C Integrator and CONTRACTOR shall warrant the equipment being supplied to the OWNER against all defects in workmanship and materials for a period of two (2) year(s). Warranty period shall commence on Substantial Completion date as outlined in the GENERAL CONDITIONS. Warranties for all equipment installed under this contract shall run concurrently.

B. The MANUFACTURER's and I&C Integrator warranty period shall run concurrently with the CONTRACTOR's warranty period. No exception to this provision shall be allowed. The CONTRACTOR shall be responsible for proper storage of the equipment so as to remain in an "as shipped" condition. If the equipment remains in storage at the job site for longer than six (6) months, before installation, the CONTRACTOR shall provide factory service personnel for a complete inspection of the equipment. Any work necessary to restore the equipment to an "as shipped" condition will be the responsibility of the CONTRACTOR.

PART 2 PRODUCTS

2.01 COMPUTER GENERAL REQUIREMENTS

A. Manufacturer

1. The following specifications establish the minimum level of quality and quantities.

2. Manufacturer shall be one of the following:

a. Dell.

b. No substitutions.

B. Server Specifications (minimum requirements)

1. PowerEdge R740 Chassis with capacity for up to 8 hard drives.

7. Processor: Intel7 Xeon7 E5645.

8. Memory: 16 GB Memory, 2933 MHz, Dual Ranked UDIMM.

9. Operating System: Windows Server, latest edition

10. Hard Drive Configuration: RAID Controller

11. Hard Drives: 1TB Solid State Drive(s).

12. Primary Hard Drive: HD Multi-Select.

13. Power Cords: Power Cord, NEMA 5-15P to C13, wall plug, 10 feet.

14. Network Adaptor: On-Board Single Gigabit Network Adapter.

15. Offsite File/Data Backup, OWNER shall pay for service. CONTRACTOR shall configure regular file backup.

C. Work Station Specifications (minimum requirements each)

1. Keyboard: Wired Key Keyboard, Logitech, or equal.

2. Mouse: Wired Mouse, Logitech, or equal.

3. Documentation: Documentation, English.

2.02 UPS SYSTEM

A. Units shall be Best models or equal sized as required. Minimum size shall be 1500 VA.

1. Provide UPS system as indicated by plans.

2. For server applications, two full size units shall be provided. Each unit shall carry the full load of the system. Load shall consist of server computers, switches, media converters and all other electrical loads associated with the console. Units shall be plug and cord connected to allow easy reconnection of loads in the event of a UPS failure.

2.03 LIGHTNING AND SURGE PROTECTION

A. All power, data and communications interface shall be provided with TVSS surge protection.

B. Surge protection equipment shall be IT or an approved equal. Materials shall be manufacturer's standard product as it relates to the application.

C. Provide Ethernet cable surge suppressor at all computer and router/Modem, RJ45 Jacks.

2.04 MISCELLANEOUS

A. All cable adapters, extensions and connectors shall be provided.

B. Provide all materials for a complete and functional system.

C. Miscellaneous

1. Provide all cables, connectors, patch chords, power supplies, etc., for a complete and functioning system.

2.05 PRINTERS

A. Color Printer

1. Hewlett-Packard Desk Jet, latest version color printer, or latest equivalent.

2. Provide 2 spare black and 2 spare color cartridges.

3. Wireless printers

4. Printer shall be capable of printing letter size (8.5" x 11") and ledger size (11" x 17").

2.06 WIRELESS ROUTER

A. Netgear A/B/N 1500 M Bps, long range, MIMO Antennas, or equal.

2.07 MODEM

A. Owner furnished.

2.08 ADDITIONAL EQUIPMENT

A. Provide additional Blue Tooth equipment to support wireless equipment, as may be needed.

2.09 CABLES

A. Provide all power cables as may be required.

B. Provide all signal cables as may be required.

C. Provide extra-long video cables.

2.10 MONITORS

A. Monitors shall be provided as indicated on the drawings.

B. Provide Dell, LG or equal, the latest version.

C. Provide all mounting brackets and installation hardware.

PART 3 EXECUTION

3.01 INSTALLATION AND CONFIGURATION

A. Install and configure all hardware and software.

END OF SECTION

SECTION 13759

MODIFICATIONS TO EXISTING FIELD PANELS, MCC=S AND PLC=s

PART 1 GENERAL

1.01 WORK INCLUDED

A. Furnish all engineering, field investigation, design, material and labor to complete the specified functional modifications of the existing systems specified herein and indicated on drawings.

B. The I&C Integrator shall modify control panels, field panels, MCC=s and the other facilities shown as specified. Provide field investigations, tagging of existing circuits, relays, relay sockets, hand selector control blocks, overload relays, terminals, TVSS equipment, wiring, wire tagging and the like. Provide shop drawings for all modified systems.

C. CONTRACTOR shall have the freedom and responsibility to modify the systems to produce the desired signals to the PLC/SCADA system. The following includes the minimum level of effort as set forth by the Contract Documents. The CONTRACTOR shall submit drawings, cut sheets and the like as may be needed to communicate to the OWNER and ENGINEER the modifications.

D. In general, the existing field panels have limited space. The signals, as indicated by the AI@ sheets or AE@ sheets, originate in the existing panels. These signals are used in the existing panels. This project includes locating the signals, tagging the signals, adding terminals or TVSS equipment, extending the signals to the new panel, including terminals or TVSS equipment, including relays or signal isolators in the new panels, using the relays or signal isolators to send the signals back to the original panel and extending the new signals to the PLC/SCADA system. The original control panel shall function as it did before the modification. Thus limiting the modifications to the original control panel.

E. Provide U.L. field inspection and labels for all modified U.L. listed control panels, motor control centers and the ATS.

F. Like items of equipment provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

G. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements which apply to the work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13700 - Process Instrumentation and Controls

B. Section 13710 - Programmable Logic Controller

C. Section 13725 - Loop Functions/Programming Strategies/Protocols

1.03 SUBMITTALS

A. Submittals shall be in accordance with Section 01300 - Submittals.

B. Provide wiring diagrams of modifications to be completed, including panel elevations.

C. Catalog information on all devices required and furnished for the modification.

D. I&C Integrator shall submit post-construction as-built drawings of all completed modifications.

1.04 DEFINITIONS

A. Definitions per Section 13700 - Process Instrumentation and Controls shall apply to this section.

1.05 WARRANTY

A. The manufacturer, I&C Integrator, and CONTRACTOR shall warrant the equipment being supplied to the OWNER against all defects in workmanship and materials for a period of two (2) year(s). Warranty period shall commence on Substantial Completion date as outlined in the GENERAL CONDITIONS. Warranties for all equipment installed under this contract shall run concurrently.

B. The MANUFACTURER's warranty period shall run concurrently with the CONTRACTOR's warranty period. No exception to this provision shall be allowed. The CONTRACTOR shall be responsible for proper storage of the equipment so as to remain in an "as shipped" condition. If the equipment remains in storage at the job site for longer than six (6) months, before installation, the CONTRACTOR may be required to provide factory service personnel for a complete inspection of the equipment. Any work necessary to restore the equipment to an "as shipped" condition will be the responsibility of the CONTRACTOR.

PART 2 PRODUCTS

2.01 GENERAL

A. Materials and components shall be as specified in Section 13700 - Process Instrumentation and Controls.

PART 3 EXECUTION

3.01 MAIN WTP

A. Refer to drawings for modification requirements.

3.02 R. L. PRATT WTP

A. Refer to drawings for modification requirements.

END OF SECTION

SECTION 13753

OPERATOR CONSOLES AND ACCESSORIES

PART 1 GENERAL

1.01 WORK INCLUDED

A. Design, engineering, fabrication, delivery and installation of modular, flexible equipment consoles and accessory items.

B. Like items provided hereunder shall be the end products of one manufacturer in order to achieve standardization for appearance, operation and maintenance.

C. See CONTRACT CONDITIONS and Division 1, GENERAL REQUIREMENTS, which contain information and requirements which apply to the Work specified herein and are mandatory for this project.

1.02 RELATED WORK SPECIFIED ELSEWHERE

A. Section 13752 - Computers and Accessories.

1.03 SUBMITTALS

A. Submittals shall be made in accordance with Section 01300 - Submittals.

B. Provide shop drawings including dimensions of individual components, profiles, finishes, attachments, accessories, utility/service requirements and locations.

B. Provide manufacturer=s installation, operation and maintenance instructions.

1.04 WARRANTY

A. The manufacturer, I&C Integrator and CONTRACTOR shall warrant the equipment being supplied to the OWNER against all defects in workmanship and materials for a period of ONE (1) year(s). Warranty period shall commence on Substantial Completion date as outlined in the GENERAL CONDITIONS. Warranties for all equipment installed under this contract shall run concurrently.

B. The MANUFACTURER's and I&C Integrator warranty period shall run concurrently with the CONTRACTOR's warranty period. No exception to this provision shall be allowed. The CONTRACTOR shall be responsible for proper storage of the equipment so as to remain in an "as shipped" condition. If the equipment remains in storage at the job site for longer than six (6) months, before installation, the CONTRACTOR shall provide factory service personnel for a complete inspection of the equipment. Any work necessary to restore the equipment to an "as shipped" condition will be the responsibility of the CONTRACTOR.

PART 2 PRODUCTS

2.01 MANUFACTURER

A. Operator consoles shall be manufactured by:

1. Evans Consoles, Inc., 1930 Maynard Rd. Se, Calgary, Alberta, Canada T2E6J8. Tel: (403) 291-4444.
2. Or equal.

B. Consoles shall be provided by the plant wide I&C Integrator.

2.02 OPERATOR CONSOLES

A. Evans **Strategy**; low profile, modular system console system or equal.

B. Finishes and colors shall be selected by the OWNER, Evans System high pressure laminate. Console base - provide color guide; Horizontal work surfaces - provide color guide. Provide paint chips for OWNER=s use in selection of colors.

C. Provide power bars as may be required and as minimally indicated on plans.

D. Provide separate segregated raceway system for all computer cables.

E. Provide grommets and other insulated cut-outs as may be required.

F. Provide flat screen LCD monitor mounting arm assembly(s).

PART 3 EXECUTION

3.01 FIELD MEASUREMENTS

A. CONTRACTOR shall obtain and provide field measurements to operator control console manufacturer. Do not scale from drawings.

B. Provide final measurements for improvements to location of console installation.

C. Provide final measurements for all equipment to be housed in or installed on the console.

3.02 STORAGE AND HANDLING

A. Follow manufacturer=s written recommendations.

3.03 PREPARATION

A. Provide preparation for all interconnection including, but not limited to:

1. Power
2. Ethernet
3. Video
4. Keyboards
5. Mice

3.04 INSTALLATION

A. Follow manufacturer=s written installation and maintenance requirements.

3.04 CLEANING AND PROTECTION

A. Follow manufacturer=s written recommendations.

PUBLIC SERVICE DEPARTMENT

SCADA SYSTEM UPGARDE
ITB# 2021B-003
Addendum No. 1
February 1, 2021

BIDS DUE: 2:00 PM, Local Time, March 18, 2021

TO ALL VENDORS BIDDING ON THIS PROJECT:

The changes, additions, substitutions, and/or deletions contained in Addendum No. 1 are hereby made a part of the Bid Documents for the **SCADA System Upgrade Project**, fully and completely as if the same were fully set forth herein.

IN THE PLANS

No changes

IN THE SPECIFICATIONS

1. Bid due date has changed from 2:00 PM local time on February 11, 2021 to 2:00 PM local time on March 10, 2021.
2. Due date for the Deadline for Submissions of Questions has changed from 5:00 PM local time on January 29, 2021 to 5:00 PM local time on February 26, 2021.

Receipt acknowledged and conditions agreed to the _____ day of _____, 2021.

SCADA System Upgrade Main Water Treatment Plant (Main WTP)

Bid No.: 2021B - 003

Addendum No. 2

February 16, 2021

BIDS DUE: 2:00 PM, Local Time, March 10, 2021

TO ALL VENDORS BIDDING ON THIS PROJECT:

The changes, additions, substitutions, and/or deletions contained in Addendum No. 2 are hereby made a part of the Bid Documents for the SCADA System Upgrade Main Water Treatment Plant (Main WTP) fully and completely as if the same were fully set forth herein.

A. QUESTIONS FROM BIDDERS

1. **Question:** Dwg. 39 Sheet E-04 shows the Remote I/O-MCP enclosure located in the southwest corner of the Chemical Building control room between the ATS and outer wall. There is a covered access in the floor (see attached picture) with its edge 19 in. from the backwall. The minimum enclosure depth available is 18 in. and with the requirements for Equipment Pad – Type C on Dwg. 70 Sheet ED-02 to extend a minimum of 2 in. around the enclosure, it would result in the access being partially covered. How do you wish to proceed?

   Answer: Remote I/O – MCP shall be relocated to east end of existing MCCA. Remote I/O- MCP panel shall be revised to wall mounted panel at this location. Drawing 39 shall be revised to indicate this revision.

2. **Question:** Dwg. 32 Sheet I-21 and Dwg. 38 Sheet E-03 show the lift station RTU communicating via fiber optic cable to the Remote I/O-MCP but Dwg. 61

Sheet E-26 shows a radio and antenna connection. Please verify the communication method.
Answer: Communication method shall be via fiber optic.

3. **Question:** The lift station control panel has been retrofitted with a Diversified Electronics Duplex Controller (please see attached pictures). Nearly all the I/O identified in Dwg. 32 Sheet I-21 Dwg. 61 Sheet E-26 are unavailable in its current condition. How do you wish to proceed?
Answer: Existing Main LS Control Panel shall remain as is. All I/O connections from this panel to RTU shall be future.

4. **Question:** Dwg. 40 Sheet E-05 Note 5 calls for the removal and replacement of the level transmitters with matching type. With the customer standardizing on the Vegapuls level sensor throughout their system, could it be used in this process?

   Answer: Existing Filter Level Transmitters shall be replaced in kind per drawing E-05, Note 5. The replacement level transmitter is specified in Section 13700 - Process Instrumentation and Controls, page 8, Article 2.04

5. **Question:** The IO count for the High Service Pump PLC -9-2 will use all available points available on the MicroLogix 1400 and expansion modules. This leaves no spares for future expansion. Can we use the CompactLogix model instead?

   Answer: Yes CompactLogix model may be used.

6. **Question:** Dwg. 27 Sheet I-16 lists the IO for the Remote I/O-WWR panel. The IO count is comparable to that of a standard VOPS lift station RTU. Can the lift station RTU design be used instead of the one called for in Dwg. 62 Sheet E-27? It would provide NEMA 4X integrity along with a proven tolerance to the south Florida heat. There is sufficient space in the layout for future IO expansion and the cost savings would be significant.

   Answer: Remote I/O – WWR Panel shall remain as indicated on Drawings E-12 and E-27.

7. **Question:** What are the specifications for the fiber optic network? Single or multi-mode cable, number of fibers, etc.

   Answer: Fiber Optic Cable shall be as Specified in Section 13710.

8. **Question:** Section 13759 1.01 E States that a UL Field Inspection will required on any UL panel modified during the project. Some of these panel have

already been modified from there original state. What if the panel is out of UL compliance prior to work being done on them? Who's responsible for correcting those?
Answer: UL Field Inspection shall not be required.

9. **Question:** What is the purpose of the Operator Interface? Is it for the local PLC only or to allow the operators to see the entire plant?
Answer: To Allow Operators to see the entire plant.

10. **Question:** Sheet I-12 calls for the existing flow indicators to be reused. How do we build a new FP-4-2 without removing them form the existing panel and bringing them to the shop for installation and wiring?
Answer: Existing Magmeters and wall mounted displays shall remain as is and in operation. These existing devices will not be relocated to new panel FP-4-2.

11. **Question:** Sheet I-12. Please verify we are adding analog speed commands to each of the existing chemical pumps.
Answer: Analog Speed commands are not required to the existing NaOCl pumps.

12. **Question:** Sheet I-12. Are the TU #1,2,3 INF FLOW to be hardwired of transmitted from Remote I/O-MCP to PLC-4-2 via the network?
Answer: These flow signals are transmitted to PLC-4-2 via the network, as noted on drawing I-12.

13. **Question:** Section 13725 4.04 E discusses a local Operator Interface HMI for the FP-4-2, there are none shown in the drawings. Does FP-4-2 get an Operator Interface?
Answer: There is no requirement for an operator interface at panel FP-4-2.

14. **Question:** Sheet I-10 shows hardwired signals from the contact basin VFDs to the Remote I/O-MCP. Doesn't the FP-5-1 monitor those points?
Answer: Yes, and future ethernet cable shall be ran from Remote I/O - MCP to each Transfer Pump VFD.

15. **Question:** Sheet I-13 shows THM FAN CONTROLS hardwired to the Remote I/O-MCP. What is the THM Fan? What is the control scheme?

Answer: I-13 is incorrect THM fans are controlled from FP-5-1, see drawing E-21.

16. **Question:** Sheet I-14 shows BACKWASH BLOWER AND BACKWASH PUMP CONTROLS hardwired to the Remote I/O-MCP. Doesn't FP-5-1 control those points?
Answer: I-14 is incorrect Backwash Blowers and backwash pumps are controlled from FP-5-1, see drawing E-21.

17. **Question:** Sheet E-22. Is the new FP-5-1 going to use the same style cabinet that exists there now?
Answer: Yes**.** See drawing E-22.

18. **Question:** Do the fiber optic runs fall under the I&C Integrators scope of work?
Answer: I&C Integrator is responsible for all fiber components and hardware to be incorporated with the panels and computer systems. I&C Integrator is responsible for all fiber connections. Fiber cable can be furnished and installed by I&C integrator or Electrical Contractor.

19. **Question:** Drawing E-15 shows video cable 1 ¼" conduit, UPS power ¾" conduit, I-2,4 ¾ "conduit, and I-6 ¾" conduit all noted concealed behind drywall. Will drywall be required at this location? Will furring be required? Please show limit of work required. Will the drywall require painting? Please provide specifications for these trades.
Answer: Proposed conduit/raceways can be concealed above the drop ceiling or installed on walls behind SCADA console or within PVC wire Mold. Exposed wire mold or conduit shall be painted to match wall. Removal/replacement of drywall or furring strips will not be required. Following completion of the SCADA and computer equipment installations the east and north walls of SCADA room shall be painted per Specifications Section 09900 – Protective Coatings, Page 14, System No. 109E.

20. **Question:** Drawing E-29 What PLC hardware is required in "full size rack" noted in replacement PLC 3-8 diagram?
Answer: "Full Size Rack" note is erroneous and shall be deleted. PLC hardware for existing HSP control panel, FP-9-2, shall be as indicated on Drawing E-12.

21. **Question:** Drawing E-05 What is the length of the capacitance probe required for the level transmitters?
Answer: Estimated probe length is 11.0 Feet. Actual length to be confirmed by CONTRACTOR during shop drawing submittal and approval phase.

22. **Question:** Section 03300 1.07 Testing. Verify this testing will be required for small patch pours of sidewalks.
Answer: Testing requirement for concrete patching shall be deleted.

23. **Question:** Please provide specifications for Fiber Optic Cable.

Answer: Fiber optic cable specification has been added to specifications section 13710.

24. **Question:** The Table of Contents list Division 16 Electrical. My documents (Specifications) do not have Sections 16000, 16001 or 16050. Please provide them.
Answer: Missing Specifications sections, 16000, 16001 and 16050 shall be provided via addendum No. 2.

25. **Question:** Please extend the bid date one week.
Answer: Village has extended the bid opening to March 10, 2021, per Addendum No. 1

26. **Question:** Regarding the requirement to have a General Contractor's License, would having a subcontractor with a GC license qualify for this requirement, or does the prime contractor need to have the GC license?

Answer: Prime Bidder/Contractor shall be a Florida Licensed General Contractor per Specifications Section 00200 – Instructions to Bidder's, Page 1, Article 3.01, B.

27. **Question:** The audio was bit garbled during the pre-bid meeting, please confirm the construction budget is $672,000
Answer: Engineer's Opinion of probable construction cost is $ 816,000.

28. **Question:** Please advise when this construction budget was established.

Answer: The Engineer's opinion of probable construction cost was established in September 2019.

29. **Question:** Please provide a list to identify which panels are ControLogix and those that are MicroLogix.
Answer: Recommendations of MicroLogix or ControLogix have been indicated on the network diagrams. It shall be the responsibility of the I&C Integrator select and finalize the design based on individual panel I/O requirements. The selections shall be finalized during the submittal approval process.

30. **Question:** Please make available an I/O list for each corresponding control panel both new and modified.
Answer: I/O requirements are indicated throughout the drawings.

31. **Question:** Please advise the tag count necessary for referenced VT SCADA licenses in section 13750.

Answer: Existing software license tag count is 25,000, proposed upgraded license tag count is 10,000.

32. **Question:** Section 13710 2.07 Industrial PC specified a Phoenix Contact Model 2913108. The response from my supplier. "The requested IPC is obsolete. Please have customer look at our VL2PPC 2000-2402760 or our BL2 PPC1100-1105780. I must point out that the BL2 product only has Windows 10 IOT options." Please advise.

Answer: Industrial PC specification will be updated.

33. **Question:** Will temporary wiring be necessary for any of this work?
Answer: Temporary wiring may be necessary for proper completion of the work, depending on CONTRACTOR's work plan and means and methods.

34. **Question:** Item 1 refers to a failover scheme between SDADA 1 and 2with the operator needing to do nothing to continue operation, but the diagram shows using SCADA 1 as the workstation. Operator will have to move keyboard, mouse and video connections if a failover occurs. Is this the intent of the design?
Answer: Additional monitor, keyboard and mouse will be added for the hot-backup runtime server.

35. **Question:** Item 2 lists requirements related to laptops but there are no actual laptop specs, and the laptops are not depicted on the drawings. Are we providing them with laptops and if so, what do they want and how many of them do they need?
Answer: laptops are not required.

36. **Question:** Item 3 lists requirements related to a workstation. This probably refers to using SCADA 1 as a workstation along with the monitors and mouse and keyboard-need this confirmed by Engineer.
Answer: Correct, these are the interface items for the server. A second group will be added for the backup server, per question 34 above.

B. SPECIFICATIONS

1. Section 00111 – Advertisement for Bid, page 1 of 1, first paragraph, **Change Bid Opening Date "February 11, 2021" to** "**March 10, 2021"**.

2. Section 00451 – Qualification Statement, page 5 of 8, Article 10 Financial Information, **Clarification Made to Highlighted Yellow Paragraph.**

3. Section 13700 – Process Instrumentation and Controls, page 18, Article2.17, paragraph B, **ADD,** "12. Where indicated on drawings, provide interior and exterior white powder coating."

4. Section 13700 – Process Instrumentation and Controls, page 18, Article2.18, paragraph B, **ADD,** "12. Where indicated on drawings, provide interior and exterior white powder coating."

5. Section 13700 – Process Instrumentation and Controls, page 23, Article2.23, paragraph A, **ADD,** "1. None."

6. Section 13710 – Programmable Logic Controller, **DELETE AND REPLACE THIS SECTION IN ITS ENTIRITY.** The following articles were modified or added: 1.06, 2.03, 2.04, 2.05, 2.06, 2.07, 2.08, 2.09, 2.10, 2.11, 2.12,2.13, and 2.14.

C. DRAWINGS

1. The following Drawings have been modified to address the questions from Bidders listed above:

Drawing No. 21 of 70, Sheet I-10, Unit Process 4 – Disinfection (Contact Basin).

Drawing No. 23 of 70, Sheet I-12, Unit Process 4 – Disinfection (NaOCl Feed Pumps).

Drawing No. 24 of 70, Sheet I-13, Unit Process 5 – Filtration.

Drawing No. 25 of 70, Sheet I-14, Unit Process 5 – Filtration.

Drawing No. 32 of 70, Sheet I-21, Unit Process 0 – Support Systems (Main Lift Station).

Drawing No. 38 of 70, Sheet E-03, Electrical Site Plan Details.

Drawing No. 39 of 70, Sheet E-04, Chemical Feed Building Electrical Plan.

Drawing No. 45 of 70, Sheet E-10, Network Diagrams (Sheet 2).

Drawing No. 46 of 70, Sheet E-11, Network Diagrams (Sheet 3).

Drawing No. 47 of 70, Sheet E-12, Network Diagrams (Sheet 4).

Drawing No. 48 of 70, Sheet E-13, Network Diagrams (Sheet 5).

Drawing No. 49 of 70, Sheet E-14, Network Console Details.

Drawing No. 50 of 70, Sheet E-15, Network Riser Diagrams.

Drawing No. 51 of 70, Sheet E-16, FP-4-2 NaOCl Feed System Panel Replacement (Sheet 1).

Drawing No. 52 of 70, Sheet E-17, FP-4-2 NaOCl Feed System Panel Replacement (Sheet 2).

Drawing No. 56 of 70, Sheet E-21, FP-5-1 Filter Control Panel Modifications (Sheet 4).

Drawing No. 58 of 70, Sheet E-23, Remote IO - MCP (Sheet 1).

Drawing No. 59 of 70, Sheet E-24, Remote IO - MCP (Sheet 2).

Drawing No. 60 of 70, Sheet E-25, Remote IO - MCP (Sheet 3).

Drawing No. 61 of 70, Sheet E-26, Main Lift Station Remote Telemetry Unit.

Drawing No. 63 of 70, Sheet E-28, Remote IO – Washwater Recovery (Sheet 2).

Drawing No. 64 of 70, Sheet E-29, MIEX Transfer Control Panel Modifications (Sheet 1).

Drawing No. 65 of 70, Sheet E-30, MIEX Transfer Control Panel Modifications (Sheet 2).

Drawing No. 68 of 70, Sheet E-33, Specific Details – Electrical.

All modifications to the above list of drawings have been identified with a revision triangle.

SCADA System Upgrade Main Water Treatment Plant (Main WTP)

Bid No.: 2021B - 003

Addendum No. 3

March 8, 2021

BIDS DUE: 2:00 PM, Local Time, March 10, 2021

TO ALL VENDORS BIDDING ON THIS PROJECT:

The changes, additions, substitutions, and/or deletions contained in Addendum No. 2 are hereby made a part of the Bid Documents for the SCADA System Upgrade Main Water Treatment Plant (Main WTP) fully and completely as if the same were fully set forth herein.

A. QUESTIONS FROM BIDDERS

1. **Question:** Deskjet Printers don't support 11x17, Officejet appeared to have the cheapest alternative.

   Answer: Provide Officejet or equal.

2. **Question:** "extra long video cables" is hard to price. After a certain length you have to turn to active signal repeating cables, which can extend the price. Same goes with USB devices. A length is really needed.

   Answer: Cable lengths required can be estimated from the scaled drawings of the Bid documents.

3. **Question:** LG and most other leading display companies only make models in 55" and 65", but not 60".

   Answer: Provide a 65" monitor in place of indicated 60" Monitor.

4. **Question:** They want 3 monitors from a server…this isn't a correct usage case for a server. A server is only going to come with 1 VGA. We need a workstation with a GPU to run three monitors for the workstation. I would suggest keeping the servers and adding a workstation under the monitor desk.

   Answer: Provide Dell workstation of equivalent class/configuration as SCADA Servers, with capability to drive multiple video monitors to match system configurations. Provide a dedicated keyboard and mouse for the video workstation and a dedicated keyboard and mouse for the servers. Workstation shall have a client license. Workstation shall be selected by system integrator with approval by ENGINEER during the shop drawing submittal approval process.

5. **Question:** it says Netgear wireless router in the specs, but the drawings only refer to a VPN router and firewall. Netgear doesn't make a business class firewall/vpn device. They have a home device, with some capabilities, but this isn't suggested for a business environment.

   Answer: Provide business class router/firewall/VPN devices as manufactured by Cisco or equal. Model /part number(s) shall be selected by integrator based on system configuration requirements.

6. **Question:** Raid controller presumed to be configured in a mirrored Raid 1.

   Answer: Raid controller shall be configured as Mirrored Raid 1 so data is identically written on two drives, if one drive fails there is an existing mirror copy ready to be used.

B. SPECIFICATIONS

1. No revisions.

C. DRAWINGS

1. No revisions.

All modifications to the above list of drawings have been identified with a revision triangle.

CAPITAL IMPROVEMENT PROJECT DETAIL

PROJECT # 19-UTL-563-02

Project Name: Main WTP SCADA System Improvements
Department: Public Service
Location: Utilities - Main WTP
Project Manager: DBurgin
Original Plan Date: FY20

DESCRIPTION / JUSTIFICATION:

The existing Supervisory Control And Data Acquisition (SCADA) system used for controling the water treatment process in the Main Plant is outdated and in need of upgrading. The existing system consistes of several separate systems used for controlling different parts of the treatment process. Plant operators must go to different locations to monitor each seperate system. This will be replaced with an integrated SCADA system which will enable the plant operators to monitor and control the entire treatment process from one location.

PROJECT EXPENDITURES / FUNDING SOURCES:

Village of Palm Springs

Executive Brief

AGENDA DATE: May 13, 2021

DEPARTMENT: Public Service

ITEM 6.18: Approve Emergency Generator Improvements - Wells 11,15 & LS 9 Award (Task Order Nos. 264, 265 & 267) - Invitation to Bid (ITB) - Public Service Department (FY 2021 Budget Funded - Water & Sewer Enterprise Fund) - Eau Gallie Electric

SUMMARY: The Public Service Department has identified a need for the installation of emergency generators at two of our raw water wells and one of our lift stations. The proposed project is located at wells No. 11, 15 and lift station No. 9 and would assist in the continued operation of the wells and lift station during power outages, allowing the Utility Division to continue to distribution/supply of water and the collection of sewer during severe weather events. The proposed project consists of the supply and installation of three (3) new generators for wells No. 11, 15 and lift station No. 9, including all required concrete, conduit, automatic transfer switches and electrical components to allow the generators to turn on and operate automatically during a power outage.

To ensure the lowest possible price for this project, staff issued an Invitation to Bid (ITB) on January 21, 2021 for Emergency Generator Improvements. This process was completed by the Village through a competitive bid selection process - Emergency Generator Improvements (ITB No. 2021B-004 - January 21, 2021).

Within the Fiscal Year 2021 Budget - Water & Sewer Enterprise Fund and the Capital Improvement Plan (CIP), the Village Council approved $846,555.00 for Emergency Generator Improvements.

As a result of the Village's ITB, the following seven (7) bid proposals were received:

Vendor	Total Bid
Cruz Electrical Corp	$243,700 (Incomplete)
Eau Gallie Electric	$416,000

All Florida Contracting Service	$478,650
Hinterland Group Inc.	$486,300
Zabatt Inc.	$541,732
Lawrence Lee Construction Services, Inc.	$553,000

Note: The Village's consultant engineering firm, Holtz Consulting, and the Village Attorney and the Assistant Public Service Director/Engineer, and Public Service Project Manager reviewed the bids received and identified one (1) bid proposal that was deemed unresponsive and was rejected (Cruz Electric did not provide audited financial statements or list of subcontractors and did not fully demonstrate their qualifications to perform the work and, thus, failed to meet the bid requirements in accordance with Section 00200, Article 19, and was rejected). As a result, the second lowest bid received was provided by Eau Gallie Electric in the amount of $416,000. Eau Gallie Electric provided a complete bid package with required documents and maintains the required State of Florida General Contractor License and meets the requirements set forth within the bid project manual.

The Village's Purchasing Code - Section 58-5(4)a - Competitive Selection Purchase Requirements, provides that the Village Manager shall have the authority to reject any and all bids, proposals, or other responses if he determines that it is in the best interest of the Village to do so.

Thus, after review of the seven (7) bids received, the Assistant Public Service Director/Engineer, the Public Service Project Manager, the Utilities Superintendent, the Village Attorney and Holtz Consulting have determined that Eau Gallie Electric provided the lowest responsible and responsive bid. As a result, staff is recommending that the Council award this proposed contract (Task Order #264, 265 & 267) to the lowest responsive and responsible bidder, Eau Gallie Electric in the amount of $416,000.

Note: The proposed bid amount submitted by Eau Gallie Electric is lower than the cost estimate ($657,000) by approximately 37%. The total approved budget for FY 2021 for this project is $846,555.00; however, staff believes that approximately $266,000.00 will be spent during the FY 2021 fiscal year. This project is expected to roll-over into the next fiscal year (FY 2022) and the remaining funding of $150,00.00 to complete this project is expected to be requested to be approved by the Village council during the upcoming FY 2022 budget process.

If approved, the Village would accept Eau Gallie Electric's pricing including all terms, conditions, and pricing as submitted within their ITB proposal and proposed contract. The Village will not expend more than the amount in the approved budget as it may be adopted/amended each year for these goods and services over the term of this contract.

If approved the project is expected to take approximately 240 days (January 2022) to complete following the Notice to Proceed from the Village.

The proposed agreement was prepared by the Village Attorney and reviewed by the Assistant Public Service Director/Engineer, the Public Service Project Manager, the Utilities Superintendent and the Finance Director.

The Village has not worked with the proposed vendor previously; however, the Village has received positive references from four (4) municipalities [Tampa Bay Water, City of Cocoa Beach, City of Naples, and City of Melbourne] and one (1) government agency [NOAA] for the proposed vendor.

FISCAL IMPACT:

Funding to support Task Order #264, 265 & 267 is available within FY 2021 Budget - Water & Sewer Enterprise Fund.

Allocated/Estimated Project Funding:	***Amount:***
FY 2020 Actual Funding - Water & Sewer Fund - Well No. 15	$ 12,518.13
FY 2020 Actual Funding - Water & Sewer Fund - Well No. 11	$ 11,843.13
FY 2020 Actual Funding - Water & Sewer Fund - LS No. 9	$ 11,943.13
FY 2021 Approved Funding - Water & Sewer Fund: Emergency Generator Well No. 15	$207,185.00
FY 2021 Approved Funding - Water & Sewer Fund: Emergency Generator Well No. 11	$207,185.00
FY 2021 Approved Funding - Water & Sewer Fund: Emergency Generator LS No. 9	$282,185.00
FY 2022 Requested Budget - Water & Sewer Fund	$150,000.00
Total Allocated/Approved Budget	**$882,859.39**

Expected/Actual Project Costs:	***Amount:***
FY 2020 Project Cost - Actual Engineering & Design - Water & Sewer Fund: Emergency Generator Well No. 15	$ 12,518.13
FY 2020 Project Cost - Actual Engineering & Design - Water & Sewer Fund: Emergency Generator Well No. 11	$ 11,843.13
FY 2020 Project Cost - Actual Engineering & Design - Water & Sewer Fund: Emergency Generator LS No. 9	$ 11,943.13
FY 2021 Project Cost - Actual Remaining Engineering Costs (TO #264) Well 15:	$ 9,356.87
FY 2021 Project Cost - Actual Remaining Engineering Costs (TO #265) Well 11:	$ 9,356.87
FY 2021 Project Cost - Actual Remaining Engineering Costs (TO #267) LS No. 9	$ 9,356.87
FY 2021 Project Cost - Actual Construction Cost - (TO #264) Well 15	$ 76,500.00
FY 2021 Project Cost - Actual Construction Cost - (TO #265) Well 11	$ 77,500.00
FY 2021 Project Cost - Actual Construction Cost - (TO #267) LS No. 9	$ 97,000.00
FY 2021 Project Cost - Actual Construction Cost - General Conditions	$ 15,000.00
FY 2022 Project Cost - Actual Construction Cost - (TO #264) Well 15	$ 50,000.00

FY 2022 Project Cost - Actual Construction Cost - (TO #265) Well 11	$ 50,000.00
FY 2022 Project Cost - Actual Construction Cost - (TO #267) LS No. 9	$ 50,000.00
Total Project Request/Cost	**$480,375.00**

Note: The proposed bid amount submitted by Eau Gallie Electric is lower than the engineer's proposed cost estimate ($657,000) by approximately 37%. The total approved budget for FY 2021 for this project is $846,555; however, staff believes that approximately $266,000.00 will be spent during the FY 2021 fiscal year. This project is expected to roll-over into the next fiscal year (FY 2022) and the remaining funding of $150,00.00 to complete this project is expected to be requested to be approved by the Village council during the upcoming FY 2022 budget process.

The Village will not expend more than the amount within the approved budget as it may be adopted/amended each year for these goods and/or services over the term of this contract.

AGREEMENT
BETWEEN OWNER AND CONTRACTOR
FOR CONSTRUCTION CONTRACT (STIPULATED PRICE)

THIS AGREEMENT is by and between Village of Palm Springs ("Owner") and Eau Gallie Electric ("Contractor").

Owner and Contractor hereby agree as follows:

ARTICLE 1 – WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows:

ARTICLE 2 – THE PROJECT

2.01 The Project, of which the Work under the Contract Documents is a part, is generally described as follows: Emergency Generator Improvements Project.

ARTICLE 3 – ENGINEER

3.01 The part of the Project that pertains to the Work has been designed by Holtz Consulting Engineers, Inc.

3.02 The Owner has retained Holtz Consulting Engineers, Inc. ("Engineer") to act as Owner's representative, assume all duties and responsibilities, and have the rights and authority assigned to Engineer in the Contract Documents in connection with the completion of the Work in accordance with the Contract Documents.

ARTICLE 4 – CONTRACT TIMES

4.01 *Time of the Essence*

A. All time limits for Milestones, if any, Substantial Completion, and completion and readiness for final payment as stated in the Contract Documents are of the essence of the Contract.

4.02 *Contract Times: Days*

A. The Work will be substantially completed within 210 days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 240 days after the date when the Contract Times commence to run.

4.03 *Liquidated Damages*

A. Contractor and Owner recognize that time is of the essence as stated in Paragraph 4.01 above and that Owner will suffer financial and other losses if the Work is not completed and Milestones not achieved within the times specified in Paragraph 4.02 above, plus any extensions thereof allowed in accordance with the Contract. The parties also recognize the delays, expense, and difficulties involved in proving in a legal or arbitration proceeding the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of

requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

1. Substantial Completion: Contractor shall pay Owner $1,000.00 for each day that expires after the time (as duly adjusted pursuant to the Contract) specified in Paragraph 4.02.A above for Substantial Completion until the Work is substantially complete.
2. Completion of Remaining Work: After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract) for completion and readiness for final payment, Contractor shall pay Owner $500.00 for each day that expires after such time until the Work is completed and ready for final payment.
3. Liquidated damages for failing to timely attain Substantial Completion and final completion are not additive and will not be imposed concurrently.

4.04 *Special Damages*

A. In addition to the amount provided for liquidated damages, Contractor shall reimburse Owner (1) for any fines or penalties imposed on Owner as a direct result of the Contractor's failure to attain Substantial Completion according to the Contract Times.

ARTICLE 5 – CONTRACT PRICE

5.01 Owner shall pay Contractor for completion of the Work in accordance with the Contract Documents the amounts that follow, subject to adjustment under the Contract:

A. For all Unit Price Work, an amount equal to the sum of the extended prices (established for each separately identified item of Unit Price Work by multiplying the unit price times the actual quantity of that item):

Unit Price Work					
Item No.	Description	Unit	Estimated Quantity	Unit Price	Extended Price
1	General Conditions	Lump Sum	1	$15,000.00	$15,000.00
2	Lift Station No. 9 Improvements	Lump Sum	1	$147,000.00	$147,000.00
3	Well No. 11 Improvements	Lump Sum	1	$127,500.00	$127,500.00
4	Well No. 15 Improvements	Lump Sum	1	$126,500.00	$126,500.00
Total of all Extended Prices for Unit Price Work (subject to final adjustment based on actual quantities)					$416,000.00

The extended prices for Unit Price Work set forth as of the Effective Date of the Contract are based on estimated quantities. As provided in Paragraph 13.03 of the General Conditions, estimated quantities are not guaranteed, and determinations of actual quantities and classifications are to be made by Engineer.

B. Total of Lump Sum Amount and Unit Price Work (subject to final Unit Price adjustment) $416,000.00.

C. For all Work, at the prices stated in Contractor's Bid, attached hereto as an exhibit.

ARTICLE 6 – PAYMENT PROCEDURES

6.01 *Submittal and Processing of Payments*

A. Contractor shall submit Applications for Payment in accordance with Article 15 of the General Conditions. Applications for Payment will be processed by Engineer as provided in the General Conditions.

6.02 *Progress Payments; Retainage*

A. Owner shall make progress payments on account of the Contract Price on the basis of Contractor's Applications for Payment on or about the 20th day of each month during performance of the Work as provided in Paragraph 6.02.A.1 below, provided that such Applications for Payment have been submitted in a timely manner and otherwise meet the requirements of the Contract. All such payments will be measured by the Schedule of Values established as provided in the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no Schedule of Values, as provided elsewhere in the Contract.

1. Prior to Substantial Completion, progress payments will be made in accordance with Florida Statute 255.078 but, in each case, less the aggregate of payments previously made and less such amounts as Owner may withhold, including but not limited to liquidated damages, in accordance with the Contract

B. Upon Substantial Completion, Owner shall pay an amount sufficient to increase total payments to Contractor to 100 percent of the Work completed, less such amounts set off by Owner pursuant to Paragraph 15.01.E of the General Conditions, and less 200 percent of Engineer's estimate of the value of Work to be completed or corrected as shown on the punch list of items to be completed or corrected prior to final payment.

6.03 *Final Payment*

A. Upon final completion and acceptance of the Work in accordance with Paragraph 15.06 of the General Conditions, Owner shall pay the remainder of the Contract Price as recommended by Engineer as provided in said Paragraph 15.06.

ARTICLE 7 – INTEREST

7.01 All amounts not paid when due shall bear interest at the rate of 1 percent per annum.

ARTICLE 8 – CONTRACTOR'S REPRESENTATIONS

8.01 In order to induce Owner to enter into this Contract, Contractor makes the following representations:

A. Contractor has examined and carefully studied the Contract Documents, and any data and reference items identified in the Contract Documents.

B. Contractor has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and is satisfied as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Contractor is familiar with and is satisfied as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Contractor has carefully studied all: (1) reports of explorations and tests of subsurface conditions at or adjacent to the Site and all drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings, and (2) reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings.

E. Contractor has considered the information known to Contractor itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Contract Documents; and the Site-related reports and drawings identified in the Contract Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor; and (3) Contractor's safety precautions and programs.

F. Based on the information and observations referred to in the preceding paragraph, Contractor agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

G. Contractor is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Contract Documents.

H. Contractor has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Contractor has discovered in the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

I. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

J. Contractor's entry into this Contract constitutes an incontrovertible representation by Contractor that without exception all prices in the Agreement are premised upon performing and furnishing the Work required by the Contract Documents.

ARTICLE 9 – CONTRACT DOCUMENTS

9.01 *Contents*

A. The Contract Documents consist of the following:

1. This Agreement (pages 1 to ___, inclusive).
2. Performance bond (pages ___ to ___, inclusive).
3. Payment bond (pages ___ to ___, inclusive).
4. Other bonds.
    a. ___ (pages ___ to ___, inclusive).
    b. ___ (pages ___ to ___, inclusive).
    c. ___ (pages ___ to ___, inclusive).
5. General Conditions (pages ___ to ___, inclusive).

6. Supplementary Conditions (pages ___ to ___, inclusive).
7. Specifications as listed in the table of contents of the Project Manual.
8. Drawings (not attached but incorporated by reference) consisting of ___ sheets with each sheet bearing the following general title: ___ [or] the Drawings listed on the attached sheet index.
9. Addenda (numbers ___ to ___, inclusive).
10. Exhibits to this Agreement (enumerated as follows):
    a. Contractor's Bid (pages ___ to ___, inclusive).
11. The following which may be delivered or issued on or after the Effective Date of the Contract and are not attached hereto:
    a. Notice to Proceed.
    b. Work Change Directives.
    c. Change Orders.
    d. Field Orders.

B. The documents listed in Paragraph 9.01.A are attached to this Agreement (except as expressly noted otherwise above).

C. There are no Contract Documents other than those listed above in this Article 9.

D. The Contract Documents may only be amended, modified, or supplemented as provided in the General Conditions.

E. To the extent that there exists a conflict between this Agreement and the remaining Contract Documents, the terms, conditions, covenants, and/or provisions of this Agreement shall prevail. Wherever possible, the provisions of such documents shall be construed in such a manner as to avoid conflicts between provisions of the various documents.

ARTICLE 10 – MISCELLANEOUS

10.01 *Terms*

A. Terms used in this Agreement will have the meanings stated in the General Conditions and the Supplementary Conditions.

10.02 *Assignment of Contract*

A. Unless expressly agreed to elsewhere in the Contract, no assignment by a party hereto of any rights under or interests in the Contract will be binding on another party hereto without the written consent of the party sought to be bound; and, specifically but without limitation, money that may become due and money that is due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents.

10.03 *Successors and Assigns*

A. Owner and Contractor each binds itself, its successors, assigns, and legal representatives to the other party hereto, its successors, assigns, and legal representatives in respect to all covenants, agreements, and obligations contained in the Contract Documents.

10.04 *Severability*

A. Any provision or part of the Contract Documents held to be void or unenforceable under any Law or Regulation shall be deemed stricken, and all remaining provisions shall continue to be valid and binding upon Owner and Contractor, who agree that the Contract Documents shall be reformed to replace such stricken provision or part thereof with a valid and enforceable provision that comes as close as possible to expressing the intention of the stricken provision.

10.05 *Contractor's Certifications*

A. Contractor certifies that it has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for or in executing the Contract. For the purposes of this Paragraph 10.05:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process or in the Contract execution;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process or the execution of the Contract to the detriment of Owner, (b) to establish Bid or Contract prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish Bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

10.06 *Indemnity*

A. The parties recognize that the CONTRACTOR is an independent contractor. The CONTRACTOR agrees to assume liability for and indemnify, hold harmless, and defend the VILLAGE, its council members, mayor, officers, employees, agents, and attorneys of, from, and against all liability and expense, including reasonable attorney's fees, in connection with any and all claims, demands, damages, actions, causes of action, and suits in equity of whatever kind or nature, including claims for personal injury, property damage, equitable relief, or loss of use, to the extent caused by the negligence, recklessness, or intentionally wrongful conduct of the CONTRACTOR, its agents, officers, Contractors, subcontractors, employees, or anyone else utilized by the CONTRACTOR in the performance of this Contract. The CONTRACTOR's liability hereunder shall include all attorney's fees and costs incurred by the VILLAGE in the enforcement of this indemnification provision. This includes claims made by the employees of the CONTRACTOR against the VILLAGE and the CONTRACTOR hereby waives its entitlement, if any, to immunity under Section 440.11, Florida Statutes. The obligations contained in this provision shall survive termination of this Contract and shall not be limited by the amount of any insurance required to be obtained or maintained under this Contract.

B. Subject to the limitations set forth in this Section, CONTRACTOR shall assume control of the defense of any claim asserted by a third party against the VILLAGE and, in connection with such defense, shall appoint lead counsel, in each case at the CONTRACTOR's expense. The VILLAGE shall have the right, at its option, to participate in the defense of any third party claim, without relieving CONTRACTOR of any of its obligations hereunder. If the CONTRACTOR assumes control of the defense of any third party claim in accordance with this paragraph, the CONTRACTOR shall obtain the prior written consent of the VILLAGE before entering into any settlement of such claim. Notwithstanding anything to the contrary in this Section, the CONTRACTOR shall not assume or maintain control of the defense of any third party claim, but shall pay the fees of counsel retained by the VILLAGE and all expenses, including experts' fees, if (i) an adverse determination with respect to the third party claim would, in the good faith judgment of the VILLAGE, be detrimental in any material respect to the VILLAGE's reputation; (ii) the third party claim seeks an injunction or equitable relief against the VILLAGE; or (iii) the CONTRACTOR has failed or is failing to prosecute or defend vigorously the third party claim. Each party shall cooperate, and cause its agents to cooperate, in the defense or prosecution of any third party claim and shall furnish or cause to be furnished such records and information, and attend such conferences, discovery proceedings, hearings, trials, or appeals, as may be reasonably requested in connection therewith.

C. It is the specific intent of the parties hereto that the foregoing indemnification complies with Section 725.06, Florida Statutes, as amended. CONTRACTOR expressly agrees that it will not claim, and waives any claim, that this indemnification violates Section 725.06, Florida Statues. Nothing contained in the foregoing indemnification shall be construed as a waiver of any immunity or limitation of liability the VILLAGE may have under the doctrine of sovereign immunity or Section 768.28, Florida Statutes.

10.07 *Governing Law and Remedies*

A. The validity of this Agreement and of any of its terms or provisions, as well as the rights and duties of the parties hereunder, shall be governed by the laws of the State of Florida and venue for any and all disputes related to or arising from this Agreement shall be in Palm Beach County, Florida.

B. No remedy herein conferred upon any party is intended to be exclusive of any other remedy, and each and every such remedy shall be cumulative and shall be in addition to every other remedy given hereunder or now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder shall preclude any other or further exercise thereof.

10.08 *Office of the Inspector General*

A. Palm Beach County has established the Office of the Inspector General, which is authorized and empowered to review past, present, and proposed County programs, contracts, transactions, accounts and records. The Inspector General (IG) has the power to subpoena witnesses, administer oaths, require the production of records, and monitor existing projects and programs. The Inspector General may, on a random basis, perform audits on all Village contracts.

10.09 *Scrutinized Companies*

A. Company certifies that it and its subcontractors are not on the Scrutinized Companies that Boycott Israel List and are not engaged in the boycott of Israel. Pursuant to section 287.135, Florida Statutes, the Village may immediately terminate this Agreement at its sole option if the Company or any of its subcontractors are found to have submitted a false

certification; or if the Company or any of its subcontractors, are placed on the Scrutinized Companies that Boycott Israel List or is engaged in the boycott of Israel during the term of this Agreement.

B. The Company agrees to observe the above requirements for applicable subcontracts entered into for the performance of work under this Agreement. The Company agrees that the certifications in this section shall be effective and relied upon by the Village for the term of this Agreement, including any and all renewals. The Company agrees that if it or any of its subcontractors' status changes in regards to any certification herein, the Company shall immediately notify the Village of the same. As provided in Subsection 287.135(8), Florida Statutes, if federal law ceases to authorize the above-stated contracting prohibitions then they shall become inoperative.

10.10 *Public Records*

A. The CONTRACTOR shall comply with Florida's Public Records Act, Chapter 119, Florida Statutes, and, if determined to be acting on behalf of the Village as provided under section 119.011(2), Florida Statutes, specifically agrees to:

1. Keep and maintain public records required by the Village to perform the service.

2. Upon request from the Village's custodian of public records or designee, provide the Village with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.

3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of this Contract and following completion of this Contract if the Contractor does not transfer the records to the Village.

4. Upon completion of this Contract, transfer, at no cost, to the Village all public records in possession of the Contractor or keep and maintain public records required by the Village to perform the service. If the Contractor transfers all public records to the Village upon completion of the Contract, the Contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the Contractor keeps and maintains public records upon completion of the Contract, the Contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the Village, upon request from the Village's custodian of public records or designee, in a format that is compatible with the information technology systems of the Village.

IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONSULTANT'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS OR DESIGNEE AT 561-434-5084, kwynn@vpsfl.org, OR BY MAIL AT VILLAGE OF PALM SPRINGS, 226 CYPRESS LANE, PALM SPRINGS, FL 33461.

10.11 *Insurance*

A. The limits of liability for insurance required by Paragraph 6.03 of the General Conditions shall provide coverage for not less that the following amounts or greater where required by Law and Regulations:

1. Workers' Compensation, and related coverages under Paragraphs 6.03.A.1 and A.2 of the General Conditions:

a.	State	Statutory
b.	Applicable Federal	Statutory
c.	Employer Liability:	
	Bodily injury, each accident	$1,000,000
	Bodily injury by disease, each employee	$500,000
	Bodily injury/disease aggregate	$1,000,000
d.	Foreign voluntary worker compensation	Statutory

2. Contractor's Commercial General Liability under Paragraphs 6.03.B and 6.03.C of the General Conditions:

a.	General Aggregate	$2,000,000
b.	Products – Completed Operations Aggregate	$2,000,000
c.	Personal and Advertising Injury	$1,000,000
d.	Each Occurrence (Bodily Injury and Property Damage)	$1,000,000

3. Automobile Liability under paragraph 6.03.D of the General Conditions:

a.	Bodily Injury:	
	Each Person	$500,000
	Each Accident	$1,000,000
b.	Property Damage:	
	Each Incident	$1,000,000

4. Umbrella of Excess Liability under paragraph 6.03.E of the General Conditions:

a.	Excess or Umbrella Liability	
	1) General Aggregate	$5,000,000
	2) Each Occurrence	$1,000,000

5. Contractor's Pollution Liability under paragraph 6.03.F of the General Conditions:

a.	Contractor's Pollution Liability	
	1) General Aggregate	$2,000,000
	2) Each Occurrence	$1,000,000

6. Additional Insureds include the respective officers, partners, directors, employees, agents, consultants, and subconsultants of the following firms and municipal government(s):

   a. Village of Palm Springs

10.12 *Public Construction Bond*

A. If the contract amount exceeds $200,000 in total construction cost, the CONTRACTOR must provide the VILLAGE with a public construction bond in accordance with section 255.05, Florida Statutes. Said bond must be recorded in the Official Records in and for Palm Beach County and a copy of the recorded bond must be provided to the VILLAGE prior to the CONTRACTOR providing any services under the contract. The VILLAGE reserves the right to

request a bond for any work which is less than $200,000. The cost of the bond shall be a direct pass through cost to the VILLAGE without any mark-up by the CONTRACTOR.

B. The public construction bond shall be on forms attached hereto as Exhibit "B" or substantially similar as approved by the VILLAGE. The bond shall be in an amount not less than the total contract price and shall incorporate by reference the terms of the Contract Documents in their entirety.

C. To be acceptable to the VILLAGE, a Surety Company shall comply with the following provisions:

a. The Surety Company shall have a currently valid Certificate of Authority, issued by the State of Florida Department of Insurance, authorizing it to write surety bonds in the State of Florida.

b. The Surety Company shall have a currently valid Certificate of Authority issued by the United States Department of Treasury under Sections 9304 to 9308 of Title 31 of the United States Code.

c. The Surety Company shall be in full compliance with the provisions of the Florida Insurance Code.

d. The Surety Company shall have at least twice the minimum surplus and capital required by the Florida Insurance Code at the time the contract is approved.

e. The Surety Company shall have at least the ratings of A-/Class V in the latest issue of Best's Key Rating Guide.

f. The Surety Company shall not expose itself to any loss on any one risk in an amount exceeding ten (10) percent of its surplus to policyholders, provided:

1) Any risk or portion of any risk being reinsured shall be deducted in determining the limitation of the risk as prescribed in this section. These minimum requirements shall apply to the reinsuring carrier providing authorization or approval by the State of Florida, Department of Insurance to do business in this state have been met.

2) In the case of the surety insurance company, in addition to the deduction for reinsurance, the amount assumed by any co-surety, the value of any security deposited, pledged or held subject to the consent of the surety and for the protection of the surety shall be deducted.

10.13 *Audit by Village*

A. The CONTRACTOR shall maintain adequate records to justify all charges, expenses, and costs incurred in estimating and performing the Services for at least three (3) years after completion of the Contract. The CONTRACTOR shall permit the VILLAGE, or any authorized representatives of the VILLAGE, at all reasonable times, access to and the right to examine all records, books, papers or documents related to the CONTRACTOR's performance under this Agreement including, but not limited to, expenses for sub-contractors, agents or assistants, direct and indirect charges for work performed and detailed documentation for all such work performed or to be performed under this Agreement.

10.14 *Copies of Data/Documents*

A. Copies or original documents prepared by the CONTRACTOR in relation to work associated with this Agreement shall be provided to the VILLAGE. Data collected, stored, and/or provided shall be in a form acceptable to the VILLAGE and agreed upon by the VILLAGE.

10.15 *Ownership*

A. Each and every report, draft, work product, map, record, and other document reproduced, prepared, or caused to be prepared by the CONTRACTOR pursuant to or in connection with this Agreement shall be the exclusive property of the VILLAGE.

10.16 *Limitations of Liability*

A. Under no circumstances shall either party be liable to the other for any consequential, incidental, special, punitive, or any other form of indirect or non-compensatory damages.

10.17 *Enforcement Costs*

A. All parties shall be responsible for their own attorneys' fees, court costs and expenses if any legal action or other proceeding is brought for any dispute, disagreement, or issue of construction or interpretation arising hereunder whether relating to the Agreement's execution, validity, the obligations provided therein, or performance of this Agreement, or because of an alleged breach, default or misrepresentation in connection with any provisions of this Agreement.

10.18 *Copyrights and/or Patent Rights*

A. CONTRACTOR warrants that there has been no violation of copyrights and/or patent rights in the manufacturing, producing or selling of the goods, shipped or ordered, as a result of this Agreement and the CONTRACTOR agrees to hold the Village harmless from any and all liability, loss, or expense occasioned by any such violation.

10.19 *Protection of Property*

A. The CONTRACTOR shall at all times guard against damage or loss to the property of the VILLAGE or of other vendors or contractors and shall be held responsible for replacing or repairing any such loss or damage. The VILLAGE may withhold payment or make such deductions as deemed necessary to insure reimbursement or replacement for loss or damage to property through negligence of the successful CONTRACTOR or its agents. The CONTRACTOR shall be responsible to safeguard all of their property such as tools and equipment while on site. The VILLAGE will not be held responsible for any loss of CONTRACTOR property due to theft or vandalism.

10.20 *Damage to Persons or Property*

A. The responsibility for all damage to person or property arising out of or on account of Scope of Work done under this Contract shall rest upon the CONTRACTOR.

10.21 *Discrimination*

A. The CONTRACTOR warrants and represents that all of its employees are treated equally during employment without regard to race, color, religion, disability, sex, age, national origin, ancestry, political affiliation, marital status, handicap, or sexual orientation. Further, CONTRACTOR shall not discriminate or permit discrimination against any employee or an applicant for employment on the basis of race, color, sex, religion, political affiliation, natural origin, ancestry, marital status, sexual orientation or handicap.

10.22 *Construction Defects*

A. PURSUANT TO SECTION 558.005, FLORIDA STATUTES, ANY CLAIMS FOR CONSTRUCTION DEFECTS ARE NOT SUBJECT TO THE NOTICE AND CURE PROVISIONS OF CHAPTER 558, FLORIDA STATUTES.

10.23 *Public Entity Crimes*

A. Contractor acknowledges and agrees that a person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid, proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier or sub-contractor under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statues, for CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list. The Contractor will advise the Village immediately if it becomes aware of any violation of this statute.

10.24 *Scrutinized Companies*

A. Contractor certifies that it and its subcontractors are not on the Scrutinized Companies that Boycott Israel List and are not engaged in the boycott of Israel. Pursuant to section 287.135, Florida Statutes, the City may immediately terminate this Agreement at its sole option if the Contractor or any of its subcontractors are found to have submitted a false certification; or if the Contractor or any of its subcontractors, are placed on the Scrutinized Companies that Boycott Israel List or is engaged in the boycott of Israel during the term of this Agreement.

B. If this Agreement is for one million dollars or more, the Contractor certifies that it and its subcontractors are also not on the Scrutinized Companies with Activities in Sudan List, Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged in business operations in Cuba or Syria as identified in Section 287.135, Florida Statutes. Pursuant to Section 287.135, the City may immediately terminate this Agreement at its sole option if the Contractor, or any of its subcontractors are found to have submitted a false certification; or if the Contractor or any of its subcontractors are placed on the Scrutinized Companies with Activities in Sudan List, or Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or are or have been engaged with business operations in Cuba or Syria during the term of this Agreement.

C. The Contractor agrees to observe the above requirements for applicable subcontracts entered into for the performance of work under this Agreement.

D. The Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the term of this Agreement, including any and all renewals.

E. The Contractor agrees that if it or any of its subcontractors' status changes in regards to any certification herein, the Contractor shall immediately notify the City of the same.

F. As provided in Subsection 287.135(8), Florida Statutes, if federal law ceases to authorize the above-stated contracting prohibitions then they shall become inoperative.

10.25 *E-Verify*

A. Pursuant to Section 448.095(2), Florida Statutes, beginning on January 1, 2021, the CONTRACTOR shall:

1. Register with and use the E-Verify system to verify the work authorization status of all newly hired employees and require all Subcontractors (providing services or receiving funding under this Agreement) to register with and use the E-Verify system to verify the work authorization status of all the Subcontractors' newly hired employees;

2. Secure an affidavit from all Subcontractors (providing services or receiving funding under this Agreement) stating that the Subcontractor does not employ, contract with,

or subcontract with an "unauthorized alien" as defined in Section 448.095(1)(k), Florida Statutes;

3. Maintain copies of all Subcontractor affidavits for the duration of this Agreement and provide the same to the Owner upon request;
4. Comply fully, and ensure all of its Subcontractors comply fully, with Section 448.095, Florida Statutes;
5. Be aware that a violation of Section 448.09, Florida Statutes (Unauthorized aliens; employment prohibited) shall be grounds for termination of this Agreement; and,
6. Be aware that if the Owner terminates this Agreement under Section 448.095(2)(c), Florida Statutes, the Contractor may not be awarded a contract for at least 1 year after the date on which the Agreement is terminated and will be liable for any additional costs incurred by the Village as a result of the termination of the Agreement.

VILLAGE OF PALM SPRINGS
PALM SPRINGS, FL
ITB NO. 2021B-004
EMERGENCY GENERATOR IMPROVEMENTS

ADVERTISEMENT FOR BIDS

Sealed Bids for the construction of the **Emergency Generator Improvements** Project will be received, by the **Village of Palm Springs**, at the office of the **Palm Springs Village Clerk**, until **2:00 PM** local time on **February 18, 2021**, at which time the Bids received will be publicly opened and read. The Project consists of constructing emergency generators, automatic transfer switches, and all other appurtenances necessary for a complete installation at Lift Station No. 9, Well No. 11, and Well No. 15.

Bidding Documents may be viewed and downloaded online www.vpsfl.org or www.demandstar.org. Hard copies of bidding Documents may be obtained from Holtz Consulting Engineers, Inc. on Mondays through Fridays between the hours of 8:00 AM and 5:00 PM. Bidding Documents are available on compact disc (as portable document format (PDF) files) for a non-refundable charge of $ 25.00 , including shipping via overnight express service. Alternatively, printed Bidding Documents may be obtained from Holtz Consulting Engineers, Inc. either via in-person pick-up or via mail, upon receipt of payment for the Bidding Documents. The non-refundable cost of printed Bidding Documents is $80.00 per set, payable to "Holtz Consulting Engineers, Inc.".

A virtual pre-bid conference will be held at **2:00 PM** local time on **January 27, 2021** via GoToMeeting. Attendance at the pre-bid conference **is not** mandatory.

Bid security shall be furnished in accordance with the Instructions to Bidders.

Any questions regarding the specifications and Solicitation process must be submitted in writing to the Village Clerk at kwynn@vpsfl.org, Questions and requests for clarification and additional information must be received prior to the Deadline for Submission of Questions on **February 5, 2021** AT 5:00 PM local time.

Pursuant to Section 2-355 of Palm Beach County Ordinance No. 2011-039, and the purchasing policies of the Village of Palm Springs, all Solicitations, once advertised, are under the "Cone of Silence" until the appropriate authority has approved an award recommendation, rejected all responses or some other action by the Village to end the selection process. This limits and requires documentation of communications between potential Bidders and/or Bidders on Village Solicitations, the Village's professional staff, and the Village Council members.

Failure to provide the above listed items may result in your bid being deemed non-responsive.

BID FORM

ARTICLE 1 – BID RECIPIENT

1.01 This Bid is submitted to:

VILLAGE OF PALM SPRINGS

C/O Kimberly Wynn, Village Clerk

226 Cypress Lane, Palm Springs, FL 33461

1.02 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2 – BIDDER'S ACKNOWLEDGEMENTS

2.01 Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security. This Bid will remain subject to acceptance for 120 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

ARTICLE 3 – BIDDER'S REPRESENTATIONS

3.01 In submitting this Bid, Bidder represents that:

A. Bidder has examined and carefully studied the Bidding Documents, and any data and reference items identified in the Bidding Documents, and hereby acknowledges receipt of the following Addenda:

Addendum No.	Addendum, Date
1	2-1-21

B. Bidder has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and satisfied itself as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Bidder is familiar with and has satisfied itself as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and any Site-related reports and drawings identified in the Bidding Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder; and (3) Bidder's safety precautions and programs.

E. Bidder agrees, based on the information and observations referred to in the preceding paragraph, that no further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of this Bid for performance of the Work at the price bid and within the times required, and in accordance with the other terms and conditions of the Bidding Documents.

F. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

G. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and confirms that the written resolution thereof by Engineer is acceptable to Bidder.

H. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance and furnishing of the Work.

I. The submission of this Bid constitutes an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article, and that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

ARTICLE 4 – BIDDER'S CERTIFICATION

4.01 Bidder certifies that:

A. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation;

B. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid;

C. Bidder has not solicited or induced any individual or entity to refrain from bidding; and

D. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 4.01.D:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the e execution of the Contract.

ARTICLE 5 – BASIS OF BID

5.01 Bidder will complete the Work in accordance with the Contract Documents for the following price(s):

UNIT PRICE BID

Item No.	Description	Unit	Estimated Quantity	Bid Unit Price	Bid Price
1	General Conditions	Lump Sum	1	$15,000.00	$15,000.00
2	Lift Station No. 9 Improvements	Lump Sum	1	$147,000.00	$147,000.00
3	Well No. 11 Improvements	Lump Sum	1	$127,500.00	$127,500.00
4	Well No. 15 Improvements	Lump Sum	1	$126,500.00	$126,500.00
Total of All Unit Price Bid Items					$ 416,000.00

Bidder acknowledges that (1) each Bid Unit Price includes an amount considered by Bidder to be adequate to cover Contractor's overhead and profit for each separately identified item, and (2) estimated quantities are not guaranteed, and are solely for the purpose of comparison of Bids, and final payment for all unit price Bid items will be based on actual quantities, determined as provided in the Contract Documents.

Total Bid Price (written) four hundred sixteen thousand and 00/100 dollars

ARTICLE 6 – TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete within 210 calendar days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 240 calendar days after the date when the Contract Times commence to run.

6.02 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 7 – ATTACHMENTS TO THIS BID

7.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. List of Proposed Subcontractors;

C. List of Proposed Suppliers;

D. List of Project References;

E. Evidence of authority to do business in the state of the Project; or a written covenant to obtain such license within the time for acceptance of Bids;

F. Contractor's License No.: _____ **[or]** Evidence of Bidder's ability to obtain a State Contractor's License and a covenant by Bidder to obtain said license within the time for acceptance of Bids;

G. Required Bidder Qualification Statement with supporting data; and

ARTICLE 8 – DEFINED TERMS

8.01 The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 9 – BID SUBMITTAL

The changes, additions, substitutions, and/or deletions contained in Addendum No. 3 are hereby made a part of the Bid Documents for the **Emergency Generator Improvements**, fully and completely as if the same were fully set forth herein.

QUESTIONS FROM BIDDERS

1. **Question:** What I/O signals are requested?

Answer: 4 discrete signals including Generator Running, Generator Fault, Generator Low fuel Alert, ATS in Normal Position

2. **Question:** Will other manufacturers besides Tradewinds will be considered for the generator?

Answer: Yes. Cummins, CAT, and Generac will be considered as equal.

3. **Question:** The concrete slab on site 9 is to be repainted and the new concrete painted to match. Do you want the other sites #11 and 15 to have the slabs painted?

Answer: No, the other sites do not have to have the concrete painted.

4. **Question:** On drawing E-8 the panelboards are all listed as Nema 3 R enclosures. All the other new equipment (CPT, Disconnect and ATS) are to be nema 4 X. Do you want the panelboards to be nema 4X?

Answer: Provide either 3R 316SS or 4X 316 SS

5. **Question:** Tradewinds is shown as specified generator manufacturer. Drawings show ATS's mounted on H frame, Tradewinds tends to include the ATS's internally in generator enclosure. Please clarify intent to have them separate from generator or if they can be internal in enclosure will they still need to be 4X316SS?

Answer: Provide separate ATS per plans and ATS spec.

6. **Question:** Can Cummins be used as an equal or superior generator supplier if submittals are sent in with the bid?

Answer: Yes. Cummins, CAT, and Generac will be considered as equal.

7. **Question:** How long can the control panels be without power before pumps or mobile generators are required?

Answer: The control panels can be without permanent FPL power for up to 2 hours. During the 2-hour period, the Owner will provide temporary power via portable generators or temporary bypass pumping. The Contractor will be required to schedule and coordinate with Engineer and Owner.

8. **Question:** Ground rod specs state all to be 20' X 5/8" however detail on E-9 Pipestand shows 10' X 5/8". Please clarify.

Answer: Provide 20' long (two 10' with coupler for 20' long 5/8" electrodes).

9. **Question:** Specification section 01400, 1.04, items F & G, I understand the concrete testing (#3), please confirm that the other items listed do not apply to this project.

Answer: Density testing and concrete cylinder testing for the concrete slabs is the only testing required under this section.

10. **Question:** Generator specifications, 16203-3, item G. Is this meant for the manufacturer of the generator to include or the contractor to add after receipt. If contractor to supply, please clarify manufacturer and model and where they are to be placed in the unit.

Answer: Generator Vendor needs to provide this, if shipped loose they need to instruct electrical contractor where and how to connect this to unit.

11. **Question:** Who is responsible for programing of the RTU I/O inputs?
Answer: The Contractor is responsible for landing the I/O wires in the existing RTUs. The Owner will be responsible for the programming.

12. **Question:** Will the low bid evaluation be done on a per site basis or cumulatively?

Answer: The low bid will be calculated by the cumulative total of all the work at all three sites.

13. **Question:** All electrical conduit above ground is acceptable with PVC schedule 80 or is metal conduit required.
Answer: Schedule 80 PVC is acceptable.

14. **Question:** Is Owner responsible for hiring RTU contractor to tie generators into RTU System or is contractor responsible? If so provide RTU contractor contact.

Answer: The Contractor is responsible for landing the I/O wires in the existing RTUs. The Owner will be responsible for the programming.

15. **Question:** Per virtual pre-bid meeting it was mentioned that additional generator manufactures would be accepted and not just Tradewinds.

Answer: Yes. Cummins, CAT, and Generac will be considered as equal.

16. **Question:** Is project FEMA funded? Are there any special payment disclosures?

Answer: There are no grant funds or special payment disclosures included in this project.

17. **Question:** With major equipment long lead times in excess of 180 days, when will the notice to proceed be issued?

Answer: Additional contract time will be added if the Contractor can provide documentation on the long lead time of equipment beyond the Contractor's control.

IN THE SPECIFICATIONS

1. Bid due date has changed from 2:00 PM local time on March 18, 2021 to 2:00 PM local time on March 25, 2021.

Receipt acknowledged and conditions agreed to the 22 day of March, 2021.

Signature Kim A. Lanham	Signature ; Jill Bennett
Title Witness	Title ; Witness

Note: Addresses are to be used for giving any required notice.
Provide execution by any additional parties, such as joint venturers, if necessary.

1. Bidder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to pay to Owner upon default of Bidder the penal sum set forth on the face of this Bond. Payment of the penal sum is the extent of Bidder's and Surety's liability. Recovery of such penal sum under the terms of this Bond shall be Owner's sole and exclusive remedy upon default of Bidder.

2. Default of Bidder shall occur upon the failure of Bidder to deliver within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents.

3. This obligation shall be null and void if:

3.1 Owner accepts Bidder's Bid and Bidder delivers within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents, or

3.2 All Bids are rejected by Owner, or

3.3 Owner fails to issue a Notice of Award to Bidder within the time specified in the Bidding Documents (or any extension thereof agreed to in writing by Bidder and, if applicable, consented to by Surety when required by Paragraph 5 hereof).

4. Payment under this Bond will be due and payable upon default of Bidder and within 30 calendar days after receipt by Bidder and Surety of written notice of default from Owner, which notice will be given with reasonable promptness, identifying this Bond and the Project and including a statement of the amount due.

5. Surety waives notice of any and all defenses based on or arising out of any time extension to issue Notice of Award agreed to in writing by Owner and Bidder, provided that the total time for issuing Notice of Award including extensions shall not in the aggregate exceed 120 days from the Bid due date without Surety's written consent.

6. No suit or action shall be commenced under this Bond prior to 30 calendar days after the notice of default required in Paragraph 4 above is received by Bidder and Surety and in no case later than one year after the Bid due date.

7. Any suit or action under this Bond shall be commenced only in a court of competent jurisdiction located in the state in which the Project is located.

8. Notices required hereunder shall be in writing and sent to Bidder and Surety at their respective addresses shown on the face of this Bond. Such notices may be sent by personal delivery, commercial courier, or by United States Registered or Certified Mail, return receipt requested, postage pre-paid, and shall be deemed to be effective upon receipt by the party concerned.

9. Surety shall cause to be attached to this Bond a current and effective Power of Attorney evidencing the authority of the officer, agent, or representative who executed this Bond on behalf of Surety to execute, seal, and deliver such Bond and bind the Surety thereby.

10. This Bond is intended to conform to all applicable statutory requirements. Any applicable requirement of any applicable statute that has been omitted from this Bond shall be deemed to be included herein as if set forth at length. If any provision of this Bond conflicts with any applicable statute, then the provision of said statute shall govern and the remainder of this Bond that is not in conflict therewith shall continue in full force and effect.

11. The term "Bid" as used herein includes a Bid, offer, or proposal as applicable.

OLD REPUBLIC SURETY COMPANY

POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS: That OLD REPUBLIC SURETY COMPANY, a Wisconsin stock insurance corporation, does make, constitute and appoint: ALBERT R. COUNSELMAN, ALBERT H. MICHAELS, MICHELE ALBAN, STEPHEN J. MAINELLO, HOSSAY MATTIN, SEAN P. KIRWAN, MICHELLE L. WILSON of BALTIMORE, MD

its true and lawful Attorney(s)-in-Fact, with full power and authority for and on behalf of the company as surety, to execute and deliver and affix the seal of the company thereto (if a seal is required), bonds, undertakings, recognizances or other written obligations in the nature thereof, ***(other than bail bonds, bank depository bonds, mortgage deficiency bonds, mortgage guaranty bonds, guarantees of installment paper and note guaranty bonds, self-insurance workers compensation bonds guaranteeing payment of benefits, asbestos abatement contract bonds, waste management bonds, hazardous waste remediation bonds or black lung bonds),*** as follows:

ALL WRITTEN INSTRUMENTS

and to bind OLD REPUBLIC SURETY COMPANY thereby, and all of the acts of said Attorneys-in-Fact, pursuant to these presents, are ratified and confirmed. This appointment is made under and by authority of the board of directors at a special meeting held on February 18, 1982.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following resolutions adopted by the board of directors of the OLD REPUBLIC SURETY COMPANY on February 18,1982.

RESOLVED that, the president, any vice-president or assistant vice president, in conjunction with the secretary or any assistant secretary, may appoint attorneys-in-fact or agents with authority as defined or limited in the instrument evidencing the appointment in each case, for and on behalf of the company to execute and deliver and affix the seal of the company to bonds, undertakings, recognizances, and suretyship obligations of all kinds; and said officers may remove any such attorney-in-fact or agent and revoke any Power of Attorney previously granted to such person.

RESOLVED FURTHER, that any bond, undertaking, recognizance, or suretyship obligation shall be valid and binding upon the Company

(i) when signed by the president, any vice president or assistant vice president, and attested and sealed (if a seal be required) by any secretary or assistant secretary; or

(ii) when signed by the president, any vice president or assistant vice president, secretary or assistant secretary, and countersigned and sealed (if a seal be required) by a duly authorized attorney-in-fact or agent; or

(iii) when duly executed and sealed (if a seal be required) by one or more attorneys-in-fact or agents pursuant to and within the limits of the authority evidenced by the Power of Attorney issued by the company to such person or persons.

RESOLVED FURTHER that the signature of any authorized officer and the seal of the company may be affixed by facsimile to any Power of Attorney or certification thereof authorizing the execution and delivery of any bond, undertaking, recognizance, or other suretyship obligations of the company; and such signature and seal when so used shall have the same force and effect as though manually affixed.

IN WITNESS WHEREOF, OLD REPUBLIC SURETY COMPANY has caused these presents to be signed by its proper officer, and its corporate seal to be affixed this 24th day of March, 2020.

NONCOLLUSION AFFIDAVIT

TO: The Village of Palm Springs, herein called the "Owner."

Pursuant to bidding requirements for the work titled "Emergency Generator Improvements, Bid #2021B-004," the enclosed contract documents shall be provided to the Owner.

State of Florida

County of Brevard

Christopher Hughes, being first duly
(Officer's Name)

sworn, deposes, and says that:

A. He/She is President (officer's title) of Eau Gallie Electric, Inc (company name), the Bidder that has submitted the attached bid;

B. He/She is fully informed respecting the preparation and contents of the attached bid and of all pertinent circumstances respecting such bid;

C. Such bid is genuine and is not a collusive or sham bid;

D. Neither the said Bidder nor any of its officers, partners, owners, agents, representatives, employees, or parties in interest, including this affiant, has in any way colluded, conspired, connived, or agreed, directly or indirectly with any other Bidder, firm, or person to submit a collusive or sham bid in connection with the contract for which the attached bid has been submitted or to refrain from bidding in connection with such contract, or has in any manner, directly or indirectly, sought by agreement or collusion or communication or conference with any other Bidder, firm, or person to fix the price or prices in the attached bid or of any other Bidder, or to fix any overhead, profit, or cost element of the bid price or the bid price of any other Bidder, or to secure through any collusion, conspiracy, connivance, or unlawful agreement any advantage against the /
or any person interested in the proposed contract; and

E. The price or prices quoted in the attached bid are fair and proper and are not tainted by any collusion, conspiracy, connivance, or unlawful agreement on the part of the Bidder or any of its agents, representatives, owners, employees, or parties in interest, including this affiant.

SECTION 00454
DRUG-FREE WORKPLACE CERTIFICATE

I, the undersigned, in accordance with Florida Statute 287.087, hereby certify that EAU Gallie Electric (Print or Type Name of Firm)

- Publishes a written statement notifying that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.
- Informs employees about the dangers of drug abuse in the workplace; the firm's policy of maintaining a drug-free working environment and available drug counseling, rehabilitation, and employee assistance programs; and the penalties that may be imposed upon employees for drug-use violations.
- Gives each employee engaged in providing commodities or contractual services that are under bid or proposal a copy of the statement specified above.
- Notifies the employees that as a condition of working on the commodities or contractual services under bid or proposal, the employee will abide by the terms of the statement and will notify the employer of any conviction of or plea of guilty or nolo contendere to any violation of Chapter 1893 or any controlled substance law of the State of Florida or the United States for a violation occurring in the workplace, no later than 5 days after such conviction, and requires employees to sign copies of such written statement to acknowledge their receipt.
- Imposes a sanction on or requires the satisfactory participation in a drug-abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.
- Makes a good faith effort to continue to maintain a drug-free workplace through the implementation of the drug-free workplace program.

"As a person authorized to sign this statement, I certify that the business, firm, or corporation named above complies fully with the requirements set forth herein."

My Commission Expires 8-30-24

SECTION 00455
SWORN STATEMENT UNDER SECTION 287.133(3)(a),
FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES

(To be signed in the presence of a notary public or other officer authorized to administer oaths.)

STATE OF Florida

COUNTY OF Brevard

Before me, the undersigned authority, personally appeared Christoper Hughes, who, being by me first duly sworn, made the following statement:

1. The business address of Eau Gallie Electric (firm name of Bidder/Contractor) is 2012 Aurora Road, Melbourne FL 32935.

2. My relationship to Eau Gallie Electric (firm name of Bidder/Contractor) is President (relationship such as sole proprietor, partner, president, vice president)

3. I understand that a "public entity crime" as defined in Section 287.133 of the Florida Statutes includes a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity in Florida or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or such an agency or political subdivision and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

4. I understand that "convicted" or "conviction" is defined by the statute to mean a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

5. I understand that "affiliate" is defined by the statute to mean (1) a predecessor or successor of a person or a corporation convicted of a public entity crime; or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime; or (3) those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate; or (4) a person or corporation who knowingly entered into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months.

6. Neither the Bidder/Contractor nor any officer, director, executive, partner, shareholder, employee, member or agent who is active in the management of the Bidder/Contractor, nor any affiliate of the Bidder/Contractor, has been convicted of public entity crime subsequent to July 1, 1989.

(Draw a line through Paragraph 6 if Paragraph 7 below applies.)

7. There has been a conviction of a public entity crime by the Bidder/Contractor, or an officer, director, executive, partner, shareholder, employee, member or agent of the Bidder/Contractor who is active in the management of the Bidder/Contractor or an affiliate of the Bidder/Contractor. A determination has been made pursuant to Section 287.133(3) by order of the Division of Administrative Hearings that it is not in the public interest for the name of the convicted person or affiliate to appear on the convicted vendor list. The name of the convicted person or affiliate is NA.

A copy of the order of the Division of Administrative Hearings is attached to this statement.

(Draw a line through Paragraph 7 if Paragraph 6 above applies.)

[signature], President

SECTION 00456
SCRUTINIZED COMPANIES CERTIFICATION FORM

By execution below, I, Christopher Hughes, on behalf of Eau Gallie Electric (hereinafter, the "Contractor"), hereby swear or affirm to the following certifications:

The following certifications apply to all procurements:

1. The Contractor has reviewed section 215.4725, Florida Statutes, section 215.473, Florida Statutes and section 287.135, Florida Statutes, and understands the same.
2. The Contractor is not on the Scrutinized Companies that Boycott Israel List nor is the Contractor engaged in a boycott of Israel.
3. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
4. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

If the contract awarded hereunder is for one million dollars or more, the following additional certifications apply:

1. The Contractor is not on the Scrutinized Companies with Activities in Sudan List.
2. The Contractor is not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.
3. The Contractor is not engaged in business operations in Cuba or Syria.
5. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
6. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

CONTRACTOR: Eau Gallie Electric
By: [signature]
Name: Christopher Hughes
Title: President
Date: 3-16-21

STATE OF FLORIDA
COUNTY OF Brevard

The foregoing instrument was sworn to (or affirmed) and subscribed before this 16 day of March, 2021, by Christopher Hughes who is the President of Eau Gallie Electric, who is personally known to me or who has produced Ø as identification.

CITY OF COCOA BEACH – LIFT STATION GENERATOR REPLACEMENT
Brad Kalsow, City of Cocoa Beach Water Reclamation Department
321-302-2608 bkalsow@cityofcocoabeach.com

$463,840 Completed: November 2020 Duration: 250 days
Scope: Installed generators and ATSs at 5 Lift Station sites. Completed on time.

NOAA/ AOML MIAMI EMERGENCY GENERATOR PROJECT
Andrew Colegrove, Atlantic Oceanographic & Meteorological Laboratory
305-361-4544 aoml.associate.director@noaa.gov

$886,365 Completed: September 2020 Duration: 90 days
Scope: Install a 750kw generator with an 800A automatic transfer switch and 10,000 Gallon fuel tank. Also included a new panel MD and Transformer TX-G & 30A 600V disconnect installed on the new generator service platform, new circuit breaker MCB, service entrance main circuit breaker with surge suppression. Completed on time.

CITY OF NAPLES WASTEWATER SWITCHGEAR & MCC REPLACEMENT
Barry Stein, City of Naples 239-213-4732 bstein@naplesgov.com

$1,180,885 Completed: November 2019
Scope: Replaced switchgear that operates a 480/277V, 3PH, 4-wire in a double-ended Main-Tie-Main/Gen arrangement, with each end powered from the same 1500kva utility transformer. Replaced two MCCs that provide power for waste-water pumps, wastewater processing equipment and onsite pump station. Completed on time.

TAMPA BAY WATER – PASCO WELL #49 – GENERATOR REPLACEMENT
Justin Fox, Tampa Bay Water 813-929-4565 JFox@tampabaywater.org

$1,138,300 Completed: October 2019 Duration: 355 days
Scope: Installed a 1250kw CAT generator with a 10,000 gallon fuel tank, a 225kva transformer and a medium voltage switch. Completed on time.

CITY OF MELBOURNE REVERSE OSMOSIS WTP–TRANSFORMER REPLACEM'T
Jennifer Spagnoli, City of Melbourne Engineering Department
321-608-7100 Jennifer.Spagnoli@mlbfl.org

$732,519 Completed: September 2017 Duration: 210 days
Scope: Replace two FPL pad mounted transformers, install new underground concrete encased duct bank and pull boxes, add a neutral bus to switchgear.

Eau Gallie Electric is celebrating its 73rd anniversary in 2021

We are also proud to announce that Eau Gallie Electric has installed more than 1650 generators & transfer switches within the past 10 years!

COMPANY PROFILE

Eau Gallie Electric, Inc is a full-service State Certified General Contractor and Unlimited Electrical contractor serving Florida since 1948. Eau Gallie Electric is family owned and a certified Service Disabled Veteran Owned Business. Mr. Christopher V. Hughes is the owner and president of Eau Gallie Electric. Mr. Hughes is a graduate of the United States Military Academy at West Point with a degree in Mechanical Engineering. He is also a State Certified Unlimited Electrical contractor, primary license holder for Eau Gallie Electric (EC13003441), as well as a Professional Engineer in the State of Florida (PE74016). Eau Gallie Electric also holds a State Certified General Contractors license (CGC1526728).

SERVICES

Eau Gallie Electric offers its customers quality specialty contracting solutions, including electrical construction, energy infrastructure, emergency standby power and facilities maintenance services. Our Services Include:

- Complete electrical distribution systems
- Emergency stand-by generators sales, installation, and maintenance from 5-KW to 6,000-KW
- Design build applications from conceptual to construction documents
- Electrical engineering including signed and sealed documents
- Medium voltage cable installation, transformer replacements
- Lighting and electrical upgrade projects
- Power upgrades and signed and sealed drawings
- UPS, inverter, battery backup, solar systems
- NAVAIDS and Communications in support of the NAS

US Department of Veterans Affairs
Lake Baldwin VA Medical Center
5201 Raymond St
Orlando, FL
(407) 629-1599
Contact: Scott Reed, Electrical Supervisor
Scott.reed@va.gov

Complete renovation of hospital emergency power system, including paralleling (1) new 750kW generator with two older existing 600kW generator sets complete with all new 3000A paralleling switchgear. Also includes installation of two 1600A ASCO transfer switches and 1200A panel boards. Included the installation of new 1600A main electrical service to the B&G building as well as new electrical service to the fire pump. Generator accessory installations included retrofit of existing muffler, fuel system, and communication equipment. Temporary backup power was provided to the hospital at all times.

Florida Department of Transportation
District 1 Headquarters
801 N. Broadway Ave
Bartow, Florida 33830
(863) 519-2461
Contact: Chad Lewis, Facilities
Chad.lewis@dot.state.fl.us

Complete design-build project to back up entire 3 story FDOT District 1 Headquarters building which is the central data collection and communications for critical government infrastructure. Project included the installation of 2000A transfer switch with an 800kW generator with 3000 gallon sub-base fuel tank, site prep and concrete pad, new 2000A electrical service from the utility company, and all necessary engineering design drawings.

FDOT Orlando – Generator & Main Electrical Breaker Panel Replacement
133 S. Semoran Blvd., Orlando 32801
(386) 943-5512
Contact: Dave Clarke

Remove and Replace the existing emergency generator and the main electrical breaker panel at the FDOT Orlando Office Complex located at 133 S. Semoran Blvd., Orlando, Fl.
Installed a 600kw generator, 208Volts, 3 Phase, 4 Wire, 60 Hz at 1800 RPM, with a main UL circuit breaker, 2500 amp, CAT EMCP Control panel with safety shutdowns, engine controls and gauges and 2,500-Gallon, UL 142, FDEP sub base fuel tank.

Seacoast Utility Authority
4200 Hood Rd
Palm Beach Gardens, FL
(772) 219-2944
Contact: John Eason, Consulting Engineer

Turnkey installation of new 1500kW generator and main breaker service. Included concrete work, all new louvers, new day tank and fuel piping, new complete 316 stainless steel exhaust system, new roof on the generator building, and new wiring into existing transfer switch. Included removal, refurbishment, and complete functional testing of the 2000A main breaker to the water plant which was performed with no loss of power to active water plant.

HOLTZ CONSULTING ENGINEERS, INC

April 26, 2021

Mr. Paul Ward
Utilities Superintendent
Village of Palm Springs
360 Davis Road
Palm Springs, FL 33461

Subject: **Bid No. 2021B-004 – Emergency Generator Improvements**
Recommendation to Award

Dear Mr. Ward,

On March 25, 2021 at 2:00 p.m. bids were opened for the referenced project. There were six (6) bids accepted for the project as follows:

Bidder	Bid Amount	Acknowledged Addenda?	Included Bid Security?	Completed All Items in Bid Submission Checklist?
Cruz Electrical Corp.	$243,700.00	Y	Y	N
Eau Gallie Electric, Inc.	$416,000.00	Y	Y	Y
All Florida Contracting Services, LLC.	$478,650.00	Y	Y	Y
Hinterland Group, Inc.	$486,300.00	Y	Y	Y
Zabatt Engine Services, Inc.	$541,732.00	Y	Y	Y
Lawrence Lee Construction, Inc.	$553,000.00	Y	Y	Y

The bids were reviewed by Holtz Consulting Engineers, Inc. (HCE) to evaluate whether the bids are responsive to the bid submittal requirements.

The apparent lower bidder was Cruz Electrical Corp. with a Total Bid Amount of $243,700.00. Their bid was reviewed and included the required bid bond in the amount of five percent of their bid from an acceptable surety company according to the US Department of Treasury. They acknowledged receipt of the addenda in the bid form.

However, Cruz Electrical Corp. did not complete all the items in the Bid Submission Checklist including listing all subcontractors and providing the required financial information outlined in the Qualifications

Statement list of Required Attachments. Due to the incomplete information provided, we must recommend that this bid be rejected as the bid is not considered to be responsive.

The second apparent lower bidder was Eau Gallie Electric, Inc. with a Total Bid Amount of $416,000.00. Their bid was reviewed and included the required bid bond in the amount of five percent of their bid from an acceptable surety company according to the US Department of Treasury. They acknowledged receipt of the addenda in the bid form. The other forms and information required to be submitted with their bid appear to be in order. We therefore consider the bid submitted by Eau Gallie Electric, Inc. to be responsive.

Eau Gallie Electric, Inc. has successfully completed numerous utility construction projects in South Florida, including similar projects for local utilities. The references contacted indicated that they completed their projects generally on time, under budget and in conformance with the contract documents. Eau Gallie Electric, Inc. is a corporation in good standing with the Florida Department of State Division of Corporations. We therefore consider Eau Gallie Electric, Inc. to be a responsible bidder.

Based on the above information, Holtz Consulting Engineers, Inc. considers Eau Gallie Electric, Inc. to be the low responsive and responsible bidder and recommends that they be awarded the contract for the Emergency Generator Improvements Project in the Total Bid Amount of $416,000.00.

Sincerely,

HOLTZ CONSULTING ENGINEERS, INC.

Stephen Fowler, P.E.

GENERAL ELECTRICAL NOTES

1. **SCHEMATIC NATURE**
PLAN VIEWS ARE SCHEMATIC IN NATURE AND MEANT TO SHOW THE SCHEMATIC ARRANGEMENT OF EQUIPMENT AND CONDUIT.

2. **APPROVED SHOP DRAWINGS**
USE APPROVED SHOP DRAWINGS FOR LAY OUT OF EQUIPMENT. THE CONTRACT DOCUMENTS WILL VARY FROM THE SHOP DRAWINGS. INFORM THE ENGINEER IMMEDIATELY IF THERE ARE LAY OUT ISSUES OR INADEQUATE SPACE FOR EQUIPMENT OR CLEARANCES. LAND CONDUITS IN OPENINGS OF ENCLOSURES PER THE APPROVED SHOP DRAWINGS, DO NOT USE THE CONTRACT DRAWINGS.

3. **CLEARANCES**
IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO MEET N.E.C. CLEARANCES ABOUT EQUIPMENT. THE SAME APPLIES TO RACEWAY SUPPORTS.

4. **ROUTING**
CONDUIT ROUTING IS SCHEMATIC IN NATURE. CONDUIT ROUTING IS SHOWN FOR CLARITY ON THE CONTRACT DRAWINGS. ROUTE CONDUITS AS MAY BE REQUIRED. PROVIDE PULL BOXES AS REQUIRED PER NEC.

5. **FUTURES FACILITIES**
WHERE FUTURE FACILITIES ARE INDICATED. CONDUIT ROUTING SHALL ACCOUNT FOR SUCH FACILITIES.

6. **RESPONSIBILITIES**
BIDDERS, SUPPLIERS, EQUIPMENT VENDORS, GENERAL CONTRACTOR, SUB CONTRACTORS AND OTHER SIMILAR ENTITIES ARE REQUIRED TO READ ALL THE CONTRACT DOCUMENTS INCLUDING DRAWINGS AND SPECIFICATIONS.

7. **HOME RUNS**
CONTRACTOR SHALL COORDINATE HOME RUNS BETWEEN PLAN VIEWS. WHERE ANY CONDUIT IS SHOWN IN ANY PLAN VIEW IT SHALL BE INSTALLED THE ENTIRE LENGTH AS MAY BE REQUIRED.

8. **FIELD VERIFICATIONS**
FIELD VERIFY ALL EXISTING CONDITIONS. MAKE MINOR ADJUSTMENTS AS NEEDED. INFORM OWNER/ENGINEER OF INCONSISTENCIES IMMEDIATELY IF PROBLEMS OR CONFLICTS EXIST.

9. **COMPLETE AND FUNCTIONAL SYSTEMS**
PROVIDE ALL LABOR AND MATERIAL FOR A COMPLETE AND FUNCTIONAL SYSTEM. DEMONSTRATE SYSTEM OPERATION TO THE OWNER/ENGINEER.

10. **GROUNDING**
PROVIDE GROUNDING SYSTEM AS INDICATED ON DRAWINGS AND BY NEC. ALL POWER RACEWAYS REQUIRE GROUNDING CONDUCTORS. BONDING THROUGH RACEWAY SYSTEMS SHALL BE CONTINUOUS FROM MAIN SWITCH GROUND BUSES TO PANEL GROUND BARS, FROM PANEL GROUND BARS TO BRANCH CIRCUIT OUTLETS, MOTORS, LIGHTS, ETC. THESE GROUND CONDUCTORS ARE REQUIRED THROUGHOUT THE PROJECT REGARDLESS OF WHETHER CONDUIT RUNS SHOW GROUND CONDUCTORS ON DRAWINGS.

11. **CONTRACTOR MINIMUM REQUIREMENTS**
PROVIDE AND INSTALL A COMPLETE ELECTRICAL SYSTEM AS INDICATED ON THE DRAWINGS. ITEMS NOT SHOWN BUT OBVIOUSLY NECESSARY FOR A COMPLETE SYSTEM SHALL BE INCLUDED.

THE CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS, INSPECTIONS AND APPROVALS.

ALL WORK SHALL CONFORM TO THE NATIONAL ELECTRICAL CODE, NFPA, AND THE LOCAL BUILDING CODES. ALL COMPONENTS SHALL BE U.L. APPROVED.

CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL CONCEALED FACILITIES BEFORE ANY WORK BEGINS.

12. **SCOPE OF WORK**
A. COORDINATE NEW ELECTRICAL EQUIPMENT.
B. DEMO EXISTING EQUIPMENT.
C. INSTALL NEW EQUIPMENT.
D. RESTORE AREAS TO ORIGINAL CONDITION.

13. **CONDUIT**
CONDUIT SIZES AS SHOWN ON THE DRAWINGS ARE MINIMUM. THE CONTRACTOR MAY INCREASE AS REQUIRED FOR EASE OF PULLING.

ALL EXPOSED CONDUIT SHALL BE NEATLY INSTALLED AND RUN PARALLEL OR PERPENDICULAR TO STRUCTURAL ELEMENTS. SUPPORTS AND MOUNTING HARDWARE SHALL BE 316 SS. CONDUITS SHALL HAVE BURRS REMOVED WITH A REAMER. CONDUITS ENTERING CABINETS SHALL HAVE LOCK NUTS INSIDE AND OUT UNLESS ENTRANCE IS THREADED. NYLON INSULATED BUSHING SHALL BE USED ON ALL CONDUIT TERMINATIONS.

ALL UNDERGROUND CONDUITS SHALL BE INSTALLED 24" BELOW FINAL GRADE.

ALL BURIED CONDUIT SHALL BE PVC UNLESS INDICATED; SERVICE CONDUIT SHALL BE PVC SCHEDULE 80 OR RIGID GALVANIZED STEEL.

14. **JUNCTION BOXES**
PROVIDE ADDITIONAL BOXES AS MAY BE REQUIRED. PROVIDE NEMA 3R OUTSIDE.

15. **CONDUCTORS**
CONDUCTORS SHALL BE COPPER STRANDED TYPE THWN WITH 75°C RISE INSULATION.

GROUNDING CONDUCTORS SHALL BE TINNED COPPER 600V RATED #6 MINIMUM GAUGE.

MULTICONDUCTOR LABELS SHALL BE STRANDED 14 GAUGE, 600V, THWN INSULATED WITH PVC JACKET.

16. **SHUT DOWNS**
CONTRACTOR SHALL COORDINATE ANY POWER DOWNTIME WITH FPL AND THE OWNER. ANY POWER DOWN TIME SHALL BE APPROVED BY THE OWNER.

17. **RESTORATION**
CONTRACTOR SHALL RESTORE TO ORIGINAL CONDITION ALL FACILITIES HE DISTURBS. CONTRACTOR SHALL PROVIDE CLEANUP, AND PROPER DISPOSAL, AND PAY ALL FEES FOR ALL DEMOLISHED MATERIALS AND THE LIKE.

18. **WARRANTY**
CONTRACTOR SHALL WARRANT LABOR AND MATERIALS FOR A PERIOD OF ONE (1) YEAR FROM THE OWNER'S ACCEPTANCE OF THE COMPLETED PROJECT.

19. **STATION CONTROL PANEL & RTU**
EXISTING LSCP & RTU SHALL REMAIN, PROVIDE TEMP. POWER TO KEEP STATION OPERATIONAL AS REQUIRED.

VILLAGE OF PALM SPRINGS
PALM SPRINGS, FL
ITB NO. 2021B-004
EMERGENCY GENERATOR IMPROVEMENTS

ADVERTISEMENT FOR BIDS

Sealed Bids for the construction of the **Emergency Generator Improvements** Project will be received, by the **Village of Palm Springs**, at the office of the **Palm Springs Village Clerk**, until **2:00 PM** local time on **February 18, 2021**, at which time the Bids received will be publicly opened and read. The Project consists of constructing emergency generators, automatic transfer switches, and all other appurtenances necessary for a complete installation at Lift Station No. 9, Well No. 11, and Well No. 15.

Bidding Documents may be viewed and downloaded online www.vpsfl.org or www.demandstar.org. Hard copies of bidding Documents may be obtained from Holtz Consulting Engineers, Inc. on Mondays through Fridays between the hours of 8:00 AM and 5:00 PM. Bidding Documents are available on compact disc (as portable document format (PDF) files) for a non-refundable charge of $ 25.00 , including shipping via overnight express service. Alternatively, printed Bidding Documents may be obtained from Holtz Consulting Engineers, Inc. either via in-person pick-up or via mail, upon receipt of payment for the Bidding Documents. The non-refundable cost of printed Bidding Documents is $80.00 per set, payable to "Holtz Consulting Engineers, Inc.".

A virtual pre-bid conference will be held at **2:00 PM** local time on **January 27, 2021** via GoToMeeting. Attendance at the pre-bid conference **is not** mandatory.

Bid security shall be furnished in accordance with the Instructions to Bidders.

Any questions regarding the specifications and Solicitation process must be submitted in writing to the Village Clerk at kwynn@vpsfl.org, Questions and requests for clarification and additional information must be received prior to the Deadline for Submission of Questions on **February 5, 2021** AT 5:00 PM local time.

Pursuant to Section 2-355 of Palm Beach County Ordinance No. 2011-039, and the purchasing policies of the Village of Palm Springs, all Solicitations, once advertised, are under the "Cone of Silence" until the appropriate authority has approved an award recommendation, rejected all responses or some other action by the Village to end the selection process. This limits and requires documentation of communications between potential Bidders and/or Bidders on Village Solicitations, the Village's professional staff, and the Village Council members.

ARTICLE 1 – DEFINED TERMS

1.01 Terms used in these Instructions to Bidders have the meanings indicated in the General Conditions and Supplementary Conditions. Additional terms used in these Instructions to Bidders have the meanings indicated below:

A. *Issuing Office* – The office from which the Bidding Documents are to be issued.

ARTICLE 2 – COPIES OF BIDDING DOCUMENTS

2.01 Complete sets of the Bidding Documents may be obtained from the Issuing Office in the number and format stated in the advertisement or invitation to bid.

2.02 Complete sets of Bidding Documents shall be used in preparing Bids; neither Owner nor Engineer assumes any responsibility for errors or misinterpretations resulting from the use of incomplete sets of Bidding Documents.

2.03 Owner and Engineer, in making copies of Bidding Documents available on the above terms, do so only for the purpose of obtaining Bids for the Work and do not authorize or confer a license for any other use.

ARTICLE 3 – QUALIFICATIONS OF BIDDERS

3.01 To demonstrate Bidder's qualifications to perform the Work, Bidder shall submit with its Bid (a) written evidence establishing its qualifications such as financial data, previous experience, present commitments, and other such information as may be called for in Section 00451, and (b) the following additional information:

A. Evidence of Bidder's authority to do business in the State of Florida.

B. State of Florida contractor license number.

C. [Subcontractor and Supplier qualification information; coordinate with provisions of Article 12 of these Instructions, "Subcontractors, Suppliers, and Others."]

D. Provide a minimum of five (5) similar projects which have been completed within the past ten (10) years per Section 00315 - Bidder Qualifications Questionnaire, Article 12, including project description, final project cost, owner's name, address, and phone number. A similar project shall be defined as installation of an emergency generator with fuel tank and automatic transfer switch for a municipal or government facility in Florida.

3.02 A Bidder's failure to submit required qualification information within the times indicated may disqualify Bidder from receiving an award of the Contract.

3.03 No requirement in this Article 3 to submit information will prejudice the right of Owner to seek additional pertinent information regarding Bidder's qualifications.

3.04 Bidder is advised to carefully review those portions of the Bid Form requiring Bidder's representations and certifications.

ARTICLE 4 – SITE AND OTHER AREAS; EXISTING SITE CONDITIONS; EXAMINATION OF SITE; OWNER'S SAFETY PROGRAM; OTHER WORK AT THE SITE

4.01 *Site and Other Areas*

A. The Site is identified in the Bidding Documents. By definition, the Site includes rights-of-way, easements, and other lands furnished by Owner for the use of the Contractor. Any

additional lands required for temporary construction facilities, construction equipment, or storage of materials and equipment, and any access needed for such additional lands, are to be obtained and paid for by Contractor.

4.02 *Existing Site Conditions*

A. Subsurface and Physical Conditions; Hazardous Environmental Conditions

1. The Supplementary Conditions identify:

a. those reports known to Owner of explorations and tests of subsurface conditions at or adjacent to the Site, if any.

b. those drawings known to Owner of physical conditions relating to existing surface or subsurface structures at the Site (except Underground Facilities), if any.

2. Owner will make copies of reports and drawings referenced above available to any Bidder on request. These reports and drawings are not part of the Contract Documents, but the Technical Data contained therein upon whose accuracy Bidder is entitled to rely, as provided in the General Conditions, has been identified and established in the Supplementary Conditions. Bidder is responsible for any interpretation or conclusion Bidder draws from any Technical Data or any other data, interpretations, opinions, or information contained in such reports or shown or indicated in such drawings.

3. If the Supplementary Conditions do not identify Technical Data, the default definition of Technical Data set forth in Article 1 of the General Conditions will apply.

B. Underground Facilities: Information and data shown or indicated in the Bidding Documents with respect to existing Underground Facilities at or adjacent to the Site are set forth in the Contract Documents and are based upon information and data furnished to Owner and Engineer by owners of such Underground Facilities, including Owner, or others.

C. Adequacy of Data: Provisions concerning responsibilities for the adequacy of data furnished to prospective Bidders with respect to subsurface conditions, other physical conditions, and Underground Facilities, and possible changes in the Bidding Documents due to differing or unanticipated subsurface or physical conditions appear in Paragraphs 5.03, 5.04, and 5.05 of the General Conditions. Provisions concerning responsibilities for the adequacy of data furnished to prospective Bidders with respect to a Hazardous Environmental Condition at the Site, if any, and possible changes in the Contract Documents due to any Hazardous Environmental Condition uncovered or revealed at the Site which was not shown or indicated in the Drawings or Specifications or identified in the Contract Documents to be within the scope of the Work, appear in Paragraph 5.06 of the General Conditions.

NOTE(S) TO USER:

1. *The Technical Data upon which Bidder may rely should be identified in the Supplementary Conditions (see discussion in the Note following Paragraph 4.02 above, with respect to subsurface conditions, and in the Commentary, EJCDC® C-001).*

2. *In the event there are no data of the types referred to, it may be appropriate to revise the paragraphs above, and expressly state that there are no such data.*

4.03 *Site Visit and Testing by Bidders*

A. On request, the Owner will provide the Bidder access to the Site visit during normal working hours. Bidder shall not disturb any ongoing operations at the Site.

B. On request, and to the extent Owner has control over the Site, and schedule permitting, the Owner will provide Bidder access to the Site to conduct such additional examinations, investigations, explorations, tests, and studies as Bidder deems necessary for preparing and submitting a successful Bid. Owner will not have any obligation to grant such access if doing so is not practical because of existing operations, security or safety concerns, or restraints on Owner's authority regarding the Site.

C. Bidder shall comply with all applicable Laws and Regulations regarding excavation and location of utilities, obtain all permits, and comply with all terms and conditions established by Owner or by property owners or other entities controlling the Site with respect to schedule, access, existing operations, security, liability insurance, and applicable safety programs.

D. Bidder shall fill all holes and clean up and restore the Site to its former condition upon completion of such explorations, investigations, tests, and studies.

E. Bidder shall not disturb any ongoing operations at the Site.

ARTICLE 5 – BIDDER'S REPRESENTATIONS

5.01 It is the responsibility of each Bidder before submitting a Bid to:

A. examine and carefully study the Bidding Documents, and any data and reference items identified in the Bidding Documents;

B. visit the Site, conduct a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and satisfy itself as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work;

C. become familiar with and satisfy itself as to all Laws and Regulations that may affect cost, progress, and performance of the Work;

D. carefully study all: (1) reports of explorations and tests of subsurface conditions at or adjacent to the Site and all drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings, and (2) reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings;

E. consider the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and the Site-related reports and drawings identified in the Bidding Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder; and (3) Bidder's safety precautions and programs;

F. agree, based on the information and observations referred to in the preceding paragraph, that at the time of submitting its Bid no further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of its Bid for performance of the

Work at the price bid and within the times required, and in accordance with the other terms and conditions of the Bidding Documents;

G. become aware of the general nature of the work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents;

H. promptly give Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder discovers in the Bidding Documents and confirm that the written resolution thereof by Engineer is acceptable to Bidder;

I. determine that the Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance and furnishing of the Work; and

J. agree that the submission of a Bid will constitute an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article, that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

ARTICLE 6 – PRE-BID CONFERENCE

6.01 A pre-Bid conference will be held at the time and location stated in the invitation or advertisement to bid. Representatives of Owner and Engineer will be present to discuss the Project. Bidders are encouraged to attend and participate in the conference. Owner will transmit to all prospective Bidders of record such Addenda as Owner and Engineer considers necessary in response to questions arising at the conference. Oral statements may not be relied upon and will not be binding or legally effective.

ARTICLE 7 – INTERPRETATIONS AND ADDENDA

7.01 All questions about the meaning or intent of the Bidding Documents are to be submitted to Owner in writing to the email address stated in the invitation or advertisement to bid. Interpretations or clarifications considered necessary by Owner or Engineer in response to such questions will be issued by Addenda delivered to all parties recorded as having received the Bidding Documents. Questions received less than seven days prior to the date for opening of Bids may not be answered. Only questions answered by Addenda will be binding. Oral and other interpretations or clarifications will be without legal effect.

7.02 Addenda may be issued to clarify, correct, supplement, or change the Bidding Documents.

ARTICLE 8 – BID SECURITY

8.01 A Bid must be accompanied by Bid security made payable to Owner in an amount of 5 percent of Bidder's maximum Bid price (determined by adding the base bid and all alternates) and in the form of a certified check, bank money order, or a Bid bond (on the form included in the Bidding Documents) issued by a surety meeting the requirements of Paragraphs 6.01 and 6.02 of the General Conditions.

8.02 The Bid security of the apparent Successful Bidder will be retained until Owner awards the contract to such Bidder, and such Bidder has executed the Contract Documents, furnished the required contract security, and met the other conditions of the Notice of Award, whereupon the Bid security will be released. If the Successful Bidder fails to execute and deliver the Contract Documents and furnish the required contract security within 15 days after the Notice of Award, Owner may consider Bidder to be in default, annul the Notice of Award, and the Bid security of

that Bidder will be forfeited. Such forfeiture shall be Owner's exclusive remedy if Bidder defaults.

8.03 The Bid security of other Bidders that Owner believes to have a reasonable chance of receiving the award may be retained by Owner until the earlier of seven days after the Effective Date of the Contract or 121 days after the Bid opening, whereupon Bid security furnished by such Bidders will be released.

8.04 Bid security of other Bidders that Owner believes do not have a reasonable chance of receiving the award will be released within seven days after the Bid opening.

ARTICLE 9 – CONTRACT TIMES

9.01 The number of days within which, or the dates by which, the Work is to be substantially completed, and completed and ready for final payment, are set forth in the Agreement.

ARTICLE 10 – LIQUIDATED DAMAGES

10.01 Provisions for liquidated damages, if any, for failure to timely attain a Milestone, Substantial Completion, or completion of the Work in readiness for final payment, are set forth in the Agreement.

ARTICLE 11 – SUBSTITUTE AND "OR-EQUAL" ITEMS

11.01 The Contract for the Work, as awarded, will be on the basis of materials and equipment specified or described in the Bidding Documents, and those "or-equal" or substitute or materials and equipment subsequently approved by Engineer prior to the submittal of Bids and identified by Addendum. No item of material or equipment will be considered by Engineer as an "or-equal" or substitute unless written request for approval has been submitted by Bidder and has been received by Engineer at least 15 days prior to the date for receipt of Bids. Each such request shall comply with the requirements of Paragraphs 7.04 and 7.05 of the General Conditions. The burden of proof of the merit of the proposed item is upon Bidder. Engineer's decision of approval or disapproval of a proposed item will be final. If Engineer approves any such proposed item, such approval will be set forth in an Addendum issued to all prospective Bidders. Bidders shall not rely upon approvals made in any other manner.

11.02 All prices that Bidder sets forth in its Bid shall be based on the presumption that the Contractor will furnish the materials and equipment specified or described in the Bidding Documents, as supplemented by Addenda. Any assumptions regarding the possibility of post-Bid approvals of "or-equal" or substitution requests are made at Bidder's sole risk.

ARTICLE 12 – SUBCONTRACTORS, SUPPLIERS, AND OTHERS

12.01 A Bidder shall be prepared to retain specific Subcontractors, Suppliers, or other individuals or entities for the performance of the Work if required by the Bidding Documents (most commonly in the Specifications) to do so. If a prospective Bidder objects to retaining any such Subcontractor, Supplier, or other individual or entity, and the concern is not relieved by an Addendum, then the prospective Bidder should refrain from submitting a Bid.

12.02 Subsequent to the submittal of the Bid, Owner may not require the Successful Bidder or Contractor to retain any Subcontractor, Supplier, or other individual or entity against which Contractor has reasonable objection.

12.03 Unless otherwise required to be submitted with the Bid, the apparent Successful Bidder, and any other Bidder so requested, shall within five days after Bid opening, submit to Owner a list of the Subcontractors or Suppliers for which such identification is required

Such list shall be accompanied by an experience statement with pertinent information regarding similar projects and other evidence of qualification for each such Subcontractor, Supplier, or other individual or entity. If Owner or Engineer, after due investigation, has reasonable objection to any proposed Subcontractor, Supplier, individual, or entity, Owner may, before the Notice of Award is given, request apparent Successful Bidder to submit an acceptable substitute, in which case apparent Successful Bidder shall submit a substitute, Bidder's Bid price will be increased (or decreased) by the difference in cost occasioned by such substitution, and Owner may consider such price adjustment in evaluating Bids and making the Contract award.

12.04 If apparent Successful Bidder declines to make any such substitution, Owner may award the Contract to the next lowest Bidder that proposes to use acceptable Subcontractors, Suppliers, or other individuals or entities. Declining to make requested substitutions will constitute grounds for forfeiture of the Bid security of any Bidder. Any Subcontractor, Supplier, individual, or entity so listed and against which Owner or Engineer makes no written objection prior to the giving of the Notice of Award will be deemed acceptable to Owner and Engineer subject to subsequent revocation of such acceptance as provided in Paragraph 7.06 of the General Conditions.

ARTICLE 13 – PREPARATION OF BID

13.01 The Bid Form is included with the Bidding Documents.

A. All blanks on the Bid Form shall be completed in ink and the Bid Form signed in ink. Erasures or alterations shall be initialed in ink by the person signing the Bid Form. A Bid price shall be indicated for each section, Bid item, alternate, adjustment unit price item, and unit price item listed therein.

B. If the Bid Form expressly indicates that submitting pricing on a specific alternate item is optional, and Bidder elects to not furnish pricing for such optional alternate item, then Bidder may enter the words "No Bid" or "Not Applicable."

13.02 A Bid by a corporation shall be executed in the corporate name by a corporate officer (whose title must appear under the signature), accompanied by evidence of authority to sign. The corporate address and state of incorporation shall be shown.

13.03 A Bid by a partnership shall be executed in the partnership name and signed by a partner (whose title must appear under the signature), accompanied by evidence of authority to sign. The partnership's address for receiving notices shall be shown.

13.04 A Bid by a limited liability company shall be executed in the name of the firm by a member or other authorized person and accompanied by evidence of authority to sign. The state of formation of the firm and the firm's address for receiving notices shall be shown.

13.05 A Bid by an individual shall show the Bidder's name and address for receiving notices.

13.06 A Bid by a joint venture shall be executed by an authorized representative of each joint venturer in the manner indicated on the Bid Form. The joint venture's address for receiving notices shall be shown.

13.07 All names shall be printed in ink below the signatures.

13.08 The Bid shall contain an acknowledgment of receipt of all Addenda, the numbers of which shall be filled in on the Bid Form.

13.09 Postal and e-mail addresses and telephone number for communications regarding the Bid shall be shown.

13.10 The Bid shall contain evidence of Bidder's authority and qualification to do business in the state where the Project is located, or Bidder shall covenant in writing to obtain such authority and qualification prior to award of the Contract and attach such covenant to the Bid. Bidder's state contractor license number, if any, shall also be shown on the Bid Form.

ARTICLE 14 – BASIS OF BID

14.01 *Lump Sum*

A. Bidders shall submit a Bid on a lump sum basis as set forth in the Bid Form.

14.02 *Unit Price*

A. Bidders shall submit a Bid on a unit price basis for each item of Work listed in the unit price section of the Bid Form.

B. The "Bid Price" (sometimes referred to as the extended price) for each unit price Bid item will be the product of the "Estimated Quantity" (which Owner or its representative has set forth in the Bid Form) for the item and the corresponding "Bid Unit Price" offered by the Bidder. The total of all unit price Bid items will be the sum of these "Bid Prices"; such total will be used by Owner for Bid comparison purposes. The final quantities and Contract Price will be determined in accordance with Paragraph 13.03 of the General Conditions.

C. Discrepancies between the multiplication of units of Work and unit prices will be resolved in favor of the unit prices. Discrepancies between the indicated sum of any column of figures and the correct sum thereof will be resolved in favor of the correct sum.

14.03 *Allowances*

A. For cash allowances the Bid price shall include such amounts as the Bidder deems proper for Contractor's overhead, costs, profit, and other expenses on account of cash allowances, if any, named in the Contract Documents, in accordance with Paragraph 13.02.B of the General Conditions.

ARTICLE 15 – SUBMITTAL OF BID

15.01 With each copy of the Bidding Documents, a Bidder is furnished one separate unbound copy of the Bid Form, and, if required, the Bid Bond Form. The unbound copy of the Bid Form is to be completed and submitted with the Bid security and the other documents required to be submitted under the terms of Article 7 of the Bid Form.

15.02 A Bid shall be received no later than the date and time prescribed and at the place indicated in the advertisement or invitation to bid and shall be enclosed in a plainly marked package with the Project title (and, if applicable, the designated portion of the Project for which the Bid is submitted), the name and address of Bidder, and shall be accompanied by the Bid security and other required documents. If a Bid is sent by mail or other delivery system, the sealed envelope containing the Bid shall be enclosed in a separate package plainly marked on the outside with the notation "BID ENCLOSED." A mailed Bid shall be addressed to 226 Cypress Lane, Palm Springs, FL 33461.

15.03 Bids received after the date and time prescribed for the opening of bids, or not submitted at the correct location or in the designated manner, will not be accepted and will be returned to the Bidder unopened.

15.04 The following documents shall be submitted with and made a part of the Bid:

Section 00430 Bid Bond
Section 00431 Tabulation of Subcontractor and Suppliers
Section 00440 Florida Trench Safety Act Certification
Section 00451 Qualifications Statement
Section 00452 Bidder's Statement of Disputes, Litigation, Arbitration, and Surety Completion
Section 00453 Noncollusion Affidavit
Section 00454 Drug-Free Workplace Certificate
Section 00455 Sworn Statement on Public Entity Crimes

ARTICLE 16 – MODIFICATION AND WITHDRAWAL OF BID

16.01 A Bid may be withdrawn by an appropriate document duly executed in the same manner that a Bid must be executed and delivered to the place where Bids are to be submitted prior to the date and time for the opening of Bids. Upon receipt of such notice, the unopened Bid will be returned to the Bidder.

16.02 If a Bidder wishes to modify its Bid prior to Bid opening, Bidder must withdraw its initial Bid in the manner specified in Paragraph 16.01 and submit a new Bid prior to the date and time for the opening of Bids.

16.03 If within 24 hours after Bids are opened any Bidder files a duly signed written notice with Owner and promptly thereafter demonstrates to the reasonable satisfaction of Owner that there was a material and substantial mistake in the preparation of its Bid, that Bidder may withdraw its Bid, and the Bid security will be returned. Thereafter, if the Work is rebid, that Bidder will be disqualified from further bidding on the Work.

ARTICLE 17 – OPENING OF BIDS

17.01 Bids will be opened at the time and place indicated in the advertisement or invitation to bid and, unless obviously non-responsive, read aloud publicly. An abstract of the amounts of the base Bids and major alternates, if any, will be made available to Bidders after the opening of Bids.

ARTICLE 18 – BIDS TO REMAIN SUBJECT TO ACCEPTANCE

18.01 All Bids will remain subject to acceptance for the period of time stated in the Bid Form, but Owner may, in its sole discretion, release any Bid and return the Bid security prior to the end of this period.

ARTICLE 19 – EVALUATION OF BIDS AND AWARD OF CONTRACT

19.01 Owner reserves the right to reject any or all Bids, including without limitation, nonconforming, nonresponsive, unbalanced, or conditional Bids. Owner will reject the Bid of any Bidder that Owner finds, after reasonable inquiry and evaluation, to not be responsible. If Bidder purports to add terms or conditions to its Bid, takes exception to any provision of the Bidding Documents, or attempts to alter the contents of the Contract Documents for purposes of the Bid, then the Owner will reject the Bid as nonresponsive; provided that Owner also reserves the right to waive all minor informalities not involving price, time, or changes in the Work.

19.02 If Owner awards the contract for the Work, such award shall be to the responsible Bidder submitting the lowest responsive Bid.

19.03 Evaluation of Bids

A. In evaluating Bids, Owner will consider whether or not the Bids comply with the prescribed requirements, and such alternates, unit prices, and other data, as may be requested in the Bid Form or prior to the Notice of Award.

B. In the comparison of Bids, alternates will be applied in the same order of priority as listed in the Bid Form. To determine the Bid prices for purposes of comparison, Owner shall announce to all bidders a "Base Bid plus alternates" budget after receiving all Bids, but prior to opening them. For comparison purposes alternates will be accepted, following the order of priority established in the Bid Form, until doing so would cause the budget to be exceeded. After determination of the Successful Bidder based on this comparative process and on the responsiveness, responsibility, and other factors set forth in these Instructions, the award may be made to said Successful Bidder on its base Bid and any combination of its additive alternate Bids for which Owner determines funds will be available at the time of award.

19.04 In evaluating whether a Bidder is responsible, Owner will consider the qualifications of the Bidder and may consider the qualifications and experience of Subcontractors and Suppliers proposed for those portions of the Work for which the identity of Subcontractors and Suppliers must be submitted as provided in the Bidding Documents.

19.05 Owner may conduct such investigations as Owner deems necessary to establish the responsibility, qualifications, and financial ability of Bidders and any proposed Subcontractors or Suppliers.

ARTICLE 20 – BONDS AND INSURANCE

20.01 Article 6 of the General Conditions, as may be modified by the Supplementary Conditions, sets forth Owner's requirements as to performance and payment bonds and insurance. When the Successful Bidder delivers the Agreement (executed by Successful Bidder) to Owner, it shall be accompanied by required bonds and insurance documentation.

ARTICLE 21 – SIGNING OF AGREEMENT

21.01 When Owner issues a Notice of Award to the Successful Bidder, it shall be accompanied by the unexecuted counterparts of the Agreement along with the other Contract Documents as identified in the Agreement. Within 15 days thereafter, Successful Bidder shall execute and deliver the required number of counterparts of the Agreement (and any bonds and insurance documentation required to be delivered by the Contract Documents) to Owner. Within ten days thereafter, Owner shall deliver one fully executed counterpart of the Agreement to Successful Bidder, together with printed and electronic copies of the Contract Documents as stated in Paragraph 2.02 of the General Conditions.

ARTICLE 22 – SALES AND USE TAXES

22.01 Owner is exempt from Florida state sales and use taxes on materials and equipment to be incorporated in the Work. Said taxes shall not be included in the Bid. Refer to Paragraph SC-7.09 of the Supplementary Conditions for additional information.

SECTION 00400

BID SUBMISSION CHECKLIST

Project Name: Emergency Generator Improvements

Bid Number: 2021B-004

Bidders Name: _____

The following items must be submitted in the following order with your bid:

1. __ Completed Section 00400 - Bid Submission Checklist
2. __ Completed Section 00410 - Bid Form
3. __ Completed Section 00430 - Bid Bond, complete with Power of Attorney
4. __ Completed Section 00431 - Tabulation of Subcontractor and Suppliers
5. __ Completed Section 00440 - Florida Trench Safety Act Certification
6. __ Completed Section 00451 - Qualifications Statement
7. __ Completed Section 00452 - Bidder's Statement of Disputes, Litigation, Arbitration, and Surety Completion
8. __ Completed Section 00453 - Non-Collusive Affidavit
9. __ Completed Section 00454 - Drug-Free Workplace Certificate
10. __ Completed Section 00455 - Sworn Statement on Public Entity Crimes
11. __ Completed Section 00456 – Scrutinized Companies
12. __ Current Insurance Certificate showing that bidder can meet the insurance requirements per Section 10.10 of the Contract Agreement, Section 6.03 of the General Conditions.

Submit one (1) original and two (2) copies of all documents listed above. Original shall be clearly marked "Original".

Failure to provide the above listed items may result in your bid being deemed non-responsive.

BID FORM

ARTICLE 1 – BID RECIPIENT

1.01 This Bid is submitted to:

VILLAGE OF PALM SPRINGS

C/O Kimberly Wynn, Village Clerk

226 Cypress Lane, Palm Springs, FL 33461

1.02 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2 – BIDDER'S ACKNOWLEDGEMENTS

2.01 Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security. This Bid will remain subject to acceptance for 120 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

ARTICLE 3 – BIDDER'S REPRESENTATIONS

3.01 In submitting this Bid, Bidder represents that:

A. Bidder has examined and carefully studied the Bidding Documents, and any data and reference items identified in the Bidding Documents, and hereby acknowledges receipt of the following Addenda:

Addendum No.	**Addendum, Date**
_____	_____
_____	_____
_____	_____
_____	_____

B. Bidder has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and satisfied itself as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Bidder is familiar with and has satisfied itself as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and any Site-related reports and drawings identified in the Bidding Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder; and (3) Bidder's safety precautions and programs.

E. Bidder agrees, based on the information and observations referred to in the preceding paragraph, that no further examinations, investigations, explorations, tests, studies, or data are necessary for the determination of this Bid for performance of the Work at the price bid and within the times required, and in accordance with the other terms and conditions of the Bidding Documents.

F. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

G. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and confirms that the written resolution thereof by Engineer is acceptable to Bidder.

H. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for the performance and furnishing of the Work.

I. The submission of this Bid constitutes an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article, and that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

ARTICLE 4 – BIDDER'S CERTIFICATION

4.01 Bidder certifies that:

A. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation;

B. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid;

C. Bidder has not solicited or induced any individual or entity to refrain from bidding; and

D. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 4.01.D:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. "collusive practice" means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels; and

4. "coercive practice" means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the e execution of the Contract.

ARTICLE 5 – BASIS OF BID

5.01 Bidder will complete the Work in accordance with the Contract Documents for the following price(s):

UNIT PRICE BID

Item No.	Description	Unit	Estimated Quantity	Bid Unit Price	Bid Price
1	General Conditions	Lump Sum	1		
2	Lift Station No. 9 Improvements	Lump Sum	1		
3	Well No. 11 Improvements	Lump Sum	1		
4	Well No. 15 Improvements	Lump Sum	1		
Total of All Unit Price Bid Items					$

Bidder acknowledges that (1) each Bid Unit Price includes an amount considered by Bidder to be adequate to cover Contractor's overhead and profit for each separately identified item, and (2) estimated quantities are not guaranteed, and are solely for the purpose of comparison of Bids, and final payment for all unit price Bid items will be based on actual quantities, determined as provided in the Contract Documents.

Total Bid Price (written)

ARTICLE 6 – TIME OF COMPLETION

6.01 Bidder agrees that the Work will be substantially complete within 210 calendar days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 240 calendar days after the date when the Contract Times commence to run.

6.02 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 7 – ATTACHMENTS TO THIS BID

7.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. List of Proposed Subcontractors;

C. List of Proposed Suppliers;

D. List of Project References;

E. Evidence of authority to do business in the state of the Project; or a written covenant to obtain such license within the time for acceptance of Bids;

F. Contractor's License No.: _____ **[or]** Evidence of Bidder's ability to obtain a State Contractor's License and a covenant by Bidder to obtain said license within the time for acceptance of Bids;

G. Required Bidder Qualification Statement with supporting data; and

ARTICLE 8 – DEFINED TERMS

8.01 The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 9 – BID SUBMITTAL

_____	_____
Title	Title
Attest: _____	Attest: _____
Signature	Signature
Title	Title

Note: Addresses are to be used for giving any required notice.
Provide execution by any additional parties, such as joint venturers, if necessary.

1. Bidder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to pay to Owner upon default of Bidder the penal sum set forth on the face of this Bond. Payment of the penal sum is the extent of Bidder's and Surety's liability. Recovery of such penal sum under the terms of this Bond shall be Owner's sole and exclusive remedy upon default of Bidder.

2. Default of Bidder shall occur upon the failure of Bidder to deliver within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents.

3. This obligation shall be null and void if:

3.1 Owner accepts Bidder's Bid and Bidder delivers within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents, or

3.2 All Bids are rejected by Owner, or

3.3 Owner fails to issue a Notice of Award to Bidder within the time specified in the Bidding Documents (or any extension thereof agreed to in writing by Bidder and, if applicable, consented to by Surety when required by Paragraph 5 hereof).

4. Payment under this Bond will be due and payable upon default of Bidder and within 30 calendar days after receipt by Bidder and Surety of written notice of default from Owner, which notice will be given with reasonable promptness, identifying this Bond and the Project and including a statement of the amount due.

5. Surety waives notice of any and all defenses based on or arising out of any time extension to issue Notice of Award agreed to in writing by Owner and Bidder, provided that the total time for issuing Notice of Award including extensions shall not in the aggregate exceed 120 days from the Bid due date without Surety's written consent.

6. No suit or action shall be commenced under this Bond prior to 30 calendar days after the notice of default required in Paragraph 4 above is received by Bidder and Surety and in no case later than one year after the Bid due date.

7. Any suit or action under this Bond shall be commenced only in a court of competent jurisdiction located in the state in which the Project is located.

8. Notices required hereunder shall be in writing and sent to Bidder and Surety at their respective addresses shown on the face of this Bond. Such notices may be sent by personal delivery, commercial courier, or by United States Registered or Certified Mail, return receipt requested, postage pre-paid, and shall be deemed to be effective upon receipt by the party concerned.

9. Surety shall cause to be attached to this Bond a current and effective Power of Attorney evidencing the authority of the officer, agent, or representative who executed this Bond on behalf of Surety to execute, seal, and deliver such Bond and bind the Surety thereby.

10. This Bond is intended to conform to all applicable statutory requirements. Any applicable requirement of any applicable statute that has been omitted from this Bond shall be deemed to be included herein as if set forth at length. If any provision of this Bond conflicts with any applicable statute, then the provision of said statute shall govern and the remainder of this Bond that is not in conflict therewith shall continue in full force and effect.

11. The term "Bid" as used herein includes a Bid, offer, or proposal as applicable.

SECTION 00431
TABULATION OF SUBCONTRACTORS AND SUPPLIERS

The Undersigned states that the following is a full and complete list of the proposed subcontractors and suppliers on this Project and the class of work to be performed by each and that such list will not be added to nor altered without written consent to the Owner through the Engineer.

	SUBCONTRACTOR OR SUPPLIER AND ADDRESS	**CLASS OF WORK OR MATERIAL**

SECTION 00440
FLORIDA TRENCH SAFETY ACT CERTIFICATION

The Bidder acknowledges that included in the various items of the proposal and in the Total Bid Price are costs for complying with the most current version of the Florida Trench Safety Act (90-96, Laws of Florida). The Bidder further identifies the costs to be summarized below:

	Cost
1. Trench Safety Act Compliance	$ _____
2. Special Shoring	$ _____

Identify method of compliance for Item #1: _____

_____

Identify or attach a copy of Special Shoring Requirements for Item #2: _____

_____

The undersigned certifies that he/she is the Contractor who will perform the trench excavation for this project and hereby gives written assurance that Contractor will comply with the applicable trench safety standards specifically set forth in Florida's Trench Safety Act (90-96, Laws of Florida).

SECTION 00454
DRUG-FREE WORKPLACE CERTIFICATE

I, the undersigned, in accordance with Florida Statute 287.087, hereby certify that _____
_____(Print or Type Name of Firm)

- Publishes a written statement notifying that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace named above, and specifying actions that will be taken against violations of such prohibition.

- Informs employees about the dangers of drug abuse in the workplace; the firm's policy of maintaining a drug-free working environment and available drug counseling, rehabilitation, and employee assistance programs; and the penalties that may be imposed upon employees for drug-use violations.

- Gives each employee engaged in providing commodities or contractual services that are under bid or proposal a copy of the statement specified above.

- Notifies the employees that as a condition of working on the commodities or contractual services under bid or proposal, the employee will abide by the terms of the statement and will notify the employer of any conviction of or plea of guilty or nolo contendere to any violation of Chapter 1893 or any controlled substance law of the State of Florida or the United States for a violation occurring in the workplace, no later than 5 days after such conviction, and requires employees to sign copies of such written statement to acknowledge their receipt.

- Imposes a sanction on or requires the satisfactory participation in a drug-abuse assistance or rehabilitation program, if such is available in the employee's community, by any employee who is so convicted.

- Makes a good faith effort to continue to maintain a drug-free workplace through the implementation of the drug-free workplace program.

"As a person authorized to sign this statement, I certify that the business, firm, or corporation named above complies fully with the requirements set forth herein."

SECTION 00455
SWORN STATEMENT UNDER SECTION 287.133(3)(a),
FLORIDA STATUTES, ON PUBLIC ENTITY CRIMES

(To be signed in the presence of a notary public or other officer authorized to administer oaths.)

STATE OF _____

COUNTY OF _____

Before me, the undersigned authority, personally appeared _____, who, being by me first duly sworn, made the following statement:

1. The business address of _____
(firm name of Bidder/Contractor)

is _____.

2. My relationship to _____
(firm name of Bidder/Contractor)

is _____.
(relationship such as sole proprietor, partner, president, vice president)

3. I understand that a "public entity crime" as defined in Section 287.133 of the Florida Statutes includes a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity in Florida or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any bid or contract for goods or services to be provided to any public entity or such an agency or political subdivision and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy, or material misrepresentation.

4. I understand that "convicted" or "conviction" is defined by the statute to mean a finding of guilt or a conviction of a public entity crime, with or without adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, nonjury trial, or entry of a plea of guilty or nolo contendere.

5. I understand that "affiliate" is defined by the statute to mean (1) a predecessor or successor of a person or a corporation convicted of a public entity crime; or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime; or (3) those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate; or (4) a person or corporation who knowingly entered into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months.

6. Neither the Bidder/Contractor nor any officer, director, executive, partner, shareholder, employee, member or agent who is active in the management of the Bidder/Contractor, nor any affiliate of the Bidder/Contractor, has been convicted of public entity crime subsequent to July 1, 1989.

(Draw a line through Paragraph 6 if Paragraph 7 below applies.)

7. There has been a conviction of a public entity crime by the Bidder/Contractor, or an officer, director, executive, partner, shareholder, employee, member or agent of the Bidder/Contractor who is active in the management of the Bidder/Contractor or an affiliate of the Bidder/Contractor. A determination has been made pursuant to Section 287.133(3) by order of the Division of Administrative Hearings that it is not in the public interest for the name of the convicted person or affiliate to appear on the convicted vendor list. The name of the convicted person or affiliate is_____.

A copy of the order of the Division of Administrative Hearings is attached to this statement.

(Draw a line through Paragraph 7 if Paragraph 6 above applies.)

SECTION 00456
SCRUTINIZED COMPANIES CERTIFICATION FORM

By execution below, I, _____, on behalf of _____ (hereinafter, the "Contractor"), hereby swear or affirm to the following certifications:

The following certifications apply to all procurements:

1. The Contractor has reviewed section 215.4725, Florida Statutes, section 215.473, Florida Statutes and section 287.135, Florida Statutes, and understands the same.
2. The Contractor is not on the Scrutinized Companies that Boycott Israel List nor is the Contractor engaged in a boycott of Israel.
3. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
4. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

If the contract awarded hereunder is for one million dollars or more, the following additional certifications apply:

1. The Contractor is not on the Scrutinized Companies with Activities in Sudan List.
2. The Contractor is not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.
3. The Contractor is not engaged in business operations in Cuba or Syria.
5. If awarded a contract, the Contractor agrees to require these certifications for applicable subcontracts entered into for the performance of work/services under this procurement.
6. If awarded a contract, the Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the entire term of the contract, including any and all renewals.

Copy: Engineer

AGREEMENT
BETWEEN OWNER AND CONTRACTOR
FOR CONSTRUCTION CONTRACT (STIPULATED PRICE)

THIS AGREEMENT is by and between Village of Palm Springs ("Owner") and

("Contractor").

Owner and Contractor hereby agree as follows:

ARTICLE 1 – WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows:

ARTICLE 2 – THE PROJECT

2.01 The Project, of which the Work under the Contract Documents is a part, is generally described as follows: Emergency Generator Improvements Project.

ARTICLE 3 – ENGINEER

3.01 The part of the Project that pertains to the Work has been designed by Holtz Consulting Engineers, Inc.

3.02 The Owner has retained Holtz Consulting Engineers, Inc. ("Engineer") to act as Owner's representative, assume all duties and responsibilities, and have the rights and authority assigned to Engineer in the Contract Documents in connection with the completion of the Work in accordance with the Contract Documents.

ARTICLE 4 – CONTRACT TIMES

4.01 *Time of the Essence*

A. All time limits for Milestones, if any, Substantial Completion, and completion and readiness for final payment as stated in the Contract Documents are of the essence of the Contract.

4.02 *Contract Times: Days*

A. The Work will be substantially completed within 210 days after the date when the Contract Times commence to run as provided in Paragraph 4.01 of the General Conditions, and completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions within 240 days after the date when the Contract Times commence to run.

4.03 *Liquidated Damages*

A. Contractor and Owner recognize that time is of the essence as stated in Paragraph 4.01 above and that Owner will suffer financial and other losses if the Work is not completed and Milestones not achieved within the times specified in Paragraph 4.02 above, plus any extensions thereof allowed in accordance with the Contract. The parties also recognize the delays, expense, and difficulties involved in proving in a legal or arbitration proceeding the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of

requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

1. Substantial Completion: Contractor shall pay Owner $ 1,000.00 for each day that expires after the time (as duly adjusted pursuant to the Contract) specified in Paragraph 4.02.A above for Substantial Completion until the Work is substantially complete.

2. Completion of Remaining Work: After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract) for completion and readiness for final payment, Contractor shall pay Owner $ 500.00 for each day that expires after such time until the Work is completed and ready for final payment.

3. Liquidated damages for failing to timely attain Substantial Completion and final completion are not additive and will not be imposed concurrently.

4.04 *Special Damages*

A. In addition to the amount provided for liquidated damages, Contractor shall reimburse Owner (1) for any fines or penalties imposed on Owner as a direct result of the Contractor's failure to attain Substantial Completion according to the Contract Times.

ARTICLE 5 – CONTRACT PRICE

5.01 Owner shall pay Contractor for completion of the Work in accordance with the Contract Documents the amounts that follow, subject to adjustment under the Contract:

A. For all Unit Price Work, an amount equal to the sum of the extended prices (established for each separately identified item of Unit Price Work by multiplying the unit price times the actual quantity of that item):

Unit Price Work					
Item No.	**Description**	**Unit**	**Estimated Quantity**	**Unit Price**	**Extended Price**
Total of all Extended Prices for Unit Price Work (subject to final adjustment based on actual quantities)					$

The extended prices for Unit Price Work set forth as of the Effective Date of the Contract are based on estimated quantities. As provided in Paragraph 13.03 of the General Conditions, estimated quantities are not guaranteed, and determinations of actual quantities and classifications are to be made by Engineer.

ARTICLE 6 – PAYMENT PROCEDURES

6.01 *Submittal and Processing of Payments*

A. Contractor shall submit Applications for Payment in accordance with Article 15 of the General Conditions. Applications for Payment will be processed by Engineer as provided in the General Conditions.

6.02 *Progress Payments; Retainage*

A. Owner shall make progress payments on account of the Contract Price on the basis of Contractor's Applications for Payment on or about the 20th day of each month during performance of the Work as provided in Paragraph 6.02.A.1 below, provided that such Applications for Payment have been submitted in a timely manner and otherwise meet the requirements of the Contract. All such payments will be measured by the Schedule of Values established as provided in the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no Schedule of Values, as provided elsewhere in the Contract.

1. Prior to Substantial Completion, progress payments will be made in accordance with Florida Statute 255.078 but, in each case, less the aggregate of payments previously made and less such amounts as Owner may withhold, including but not limited to liquidated damages, in accordance with the Contract

B. Upon Substantial Completion, Owner shall pay an amount sufficient to increase total payments to Contractor to 100 percent of the Work completed, less such amounts set off by Owner pursuant to Paragraph 15.01.E of the General Conditions, and less 200 percent of Engineer's estimate of the value of Work to be completed or corrected as shown on the punch list of items to be completed or corrected prior to final payment.

6.03 *Final Payment*

A. Upon final completion and acceptance of the Work in accordance with Paragraph 15.06 of the General Conditions, Owner shall pay the remainder of the Contract Price as recommended by Engineer as provided in said Paragraph 15.06.

ARTICLE 7 – INTEREST

7.01 All amounts not paid when due shall bear interest at the rate of *1* percent per annum.

ARTICLE 8 – CONTRACTOR'S REPRESENTATIONS

8.01 In order to induce Owner to enter into this Contract, Contractor makes the following representations:

A. Contractor has examined and carefully studied the Contract Documents, and any data and reference items identified in the Contract Documents.

B. Contractor has visited the Site, conducted a thorough, alert visual examination of the Site and adjacent areas, and become familiar with and is satisfied as to the general, local, and Site conditions that may affect cost, progress, and performance of the Work.

C. Contractor is familiar with and is satisfied as to all Laws and Regulations that may affect cost, progress, and performance of the Work.

D. Contractor has carefully studied all provided: (1) reports of explorations and tests of subsurface conditions at or adjacent to the Site and all drawings of physical conditions

relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings, and (2) reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, especially with respect to Technical Data in such reports and drawings.

E. Contractor has considered the information known to Contractor itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Contract Documents; and the Site-related reports (if provided) and drawings identified in the Contract Documents, with respect to the effect of such information, observations, and documents on (1) the cost, progress, and performance of the Work; (2) the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor; and (3) Contractor's safety precautions and programs.

F. Based on the information and observations referred to in the preceding paragraph, Contractor agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

G. Contractor is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Contract Documents.

H. Contractor has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Contractor has discovered in the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

I. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

J. Contractor's entry into this Contract constitutes an incontrovertible representation by Contractor that without exception all prices in the Agreement are premised upon performing and furnishing the Work required by the Contract Documents.

ARTICLE 9 – CONTRACT DOCUMENTS

9.01 *Contents*

A. The Contract Documents consist of the following:

1. This Agreement (pages 1 to _12__, inclusive).
2. Performance bond (pages 1 to 3, inclusive).
3. Payment bond (pages 1 to 3, inclusive).
4. General Conditions (pages 1 to 65, inclusive).
5. Supplementary Conditions (pages 1 to 10, inclusive).
6. Specifications as listed in the table of contents of the Project Manual.
7. Drawings (not attached but incorporated by reference) consisting of _15__ sheets with each sheet bearing the following general title: _Village of Palm Springs Emergency Generator Improvements.
8. Addenda (numbers ___ to ___, inclusive).
9. Exhibits to this Agreement (enumerated as follows):

a. Contractor's Bid (pages ___ to ___, inclusive).

10. The following which may be delivered or issued on or after the Effective Date of the Contract and are not attached hereto:

a. Notice to Proceed.

b. Work Change Directives.

c. Change Orders.

d. Field Orders.

B. The documents listed in Paragraph 9.01.A are attached to this Agreement (except as expressly noted otherwise above).

C. There are no Contract Documents other than those listed above in this Article 9.

D. The Contract Documents may only be amended, modified, or supplemented as provided in the General Conditions.

ARTICLE 10 – MISCELLANEOUS

10.01 *Terms*

A. Terms used in this Agreement will have the meanings stated in the General Conditions and the Supplementary Conditions.

10.02 *Assignment of Contract*

A. Unless expressly agreed to elsewhere in the Contract, no assignment by a party hereto of any rights under or interests in the Contract will be binding on another party hereto without the written consent of the party sought to be bound; and, specifically but without limitation, money that may become due and money that is due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents.

10.03 *Successors and Assigns*

A. Owner and Contractor each binds itself, its successors, assigns, and legal representatives to the other party hereto, its successors, assigns, and legal representatives in respect to all covenants, agreements, and obligations contained in the Contract Documents.

10.04 *Severability*

A. Any provision or part of the Contract Documents held to be void or unenforceable under any Law or Regulation shall be deemed stricken, and all remaining provisions shall continue to be valid and binding upon Owner and Contractor, who agree that the Contract Documents shall be reformed to replace such stricken provision or part thereof with a valid and enforceable provision that comes as close as possible to expressing the intention of the stricken provision.

10.05 *Contractor's Certifications*

A. Contractor certifies that it has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for or in executing the Contract. For the purposes of this Paragraph 10.05:

1. “corrupt practice” means the offering, giving, receiving, or soliciting of any thing of value likely to influence the action of a public official in the bidding process or in the Contract execution;

2. “fraudulent practice” means an intentional misrepresentation of facts made (a) to influence the bidding process or the execution of the Contract to the detriment of Owner, (b) to establish Bid or Contract prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

3. “collusive practice” means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish Bid prices at artificial, non-competitive levels; and

4. “coercive practice” means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

10.06 *Indemnity*

A. The parties recognize that the CONTRACTOR is an independent contractor. The CONTRACTOR agrees to assume liability for and indemnify, hold harmless, and defend the VILLAGE, its council members, mayor, officers, employees, agents, and attorneys of, from, and against all liability and expense, including reasonable attorney’s fees, in connection with any and all claims, demands, damages, actions, causes of action, and suits in equity of whatever kind or nature, including claims for personal injury, property damage, equitable relief, or loss of use, to the extent caused by the negligence, recklessness, or intentionally wrongful conduct of the CONTRACTOR, its agents, officers, Contractors, subcontractors, employees, or anyone else utilized by the CONTRACTOR in the performance of this Contract. The CONTRACTOR’s liability hereunder shall include all attorney’s fees and costs incurred by the VILLAGE in the enforcement of this indemnification provision. This includes claims made by the employees of the CONTRACTOR against the VILLAGE and the CONTRACTOR hereby waives its entitlement, if any, to immunity under Section 440.11, Florida Statutes. The obligations contained in this provision shall survive termination of this Contract and shall not be limited by the amount of any insurance required to be obtained or maintained under this Contract.

B. Subject to the limitations set forth in this Section, CONTRACTOR shall assume control of the defense of any claim asserted by a third party against the VILLAGE and, in connection with such defense, shall appoint lead counsel, in each case at the CONTRACTOR’s expense. The VILLAGE shall have the right, at its option, to participate in the defense of any third party claim, without relieving CONTRACTOR of any of its obligations hereunder. If the CONTRACTOR assumes control of the defense of any third party claim in accordance with this paragraph, the CONTRACTOR shall obtain the prior written consent of the VILLAGE before entering into any settlement of such claim. Notwithstanding anything to the contrary in this Section, the CONTRACTOR shall not assume or maintain control of the defense of any third party claim, but shall pay the fees of counsel retained by the VILLAGE and all expenses, including experts’ fees, if (i) an adverse determination with respect to the third party claim would, in the good faith judgment of the VILLAGE, be detrimental in any material respect to the VILLAGE’s reputation; (ii) the third party claim seeks an injunction or equitable relief against the VILLAGE; or (iii) the CONTRACTOR has failed or is failing to prosecute or defend vigorously the third party claim. Each party shall cooperate, and cause its agents to cooperate, in the defense or prosecution of any third party claim and shall furnish or cause to be furnished such records and information, and attend such

conferences, discovery proceedings, hearings, trials, or appeals, as may be reasonably requested in connection therewith.

C. It is the specific intent of the parties hereto that the foregoing indemnification complies with Section 725.06, Florida Statutes, as amended. CONTRACTOR expressly agrees that it will not claim, and waives any claim, that this indemnification violates Section 725.06, Florida Statues. Nothing contained in the foregoing indemnification shall be construed as a waiver of any immunity or limitation of liability the VILLAGE may have under the doctrine of sovereign immunity or Section 768.28, Florida Statutes.

10.07 *Governing Law and Remedies*

A. The validity of this Agreement and of any of its terms or provisions, as well as the rights and duties of the parties hereunder, shall be governed by the laws of the State of Florida and venue for any and all disputes related to or arising from this Agreement shall be in Palm Beach County, Florida.

B. No remedy herein conferred upon any party is intended to be exclusive of any other remedy, and each and every such remedy shall be cumulative and shall be in addition to every other remedy given hereunder or now or hereafter existing at law or in equity or by statute or otherwise. No single or partial exercise by any party of any right, power, or remedy hereunder shall preclude any other or further exercise thereof.

10.08 *Office of the Inspector General*

A. Palm Beach County has established the Office of the Inspector General, which is authorized and empowered to review past, present, and proposed County programs, contracts, transactions, accounts and records. The Inspector General (IG) has the power to subpoena witnesses, administer oaths, require the production of records, and monitor existing projects and programs. The Inspector General may, on a random basis, perform audits on all Village contracts.

10.09 *Public Records*

Contractor shall comply with Florida's Public Records Act, Chapter 119, Florida Statutes, and, if determined to be acting on behalf of the Village as provided under section 119.011(2), Florida Statutes, specifically agrees to:

(a) Keep and maintain public records required by the Village to perform the service.

(b) Upon request from the Village's custodian of public records or designee, provide the Village with a copy of the requested records or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of this Contract and following completion of this Contract if the Contractor does not transfer the records to the Village.

(d) Upon completion of this Contract, transfer, at no cost, to the Village all public records in possession of the Contractor or keep and maintain public records required by the Village to perform the service. If the Contractor transfers all public records to the Village upon completion of the Contract, the Contractor shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the Contractor keeps

and maintains public records upon completion of the Contract, the Contractor shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to the Village, upon request from the Village's custodian of public records or designee, in a format that is compatible with the information technology systems of the Village.

IF THE CONTRACTOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE CONSULTANT'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE CUSTODIAN OF PUBLIC RECORDS OR DESIGNEE AT 561-434-5084, kwynn@vpsfl.org, OR BY MAIL AT VILLAGE OF PALM SPRINGS, 226 CYPRESS LANE, PALM SPRINGS, FL 33461.

10.10 *Insurance*

A. The limits of liability for insurance required by Paragraph 6.03 of the General Conditions shall provide coverage for not less that the following amounts or greater where required by Law and Regulations:

1. Workers' Compensation, and related coverages under Paragraphs 6.03.A.1 and A.2 of the General Conditions:

a.	State	Statutory
b.	Applicable Federal	Statutory
c.	Employer Liability:	
	Bodily injury, each accident	$1,000,000
	Bodily injury by disease, each employee	$500,000
	Bodily injury/disease aggregate	$1,000,000
d.	Foreign voluntary worker compensation	Statutory

2. Contractor's Commercial General Liability under Paragraphs 6.03.B and 6.03.C of the General Conditions:

a.	General Aggregate	$2,000,000
b.	Products – Completed Operations Aggregate	$2,000,000
c.	Personal and Advertising Injury	$1,000,000
d.	Each Occurrence (Bodily Injury and Property Damage)	$1,000,000

3. Automobile Liability under paragraph 6.03.D of the General Conditions:

a.	Bodily Injury:	
	Each Person	$500,000
	Each Accident	$1,000,000
b.	Property Damage:	
	Each Incident	$1,000,000

4. Umbrella of Excess Liability under paragraph 6.03.E of the General Conditions:

a.	Excess or Umbrella Liability		
	1)	General Aggregate	$5,000,000
	2)	Each Occurrence	$1,000,000

5. Contractor's Pollution Liability under paragraph 6.03.F of the General Conditions:

a. Contractor's Pollution Liability
   1) General Aggregate $2,000,000
   2) Each Occurrence $1,000,000

6. Additional Insureds include the respective officers, partners, directors, employees, agents, consultants, and subconsultants of the following firms and municipal government(s):

   a. Village of Palm Springs

10.11 *Audit By Village*

A. The CONTRACTOR shall permit the VILLAGE, or any authorized representatives of the VILLAGE, at all reasonable times, access to and the right to examine all records, books, papers or documents related to the CONTRACTOR's performance under this Agreement including, but not limited to, expenses for sub-contractors, agents or assistants, direct and indirect charges for work performed and detailed documentation for all such work performed or to be performed under this Agreement.

10.12 *Copies of Data/Documents*

A. Copies or original documents prepared by the CONTRACTOR in relation to work associated with this Agreement shall be provided to the VILLAGE. Data collected, stored, and/or provided shall be in a form acceptable to the VILLAGE and agreed upon by the VILLAGE.

10.13 *Ownership*

A. Each and every report, draft, work product, map, record, and other document reproduced, prepared, or caused to be prepared by the CONTRACTOR pursuant to or in connection with this Agreement shall be the exclusive property of the VILLAGE.

10.14 *Limitations of Liability*

A. Under no circumstances shall either party be liable to the other for any consequential, incidental, special, punitive, or any other form of indirect or non-compensatory damages.

10.15 *Enforcement Costs*

A. All parties shall be responsible for their own attorneys' fees, court costs and expenses if any legal action or other proceeding is brought for any dispute, disagreement, or issue of construction or interpretation arising hereunder whether relating to the Agreement's execution, validity, the obligations provided therein, or performance of this Agreement, or because of an alleged breach, default or misrepresentation in connection with any provisions of this Agreement.

10.16 *Copyrights and/or Patent Rights*

A. CONTRACTOR warrants that there has been no violation of copyrights and/or patent rights in the manufacturing, producing or selling of the goods, shipped or ordered, as a result of this Agreement and the CONTRACTOR agrees to hold the Village harmless from any and all liability, loss, or expense occasioned by any such violation.

10.17 *Protection of Property*

A. The CONTRACTOR shall at all times guard against damage or loss to the property of the VILLAGE or of other vendors or contractors and shall be held responsible for replacing or repairing any such loss or damage. The VILLAGE may withhold payment or make such deductions as deemed necessary to insure reimbursement or replacement for loss or damage to property through negligence of the successful CONTRACTOR or its agents. The

CONTRACTOR shall be responsible to safeguard all of their property such as tools and equipment while on site. The VILLAGE will not be held responsible for any loss of CONTRACTOR property due to theft or vandalism.

10.18 *Damage to Persons or Property*

A. The responsibility for all damage to person or property arising out of or on account of Scope of Work done under this Contract shall rest upon the CONTRACTOR.

10.19 *Discrimination*

A. The CONTRACTOR warrants and represents that all of its employees are treated equally during employment without regard to race, color, religion, disability, sex, age, national origin, ancestry, political affiliation, marital status, handicap, or sexual orientation. Further, CONTRACTOR shall not discriminate or permit discrimination against any employee or an applicant for employment on the basis of race, color, sex, religion, political affiliation, natural origin, ancestry, marital status, sexual orientation or handicap.

10.20 *Construction Defects*

A. PURSUANT TO SECTION 558.005, FLORIDA STATUTES, ANY CLAIMS FOR CONSTRUCTION DEFECTS ARE NOT SUBJECT TO THE NOTICE AND CURE PROVISIONS OF CHAPTER 558, FLORIDA STATUTES.

10.21 *Public Entity Crimes*

Contractor acknowledges and agrees that a person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid, proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier or sub-contractor under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statues, for CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list. The Contractor will advise the Village immediately if it becomes aware of any violation of this statute.

10.22 *Scrutinized Companies*

A. Contractor certifies that it and its subcontractors are not on the Scrutinized Companies that Boycott Israel List and are not engaged in the boycott of Israel. Pursuant to section 287.135, Florida Statutes, the City may immediately terminate this Agreement at its sole option if the Contractor or any of its subcontractors are found to have submitted a false certification; or if the Contractor or any of its subcontractors, are placed on the Scrutinized Companies that Boycott Israel List or is engaged in the boycott of Israel during the term of this Agreement.

B. If this Agreement is for one million dollars or more, the Contractor certifies that it and its subcontractors are also not on the Scrutinized Companies with Activities in Sudan List, Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or engaged in business operations in Cuba or Syria as identified in Section 287.135, Florida Statutes. Pursuant to Section 287.135, the City may immediately terminate this Agreement at its sole option if the Contractor, or any of its subcontractors are found to have submitted a false certification; or if the Contractor or any of its subcontractors are placed on the Scrutinized Companies with Activities in Sudan List, or Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or are or have been engaged with business operations in Cuba or Syria during the term of this Agreement.

C. The Contractor agrees to observe the above requirements for applicable subcontracts entered into for the performance of work under this Agreement.

D. The Contractor agrees that the certifications in this section shall be effective and relied upon by the City for the term of this Agreement, including any and all renewals.

E. The Contractor agrees that if it or any of its subcontractors' status changes in regards to any certification herein, the Contractor shall immediately notify the City of the same.

F. As provided in Subsection 287.135(8), Florida Statutes, if federal law ceases to authorize the above-stated contracting prohibitions then they shall become inoperative.

IN WITNESS WHEREOF, Owner and Contractor have signed this Agreement.

This Agreement will be effective on _____ (which is the Effective Date of the Contract).

Notes: (1) Provide supplemental execution by any additional parties, such as joint venturers. (2) Any singular reference to Contractor, Surety, Owner, or other party shall be considered plural where applicable.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner for the performance of the Construction Contract, which is incorporated herein by reference.

2. If the Contractor performs the Construction Contract, the Surety and the Contractor shall have no obligation under this Bond, except when applicable to participate in a conference as provided in Paragraph 3.

3. If there is no Owner Default under the Construction Contract, the Surety's obligation under this Bond shall arise after:

3.1 The Owner first provides notice to the Contractor and the Surety that the Owner is considering declaring a Contractor Default. Such notice shall indicate whether the Owner is requesting a conference among the Owner, Contractor, and Surety to discuss the Contractor's performance. If the Owner does not request a conference, the Surety may, within five (5) business days after receipt of the Owner's notice, request such a conference. If the Surety timely requests a conference, the Owner shall attend. Unless the Owner agrees otherwise, any conference requested under this Paragraph 3.1 shall be held within ten (10) business days of the Surety's receipt of the Owner's notice. If the Owner, the Contractor, and the Surety agree, the Contractor shall be allowed a reasonable time to perform the Construction Contract, but such an agreement shall not waive the Owner's right, if any, subsequently to declare a Contractor Default;

3.2 The Owner declares a Contractor Default, terminates the Construction Contract and notifies the Surety; and

3.3 The Owner has agreed to pay the Balance of the Contract Price in accordance with the terms of the Construction Contract to the Surety or to a contractor selected to perform the Construction Contract.

4. Failure on the part of the Owner to comply with the notice requirement in Paragraph 3.1 shall not constitute a failure to comply with a condition precedent to the Surety's obligations, or release the Surety from its obligations, except to the extent the Surety demonstrates actual prejudice.

5. When the Owner has satisfied the conditions of Paragraph 3, the Surety shall promptly and at the Surety's expense take one of the following actions:

5.1 Arrange for the Contractor, with the consent of the Owner, to perform and complete the Construction Contract;

5.2 Undertake to perform and complete the Construction Contract itself, through its agents or independent contractors;

5.3 Obtain bids or negotiated proposals from qualified contractors acceptable to the Owner for a contract for performance and completion of the Construction Contract, arrange for a contract to be prepared for execution by the Owner and a contractor selected with the Owners concurrence, to be secured with performance and payment bonds executed by a qualified surety equivalent to the bonds issued on the Construction Contract, and pay to the Owner the amount of damages as described in Paragraph 7 in excess of the Balance of the Contract Price incurred by the Owner as a result of the Contractor Default; or

5.4 Waive its right to perform and complete, arrange for completion, or obtain a new contractor, and with reasonable promptness under the circumstances:

5.4.1 After investigation, determine the amount for which it may be liable to the Owner and, as soon as practicable after the amount is determined, make payment to the Owner; or

5.4.2 Deny liability in whole or in part and notify the Owner, citing the reasons for denial.

6. If the Surety does not proceed as provided in Paragraph 5 with reasonable promptness, the Surety shall be deemed to be in default on this Bond seven days after receipt of an additional written notice from the Owner to the Surety demanding that the Surety perform its obligations under this Bond, and the Owner shall be entitled to enforce any remedy available to the Owner. If the Surety proceeds as provided in Paragraph 5.4, and the Owner refuses the payment or the Surety has denied liability, in whole or in part, without further notice the Owner shall be entitled to enforce any remedy available to the Owner.

7. If the Surety elects to act under Paragraph 5.1, 5.2, or 5.3, then the responsibilities of the Surety to the Owner shall not be greater than those of the Contractor under the Construction Contract, and the responsibilities of the Owner to the Surety shall not be greater than those of the Owner under the Construction Contract. Subject to the commitment by the Owner to pay the Balance of the Contract Price, the Surety is obligated, without duplication for:

7.1 the responsibilities of the Contractor for correction of defective work and completion of the Construction Contract;

7.2 additional legal, design professional, and delay costs resulting from the Contractor's Default, and resulting from the actions or failure to act of the Surety under Paragraph 5; and

7.3 liquidated damages, or if no liquidated damages are specified in the Construction Contract, actual damages caused by delayed performance or non-performance of the Contractor.

8. If the Surety elects to act under Paragraph 5.1, 5.3, or 5.4, the Surety's liability is limited to the amount of this Bond.

9. The Surety shall not be liable to the Owner or others for obligations of the Contractor that are unrelated to the Construction Contract, and the Balance of the Contract Price shall not be reduced or set off on account of any such unrelated obligations. No right of action shall accrue on this Bond to any person or entity other than the Owner or its heirs, executors, administrators, successors, and assigns.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

10. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

11. Any proceeding, legal or equitable, under this Bond may be instituted in any court of competent jurisdiction in the location in which the work or part of the work is located and shall be instituted within two years after a declaration of Contractor Default or within two years after the Contractor ceased working or within two years after the Surety refuses or fails to perform its obligations under this Bond, whichever occurs first. If the provisions of this paragraph are void or prohibited by law, the minimum periods of limitations available to sureties as a defense in the jurisdiction of the suit shall be applicable.

12. Notice to the Surety, the Owner, or the Contractor shall be mailed or delivered to the address shown on the page on which their signature appears.

13. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted here from and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

14. Definitions

14.1 Balance of the Contract Price: The total amount payable by the Owner to the Contractor under the Construction Contract after all proper adjustments have been made including allowance for the Contractor for any amounts received or to be received by the Owner in settlement of insurance or other claims for damages to which the Contractor is entitled, reduced by all valid and proper payments made to or on behalf of the Contractor under the Construction Contract.

14.2 Construction Contract: The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and changes made to the agreement and the Contract Documents.

14.3 Contractor Default: Failure of the Contractor, which has not been remedied or waived, to perform or otherwise to comply with a material term of the Construction Contract.

14.4 Owner Default: Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

14.5 Contract Documents: All the documents that comprise the agreement between the Owner and Contractor.

15. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

Notes: (1) Provide supplemental execution by any additional parties, such as joint venturers. (2) Any singular reference to Contractor, Surety, Owner, or other party shall be considered plural where applicable.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner to pay for labor, materials, and equipment furnished for use in the performance of the Construction Contract, which is incorporated herein by reference, subject to the following terms.

2. If the Contractor promptly makes payment of all sums due to Claimants, and defends, indemnifies, and holds harmless the Owner from claims, demands, liens, or suits by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, then the Surety and the Contractor shall have no obligation under this Bond.

3. If there is no Owner Default under the Construction Contract, the Surety's obligation to the Owner under this Bond shall arise after the Owner has promptly notified the Contractor and the Surety (at the address described in Paragraph 13) of claims, demands, liens, or suits against the Owner or the Owner's property by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, and tendered defense of such claims, demands, liens, or suits to the Contractor and the Surety.

4. When the Owner has satisfied the conditions in Paragraph 3, the Surety shall promptly and at the Surety's expense defend, indemnify, and hold harmless the Owner against a duly tendered claim, demand, lien, or suit.

5. The Surety's obligations to a Claimant under this Bond shall arise after the following:

    5.1 Claimants who do not have a direct contract with the Contractor,

        5.1.1 have furnished a written notice of non-payment to the Contractor, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were, or equipment was, furnished or supplied or for whom the labor was done or performed, within ninety (90) days after having last performed labor or last furnished materials or equipment included in the Claim; and

        5.1.2 have sent a Claim to the Surety (at the address described in Paragraph 13).

    5.2 Claimants who are employed by or have a direct contract with the Contractor have sent a Claim to the Surety (at the address described in Paragraph 13).

6. If a notice of non-payment required by Paragraph 5.1.1 is given by the Owner to the Contractor, that is sufficient to satisfy a Claimant's obligation to furnish a written notice of non-payment under Paragraph 5.1.1.

7. When a Claimant has satisfied the conditions of Paragraph 5.1 or 5.2, whichever is applicable, the Surety shall promptly and at the Surety's expense take the following actions:

    7.1 Send an answer to the Claimant, with a copy to the Owner, within sixty (60) days after receipt of the Claim, stating the amounts that are undisputed and the basis for challenging any amounts that are disputed; and

    7.2 Pay or arrange for payment of any undisputed amounts.

    7.3 The Surety's failure to discharge its obligations under Paragraph 7.1 or 7.2 shall not be deemed to constitute a waiver of defenses the Surety or Contractor may have or acquire as to a Claim, except as to undisputed amounts for which the Surety and Claimant have reached agreement. If, however, the Surety fails to discharge its obligations under Paragraph 7.1 or 7.2, the Surety shall indemnify the Claimant for the reasonable attorney's fees the Claimant incurs thereafter to recover any sums found to be due and owing to the Claimant.

8. The Surety's total obligation shall not exceed the amount of this Bond, plus the amount of reasonable attorney's fees provided under Paragraph 7.3, and the amount of this Bond shall be credited for any payments made in good faith by the Surety.

9. Amounts owed by the Owner to the Contractor under the Construction Contract shall be used for the performance of the Construction Contract and to satisfy claims, if any, under any construction performance bond. By the Contractor furnishing and the Owner accepting this Bond, they agree that all funds earned by the Contractor in the performance of the Construction Contract are dedicated to satisfy obligations of the Contractor and Surety under this Bond, subject to the Owner's priority to use the funds for the completion of the work.

10. The Surety shall not be liable to the Owner, Claimants, or others for obligations of the Contractor that are unrelated to the Construction Contract. The Owner shall not be liable for the payment of any costs or expenses of any Claimant under this Bond, and shall have under this Bond no obligation to make payments to or give notice on behalf of Claimants, or otherwise have any obligations to Claimants under this Bond.

11. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

12. No suit or action shall be commenced by a Claimant under this Bond other than in a court of competent jurisdiction in the state in which the project that is the subject of the Construction Contract is located or after the expiration of one year from the date (1) on which the Claimant sent a Claim to the Surety pursuant to Paragraph 5.1.2 or 5.2, or (2) on which the last labor or service was performed by anyone or the last materials or equipment were furnished by anyone under the Construction Contract, whichever of (1) or (2) first occurs. If the provisions of this paragraph are void or prohibited by law, the minimum period of limitation available to sureties as a defense in the jurisdiction of the suit shall be applicable.

13. Notice and Claims to the Surety, the Owner, or the Contractor shall be mailed or delivered to the address shown on the page on which their signature appears. Actual receipt of notice or Claims, however accomplished, shall be sufficient compliance as of the date received.

14. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

15. Upon requests by any person or entity appearing to be a potential beneficiary of this Bond, the Contractor and Owner shall promptly furnish a copy of this Bond or shall permit a copy to be made.

16. **Definitions**

16.1 **Claim:** A written statement by the Claimant including at a minimum:

1. The name of the Claimant;
2. The name of the person for whom the labor was done, or materials or equipment furnished;
3. A copy of the agreement or purchase order pursuant to which labor, materials, or equipment was furnished for use in the performance of the Construction Contract;
4. A brief description of the labor, materials, or equipment furnished;
5. The date on which the Claimant last performed labor or last furnished materials or equipment for use in the performance of the Construction Contract;
6. The total amount earned by the Claimant for labor, materials, or equipment furnished as of the date of the Claim;
7. The total amount of previous payments received by the Claimant; and
8. The total amount due and unpaid to the Claimant for labor, materials, or equipment furnished as of the date of the Claim.

16.2 **Claimant:** An individual or entity having a direct contract with the Contractor or with a subcontractor of the Contractor to furnish labor, materials, or equipment for use in the performance of the Construction Contract. The term Claimant also includes any individual or entity that has rightfully asserted a claim under an applicable mechanic's lien or similar statute against the real property upon which the Project is located. The intent of this Bond shall be to include without limitation in the terms of "labor, materials, or equipment" that part of the water, gas, power, light, heat, oil, gasoline, telephone service, or rental equipment used in the Construction Contract, architectural and engineering services required for performance of the work of the Contractor and the Contractor's subcontractors, and all other items for which a mechanic's lien may be asserted in the jurisdiction where the labor, materials, or equipment were furnished.

16.3 **Construction Contract:** The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and all changes made to the agreement and the Contract Documents.

16.4 **Owner Default**: Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

16.5 **Contract Documents:** All the documents that comprise the agreement between the Owner and Contractor.

17. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

18. Modifications to this Bond are as follows:

CERTIFICATE OF SUBSTANTIAL COMPLETION

Owner:	Village of Palm Springs	Owner's Task Order No.:	
Contractor:		Contractor's Project No.:	
Engineer:	Holtz Consulting Engineers, Inc.	Engineer's Project No.:	
Project:	Emergency Generator Improvements	Contract Name:	

This [preliminary] [final] Certificate of Substantial Completion applies to:

☐ All Work ☐ The following specified portions of the Work:

Date of Substantial Completion

The Work to which this Certificate applies has been inspected by authorized representatives of Owner, Contractor, and Engineer, and found to be substantially complete. The Date of Substantial Completion of the Work or portion thereof designated above is hereby established, subject to the provisions of the Contract pertaining to Substantial Completion. The date of Substantial Completion in the final Certificate of Substantial Completion marks the commencement of the contractual correction period and applicable warranties required by the Contract.

A punch list of items to be completed or corrected is attached to this Certificate. This list may not be all-inclusive, and the failure to include any items on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract.

The responsibilities between Owner and Contractor for security, operation, safety, maintenance, heat, utilities, insurance, and warranties upon Owner's use or occupancy of the Work shall be as provided in the Contract, except as amended as follows: *[Note: Amendments of contractual responsibilities recorded in this Certificate should be the product of mutual agreement of Owner and Contractor; see Paragraph 15.03.D of the General Conditions.]*

Amendments to Owner's responsibilities: ☐ None ☐ As follows

Amendments to Contractor's responsibilities: ☐ None ☐ As follows:

The following documents are attached to and made a part of this Certificate: *[punch list; others]*

This Certificate does not constitute an acceptance of Work not in accordance with the Contract Documents, nor is it a release of Contractor's obligation to complete the Work in accordance with the Contract.

ARTICLE 1 – DEFINITIONS AND TERMINOLOGY

1.01 Defined Terms

A. Wherever used in the Bidding Requirements or Contract Documents, a term printed with initial capital letters, including the term's singular and plural forms, will have the meaning indicated in the definitions below. In addition to terms specifically defined, terms with initial capital letters in the Contract Documents include references to identified articles and paragraphs, and the titles of other documents or forms.

1. *Addenda*—Written or graphic instruments issued prior to the opening of Bids which clarify, correct, or change the Bidding Requirements or the proposed Contract Documents.

2. *Agreement*—The written instrument, executed by Owner and Contractor, that sets forth the Contract Price and Contract Times, identifies the parties and the Engineer, and designates the specific items that are Contract Documents.

3. *Application for Payment*—The form acceptable to Engineer which is to be used by Contractor during the course of the Work in requesting progress or final payments and which is to be accompanied by such supporting documentation as is required by the Contract Documents.

4. *Bid*—The offer of a Bidder submitted on the prescribed form setting forth the prices for the Work to be performed.

5. *Bidder*—An individual or entity that submits a Bid to Owner.

6. *Bidding Documents*—The Bidding Requirements, the proposed Contract Documents, and all Addenda.

7. *Bidding Requirements*—The advertisement or invitation to bid, Instructions to Bidders, Bid Bond or other Bid security, if any, the Bid Form, and the Bid with any attachments.

8. *Change Order*—A document which is signed by Contractor and Owner and authorizes an addition, deletion, or revision in the Work or an adjustment in the Contract Price or the Contract Times, or other revision to the Contract, issued on or after the Effective Date of the Contract.

9. *Change Proposal*—A written request by Contractor, duly submitted in compliance with the procedural requirements set forth herein, seeking an adjustment in Contract Price or Contract Times, or both; contesting an initial decision by Engineer concerning the requirements of the Contract Documents or the acceptability of Work under the Contract Documents; challenging a set-off against payments due; or seeking other relief with respect to the terms of the Contract.

10. *Claim*—(a) A demand or assertion by Owner directly to Contractor, duly submitted in compliance with the procedural requirements set forth herein: seeking an adjustment of Contract Price or Contract Times, or both; contesting an initial decision by Engineer concerning the requirements of the Contract Documents or the acceptability of Work under the Contract Documents; contesting Engineer's decision regarding a Change Proposal; seeking resolution of a contractual issue that Engineer has declined to address; or seeking other relief with respect to the terms of the Contract; or (b) a demand or assertion by Contractor directly to Owner, duly submitted in compliance with the procedural requirements set forth herein, contesting Engineer's decision regarding a Change Proposal; or seeking resolution of a contractual issue that Engineer

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

has declined to address. A demand for money or services by a third party is not a Claim.

11. *Constituent of Concern*—Asbestos, petroleum, radioactive materials, polychlorinated biphenyls (PCBs), hazardous waste, and any substance, product, waste, or other material of any nature whatsoever that is or becomes listed, regulated, or addressed pursuant to (a) the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. §§9601 et seq. ("CERCLA"); (b) the Hazardous Materials Transportation Act, 49 U.S.C. §§5101 et seq.; (c) the Resource Conservation and Recovery Act, 42 U.S.C. §§6901 et seq. ("RCRA"); (d) the Toxic Substances Control Act, 15 U.S.C. §§2601 et seq.; (e) the Clean Water Act, 33 U.S.C. §§1251 et seq.; (f) the Clean Air Act, 42 U.S.C. §§7401 et seq.; or (g) any other federal, state, or local statute, law, rule, regulation, ordinance, resolution, code, order, or decree regulating, relating to, or imposing liability or standards of conduct concerning, any hazardous, toxic, or dangerous waste, substance, or material.

12. *Contract*—The entire and integrated written contract between the Owner and Contractor concerning the Work.

13. *Contract Documents*—Those items so designated in the Agreement, and which together comprise the Contract.

14. *Contract Price*—The money that Owner has agreed to pay Contractor for completion of the Work in accordance with the Contract Documents. .

15. *Contract Times*—The number of days or the dates by which Contractor shall: (a) achieve Milestones, if any; (b) achieve Substantial Completion; and (c) complete the Work.

16. *Contractor*—The individual or entity with which Owner has contracted for performance of the Work.

17. *Cost of the Work*—See Paragraph 13.01 for definition.

18. *Drawings*—The part of the Contract that graphically shows the scope, extent, and character of the Work to be performed by Contractor.

19. *Effective Date of the Contract*—The date, indicated in the Agreement, on which the Contract becomes effective.

20. *Engineer*—The individual or entity named as such in the Agreement.

21. *Field Order*—A written order issued by Engineer which requires minor changes in the Work but does not change the Contract Price or the Contract Times.

22. *Hazardous Environmental Condition*—The presence at the Site of Constituents of Concern in such quantities or circumstances that may present a danger to persons or property exposed thereto. The presence at the Site of materials that are necessary for the execution of the Work, or that are to be incorporated in the Work, and that are controlled and contained pursuant to industry practices, Laws and Regulations, and the requirements of the Contract, does not establish a Hazardous Environmental Condition.

23. *Laws and Regulations; Laws or Regulations*—Any and all applicable laws, statutes, rules, regulations, ordinances, codes, and orders of any and all governmental bodies, agencies, authorities, and courts having jurisdiction.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

24. *Liens*—Charges, security interests, or encumbrances upon Contract-related funds, real property, or personal property.

25. *Milestone*—A principal event in the performance of the Work that the Contract requires Contractor to achieve by an intermediate completion date or by a time prior to Substantial Completion of all the Work.

26. *Notice of Award*—The written notice by Owner to a Bidder of Owner's acceptance of the Bid.

27. *Notice to Proceed*—A written notice by Owner to Contractor fixing the date on which the Contract Times will commence to run and on which Contractor shall start to perform the Work.

28. *Owner*—The individual or entity with which Contractor has contracted regarding the Work, and which has agreed to pay Contractor for the performance of the Work, pursuant to the terms of the Contract.

29. *Progress Schedule*—A schedule, prepared and maintained by Contractor, describing the sequence and duration of the activities comprising the Contractor's plan to accomplish the Work within the Contract Times.

30. *Project*—The total undertaking to be accomplished for Owner by engineers, contractors, and others, including planning, study, design, construction, testing, commissioning, and start-up, and of which the Work to be performed under the Contract Documents is a part.

31. *Project Manual*—The written documents prepared for, or made available for, procuring and constructing the Work, including but not limited to the Bidding Documents or other construction procurement documents, geotechnical and existing conditions information, the Agreement, bond forms, General Conditions, Supplementary Conditions, and Specifications. The contents of the Project Manual may be bound in one or more volumes.

32. *Resident Project Representative*—The authorized representative of Engineer assigned to assist Engineer at the Site. As used herein, the term Resident Project Representative or "RPR" includes any assistants or field staff of Resident Project Representative.

33. *Samples*—Physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and that establish the standards by which such portion of the Work will be judged.

34. *Schedule of Submittals*—A schedule, prepared and maintained by Contractor, of required submittals and the time requirements for Engineer's review of the submittals and the performance of related construction activities.

35. *Schedule of Values*—A schedule, prepared and maintained by Contractor, allocating portions of the Contract Price to various portions of the Work and used as the basis for reviewing Contractor's Applications for Payment.

36. *Shop Drawings*—All drawings, diagrams, illustrations, schedules, and other data or information that are specifically prepared or assembled by or for Contractor and submitted by Contractor to illustrate some portion of the Work. Shop Drawings, whether approved or not, are not Drawings and are not Contract Documents.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

37. *Site*—Lands or areas indicated in the Contract Documents as being furnished by Owner upon which the Work is to be performed, including rights-of-way and easements, and such other lands furnished by Owner which are designated for the use of Contractor.

38. *Specifications*—The part of the Contract that consists of written requirements for materials, equipment, systems, standards, and workmanship as applied to the Work, and certain administrative requirements and procedural matters applicable to the Work.

39. *Subcontractor*—An individual or entity having a direct contract with Contractor or with any other Subcontractor for the performance of a part of the Work.

40. *Substantial Completion*—The time at which the Work (or a specified part thereof) has progressed to the point where, in the opinion of Engineer, the Work (or a specified part thereof) is sufficiently complete, in accordance with the Contract Documents, so that the Work (or a specified part thereof) can be utilized for the purposes for which it is intended. The terms "substantially complete" and "substantially completed" as applied to all or part of the Work refer to Substantial Completion thereof.

41. *Successful Bidder*—The Bidder whose Bid the Owner accepts, and to which the Owner makes an award of contract, subject to stated conditions.

42. *Supplementary Conditions*—The part of the Contract that amends or supplements these General Conditions.

43. *Supplier*—A manufacturer, fabricator, supplier, distributor, materialman, or vendor having a direct contract with Contractor or with any Subcontractor to furnish materials or equipment to be incorporated in the Work by Contractor or a Subcontractor.

44. *Technical Data*—Those items expressly identified as Technical Data in the Supplementary Conditions, with respect to either (a) subsurface conditions at the Site, or physical conditions relating to existing surface or subsurface structures at the Site (except Underground Facilities) or (b) Hazardous Environmental Conditions at the Site. If no such express identifications of Technical Data have been made with respect to conditions at the Site, then the data contained in boring logs, recorded measurements of subsurface water levels, laboratory test results, and other factual, objective information regarding conditions at the Site that are set forth in any geotechnical or environmental report prepared for the Project and made available to Contractor are hereby defined as Technical Data with respect to conditions at the Site under Paragraphs 5.03, 5.04, and 5.06.

45. *Underground Facilities*—All underground pipelines, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any encasements containing such facilities, including but not limited to those that convey electricity, gases, steam, liquid petroleum products, telephone or other communications, fiber optic transmissions, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.

46. *Unit Price Work*—Work to be paid for on the basis of unit prices.

47. *Work*—The entire construction or the various separately identifiable parts thereof required to be provided under the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce such construction; furnishing, installing, and incorporating all materials and equipment into such construction; and may include related services such as testing, start-up, and commissioning, all as required by the Contract Documents.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

48. *Work Change Directive*—A written directive to Contractor issued on or after the Effective Date of the Contract, signed by Owner and recommended by Engineer, ordering an addition, deletion, or revision in the Work.

1.02 Terminology

A. The words and terms discussed in the following paragraphs are not defined but, when used in the Bidding Requirements or Contract Documents, have the indicated meaning.

B. *Intent of Certain Terms or Adjectives*:

1. The Contract Documents include the terms "as allowed," "as approved," "as ordered," "as directed" or terms of like effect or import to authorize an exercise of professional judgment by Engineer. In addition, the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect or import are used to describe an action or determination of Engineer as to the Work. It is intended that such exercise of professional judgment, action, or determination will be solely to evaluate, in general, the Work for compliance with the information in the Contract Documents and with the design concept of the Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term or adjective is not intended to and shall not be effective to assign to Engineer any duty or authority to supervise or direct the performance of the Work, or any duty or authority to undertake responsibility contrary to the provisions of Article 10 or any other provision of the Contract Documents.

C. *Day*:

1. The word "day" means a calendar day of 24 hours measured from midnight to the next midnight.

D. *Defective*:

1. The word "defective," when modifying the word "Work," refers to Work that is unsatisfactory, faulty, or deficient in that it:

a. does not conform to the Contract Documents; or

b. does not meet the requirements of any applicable inspection, reference standard, test, or approval referred to in the Contract Documents; or

c. has been damaged prior to Engineer's recommendation of final payment (unless responsibility for the protection thereof has been assumed by Owner at Substantial Completion in accordance with Paragraph 15.03 or 15.04).

E. *Furnish, Install, Perform, Provide*:

1. The word "furnish," when used in connection with services, materials, or equipment, shall mean to supply and deliver said services, materials, or equipment to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

2. The word "install," when used in connection with services, materials, or equipment, shall mean to put into use or place in final position said services, materials, or equipment complete and ready for intended use.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. The words “perform” or “provide,” when used in connection with services, materials, or equipment, shall mean to furnish and install said services, materials, or equipment complete and ready for intended use.

4. If the Contract Documents establish an obligation of Contractor with respect to specific services, materials, or equipment, but do not expressly use any of the four words “furnish,” “install,” “perform,” or “provide,” then Contractor shall furnish and install said services, materials, or equipment complete and ready for intended use.

F. Unless stated otherwise in the Contract Documents, words or phrases that have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2 – PRELIMINARY MATTERS

2.01 Delivery of Bonds and Evidence of Insurance

A. *Bonds*: When Contractor delivers the executed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner such bonds as Contractor may be required to furnish.

B. *Evidence of Contractor’s Insurance*: When Contractor delivers the executed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner, with copies to each named insured and additional insured (as identified in the Supplementary Conditions or elsewhere in the Contract), the certificates and other evidence of insurance required to be provided by Contractor in accordance with Article 6.

C. *Evidence of Owner’s Insurance*: After receipt of the executed counterparts of the Agreement and all required bonds and insurance documentation, Owner shall promptly deliver to Contractor, with copies to each named insured and additional insured (as identified in the Supplementary Conditions or otherwise), the certificates and other evidence of insurance required to be provided by Owner under Article 6.

2.02 Copies of Documents

A. Owner shall furnish to Contractor four printed copies of the Contract (including one fully executed counterpart of the Agreement), and one copy in electronic portable document format (PDF). Additional printed copies will be furnished upon request at the cost of reproduction.

B. Owner shall maintain and safeguard at least one original printed record version of the Contract, including Drawings and Specifications signed and sealed by Engineer and other design professionals. Owner shall make such original printed record version of the Contract available to Contractor for review. Owner may delegate the responsibilities under this provision to Engineer.

2.03 Before Starting Construction

A. *Preliminary Schedules*: Within 10 days after the Effective Date of the Contract (or as otherwise specifically required by the Contract Documents), Contractor shall submit to Engineer for timely review:

1. a preliminary Progress Schedule indicating the times (numbers of days or dates) for starting and completing the various stages of the Work, including any Milestones specified in the Contract;

2. a preliminary Schedule of Submittals; and

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. a preliminary Schedule of Values for all of the Work which includes quantities and prices of items which when added together equal the Contract Price and subdivides the Work into component parts in sufficient detail to serve as the basis for progress payments during performance of the Work. Such prices will include an appropriate amount of overhead and profit applicable to each item of Work.

2.04 Preconstruction Conference; Designation of Authorized Representatives

A. Before any Work at the Site is started, a conference attended by Owner, Contractor, Engineer, and others as appropriate will be held to establish a working understanding among the parties as to the Work and to discuss the schedules referred to in Paragraph 2.03.A, procedures for handling Shop Drawings, Samples, and other submittals, processing Applications for Payment, electronic or digital transmittals, and maintaining required records.

B. At this conference Owner and Contractor each shall designate, in writing, a specific individual to act as its authorized representative with respect to the services and responsibilities under the Contract. Such individuals shall have the authority to transmit and receive information, render decisions relative to the Contract, and otherwise act on behalf of each respective party.

2.05 Initial Acceptance of Schedules

A. At least 10 days before submission of the first Application for Payment a conference, attended by Contractor, Engineer, and others as appropriate, will be held to review for acceptability to Engineer as provided below the schedules submitted in accordance with Paragraph 2.03.A. Contractor shall have an additional 10 days to make corrections and adjustments and to complete and resubmit the schedules. No progress payment shall be made to Contractor until acceptable schedules are submitted to Engineer.

1. The Progress Schedule will be acceptable to Engineer if it provides an orderly progression of the Work to completion within the Contract Times. Such acceptance will not impose on Engineer responsibility for the Progress Schedule, for sequencing, scheduling, or progress of the Work, nor interfere with or relieve Contractor from Contractor's full responsibility therefor.

2. Contractor's Schedule of Submittals will be acceptable to Engineer if it provides a workable arrangement for reviewing and processing the required submittals.

3. Contractor's Schedule of Values will be acceptable to Engineer as to form and substance if it provides a reasonable allocation of the Contract Price to the component parts of the Work.

2.06 Electronic Transmittals

A. Except as otherwise stated elsewhere in the Contract, the Owner, Engineer, and Contractor may transmit, and shall accept, Project-related correspondence, text, data, documents, drawings, information, and graphics, including but not limited to Shop Drawings and other submittals, in electronic media or digital format, either directly, or through access to a secure Project website.

B. If the Contract does not establish protocols for electronic or digital transmittals, then Owner, Engineer, and Contractor shall jointly develop such protocols.

C. When transmitting items in electronic media or digital format, the transmitting party makes no representations as to long term compatibility, usability, or readability of the items resulting from the recipient's use of software application packages, operating systems, or

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

computer hardware differing from those used in the drafting or transmittal of the items, or from those established in applicable transmittal protocols.

ARTICLE 3 – DOCUMENTS: INTENT, REQUIREMENTS, REUSE

3.01 Intent

A. The Contract Documents are complementary; what is required by one is as binding as if required by all.

B. It is the intent of the Contract Documents to describe a functionally complete project (or part thereof) to be constructed in accordance with the Contract Documents.

C. Unless otherwise stated in the Contract Documents, if there is a discrepancy between the electronic or digital versions of the Contract Documents (including any printed copies derived from such electronic or digital versions) and the printed record version, the printed record version shall govern.

D. The Contract supersedes prior negotiations, representations, and agreements, whether written or oral.

E. Engineer will issue clarifications and interpretations of the Contract Documents as provided herein.

3.02 Reference Standards

A. Standards Specifications, Codes, Laws and Regulations

1. Reference in the Contract Documents to standard specifications, manuals, reference standards, or codes of any technical society, organization, or association, or to Laws or Regulations, whether such reference be specific or by implication, shall mean the standard specification, manual, reference standard, code, or Laws or Regulations in effect at the time of opening of Bids (or on the Effective Date of the Contract if there were no Bids), except as may be otherwise specifically stated in the Contract Documents.

2. No provision of any such standard specification, manual, reference standard, or code, or any instruction of a Supplier, shall be effective to change the duties or responsibilities of Owner, Contractor, or Engineer, or any of their subcontractors, consultants, agents, or employees, from those set forth in the part of the Contract Documents prepared by or for Engineer. No such provision or instruction shall be effective to assign to Owner, Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility inconsistent with the provisions of the part of the Contract Documents prepared by or for Engineer.

3.03 Reporting and Resolving Discrepancies

A. *Reporting Discrepancies*:

1. *Contractor's Verification of Figures and Field Measurements*: Before undertaking each part of the Work, Contractor shall carefully study the Contract Documents, and check and verify pertinent figures and dimensions therein, particularly with respect to applicable field measurements. Contractor shall promptly report in writing to Engineer any conflict, error, ambiguity, or discrepancy that Contractor discovers, or has actual knowledge of, and shall not proceed with any Work affected thereby until the conflict,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

error, ambiguity, or discrepancy is resolved, by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract Documents issued pursuant to Paragraph 11.01.

2. *Contractor's Review of Contract Documents*: If, before or during the performance of the Work, Contractor discovers any conflict, error, ambiguity, or discrepancy within the Contract Documents, or between the Contract Documents and (a) any applicable Law or Regulation, (b) actual field conditions, (c) any standard specification, manual, reference standard, or code, or (d) any instruction of any Supplier, then Contractor shall promptly report it to Engineer in writing. Contractor shall not proceed with the Work affected thereby (except in an emergency as required by Paragraph 7.15) until the conflict, error, ambiguity, or discrepancy is resolved, by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract Documents issued pursuant to Paragraph 11.01.

3. Contractor shall not be liable to Owner or Engineer for failure to report any conflict, error, ambiguity, or discrepancy in the Contract Documents unless Contractor had actual knowledge thereof.

B. *Resolving Discrepancies*:

1. Except as may be otherwise specifically stated in the Contract Documents, the provisions of the part of the Contract Documents prepared by or for Engineer shall take precedence in resolving any conflict, error, ambiguity, or discrepancy between such provisions of the Contract Documents and:

a. the provisions of any standard specification, manual, reference standard, or code, or the instruction of any Supplier (whether or not specifically incorporated by reference as a Contract Document); or

b. the provisions of any Laws or Regulations applicable to the performance of the Work (unless such an interpretation of the provisions of the Contract Documents would result in violation of such Law or Regulation).

3.04 Requirements of the Contract Documents

A. During the performance of the Work and until final payment, Contractor and Owner shall submit to the Engineer all matters in question concerning the requirements of the Contract Documents (sometimes referred to as requests for information or interpretation—RFIs), or relating to the acceptability of the Work under the Contract Documents, as soon as possible after such matters arise. Engineer will be the initial interpreter of the requirements of the Contract Documents, and judge of the acceptability of the Work thereunder.

B. Engineer will, with reasonable promptness, render a written clarification, interpretation, or decision on the issue submitted, or initiate an amendment or supplement to the Contract Documents. Engineer's written clarification, interpretation, or decision will be final and binding on Contractor, unless it appeals by submitting a Change Proposal, and on Owner, unless it appeals by filing a Claim.

C. If a submitted matter in question concerns terms and conditions of the Contract Documents that do not involve (1) the performance or acceptability of the Work under the Contract Documents, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, then Engineer will promptly give written notice to Owner and Contractor that Engineer is unable to provide a decision or interpretation. If Owner and Contractor are unable to agree on resolution of such a matter in question, either party may pursue resolution as provided in Article 12.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3.05 Reuse of Documents

A. Contractor and its Subcontractors and Suppliers shall not:

1. have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Engineer or its consultants, including electronic media editions, or reuse any such Drawings, Specifications, other documents, or copies thereof on extensions of the Project or any other project without written consent of Owner and Engineer and specific written verification or adaptation by Engineer; or

2. have or acquire any title or ownership rights in any other Contract Documents, reuse any such Contract Documents for any purpose without Owner's express written consent, or violate any copyrights pertaining to such Contract Documents.

B. The prohibitions of this Paragraph 3.05 will survive final payment, or termination of the Contract. Nothing herein shall preclude Contractor from retaining copies of the Contract Documents for record purposes.

ARTICLE 4 – COMMENCEMENT AND PROGRESS OF THE WORK

4.01 Commencement of Contract Times; Notice to Proceed

A. The Contract Times will commence to run on the thirtieth day after the Effective Date of the Contract or, if a Notice to Proceed is given, on the day indicated in the Notice to Proceed. A Notice to Proceed may be given at any time within 30 days after the Effective Date of the Contract. In no event will the Contract Times commence to run later than the sixtieth day after the day of Bid opening or the thirtieth day after the Effective Date of the Contract, whichever date is earlier.

4.02 Starting the Work

A. Contractor shall start to perform the Work on the date when the Contract Times commence to run. No Work shall be done at the Site prior to such date.

4.03 Reference Points

A. Owner shall provide engineering surveys to establish reference points for construction which in Engineer's judgment are necessary to enable Contractor to proceed with the Work. Contractor shall be responsible for laying out the Work, shall protect and preserve the established reference points and property monuments, and shall make no changes or relocations without the prior written approval of Owner. Contractor shall report to Engineer whenever any reference point or property monument is lost or destroyed or requires relocation because of necessary changes in grades or locations, and shall be responsible for the accurate replacement or relocation of such reference points or property monuments by professionally qualified personnel.

4.04 Progress Schedule

A. Contractor shall adhere to the Progress Schedule established in accordance with Paragraph 2.05 as it may be adjusted from time to time as provided below.

1. Contractor shall submit to Engineer for acceptance (to the extent indicated in Paragraph 2.05) proposed adjustments in the Progress Schedule that will not result in changing the Contract Times.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. Proposed adjustments in the Progress Schedule that will change the Contract Times shall be submitted in accordance with the requirements of Article 11.

B. Contractor shall carry on the Work and adhere to the Progress Schedule during all disputes or disagreements with Owner. No Work shall be delayed or postponed pending resolution of any disputes or disagreements, or during any appeal process, except as permitted by Paragraph 16.04, or as Owner and Contractor may otherwise agree in writing.

4.05 Delays in Contractor's Progress

A. If Owner, Engineer, or anyone for whom Owner is responsible, delays, disrupts, or interferes with the performance or progress of the Work, then Contractor shall be entitled to an equitable adjustment in the Contract Times and Contract Price. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times.

B. Contractor shall not be entitled to an adjustment in Contract Price or Contract Times for delay, disruption, or interference caused by or within the control of Contractor. Delay, disruption, and interference attributable to and within the control of a Subcontractor or Supplier shall be deemed to be within the control of Contractor.

C. If Contractor's performance or progress is delayed, disrupted, or interfered with by unanticipated causes not the fault of and beyond the control of Owner, Contractor, and those for which they are responsible, then Contractor shall be entitled to an equitable adjustment in Contract Times. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times. Such an adjustment shall be Contractor's sole and exclusive remedy for the delays, disruption, and interference described in this paragraph. Causes of delay, disruption, or interference that may give rise to an adjustment in Contract Times under this paragraph include but are not limited to the following:

1. severe and unavoidable natural catastrophes such as fires, floods, epidemics, and earthquakes;

2. abnormal weather conditions;

3. acts or failures to act of utility owners (other than those performing other work at or adjacent to the Site by arrangement with the Owner, as contemplated in Article 8); and

4. acts of war or terrorism.

D. Delays, disruption, and interference to the performance or progress of the Work resulting from the existence of a differing subsurface or physical condition, an Underground Facility that was not shown or indicated by the Contract Documents, or not shown or indicated with reasonable accuracy, and those resulting from Hazardous Environmental Conditions, are governed by Article 5.

E. Paragraph 8.03 governs delays, disruption, and interference to the performance or progress of the Work resulting from the performance of certain other work at or adjacent to the Site.

F. Contractor shall not be entitled to an adjustment in Contract Price or Contract Times for any delay, disruption, or interference if such delay is concurrent with a delay, disruption, or interference caused by or within the control of Contractor.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

G. Contractor must submit any Change Proposal seeking an adjustment in Contract Price or Contract Times under this paragraph within 30 days of the commencement of the delaying, disrupting, or interfering event.

ARTICLE 5 – AVAILABILITY OF LANDS; SUBSURFACE AND PHYSICAL CONDITIONS; HAZARDOUS ENVIRONMENTAL CONDITIONS

5.01 Availability of Lands

A. Owner shall furnish the Site. Owner shall notify Contractor of any encumbrances or restrictions not of general application but specifically related to use of the Site with which Contractor must comply in performing the Work.

B. Upon reasonable written request, Owner shall furnish Contractor with a current statement of record legal title and legal description of the lands upon which permanent improvements are to be made and Owner's interest therein as necessary for giving notice of or filing a mechanic's or construction lien against such lands in accordance with applicable Laws and Regulations.

C. Contractor shall provide for all additional lands and access thereto that may be required for temporary construction facilities or storage of materials and equipment.

5.02 Use of Site and Other Areas

A. *Limitation on Use of Site and Other Areas*:

1. Contractor shall confine construction equipment, temporary construction facilities, the storage of materials and equipment, and the operations of workers to the Site, adjacent areas that Contractor has arranged to use through construction easements or otherwise, and other adjacent areas permitted by Laws and Regulations, and shall not unreasonably encumber the Site and such other adjacent areas with construction equipment or other materials or equipment. Contractor shall assume full responsibility for (a) damage to the Site; (b) damage to any such other adjacent areas used for Contractor's operations; (c) damage to any other adjacent land or areas; and (d) for injuries and losses sustained by the owners or occupants of any such land or areas; provided that such damage or injuries result from the performance of the Work or from other actions or conduct of the Contractor or those for which Contractor is responsible.

2. If a damage or injury claim is made by the owner or occupant of any such land or area because of the performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible, Contractor shall (a) take immediate corrective or remedial action as required by Paragraph 7.12, or otherwise; (b) promptly attempt to settle the claim as to all parties through negotiations with such owner or occupant, or otherwise resolve the claim by arbitration or other dispute resolution proceeding, or at law; and (c) to the fullest extent permitted by Laws and Regulations, indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against any such claim, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any claim or action, legal or equitable, brought by any such owner or occupant against Owner, Engineer, or any other party indemnified hereunder to the extent caused directly or indirectly, in whole or in part

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

by, or based upon, Contractor's performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible.

B. *Removal of Debris During Performance of the Work*: During the progress of the Work the Contractor shall keep the Site and other adjacent areas free from accumulations of waste materials, rubbish, and other debris. Removal and disposal of such waste materials, rubbish, and other debris shall conform to applicable Laws and Regulations.

C. *Cleaning*: Prior to Substantial Completion of the Work Contractor shall clean the Site and the Work and make it ready for utilization by Owner. At the completion of the Work Contractor shall remove from the Site and adjacent areas all tools, appliances, construction equipment and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

D. *Loading of Structures*: Contractor shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall Contractor subject any part of the Work or adjacent structures or land to stresses or pressures that will endanger them.

5.03 Subsurface and Physical Conditions

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. those reports known to Owner of explorations and tests of subsurface conditions at or adjacent to the Site;

2. those drawings known to Owner of physical conditions relating to existing surface or subsurface structures at the Site (except Underground Facilities); and

3. Technical Data contained in such reports and drawings.

B. *Reliance by Contractor on Technical Data Authorized*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely upon the accuracy of the Technical Data (as defined in Article 1) contained in any geotechnical or environmental report prepared for the Project and made available to Contractor. Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto; or

2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or

3. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions, or information.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.04 Differing Subsurface or Physical Conditions

A. *Notice by Contractor*: If Contractor believes that any subsurface or physical condition that is uncovered or revealed at the Site either:

1. is of such a nature as to establish that any Technical Data on which Contractor is entitled to rely as provided in Paragraph 5.03 is materially inaccurate; or

2. is of such a nature as to require a change in the Drawings or Specifications; or

3. differs materially from that shown or indicated in the Contract Documents; or

4. is of an unusual nature, and differs materially from conditions ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents;

then Contractor shall, promptly after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), notify Owner and Engineer in writing about such condition. Contractor shall not further disturb such condition or perform any Work in connection therewith (except with respect to an emergency) until receipt of a written statement permitting Contractor to do so.

B. *Engineer's Review*: After receipt of written notice as required by the preceding paragraph, Engineer will promptly review the subsurface or physical condition in question; determine the necessity of Owner's obtaining additional exploration or tests with respect to the condition; conclude whether the condition falls within any one or more of the differing site condition categories in Paragraph 5.04.A above; obtain any pertinent cost or schedule information from Contractor; prepare recommendations to Owner regarding the Contractor's resumption of Work in connection with the subsurface or physical condition in question and the need for any change in the Drawings or Specifications; and advise Owner in writing of Engineer's findings, conclusions, and recommendations.

C. *Owner's Statement to Contractor Regarding Site Condition*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the subsurface or physical condition in question, addressing the resumption of Work in connection with such condition, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations, in whole or in part.

D. *Possible Price and Times Adjustments*:

1. Contractor shall be entitled to an equitable adjustment in Contract Price or Contract Times, or both, to the extent that the existence of a differing subsurface or physical condition, or any related delay, disruption, or interference, causes an increase or decrease in Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

a. such condition must fall within any one or more of the categories described in Paragraph 5.04.A;

b. with respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03; and,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

c. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times.

2. Contractor shall not be entitled to any adjustment in the Contract Price or Contract Times with respect to a subsurface or physical condition if:

a. Contractor knew of the existence of such condition at the time Contractor made a commitment to Owner with respect to Contract Price and Contract Times by the submission of a Bid or becoming bound under a negotiated contract, or otherwise; or

b. the existence of such condition reasonably could have been discovered or revealed as a result of any examination, investigation, exploration, test, or study of the Site and contiguous areas expressly required by the Bidding Requirements or Contract Documents to be conducted by or for Contractor prior to Contractor's making such commitment; or

c. Contractor failed to give the written notice as required by Paragraph 5.04.A.

3. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, or both, then any such adjustment shall be set forth in a Change Order.

4. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, or both, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the subsurface or physical condition in question.

5.05 Underground Facilities

A. *Contractor's Responsibilities*: The information and data shown or indicated in the Contract Documents with respect to existing Underground Facilities at or adjacent to the Site is based on information and data furnished to Owner or Engineer by the owners of such Underground Facilities, including Owner, or by others. Unless it is otherwise expressly provided in the Supplementary Conditions:

1. Owner and Engineer do not warrant or guarantee the accuracy or completeness of any such information or data provided by others; and

2. the cost of all of the following will be included in the Contract Price, and Contractor shall have full responsibility for:

a. reviewing and checking all information and data regarding existing Underground Facilities at the Site;

b. locating all Underground Facilities shown or indicated in the Contract Documents as being at the Site;

c. coordination of the Work with the owners (including Owner) of such Underground Facilities, during construction; and

d. the safety and protection of all existing Underground Facilities at the Site, and repairing any damage thereto resulting from the Work.

B. *Notice by Contractor*: If Contractor believes that an Underground Facility that is uncovered or revealed at the Site was not shown or indicated in the Contract Documents, or was not shown or indicated with reasonable accuracy, then Contractor shall, promptly after

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

becoming aware thereof and before further disturbing conditions affected thereby or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), identify the owner of such Underground Facility and give written notice to that owner and to Owner and Engineer.

C. *Engineer's Review*: Engineer will promptly review the Underground Facility and conclude whether such Underground Facility was not shown or indicated in the Contract Documents, or was not shown or indicated with reasonable accuracy; obtain any pertinent cost or schedule information from Contractor; prepare recommendations to Owner regarding the Contractor's resumption of Work in connection with the Underground Facility in question; determine the extent, if any, to which a change is required in the Drawings or Specifications to reflect and document the consequences of the existence or location of the Underground Facility; and advise Owner in writing of Engineer's findings, conclusions, and recommendations. During such time, Contractor shall be responsible for the safety and protection of such Underground Facility.

D. *Owner's Statement to Contractor Regarding Underground Facility*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the Underground Facility in question, addressing the resumption of Work in connection with such Underground Facility, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations in whole or in part.

E. *Possible Price and Times Adjustments*:

1. Contractor shall be entitled to an equitable adjustment in the Contract Price or Contract Times, or both, to the extent that any existing Underground Facility at the Site that was not shown or indicated in the Contract Documents, or was not shown or indicated with reasonable accuracy, or any related delay, disruption, or interference, causes an increase or decrease in Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

    a. Contractor did not know of and could not reasonably have been expected to be aware of or to have anticipated the existence or actual location of the Underground Facility in question;

    b. With respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03;

    c. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times; and

    d. Contractor gave the notice required in Paragraph 5.05.B.

2. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, or both, then any such adjustment shall be set forth in a Change Order.

3. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, or both, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the Underground Facility in question.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.06 Hazardous Environmental Conditions at Site

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. those reports and drawings known to Owner relating to Hazardous Environmental Conditions that have been identified at or adjacent to the Site; and

2. Technical Data contained in such reports and drawings.

B. *Reliance by Contractor on Technical Data Authorized*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely on the accuracy of the Technical Data (as defined in Article 1) contained in any geotechnical or environmental report prepared for the Project and made available to Contractor. Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences and procedures of construction to be employed by Contractor and safety precautions and programs incident thereto; or

2. other data, interpretations, opinions and information contained in such reports or shown or indicated in such drawings; or

3. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions or information.

C. Contractor shall not be responsible for removing or remediating any Hazardous Environmental Condition encountered, uncovered, or revealed at the Site unless such removal or remediation is expressly identified in the Contract Documents to be within the scope of the Work.

D. Contractor shall be responsible for controlling, containing, and duly removing all Constituents of Concern brought to the Site by Contractor, Subcontractors, Suppliers, or anyone else for whom Contractor is responsible, and for any associated costs; and for the costs of removing and remediating any Hazardous Environmental Condition created by the presence of any such Constituents of Concern.

E. If Contractor encounters, uncovers, or reveals a Hazardous Environmental Condition whose removal or remediation is not expressly identified in the Contract Documents as being within the scope of the Work, or if Contractor or anyone for whom Contractor is responsible creates a Hazardous Environmental Condition, then Contractor shall immediately: (1) secure or otherwise isolate such condition; (2) stop all Work in connection with such condition and in any area affected thereby (except in an emergency as required by Paragraph 7.15); and (3) notify Owner and Engineer (and promptly thereafter confirm such notice in writing). Owner shall promptly consult with Engineer concerning the necessity for Owner to retain a qualified expert to evaluate such condition or take corrective action, if any. Promptly after consulting with Engineer, Owner shall take such actions as are necessary to permit Owner to timely obtain required permits and provide Contractor the written notice required by Paragraph 5.06.F. If Contractor or anyone for whom Contractor is responsible created the Hazardous Environmental Condition in question, then Owner may remove and remediate the Hazardous Environmental Condition, and impose a set-off against payments to account for the associated costs.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

F. Contractor shall not resume Work in connection with such Hazardous Environmental Condition or in any affected area until after Owner has obtained any required permits related thereto, and delivered written notice to Contractor either (1) specifying that such condition and any affected area is or has been rendered safe for the resumption of Work, or (2) specifying any special conditions under which such Work may be resumed safely.

G. If Owner and Contractor cannot agree as to entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times, or both, as a result of such Work stoppage or such special conditions under which Work is agreed to be resumed by Contractor, then within 30 days of Owner's written notice regarding the resumption of Work, Contractor may submit a Change Proposal, or Owner may impose a set-off.

H. If after receipt of such written notice Contractor does not agree to resume such Work based on a reasonable belief it is unsafe, or does not agree to resume such Work under such special conditions, then Owner may order the portion of the Work that is in the area affected by such condition to be deleted from the Work, following the contractual change procedures in Article 11. Owner may have such deleted portion of the Work performed by Owner's own forces or others in accordance with Article 8.

I. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition, provided that such Hazardous Environmental Condition (1) was not shown or indicated in the Drawings, Specifications, or other Contract Documents, identified as Technical Data entitled to limited reliance pursuant to Paragraph 5.06.B, or identified in the Contract Documents to be included within the scope of the Work, and (2) was not created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.I shall obligate Owner to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

J. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to the failure to control, contain, or remove a Constituent of Concern brought to the Site by Contractor or by anyone for whom Contractor is responsible, or to a Hazardous Environmental Condition created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.J shall obligate Contractor to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

K. The provisions of Paragraphs 5.03, 5.04, and 5.05 do not apply to the presence of Constituents of Concern or to a Hazardous Environmental Condition uncovered or revealed at the Site.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 6 – BONDS AND INSURANCE

6.01 Performance, Payment, and Other Bonds

A. Contractor shall furnish a performance bond and a payment bond, each in an amount at least equal to the Contract Price, as security for the faithful performance and payment of all of Contractor's obligations under the Contract. These bonds shall remain in effect until one year after the date when final payment becomes due or until completion of the correction period specified in Paragraph 15.08, whichever is later, except as provided otherwise by Laws or Regulations, the Supplementary Conditions, or other specific provisions of the Contract. Contractor shall also furnish such other bonds as are required by the Supplementary Conditions or other specific provisions of the Contract.

B. All bonds shall be in the form prescribed by the Contract except as provided otherwise by Laws or Regulations, and shall be executed by such sureties as are named in "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Circular 570 (as amended and supplemented) by the Financial Management Service, Surety Bond Branch, U.S. Department of the Treasury. A bond signed by an agent or attorney-in-fact must be accompanied by a certified copy of that individual's authority to bind the surety. The evidence of authority shall show that it is effective on the date the agent or attorney-in-fact signed the accompanying bond.

C. Contractor shall obtain the required bonds from surety companies that are duly licensed or authorized in the jurisdiction in which the Project is located to issue bonds in the required amounts.

D. If the surety on a bond furnished by Contractor is declared bankrupt or becomes insolvent, or its right to do business is terminated in any state or jurisdiction where any part of the Project is located, or the surety ceases to meet the requirements above, then Contractor shall promptly notify Owner and Engineer and shall, within 20 days after the event giving rise to such notification, provide another bond and surety, both of which shall comply with the bond and surety requirements above.

E. If Contractor has failed to obtain a required bond, Owner may exclude the Contractor from the Site and exercise Owner's termination rights under Article 16.

F. Upon request, Owner shall provide a copy of the payment bond to any Subcontractor, Supplier, or other person or entity claiming to have furnished labor or materials used in the performance of the Work.

6.02 Insurance—General Provisions

A. Owner and Contractor shall obtain and maintain insurance as required in this Article and in the Supplementary Conditions.

B. All insurance required by the Contract to be purchased and maintained by Owner or Contractor shall be obtained from insurance companies that are duly licensed or authorized, in the state or jurisdiction in which the Project is located, to issue insurance policies for the required limits and coverages. Unless a different standard is indicated in the Supplementary Conditions, all companies that provide insurance policies required under this Contract shall have an A.M. Best rating of A-VII or better.

C. Contractor shall deliver to Owner, with copies to each named insured and additional insured (as identified in this Article, in the Supplementary Conditions, or elsewhere in the Contract), certificates of insurance establishing that Contractor has obtained and is

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

maintaining the policies, coverages, and endorsements required by the Contract. Upon request by Owner or any other insured, Contractor shall also furnish other evidence of such required insurance, including but not limited to copies of policies and endorsements, and documentation of applicable self-insured retentions and deductibles. Contractor may block out (redact) any confidential premium or pricing information contained in any policy or endorsement furnished under this provision.

D. Owner shall deliver to Contractor, with copies to each named insured and additional insured (as identified in this Article, the Supplementary Conditions, or elsewhere in the Contract), certificates of insurance establishing that Owner has obtained and is maintaining the policies, coverages, and endorsements required of Owner by the Contract (if any). Upon request by Contractor or any other insured, Owner shall also provide other evidence of such required insurance (if any), including but not limited to copies of policies and endorsements, and documentation of applicable self-insured retentions and deductibles. Owner may block out (redact) any confidential premium or pricing information contained in any policy or endorsement furnished under this provision.

E. Failure of Owner or Contractor to demand such certificates or other evidence of the other party's full compliance with these insurance requirements, or failure of Owner or Contractor to identify a deficiency in compliance from the evidence provided, shall not be construed as a waiver of the other party's obligation to obtain and maintain such insurance.

F. If either party does not purchase or maintain all of the insurance required of such party by the Contract, such party shall notify the other party in writing of such failure to purchase prior to the start of the Work, or of such failure to maintain prior to any change in the required coverage.

G. If Contractor has failed to obtain and maintain required insurance, Owner may exclude the Contractor from the Site, impose an appropriate set-off against payment, and exercise Owner's termination rights under Article 16.

H. Without prejudice to any other right or remedy, if a party has failed to obtain required insurance, the other party may elect to obtain equivalent insurance to protect such other party's interests at the expense of the party who was required to provide such coverage, and the Contract Price shall be adjusted accordingly.

I. Owner does not represent that insurance coverage and limits established in this Contract necessarily will be adequate to protect Contractor or Contractor's interests.

J. The insurance and insurance limits required herein shall not be deemed as a limitation on Contractor's liability under the indemnities granted to Owner and other individuals and entities in the Contract.

6.03 Contractor's Insurance

A. *Workers' Compensation*: Contractor shall purchase and maintain workers' compensation and employer's liability insurance for:

1. claims under workers' compensation, disability benefits, and other similar employee benefit acts.

2. United States Longshoreman and Harbor Workers' Compensation Act and Jones Act coverage (if applicable).

3. claims for damages because of bodily injury, occupational sickness or disease, or death of Contractor's employees (by stop-gap endorsement in monopolist worker's compensation states).

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

4. Foreign voluntary worker compensation (if applicable).

B. *Commercial General Liability—Claims Covered*: Contractor shall purchase and maintain commercial general liability insurance, covering all operations by or on behalf of Contractor, on an occurrence basis, against:

1. claims for damages because of bodily injury, sickness or disease, or death of any person other than Contractor's employees.

2. claims for damages insured by reasonably available personal injury liability coverage.

3. claims for damages, other than to the Work itself, because of injury to or destruction of tangible property wherever located, including loss of use resulting therefrom.

C. *Commercial General Liability—Form and Content*: Contractor's commercial liability policy shall be written on a 1996 (or later) ISO commercial general liability form (occurrence form) and include the following coverages and endorsements:

1. Products and completed operations coverage:

a. Such insurance shall be maintained for three years after final payment.

b. Contractor shall furnish Owner and each other additional insured (as identified in the Supplementary Conditions or elsewhere in the Contract) evidence of continuation of such insurance at final payment and three years thereafter.

2. Blanket contractual liability coverage, to the extent permitted by law, including but not limited to coverage of Contractor's contractual indemnity obligations in Paragraph 7.18.

3. Broad form property damage coverage.

4. Severability of interest.

5. Underground, explosion, and collapse coverage.

6. Personal injury coverage.

7. Additional insured endorsements that include both ongoing operations and products and completed operations coverage through ISO Endorsements CG 20 10 10 01 and CG 20 37 10 01 (together); or CG 20 10 07 04 and CG 20 37 07 04 (together); or their equivalent.

8. For design professional additional insureds, ISO Endorsement CG 20 32 07 04, "Additional Insured—Engineers, Architects or Surveyors Not Engaged by the Named Insured" or its equivalent.

D. *Automobile liability*: Contractor shall purchase and maintain automobile liability insurance against claims for damages because of bodily injury or death of any person or property damage arising out of the ownership, maintenance, or use of any motor vehicle. The automobile liability policy shall be written on an occurrence basis.

E. *Umbrella or excess liability*: Contractor shall purchase and maintain umbrella or excess liability insurance written over the underlying employer's liability, commercial general liability, and automobile liability insurance described in the paragraphs above. Subject to industry-standard exclusions, the coverage afforded shall follow form as to each and every one of the underlying policies.

F. *Contractor's pollution liability insurance*: Contractor shall purchase and maintain a policy covering third-party injury and property damage claims, including clean-up costs, as a result

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

of pollution conditions arising from Contractor's operations and completed operations. This insurance shall be maintained for no less than three years after final completion.

G. *Additional insureds*: The Contractor's commercial general liability, automobile liability, umbrella or excess, and pollution liability policies shall include and list as additional insureds Owner and Engineer, and any individuals or entities identified in the Supplementary Conditions; include coverage for the respective officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of all such additional insureds; and the insurance afforded to these additional insureds shall provide primary coverage for all claims covered thereby (including as applicable those arising from both ongoing and completed operations) on a non-contributory basis. Contractor shall obtain all necessary endorsements to support these requirements.

H. *Contractor's professional liability insurance*: If Contractor will provide or furnish professional services under this Contract, through a delegation of professional design services or otherwise, then Contractor shall be responsible for purchasing and maintaining applicable professional liability insurance. This insurance shall provide protection against claims arising out of performance of professional design or related services, and caused by a negligent error, omission, or act for which the insured party is legally liable. It shall be maintained throughout the duration of the Contract and for a minimum of two years after Substantial Completion. If such professional design services are performed by a Subcontractor, and not by Contractor itself, then the requirements of this paragraph may be satisfied through the purchasing and maintenance of such insurance by such Subcontractor.

I. *General provisions*: The policies of insurance required by this Paragraph 6.03 shall:

1. include at least the specific coverages provided in this Article.
2. be written for not less than the limits of liability provided in this Article and in the Supplementary Conditions, or required by Laws or Regulations, whichever is greater.
3. contain a provision or endorsement that the coverage afforded will not be canceled, materially changed, or renewal refused until at least 10 days prior written notice has been given to Contractor. Within three days of receipt of any such written notice, Contractor shall provide a copy of the notice to Owner, Engineer, and each other insured under the policy.
4. remain in effect at least until final payment (and longer if expressly required in this Article) and at all times thereafter when Contractor may be correcting, removing, or replacing defective Work as a warranty or correction obligation, or otherwise, or returning to the Site to conduct other tasks arising from the Contract Documents.
5. be appropriate for the Work being performed and provide protection from claims that may arise out of or result from Contractor's performance of the Work and Contractor's other obligations under the Contract Documents, whether it is to be performed by Contractor, any Subcontractor or Supplier, or by anyone directly or indirectly employed by any of them to perform any of the Work, or by anyone for whose acts any of them may be liable.

J. The coverage requirements for specific policies of insurance must be met by such policies, and not by reference to excess or umbrella insurance provided in other policies.

6.04 Owner's Liability Insurance

A. In addition to the insurance required to be provided by Contractor under Paragraph 6.03, Owner, at Owner's option, may purchase and maintain at Owner's expense Owner's own liability insurance as will protect Owner against claims which may arise from operations under the Contract Documents.

B. Owner's liability policies, if any, operate separately and independently from policies required to be provided by Contractor, and Contractor cannot rely upon Owner's liability policies for any of Contractor's obligations to the Owner, Engineer, or third parties.

6.05 Property Insurance

A. *Builder's Risk*: Unless otherwise provided in the Supplementary Conditions, Contractor shall purchase and maintain builder's risk insurance upon the Work on a completed value basis, in the amount of the full insurable replacement cost thereof (subject to such deductible amounts as may be provided in the Supplementary Conditions or required by Laws and Regulations). This insurance shall:

1. include the Owner and Contractor as named insureds, and all Subcontractors, and any individuals or entities required by the Supplementary Conditions to be insured under such builder's risk policy, as insureds or named insureds. For purposes of the remainder of this Paragraph 6.05, Paragraphs 6.06 and 6.07, and any corresponding Supplementary Conditions, the parties required to be insured shall collectively be referred to as "insureds."

2. be written on a builder's risk "all risk" policy form that shall at least include insurance for physical loss or damage to the Work, temporary buildings, falsework, and materials and equipment in transit, and shall insure against at least the following perils or causes of loss: fire; lightning; windstorm; riot; civil commotion; terrorism; vehicle impact; aircraft; smoke; theft; vandalism and malicious mischief; mechanical breakdown, boiler explosion, and artificially generated electric current; earthquake; volcanic activity, and other earth movement; flood; collapse; explosion; debris removal; demolition occasioned by enforcement of Laws and Regulations; water damage (other than that caused by flood); and such other perils or causes of loss as may be specifically required by the Supplementary Conditions. If insurance against mechanical breakdown, boiler explosion, and artificially generated electric current; earthquake; volcanic activity, and other earth movement; or flood, are not commercially available under builder's risk policies, by endorsement or otherwise, such insurance may be provided through other insurance policies acceptable to Owner and Contractor.

3. cover, as insured property, at least the following: (a) the Work and all materials, supplies, machinery, apparatus, equipment, fixtures, and other property of a similar nature that are to be incorporated into or used in the preparation, fabrication, construction, erection, or completion of the Work, including Owner-furnished or assigned property; (b) spare parts inventory required within the scope of the Contract; and (c) temporary works which are not intended to form part of the permanent constructed Work but which are intended to provide working access to the Site, or to the Work under construction, or which are intended to provide temporary support for the Work under construction, including scaffolding, form work, fences, shoring, falsework, and temporary structures.

4. cover expenses incurred in the repair or replacement of any insured property (including but not limited to fees and charges of engineers and architects).

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5. extend to cover damage or loss to insured property while in temporary storage at the Site or in a storage location outside the Site (but not including property stored at the premises of a manufacturer or Supplier).

6. extend to cover damage or loss to insured property while in transit.

7. allow for partial occupation or use of the Work by Owner, such that those portions of the Work that are not yet occupied or used by Owner shall remain covered by the builder's risk insurance.

8. allow for the waiver of the insurer's subrogation rights, as set forth below.

9. provide primary coverage for all losses and damages caused by the perils or causes of loss covered.

10. not include a co-insurance clause.

11. include an exception for ensuing losses from physical damage or loss with respect to any defective workmanship, design, or materials exclusions.

12. include performance/hot testing and start-up.

13. be maintained in effect, subject to the provisions herein regarding Substantial Completion and partial occupancy or use of the Work by Owner, until the Work is complete.

B. *Notice of Cancellation or Change*: All the policies of insurance (and the certificates or other evidence thereof) required to be purchased and maintained in accordance with this Paragraph 6.05 will contain a provision or endorsement that the coverage afforded will not be canceled or materially changed or renewal refused until at least 10 days prior written notice has been given to the purchasing policyholder. Within three days of receipt of any such written notice, the purchasing policyholder shall provide a copy of the notice to each other insured.

C. *Deductibles*: The purchaser of any required builder's risk or property insurance shall pay for costs not covered because of the application of a policy deductible.

D. *Partial Occupancy or Use by Owner*: If Owner will occupy or use a portion or portions of the Work prior to Substantial Completion of all the Work as provided in Paragraph 15.04, then Owner (directly, if it is the purchaser of the builder's risk policy, or through Contractor) will provide notice of such occupancy or use to the builder's risk insurer. The builder's risk insurance shall not be canceled or permitted to lapse on account of any such partial use or occupancy; rather, those portions of the Work that are occupied or used by Owner may come off the builder's risk policy, while those portions of the Work not yet occupied or used by Owner shall remain covered by the builder's risk insurance.

E. *Additional Insurance*: If Contractor elects to obtain other special insurance to be included in or supplement the builder's risk or property insurance policies provided under this Paragraph 6.05, it may do so at Contractor's expense.

F. *Insurance of Other Property*: If the express insurance provisions of the Contract do not require or address the insurance of a property item or interest, such as tools, construction equipment, or other personal property owned by Contractor, a Subcontractor, or an employee of Contractor or a Subcontractor, then the entity or individual owning such property item will be responsible for deciding whether to insure it, and if so in what amount.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

6.06 Waiver of Rights

A. All policies purchased in accordance with Paragraph 6.05, expressly including the builder's risk policy, shall contain provisions to the effect that in the event of payment of any loss or damage the insurers will have no rights of recovery against any insureds thereunder, or against Engineer or its consultants, or their officers, directors, members, partners, employees, agents, consultants, or subcontractors. Owner and Contractor waive all rights against each other and the respective officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, or resulting from any of the perils or causes of loss covered by such policies and any other property insurance applicable to the Work; and, in addition, waive all such rights against Engineer, its consultants, all Subcontractors, all individuals or entities identified in the Supplementary Conditions as insureds, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, under such policies for losses and damages so caused. None of the above waivers shall extend to the rights that any party making such waiver may have to the proceeds of insurance held by Owner or Contractor as trustee or fiduciary, or otherwise payable under any policy so issued.

B. Owner waives all rights against Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, for:

1. loss due to business interruption, loss of use, or other consequential loss extending beyond direct physical loss or damage to Owner's property or the Work caused by, arising out of, or resulting from fire or other perils whether or not insured by Owner; and

2. loss or damage to the completed Project or part thereof caused by, arising out of, or resulting from fire or other insured peril or cause of loss covered by any property insurance maintained on the completed Project or part thereof by Owner during partial occupancy or use pursuant to Paragraph 15.04, after Substantial Completion pursuant to Paragraph 15.03, or after final payment pursuant to Paragraph 15.06.

C. Any insurance policy maintained by Owner covering any loss, damage or consequential loss referred to in Paragraph 6.06.B shall contain provisions to the effect that in the event of payment of any such loss, damage, or consequential loss, the insurers will have no rights of recovery against Contractor, Subcontractors, or Engineer, or the officers, directors, members, partners, employees, agents, consultants, or subcontractors of each and any of them.

D. Contractor shall be responsible for assuring that the agreement under which a Subcontractor performs a portion of the Work contains provisions whereby the Subcontractor waives all rights against Owner, Contractor, all individuals or entities identified in the Supplementary Conditions as insureds, the Engineer and its consultants, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, relating to, or resulting from any of the perils or causes of loss covered by builder's risk insurance and any other property insurance applicable to the Work.

6.07 Receipt and Application of Property Insurance Proceeds

A. Any insured loss under the builder's risk and other policies of insurance required by Paragraph 6.05 will be adjusted and settled with the named insured that purchased the

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

policy. Such named insured shall act as fiduciary for the other insureds, and give notice to such other insureds that adjustment and settlement of a claim is in progress. Any other insured may state its position regarding a claim for insured loss in writing within 15 days after notice of such claim.

B. Proceeds for such insured losses may be made payable by the insurer either jointly to multiple insureds, or to the named insured that purchased the policy in its own right and as fiduciary for other insureds, subject to the requirements of any applicable mortgage clause. A named insured receiving insurance proceeds under the builder's risk and other policies of insurance required by Paragraph 6.05 shall distribute such proceeds in accordance with such agreement as the parties in interest may reach, or as otherwise required under the dispute resolution provisions of this Contract or applicable Laws and Regulations.

C. If no other special agreement is reached, the damaged Work shall be repaired or replaced, the money so received applied on account thereof, and the Work and the cost thereof covered by Change Order, if needed.

ARTICLE 7 – CONTRACTOR'S RESPONSIBILITIES

7.01 Supervision and Superintendence

A. Contractor shall supervise, inspect, and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents. Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction.

B. At all times during the progress of the Work, Contractor shall assign a competent resident superintendent who shall not be replaced without written notice to Owner and Engineer except under extraordinary circumstances.

7.02 Labor; Working Hours

A. Contractor shall provide competent, suitably qualified personnel to survey and lay out the Work and perform construction as required by the Contract Documents. Contractor shall at all times maintain good discipline and order at the Site.

B. Except as otherwise required for the safety or protection of persons or the Work or property at the Site or adjacent thereto, and except as otherwise stated in the Contract Documents, all Work at the Site shall be performed during regular working hours, Monday through Friday. Contractor will not perform Work on a Saturday, Sunday, or any legal holiday. Contractor may perform Work outside regular working hours or on Saturdays, Sundays, or legal holidays only with Owner's written consent, which will not be unreasonably withheld.

7.03 Services, Materials, and Equipment

A. Unless otherwise specified in the Contract Documents, Contractor shall provide and assume full responsibility for all services, materials, equipment, labor, transportation, construction equipment and machinery, tools, appliances, fuel, power, light, heat, telephone, water, sanitary facilities, temporary facilities, and all other facilities and incidentals necessary for the performance, testing, start up, and completion of the Work, whether or not such items are specifically called for in the Contract Documents.

B. All materials and equipment incorporated into the Work shall be of good quality and new, except as otherwise provided in the Contract Documents. All special warranties and

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

guarantees required by the Specifications shall expressly run to the benefit of Owner. If required by Engineer, Contractor shall furnish satisfactory evidence (including reports of required tests) as to the source, kind, and quality of materials and equipment.

C. All materials and equipment shall be stored, applied, installed, connected, erected, protected, used, cleaned, and conditioned in accordance with instructions of the applicable Supplier, except as otherwise may be provided in the Contract Documents.

7.04 "Or Equals"

A. Whenever an item of material or equipment is specified or described in the Contract Documents by using the name of a proprietary item or the name of a particular Supplier, the Contract Price has been based upon Contractor furnishing such item as specified. The specification or description of such an item is intended to establish the type, function, appearance, and quality required. Unless the specification or description contains or is followed by words reading that no like, equivalent, or "or equal" item is permitted, Contractor may request that Engineer authorize the use of other items of material or equipment, or items from other proposed suppliers under the circumstances described below.

1. If Engineer in its sole discretion determines that an item of material or equipment proposed by Contractor is functionally equal to that named and sufficiently similar so that no change in related Work will be required, Engineer shall deem it an "or equal" item. For the purposes of this paragraph, a proposed item of material or equipment will be considered functionally equal to an item so named if:

a. in the exercise of reasonable judgment Engineer determines that:

1) it is at least equal in materials of construction, quality, durability, appearance, strength, and design characteristics;

2) it will reliably perform at least equally well the function and achieve the results imposed by the design concept of the completed Project as a functioning whole;

3) it has a proven record of performance and availability of responsive service; and

4) it is not objectionable to Owner.

b. Contractor certifies that, if approved and incorporated into the Work:

1) there will be no increase in cost to the Owner or increase in Contract Times; and

2) it will conform substantially to the detailed requirements of the item named in the Contract Documents.

B. *Contractor's Expense*: Contractor shall provide all data in support of any proposed "or equal" item at Contractor's expense.

C. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each "or-equal" request. Engineer may require Contractor to furnish additional data about the proposed "or-equal" item. Engineer will be the sole judge of acceptability. No "or-equal" item will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an "or-equal", which will be evidenced by an approved Shop Drawing or other written communication. Engineer will advise Contractor in writing of any negative determination.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. *Effect of Engineer's Determination*: Neither approval nor denial of an "or-equal" request shall result in any change in Contract Price. The Engineer's denial of an "or-equal" request shall be final and binding, and may not be reversed through an appeal under any provision of the Contract Documents.

E. *Treatment as a Substitution Request*: If Engineer determines that an item of material or equipment proposed by Contractor does not qualify as an "or-equal" item, Contractor may request that Engineer considered the proposed item as a substitute pursuant to Paragraph 7.05.

7.05 Substitutes

A. Unless the specification or description of an item of material or equipment required to be furnished under the Contract Documents contains or is followed by words reading that no substitution is permitted, Contractor may request that Engineer authorize the use of other items of material or equipment under the circumstances described below. To the extent possible such requests shall be made before commencement of related construction at the Site.

1. Contractor shall submit sufficient information as provided below to allow Engineer to determine if the item of material or equipment proposed is functionally equivalent to that named and an acceptable substitute therefor. Engineer will not accept requests for review of proposed substitute items of material or equipment from anyone other than Contractor.

2. The requirements for review by Engineer will be as set forth in Paragraph 7.05.B, as supplemented by the Specifications, and as Engineer may decide is appropriate under the circumstances.

3. Contractor shall make written application to Engineer for review of a proposed substitute item of material or equipment that Contractor seeks to furnish or use. The application:

a. shall certify that the proposed substitute item will:

1) perform adequately the functions and achieve the results called for by the general design,

2) be similar in substance to that specified, and

3) be suited to the same use as that specified.

b. will state:

1) the extent, if any, to which the use of the proposed substitute item will necessitate a change in Contract Times,

2) whether use of the proposed substitute item in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with Owner for other work on the Project) to adapt the design to the proposed substitute item, and

3) whether incorporation or use of the proposed substitute item in connection with the Work is subject to payment of any license fee or royalty.

c. will identify:

1) all variations of the proposed substitute item from that specified, and

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2) available engineering, sales, maintenance, repair, and replacement services.

d. shall contain an itemized estimate of all costs or credits that will result directly or indirectly from use of such substitute item, including but not limited to changes in Contract Price, shared savings, costs of redesign, and claims of other contractors affected by any resulting change.

B. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each substitute request, and to obtain comments and direction from Owner. Engineer may require Contractor to furnish additional data about the proposed substitute item. Engineer will be the sole judge of acceptability. No substitute will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an acceptable substitute. Engineer's determination will be evidenced by a Field Order or a proposed Change Order accounting for the substitution itself and all related impacts, including changes in Contract Price or Contract Times. Engineer will advise Contractor in writing of any negative determination.

C. *Special Guarantee*: Owner may require Contractor to furnish at Contractor's expense a special performance guarantee or other surety with respect to any substitute.

D. *Reimbursement of Engineer's Cost*: Engineer will record Engineer's costs in evaluating a substitute proposed or submitted by Contractor. Whether or not Engineer approves a substitute so proposed or submitted by Contractor, Contractor shall reimburse Owner for the reasonable charges of Engineer for evaluating each such proposed substitute. Contractor shall also reimburse Owner for the reasonable charges of Engineer for making changes in the Contract Documents (or in the provisions of any other direct contract with Owner) resulting from the acceptance of each proposed substitute.

E. *Contractor's Expense*: Contractor shall provide all data in support of any proposed substitute at Contractor's expense.

F. *Effect of Engineer's Determination*: If Engineer approves the substitution request, Contractor shall execute the proposed Change Order and proceed with the substitution. The Engineer's denial of a substitution request shall be final and binding, and may not be reversed through an appeal under any provision of the Contract Documents. Contractor may challenge the scope of reimbursement costs imposed under Paragraph 7.05.D, by timely submittal of a Change Proposal.

7.06 Concerning Subcontractors, Suppliers, and Others

A. Contractor may retain Subcontractors and Suppliers for the performance of parts of the Work. Such Subcontractors and Suppliers must be acceptable to Owner.

B. Contractor shall retain specific Subcontractors, Suppliers, or other individuals or entities for the performance of designated parts of the Work if required by the Contract to do so.

C. Subsequent to the submittal of Contractor's Bid or final negotiation of the terms of the Contract, Owner may not require Contractor to retain any Subcontractor, Supplier, or other individual or entity to furnish or perform any of the Work against which Contractor has reasonable objection.

D. Prior to entry into any binding subcontract or purchase order, Contractor shall submit to Owner the identity of the proposed Subcontractor or Supplier (unless Owner has already deemed such proposed Subcontractor or Supplier acceptable, during the bidding process or otherwise). Such proposed Subcontractor or Supplier shall be deemed acceptable to Owner unless Owner raises a substantive, reasonable objection within five days.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. Owner may require the replacement of any Subcontractor, Supplier, or other individual or entity retained by Contractor to perform any part of the Work. Owner also may require Contractor to retain specific replacements; provided, however, that Owner may not require a replacement to which Contractor has a reasonable objection. If Contractor has submitted the identity of certain Subcontractors, Suppliers, or other individuals or entities for acceptance by Owner, and Owner has accepted it (either in writing or by failing to make written objection thereto), then Owner may subsequently revoke the acceptance of any such Subcontractor, Supplier, or other individual or entity so identified solely on the basis of substantive, reasonable objection after due investigation. Contractor shall submit an acceptable replacement for the rejected Subcontractor, Supplier, or other individual or entity.

F. If Owner requires the replacement of any Subcontractor, Supplier, or other individual or entity retained by Contractor to perform any part of the Work, then Contractor shall be entitled to an adjustment in Contract Price or Contract Times, or both, with respect to the replacement; and Contractor shall initiate a Change Proposal for such adjustment within 30 days of Owner's requirement of replacement.

G. No acceptance by Owner of any such Subcontractor, Supplier, or other individual or entity, whether initially or as a replacement, shall constitute a waiver of the right of Owner to the completion of the Work in accordance with the Contract Documents.

H. On a monthly basis Contractor shall submit to Engineer a complete list of all Subcontractors and Suppliers having a direct contract with Contractor, and of all other Subcontractors and Suppliers known to Contractor at the time of submittal.

I. Contractor shall be fully responsible to Owner and Engineer for all acts and omissions of the Subcontractors, Suppliers, and other individuals or entities performing or furnishing any of the Work just as Contractor is responsible for Contractor's own acts and omissions.

J. Contractor shall be solely responsible for scheduling and coordinating the work of Subcontractors, Suppliers, and all other individuals or entities performing or furnishing any of the Work.

K. Contractor shall restrict all Subcontractors, Suppliers, and such other individuals or entities performing or furnishing any of the Work from communicating with Engineer or Owner, except through Contractor or in case of an emergency, or as otherwise expressly allowed herein.

L. The divisions and sections of the Specifications and the identifications of any Drawings shall not control Contractor in dividing the Work among Subcontractors or Suppliers or delineating the Work to be performed by any specific trade.

M. All Work performed for Contractor by a Subcontractor or Supplier shall be pursuant to an appropriate contractual agreement that specifically binds the Subcontractor or Supplier to the applicable terms and conditions of the Contract Documents for the benefit of Owner and Engineer.

N. Owner may furnish to any Subcontractor or Supplier, to the extent practicable, information about amounts paid to Contractor on account of Work performed for Contractor by the particular Subcontractor or Supplier.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

O. Nothing in the Contract Documents:

1. shall create for the benefit of any such Subcontractor, Supplier, or other individual or entity any contractual relationship between Owner or Engineer and any such Subcontractor, Supplier, or other individual or entity; nor

2. shall create any obligation on the part of Owner or Engineer to pay or to see to the payment of any money due any such Subcontractor, Supplier, or other individual or entity except as may otherwise be required by Laws and Regulations.

7.07 Patent Fees and Royalties

A. Contractor shall pay all license fees and royalties and assume all costs incident to the use in the performance of the Work or the incorporation in the Work of any invention, design, process, product, or device which is the subject of patent rights or copyrights held by others. If a particular invention, design, process, product, or device is specified in the Contract Documents for use in the performance of the Work and if, to the actual knowledge of Owner or Engineer, its use is subject to patent rights or copyrights calling for the payment of any license fee or royalty to others, the existence of such rights shall be disclosed by Owner in the Contract Documents.

B. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, and its officers, directors, members, partners, employees, agents, consultants, and subcontractors from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device specified in the Contract Documents, but not identified as being subject to payment of any license fee or royalty to others required by patent rights or copyrights.

C. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device not specified in the Contract Documents.

7.08 Permits

A. Unless otherwise provided in the Contract Documents, Contractor shall obtain and pay for all construction permits and licenses. Owner shall assist Contractor, when necessary, in obtaining such permits and licenses. Contractor shall pay all governmental charges and inspection fees necessary for the prosecution of the Work which are applicable at the time of the submission of Contractor's Bid (or when Contractor became bound under a negotiated contract). Owner shall pay all charges of utility owners for connections for providing permanent service to the Work

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.09 Taxes

A. Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid by Contractor in accordance with the Laws and Regulations of the place of the Project which are applicable during the performance of the Work.

7.10 Laws and Regulations

A. Contractor shall give all notices required by and shall comply with all Laws and Regulations applicable to the performance of the Work. Except where otherwise expressly required by applicable Laws and Regulations, neither Owner nor Engineer shall be responsible for monitoring Contractor's compliance with any Laws or Regulations.

B. If Contractor performs any Work or takes any other action knowing or having reason to know that it is contrary to Laws or Regulations, Contractor shall bear all resulting costs and losses, and shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such Work or other action. It shall not be Contractor's responsibility to make certain that the Work described in the Contract Documents is in accordance with Laws and Regulations, but this shall not relieve Contractor of Contractor's obligations under Paragraph 3.03.

C. Owner or Contractor may give notice to the other party of any changes after the submission of Contractor's Bid (or after the date when Contractor became bound under a negotiated contract) in Laws or Regulations having an effect on the cost or time of performance of the Work, including but not limited to changes in Laws or Regulations having an effect on procuring permits and on sales, use, value-added, consumption, and other similar taxes. If Owner and Contractor are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times resulting from such changes, then within 30 days of such notice Contractor may submit a Change Proposal, or Owner may initiate a Claim.

7.11 Record Documents

A. Contractor shall maintain in a safe place at the Site one printed record copy of all Drawings, Specifications, Addenda, Change Orders, Work Change Directives, Field Orders, written interpretations and clarifications, and approved Shop Drawings. Contractor shall keep such record documents in good order and annotate them to show changes made during construction. These record documents, together with all approved Samples, will be available to Engineer for reference. Upon completion of the Work, Contractor shall deliver these record documents to Engineer.

7.12 Safety and Protection

A. Contractor shall be solely responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the Work. Such responsibility does not relieve Subcontractors of their responsibility for the safety of persons or property in the performance of their work, nor for compliance with applicable safety Laws and Regulations. Contractor shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury, or loss to:

1. all persons on the Site or who may be affected by the Work;

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. all the Work and materials and equipment to be incorporated therein, whether in storage on or off the Site; and

3. other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures, other work in progress, utilities, and Underground Facilities not designated for removal, relocation, or replacement in the course of construction.

B. Contractor shall comply with all applicable Laws and Regulations relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection. Contractor shall notify Owner; the owners of adjacent property, Underground Facilities, and other utilities; and other contractors and utility owners performing work at or adjacent to the Site, when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property or work in progress.

C. Contractor shall comply with the applicable requirements of Owner's safety programs, if any. The Supplementary Conditions identify any Owner's safety programs that are applicable to the Work.

D. Contractor shall inform Owner and Engineer of the specific requirements of Contractor's safety program with which Owner's and Engineer's employees and representatives must comply while at the Site.

E. All damage, injury, or loss to any property referred to in Paragraph 7.12.A.2 or 7.12.A.3 caused, directly or indirectly, in whole or in part, by Contractor, any Subcontractor, Supplier, or any other individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, shall be remedied by Contractor at its expense (except damage or loss attributable to the fault of Drawings or Specifications or to the acts or omissions of Owner or Engineer or anyone employed by any of them, or anyone for whose acts any of them may be liable, and not attributable, directly or indirectly, in whole or in part, to the fault or negligence of Contractor or any Subcontractor, Supplier, or other individual or entity directly or indirectly employed by any of them).

F. Contractor's duties and responsibilities for safety and protection shall continue until such time as all the Work is completed and Engineer has issued a notice to Owner and Contractor in accordance with Paragraph 15.06.B that the Work is acceptable (except as otherwise expressly provided in connection with Substantial Completion).

G. Contractor's duties and responsibilities for safety and protection shall resume whenever Contractor or any Subcontractor or Supplier returns to the Site to fulfill warranty or correction obligations, or to conduct other tasks arising from the Contract Documents.

7.13 Safety Representative

A. Contractor shall designate a qualified and experienced safety representative at the Site whose duties and responsibilities shall be the prevention of accidents and the maintaining and supervising of safety precautions and programs.

7.14 Hazard Communication Programs

A. Contractor shall be responsible for coordinating any exchange of material safety data sheets or other hazard communication information required to be made available to or

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

exchanged between or among employers at the Site in accordance with Laws or Regulations.

7.15 Emergencies

A. In emergencies affecting the safety or protection of persons or the Work or property at the Site or adjacent thereto, Contractor is obligated to act to prevent threatened damage, injury, or loss. Contractor shall give Engineer prompt written notice if Contractor believes that any significant changes in the Work or variations from the Contract Documents have been caused thereby or are required as a result thereof. If Engineer determines that a change in the Contract Documents is required because of the action taken by Contractor in response to such an emergency, a Work Change Directive or Change Order will be issued.

7.16 Shop Drawings, Samples, and Other Submittals

A. *Shop Drawing and Sample Submittal Requirements*:

1. Before submitting a Shop Drawing or Sample, Contractor shall have:

a. reviewed and coordinated the Shop Drawing or Sample with other Shop Drawings and Samples and with the requirements of the Work and the Contract Documents;

b. determined and verified all field measurements, quantities, dimensions, specified performance and design criteria, installation requirements, materials, catalog numbers, and similar information with respect thereto;

c. determined and verified the suitability of all materials and equipment offered with respect to the indicated application, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work; and

d. determined and verified all information relative to Contractor's responsibilities for means, methods, techniques, sequences, and procedures of construction, and safety precautions and programs incident thereto.

2. Each submittal shall bear a stamp or specific written certification that Contractor has satisfied Contractor's obligations under the Contract Documents with respect to Contractor's review of that submittal, and that Contractor approves the submittal.

3. With each submittal, Contractor shall give Engineer specific written notice of any variations that the Shop Drawing or Sample may have from the requirements of the Contract Documents. This notice shall be set forth in a written communication separate from the Shop Drawings or Sample submittal; and, in addition, in the case of Shop Drawings by a specific notation made on each Shop Drawing submitted to Engineer for review and approval of each such variation.

B. *Submittal Procedures for Shop Drawings and Samples*: Contractor shall submit Shop Drawings and Samples to Engineer for review and approval in accordance with the accepted Schedule of Submittals. Each submittal will be identified as Engineer may require.

1. *Shop Drawings*:

a. Contractor shall submit the number of copies required in the Specifications.

b. Data shown on the Shop Drawings will be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show Engineer the services, materials, and equipment Contractor proposes to

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

provide and to enable Engineer to review the information for the limited purposes required by Paragraph 7.16.D.

2. *Samples*:

   a. Contractor shall submit the number of Samples required in the Specifications.

   b. Contractor shall clearly identify each Sample as to material, Supplier, pertinent data such as catalog numbers, the use for which intended and other data as Engineer may require to enable Engineer to review the submittal for the limited purposes required by Paragraph 7.16.D.

3. Where a Shop Drawing or Sample is required by the Contract Documents or the Schedule of Submittals, any related Work performed prior to Engineer's review and approval of the pertinent submittal will be at the sole expense and responsibility of Contractor.

C. *Other Submittals*: Contractor shall submit other submittals to Engineer in accordance with the accepted Schedule of Submittals, and pursuant to the applicable terms of the Specifications.

D. *Engineer's Review*:

1. Engineer will provide timely review of Shop Drawings and Samples in accordance with the Schedule of Submittals acceptable to Engineer. Engineer's review and approval will be only to determine if the items covered by the submittals will, after installation or incorporation in the Work, conform to the information given in the Contract Documents and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

2. Engineer's review and approval will not extend to means, methods, techniques, sequences, or procedures of construction or to safety precautions or programs incident thereto.

3. Engineer's review and approval of a separate item as such will not indicate approval of the assembly in which the item functions.

4. Engineer's review and approval of a Shop Drawing or Sample shall not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless Contractor has complied with the requirements of Paragraph 7.16.A.3 and Engineer has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample. Engineer will document any such approved variation from the requirements of the Contract Documents in a Field Order.

5. Engineer's review and approval of a Shop Drawing or Sample shall not relieve Contractor from responsibility for complying with the requirements of Paragraph 7.16.A and B.

6. Engineer's review and approval of a Shop Drawing or Sample, or of a variation from the requirements of the Contract Documents, shall not, under any circumstances, change the Contract Times or Contract Price, unless such changes are included in a Change Order.

7. Neither Engineer's receipt, review, acceptance or approval of a Shop Drawing, Sample, or other submittal shall result in such item becoming a Contract Document.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8. Contractor shall perform the Work in compliance with the requirements and commitments set forth in approved Shop Drawings and Samples, subject to the provisions of Paragraph 7.16.D.4.

E. *Resubmittal Procedures*:

1. Contractor shall make corrections required by Engineer and shall return the required number of corrected copies of Shop Drawings and submit, as required, new Samples for review and approval. Contractor shall direct specific attention in writing to revisions other than the corrections called for by Engineer on previous submittals.

2. Contractor shall furnish required submittals with sufficient information and accuracy to obtain required approval of an item with no more than three submittals. Engineer will record Engineer's time for reviewing a fourth or subsequent submittal of a Shop Drawings, sample, or other item requiring approval, and Contractor shall be responsible for Engineer's charges to Owner for such time. Owner may impose a set-off against payments due to Contractor to secure reimbursement for such charges.

3. If Contractor requests a change of a previously approved submittal item, Contractor shall be responsible for Engineer's charges to Owner for its review time, and Owner may impose a set-off against payments due to Contractor to secure reimbursement for such charges, unless the need for such change is beyond the control of Contractor.

7.17 Contractor's General Warranty and Guarantee

A. Contractor warrants and guarantees to Owner that all Work will be in accordance with the Contract Documents and will not be defective. Engineer and its officers, directors, members, partners, employees, agents, consultants, and subcontractors shall be entitled to rely on Contractor's warranty and guarantee.

B. Contractor's warranty and guarantee hereunder excludes defects or damage caused by:

1. abuse, modification, or improper maintenance or operation by persons other than Contractor, Subcontractors, Suppliers, or any other individual or entity for whom Contractor is responsible; or

2. normal wear and tear under normal usage.

C. Contractor's obligation to perform and complete the Work in accordance with the Contract Documents shall be absolute. None of the following will constitute an acceptance of Work that is not in accordance with the Contract Documents or a release of Contractor's obligation to perform the Work in accordance with the Contract Documents:

1. observations by Engineer;

2. recommendation by Engineer or payment by Owner of any progress or final payment;

3. the issuance of a certificate of Substantial Completion by Engineer or any payment related thereto by Owner;

4. use or occupancy of the Work or any part thereof by Owner;

5. any review and approval of a Shop Drawing or Sample submittal;

6. the issuance of a notice of acceptability by Engineer;

7. any inspection, test, or approval by others; or

8. any correction of defective Work by Owner.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. If the Contract requires the Contractor to accept the assignment of a contract entered into by Owner, then the specific warranties, guarantees, and correction obligations contained in the assigned contract shall govern with respect to Contractor's performance obligations to Owner for the Work described in the assigned contract.

7.18 Indemnification

A. To the fullest extent permitted by Laws and Regulations, and in addition to any other obligations of Contractor under the Contract or otherwise, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to the performance of the Work, provided that any such claim, cost, loss, or damage is attributable to bodily injury, sickness, disease, or death, or to injury to or destruction of tangible property (other than the Work itself), including the loss of use resulting therefrom but only to the extent caused by any negligent act or omission of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work or anyone for whose acts any of them may be liable.

B. In any and all claims against Owner or Engineer or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors by any employee (or the survivor or personal representative of such employee) of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, the indemnification obligation under Paragraph 7.18.A shall not be limited in any way by any limitation on the amount or type of damages, compensation, or benefits payable by or for Contractor or any such Subcontractor, Supplier, or other individual or entity under workers' compensation acts, disability benefit acts, or other employee benefit acts.

C. The indemnification obligations of Contractor under Paragraph 7.18.A shall not extend to the liability of Engineer and Engineer's officers, directors, members, partners, employees, agents, consultants and subcontractors arising out of:

1. the preparation or approval of, or the failure to prepare or approve maps, Drawings, opinions, reports, surveys, Change Orders, designs, or Specifications; or

2. giving directions or instructions, or failing to give them, if that is the primary cause of the injury or damage.

7.19 Delegation of Professional Design Services

A. Contractor will not be required to provide professional design services unless such services are specifically required by the Contract Documents for a portion of the Work or unless such services are required to carry out Contractor's responsibilities for construction means, methods, techniques, sequences and procedures. Contractor shall not be required to provide professional services in violation of applicable Laws and Regulations.

B. If professional design services or certifications by a design professional related to systems, materials, or equipment are specifically required of Contractor by the Contract Documents, Owner and Engineer will specify all performance and design criteria that such services must satisfy. Contractor shall cause such services or certifications to be provided by a properly licensed professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, and other submittals prepared by such professional. Shop

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Drawings and other submittals related to the Work designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to Engineer.

C. Owner and Engineer shall be entitled to rely upon the adequacy, accuracy, and completeness of the services, certifications, or approvals performed by such design professionals, provided Owner and Engineer have specified to Contractor all performance and design criteria that such services must satisfy.

D. Pursuant to this paragraph, Engineer's review and approval of design calculations and design drawings will be only for the limited purpose of checking for conformance with performance and design criteria given and the design concept expressed in the Contract Documents. Engineer's review and approval of Shop Drawings and other submittals (except design calculations and design drawings) will be only for the purpose stated in Paragraph 7.16.D.1.

E. Contractor shall not be responsible for the adequacy of the performance or design criteria specified by Owner or Engineer.

ARTICLE 8 – OTHER WORK AT THE SITE

8.01 Other Work

A. In addition to and apart from the Work under the Contract Documents, the Owner may perform other work at or adjacent to the Site. Such other work may be performed by Owner's employees, or through contracts between the Owner and third parties. Owner may also arrange to have third-party utility owners perform work on their utilities and facilities at or adjacent to the Site.

B. If Owner performs other work at or adjacent to the Site with Owner's employees, or through contracts for such other work, then Owner shall give Contractor written notice thereof prior to starting any such other work. If Owner has advance information regarding the start of any utility work at or adjacent to the Site, Owner shall provide such information to Contractor.

C. Contractor shall afford each other contractor that performs such other work, each utility owner performing other work, and Owner, if Owner is performing other work with Owner's employees, proper and safe access to the Site, and provide a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such other work. Contractor shall do all cutting, fitting, and patching of the Work that may be required to properly connect or otherwise make its several parts come together and properly integrate with such other work. Contractor shall not endanger any work of others by cutting, excavating, or otherwise altering such work; provided, however, that Contractor may cut or alter others' work with the written consent of Engineer and the others whose work will be affected.

D. If the proper execution or results of any part of Contractor's Work depends upon work performed by others under this Article 8, Contractor shall inspect such other work and promptly report to Engineer in writing any delays, defects, or deficiencies in such other work that render it unavailable or unsuitable for the proper execution and results of Contractor's Work. Contractor's failure to so report will constitute an acceptance of such other work as fit and proper for integration with Contractor's Work except for latent defects and deficiencies in such other work.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8.02 Coordination

A. If Owner intends to contract with others for the performance of other work at or adjacent to the Site, to perform other work at or adjacent to the Site with Owner's employees, or to arrange to have utility owners perform work at or adjacent to the Site, the following will be set forth in the Supplementary Conditions or provided to Contractor prior to the start of any such other work:

1. the identity of the individual or entity that will have authority and responsibility for coordination of the activities among the various contractors;

2. an itemization of the specific matters to be covered by such authority and responsibility; and

3. the extent of such authority and responsibilities.

B. Unless otherwise provided in the Supplementary Conditions, Owner shall have sole authority and responsibility for such coordination.

8.03 Legal Relationships

A. If, in the course of performing other work at or adjacent to the Site for Owner, the Owner's employees, any other contractor working for Owner, or any utility owner for whom the Owner is responsible causes damage to the Work or to the property of Contractor or its Subcontractors, or delays, disrupts, interferes with, or increases the scope or cost of the performance of the Work, through actions or inaction, then Contractor shall be entitled to an equitable adjustment in the Contract Price or the Contract Times, or both. Contractor must submit any Change Proposal seeking an equitable adjustment in the Contract Price or the Contract Times under this paragraph within 30 days of the damaging, delaying, disrupting, or interfering event. The entitlement to, and extent of, any such equitable adjustment shall take into account information (if any) regarding such other work that was provided to Contractor in the Contract Documents prior to the submittal of the Bid or the final negotiation of the terms of the Contract. When applicable, any such equitable adjustment in Contract Price shall be conditioned on Contractor assigning to Owner all Contractor's rights against such other contractor or utility owner with respect to the damage, delay, disruption, or interference that is the subject of the adjustment. Contractor's entitlement to an adjustment of the Contract Times is conditioned on such adjustment being essential to Contractor's ability to complete the Work within the Contract Times.

B. Contractor shall take reasonable and customary measures to avoid damaging, delaying, disrupting, or interfering with the work of Owner, any other contractor, or any utility owner performing other work at or adjacent to the Site. If Contractor fails to take such measures and as a result damages, delays, disrupts, or interferes with the work of any such other contractor or utility owner, then Owner may impose a set-off against payments due to Contractor, and assign to such other contractor or utility owner the Owner's contractual rights against Contractor with respect to the breach of the obligations set forth in this paragraph.

C. When Owner is performing other work at or adjacent to the Site with Owner's employees, Contractor shall be liable to Owner for damage to such other work, and for the reasonable direct delay, disruption, and interference costs incurred by Owner as a result of Contractor's failure to take reasonable and customary measures with respect to Owner's other work. In response to such damage, delay, disruption, or interference, Owner may impose a set-off against payments due to Contractor.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. If Contractor damages, delays, disrupts, or interferes with the work of any other contractor, or any utility owner performing other work at or adjacent to the Site, through Contractor's failure to take reasonable and customary measures to avoid such impacts, or if any claim arising out of Contractor's actions, inactions, or negligence in performance of the Work at or adjacent to the Site is made by any such other contractor or utility owner against Contractor, Owner, or Engineer, then Contractor shall (1) promptly attempt to settle the claim as to all parties through negotiations with such other contractor or utility owner, or otherwise resolve the claim by arbitration or other dispute resolution proceeding or at law, and (2) indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against any such claims, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such damage, delay, disruption, or interference.

ARTICLE 9 – OWNER'S RESPONSIBILITIES

9.01 Communications to Contractor

A. Except as otherwise provided in these General Conditions, Owner shall issue all communications to Contractor through Engineer.

9.02 Replacement of Engineer

A. Owner may at its discretion appoint an engineer to replace Engineer, provided Contractor makes no reasonable objection to the replacement engineer. The replacement engineer's status under the Contract Documents shall be that of the former Engineer.

9.03 Furnish Data

A. Owner shall promptly furnish the data required of Owner under the Contract Documents.

9.04 Pay When Due

A. Owner shall make payments to Contractor when they are due as provided in the Agreement.

9.05 Lands and Easements; Reports, Tests, and Drawings

A. Owner's duties with respect to providing lands and easements are set forth in Paragraph 5.01.

B. Owner's duties with respect to providing engineering surveys to establish reference points are set forth in Paragraph 4.03.

C. Article 5 refers to Owner's identifying and making available to Contractor copies of reports of explorations and tests of conditions at the Site, and drawings of physical conditions relating to existing surface or subsurface structures at the Site.

9.06 Insurance

A. Owner's responsibilities, if any, with respect to purchasing and maintaining liability and property insurance are set forth in Article 6.

9.07 Change Orders

A. Owner's responsibilities with respect to Change Orders are set forth in Article 11.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

9.08 Inspections, Tests, and Approvals

A. Owner's responsibility with respect to certain inspections, tests, and approvals is set forth in Paragraph 14.02.B.

9.09 Limitations on Owner's Responsibilities

A. The Owner shall not supervise, direct, or have control or authority over, nor be responsible for, Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Owner will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

9.10 Undisclosed Hazardous Environmental Condition

A. Owner's responsibility in respect to an undisclosed Hazardous Environmental Condition is set forth in Paragraph 5.06.

9.11 Evidence of Financial Arrangements

A. Upon request of Contractor, Owner shall furnish Contractor reasonable evidence that financial arrangements have been made to satisfy Owner's obligations under the Contract Documents (including obligations under proposed changes in the Work).

9.12 Safety Programs

A. While at the Site, Owner's employees and representatives shall comply with the specific applicable requirements of Contractor's safety programs of which Owner has been informed.

B. Owner shall furnish copies of any applicable Owner safety programs to Contractor.

ARTICLE 10 – ENGINEER'S STATUS DURING CONSTRUCTION

10.01 Owner's Representative

A. Engineer will be Owner's representative during the construction period. The duties and responsibilities and the limitations of authority of Engineer as Owner's representative during construction are set forth in the Contract.

10.02 Visits to Site

A. Engineer will make visits to the Site at intervals appropriate to the various stages of construction as Engineer deems necessary in order to observe as an experienced and qualified design professional the progress that has been made and the quality of the various aspects of Contractor's executed Work. Based on information obtained during such visits and observations, Engineer, for the benefit of Owner, will determine, in general, if the Work is proceeding in accordance with the Contract Documents. Engineer will not be required to make exhaustive or continuous inspections on the Site to check the quality or quantity of the Work. Engineer's efforts will be directed toward providing for Owner a greater degree of confidence that the completed Work will conform generally to the Contract Documents. On the basis of such visits and observations, Engineer will keep Owner informed of the progress of the Work and will endeavor to guard Owner against defective Work.

B. Engineer's visits and observations are subject to all the limitations on Engineer's authority and responsibility set forth in Paragraph 10.08. Particularly, but without limitation, during

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

or as a result of Engineer's visits or observations of Contractor's Work, Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work.

10.03 Project Representative

A. If Owner and Engineer have agreed that Engineer will furnish a Resident Project Representative to represent Engineer at the Site and assist Engineer in observing the progress and quality of the Work, then the authority and responsibilities of any such Resident Project Representative will be as provided in the Supplementary Conditions, and limitations on the responsibilities thereof will be as provided in Paragraph 10.08. If Owner designates another representative or agent to represent Owner at the Site who is not Engineer's consultant, agent, or employee, the responsibilities and authority and limitations thereon of such other individual or entity will be as provided in the Supplementary Conditions.

10.04 Rejecting Defective Work

A. Engineer has the authority to reject Work in accordance with Article 14.

10.05 Shop Drawings, Change Orders and Payments

A. Engineer's authority, and limitations thereof, as to Shop Drawings and Samples, are set forth in Paragraph 7.16.

B. Engineer's authority, and limitations thereof, as to design calculations and design drawings submitted in response to a delegation of professional design services, if any, are set forth in Paragraph 7.19.

C. Engineer's authority as to Change Orders is set forth in Article 11.

D. Engineer's authority as to Applications for Payment is set forth in Article 15.

10.06 Determinations for Unit Price Work

A. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor as set forth in Paragraph 13.03.

10.07 Decisions on Requirements of Contract Documents and Acceptability of Work

A. Engineer will render decisions regarding the requirements of the Contract Documents, and judge the acceptability of the Work, pursuant to the specific procedures set forth herein for initial interpretations, Change Proposals, and acceptance of the Work. In rendering such decisions and judgments, Engineer will not show partiality to Owner or Contractor, and will not be liable to Owner, Contractor, or others in connection with any proceedings, interpretations, decisions, or judgments conducted or rendered in good faith.

10.08 Limitations on Engineer's Authority and Responsibilities

A. Neither Engineer's authority or responsibility under this Article 10 or under any other provision of the Contract, nor any decision made by Engineer in good faith either to exercise or not exercise such authority or responsibility or the undertaking, exercise, or performance of any authority or responsibility by Engineer, shall create, impose, or give rise to any duty in contract, tort, or otherwise owed by Engineer to Contractor, any Subcontractor, any Supplier, any other individual or entity, or to any surety for or employee or agent of any of them.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Engineer will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

C. Engineer will not be responsible for the acts or omissions of Contractor or of any Subcontractor, any Supplier, or of any other individual or entity performing any of the Work.

D. Engineer's review of the final Application for Payment and accompanying documentation and all maintenance and operating instructions, schedules, guarantees, bonds, certificates of inspection, tests and approvals, and other documentation required to be delivered by Paragraph 15.06.A will only be to determine generally that their content complies with the requirements of, and in the case of certificates of inspections, tests, and approvals, that the results certified indicate compliance with the Contract Documents.

E. The limitations upon authority and responsibility set forth in this Paragraph 10.08 shall also apply to the Resident Project Representative, if any.

10.09 Compliance with Safety Program

A. While at the Site, Engineer's employees and representatives will comply with the specific applicable requirements of Owner's and Contractor's safety programs (if any) of which Engineer has been informed.

ARTICLE 11 – AMENDING THE CONTRACT DOCUMENTS; CHANGES IN THE WORK

11.01 Amending and Supplementing Contract Documents

A. The Contract Documents may be amended or supplemented by a Change Order, a Work Change Directive, or a Field Order.

1. *Change Orders*:

a. If an amendment or supplement to the Contract Documents includes a change in the Contract Price or the Contract Times, such amendment or supplement must be set forth in a Change Order. A Change Order also may be used to establish amendments and supplements of the Contract Documents that do not affect the Contract Price or Contract Times.

b. Owner and Contractor may amend those terms and conditions of the Contract Documents that do not involve (1) the performance or acceptability of the Work, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, without the recommendation of the Engineer. Such an amendment shall be set forth in a Change Order.

2. *Work Change Directives*: A Work Change Directive will not change the Contract Price or the Contract Times but is evidence that the parties expect that the modification ordered or documented by a Work Change Directive will be incorporated in a subsequently issued Change Order, following negotiations by the parties as to the Work Change Directive's effect, if any, on the Contract Price and Contract Times; or, if negotiations are unsuccessful, by a determination under the terms of the Contract Documents governing adjustments, expressly including Paragraph 11.04 regarding change of Contract Price. Contractor must submit any Change Proposal seeking an

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

adjustment of the Contract Price or the Contract Times, or both, no later than 30 days after the completion of the Work set out in the Work Change Directive. Owner must submit any Claim seeking an adjustment of the Contract Price or the Contract Times, or both, no later than 60 days after issuance of the Work Change Directive.

3. *Field Orders*: Engineer may authorize minor changes in the Work if the changes do not involve an adjustment in the Contract Price or the Contract Times and are compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents. Such changes will be accomplished by a Field Order and will be binding on Owner and also on Contractor, which shall perform the Work involved promptly. If Contractor believes that a Field Order justifies an adjustment in the Contract Price or Contract Times, or both, then before proceeding with the Work at issue, Contractor shall submit a Change Proposal as provided herein.

11.02 Owner-Authorized Changes in the Work

A. Without invalidating the Contract and without notice to any surety, Owner may, at any time or from time to time, order additions, deletions, or revisions in the Work. Such changes shall be supported by Engineer's recommendation, to the extent the change involves the design (as set forth in the Drawings, Specifications, or otherwise), or other engineering or technical matters. Such changes may be accomplished by a Change Order, if Owner and Contractor have agreed as to the effect, if any, of the changes on Contract Times or Contract Price; or by a Work Change Directive. Upon receipt of any such document, Contractor shall promptly proceed with the Work involved; or, in the case of a deletion in the Work, promptly cease construction activities with respect to such deleted Work. Added or revised Work shall be performed under the applicable conditions of the Contract Documents. Nothing in this paragraph shall obligate Contractor to undertake work that Contractor reasonably concludes cannot be performed in a manner consistent with Contractor's safety obligations under the Contract Documents or Laws and Regulations.

11.03 Unauthorized Changes in the Work

A. Contractor shall not be entitled to an increase in the Contract Price or an extension of the Contract Times with respect to any work performed that is not required by the Contract Documents, as amended, modified, or supplemented, except in the case of an emergency as provided in Paragraph 7.15 or in the case of uncovering Work as provided in Paragraph 14.05.

11.04 Change of Contract Price

A. The Contract Price may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Price shall comply with the provisions of Paragraph 11.06. Any Claim for an adjustment of Contract Price shall comply with the provisions of Article 12.

B. An adjustment in the Contract Price will be determined as follows:

1. where the Work involved is covered by unit prices contained in the Contract Documents, then by application of such unit prices to the quantities of the items involved (subject to the provisions of Paragraph 13.03); or

2. where the Work involved is not covered by unit prices contained in the Contract Documents, then by a mutually agreed lump sum (which may include an allowance for overhead and profit not necessarily in accordance with Paragraph 11.04.C.2); or

3. where the Work involved is not covered by unit prices contained in the Contract Documents and the parties do not reach mutual agreement to a lump sum, then on

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

the basis of the Cost of the Work (determined as provided in Paragraph 13.01) plus a Contractor's fee for overhead and profit (determined as provided in Paragraph 11.04.C).

C. *Contractor's Fee*: When applicable, the Contractor's fee for overhead and profit shall be determined as follows:

1. a mutually acceptable fixed fee; or

2. if a fixed fee is not agreed upon, then a fee based on the following percentages of the various portions of the Cost of the Work:

a. for costs incurred under Paragraphs 13.01.B.1 and 13.01.B.2, the Contractor's fee shall be 15 percent;

b. for costs incurred under Paragraph 13.01.B.3, the Contractor's fee shall be five percent;

c. where one or more tiers of subcontracts are on the basis of Cost of the Work plus a fee and no fixed fee is agreed upon, the intent of Paragraphs 11.04.C.2.a and 11.04.C.2.b is that the Contractor's fee shall be based on: (1) a fee of 15 percent of the costs incurred under Paragraphs 13.01.A.1 and 13.01.A.2 by the Subcontractor that actually performs the Work, at whatever tier, and (2) with respect to Contractor itself and to any Subcontractors of a tier higher than that of the Subcontractor that actually performs the Work, a fee of five percent of the amount (fee plus underlying costs incurred) attributable to the next lower tier Subcontractor; provided, however, that for any such subcontracted work the maximum total fee to be paid by Owner shall be no greater than 27 percent of the costs incurred by the Subcontractor that actually performs the work;

d. no fee shall be payable on the basis of costs itemized under Paragraphs 13.01.B.4, 13.01.B.5, and 13.01.C;

e. the amount of credit to be allowed by Contractor to Owner for any change which results in a net decrease in cost will be the amount of the actual net decrease in cost plus a deduction in Contractor's fee by an amount equal to five percent of such net decrease; and

f. when both additions and credits are involved in any one change, the adjustment in Contractor's fee shall be computed on the basis of the net change in accordance with Paragraphs 11.04.C.2.a through 11.04.C.2.e, inclusive.

11.05 Change of Contract Times

A. The Contract Times may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Times shall comply with the provisions of Paragraph 11.06. Any Claim for an adjustment in the Contract Times shall comply with the provisions of Article 12.

B. An adjustment of the Contract Times shall be subject to the limitations set forth in Paragraph 4.05, concerning delays in Contractor's progress.

11.06 Change Proposals

A. Contractor shall submit a Change Proposal to Engineer to request an adjustment in the Contract Times or Contract Price; appeal an initial decision by Engineer concerning the requirements of the Contract Documents or relating to the acceptability of the Work under the Contract Documents; contest a set-off against payment due; or seek other relief under

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

the Contract. The Change Proposal shall specify any proposed change in Contract Times or Contract Price, or both, or other proposed relief, and explain the reason for the proposed change, with citations to any governing or applicable provisions of the Contract Documents.

1. *Procedures*: Contractor shall submit each Change Proposal to Engineer promptly (but in no event later than 30 days) after the start of the event giving rise thereto, or after such initial decision. The Contractor shall submit supporting data, including the proposed change in Contract Price or Contract Time (if any), to the Engineer and Owner within 15 days after the submittal of the Change Proposal. The supporting data shall be accompanied by a written statement that the supporting data are accurate and complete, and that any requested time or price adjustment is the entire adjustment to which Contractor believes it is entitled as a result of said event. Engineer will advise Owner regarding the Change Proposal, and consider any comments or response from Owner regarding the Change Proposal.

2. *Engineer's Action*: Engineer will review each Change Proposal and, within 30 days after receipt of the Contractor's supporting data, either deny the Change Proposal in whole, approve it in whole, or deny it in part and approve it in part. Such actions shall be in writing, with a copy provided to Owner and Contractor. If Engineer does not take action on the Change Proposal within 30 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of Engineer's inaction the Change Proposal is deemed denied, thereby commencing the time for appeal of the denial under Article 12.

3. *Binding Decision*: Engineer's decision will be final and binding upon Owner and Contractor, unless Owner or Contractor appeals the decision by filing a Claim under Article 12.

B. *Resolution of Certain Change Proposals*: If the Change Proposal does not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters, then Engineer will notify the parties that the Engineer is unable to resolve the Change Proposal. For purposes of further resolution of such a Change Proposal, such notice shall be deemed a denial, and Contractor may choose to seek resolution under the terms of Article 12.

11.07 Execution of Change Orders

A. Owner and Contractor shall execute appropriate Change Orders covering:

1. changes in the Contract Price or Contract Times which are agreed to by the parties, including any undisputed sum or amount of time for Work actually performed in accordance with a Work Change Directive;

2. changes in Contract Price resulting from an Owner set-off, unless Contractor has duly contested such set-off;

3. changes in the Work which are: (a) ordered by Owner pursuant to Paragraph 11.02, (b) required because of Owner's acceptance of defective Work under Paragraph 14.04 or Owner's correction of defective Work under Paragraph 14.07, or (c) agreed to by the parties, subject to the need for Engineer's recommendation if the change in the Work involves the design (as set forth in the Drawings, Specifications, or otherwise), or other engineering or technical matters; and

4. changes in the Contract Price or Contract Times, or other changes, which embody the substance of any final and binding results under Paragraph 11.06, or Article 12.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If Owner or Contractor refuses to execute a Change Order that is required to be executed under the terms of this Paragraph 11.07, it shall be deemed to be of full force and effect, as if fully executed.

11.08 Notification to Surety

A. If the provisions of any bond require notice to be given to a surety of any change affecting the general scope of the Work or the provisions of the Contract Documents (including, but not limited to, Contract Price or Contract Times), the giving of any such notice will be Contractor's responsibility. The amount of each applicable bond will be adjusted to reflect the effect of any such change.

ARTICLE 12 – CLAIMS

12.01 Claims

A. *Claims Process*: The following disputes between Owner and Contractor shall be submitted to the Claims process set forth in this Article:

1. Appeals by Owner or Contractor of Engineer's decisions regarding Change Proposals;

2. Owner demands for adjustments in the Contract Price or Contract Times, or other relief under the Contract Documents; and

3. Disputes that Engineer has been unable to address because they do not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters.

B. *Submittal of Claim*: The party submitting a Claim shall deliver it directly to the other party to the Contract promptly (but in no event later than 30 days) after the start of the event giving rise thereto; in the case of appeals regarding Change Proposals within 30 days of the decision under appeal. The party submitting the Claim shall also furnish a copy to the Engineer, for its information only. The responsibility to substantiate a Claim shall rest with the party making the Claim. In the case of a Claim by Contractor seeking an increase in the Contract Times or Contract Price, or both, Contractor shall certify that the Claim is made in good faith, that the supporting data are accurate and complete, and that to the best of Contractor's knowledge and belief the amount of time or money requested accurately reflects the full amount to which Contractor is entitled.

C. *Review and Resolution*: The party receiving a Claim shall review it thoroughly, giving full consideration to its merits. The two parties shall seek to resolve the Claim through the exchange of information and direct negotiations. The parties may extend the time for resolving the Claim by mutual agreement. All actions taken on a Claim shall be stated in writing and submitted to the other party, with a copy to Engineer.

D. *Mediation*:

1. At any time after initiation of a Claim, Owner and Contractor may mutually agree to mediation of the underlying dispute. The agreement to mediate shall stay the Claim submittal and response process.

2. If Owner and Contractor agree to mediation, then after 60 days from such agreement, either Owner or Contractor may unilaterally terminate the mediation process, and the Claim submittal and decision process shall resume as of the date of the termination. If the mediation proceeds but is unsuccessful in resolving the dispute, the Claim

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

submittal and decision process shall resume as of the date of the conclusion of the mediation, as determined by the mediator.

3. Owner and Contractor shall each pay one-half of the mediator's fees and costs.

E. *Partial Approval*: If the party receiving a Claim approves the Claim in part and denies it in part, such action shall be final and binding unless within 30 days of such action the other party invokes the procedure set forth in Article 17 for final resolution of disputes.

F. *Denial of Claim*: If efforts to resolve a Claim are not successful, the party receiving the Claim may deny it by giving written notice of denial to the other party. If the receiving party does not take action on the Claim within 90 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of the inaction, the Claim is deemed denied, thereby commencing the time for appeal of the denial. A denial of the Claim shall be final and binding unless within 30 days of the denial the other party invokes the procedure set forth in Article 17 for the final resolution of disputes.

G. *Final and Binding Results*: If the parties reach a mutual agreement regarding a Claim, whether through approval of the Claim, direct negotiations, mediation, or otherwise; or if a Claim is approved in part and denied in part, or denied in full, and such actions become final and binding; then the results of the agreement or action on the Claim shall be incorporated in a Change Order to the extent they affect the Contract, including the Work, the Contract Times, or the Contract Price.

ARTICLE 13 – COST OF THE WORK; ALLOWANCES; UNIT PRICE WORK

13.01 Cost of the Work

A. *Purposes for Determination of Cost of the Work*: The term Cost of the Work means the sum of all costs necessary for the proper performance of the Work at issue, as further defined below. The provisions of this Paragraph 13.01 are used for two distinct purposes:

1. To determine Cost of the Work when Cost of the Work is a component of the Contract Price, under cost-plus-fee, time-and-materials, or other cost-based terms; or

2. To determine the value of a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price. When the value of any such adjustment is determined on the basis of Cost of the Work, Contractor is entitled only to those additional or incremental costs required because of the change in the Work or because of the event giving rise to the adjustment.

B. *Costs Included*: Except as otherwise may be agreed to in writing by Owner, costs included in the Cost of the Work shall be in amounts no higher than those prevailing in the locality of the Project, shall not include any of the costs itemized in Paragraph 13.01.C, and shall include only the following items:

1. Payroll costs for employees in the direct employ of Contractor in the performance of the Work under schedules of job classifications agreed upon by Owner and Contractor. Such employees shall include, without limitation, superintendents, foremen, and other personnel employed full time on the Work. Payroll costs for employees not employed full time on the Work shall be apportioned on the basis of their time spent on the Work. Payroll costs shall include, but not be limited to, salaries and wages plus the cost of fringe benefits, which shall include social security contributions, unemployment, excise, and payroll taxes, workers' compensation, health and retirement benefits, bonuses, sick leave, and vacation and holiday pay applicable

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

thereto. The expenses of performing Work outside of regular working hours, on Saturday, Sunday, or legal holidays, shall be included in the above to the extent authorized by Owner.

2. Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and Suppliers' field services required in connection therewith. All cash discounts shall accrue to Contractor unless Owner deposits funds with Contractor with which to make payments, in which case the cash discounts shall accrue to Owner. All trade discounts, rebates, and refunds and returns from sale of surplus materials and equipment shall accrue to Owner, and Contractor shall make provisions so that they may be obtained.

3. Payments made by Contractor to Subcontractors for Work performed by Subcontractors. If required by Owner, Contractor shall obtain competitive bids from subcontractors acceptable to Owner and Contractor and shall deliver such bids to Owner, who will then determine, with the advice of Engineer, which bids, if any, will be acceptable. If any subcontract provides that the Subcontractor is to be paid on the basis of Cost of the Work plus a fee, the Subcontractor's Cost of the Work and fee shall be determined in the same manner as Contractor's Cost of the Work and fee as provided in this Paragraph 13.01.

4. Costs of special consultants (including but not limited to engineers, architects, testing laboratories, surveyors, attorneys, and accountants) employed for services specifically related to the Work.

5. Supplemental costs including the following:

    a. The proportion of necessary transportation, travel, and subsistence expenses of Contractor's employees incurred in discharge of duties connected with the Work.

    b. Cost, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office, and temporary facilities at the Site, and hand tools not owned by the workers, which are consumed in the performance of the Work, and cost, less market value, of such items used but not consumed which remain the property of Contractor.

    c. Rentals of all construction equipment and machinery, and the parts thereof, whether rented from Contractor or others in accordance with rental agreements approved by Owner with the advice of Engineer, and the costs of transportation, loading, unloading, assembly, dismantling, and removal thereof. All such costs shall be in accordance with the terms of said rental agreements. The rental of any such equipment, machinery, or parts shall cease when the use thereof is no longer necessary for the Work.

    d. Sales, consumer, use, and other similar taxes related to the Work, and for which Contractor is liable, as imposed by Laws and Regulations.

    e. Deposits lost for causes other than negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, and royalty payments and fees for permits and licenses.

    f. Losses and damages (and related expenses) caused by damage to the Work, not compensated by insurance or otherwise, sustained by Contractor in connection with the performance of the Work (except losses and damages within the deductible amounts of property insurance established in accordance with Paragraph 6.05), provided such losses and damages have resulted from causes

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

other than the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable. Such losses shall include settlements made with the written consent and approval of Owner. No such losses, damages, and expenses shall be included in the Cost of the Work for the purpose of determining Contractor's fee.

g. The cost of utilities, fuel, and sanitary facilities at the Site.

h. Minor expenses such as communication service at the Site, express and courier services, and similar petty cash items in connection with the Work.

i. The costs of premiums for all bonds and insurance that Contractor is required by the Contract Documents to purchase and maintain.

C. *Costs Excluded*: The term Cost of the Work shall not include any of the following items:

1. Payroll costs and other compensation of Contractor's officers, executives, principals (of partnerships and sole proprietorships), general managers, safety managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expediters, timekeepers, clerks, and other personnel employed by Contractor, whether at the Site or in Contractor's principal or branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications referred to in Paragraph 13.01.B.1 or specifically covered by Paragraph 13.01.B.4. The payroll costs and other compensation excluded here are to be considered administrative costs covered by the Contractor's fee.

2. Expenses of Contractor's principal and branch offices other than Contractor's office at the Site.

3. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.

4. Costs due to the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including but not limited to, the correction of defective Work, disposal of materials or equipment wrongly supplied, and making good any damage to property.

5. Other overhead or general expense costs of any kind and the costs of any item not specifically and expressly included in Paragraph 13.01.B.

D. *Contractor's Fee*: When the Work as a whole is performed on the basis of cost-plus, Contractor's fee shall be determined as set forth in the Agreement. When the value of any Work covered by a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price is determined on the basis of Cost of the Work, Contractor's fee shall be determined as set forth in Paragraph 11.04.C.

E. *Documentation*: Whenever the Cost of the Work for any purpose is to be determined pursuant to this Article 13, Contractor will establish and maintain records thereof in accordance with generally accepted accounting practices and submit in a form acceptable to Engineer an itemized cost breakdown together with supporting data.

13.02 Allowances

A. It is understood that Contractor has included in the Contract Price all allowances so named in the Contract Documents and shall cause the Work so covered to be performed for such sums and by such persons or entities as may be acceptable to Owner and Engineer.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. *Cash Allowances*: Contractor agrees that:

1. the cash allowances include the cost to Contractor (less any applicable trade discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes; and

2. Contractor's costs for unloading and handling on the Site, labor, installation, overhead, profit, and other expenses contemplated for the cash allowances have been included in the Contract Price and not in the allowances, and no demand for additional payment on account of any of the foregoing will be valid.

C. *Contingency Allowance*: Contractor agrees that a contingency allowance, if any, is for the sole use of Owner to cover unanticipated costs.

D. Prior to final payment, an appropriate Change Order will be issued as recommended by Engineer to reflect actual amounts due Contractor on account of Work covered by allowances, and the Contract Price shall be correspondingly adjusted.

13.03 Unit Price Work

A. Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include for all Unit Price Work an amount equal to the sum of the unit price for each separately identified item of Unit Price Work times the estimated quantity of each item as indicated in the Agreement.

B. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Payments to Contractor for Unit Price Work will be based on actual quantities.

C. Each unit price will be deemed to include an amount considered by Contractor to be adequate to cover Contractor's overhead and profit for each separately identified item.

D. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor. Engineer will review with Contractor the Engineer's preliminary determinations on such matters before rendering a written decision thereon (by recommendation of an Application for Payment or otherwise). Engineer's written decision thereon will be final and binding (except as modified by Engineer to reflect changed factual conditions or more accurate data) upon Owner and Contractor, subject to the provisions of the following paragraph.

E. Within 30 days of Engineer's written decision under the preceding paragraph, Contractor may submit a Change Proposal, or Owner may file a Claim, seeking an adjustment in the Contract Price if:

1. the quantity of any item of Unit Price Work performed by Contractor differs materially and significantly from the estimated quantity of such item indicated in the Agreement;

2. there is no corresponding adjustment with respect to any other item of Work; and

3. Contractor believes that it is entitled to an increase in Contract Price as a result of having incurred additional expense or Owner believes that Owner is entitled to a decrease in Contract Price, and the parties are unable to agree as to the amount of any such increase or decrease.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 14 – TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

14.01 Access to Work

A. Owner, Engineer, their consultants and other representatives and personnel of Owner, independent testing laboratories, and authorities having jurisdiction will have access to the Site and the Work at reasonable times for their observation, inspection, and testing. Contractor shall provide them proper and safe conditions for such access and advise them of Contractor's safety procedures and programs so that they may comply therewith as applicable.

14.02 Tests, Inspections, and Approvals

A. Contractor shall give Engineer timely notice of readiness of the Work (or specific parts thereof) for all required inspections and tests, and shall cooperate with inspection and testing personnel to facilitate required inspections and tests.

B. Owner shall retain and pay for the services of an independent inspector, testing laboratory, or other qualified individual or entity to perform all inspections and tests expressly required by the Contract Documents to be furnished and paid for by Owner, except that costs incurred in connection with tests or inspections of covered Work shall be governed by the provisions of Paragraph 14.05.

C. If Laws or Regulations of any public body having jurisdiction require any Work (or part thereof) specifically to be inspected, tested, or approved by an employee or other representative of such public body, Contractor shall assume full responsibility for arranging and obtaining such inspections, tests, or approvals, pay all costs in connection therewith, and furnish Engineer the required certificates of inspection or approval.

D. Contractor shall be responsible for arranging, obtaining, and paying for all inspections and tests required:

1. by the Contract Documents, unless the Contract Documents expressly allocate responsibility for a specific inspection or test to Owner;
2. to attain Owner's and Engineer's acceptance of materials or equipment to be incorporated in the Work;
3. by manufacturers of equipment furnished under the Contract Documents;
4. for testing, adjusting, and balancing of mechanical, electrical, and other equipment to be incorporated into the Work; and
5. for acceptance of materials, mix designs, or equipment submitted for approval prior to Contractor's purchase thereof for incorporation in the Work.

Such inspections and tests shall be performed by independent inspectors, testing laboratories, or other qualified individuals or entities acceptable to Owner and Engineer.

E. If the Contract Documents require the Work (or part thereof) to be approved by Owner, Engineer, or another designated individual or entity, then Contractor shall assume full responsibility for arranging and obtaining such approvals.

F. If any Work (or the work of others) that is to be inspected, tested, or approved is covered by Contractor without written concurrence of Engineer, Contractor shall, if requested by Engineer, uncover such Work for observation. Such uncovering shall be at Contractor's expense unless Contractor had given Engineer timely notice of Contractor's intention to

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

cover the same and Engineer had not acted with reasonable promptness in response to such notice.

14.03 Defective Work

A. *Contractor's Obligation*: It is Contractor's obligation to assure that the Work is not defective.

B. *Engineer's Authority*: Engineer has the authority to determine whether Work is defective, and to reject defective Work.

C. *Notice of Defects*: Prompt notice of all defective Work of which Owner or Engineer has actual knowledge will be given to Contractor.

D. *Correction, or Removal and Replacement*: Promptly after receipt of written notice of defective Work, Contractor shall correct all such defective Work, whether or not fabricated, installed, or completed, or, if Engineer has rejected the defective Work, remove it from the Project and replace it with Work that is not defective.

E. *Preservation of Warranties*: When correcting defective Work, Contractor shall take no action that would void or otherwise impair Owner's special warranty and guarantee, if any, on said Work.

F. *Costs and Damages*: In addition to its correction, removal, and replacement obligations with respect to defective Work, Contractor shall pay all claims, costs, losses, and damages arising out of or relating to defective Work, including but not limited to the cost of the inspection, testing, correction, removal, replacement, or reconstruction of such defective Work, fines levied against Owner by governmental authorities because the Work is defective, and the costs of repair or replacement of work of others resulting from defective Work. Prior to final payment, if Owner and Contractor are unable to agree as to the measure of such claims, costs, losses, and damages resulting from defective Work, then Owner may impose a reasonable set-off against payments due under Article 15.

14.04 Acceptance of Defective Work

A. If, instead of requiring correction or removal and replacement of defective Work, Owner prefers to accept it, Owner may do so (subject, if such acceptance occurs prior to final payment, to Engineer's confirmation that such acceptance is in general accord with the design intent and applicable engineering principles, and will not endanger public safety). Contractor shall pay all claims, costs, losses, and damages attributable to Owner's evaluation of and determination to accept such defective Work (such costs to be approved by Engineer as to reasonableness), and for the diminished value of the Work to the extent not otherwise paid by Contractor. If any such acceptance occurs prior to final payment, the necessary revisions in the Contract Documents with respect to the Work shall be incorporated in a Change Order. If the parties are unable to agree as to the decrease in the Contract Price, reflecting the diminished value of Work so accepted, then Owner may impose a reasonable set-off against payments due under Article 15. If the acceptance of defective Work occurs after final payment, Contractor shall pay an appropriate amount to Owner.

14.05 Uncovering Work

A. Engineer has the authority to require additional inspection or testing of the Work, whether or not the Work is fabricated, installed, or completed.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If any Work is covered contrary to the written request of Engineer, then Contractor shall, if requested by Engineer, uncover such Work for Engineer's observation, and then replace the covering, all at Contractor's expense.

C. If Engineer considers it necessary or advisable that covered Work be observed by Engineer or inspected or tested by others, then Contractor, at Engineer's request, shall uncover, expose, or otherwise make available for observation, inspection, or testing as Engineer may require, that portion of the Work in question, and provide all necessary labor, material, and equipment.

1. If it is found that the uncovered Work is defective, Contractor shall be responsible for all claims, costs, losses, and damages arising out of or relating to such uncovering, exposure, observation, inspection, and testing, and of satisfactory replacement or reconstruction (including but not limited to all costs of repair or replacement of work of others); and pending Contractor's full discharge of this responsibility the Owner shall be entitled to impose a reasonable set-off against payments due under Article 15.

2. If the uncovered Work is not found to be defective, Contractor shall be allowed an increase in the Contract Price or an extension of the Contract Times, or both, directly attributable to such uncovering, exposure, observation, inspection, testing, replacement, and reconstruction. If the parties are unable to agree as to the amount or extent thereof, then Contractor may submit a Change Proposal within 30 days of the determination that the Work is not defective.

14.06 Owner May Stop the Work

A. If the Work is defective, or Contractor fails to supply sufficient skilled workers or suitable materials or equipment, or fails to perform the Work in such a way that the completed Work will conform to the Contract Documents, then Owner may order Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, this right of Owner to stop the Work shall not give rise to any duty on the part of Owner to exercise this right for the benefit of Contractor, any Subcontractor, any Supplier, any other individual or entity, or any surety for, or employee or agent of any of them.

14.07 Owner May Correct Defective Work

A. If Contractor fails within a reasonable time after written notice from Engineer to correct defective Work, or to remove and replace rejected Work as required by Engineer, or if Contractor fails to perform the Work in accordance with the Contract Documents, or if Contractor fails to comply with any other provision of the Contract Documents, then Owner may, after seven days written notice to Contractor, correct or remedy any such deficiency.

B. In exercising the rights and remedies under this Paragraph 14.07, Owner shall proceed expeditiously. In connection with such corrective or remedial action, Owner may exclude Contractor from all or part of the Site, take possession of all or part of the Work and suspend Contractor's services related thereto, and incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere. Contractor shall allow Owner, Owner's representatives, agents and employees, Owner's other contractors, and Engineer and Engineer's consultants access to the Site to enable Owner to exercise the rights and remedies under this paragraph.

C. All claims, costs, losses, and damages incurred or sustained by Owner in exercising the rights and remedies under this Paragraph 14.07 will be charged against Contractor as set-offs against payments due under Article 15. Such claims, costs, losses and damages will

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of Contractor's defective Work.

D. Contractor shall not be allowed an extension of the Contract Times because of any delay in the performance of the Work attributable to the exercise by Owner of Owner's rights and remedies under this Paragraph 14.07.

ARTICLE 15 – PAYMENTS TO CONTRACTOR; SET-OFFS; COMPLETION; CORRECTION PERIOD

15.01 Progress Payments

A. *Basis for Progress Payments*: The Schedule of Values established as provided in Article 2 will serve as the basis for progress payments and will be incorporated into a form of Application for Payment acceptable to Engineer. Progress payments on account of Unit Price Work will be based on the number of units completed during the pay period, as determined under the provisions of Paragraph 13.03. Progress payments for cost-based Work will be based on Cost of the Work completed by Contractor during the pay period.

B. *Applications for Payments*:

1. At least 20 days before the date established in the Agreement for each progress payment (but not more often than once a month), Contractor shall submit to Engineer for review an Application for Payment filled out and signed by Contractor covering the Work completed as of the date of the Application and accompanied by such supporting documentation as is required by the Contract Documents. If payment is requested on the basis of materials and equipment not incorporated in the Work but delivered and suitably stored at the Site or at another location agreed to in writing, the Application for Payment shall also be accompanied by a bill of sale, invoice, or other documentation warranting that Owner has received the materials and equipment free and clear of all Liens, and evidence that the materials and equipment are covered by appropriate property insurance, a warehouse bond, or other arrangements to protect Owner's interest therein, all of which must be satisfactory to Owner.

2. Beginning with the second Application for Payment, each Application shall include an affidavit of Contractor stating that all previous progress payments received on account of the Work have been applied on account to discharge Contractor's legitimate obligations associated with prior Applications for Payment.

3. The amount of retainage with respect to progress payments will be as stipulated in the Agreement.

C. *Review of Applications*:

1. Engineer will, within 10 days after receipt of each Application for Payment, including each resubmittal, either indicate in writing a recommendation of payment and present the Application to Owner, or return the Application to Contractor indicating in writing Engineer's reasons for refusing to recommend payment. In the latter case, Contractor may make the necessary corrections and resubmit the Application.

2. Engineer's recommendation of any payment requested in an Application for Payment will constitute a representation by Engineer to Owner, based on Engineer's observations of the executed Work as an experienced and qualified design professional, and on Engineer's review of the Application for Payment and the accompanying data and schedules, that to the best of Engineer's knowledge, information and belief:

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

a. the Work has progressed to the point indicated;

b. the quality of the Work is generally in accordance with the Contract Documents (subject to an evaluation of the Work as a functioning whole prior to or upon Substantial Completion, the results of any subsequent tests called for in the Contract Documents, a final determination of quantities and classifications for Unit Price Work under Paragraph 13.03, and any other qualifications stated in the recommendation); and

c. the conditions precedent to Contractor's being entitled to such payment appear to have been fulfilled in so far as it is Engineer's responsibility to observe the Work.

3. By recommending any such payment Engineer will not thereby be deemed to have represented that:

a. inspections made to check the quality or the quantity of the Work as it has been performed have been exhaustive, extended to every aspect of the Work in progress, or involved detailed inspections of the Work beyond the responsibilities specifically assigned to Engineer in the Contract; or

b. there may not be other matters or issues between the parties that might entitle Contractor to be paid additionally by Owner or entitle Owner to withhold payment to Contractor.

4. Neither Engineer's review of Contractor's Work for the purposes of recommending payments nor Engineer's recommendation of any payment, including final payment, will impose responsibility on Engineer:

a. to supervise, direct, or control the Work, or

b. for the means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or

c. for Contractor's failure to comply with Laws and Regulations applicable to Contractor's performance of the Work, or

d. to make any examination to ascertain how or for what purposes Contractor has used the money paid on account of the Contract Price, or

e. to determine that title to any of the Work, materials, or equipment has passed to Owner free and clear of any Liens.

5. Engineer may refuse to recommend the whole or any part of any payment if, in Engineer's opinion, it would be incorrect to make the representations to Owner stated in Paragraph 15.01.C.2.

6. Engineer will recommend reductions in payment (set-offs) necessary in Engineer's opinion to protect Owner from loss because:

a. the Work is defective, requiring correction or replacement;

b. the Contract Price has been reduced by Change Orders;

c. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible; or

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

e. Engineer has actual knowledge of the occurrence of any of the events that would constitute a default by Contractor and therefore justify termination for cause under the Contract Documents.

D. *Payment Becomes Due*:

1. Ten days after presentation of the Application for Payment to Owner with Engineer's recommendation, the amount recommended (subject to any Owner set-offs) will become due, and when due will be paid by Owner to Contractor.

E. *Reductions in Payment by Owner*:

1. In addition to any reductions in payment (set-offs) recommended by Engineer, Owner is entitled to impose a set-off against payment based on any of the following:

a. claims have been made against Owner on account of Contractor's conduct in the performance or furnishing of the Work, or Owner has incurred costs, losses, or damages on account of Contractor's conduct in the performance or furnishing of the Work, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, non-compliance with Laws and Regulations, and patent infringement;

b. Contractor has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with other work at or adjacent to the Site;

c. Contractor has failed to provide and maintain required bonds or insurance;

d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. Owner has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. the Work is defective, requiring correction or replacement;

g. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

h. the Contract Price has been reduced by Change Orders;

i. an event that would constitute a default by Contractor and therefore justify a termination for cause has occurred;

j. liquidated damages have accrued as a result of Contractor's failure to achieve Milestones, Substantial Completion, or final completion of the Work;

k. Liens have been filed in connection with the Work, except where Contractor has delivered a specific bond satisfactory to Owner to secure the satisfaction and discharge of such Liens;

l. there are other items entitling Owner to a set off against the amount recommended.

2. If Owner imposes any set-off against payment, whether based on its own knowledge or on the written recommendations of Engineer, Owner will give Contractor immediate written notice (with a copy to Engineer) stating the reasons for such action and the specific amount of the reduction, and promptly pay Contractor any amount

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

remaining after deduction of the amount so withheld. Owner shall promptly pay Contractor the amount so withheld, or any adjustment thereto agreed to by Owner and Contractor, if Contractor remedies the reasons for such action. The reduction imposed shall be binding on Contractor unless it duly submits a Change Proposal contesting the reduction.

3. Upon a subsequent determination that Owner's refusal of payment was not justified, the amount wrongfully withheld shall be treated as an amount due as determined by Paragraph 15.01.C.1 and subject to interest as provided in the Agreement.

15.02 Contractor's Warranty of Title

A. Contractor warrants and guarantees that title to all Work, materials, and equipment furnished under the Contract will pass to Owner free and clear of (1) all Liens and other title defects, and (2) all patent, licensing, copyright, or royalty obligations, no later than seven days after the time of payment by Owner.

15.03 Substantial Completion

A. When Contractor considers the entire Work ready for its intended use Contractor shall notify Owner and Engineer in writing that the entire Work is substantially complete and request that Engineer issue a certificate of Substantial Completion. Contractor shall at the same time submit to Owner and Engineer an initial draft of punch list items to be completed or corrected before final payment.

B. Promptly after Contractor's notification, Owner, Contractor, and Engineer shall make an inspection of the Work to determine the status of completion. If Engineer does not consider the Work substantially complete, Engineer will notify Contractor in writing giving the reasons therefor.

C. If Engineer considers the Work substantially complete, Engineer will deliver to Owner a preliminary certificate of Substantial Completion which shall fix the date of Substantial Completion. Engineer shall attach to the certificate a punch list of items to be completed or corrected before final payment. Owner shall have seven days after receipt of the preliminary certificate during which to make written objection to Engineer as to any provisions of the certificate or attached punch list. If, after considering the objections to the provisions of the preliminary certificate, Engineer concludes that the Work is not substantially complete, Engineer will, within 14 days after submission of the preliminary certificate to Owner, notify Contractor in writing that the Work is not substantially complete, stating the reasons therefor. If Owner does not object to the provisions of the certificate, or if despite consideration of Owner's objections Engineer concludes that the Work is substantially complete, then Engineer will, within said 14 days, execute and deliver to Owner and Contractor a final certificate of Substantial Completion (with a revised punch list of items to be completed or corrected) reflecting such changes from the preliminary certificate as Engineer believes justified after consideration of any objections from Owner.

D. At the time of receipt of the preliminary certificate of Substantial Completion, Owner and Contractor will confer regarding Owner's use or occupancy of the Work following Substantial Completion, review the builder's risk insurance policy with respect to the end of the builder's risk coverage, and confirm the transition to coverage of the Work under a permanent property insurance policy held by Owner. Unless Owner and Contractor agree otherwise in writing, Owner shall bear responsibility for security, operation, protection of the Work, property insurance, maintenance, heat, and utilities upon Owner's use or occupancy of the Work.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. After Substantial Completion the Contractor shall promptly begin work on the punch list of items to be completed or corrected prior to final payment. In appropriate cases Contractor may submit monthly Applications for Payment for completed punch list items, following the progress payment procedures set forth above.

F. Owner shall have the right to exclude Contractor from the Site after the date of Substantial Completion subject to allowing Contractor reasonable access to remove its property and complete or correct items on the punch list.

15.04 Partial Use or Occupancy

A. Prior to Substantial Completion of all the Work, Owner may use or occupy any substantially completed part of the Work which has specifically been identified in the Contract Documents, or which Owner, Engineer, and Contractor agree constitutes a separately functioning and usable part of the Work that can be used by Owner for its intended purpose without significant interference with Contractor's performance of the remainder of the Work, subject to the following conditions:

1. At any time Owner may request in writing that Contractor permit Owner to use or occupy any such part of the Work that Owner believes to be substantially complete. If and when Contractor agrees that such part of the Work is substantially complete, Contractor, Owner, and Engineer will follow the procedures of Paragraph 15.03.A through E for that part of the Work.

2. At any time Contractor may notify Owner and Engineer in writing that Contractor considers any such part of the Work substantially complete and request Engineer to issue a certificate of Substantial Completion for that part of the Work.

3. Within a reasonable time after either such request, Owner, Contractor, and Engineer shall make an inspection of that part of the Work to determine its status of completion. If Engineer does not consider that part of the Work to be substantially complete, Engineer will notify Owner and Contractor in writing giving the reasons therefor. If Engineer considers that part of the Work to be substantially complete, the provisions of Paragraph 15.03 will apply with respect to certification of Substantial Completion of that part of the Work and the division of responsibility in respect thereof and access thereto.

4. No use or occupancy or separate operation of part of the Work may occur prior to compliance with the requirements of Paragraph 6.05 regarding builder's risk or other property insurance.

15.05 Final Inspection

A. Upon written notice from Contractor that the entire Work or an agreed portion thereof is complete, Engineer will promptly make a final inspection with Owner and Contractor and will notify Contractor in writing of all particulars in which this inspection reveals that the Work, or agreed portion thereof, is incomplete or defective. Contractor shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

15.06 Final Payment

A. *Application for Payment*:

1. After Contractor has, in the opinion of Engineer, satisfactorily completed all corrections identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, bonds, certificates or other evidence of insurance, certificates of

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

inspection, annotated record documents (as provided in Paragraph 7.11), and other documents, Contractor may make application for final payment.

2. The final Application for Payment shall be accompanied (except as previously delivered) by:

   a. all documentation called for in the Contract Documents;

   b. consent of the surety, if any, to final payment;

   c. satisfactory evidence that all title issues have been resolved such that title to all Work, materials, and equipment has passed to Owner free and clear of any Liens or other title defects, or will so pass upon final payment.

   d. a list of all disputes that Contractor believes are unsettled; and

   e. complete and legally effective releases or waivers (satisfactory to Owner) of all Lien rights arising out of the Work, and of Liens filed in connection with the Work.

3. In lieu of the releases or waivers of Liens specified in Paragraph 15.06.A.2 and as approved by Owner, Contractor may furnish receipts or releases in full and an affidavit of Contractor that: (a) the releases and receipts include all labor, services, material, and equipment for which a Lien could be filed; and (b) all payrolls, material and equipment bills, and other indebtedness connected with the Work for which Owner might in any way be responsible, or which might in any way result in liens or other burdens on Owner's property, have been paid or otherwise satisfied. If any Subcontractor or Supplier fails to furnish such a release or receipt in full, Contractor may furnish a bond or other collateral satisfactory to Owner to indemnify Owner against any Lien, or Owner at its option may issue joint checks payable to Contractor and specified Subcontractors and Suppliers.

B. *Engineer's Review of Application and Acceptance*:

1. If, on the basis of Engineer's observation of the Work during construction and final inspection, and Engineer's review of the final Application for Payment and accompanying documentation as required by the Contract Documents, Engineer is satisfied that the Work has been completed and Contractor's other obligations under the Contract have been fulfilled, Engineer will, within ten days after receipt of the final Application for Payment, indicate in writing Engineer's recommendation of final payment and present the Application for Payment to Owner for payment. Such recommendation shall account for any set-offs against payment that are necessary in Engineer's opinion to protect Owner from loss for the reasons stated above with respect to progress payments. At the same time Engineer will also give written notice to Owner and Contractor that the Work is acceptable, subject to the provisions of Paragraph 15.07. Otherwise, Engineer will return the Application for Payment to Contractor, indicating in writing the reasons for refusing to recommend final payment, in which case Contractor shall make the necessary corrections and resubmit the Application for Payment.

C. *Completion of Work*: The Work is complete (subject to surviving obligations) when it is ready for final payment as established by the Engineer's written recommendation of final payment.

D. *Payment Becomes Due*: Thirty days after the presentation to Owner of the final Application for Payment and accompanying documentation, the amount recommended by Engineer (less any further sum Owner is entitled to set off against Engineer's recommendation,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

including but not limited to set-offs for liquidated damages and set-offs allowed under the provisions above with respect to progress payments) will become due and shall be paid by Owner to Contractor.

15.07 Waiver of Claims

A. The making of final payment will not constitute a waiver by Owner of claims or rights against Contractor. Owner expressly reserves claims and rights arising from unsettled Liens, from defective Work appearing after final inspection pursuant to Paragraph 15.05, from Contractor's failure to comply with the Contract Documents or the terms of any special guarantees specified therein, from outstanding Claims by Owner, or from Contractor's continuing obligations under the Contract Documents.

B. The acceptance of final payment by Contractor will constitute a waiver by Contractor of all claims and rights against Owner other than those pending matters that have been duly submitted or appealed under the provisions of Article 17.

15.08 Correction Period

A. If within one year after the date of Substantial Completion (or such longer period of time as may be prescribed by the terms of any applicable special guarantee required by the Contract Documents, or by any specific provision of the Contract Documents), any Work is found to be defective, or if the repair of any damages to the Site, adjacent areas that Contractor has arranged to use through construction easements or otherwise, and other adjacent areas used by Contractor as permitted by Laws and Regulations, is found to be defective, then Contractor shall promptly, without cost to Owner and in accordance with Owner's written instructions:

1. correct the defective repairs to the Site or such other adjacent areas;
2. correct such defective Work;
3. if the defective Work has been rejected by Owner, remove it from the Project and replace it with Work that is not defective, and
4. satisfactorily correct or repair or remove and replace any damage to other Work, to the work of others, or to other land or areas resulting therefrom.

B. If Contractor does not promptly comply with the terms of Owner's written instructions, or in an emergency where delay would cause serious risk of loss or damage, Owner may have the defective Work corrected or repaired or may have the rejected Work removed and replaced. Contractor shall pay all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such correction or repair or such removal and replacement (including but not limited to all costs of repair or replacement of work of others).

C. In special circumstances where a particular item of equipment is placed in continuous service before Substantial Completion of all the Work, the correction period for that item may start to run from an earlier date if so provided in the Specifications.

D. Where defective Work (and damage to other Work resulting therefrom) has been corrected or removed and replaced under this paragraph, the correction period hereunder with respect to such Work will be extended for an additional period of one year after such correction or removal and replacement has been satisfactorily completed.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. Contractor's obligations under this paragraph are in addition to all other obligations and warranties. The provisions of this paragraph shall not be construed as a substitute for, or a waiver of, the provisions of any applicable statute of limitation or repose.

ARTICLE 16 – SUSPENSION OF WORK AND TERMINATION

16.01 Owner May Suspend Work

A. At any time and without cause, Owner may suspend the Work or any portion thereof for a period of not more than 90 consecutive days by written notice to Contractor and Engineer. Such notice will fix the date on which Work will be resumed. Contractor shall resume the Work on the date so fixed. Contractor shall be entitled to an adjustment in the Contract Price or an extension of the Contract Times, or both, directly attributable to any such suspension. Any Change Proposal seeking such adjustments shall be submitted no later than 30 days after the date fixed for resumption of Work.

16.02 Owner May Terminate for Cause

A. The occurrence of any one or more of the following events will constitute a default by Contractor and justify termination for cause:

1. Contractor's persistent failure to perform the Work in accordance with the Contract Documents (including, but not limited to, failure to supply sufficient skilled workers or suitable materials or equipment or failure to adhere to the Progress Schedule);

2. Failure of Contractor to perform or otherwise to comply with a material term of the Contract Documents;

3. Contractor's disregard of Laws or Regulations of any public body having jurisdiction; or

4. Contractor's repeated disregard of the authority of Owner or Engineer.

B. If one or more of the events identified in Paragraph 16.02.A occurs, then after giving Contractor (and any surety) ten days written notice that Owner is considering a declaration that Contractor is in default and termination of the contract, Owner may proceed to:

1. declare Contractor to be in default, and give Contractor (and any surety) notice that the Contract is terminated; and

2. enforce the rights available to Owner under any applicable performance bond.

C. Subject to the terms and operation of any applicable performance bond, if Owner has terminated the Contract for cause, Owner may exclude Contractor from the Site, take possession of the Work, incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere, and complete the Work as Owner may deem expedient.

D. Owner may not proceed with termination of the Contract under Paragraph 16.02.B if Contractor within seven days of receipt of notice of intent to terminate begins to correct its failure to perform and proceeds diligently to cure such failure.

E. If Owner proceeds as provided in Paragraph 16.02.B, Contractor shall not be entitled to receive any further payment until the Work is completed. If the unpaid balance of the Contract Price exceeds the cost to complete the Work, including all related claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals) sustained by Owner, such excess will be paid to Contractor. If the cost to complete the Work including such related claims, costs, losses,

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

and damages exceeds such unpaid balance, Contractor shall pay the difference to Owner. Such claims, costs, losses, and damages incurred by Owner will be reviewed by Engineer as to their reasonableness and, when so approved by Engineer, incorporated in a Change Order. When exercising any rights or remedies under this paragraph, Owner shall not be required to obtain the lowest price for the Work performed.

F. Where Contractor's services have been so terminated by Owner, the termination will not affect any rights or remedies of Owner against Contractor then existing or which may thereafter accrue, or any rights or remedies of Owner against Contractor or any surety under any payment bond or performance bond. Any retention or payment of money due Contractor by Owner will not release Contractor from liability.

G. If and to the extent that Contractor has provided a performance bond under the provisions of Paragraph 6.01.A, the provisions of that bond shall govern over any inconsistent provisions of Paragraphs 16.02.B and 16.02.D.

16.03 Owner May Terminate For Convenience

A. Upon seven days written notice to Contractor and Engineer, Owner may, without cause and without prejudice to any other right or remedy of Owner, terminate the Contract. In such case, Contractor shall be paid for (without duplication of any items):

1. completed and acceptable Work executed in accordance with the Contract Documents prior to the effective date of termination, including fair and reasonable sums for overhead and profit on such Work;

2. expenses sustained prior to the effective date of termination in performing services and furnishing labor, materials, or equipment as required by the Contract Documents in connection with uncompleted Work, plus fair and reasonable sums for overhead and profit on such expenses; and

3. other reasonable expenses directly attributable to termination, including costs incurred to prepare a termination for convenience cost proposal.

B. Contractor shall not be paid on account of loss of anticipated overhead, profits, or revenue, or other economic loss arising out of or resulting from such termination.

16.04 Contractor May Stop Work or Terminate

A. If, through no act or fault of Contractor, (1) the Work is suspended for more than 90 consecutive days by Owner or under an order of court or other public authority, or (2) Engineer fails to act on any Application for Payment within 30 days after it is submitted, or (2) Owner fails for 30 days to pay Contractor any sum finally determined to be due, then Contractor may, upon seven days written notice to Owner and Engineer, and provided Owner or Engineer do not remedy such suspension or failure within that time, terminate the contract and recover from Owner payment on the same terms as provided in Paragraph 16.03.

B. In lieu of terminating the Contract and without prejudice to any other right or remedy, if Engineer has failed to act on an Application for Payment within 30 days after it is submitted, or Owner has failed for 30 days to pay Contractor any sum finally determined to be due, Contractor may, seven days after written notice to Owner and Engineer, stop the Work until payment is made of all such amounts due Contractor, including interest thereon. The provisions of this paragraph are not intended to preclude Contractor from submitting a Change Proposal for an adjustment in Contract Price or Contract Times or otherwise for

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

expenses or damage directly attributable to Contractor's stopping the Work as permitted by this paragraph.

ARTICLE 17 – FINAL RESOLUTION OF DISPUTES

17.01 Methods and Procedures

A. *Disputes Subject to Final Resolution*: The following disputed matters are subject to final resolution under the provisions of this Article:

1. A timely appeal of an approval in part and denial in part of a Claim, or of a denial in full; and

2. Disputes between Owner and Contractor concerning the Work or obligations under the Contract Documents, and arising after final payment has been made.

B. *Final Resolution of Disputes*: For any dispute subject to resolution under this Article, Owner or Contractor may:

1. elect in writing to invoke the dispute resolution process provided for in the Supplementary Conditions; or

2. agree with the other party to submit the dispute to another dispute resolution process; or

3. if no dispute resolution process is provided for in the Supplementary Conditions or mutually agreed to, give written notice to the other party of the intent to submit the dispute to a court of competent jurisdiction.

ARTICLE 18 – MISCELLANEOUS

18.01 Giving Notice

A. Whenever any provision of the Contract Documents requires the giving of written notice, it will be deemed to have been validly given if:

1. delivered in person, by a commercial courier service or otherwise, to the individual or to a member of the firm or to an officer of the corporation for which it is intended; or

2. delivered at or sent by registered or certified mail, postage prepaid, to the last business address known to the sender of the notice.

18.02 Computation of Times

A. When any period of time is referred to in the Contract by days, it will be computed to exclude the first and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a day made a legal holiday by the law of the applicable jurisdiction, such day will be omitted from the computation.

18.03 Cumulative Remedies

A. The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto are in addition to, and are not to be construed in any way as a limitation of, any rights and remedies available to any or all of them which are otherwise imposed or available by Laws or Regulations, by special warranty or guarantee, or by other provisions of the Contract. The provisions of this paragraph will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

18.04 Limitation of Damages

A. With respect to any and all Change Proposals, Claims, disputes subject to final resolution, and other matters at issue, neither Owner nor Engineer, nor any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, shall be liable to Contractor for any claims, costs, losses, or damages sustained by Contractor on or in connection with any other project or anticipated project.

18.05 No Waiver

A. A party's non-enforcement of any provision shall not constitute a waiver of that provision, nor shall it affect the enforceability of that provision or of the remainder of this Contract.

18.06 Survival of Obligations

A. All representations, indemnifications, warranties, and guarantees made in, required by, or given in accordance with the Contract, as well as all continuing obligations indicated in the Contract, will survive final payment, completion, and acceptance of the Work or termination or completion of the Contract or termination of the services of Contractor.

18.07 Controlling Law

A. This Contract is to be governed by the law of the state in which the Project is located.

18.08 Headings

A. Article and paragraph headings are inserted for convenience only and do not constitute parts of these General Conditions.

Copyright © 2013 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

SUPPLEMENTARY CONDITIONS

These Supplementary Conditions amend or supplement the Standard General Conditions of the Construction Contract, EJCDC® C-700 (2013 Edition). All provisions that are not so amended or supplemented remain in full force and effect.

The terms used in these Supplementary Conditions have the meanings stated in the General Conditions. Additional terms used in these Supplementary Conditions have the meanings stated below, which are applicable to both the singular and plural thereof.

The address system used in these Supplementary Conditions is the same as the address system used in the General Conditions, with the prefix "SC" added thereto.

ARTICLE 1 – DEFINITIONS AND TERMINOLOGY

SC-1.01 Defined Terms

SC-1.01. Add to the list of definitions in Paragraph 1.01.A by inserting the following as numbered items in their proper alphabetical positions:

SURETY – The person, firm, or corporation which is bound by the contract bonds with and for Contractor (Principal); and which is held and firmly bound unto Owner for the conditions of obligations set forth in said bonds.

ARTICLE 2 – PRELIMINARY MATTERS

SC-2.01 Delivery of Bonds and Evidence of Insurance

SC-2.01 Delete Paragraphs 2.01 B. in their entirety and insert the following in their place:

B. Evidence of Contractor's Insurance: When Contractor delivers the executed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner copies of the policies of insurance (including all endorsements, and identification of applicable self-insured retentions and deductibles) required to be provided by Contractor in Article 6. Contractor may block out (redact) any confidential premium or pricing information contained in any policy or endorsement furnished under this provision.

SC-2.01 Delete Paragraphs 2.01 C. in its entirety.

SC-2.03 Before Starting Construction

SC-2.03 Amend the second sentence of Paragraph 2.03.A to read as follows:

At the Preconstruction Conference (or as otherwise specifically required by the Contract Documents), Contractor shall submit to Engineer for timely review

ARTICLE 4 – PRELIMINARY MATTERS

SC-4.01 Commencement of Contract Times; Notice to Proceed

SC-4.01 Amend the third sentence of Paragraph 4.01 A. to read as follows:

A. In no event will the Contract Times commence to run later than the one hundred eightieth day after the day of Bid opening or the ninetieth day after the Effective Date of the Contract, whichever date is earlier.

ARTICLE 5 – AVAILABILITY OF LANDS; SUBSURFACE AND PHYSICAL CONDITIONS; HAZARDOUS ENVIRONMENTAL CONDITIONS

SC-5.01 Availability of Lands

SC-5.01 Add the following to the end of paragraph 5.01.C:

Contractor shall obtain said land rights at his own expense and without liability to the Owner. Contractor shall not enter upon private property without first obtaining written permission from the rightful property owner.

SC-5.03 Subsurface and Physical Conditions

SC 5.03 Delete Paragraphs 5.03.A and 5.03.B in their entirety and insert the following:

A. No reports of explorations or tests of subsurface conditions at or adjacent to the Site, or drawings of physical conditions relating to existing surface or subsurface structures at the Site, are known to Owner.

SC-5.06 Hazardous Environmental Conditions

SC 5.06 Delete Paragraphs 5.06.A and 5.06.B in their entirety and insert the following:

A. No reports or drawings related to Hazardous Environmental Conditions at the Site are known to Owner.

B. Not Used.

SC-5.06 Delete Paragraph 5.06 I. in its entirety.

SC 5.06 Amend the first paragraph of 5.06.J of the General Conditions by changing "(including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs)" to "(including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or other dispute resolution costs)"

ARTICLE 6 – BONDS AND INSURANCE

SC-6.01 Performance, Payment, and Other Bonds

SC 6.01 Delete Paragraph 6.01.B in its entirety and insert the following:

B. All Bonds shall be in the form prescribed by the Contract Documents or other form approved by Owner. All else notwithstanding, the terms of all Bonds shall be substantially in the form prescribed by Chapter 255, Florida Statutes. All Bonds shall be executed by Contractor and a corporate bonding company licensed to transact such business in the State of Florida and named on the

current list of "Surety Companies Acceptable on Federal Bonds" as published in the Treasury Department Circular Number 570. Contractor will cause the Bonds to be recorded with the Clerk of the Circuit Court in the county in which the Work is to be performed. Failure to execute bonds in the form prescribed may constitute nonresponsiveness on the part of Contractor. The expense for all Bonds shall be Contractor's responsibility.

SC-6.02 Insurance—General Provisions

SC-6.02 Add the following paragraph immediately after Paragraph 6.02.B:

1. Certificates of insurance shall be issued by a company with a Best's rating of at least B+ authorized to do business in the State of Florida. Owner must approve non-rated insurers. If used, Owner shall be shown as the Certificate Holder, Engineer as Additional Insured and provide for a 30-day cancellation notice.

SC-6.02 Delete Paragraph 6.02 D. in its entirety.

SC-6.02 Add the following paragraph immediately after Paragraph 6.02.J:

K. No work shall be commenced under this contract until the required Certificate(s) have been provided. Work shall not continue after expiration (or cancellation) until new Certificate(s) have been provided. Non-continuance of work after expiration (or cancellation) of Certificate(s) will not constitute a delay beyond Contractor's control as defined in paragraph 4.05.

L. Contractor shall arrange for its insurers' policies to include, or be endorsed to include, a severability of interest/cross liability provision, so that Owner will be treated as if a separate policy were in existence, but without increasing the policy limits.

M. Contractor's deductibles/self-insured retentions shall be disclosed to Owner and may be disapproved by the latter. They shall be reduced or eliminated at the option of Owner. Contractor is responsible for the amount of any deductible or self-insured retention.

N. Insurance required of Contractor or any other insurance of Contractor shall be considered primary and insurance or self-insurance of Owner shall be considered excess, as may be applicable to claims that arise out of this contract.

O. The Contractor shall either (a) require each subcontractor to procure and maintain the same coverage as required of the Contractor, or (b) insure the activities of subcontractors in his own policy.

SC-6.05.A. Add the following to the list of items in Paragraph 6.05.A, as numbered items:

14. include for the benefit of Owner loss of profits and soft cost coverage including, without limitation, fixed expenses and debt service for a minimum of 12 months with a maximum deductible of 30 days, plus attorneys fees and engineering or other consultants' fees, if not otherwise covered;

15. include by express endorsement coverage of damage to Contractor's equipment.

ARTICLE 7 – CONTRACTOR'S RESPONSIBILITIES

SC-7.02 Labor; Working Hours

SC-7.02.B. Amend the first and second sentences of Paragraph 7.02.B to state "…all Work at the Site shall be performed during regular working hours, 7:00 AM through 5:00 PM. Contractor will not perform Work on a Saturday, Sunday, or any legal holiday recognized by the Owner without prior written approval by the Owner. The Owner recognizes the following legal holidays:

New Year's Day (January 1)
Martin Luther King Jr. Day (3rd Monday in January)
President's Day (3rd Monday in February)
Good Friday
Memorial Day (Last Monday of May)
Independence Day (July 4)
Labor Day (1st Monday of September)
Veteran's Day (November 11)
Thanksgiving Day (4th Thursday of November)
Day After Thanksgiving (4th Friday of November)
Christmas Eve (December 24)
Christmas Day (December 25)
New Year's Eve (December 31)"

SC-7.02.C. Add the following new paragraph immediately after Paragraph 7.02.B:

Contractor shall be responsible for the cost of any overtime pay or other expense incurred by the Owner for Engineer's services (including those of the Resident Project Representative, if any), Owner's representative, and construction observation services, occasioned by the performance of Work outside of regular working hours as defined in the Contract Documents. If Contractor is responsible but does not pay, or if the parties are unable to agree as to the amount owed, then Owner may impose a reasonable set-off against payments due under Article 15.

SC-7.07 Delete Paragraph 7.07 B. in its entirety.

SC-7.11 Record Documents

SC-7.11.A. Add the following new paragraph immediately after Paragraph 7.11.A:

Annotation of record documents shall be legible, precise, and complete as determined by Engineer. Record drawings shall also meet all additional requirements if any as specified in the Contract Documents including providing an electronic CAD version.

SC-7.12 Safety and Protection

SC-7.12.A. Add the following new paragraph immediately after Paragraph 7.12.A.3:

4. Contractor shall be responsible at all times for precautions to achieve the protection of all persons, including employees and property. Contractor shall make special effort to detect hazardous conditions and shall take prompt action where necessary to avoid accident, injury, or property damage. OSHA and all other applicable safety laws and ordinances shall be followed as well as American National Standards Institute Safety Standards. All accidents, injuries,

claims, or potential claims shall be reported promptly to Owner.

SC-7.16 Shop Drawings, Samples, and Other Submittals

SC-7.16.E. Add the following new paragraph immediately after Paragraph 7.16.E.1:

2. Contractor shall reimburse Owner for the charges of Engineer and Engineer's Consultants for costs generated as a result of more than two submittals of any one Shop Drawing or Sample being required for evaluation due to rejection for noncompliance of the original submittal or for lack of information required by the Contract Documents. Owner's reimbursement for the charges shall be a deduction from Contractor's Partial Payment(s).

SC-7.18 Indemnification

SC-7.18 Delete in its entirety

ARTICLE 9 – OWNER'S RESPONSIBILITIES

SC-9.02 Replacement of Engineer

SC-9.02 Amend paragraph 9.02 of the General Conditions by striking out the following words: ",provided the Contractor makes no reasonable objection."

SC-9.11 Evidence of Financial Arrangements

SC-9.11 Delete in its entirety

ARTICLE 10 – ENGINEER'S STATUS DURING CONSTRUCTION

SC-10.03 Project Representative

SC-10.03 Add the following new paragraphs immediately after Paragraph 10.03.A:

B. The Resident Project Representative (RPR) will be Engineer's representative at the Site, will act as directed by and under the supervision of Engineer, and will confer with Engineer regarding RPR's actions.

1. General: RPR's dealings in matters pertaining to the Work in general shall be with Engineer and Contractor. RPR's dealings with Subcontractors shall only be through or with the full knowledge and approval of Contractor. RPR shall generally communicate with Owner only with the knowledge of and under the direction of Engineer.

2. Schedules: Review the progress schedule, schedule of Shop Drawing and Sample submittals, and Schedule of Values prepared by Contractor and consult with Engineer concerning acceptability.

3. Conferences and Meetings: Attend meetings with Contractor, such as preconstruction conferences, progress meetings, job conferences, and other Project-related meetings, and prepare and circulate copies of minutes thereof.

4. **Liaison:**

    a. **Serve as Engineer's liaison with Contractor. Working principally through Contractor's authorized representative or designee, assist in providing information regarding the provisions and intent of the Contract Documents.**

    b. **Assist Engineer in serving as Owner's liaison with Contractor when Contractor's operations affect Owner's on-Site operations.**

    c. **Assist in obtaining from Owner additional details or information, when required for proper execution of the Work.**

5. **Interpretation of Contract Documents: Report to Engineer when clarifications and interpretations of the Contract Documents are needed and transmit to Contractor clarifications and interpretations as issued by Engineer.**

6. **Shop Drawings and Samples:**

    a. **Record date of receipt of Samples and Contractor-approved Shop Drawings.**

    b. **Receive Samples which are furnished at the Site by Contractor, and notify Engineer of availability of Samples for examination.**

    c. **Advise Engineer and Contractor of the commencement of any portion of the Work requiring a Shop Drawing or Sample submittal for which RPR believes that the submittal has not been approved by Engineer.**

7. **Modifications: Consider and evaluate Contractor's suggestions for modifications in Drawings or Specifications and report such suggestions, together with RPR's recommendations, if any, to Engineer. Transmit to Contractor in writing decisions as issued by Engineer.**

8. **Review of Work and Rejection of Defective Work:**

    a. **Conduct on-Site observations of Contractor's work in progress to assist Engineer in determining if the Work is in general proceeding in accordance with the Contract Documents.**

    b. **Report to Engineer whenever RPR believes that any part of Contractor's work in progress is defective, will not produce a completed Project that conforms generally to the Contract Documents, or will imperil the integrity of the design concept of the completed Project as a functioning whole as indicated in the Contract Documents, or has been damaged, or does not meet the requirements of any inspection, test or approval required to be made; and advise Engineer of that part of work in progress that RPR believes should be corrected or rejected or should be uncovered for observation, or requires special testing, inspection or approval.**

9. **Inspections, Tests, and System Start-ups:**

    a. **Verify that tests, equipment, and systems start-ups and operating and maintenance training are conducted in the presence of appropriate Owner's personnel, and that Contractor maintains adequate records thereof.**

b. **Observe, record, and report to Engineer appropriate details relative to the test procedures and systems start-ups.**

10. **Records:**

    a. **Prepare a daily report or keep a diary or log book, recording Contractor's hours on the Site, Subcontractors present at the Site, weather conditions, data relative to questions of Change Orders, Field Orders, Work Change Directives, or changed conditions, Site visitors, deliveries of equipment or materials, daily activities, decisions, observations in general, and specific observations in more detail as in the case of observing test procedures; and send copies to Engineer.**

    b. **Record names, addresses, fax numbers, e-mail addresses, web site locations, and telephone numbers of all Contractors, Subcontractors, and major Suppliers of materials and equipment.**

    c. **Maintain records for use in preparing Project documentation.**

11. **Reports:**

    a. **Furnish to Engineer periodic reports as required of progress of the Work and of Contractor's compliance with the Progress Schedule and schedule of Shop Drawing and Sample submittals.**

    b. **Draft and recommend to Engineer proposed Change Orders, Work Change Directives, and Field Orders. Obtain backup material from Contractor.**

    c. **Immediately notify Engineer of the occurrence of any Site accidents, emergencies, acts of God endangering the Work, force majeure or delay events, damage to property by fire or other causes, or the discovery of any Constituent of Concern or Hazardous Environmental Condition.**

12. **Payment Requests: Review applications for payment with Contractor for compliance with the established procedure for their submission and forward with recommendations to Engineer, noting particularly the relationship of the payment requested to the Schedule of Values, Work completed, and materials and equipment delivered at the Site but not incorporated in the Work.**

13. **Certificates, Operation and Maintenance Manuals: During the course of the Work, verify that materials and equipment certificates, operation and maintenance manuals and other data required by the Contract Documents to be assembled and furnished by Contractor are applicable to the items actually installed and in accordance with the Contract Documents, and have these documents delivered to Engineer for review and forwarding to Owner prior to payment for that part of the Work.**

14. **Completion:**

    a. **Participate in Engineer's visits to the Site to determine Substantial Completion, assist in the determination of Substantial Completion and the preparation of a punch list of items to be completed or corrected.**

    b. **Participate in Engineer's final visit to the Site to determine completion of the Work, in the company of Owner and Contractor, and prepare a**

final punch list of items to be completed and deficiencies to be remedied.

c. Observe whether all items on the final list have been completed or corrected and make recommendations to Engineer concerning acceptance and issuance of the notice of acceptability of the work.

C. The RPR shall not:

1. Authorize any deviation from the Contract Documents or substitution of materials or equipment (including "or-equal" items).

2. Exceed limitations of Engineer's authority as set forth in the Contract Documents.

3. Undertake any of the responsibilities of Contractor, Subcontractors, or Suppliers.

4. Advise on, issue directions relative to, or assume control over any aspect of the means, methods, techniques, sequences or procedures of Contractor's work.

5. Advise on, issue directions regarding, or assume control over security or safety practices, precautions, and programs in connection with the activities or operations of Owner or Contractor.

6. Participate in specialized field or laboratory tests or inspections conducted off-site by others except as specifically authorized by Engineer.

7. Accept Shop Drawing or Sample submittals from anyone other than Contractor.

8. Authorize Owner to occupy the Project in whole or in part.

ARTICLE 12 – CLAIMS

SC-12.01 Claims

SC 12.01.B **Amend the first sentence of paragraph 12.01.B of the General Conditions by changing "(but in no event later than 30 days)" to "(but in no event later than 90 days for the Owner and no later than 10 days for the Contractor)".**

ARTICLE 13 – COST OF THE WORK; ALLOWANCES; UNIT PRICE WORK

SC-13.01 Cost of the Work

SC 13.01.B.5.c **Add the following to the end of Paragraph 13.01.B.5.c:**

In no case shall rates exceed those published by the current edition of Data Quest Incorporated titled, Rental Rate Blue Book for Construction Equipment, and other procedures established by Florida Department of Transportation.

SC 13.01.B.5.f **Amend the first sentence of paragraph 13.01.B.5.f by striking out the following words: "(except losses and damages within the deductible amounts of property insurance established in accordance with Paragraph 6.05)."**

SC 13.01.B.5.i **Add the following new paragraphs immediately after paragraph 13.01.B.5.i:**

j. The cost of compliance with current local, state and federal safety regulations.

SC-13.03 Unit Price Work

SC 13.03.E **Delete Paragraph 13.03.E in its entirety and insert the following in its place:**

E. The unit price of an item of Unit Price Work shall be subject to reevaluation and adjustment by the Owner under the following conditions:

1. if the extended price of a particular item of Unit Price Work amounts to 25 percent or more of the Contract Price (based on estimated quantities at the time of Contract formation) and the variation in the quantity of that particular item of Unit Price Work actually furnished or performed by Contractor differs by more than 25 percent from the estimated quantity of such item indicated in the Agreement; and

2. if there is no corresponding adjustment with respect to any other item of Work; and

3. if Owner believes that the quantity variation entitles Owner to an adjustment in the unit price, Owner may make a Claim, seeking an adjustment in the Contract Price.

SC 13.03.E **Add the following new paragraphs immediately after Paragraph 13.03.E:**

F. Owner reserves the right to delete any Unit Price Work with the change, if any, in the Contract Price or in the Contract Times determined in accordance with Article 11.

ARTICLE 14 –TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

SC-14.02 Tests, Inspections, and Approvals

SC 14.02.A Add the following to the end of Paragraph 14.02.A:

Contractor shall reimburse Owner for the charges of Engineer and Engineer's Consultants for all costs due to work not being ready for tests and/or inspections when the Contractor has notified Engineer that work is ready for tests and/or inspections. Contractor shall reimburse Owner for all failed tests and subsequent retests. Partial payments payable to Contractor shall be distributed, first to reimburse the Owner for such charges, with the balance distributed to the Contractor in accordance with the Contract Documents.

ARTICLE 15 – PAYMENTS TO CONTRACTOR; SET-OFFS; COMPLETION; CORRECTION PERIOD

SC-15.01 Progress Payments

SC 15.01.B.2 Delete Paragraph 15.01.B.2 in its entirety and insert the following in its place:

Beginning with the second Application for Payment, each Application shall include an affidavit of Contractor certifying that Contractor has disbursed to all subcontractors and suppliers having an interest in the contract their pro rata shares of the payment out of previous progress payments received by Contractor for all work completed and materials furnished in the previous period, less a retainage withheld by Contractor pursuant to an agreement with a subcontractor. Contractor shall provide a waiver of lien for all stored materials with the second application for payment after submitting application for payment. If the waiver of lien is not provided, current application for payment will be reduced by the value of the stored materials until said time waiver of lien is received or stored materials become incorporated in the Work. Within 30 days of receipt for the final progress payment or any other payments received thereafter except the final payment, Contractor shall pay all subcontractors and suppliers having an interest in the contract their pro rata shares of the payment for all work completed and materials furnished.

SC 15.01.D.1 Change Paragraph 15.01.D.1 to read as follows:

After presentation of the Application for Payment to the Owner with Engineer's recommendation, the amount recommended will (subject to the provisions of paragraph 15.01.C) become due and when due, will be paid by Owner to Contractor within thirty (30) days.

SC-15.03 Substantial Completion

SC 15.03.B Add the following new subparagraph to Paragraph 15.03.B:

1. If some or all of the Work has been determined not to be at a point of Substantial Completion and will require re-inspection or re-testing by Engineer, the cost of such re-inspection or re-testing, including the cost of time, travel and living expenses, shall be paid by Contractor to Owner. If Contractor does not pay, or the parties are unable to agree as to the amount owed, then Owner may impose a reasonable set-off against payments due under Article 15.

DIVISION 1

GENERAL REQUIREMENTS

SECTION 01000

SUMMARY OF WORK

PART 1 - GENERAL

1.01 WORK COVERED BY CONTRACT DOCUMENTS

A. Furnish all labor, equipment and materials necessary to construct/install emergency generators at existing Lift Station No. 9, Well No. 11, and Well No. 15, including automatic transfer switch, conduits, conductors, restoration items, and everything included for a complete and operable system.

B. The CONTRACTOR shall be responsible for all labor, materials, tools, transportation, supplies, equipment and appurtenances necessary to construct/install, start-up, and test the emergency generators and associated electrical and instrumentation equipment.

C. The OWNER reserves the right to add to the work in accordance with the Contract Documents.

1.02 WORK BY OTHERS

A. The CONTRACTOR will diligently perform the scope of work independently of all others who may perform concurrent tasks during execution of the scope of work.

B. The OWNER reserves the right to add to the work in accordance with the Contract Documents.

C. The ENGINEER or OWNER's representative reserves the right to, throughout the construction process, perform on-site inspections of the CONTRACTOR and construction process. Documentation of work shall include, but not be limited to, detailed documentation of daily work performed by the CONTRACTOR, and photographs and/or videos of critical phases of well construction, development, and testing.

D. The CONTRACTOR shall comply and adhere to all security requirements including but not limited to background checks and issuance of security badges. Access to the well site and work areas shall be limited to the areas shown on the project drawings and as discussed in the pre-construction meeting(s).

E. Perimeter privacy (screened) fencing must be secured at all times including but not limited to the installation of temporary construction fencing prior to the removal of existing perimeter and security fencing required for construction. CONTRACTOR must submit a plan outlining the installation and removal of fencing for approval by OWNER prior to mobilization.

END OF SECTION

This page intentionally left blank.

SECTION 01025

MEASUREMENT AND PAYMENT

PART 1 - GENERAL

1.01 GENERAL REQUIREMENTS

A. The Unit prices stated in the Contract shall be considered payment in full for the completion of all work. Payment shall be made under each item only for work as it is not specifically included under other items.

B. The CONTRACTOR shall furnish all labor, equipment and materials necessary to construct all work depicted and required for a complete and operable system for the Village of Palm Springs (OWNER).

1.02 PERFORMANCE

A. Section generally defines unless otherwise indicated, the following:

1. Payment item descriptions.

2. Payment application descriptions.

B. The cost of temporary facilities, bonds, insurance, attending project meetings, administration, record drawings, policing, and other general duties shall be considered incidental to all items.

C. The OWNER may direct the CONTRACTOR to install certain portions of the work in advance of other portions without extra payment to the CONTRACTOR.

D. Measurement methods delineated in the individual Specification sections are intended to complement the criteria of this Section. In the event of conflict, the requirements of the individual Specification section will govern.

E. The CONTRACTOR's attention is called to the fact that the quotations for the various items of Work are intended to establish a total price for completing the Work in its entirety. Should the CONTRACTOR feel that the cost of any item of Work has not been established by the Schedule of Values or Measure and Payment, CONTRACTOR shall include the cost for that Work in the other Bid Items so that CONTRACTOR's proposal for the project does reflect CONTRACTOR's total price for completing the Work in its entirety.

1.03 RELATED SECTIONS

A. Section 00200 - Instructions to Bidders

B. Section 00520 - Agreement

C. Section 00700 - General Conditions

D. Section 00800 – Supplementary Conditions

1.04 LUMP SUM ITEMS

A. The lump sum price shall be full compensation for all labor, materials and equipment to satisfactorily complete the installation of the items as shown on the plans and indicated in the details for lump sum bid items.

1.05 UNIT PRICE ITEMS

A. The ENGINEER or his representative shall determine the number of units of each work item installed.

1.06 SATISFACTORY COMPLETION

A. Satisfactory completion shall include all installation, testing, and startup of improvements along with full restoration of areas affected by construction.

1.07 PAYMENT ITEMS

A. Unit Price Bid

1. Payment shall constitute summation of measured quantities multiplied by the respective unit price for items constructed as specified herein and shown on the engineering drawings; including installation and removal of all temporary facilities, piping; and supply of all incidental materials, equipment and labor necessary to complete the contemplated Work whether specifically identified herein or not.

2. Partial progress payments will be made at monthly intervals and will be based upon the value of the Work completed on the date that a partial payment application is submitted less deductions for retainage as defined elsewhere.

B. Total Lump Sum Bid

1. Full payment shall constitute full reimbursement for the construction of all work as specified herein and shown on the Engineering Drawings; installation and removal of all temporary facilities and supply of all incidental materials, equipment and labor necessary to complete the work whether specifically identified herein or not.

2. Partial progress payments will be made at monthly intervals and be based upon the value of the Work completed on the date that a partial payment application is submitted less deductions for retainage as defined elsewhere.

1.08 PAYMENT APPLICATION DESCRIPTION

A. Preparation of Applications:

1. Present required information in type written form, or equivalent.

2. Execute certification by signature of authorized officer.

3. Use data from approved Schedule of Values. Provide dollar value in each column for each line item for portion of work performed.

4. List each authorized Change Order as an extension on the Application for Payment, listing Change Order number and dollar amount as for an original item of Work.

B. Submittal Procedures

1. Submit three copies of each Application for Payment.

   Payment Period: Submit monthly as directed by the OWNER.

   Submit signed and sealed record drawings covering work for which payment is being requested.

   Submit revised progress schedule accurately reflecting the work completed and the schedule of future work items.

C. Substantiating Data

1. When OWNER requires substantiating information, submit data justifying dollar amounts in question.

PART 2 – PRODUCTS

NOT USED

PART 3 – EXECUTION

3.01 PAYMENT ITEMS

A. PAY ITEM NO. 1 – GENERAL CONDITIONS, BONDS, AND INDEMNIFICATION

Payment of this item shall be on a lump sum basis. This pay item shall include the costs to comply with all elements of the General Conditions of the Contract, including but not limited to: compliance with the requirements of the General

Conditions, Supplementary Conditions, bonds, insurance, record keeping, temporary facilities, safety and permitting, and indemnification. Payment shall be made at the Contract Lump Sum Price as identified in the Agreement upon completion of work identified in the general conditions. Total cost of this item shall not exceed 5% of the total bid cost.

B. PAY ITEM NO. 2 – LIFT STATION NO. 9 IMPROVEMENTS

Payment of this item shall be on a lump sum basis. This pay item shall include the costs for all work required to complete the proposed improvements shown and implied in the Contract Documents including, but not limited to: mobilization/demobilization, demolition of existing facilities, furnishing all labor, materials, and equipment to install the emergency generator, automatic transfer switch, conduits and conductors, concrete pads, startup and testing services, and all appurtenances required for a complete and operable system at Lift Station No. 9. This pay item also includes record drawings and closeout documents as well as all materials, labor and equipment for complete restoration of the area to existing conditions or better.

C. PAY ITEM NO. 3 – WELL NO. 11 IMPROVEMENTS

Payment of this item shall be on a lump sum basis. This pay item shall include the costs for all work required to complete the proposed improvements shown and implied in the Contract Documents including, but not limited to: mobilization/demobilization, demolition of existing facilities, furnishing all labor, materials, and equipment to install the emergency generator, automatic transfer switch, conduits and conductors, concrete pads, startup and testing services, and all appurtenances required for a complete and operable system at Well No. 11. This pay item also includes record drawings and closeout documents as well as all materials, labor and equipment for complete restoration of the area to existing conditions or better.

D. PAY ITEM NO. 4 – WELL NO. 15 IMPROVEMENTS

Payment of this item shall be on a lump sum basis. This pay item shall include the costs for all work required to complete the proposed improvements shown and implied in the Contract Documents including, but not limited to: mobilization/demobilization, demolition of existing facilities, furnishing all labor, materials, and equipment to install the emergency generator, automatic transfer switch, conduits and conductors, concrete pads, startup and testing services, and all appurtenances required for a complete and operable system at Well No. 15. This pay item also includes record drawings and closeout documents as well as all materials, labor and equipment for complete restoration of the area to existing conditions or better.

END OF SECTION

SECTION 01039

COORDINATION AND MEETINGS

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise indicated, for the following:

1. Coordination.
2. Field Engineering.
3. Preconstruction Conference.
4. Progress Meetings.

1.02 COORDINATION

A. Coordinate scheduling, submittals, and work to assure efficient and orderly sequence of installation of interdependent construction elements, with provisions for accommodating items to be installed later.

B. Coordinate completion and clean-up of Work of separate sections in preparation for Substantial Completion.

C. Coordinate any tie-ins to existing piping with the Village of Palm Springs (OWNER). Obtain written authorization prior to shutting down any water mains on services, reclaimed mains, force mains, or performing tie-ins.

D. Procure approval from the OWNER prior to operating any existing valve.

1.03 FIELD ENGINEERING

A. Employ a Land Surveyor registered in the State of Florida and acceptable to the ENGINEER and the Village to perform all field surveys.

B. CONTRACTOR shall locate and protect survey control and reference points.

C. Control datum for survey is Vertical Control NGVD 1929.

D. Provide field engineering services. Utilize land surveyor to establish elevations, lines, and levels, utilizing recognized survey practices.

E. Submit signed and sealed certification prepared by the Land Surveyor that the elevations and locations of the Work are in conformance with the Contract Documents.

1.04 PRECONSTRUCTION CONFERENCE

A. ENGINEER will schedule a conference after Notice of Award.

B. Attendance Required: OWNER, ENGINEER, and CONTRACTOR.

C. Agenda:

1. Designation of personnel representing the parties in Contract, and the ENGINEER.

2. Procedures and processing of field decisions, submittals, substitutions, applications for payments, proposal request, Change Orders and Contract closeout procedures.

3. Scheduling.

1.05 PROGRESS MEETINGS

A. Schedule and administer meetings throughout progress of the Work as required.

B. Make arrangements for meetings, prepare agenda with copies for participants, preside at meetings, record minutes, and distribute copies within two (2) days to ENGINEER, OWNER, participants, and those affected by decisions made at the meeting.

C. Attendance Required: Job superintendent, major Subcontractors and suppliers, OWNER, ENGINEER, as appropriate to agenda topics for each meeting.

D. Agenda:

1. Review minutes of previous meetings.

2. Review of work progress.

3. Field observations, problems, and decisions.

3. Identification of problems, which impede planned progress.

SECTION 01300

SUBMITTALS

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR’s responsibilities, unless otherwise indicated, for the following:

1. Submittal Procedures.
2. Construction Progress Schedules.
3. Contractor’s Daily Field Notes
4. Temporary Fencing and Screening Plan.
5. Dewatering Plans.
6. Testing Plans.
7. Temporary Trenching, Sheeting, and Shoring Plan.
8. Proposed Products List.
9. Shop Drawings.
10. Product Data.
11. Manufacturers' Instructions.
12. Manufacturers' Certificates.
13. Maintenance of Traffic.

1.02 RELATED SECTIONS

A. **Section 01400 - Quality Control:** Manufacturers' field services and reports.

B. **Section 01780 - Contract Closeout:** Contract warranty and manufacturer's certificates, closeout submittals.

1.03 SUBMITTAL PROCEDURES

A. Transmit each submittal with ENGINEER accepted form. All submittals shall be submitted electronically. Responses to submittals will also be performed electronically.

B. Sequentially number the transmittal forms. Resubmittals to have original number with an alphabetic suffix.

C. Identify Project, CONTRACTOR, Subcontractor or supplier; pertinent Drawing sheet and detail number(s), and specification Section number, as appropriate.

D. Apply CONTRACTOR's stamp, signed or initialed certifying that review, verification of Products required, field dimensions, adjacent construction Work, and coordination of information, is in accordance with the requirements of the Work and Contract Documents.

E. Schedule submittals to expedite the Project, and deliver to ENGINEER at their business address. Coordinate submission of related items.

F. Identify variations from Contract Documents and Product or system limitations which may be detrimental to successful performance of the completed Work.

G. Provide space for CONTRACTOR and ENGINEER review stamps on each submittal.

H. Only complete submittals will be reviewed. Partial or incomplete submittals for a product will be returned to the CONTRACTOR without review.

I. Revise and resubmit submittals as required, identify all changes made since previous submittal.

J. Distribute copies of reviewed submittals to concerned parties. Instruct parties to promptly report any inability to comply with provisions.

K. Provide an updated Submittal Log at the end of each week that tracks the date the submittal was transmitted, the date the submittal was returned, and the status of each submittal.

L. All approved submittals to be saved electronically, in PDF format, and provided on a CD along with As-Built Plans and O&M Manuals at the end of the project.

1.04 CONSTRUCTION PROGRESS SCHEDULES

A. Submit initial progress schedule as required in the “General Conditions”.

B. Revise and resubmit as required in the “General Conditions”.

C. Submit revised schedules with each Application for Payment, identifying changes since previous version.

D. Submit a horizontal bar chart with separate line for each major section of Work or operation, identifying first work day of each week.

E. Show complete sequence of construction by activity, identifying Work of separate stages and other logically grouped activities. Indicate the early and late start, early and late finish, float dates, and duration.

F. Indicate estimated percentage of completion for each item of Work at submission of each Application for Payment.

G. At the end of each week, CONTRACTOR shall submit a written two (2) week look ahead describing the construction activities that will take place to allow for coordination with ENGINEER, OWNER, and other parties.

1.05 CONTRACTOR'S DAILY FIELD NOTES

A. Submittal of daily field notes/activities logs is required with each progress payment application covering all days worked during the period covered by the progress payment application.

1.06 TEMPORARY FENCING AND SCREENING PLAN

A. Submit temporary fencing and screening plan to ENGINEER for review.

1.07 DEWATERING PLANS

A. Submit dewatering plans to ENGINEER for review.

B. After ENGINEER's review of dewatering plans, CONTRACTOR shall submit plans to proper governing authority and receive permits for dewatering prior to construction.

C. CONTRACTOR is responsible for paying any dewatering permit fees.

1.08 TESTING PLANS

A. CONTRACTOR shall submit plans to ENGINEER for review.

1.09 TEMPORARY TRENCHING, SHEETING, AND SHORING PLAN

A. CONTRACTOR shall submit plans to proper governing authority for approval.

1.10 PROPOSED PRODUCTS LIST AND INFORMATION

A. Submit complete list of major products proposed for use, with name of manufacturer, trade name, and model number or each product.

B. For products specified only by reference standards, give manufacturer, trade name, model or catalog designation, and reference standards.

1.11 SHOP DRAWINGS

A. After review, distribute in accordance with Article on Procedures above and for Record Documents described in **Section 01780 - Contract Closeout**.

1.12 PRODUCT DATA

A. Submit the number of copies which the CONTRACTOR requires, plus four (4) copies, which will be retained by the ENGINEER.

B. Mark each copy to identify applicable products, models, options, and other data. Supplement manufacturers' standard data to provide information unique to this Project.

C. After review, distribute in accordance with Article on Procedures above and provide copies for Record Documents described in **Section 01780 - Contract Closeout.**

1.13 MANUFACTURER'S INSTRUCTIONS

A. When specified in individual specification Sections, submit manufacturers' printed instructions for delivery, storage, assembly, installation, start-up, adjusting, and finishing, in quantities specified for Product Data.

B. Identify conflicts between manufacturers' instructions and Contract Documents.

1.14 MANUFACTURER'S CERTIFICATES

A. When specified in individual specification Sections, submit manufacturers' certificate to ENGINEER for review, in quantities specified for Product Data.

B. Indicate material or Product conforms to or exceeds specified requirements. Submit supporting reference data, affidavits, and certifications as appropriate.

C. Certificates may be recent or previous test results on material or Product, but must be acceptable to ENGINEER.

1.15 MAINTENANCE OF TRAFFIC

A. Prepare and submit a Work Zone Traffic Control Plan to the appropriate officials in all municipalities and jurisdictions where the work will impact the flow of traffic. Obtain written approval of that plan from all municipalities and jurisdictions, then provide copies of the plan and all approvals to the OWNER and ENGINEER prior to the start of construction. Also, submit plan to maintain/control pedestrian traffic in the work area.

SECTION 01360

PRE-CONSTRUCTION AUDIO-VIDEO DOCUMENTATION

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise rated, for the following:

1. Audio-Video Documentation.
2. Equipment.
3. Submittals.
4. Technique.
5. Quality Assurance.

1.02 QUALITY ASSURANCE

A. Documentation shall be performed by a responsible commercial firm known to be skilled and regularly engaged in the preparation of pre-construction color audio-video documentation. **Any Preconstruction video produced by the CONTRACTOR will be immediately rejected.** All preconstruction videos are to be completed by a firm with extensive amount of previous experience in producing preconstruction documentation.

B. Completed documentation shall reproduce bright, sharp pictures with accurate colors and shall be free from distortion, tearing, rolling, or any other significant picture imperfection. The audio portion of the recording shall reproduce the commentary of the camera operator with proper volume, clarity, and be free of distortion and shall be recorded in fluent English.

C. Construction shall not proceed until the OWNER and ENGINEER have reviewed the documentation and notified the CONTRACTOR of its acceptability.

1.03 MEASUREMENT AND PAYMENT

A. No separate payment item is provided for this work. The cost of performing this work shall be incorporated into the bid items or lump sum amount identified on the bid form.

PART 2 - PRODUCTS

2.01 RECORDING EQUIPMENT

A. Utilize color video camera having:

1. Horizontal Resolution of 350 lines at center.

2. 8:1 Zoom, minimum.

B. Utilize digital format recorder having:

1. Minimum horizontal resolution of 540 lines, 60 fields.

2.02 RECORDING MEDIA

A. Utilize new, Digital Video Disc (DVD) having:

1. DVD shall be DVD-R. DVD-RAM shall not be accepted.

2. 4¾ inches diameter discs.

2. High resolution.

3. 4.7 gigabyte storage per layer with two layers (minimum).

PART 3 - EXECUTION

3.01 COVERAGE

A. Record coverage of all surface features located in the construction's zone of influence (including the proposed storage area(s)) including, but not limited to:

1. Roadways, driveways, sidewalks.

2. Treatment facilities, surrounding structures, sanitary facilities.

3. Drainage structures, abovegrade utilities, drainage swales, canals.

4. Landscaping, trees, shrubbery, fences, irrigation heads, meters.

B. Record the individual features of each item with particular attention being focused upon the existence of any faults, fractures, or defects.

C. Control pan rate, rate of travel, camera height and zoom rate to maintain a steady clear view at all times.

D. Limit recorded coverage to one side of any street at any one time.

E. Create a single, continuous, unedited recording that begins and ends within each portion of a particular construction area. The recording shall proceed in the direction of ascending baseline stationing.

3.02 AUDIO CONTENT

A. Simultaneously record audio content during videotaping.

B. Audio recording shall assist in viewer orientation and in any needed identification, clarification, or description of features being recorded.

C. Audio recording will only consist of camera operator commentary.

3.03 INDEXING

A. Permanently label each tape with a sequential tape number and the project name.

B. Index each DVD with a digital record of the time and date of the recording that is continuously displayed as the DVD is played.

C. Prepare a written log which describes the contents of each DVD including:

1. Structure/location names.

2. Coverage begin/end, station and location.

3. Recording date.

3.04 CONDITIONS

A. Record coverage during dry, clear weather and during daylight hours only.

B. Record coverage when the area to be covered is free of debris or obstructions.

C. Record coverage no more than 15 days prior to the start of construction.

END OF SECTION

This page intentionally left blank.

SECTION 01400

QUALITY CONTROL

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise indicated, for the following:

1. Quality assurance and control of installation.

2. References.

3. Inspection and testing laboratory services.

1.02 QUALITY ASSURANCE/CONTROL OF INSTALLATION

A. Monitor quality control over suppliers, manufacturers, products, services, site conditions, and workmanship, to produce Work of specified quality.

B. Comply fully with manufacturers' instructions, including each step in sequence.

C. Should manufacturers' instructions conflict with Contract Documents, request clarification from ENGINEER before proceeding.

D. Comply with specified standards as a minimum quality for the Work except when more stringent tolerances, codes, or specified requirements indicate higher standards or more precise workmanship.

E. Perform work by persons qualified to produce workmanship of specified quality.

F. Secure products in place with positive anchorage devices designed and sized to withstand stresses, vibration, physical distortion or disfigurement.

G. Provide devices or utilize methods necessary for compliance with the "Trench Safety Act".

1.03 REFERENCES

A. Conform to reference standard as identified in each individual technical specification section.

B. Should specified reference standards conflict with Contract Documents, request clarification from ENGINEER before proceeding.

C. The contractual relationship of the parties to the Contract shall not be altered from the Contract Documents by any reference standard or document.

1.04 INSPECTION AND TESTING LABORATORY SERVICES

A. CONTRACTOR will appoint, employ, and pay for services of an independent firm to perform inspection and testing.

B. The independent firm will perform inspections, tests, and other services specified in individual specification Sections and as required by the ENGINEER.

C. Reports will be submitted by the independent firm to the ENGINEER, in duplicate, indicating observations and results of tests and indicating compliance or non-compliance with Contract Documents.

D. Cooperate with independent firm; furnish samples of materials, design mix, equipment, tools, storage and assistance as requested.

1. Notify ENGINEER and independent firm 24 hours prior to expected time for operations requiring services.

2. Make arrangements with independent firm and pay for additional samples and tests required for CONTRACTOR's use.

E. Retesting required because of non-conformance to specified requirements shall be performed by the same independent firm on instructions by the ENGINEER. The cost for retesting shall be the CONTRACTOR’s responsibility.

F. Testing to be provided by the CONTRACTOR shall include, at a minimum:

1. Testing of the surficial aquifer production well, per **Division 3 - Well Construction and Concrete Work** and **Division 4 - Well Testing** of these Specifications.

2. Density testing.

3. Concrete testing.

4. Testing of the raw water main and wellhead.

G. The CONTRACTOR shall provide a calibrated seismograph at all times during well drilling activities to monitor vibration at the site. The seismograph shall be recently calibrated and with a suitable indicator range. The CONTRACTOR shall be responsible for any damage due to excessive vibration. Off-site vibrations shall be limited to 0.5 inches per second (Peak Particle Velocity, PPV). The CONTRACTOR shall complete a vibration attenuation study (vibration levels versus distance) prior to construction using the proposed construction equipment at the highest impact energy possible.

PART 2 - PRODUCTS

NOT USED

PART 3 - EXECUTION

NOT USED

END OF SECTION

This page intentionally left blank.

SECTION 01500

CONSTRUCTION FACILITIES AND TEMPORARY CONTROLS

PART 1- GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise indicated, for the following:

1. Temporary Utilities: Electricity, water, and sanitary facilities.

2. Temporary Controls: Barriers, enclosures and fencing and screening, protection of the Work.

3. Construction Facilities: Parking, progress cleaning, and project signage.

1.02 RELATED SECTIONS

A. **Section 01780 – Closeout Submittals**: Final cleaning.

1.03 TEMPORARY ELECTRICITY

A. CONTRACTOR will provide temporary 110 VAC power, if existing at well or lift station locations, and CONTRACTOR may use at no cost.

B. CONTRACTOR will provide portable power supply as required.

C. CONTRACTOR will provide power outlets for construction operations, with branch wiring and distribution boxes located as needed. Provide flexible power cords as required.

1.04 TEMPORARY WATER SERVICE

A. CONTRACTOR shall be responsible for supplying any potable or non-potable water needed for this project.

1.05 TEMPORARY SANITARY FACILITIES

A. CONTRACTOR shall provide and maintain required facilities.

1.06 BARRIERS AND TRAFFIC CONTROL

A. Provide barriers to prevent unauthorized entry to construction areas and to protect

existing facilities and adjacent properties from damage due to construction operations and demolition.

B. Provide protection for natural vegetation designated to remain. Replace protected vegetation, if damaged.

C. Protect all landscaping and decorative vegetation. Restore damaged landscaping and vegetation to its original condition.

D. Protect non-owned vehicular traffic, stored materials, site and structures from damage.

E. Provide signs, signals, cones, barricades and trained flagmen to direct traffic in and around the construction site in accordance with Florida Department of Transportation Work Zone Traffic Control Standards.

1. Prepare a WORK ZONE TRAFFIC CONTROL PLAN and submit that plan to the appropriate officials in all municipalities and jurisdictions where the Work will impact the flow of traffic.

2. Obtain written approval of that plan from all municipalities and jurisdictions, and then provide copies of the plan and all approvals to the OWNER and ENGINEER prior to the start of construction. All approvals must be obtained prior to construction.

3. Keep specified areas open and accessible at all times. Roads must be kept open at all times. Flow bypass ramps or buried hoses are required to maintain traffic access.

1.07 PROTECTION OF INSTALLED WORK

A. Protect installed Work and provide special protection where specified in individual specification Sections.

B. Provide temporary and removable protection for existing and installed Products. Control activity in immediate work area to minimize damage.

C. Provide protective coverings as needed.

D. Protect finished floors, stairs, roadways, and other surfaces from traffic, dirt, wear, damage, or movement of heavy objects, by protecting with durable sheet materials.

1.08 SECURITY/TEMPORARY FENCING AND SCREENING

A. Provide security and facilities to protect Work from unauthorized entry,

vandalism, or theft.

B. Provide temporary fencing and screening to protect Work from unauthorized entry, vandalism, or theft.

1.09 ACCESS ROADS

A. Construct and maintain temporary roads accessing public thoroughfares to serve construction area. Access routes shall be restored to preexisting conditions or better upon conclusion of the project.

B. Extend and relocate as Work progress requires. Provide detours necessary for unimpeded traffic flow. Coordinate interruptions in normal public vehicular traffic flow with those governmental agencies having authority over each roadway.

1.10 PARKING

A. Provide temporary parking areas to accommodate construction personnel.

B. Temporary parking areas must not interfere with normal traffic flow or designated parking for others.

C. Temporary parking areas must be approved by the ENGINEER and OWNER.

1.11 PROGRESS CLEANING

A. Maintain all construction areas free of waste materials, debris, and rubbish. Maintain all sites in a clean and orderly condition.

B. Broom and vacuum clean areas prior to start of surface finishing, and continue cleaning to eliminate dust.

C. Remove waste materials, debris, and rubbish from site daily and dispose of at approved location.

D. Always keep roadways, sidewalks and bicycle paths clear of construction debris and trash.

E. Provide positive methods and apply dust control materials to minimize raising dust form construction operations, and provide positive means to prevent air-borne dust from dispersing into the atmosphere. CONTRACTOR shall immediately mitigate dust upon complaint.

1.12 REMOVAL OF UTILITIES, FACILITIES, AND CONTROLS

A. Remove temporary above grade or buried utilities, equipment, facilities, materials, prior to Final Application for Payment inspection.

B. Remove underground installations to a minimum depth of three (3) feet.

C. Clean and repair damage caused by installation or use of temporary work.

D. Restore existing facilities used during construction to original condition. Restore permanent facilities used during construction to specified condition.

PART 2 - PRODUCTS

NOT USED

PART 3 - EXECUTION

NOT USED

END OF SECTION

SECTION 01600

MATERIAL AND EQUIPMENT

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise indicated, for the following:

1. Products.
2. Transportation and handling.
3. Storage and protection.
4. Product options.
5. Substitutions.

1.02 RELATED SECTIONS

A. Instructions to Bidders: Product options and substitution procedures.

B. **Section 01400 - Quality Control**: Product quality monitoring.

1.03 PRODUCTS

A. Products: Means new material, machinery, components, equipment, fixtures, and systems forming the Work. Does not include machinery and equipment used for preparation, fabrication, conveying and erection of the Work. Products may also include existing materials or components required for reuse.

B. Do not use materials and equipment removed from existing premises, except as specifically permitted by the Contract Documents.

1.04 TRANSPORTATION AND HANDLING

A. Transport and handle Products in accordance with manufacturer's instructions.

B. Promptly inspect shipments to assure that Products comply with requirements, quantities are correct, and Products are undamaged.

C. Provide equipment and personnel to handle Products by methods which prevent soiling, disfigurement, or damage.

1.05 STORAGE AND PROTECTION

A. Store and protect Products in accordance with manufacturer's instructions, with seals and labels intact and legible. Store sensitive Products in weather-tight, climate controlled enclosures.

B. For exterior storage of fabricated Products, place on secure supports, above ground.

C. Provide off-site storage and protection when site does not permit on-site storage or protection. On-site storage of products must be approved by the OWNER and ENGINEER prior to delivery.

D. Cover Products subject to deterioration with impervious sheet covering. Provide ventilation to avoid condensation.

E. Store loose granular materials on solid flat surfaces in a well-drained area. Prevent mixing with foreign matter.

F. Arrange storage of Products to permit access for inspection. Periodically inspect to assure Products are undamaged and are maintained under specified conditions.

1.06 PRODUCT OPTIONS

A. Products Specified by Reference Standards or by Description Only: Any Product meeting those standards or description.

B. Products Specified by Naming One or More Manufacturers: Products of manufacturers named and meeting specifications, no options or substitutions allowed.

C. Products Specified by Naming One or More Manufacturers with a Provision for Substitutions: Submit a request for substitution for any manufacturer not named.

1.07 SUBSTITUTIONS

A. Instructions to Bidders specify time restrictions for submitting requests for Substitutions during the bidding period to requirements specified in this Section.

B. Substitutions may be considered when a Product becomes unavailable through no fault of the CONTRACTOR.

C. Document each request with complete data substantiating compliance of proposed Substitution with Contract Documents.

D. A request constitutes a representation that the Bidder:

1. Has investigated proposed Product and determined that it meets or exceeds the quality level of the specified Product.

2. Will provide the same warranty for the Substitution as for the specified Product.

3. Will coordinate installation and make changes to other Work that may be required for the Work to be complete with no additional cost to OWNER.

4. Waives claims for additional costs or time extension that may subsequently become apparent.

5. Will reimburse OWNER for review or redesign services associated with re-approval by the ENGINEER or governing authorities.

E. Substitutions will not be considered when they are indicated or implied on shop drawing or product data submittals without separate written request, or when acceptance will require revision to the Contract Documents.

F. Substitution Submittal Procedure:

1. Submit three (3) copies of request for Substitution for consideration. Limit each request to one proposed Substitution.

2. Submit shop drawings, Product data, and certified test results attesting to the proposed Product equivalence.

G. The ENGINEER will notify CONTRACTOR, in writing, of decision to accept or reject request.

PART 2 - PRODUCTS

SECTION 01720

RECORD DOCUMENTS

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise indicated, for the following:

1. On-site maintenance of Record Documents.
2. Required record information.

1.02 MAINTENANCE

A. Maintain on site, one (1) set of the following Record Documents; record actual revisions to the Work:

1. Drawings.
2. Specifications.
3. Addenda.
4. Change Orders and other modifications to the Contract.
5. Shop Drawings, product data, and samples.
6. Building Permits.
7. Other Permits as necessary.

B. Store Record Documents separate from documents used for construction.

C. Record information concurrent with construction progress.

D. In the interest of timely detection of non-conforming Work, all Record Drawing information for the partially completed work must be furnished to the ENGINEER prior to submitting for periodic progress payments on the partially completed Work.

E. Under no circumstances will pavement restoration Work be allowed to start until the ENGINEER has reviewed the Record Drawing information for Work constructed within the area that pavement will be restored.

F. All Record Drawing information must be obtained by a Professional Land Surveyor, who is licensed in the State of Florida. Information must be signed and sealed.

G. Record Documents must be available to ENGINEER for examination at any time during the progress of the Work.

H. Submit completed Record Documents upon completion of the Work, at each partial pay request, and prior to application for final payment.

I. The Surveyor to be utilized shall have successfully completed three (3) Record Drawing projects within the last two (2) years within the Village of Palm Springs Service area (i.e. has completed three sets of Record Drawings that have been reviewed by Village Staff and is familiar with the requirements of the Village of Palm Springs.)

1.03 REQUIRED RECORD DRAWING INFORMATION

A. General

1. All drawings included as part of the Contract Documents shall be submitted as part of the record drawing submittal.

2. Label drawings “Record Drawings” with date.

3. Complete title block with current file name.

4. Location sketch.

5. Design information shall be crossed out and the record drawing information shall be included in bold.

6. Two (2) signed and sealed sets of Record Drawings.

7. One (1) signed and sealed set of Record Drawings on Mylar.

8. Two (2) digital copies of Record Drawings in AutoCAD 2000 format or later and one (1) copy, in PDF format, on CD.

9. Additional copies as required for permitting closeout as requested by the ENGINEER.

10. Design information which is no longer applicable to the installed components and/or configuration shall be crossed-out.

11. Design elevations shall be crossed out and the installed elevations shall be recorded where applicable.

B. Concrete Pad

1. Include Northing/Easting and latitude/longitude of the corners of the concrete slab, and slab elevation.

C. Electrical

1. Include location of electrical and instrument panels, rocks, pull boxes, transformers, equipment panels, grounding rods and test wells, and conduit. Conduit information shall include depth of cover and separation between other utilities where they cross each other.

PART 2 - PRODUCTS

NOT USED

PART 3 - EXECUTION

3.01 SURVEYOR RESPONSIBILITIES

A. Signed and sealed prints are to be submitted for each pay requisition and appropriate stages of construction as designated by the ENGINEER.

B. Mark information on the Drawing in a manner that indicates which elevations and dimensions have been checked. This is to be done by crossing through the design elevation or dimension and placing the Record information next to it. If an elevation or dimension has not changed, the same procedure should be followed to confirm that it has been checked. Add new information in a manner to indicate that it is Record information and not design information.

C. Each Record Drawing sheet must include the surveyor's name, company, address, and registration number.

D. Prior to the conclusion of the Project, CONTRACTOR shall submit the required number of signed and sealed copies of the Record Drawings to the ENGINEER for the purpose of closing all of the outstanding permits.

E. At the conclusion of the Project, submit two final sets of signed and sealed prints and a signed and sealed set of Mylar’s to the ENGINEER for permanent record keeping, along with two (2) digital copies of the Record Drawings on CD in AutoCAD 2000 format or later and one (1) copy, in PDF format, on CD. In addition, the CONTRACTOR shall provide the required number of copies to the ENGINEER to assist in the closing out of all necessary permits.

END OF SECTION

SECTION 01730

OPERATION & MAINTENANCE MANUALS

PART 1 - GENERAL

1.01 SECTION INCLUDES

A. Detailed information for the preparation, submission, and ENGINEER's review of Operation and Maintenance (O&M) Data, as required by individual specification Sections. The O&M information shall be prepared specifically for this project, and shall include all sections and organization as specified herein.

1.02 DEFINITIONS

A. Preliminary Data: Initial and subsequent submissions for ENGINEER's review.

B. Final Data: ENGINEER-accepted data, submitted as specified herein.

C. Maintenance Operation: As used on Maintenance Summary Form is defined to mean any routine operation required to ensure satisfactory performance and longevity of equipment. Examples of typical maintenance operations are lubrication, belt tensioning, adjustment of pump packing glands, and routine adjustments.

1.03 SEQUENCING AND SCHEDULING

A. Equipment and System Data.

1. Preliminary Data:

a. Do not submit until Shop Drawing for equipment or system has been reviewed and approved by ENGINEER and OWNER.

b. Submit prior to shipment date.

2. Materials and Finished Data

a. Preliminary Data: Submit at least 15 days prior to request for start-up.

b. Final Data: Submit within 10 days after final inspection.

1.04 DATA FORMAT

A. Prepare preliminary data in the form of an instructional manual. Prepare final data in data compilation format in electronic media.

B. Instructional Manual Format:

1. Binder: Commercial quality, permanent, three-ring or three-post binders with durable plastic cover.

2. Size: 8½ inches by 11 inches, minimum.

3. Cover: Identify manual with typed or printed title "OPERATION AND MAINTENANCE MANUAL" and list:

   a. Project title.

   b. Month and year.

   c. Designate Applicable system, equipment, material, or finish.

   d. Identity of separate structure as applicable.

   e. Identity of general subject matter covered in the manual.

   f. Spine shall have the project title, month and year, and "OPERATION AND MAINTENANCE MANUAL" printed on it.

4. Title Page

   a. CONTRACTOR name, address, and telephone number.

   b. Subcontractor, supplier, installer, or maintenance contractor's name address, and telephone number, as appropriate.
      i. Identify area of responsibility of each.
      ii. Provide name and telephone number of local source of supply for parts and replacement.

5. Table of Contents:

   a. Neatly typewritten and arranged in systematic order with consecutive page numbers.

   b. Identify each product by product name and other identifying numbers or symbols set forth in the Contract Documents.

6. Paper: 20-pound minimum, white for typed pages.

7. Text: manufacturer's printed data, or neatly typewritten.

8. Three-hole punch data for binding and composition; arrange printing do that punched holes do not obliterate data.

9. Material shall be suitable for reproduction, with quality equal to original. Photocopying of materials will be acceptable, except for material containing photographs.

C. Data Compilation Format:

1. Compile all ENGINEER-accepted preliminary O&M data into a hard-copy, hard-bound set.

2. Each set shall consist of the following:

a. Binder: Commercial quality, permanent, three-ring or three-post binders with durable plastic cover.

b. Cover: Identify each volume with typed or printed title "OPERATION AND MAINTENANCE MANUAL, VOLUME NO. ____ OF _____", and list:
   i. Project title
   ii. CONTRACTOR's name, address, and telephone number.
   iii. If entire volume covers equipment or system provided by one (1) supplier include the following:
      a) Identity of general subject matter covered in the Manual.
      b) Identity of equipment number and specification Section.

c. Provide each volume with title page and typed table of contents with consecutive page numbers. Place content of entire set, identified by volume number in each binder.

d. Table of contents neatly typewritten, arranged in systematic order:
   i. Include list of each product, indexed to content of each volume.
   ii. Designate system or equipment for which it is intended.
   iii. Identify each product by product name and other identifying numbers or symbols set forth in the Contract Documents.

e. Section Dividers:
   i. Heavy, 80-pound cover weight, tabbed with numbered plastic index tabs.
   ii. Fly-leaf:
      a) For each separate product, or each piece of operating equipment, with typed description of product and major component parts of equipment.
      b) List with each product:
         i. Name address, and telephone of subcontractor, suppliers, installer and maintenance contractor as applicable.
         ii. Identity area of responsibility of each.
         iii. Provide local source of supply for parts and replacement.
   iii. Identity of separate structure as applicable.

f. Assemble and bind material, as much as possible, in the same order as specified in the Contract Documents.

D. Electronic Media Format:

1. Portable Document Format (PDF):

a. After all preliminary data has been found to be acceptable to the ENGINEER, submit O&M data in PDF format on CD.

b. Files to be exact duplicates of ENGINEER-accepted preliminary data. Arrange by specification number and name.

c. Files to be fully functional and viewable in the latest version of Adobe Acrobat.

d. The table of contents shall include hot links to the individual sections.

1.05 SUBMITTALS

A. Informational

1. Data outline: submit two (2) copies of a detailed outline if the proposed organization and content of the Final Manuals prior to preparation of the preliminary manuals.

2. Preliminary Data:

a. Submit two (2) copies for ENGINEER's review.

b. If data meets conditions of the Contract:
   i. One (1) copy will be returned to the CONTRACTOR.
   ii. One (1) copy will be forwarded to the project representative.

c. If data does not meet conditions of the Contract:
   i. All copies will be returned to the CONTRACTOR with the ENGINEER's comments for revision.
   ii. ENGINEER's comments will be retained in ENGINEER's file.
   iii. Resubmit two (2) copies revised in accordance with the ENGINEER's comments.

3. Final Data: Submit two (2) copies in format specified herein.

1.06 DATA FOR EQUIPMENT AND SYSTEMS

A. Content for each unit (or common Units) and system:

1. Product Data:

   a. Include only those sheets that are pertinent to specific product.

   b. Clearly annotate each sheet to:
      i. Identify specific product or part installed.
      ii. Identify data applicable to installation.
      iii. Delete references to inapplicable information.

   c. Function, normal operating characteristics, and limiting conditions.

   d. Performance curves, engineering data, nameplate data, and tests.

   e. Complete nomenclature and commercial number of replaceable parts.

   f. Original manufacturer's part list, illustrations, detailed assembly drawings showing each part with part numbers and sequentially numbered part list, and diagrams required for maintenance.

   g. Spare parts ordering instructions.

   h. Where applicable, identify installed spares and other provisions for future work (e.g. reserved panel space, unused components, wiring, and terminals).

2. As-installed, color coded piping diagrams.

3. Charts of valve tag numbers, with the location and function of each valve.

4. Drawings: Supplement product data with Drawings as necessary to clearly illustrate:

    a. Format:
        i. Provide reinforced, punched, binder tab: bind in with text.
        ii. Reduced to 8½ inches by 11 inches, or 11 inches by 17 inches folded to 8½ inches by 11 inches.
        iii. Where reduction is impractical, fold and place in 8½ inch by 11 inch envelopes bound in text.
        iv. Identify specification section and product on drawings and envelopes.

    b. Relations of component parts of equipment and systems.

    c. Control and flow diagrams.

    d. Coordinate drawings with Project record documents to assure correct illustration of completed installation.

5. Instructions and procedures: Within text, as required to supplement product data.

    a. Format:
        i. Organize in consistent format under separate heading for each different procedure.
        ii. Provide logical sequence of instructions for each procedure.
        iii. Provide information sheet for OWNER's personnel, including:
            a) Proper procedures in the event of failure.
            b) Instances that might affect validity of guarantee or bond.

    b. Installation instructions: Including alignment, adjusting, calibrating, and checking.

    c. Operating procedures:
        i. Startup, break-in, routine, and normal operating instructions.
        ii. Test procedures and results of factory tests where required.
        iii. Regulation, control, stopping, and emergency instructions.
        iv. Description of operating sequence by control manufacturer.
        v. Shutdown instructions for both short and extended duration.
        vi. Summer and winter operating instructions, as applicable.
        vii. Safety precautions.
        viii. Special operating instructions.

d. Maintenance and Overhaul procedures:
   i. Routine maintenance.
   ii. Guide to troubleshooting.
   iii. Disassembly, removal, repair, reinstallation, and reassembly.

6. Start-up information and test reports.

7. Guarantee, bond, and service agreement: in accordance with **Section 01780 - Closeout Submittals.**

B. Content for each electronic item or system:

1. Description of unit and component parts:

   a. Function, normal operating characteristics, and limiting conditions.

   b. Performance curves, engineering data, nameplate data, and tests.

   c. Complete nomenclature and commercial number of replaceable parts.

   d. Interconnection wiring diagrams, including control and lighting systems.

2. Circuit directories of panelboard:

   a. Electrical service.

   b. Controls.

   c. Communication.

3. List of electrical relay settings and control and alarm contact settings. Include a copy of all configuration settings and files on a USB thumb-drive.

4. Electrical interconnection wiring diagram, including control and lighting systems.

5. As-installed control diagrams by control manufacturer.

6. Grounding measurements

7. Operating procedures:

   a. Routine and normal operating instructions.

b. Sequences required.

c. Safety precautions.

d. Special operating instructions.

8. Maintenance procedures:

a. Routine maintenance.

b. Guide to troubleshooting.

c. Adjustment and checking.

d. List of relay settings, control, and alarm contact settings.

9. Manufacturer's printed operating and maintenance instructions.

10. List of original manufacturer's spare parts, manufacturer's current prices, and recommended quantities to be maintained in storage.

11. Start-up information and test reports.

C. Maintenance summary

1. Compile individual maintenance summary for each applicable equipment item, respective unit or system, and for components of subunits.

2. Format:

a. Use maintenance summary form bound with this Section.

b. Each maintenance summary may take as many pages as needed.

c. Use only 8½ x 11 paper.

d. Complete using typewriter or electronic printing.

3. Include detailed lubrication instructions and diagrams showing points to be greased or oiled; recommended type, grade, and temperature range of lubricants and frequency of lubrication.

4. Recommended spare parts:

a. Data to be consistent with manufacturer's bill of materials/parts list furnished in the O&M Manuals.

b. “Unit” is the unit of measure for ordering the part.

c. “Quantity” is the number of units recommended.

d. “Unit Cost” is the current purchase price.

1.07 DATA FOR MATERIALS AND FINISHES

A. Content for architectural products, applied materials and finishes:

1. Manufacturer’s data, giving full information on products:

a. Catalog number, size, and composition.

b. Color and texture designations.

c. Information required for reordering special manufactured products

2. Instructions for care and maintenance

a. Manufacturer’s recommendation for types of cleaning agents and methods.

b. Cautions against cleaning agents and methods that are detrimental to product.

c. Recommended schedule for cleaning and maintenance.

B. Content for moisture protection and weather exposed products.

1. Manufacturer’s data, giving full information on products:

a. Applicable standards.

b. Chemical composition.

c. Details of installation.

2. Instructions for inspection, maintenance and repair.

1.08 ADDITIONAL ITEMS FOR THE O&M MANUAL

A. Record drawings provided by the CONTRACTOR.

B. CD containing the approved submittals for the project.

1.09 SUPPLEMENTS

A. The supplement listed below, following "END OF SECTION," are part of this specification.

1. Form: Maintenance Summary Form.

MAINTENANCE SUMMARY FORM

PROJECT: _____ CONTRACT NO.:_____

1. EQUIPMENT ITEM_____

2. MANUFACTURER _____

3. EQUIPMENT/TAG NUMBER_____

4. WEIGHT OF INDIVIDUAL COMPONENTS (OVER 100 POUNDS)_____

5. NAMEPLATE DATA (hp, voltage, speed, etc.)_____

6. MANUFACTURER'S LOCAL REPRESENTATIVE_____

   a. Name_____ Telephone No._____

   b. Address_____

7. MAINTENANCE REQUIREMENTS

Maintenance Operation Comments	Frequency	Lubricant (If Applicable)
List briefly each maintenance operation required and refer to specific information in manufacturer's standard maintenance manual, if applicable. (Reference to manufacturer's catalog or sales literature is not acceptable.	List required frequency of each maintenance operation.	Refer by symbol to lubricant required.

8. LUBRICANT LIST

Reference Symbol	Shell	Exxon Mobil	Chevron Texaco	BP Amoco	Or Equal
List Symbols used in No. 7 above	List equivalent lubricants as distributed by each manufacture for the specific use recommended.				

9. RECOMMENDED SPARE PARTS FOR OWNER'S INVENTORY

Part No.	Description	Unit	Quantity	Unit Cost
Note: Identify parts provided by this Contract with two asterisks.				

SECTION 01750

GENERAL REQUIREMENTS

PART 1 - GENERAL

1.01 PERFORMANCE

A. Section generally defines CONTRACTOR's responsibilities, unless otherwise indicated, for the following:

1. Preservation of Property.
2. Siltation and Bank Erosion.
3. Utility Construction and Adjustment.
4. CONTRACTOR’s Responsibility.
5. Use of Chemicals.
6. Progress of Work.
7. OSHA.
8. Utilities and Structures Shown on the Plans.
9. Drainage.
10. Restoration of Surface Improvements.
11. Hours of Operation.
12. Cutting and Patching

1.02 PRESERVATION OF PROPERTY

A. Preserve from damage all property along the line of the work, or which is in the vicinity of or is in any way affected by the work, the removal or destruction of which is not called for by the plans.

B. Wherever such property is damaged due to the activities of the CONTRACTOR, it shall be immediately restored to its original condition by the CONTRACTOR at no cost to the OWNER. CONTRACTOR is made aware that the project area is a residential area. All areas disturbed by construction activities shall be immediately restored to existing conditions or better.

C. In case of failure on the part of the CONTRACTOR to restore such property, or make good such damage or injury, the OWNER may, after 48 hours notice to the

CONTRACTOR, proceed to repair, rebuild or otherwise restore such property as may be deemed necessary and the cost thereof will be deducted from any monies due or which may become due the CONTRACTOR under this contract.

1.03 SILTATION AND BANK EROSION

A. Take adequate precautions to minimize siltation and bank erosion in the vicinity of canals or ditches, in discharging well point systems or during other construction activities.

B. If well pointing, the CONTRACTOR shall notify the South Florida Water Management District and/or the Northern Palm Beach County Water Control District as applicable and procure and necessary permits.

1.04 UTILITY CONSTRUCTION AND ADJUSTMENT

A. Bid items for liner systems, pump stations, drainage structures, and appurtenances are for new work only.

B. Prices bid for these items shall include all work incidental thereto, such as pavement repair, existing pond lining repair, sodding, landscape and irrigation repair, and all other required restoration work unless otherwise called for.

C. Where it is necessary to relocate, lower or otherwise adjust existing mains and appurtenances as may be required to accomplish the new pipeline construction, the cost of work shall be included in the unit prices or lump sum bid for such new pipeline.

1.05 CONTRACTOR'S RESPONSIBILITY

A. The CONTRACTOR shall be held strictly responsible for all parts of the work.

B. If failures in the Work develop within one year from the date of final acceptance, the CONTRACTOR shall be required to replace all faulty material at his full expense. A one (1) year warranty walkthrough shall be attended by the CONTRACTOR with the ENGINEER and the OWNER.

C. The CONTRACTOR is advised to purchase material under a guarantee from the manufacturer, guaranteeing proper service under conditions that are established by the drawings, specifications and local conditions.

D. The CONTRACTOR shall also be responsible for the following:

1. Charges by others for assistance to the CONTRACTOR for such work as supporting, replacing, moving or providing protection for their facilities as necessitated by the CONTRACTOR's operation.

2. All costs of restoration of the work site to condition equal or better than prior to construction, including landscaping and irrigation systems.

3. All costs of restoration of pavements and structures damaged by the CONTRACTOR's operation. Likewise the CONTRACTOR shall pay all costs of restoring all work areas and all areas where construction materials are stored, whether new materials to be installed or materials removed from the work area incidental to the work solely to the satisfaction of the OWNER.

4. All public liability, property damage and contractual liability insurance required by others to permit the CONTRACTOR's operation.

1.06 USE OF CHEMICALS

A. Any chemical used by the CONTRACTOR during the course of construction shall meet the regulatory requirements of either the Environmental Protection Agency or the United States Department of Agriculture, and shall be approved by the ENGINEER prior to use.

B. All work shall comply with the Palm Beach County Wellfield ordinance. All chemicals and fuel shall be properly contained and any spills shall be immediately reported and cleaned at no additional cost to the OWNER.

1.07 PROGRESS OF WORK

A. If at any time, the materials and appliances to be used appear to the ENGINEER as insufficient or improper for securing the quality of work or rate of progress required for the project, he may order the CONTRACTOR to increase his efficiency or improve the character of work.

B. The failure of the ENGINEER to demand any increase of such efficiency or improvement shall not release the CONTRACTOR from his obligation to secure the quality of work or the rate of progress necessary to complete the work within the limits imposed by the Contract.

1.08 OSHA

A. Bidders must comply with the Department of Labor, Safety and Health Regulations for construction promulgated under the Occupational Safety and Health Act of 1970 (PL 91-956) and under Section 107 of the Contract Work Hours and Safety Standards Act (PL 91-54).

1.09 UTILITIES AND STRUCTURES SHOWN ON THE PLANS

A. Existing utilities and facilities are shown on the contract drawings only for the convenience of all parties concerned and were established without guarantee as to their accuracy or completeness of location.

B. Because of conflicting and sometimes erroneous information, certain facilities may not be located precisely as shown, or may be omitted entirely.

C. Prior to performing any work, the CONTRACTOR shall determine, by site inspection or otherwise, all pertinent data concerning the existing utilities, structures, and facilities, including the request of each utility agency to advise him of the location of their facilities in the work vicinity.

D. The CONTRACTOR shall be completely responsible for the relocation, as required, of existing utilities and structures with such work accomplished at no additional cost to the OWNER.

E. The OWNER and ENGINEER will assume no liability for damages sustained or costs incurred because of the CONTRACTOR's operations in the vicinity of the existing utilities or structures.

F. The CONTRACTOR shall schedule his work in such a manner that he is not delayed by the utility companies relocating or supporting their utilities. No compensation shall be made for such loss of time.

G. The position of certain structures and utilities directly affects the proposed construction. Therefore, in order to insure that the proposed work can actually be positioned as planned, the CONTRACTOR shall make any excavation necessary for location of structures and utilities prior to construction of that particular portion of the job.

H. All overhead, surface or underground structures encountered in trenching, whether shown on the Plans or not shown on the Plans, are to be carefully protected from injury or displacement, and all damage to such structures is to be completely repaired within a reasonable time; otherwise, the ENGINEER may give 24 hours notice to the CONTRACTOR, then repair the damage at the CONTRACTOR's expense.

I. All such repairs made by the CONTRACTOR are to be made to the satisfaction of the ENGINEER; all damaged pipes must be replaced or prevented from leaking. Also, all such repairs are to be inspected by the ENGINEER prior to backfilling. The CONTRACTOR must carefully protect from disturbance or injury, all monuments, stakes and bench marks, and shall not excavate nearer than five (5) feet to any of them until they have been removed, witnessed or otherwise disposed of by the ENGINEER.

1.10 DRAINAGE

A. Grading shall be controlled in the vicinity of excavations so that the surface of the ground will be properly sloped to prevent water from running into trenches or other excavated areas.

B. Any water that accumulates in the excavations shall be removed promptly by well point or by other means satisfactory to the ENGINEER in such a manner as to not create a nuisance to adjacent property or public thoroughfare.

C. Trenches shall be kept dry while pipe is being laid. Bridging of dewatering pipe shall be provided where necessary.

D. Pumps and engines for well point systems shall be operated with mufflers, at a minimum noise level suitable to a residential area.

E. The CONTRACTOR will not be allowed to discharge water into any storm drainage system without the written approval of the OWNER of that system.

F. Approval will be subject to the conditions that the storm sewer be returned to its original conditions.

G. The CONTRACTOR is responsible for carrying the water to the nearest ditch or body of water and for obtaining the necessary permission to use same.

H. The CONTRACTOR shall be financially responsible for any nuisance or damage created due to carrying off water from his drainage system.

1.11 RESTORATION OF SURFACE IMPROVEMENTS

A. Roadways, including shoulders, alleys and driveways of shell, limerock, asphalt, concrete, stabilized soil or gravel, grade plots, sod, shrubbery, ornamental trees, signs, mailboxes, fences, irrigation systems, or other surface improvements on public or private property which have been damaged or removed in excavating or other construction operations, shall be restored to conditions equal to or better than conditions existing prior to beginning work.

B. Restoration shall consist of sodding.

C. CONTRACTOR is urged to investigate existing irrigation systems in order to minimize repair work necessary. No extra costs will be paid as a result of damage to existing irrigation systems.

D. The cost of doing this work shall be included in the cost of the various applicable items or the lump sum bid amount unless a separate payment item has been established for specific restoration Work.

E. Pre-Construction Audio Video DVDs - as specified will be used as an aid in determining conditions prior to construction.

1.12 HOURS OF OPERATION

A. The CONTRACTOR is hereby informed and understands that certain noise between the hours of 6:00 PM and 8:00 AM is restricted. Therefore, the work is restricted during these hours, unless emergency conditions exist that are endangering life or property, as may be determined by the ENGINEER.

B. If the CONTRACTOR is authorized to operate equipment 24 hours per day, the engines shall be provided with residential type silencers approved by the ENGINEER.

C. The CONTRACTOR shall not perform any work activities outside of the normal Village of Palm Springs work hours without prior written authorization from the Village.

1.13 CUTTING AND PATCHING

A. Employ skilled and experienced installer to perform cutting and patching.

B. Submit written request in advance of cutting or altering elements which affects:

1. Structural integrity of element.

2. Integrity of weather-exposed or moisture-resistant elements.

3. Efficiency, maintenance, or safety of element.

4. Visual qualities of sight-exposed elements.

5. Work of OWNER or separate CONTRACTOR.

C. Execute cutting, fitting, and patching including excavation and fill, to complete Work, and to:

1. Fit the several parts of the Work together, to integrate with other Work.

2. Uncover Work for installation of subsequent Work or to correct ill-timed Work.

3. Remove and replace defective and non-conforming Work.

4. Remove samples of installed Work for testing.

5. Provide openings in elements of Work for penetrations by mechanical and electrical Work.

D. Execute Work by methods, which will avoid damage to other Work, and provide proper surfaces to receive patching and finishing.

E. Cut rigid materials using masonry saw or core drill, as required.

F. Restore Work with new Products in accordance with requirements of Contract Documents.
