Neighborhood Impact

NEIGHBORHOOD IMPACT

The implementation of the CRA Plan Update will foster many positive impacts to the quality of life within the CRA in terms of increased amenities, improved community facilities, improved environmental, physical and social quality, and an expanded tax base. While specific impacts cannot be determined without site-specific proposals to evaluate impacts, these activities including the construction of new residential, commercial and mixed-use development cannot be accomplished without affecting transportation, environmental quality, community services, employment and housing. The intent is to ensure that those impacts have an overall beneficial effect to the residents, property owners and business owners within the area as well as the larger unincorporated and incorporated areas of Palm Springs. This section presents the range of impacts that can be expected in each category.

Transportation

The CRA Plan proposes projects and programs to enhance the pedestrian environment and expand bicycling facilities. In addition, the mixed-use Future Land Use Map (FLUM) categories within the CRA are expected to provide some relief to traffic congestion within the community by fostering the development of traditional neighborhood characteristics. Closer proximity of commercial and employment opportunities and civic and institutional uses to residential uses encourages pedestrian, rather than automobile, trips.

Environmental Quality

Specific impacts cannot be determined without site-specific proposals; therefore, this section describes the general nature of impacts that can be expected in each category.

Water Quality

Any repairs, upgrades and replacements to potable water, sanitary sewer and stormwater facilities that may occur throughout the CRA are to be programmed concurrently with other redevelopment efforts. Through replacement of deteriorating sewer and water lines, along with more efficient stormwater management facilities and treatment of runoff prior to discharge into the Village's waterways, the water quality within the CRA is expected to improve incrementally each year. The site plan review process includes analysis of infrastructure and requires each development to address individual site issues.

Neighborhood Impact (2)

Protection of Vegetation

This plan proposes landscaping for public rights-of-way, public parks, and open spaces. The Village's site plan review process emphasizes maximum preservation of trees; however, development and redevelopment activities generally require the removal of some percentage of the existing trees. In these cases, the land development regulations require additional trees to be planted to replace protected trees that are removed and also require parking lot plantings.

Air Quality

The implementation of the CRA Plan does not involve the addition of any anticipated point-sources of air pollution that would require State or Federal permits. Construction activities that occur as a part of project development may be a source of particulates. Dust control measures are required to be employed during these activities.

Noise and Vibration

The land uses permitted within the CRA are not generally the type to consistently cause high noise levels. With the exception of the two North Congress Avenue parcels that are zoned industrial, the majority of the other allowable commercial businesses are required to conduct activities within buildings. This plan recommends analysis of land use changes that may restrict the type of industrial land use that can take place. Construction activities may cause a temporary increase in local noise levels; however, these activities will take place during normal working hours and will be short-lived. The Village has adopted a noise and vibration ordinance that protects its residents from high noise and vibration levels. The CRA should coordinate with the Village and adjacent jurisdictions to ensure that noise does not interfere with the residents and business owners within and surrounding the CRA.

Availability of Community Services

The implementation of the CRA Plan will provide the framework for more attractive and functional neighborhoods, which will lead to a higher residential population and increased business opportunities. It is anticipated that physical and social conditions in the area will improve with the gradual elimination of deteriorated and dilapidated structures, some of which cater to a criminal and transient population.

Effect on School Population

The implementation of the redevelopment plan will establish a revitalized and expanded residential base within the CRA. This plan makes provisions for attainable housing for moderate-income markets and new market-responsive housing that accommodates growing market segments. Many of the existing and some of the new CRA residents will likely be families that include school age children; however, the attainable and workforce housing units will also be likely to attract young professionals and "empty-nesters" looking to down-size. The Village will coordinate with the Palm Beach County School District as provided for in the Coordinated School Planning interlocal Agreement and State law.

Neighborhood Impact (3)

Employment

The implementation of the redevelopment plan will increase employment opportunities for the residents of the CRA through the establishment of new business and new opportunities for community-based entrepreneurship. Small-scale community business development is a key factor to providing a stronger, more diverse employment base that is more resistant to temporary economic cycles and decisions regarding capital mobility.

Relocation

Relocation of residents and businesses displaced as result of property acquisition by the Community Redevelopment Agency will follow procedures that fulfill the intent of Florida Statutes 421.55. At this writing, there are no CRA Projects proposed for implementation that would necessitate the displacement of any households. The Village's Comprehensive Plan promotes the reuse of existing structures, encourages County assistance for neighborhood revitalization, allows current residents to revitalize their neighborhoods, and avoids relocation. Any future CRA projects that do necessitate displacement of residents, will include a relocation plan in accordance with State law.

Proposed 5-Year Capital & Operating Budgets

	2022	2023	2024	2025	2026	2027

Village of Palm Springs Context
(Two Non-Contiguous CRA Districts)

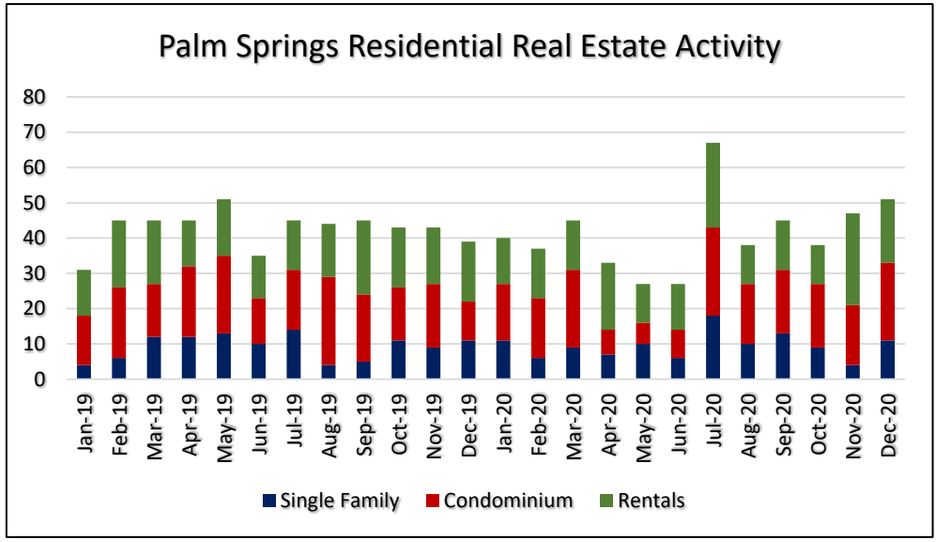
Palm Springs is a village in Palm Beach County, Florida, situated adjacent to Greenacres, Lake Worth, and West Palm Beach. The village has direct access to Palm Beach International Airport and as of the 2010 US census, had a population of 18,928 and is home to an estimated 1.49 million people as of 2019.

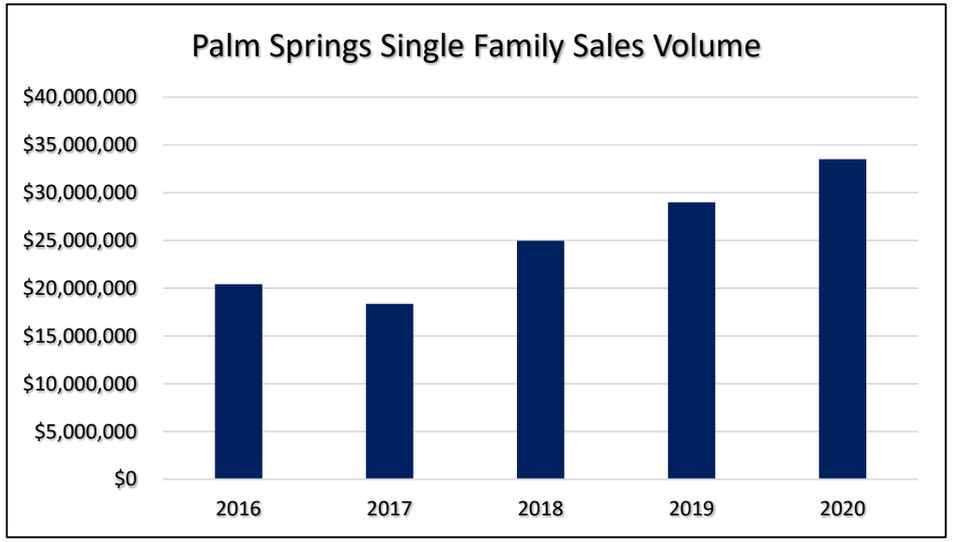
The study area(s) for this market assessment encompasses the two Community Redevelopment Agency (CRA) areas of Lake Worth District and Congress Avenue District. Both districts may be characterized as typical suburban commercial development.

Lake Worth District
(Study Area)

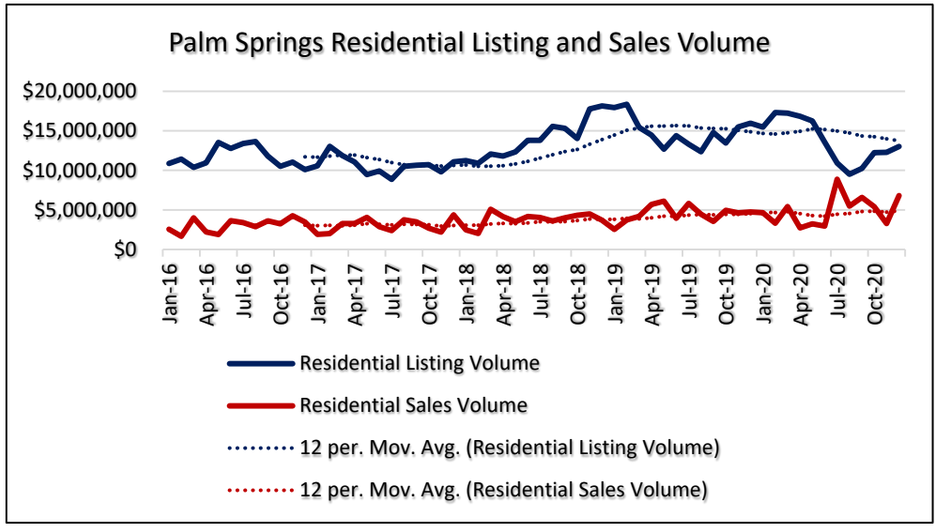
Lake Worth District is one of the CRA districts, encompassing an area of approximately 291 acres. In general, the study area is along Lake Worth Road from canal edge/ village boundary on the east to Military Trail/ village boundary on the west, a distance of 1.85 miles.

Congress Avenue District
(Study Area)

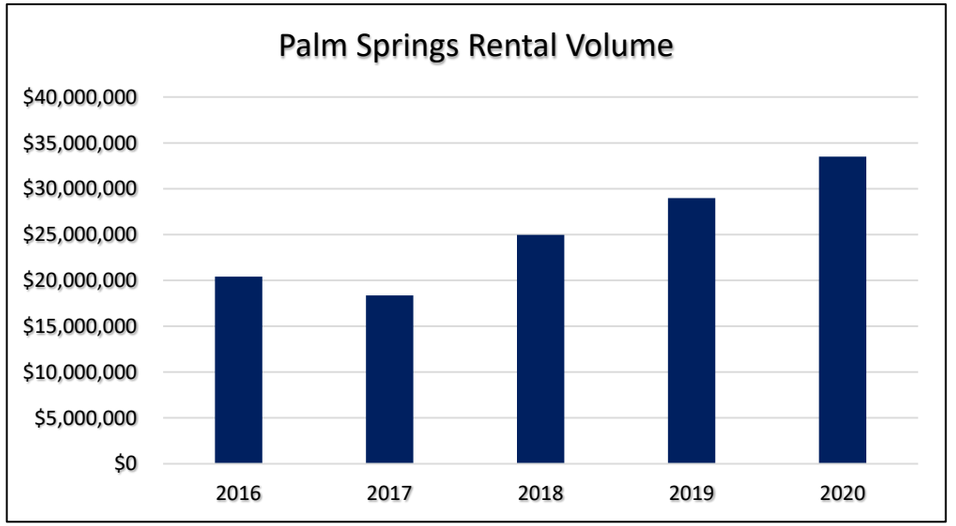




Congress Avenue District is a second CRA district, encompassing an area of approximately 221 acres. In general, the study area is along Congress Avenue from approximately Lilian Road on the south to Summit Boulevard on the north, a distance of 1.47 miles.



Residential Real Estate

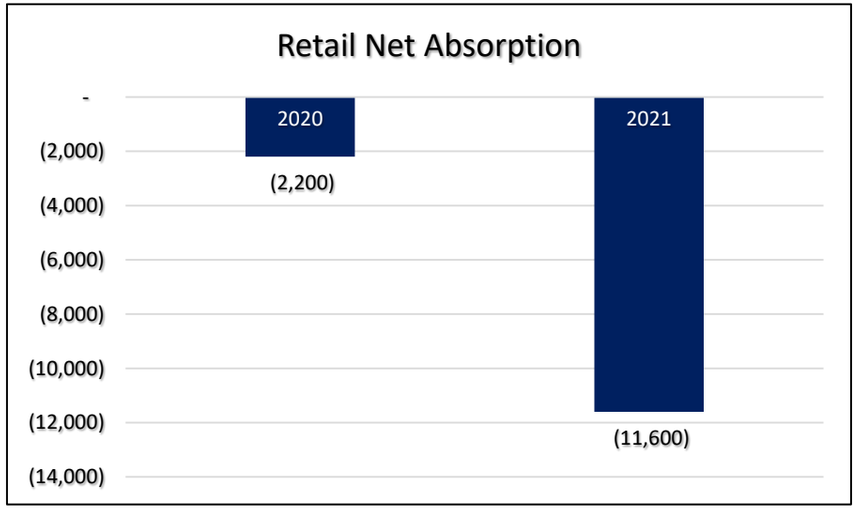


Description: The residential real estate overview covers rental and sales activity. Within the Lake Worth Road CRA, there are 477 housing units. The Congress Ave CRA district is comprised of 289 housing units.

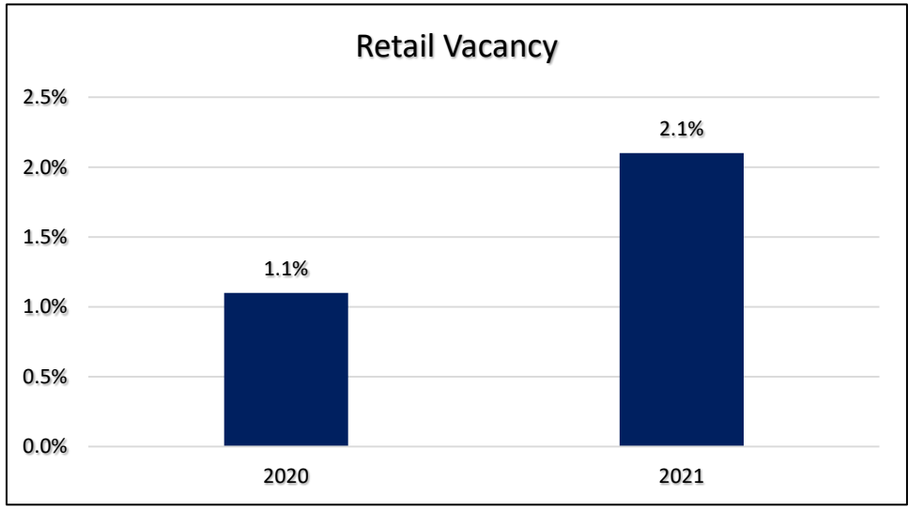
Observations: Palm Springs has a stable residential market with sales volumes and listings, indicating no outside market pressures forcing housing price escalation.

Source: CoStar 2020

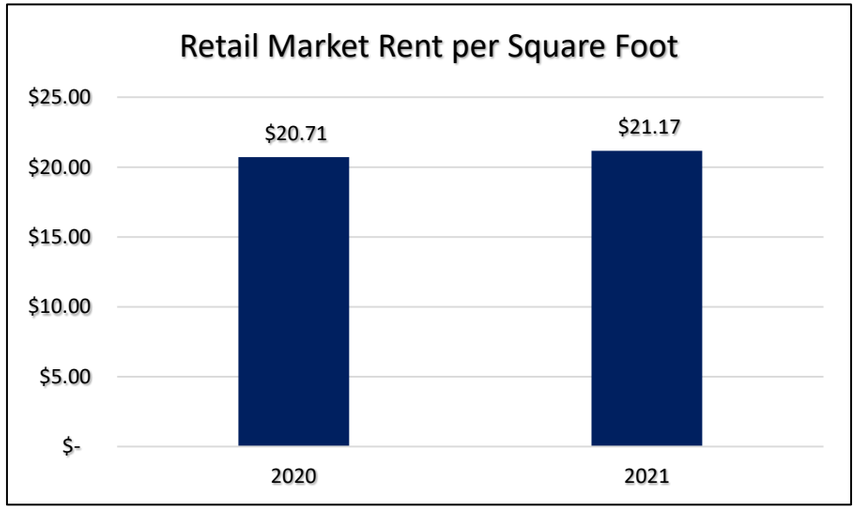
Congress Ave. Commercial Real Estate - Retail



Description:



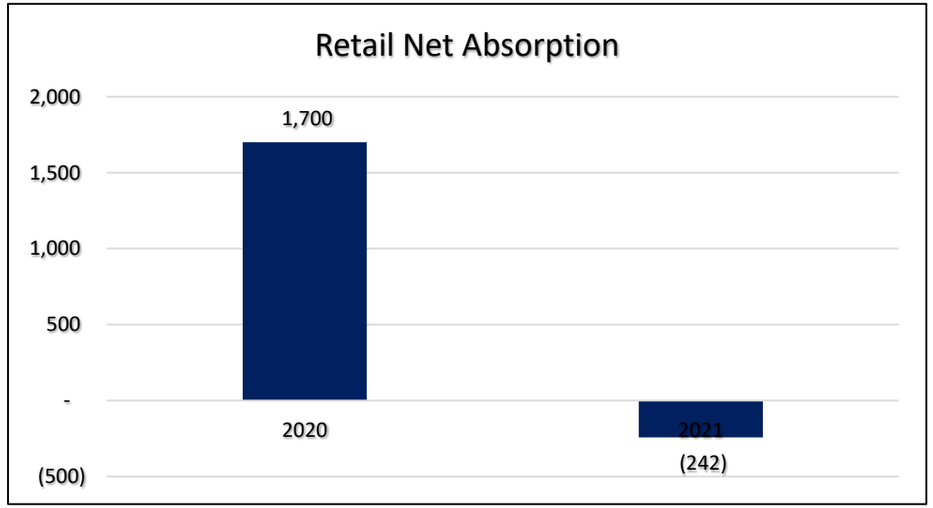
- ***Capitalization (Cap) Rate*** indicates the rate of return that is expected on a real estate investment property. A **lower** value of **cap rate** corresponds to better valuation and a better prospect of returns with a lower level of risk. A **higher** value of **cap rate** implies prospects for a relatively lower return on investment, and hence a **higher** level of risk.
-***Absorption*** measures how much space is occupied during a given time period.



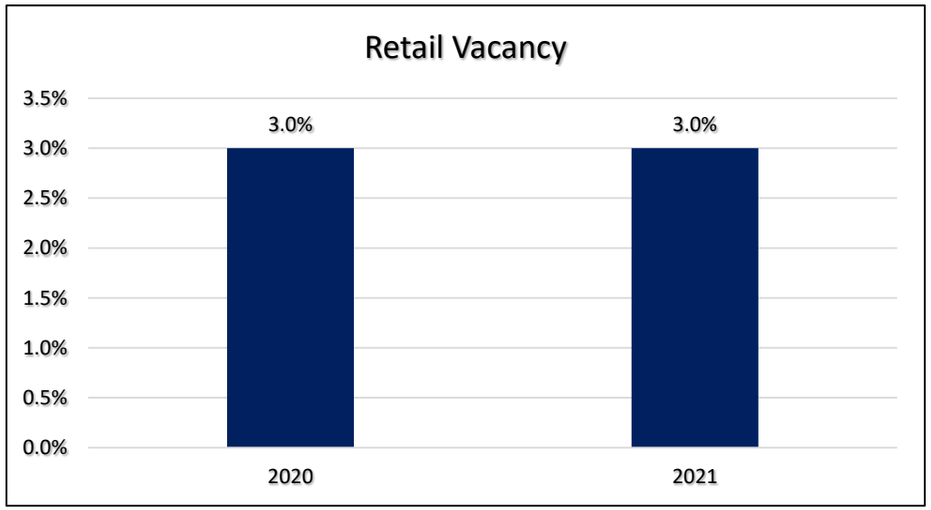
Observations:

- Rising rents on Congress Avenue signals increasing retail demand. Currently, rents are stable.
- Market rent is below asking rent.

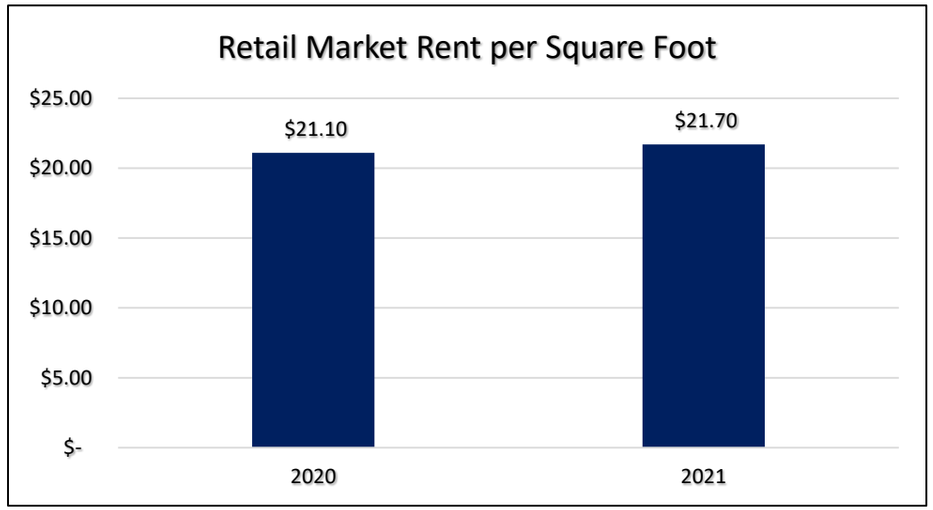
Congress Retail		
	2020	**2021**
Properties		122
Inventory	1,200,000	1,200,000
Under Construction	-	-
12 Mo Net Absorption	(2,200)	(11,600)
Vacancy	1.1%	2.1%
Market Rent per square foot	$20.71	$21.17
Asking Rent		$24.52
Sale Price per Square Foot	$246.00	$253.00
Cap Rate	6.1%	6.1%



Source: CoStar 2020



Lake Worth Rd. Commercial Real Estate - Retail



Description:
The commercial retail snapshot provides an overview of existing inventory, how much of it is vacant, and average price per square foot.

Observations:
From 2020 to 2021 there has been a slight drop in the cap rate for Lake Worth Rd retail, with prices remaining steady showing no signs of external market pressure.

Lake Worth Retail		
	2020	**2021**
Properties		75
Spaces		2
Inventory	709,000	709,000
Under Construction	-	-
12 Mo Net Absorption	1,700	(242)
Vacancy	3.0%	3.0%
Market Rent per square foot	$ 21.10	$ 21.70

Real Estate SWOT

Residential & Commercial:

Strengths
- Stable residential housing market
- Good price appreciation for existing stock
- Opportunities for residential development
- Strong commercial corridors

Weaknesses
- Much of the commercial real estate space is outdated
- Housing stock is aging which limits potential housing value

Opportunities
- Destination retail
- Demand for office space
- Workforce housing

Threats
- Residential parking requirements

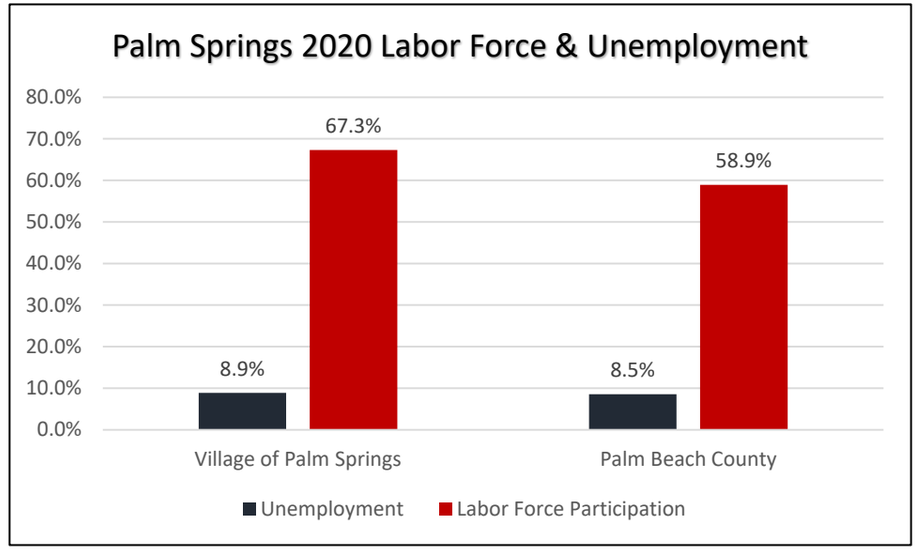
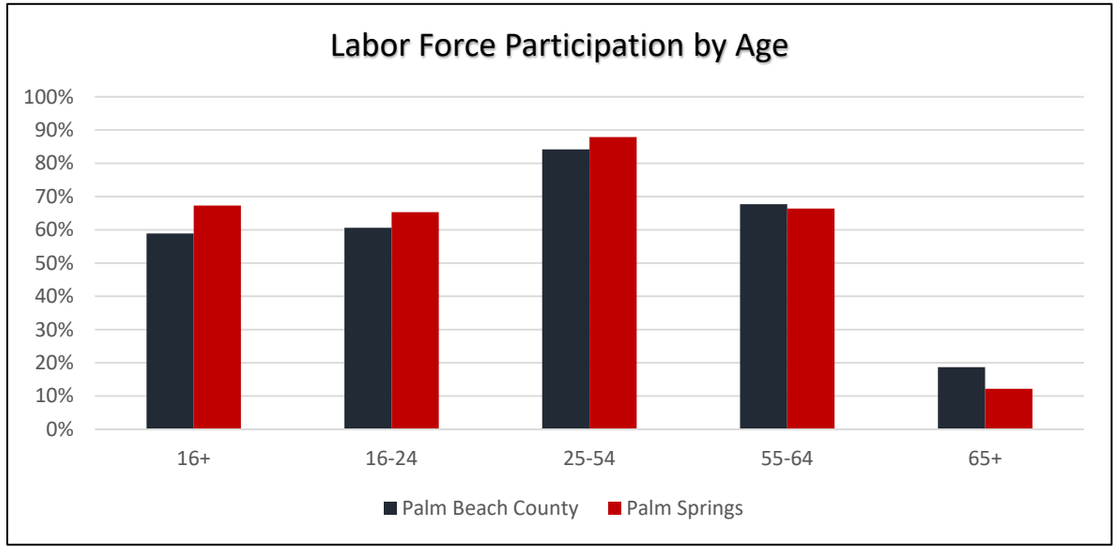
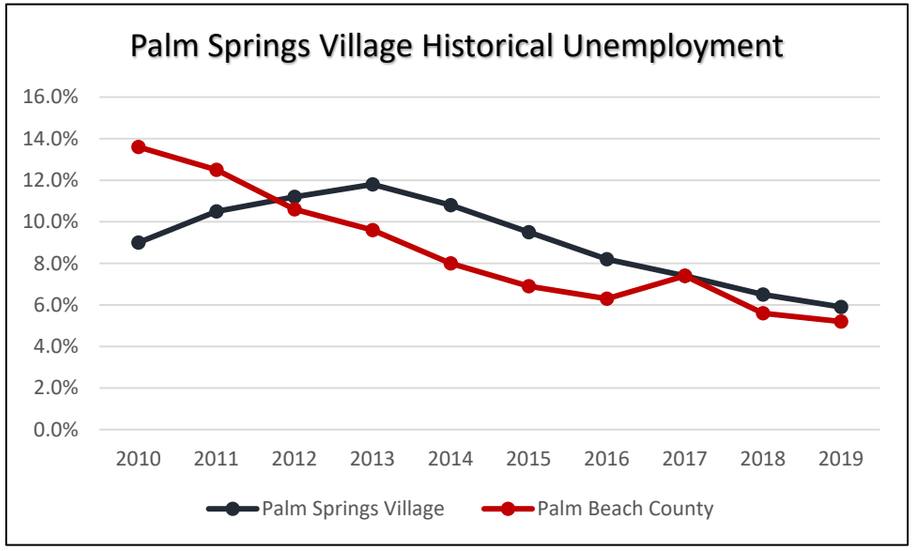
Workforce SWOT



Source: Unsplash. Sams Solutions



Labor Market Trends

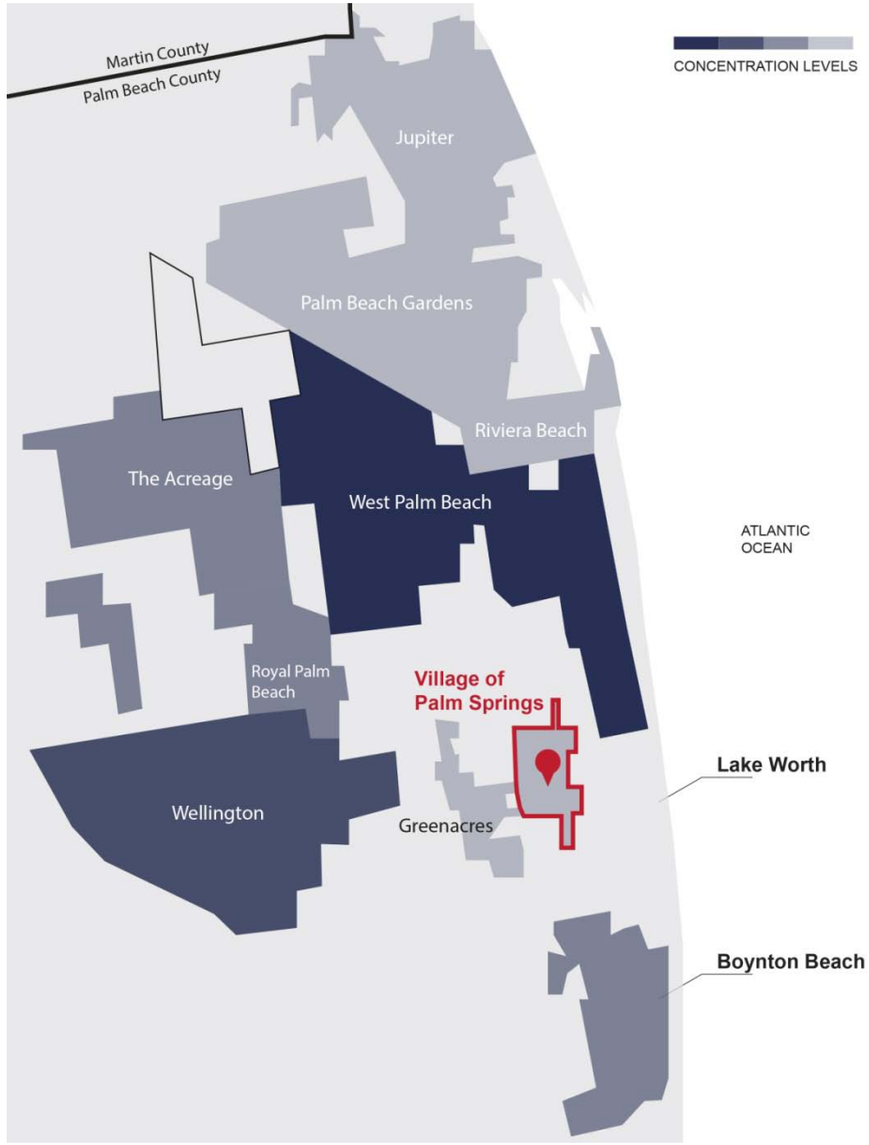


Description: The *Labor Force Participation* rate is a measure of an economy's active workforce, the percentage of all people of working age who are employed or are actively seeking work.

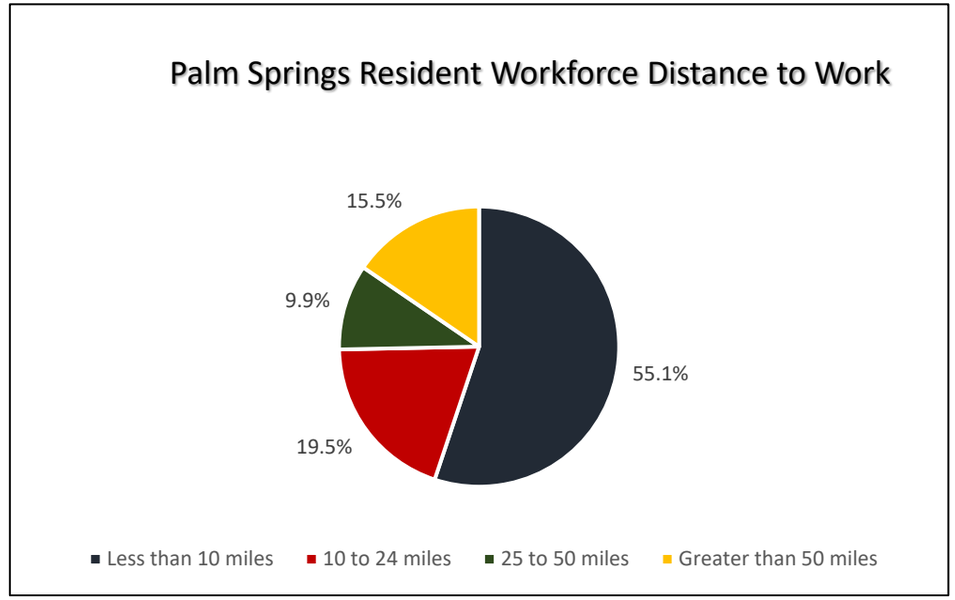
Observations:
-Palm Springs unemployment is slightly higher when compared to Palm Beach County. While the Labor Force Rate is higher- this indicates less students, retirees and discouraged workers (those not actively seeking work) in Palm Springs.
-Palm Springs Labor Force is generally younger compared to the Palm Beach County average.
-Palm Springs unemployment rate had been trending down before jumping up in 2020 due to COVID-19.

2020 Labor Force				
	Population	**Employed**	**Unemployed**	**Labor Force**
Village of Palm Springs	19,933	12,225	1,188	13,413
Palm Beach County	1,231,274	663,459	61,857	725,316

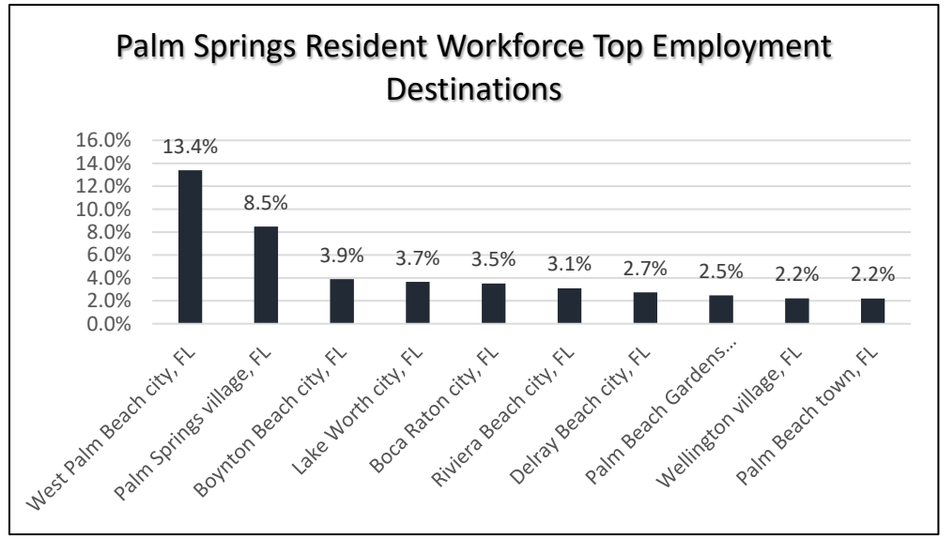
Source: ESRI, Inc. 2020



Workforce Shed



Description:



Workforce Shed defines the movement of *resident workforce*, in this case workers who live in Palm Springs.

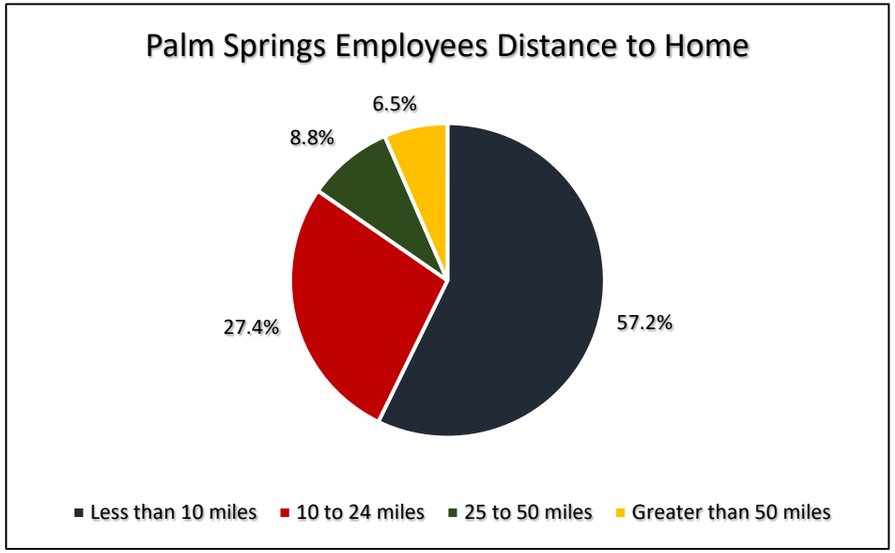
Observations:

1. Most Palm Springs residents work close to home (less than 10 miles).
2. Only 8.5% of Palm Springs resident workforce works in Palm Springs.
3. Nearly 13.4% of Palm Springs resident workforce works in West Palm Beach.

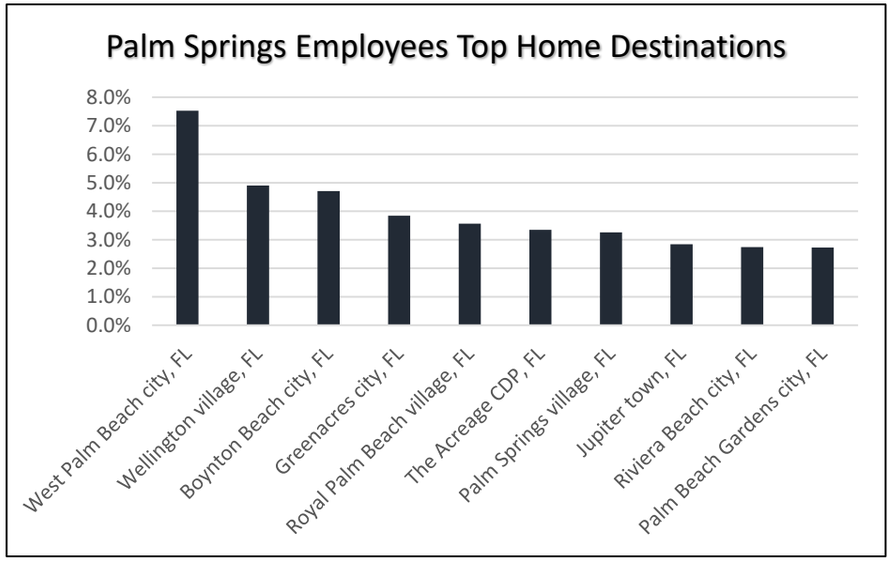
Source: US Census Bureau, 2018

Employment Shed

Description:



Employment Shed illustrates the movement of workers commuting to Palm Springs for employment. In other words, the jobs offered in Palm Springs which brings other into the area.



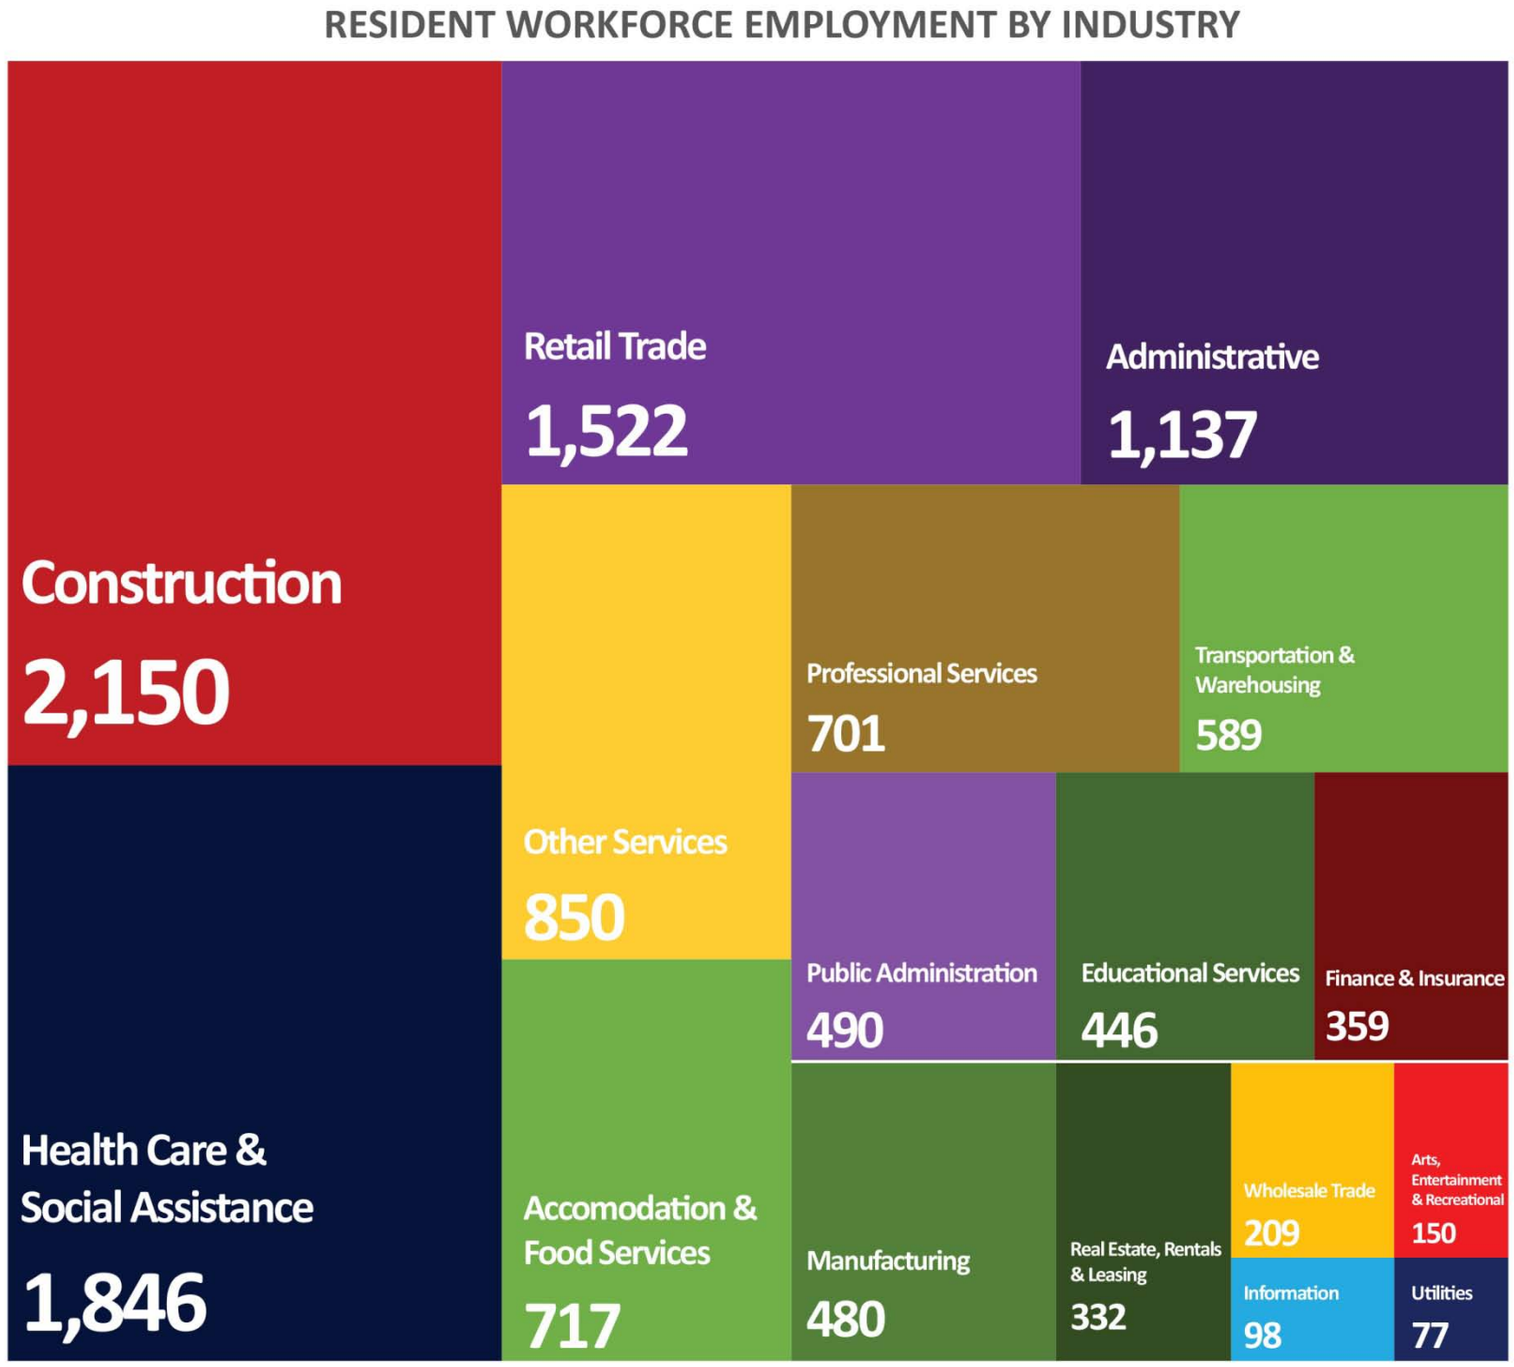
Observations:

1. Only 3.3% of the jobs offered in Palm Springs are held by Palm Springs residents.

2. The most popular home destinations for Palm Springs employees are West Palm Beach, Wellington, and Boynton Beach.

Source: US Census Bureau, 2018

Workforce Industries



Description:

Resident workforce industries are the specific industries in which Palm Springs residents work. The tree map displayed here represents the number of workers within each industry. The tree map flows from the largest workforce industries (top left) to the smallest (bottom right).

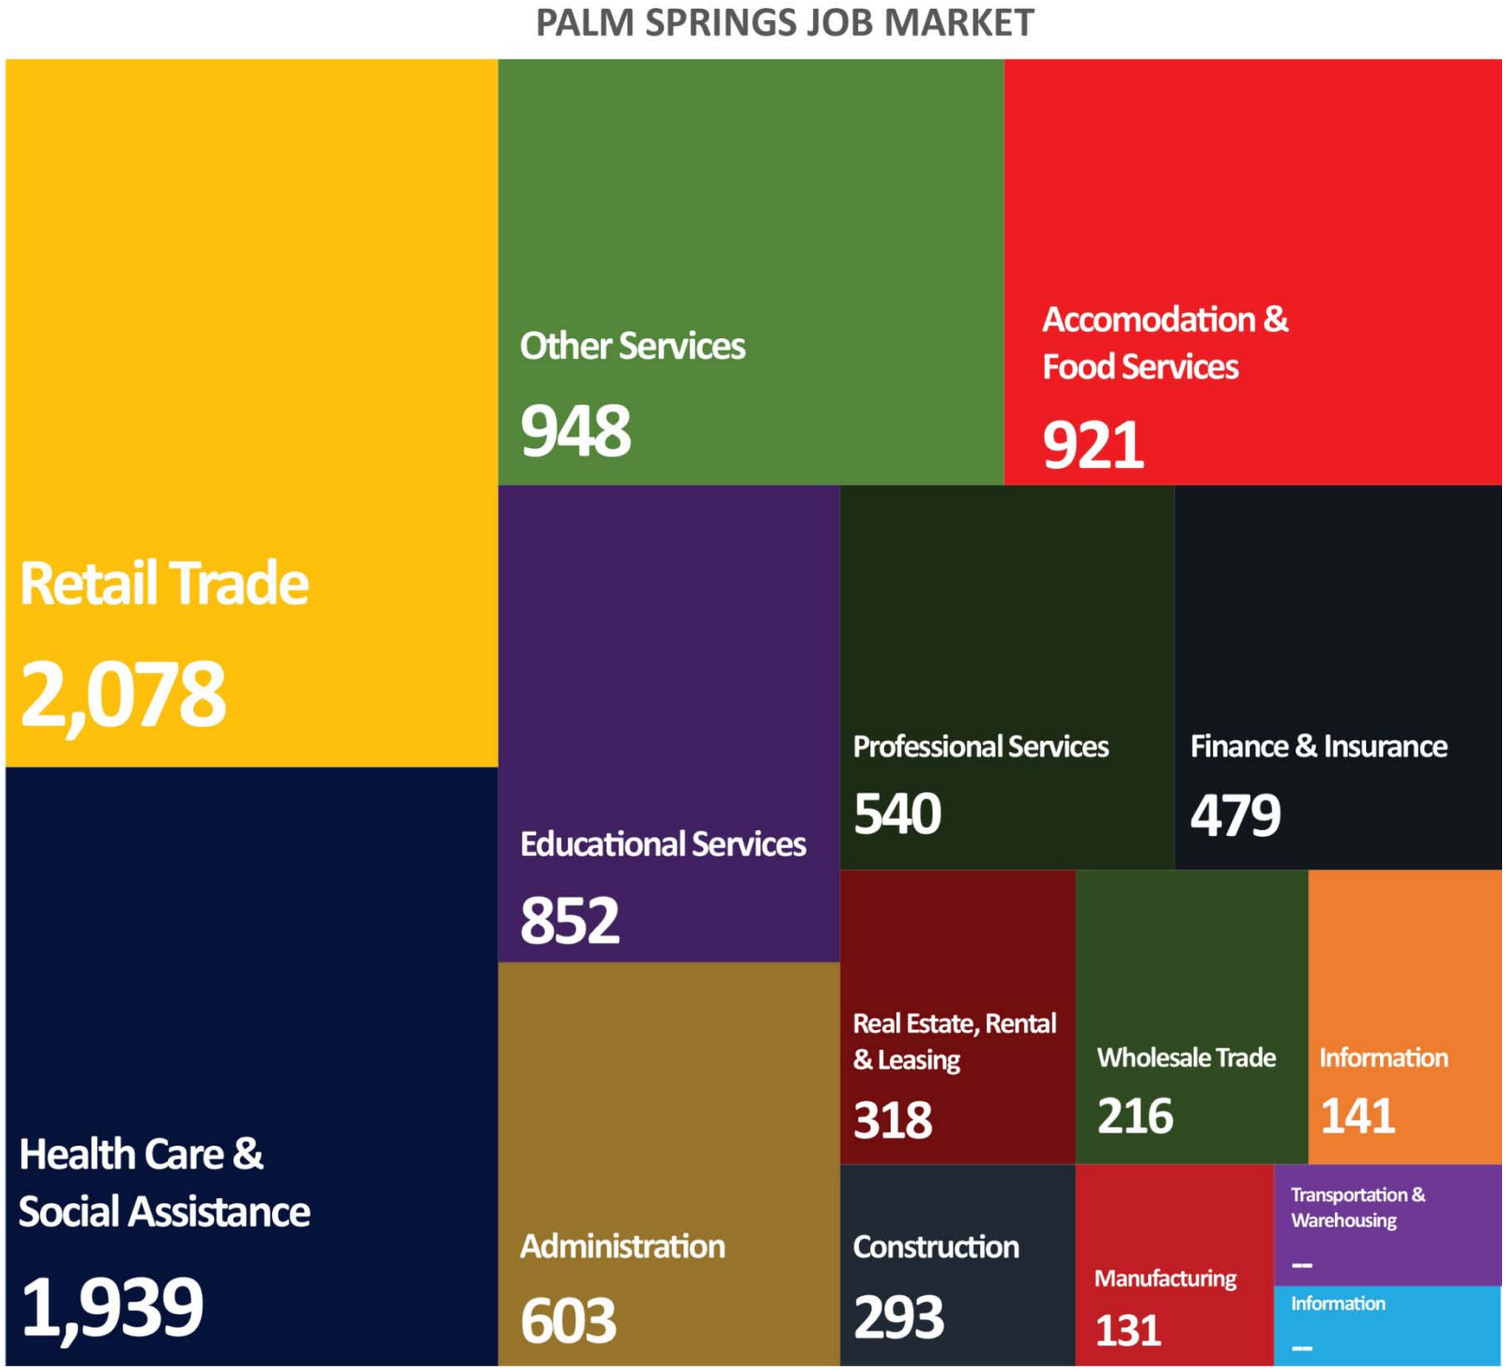
Observations:

1. Approximately 12,225 of Palm Springs 19,933 residents are currently employed.
2. The top resident workforce Industries in Palm Springs are in Construction, Health Care & Social Assistance, Retail Trade, Administrative and Other Services plus Professional Services, followed by Accommodation & Food Services.

Source: ESRI, Inc. 2020

Job Market

Description:



Job Market describes the jobs offered by industries in Palm Springs. The tree map displayed here represents the number of jobs within each industry. The tree map flows from the largest job industries (top left) to the smallest (bottom right).

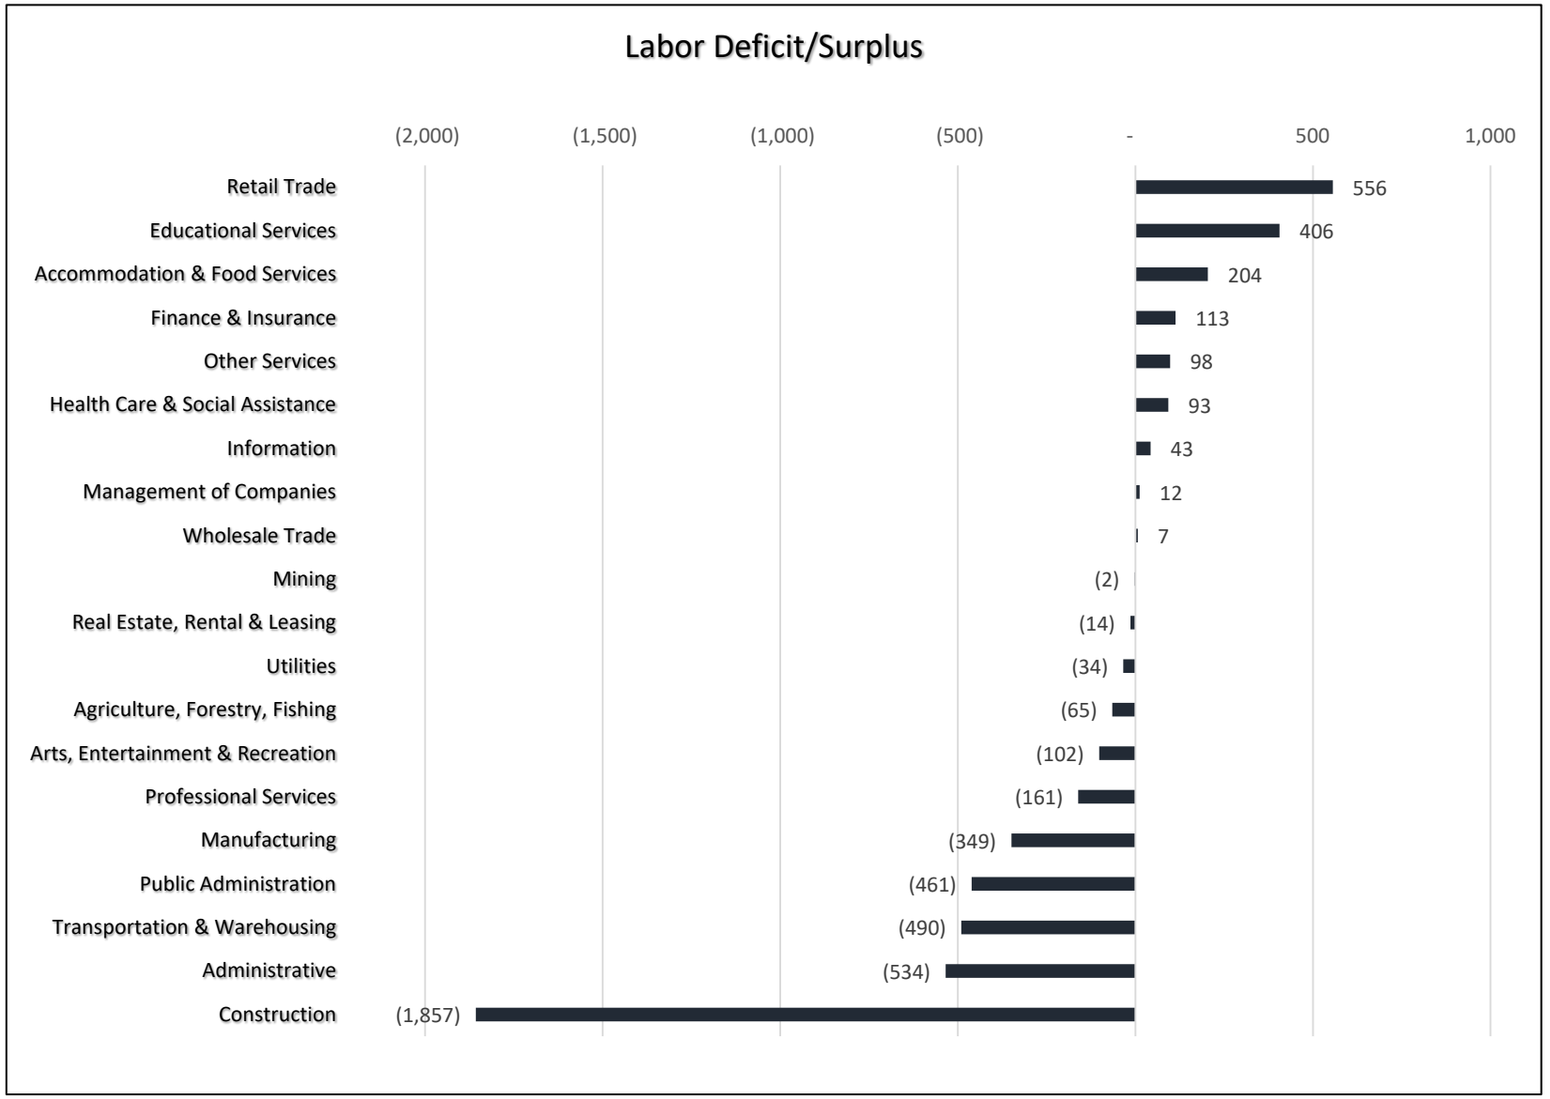
Observations:

1. At the time of this study, there were approximately 1,429 businesses providing 9,877 job in Palm Springs.

2. The top employment industries are Retail Trade, Health Care & Social Assistance, Other Services, Accommodation & Food Services, and Educational Services.

*Other services can include but are not limited to Equipment and Machinery Repairing, Religious Activities, Grantmaking, Advocacy, Dry-cleaning and Laundry Services, Personal Care Services, Death Care Services, and Pet Care Services.

Source: ESRI, Inc. 2020



Workforce Gaps

Description:

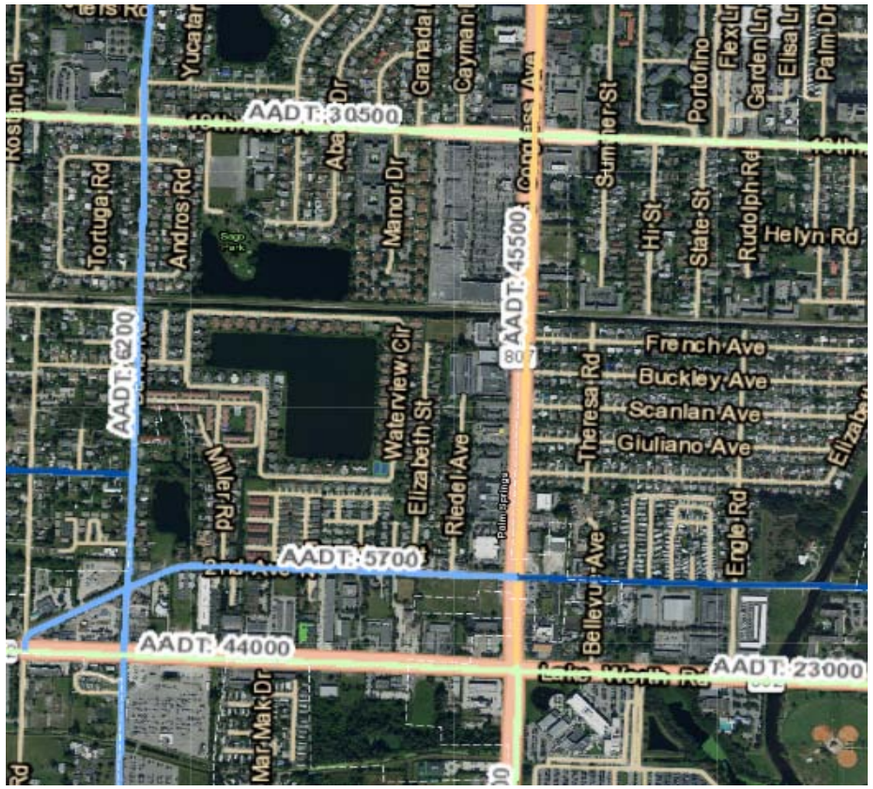
Job Deficit/Supply defines the number of jobs offered within each industry in a certain area minus the number of residents who live in the area and work in those industries. A negative number represents a job deficit, meaning there are more workers than jobs available. A positive number represents a job surplus, meaning there are more jobs available than workers.

Observations:

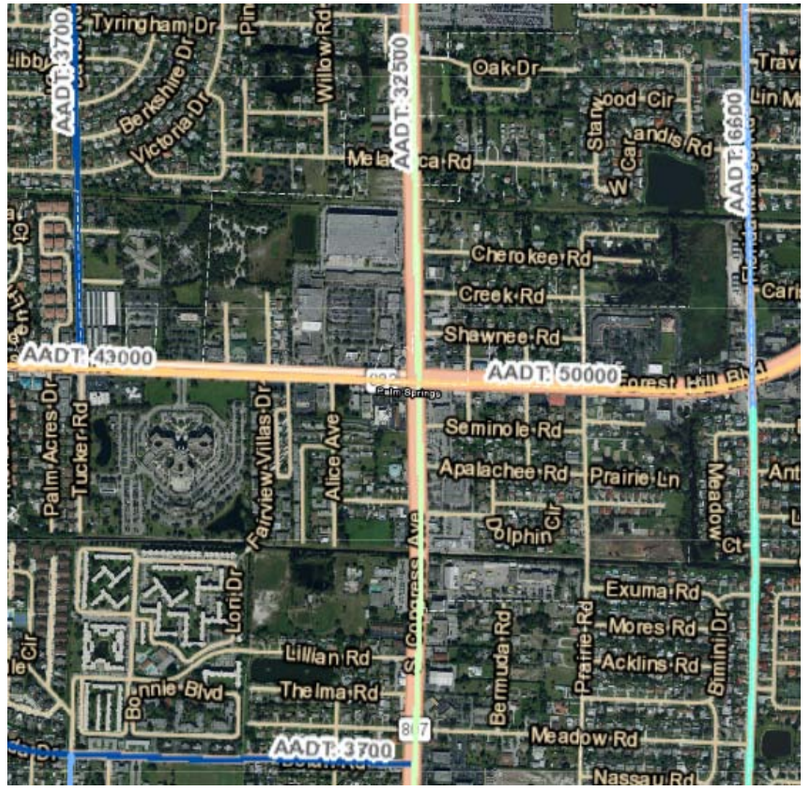
- The industries with the highest job surplus in Palm Springs are Retail Trade, Educational Services, and Accommodation & Food Services.
- The industries with the highest job deficit in Palm Springs are Construction, Administrative Support & Waste Management, Transportation and Warehousing, and Public Administration.

Source: ESRI, Inc. 2020

Transportation



Description:



Traffic count maps represent the average daily traffic (ADT), or number of vehicles that cross a certain point of a street location.

Observations:

***Average Daily Traffic Counts in Palm Springs*:**

- Congress: 32,500-45,000
- Lake Worth Rd: 23,000-46,000
- Military Trail 38,000-41,000
- Forrest Hill- 43,000-50,000

Source: Florida Department of Transportation 2020

Education

Description:

The chart below shows the schools in Palm Springs and their associated scores from the Florida Department of Education as well as public Google Reviews.

Observation:

1. Palm Springs is home to well-known and highly rated public schools.
2. G-Star High School of the Arts for Film, Animation and Performing Arts is one of the most highly regarded schools in Florida and ranked in the top 1.4% of schools nationwide according to the Washington Post.
3. G-Star is the only high school located on a working movie studio backlot and features the largest film production studio in South Florida.
4. An additional education and recreation asset is the YMCA of the Palm Beaches, which is located within the Village of Palm Springs. YMCA of the Palm Beaches offers Health and Fitness Programs, Educational Classes, Social Activities, Free Child Care, Youth Sports, and more.

Palm Springs School Grades 2018		
	Florida Department Of Education	Google
Palm Springs Elementary School	"A"	4
Palm Springs Community Middle School	"B"	4.2
G-Star School of the Arts	"A"	4.4
Clifford O. Taylor Elementary School	"C"	4.3

Source: Florida Department of Education 2019

Workforce SWOT

Strengths
- Transportation- Proximity to Palm Beach International Airport, Interstate 95, Florida Turnpike, Tri-Rail
- Education- Palm Springs is home to highly regarded public schools.
- Large employment centers- Oxygen Development, Fulton Holland Educational Services Center
- Healthcare Industry- Proximity to JFK Medical Center

Weaknesses
- Workforce Gaps
- Labor Shed- Many residents leave the Village for work
- Employment Shed- Many employees commute from outside of the Village for work.

Opportunities
- G-Star as an assett to grow Film, Entertaiment, and the Arts
- Medical Industry
- Understanding changing demographics and new workforce needs

Threats
- COVID-19
- Lack of citizenship among workers
- Aging population
- Lack of affordable housing options for essential workforce

Private Capital Trends

Current economic development and redevelopment projects in Palm Springs include:

1. **Vacant lot on Patio Court** - Patio Court Townhomes: The developer is requesting a site plan to construct 11 two-story fee simple townhomes.
2. **3172 2nd Avenue North** - Atlantic Cay: This is a new mixed-use project consisting of 14 residential dwelling units and 1.575 square footage office/warehouse space.
3. **2407 10th Avenue North** - Waterside Plaza: This is a remodeling of the existing plaza and includes adding two fast food restaurants with drive-throughs.
4. **4177 South Congress Avenue** - Jacob's Garden: This project is converting the existing 16-unit rental apartment to a 29-bed assisted living facility.
5. **4236 Forest Hill Boulevard & 1761 Forest Avenue** - Integrity Commons: This project is redeveloping the properties into a new mixed-use project, consisting of four residential dwelling units and a 3,200 square footage medical office building.
6. **3575 Coconut Road** - Coconut Road Triplex: This involves the construction of a one-story triplex residential building.
7. **YMCA Site:** This proposed project is in Planning for 264 units of multifamily residential development.

Source: Village of Palm Springs

Millage Rate

Millage Rate		100%	95%
Current Village	3.5	$72,190.77	$68,581.23
From PBC	3.5	$72,190.77	$68,581.23

	2019- PBC Baseline	2020 PBC 1st Year Valuation	2020- 1st Year Valuation Increase	2020- Proposed TIF
Lake Worth Road District	$161,860,986.30	$171,184,347.00	$9,323,360.70	$32,631.76
Congress Avenue District	$127,292,669.70	$135,595,242.00	$11,302,572.30	$39,559.00
Total	**$289,153,656.00**	**$306,779,589.00**	**$20,625,933.00**	**$72,190.76**

From the millage rate and taxable value within Palm Springs Community Redevelopment areas, we are able to calculate the proposed Tax Increment Funding to the CRA's. During the CRA's baseline year (2019) the taxable value was $161,860,986 for the Lake Worth Road District and $127,292,669 for the Congress Avenue CRA. Using the 3.5 local millage rate, a total budget of $72,190.76 is realized. This total is split between the two CRA areas.

Palm Beach County

2020 Final Millage Rates

Taxing District Codes	County or Municipality	Total Tax Rate	Taxing District Codes	County or Municipality	Total Tax Rate

Identification of Financial Resources for Redevelopment Implementation and Economic Growth

New Markets Tax Credits (NMTC). This program provides low interest, private-sector financing for commercial and mixed-use projects in low-income areas. Eligible projects must meet a minimum capital investment of $5 million and varying job creation thresholds for consideration. Tax credits totaling 39 percent of the original investment amount are issued to individual and corporate investors making one-time, upfront equity contributions to qualified development projects through community development entities and claimed over a period of seven years.

Source: Baker Tilly 2020

Opportunity Zones. Opportunity Zones and associated area designations were created under the Tax Cuts and Jobs Act of 2017. They are used as an economic development tool that allows people to invest in distressed areas in the United States. Opportunity Zones seek to spur economic growth and job creation in low-income communities while providing tax benefits to investors.

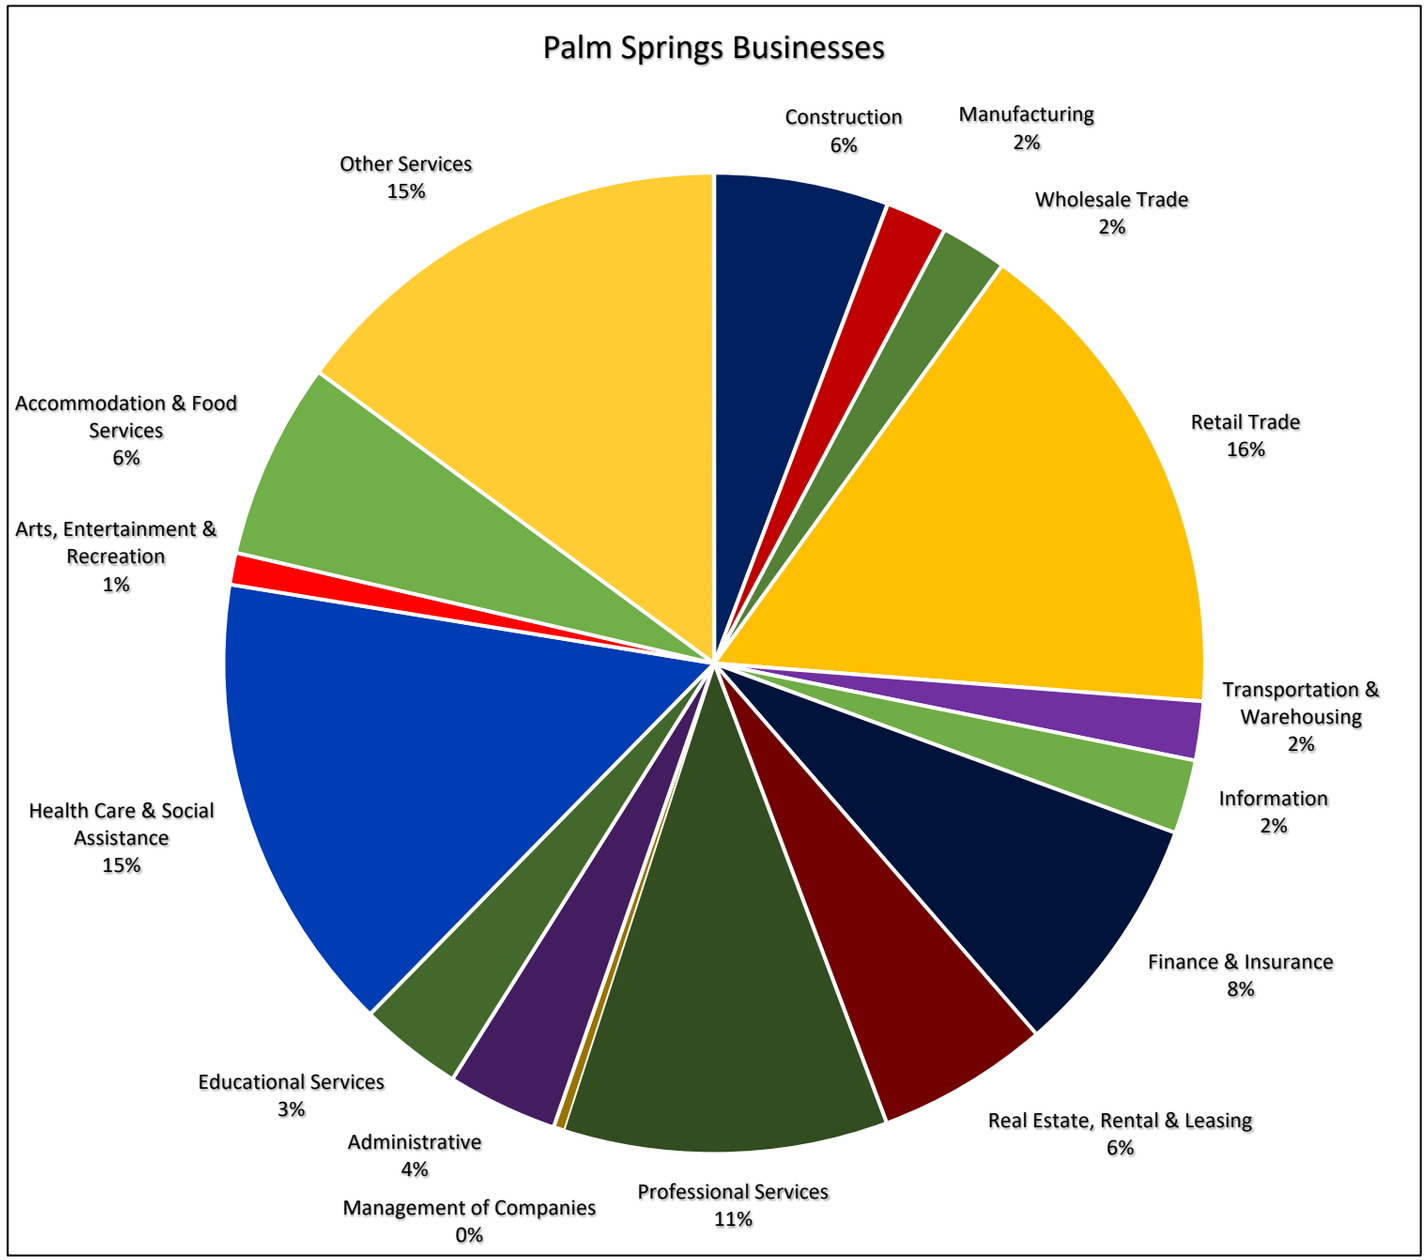
Identification of Financial Resources for Redevelopment Implementation and Economic Growth.

Local Incentives:

Palm Beach County Tax Exemption Program. With this program, a new or expanding business may apply for an "economic exemption" for improvements to real property and/or tangible personal property not already on the Palm Beach County Tax Roll. The applicant must create and maintain the required number of new full-time jobs. The business project must have a positive impact on the local economy of Palm Beach County.

Palm Beach County Film & Television Grant. The Palm Beach County Film and Television Commission offers various grants and incentives. Included in the incentive package is the use of Palm Springs-based G-Star Academy's 84,000 square foot facility, featuring the 25,500 square foot G-Star Motion Picture Studio facility, set on three-acres including a 17,000 square foot warehouse for shooting and set construction. Students from G-Star have a high -level experience in a variety of production related jobs and can be utilized as interns or actors in productions.

Village of Palm Springs Property Improvement Program. The Village of Palm Springs offers 50% matching grant (up to $5,000) for construction projects that enhance the visual appeal and value of the businesses/residence.



Federal Funding:

The Coronavirus Aid, Relief, and Economic Security Act (CARES Act; P.L. 116-136), signed into law on March 27, 2020, created the Coronavirus Relief Fund (CRF), which provided $150 billion in direct assistance for state and local governments.

American Rescue Plan. The American Rescue Plan Act of 2021, also called the COVID-19 Stimulus Package or American Rescue Plan, is a $1.9 trillion economic stimulus bill signed into law on March 11, 2021, to speed up the United States' recovery from the economic and health effects of the COVID-19 pandemic and the ongoing recession. Palm Beach County is slated to receive $290 million to be used on projects and programs, including infrastructure projects. The Village of Palm Springs will receive $10.6 million.

Evaluation of the Village of Palm Springs Business Mix

Source: ESRI, Inc. 2020

Finance SWOT

Strengths
- CRA- Ability to leverage TIF funding

Weaknesses
- Limited population growth
- Over-reliance on residential tax base
- Infrastructure issues- Particularly water & sewer within the Congress Avenue CRA

Opportunities
- Opportunity Zone
- New Markets Tax Credits
- CARES Act
- American Rescue Act

Threats
- Competition from new communities in Western Palm Beach County- Arden, West Lake, Etc.

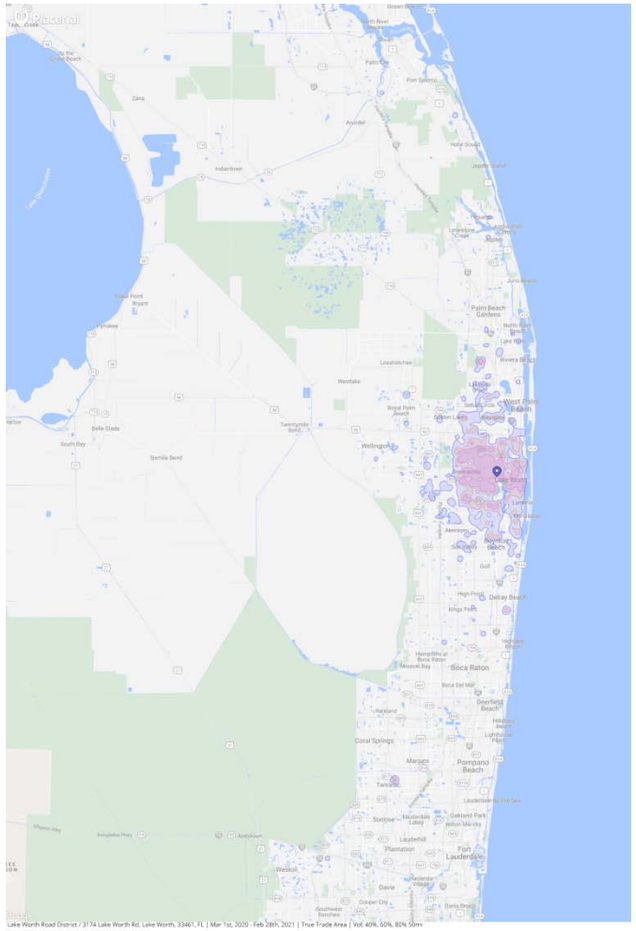
Trade Area

	Trade Area Size (Square Miles)		
District/Destination	**40%**	**60%**	**80%**
Lake Worth Rd District	13.52	28.62	71.54
Congress Ave District	10.39	25.07	68.62
Swap Shop/Drive-in	14.35	34.9	81.43
Off Lease Only	22.33	57.2	126.79

Description: The trade area represents the home locations of customers coming to the location. A trade area of 40% means 40% of customers coming the location live within that market area. The data shows that the Swap Shop and especially Off-Lease Only have a large trade area, drawing customers from across the region.



Observations: The Lake Worth Swap Shop/Drive-in and particularly the Off-Lease Only car dealership attract customers regionally where the Congress Avenue and Lake Worth Road District are much more local.

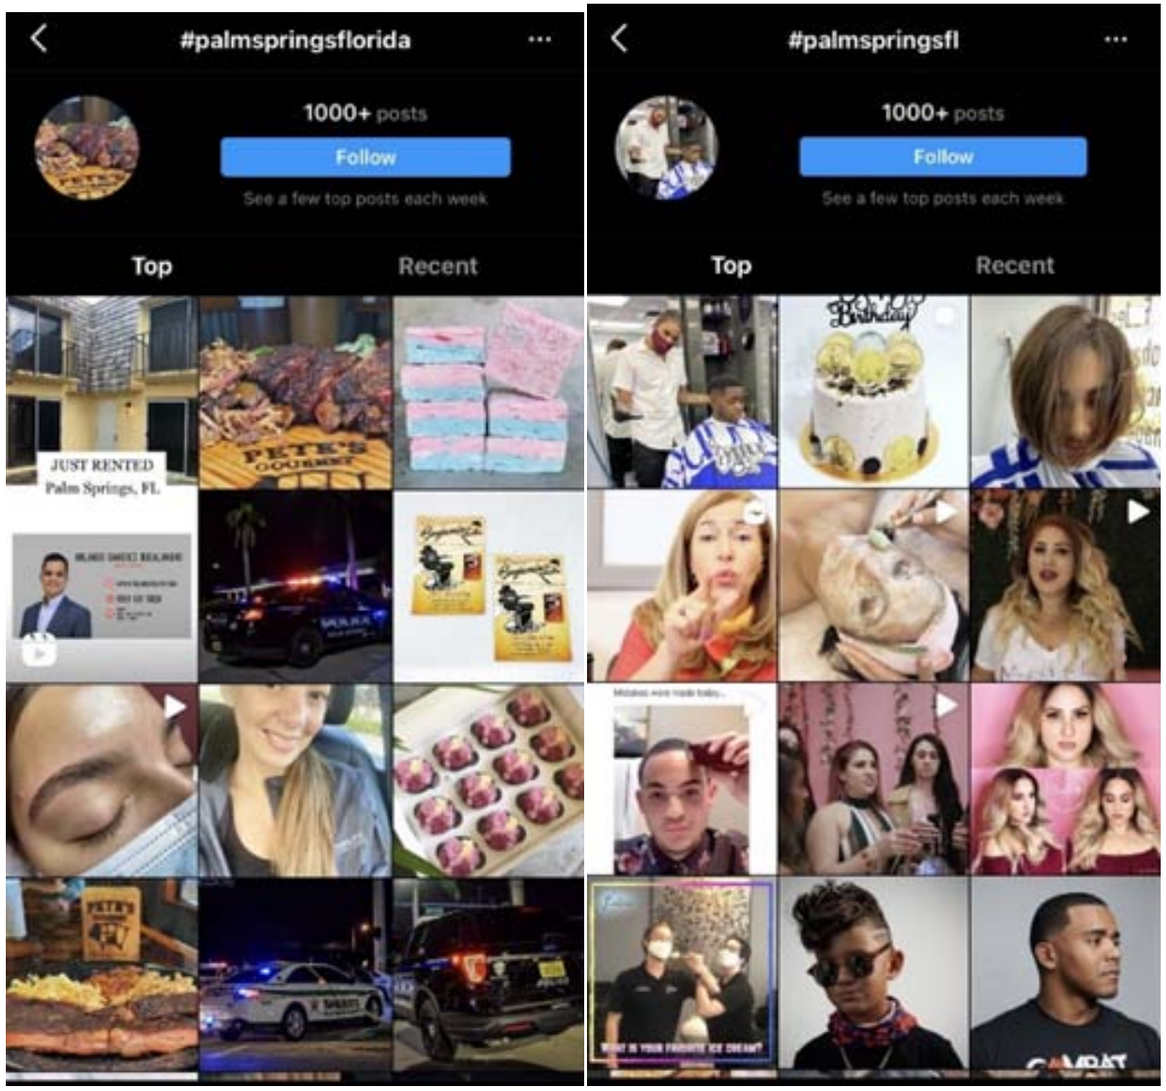
Digital Analysis- Google

Source: Google



Cities are increasingly turning to digital media as a means for increasing communications and messaging to its residents and business community. Likewise, residents and businesses are more and more using social media to communicate, receive news, promote business, etc.

Google Search:
A google new search of "palm springs fl" performed on January 11, 2021 uncovered mostly negative and very little positive press.

Google Reviews:
People are using internet searches more and more to gather information. In Palm Springs, the Village Clerks office received unfavorable reviews, while the Police Department received mixed reviews. Palm Springs Leisure Services and parks received very positive reviews.

Digital Analysis- Social Media

Source: Google, Instagram,

Another great way to get in tune with the heartbeat of a community is to browse Social Media to see what people are saying about the area. Social media hashtag searches can also give an accurate reflection of what it's like to live in, do business in, or visit an area. In addition, Many cities and government agencies are utilizing Social Media to interact with residents and businesses as well as share vital information on events and other news. Just as businesses use social media for business development, cities are using social media as a tool for economic development.

BusinessFlare completed a hashtag search for the keywords #PalmSpringsFL and #PalmSpringsFlorida. Majority of the posts were from local businesses (mainly eateries, beauty salons and real estate professionals). Palm Springs maintains an active Facebook page, however, reach and engagement is limited.

Consumer SWOT

Strengths
- Clusters of medical related businesses
- Clusters of beauty related businesses- cosmetics and spa
- Moderate to high income visitor traffic
- Destinations- Swap Shop, Off Lease Only

Weaknesses
- Lack of brand identity/awareness
- Large percentage of residents are not U.S. citizens

Opportunities
- Celebrate increasing diversity through events
- Capitalize on Car Dealerships ability to draw regional customers to Palm Springs
- Create a brand identity (Citywide as well as for the CRA districts) that capitalizes on existing assets and themes:
    - Cluster of medical and cosmetic businesses
    - TV, Film, & Production- G Star Academy, Drive-in Theater,
    - Education- Quality public schools, proximity to Palm Beach State College, and Palm Springs Public Library
- Connect with residents and businesses and promote Palm Springs Village via social media.
- Hotel development- proximity to airport

Threats
- Google news search “Palm Springs, FL” shows mostly crime and negative press
- Little to no night-time economy

CG- Commercial General – Development Along Lake Worth Rd

General Description of Zoning Districts
It is the purpose of the CG commercial general land development district to provide lands within the village for a wide range of goods and commercial services that serve a consumer market that may extend beyond municipal limits. Such areas shall be located convenient to major roads and automotive traffic. However, it is not the intent of this land development district to necessarily create or promote an extension of strip commercial areas.

Permitted Uses:
All permitted uses in the CN commercial neighborhood land development district, Financial institutions, Retail sales and services, Personal services, Commercial Planned Developments.

Prohibited Uses:
Any use not specifically, provisionally or by reasonable implication permitted, or permitted by special exception, **Any type of residential dwelling unit or accessory use**, Motels and hotels, Time share uses, Theaters, outdoor, Flea markets and swap shops, Bottle clubs, Medical marijuana dispensary.

RM – Residential Multiple-Family – Development at Military Trl and Lakewood Rd

General Description of Zoning Districts
It is the purpose of the RM residential multiple-family land development district to provide an emphasis on multiple-family residences, while preserving and protecting the residential character of the village. A clustering of units and a variety of housing design and styles is encouraged in the RM district, while maintaining an appropriate density that will complement the surrounding development in the village. The gross density shall not exceed 5.8 dwelling units per acre for single-family detached dwelling developments. Gross density shall not exceed 19.0 dwelling units per acre for attached multiple-family developments, such as apartments and condominiums, and planned developments.

Permitted Uses:
Single-family detached dwellings, Duplex dwellings, Multiple family dwellings, Residential Planned Developments, Minor community residential homes, subject to the provisions of subdivision XI of this division, Home occupations.

Prohibited Uses:
Any use not specifically, provisionally or by reasonable implication permitted, or permitted by special exception, Time share uses.

LI – Light Industrial – Development along Congress Ave – Off Lease Only – Car Dealer

General Description of Zoning Districts
It is the purpose of the LI light industrial land development district to provide lands within the village for the retention and expansion of economic activities associated with manufacturing, processing, fabricating, compounding, treatment, packaging and/or assembly of materials or goods, warehousing or bulk storage of goods, and their related accessory uses. Such areas shall be located convenient to major roads and vehicular traffic while providing safeguards for adjoining and/or nearby nonindustrial properties and the surrounding community. Other uses shall be permitted which are more appropriate to the LI land development district due to environmental impacts related to noise, vibration, light, traffic, and general aesthetics.

Permitted Uses:
Light industrial uses which do not process/store flammable materials, Professional offices, Business offices, Public uses and facilities, Public utilities, Self-storage units, Warehouse, Showroom/warehouse, Industrial planned developments.

Prohibited Uses:
Any use not specifically, provisionally or by reasonable implication permitted, or permitted by special exception, Any type of residential dwelling unit, Heavy industrial uses, Dumps/recycling centers, Junk/salvage yards, Flea markets/swap shops, Medical marijuana dispensary.

Future Land Use and Zoning Designations (5)

Existing Conditions

This entire length of the study area may be characterized simply as typical suburban commercial development, which includes strip shopping centers as well as stand alone, single use retail structures. Many structures are older and parcels are underutilized and lack adequate landscaping. A lack of cross-access easements between commercial properties forces an unnecessary amount of local traffic onto Lake Worth Rd and Congress Ave.

Intersection at Lake Worth Rd and Congress Ave

Abandoned Building at Davis Rd and 2nd Ave

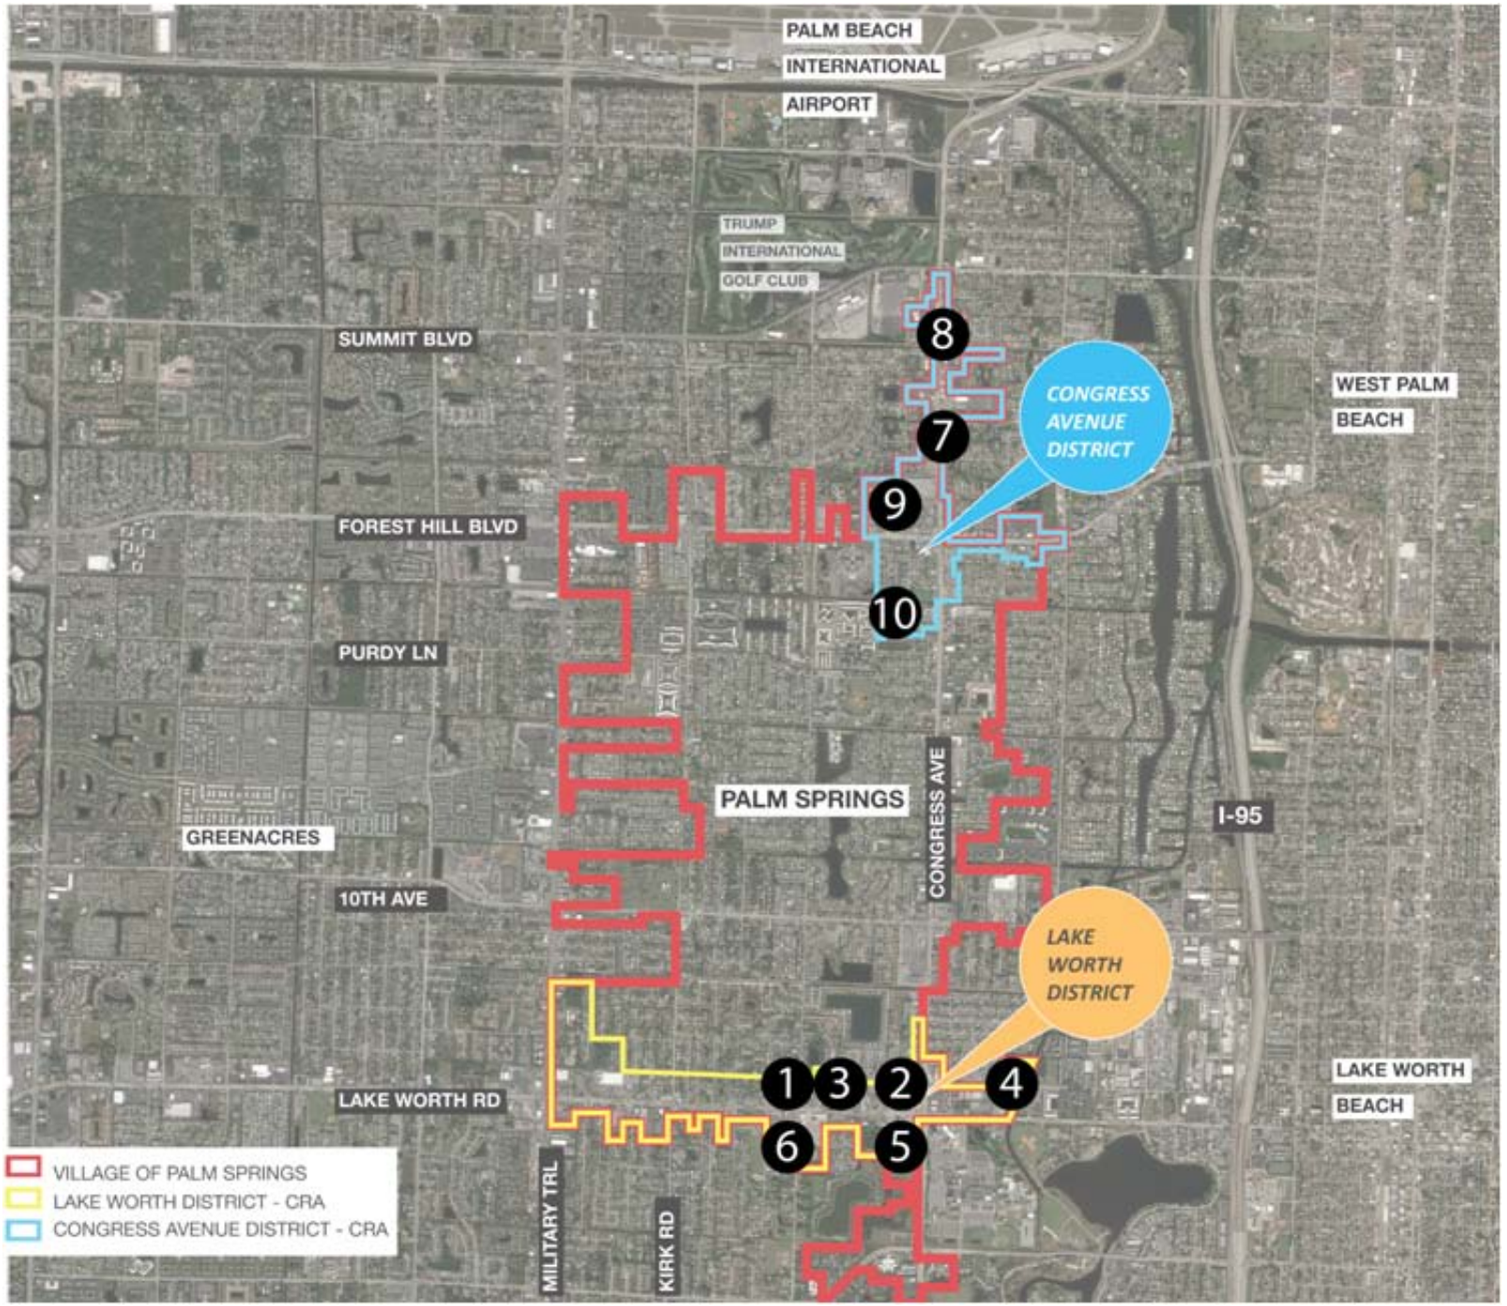
Off Lease Only – Car Dealer – Congress Ave

Vacant Lot for Sale at Davis Rd and 2nd Ave

Vacant Lot for Sale at 2nd Ave and E-4 Canal

Swap Shop – Lake Worth Rd

Oxygen Development – Congress Ave



Palm Beach State College – Lake Worth Rd and Congress Ave

Redevelopment Opportunity Sites

Potential economic development and redevelopment projects in Palm Springs include:

1. **Triangle Area** – Mixed use main street redevelopment – Destination
2. **2nd Avenue and Congress Avenue** – Infill development – Live/work or Office
3. **2nd Avenue and Davis Road** – Infill development
4. **2nd Avenue and Canal** – Multifamily development – housing diversity
5. **Lake Worth Road near Congress Avenue** – SW corner – Institutional development – Office/ commercial
6. **Flea Market** property and adjacent overflow parking
7. **Congress Avenue** – Mixed Use vacant land – Live/work - Commercial corridor
8. **Congress Avenue and Holly Road** – Commercial development
9. **Congress Avenue and Forest Hill Boulevard (Oxygen Site)** - Master Planned District Development – Destination
10. **YMCA Site** – High Density Residential – Destination –This site is currently in Planning.

APPENDIX 3

Select Best Practice Project Examples

1

Neighborhood Walkability: *Infrastructure Improvements*

The Artwalk in Coral Springs, Florida is linear walking path with public art installations, seating, landscaping, infrastructure for public events, and streetscaping. The project originated with the Coral Springs Community Redevelopment Agency's downtown redevelopment focus. The resulting project is a recreational amenity for residents and visitors.
ArtWalk - City of Coral Springs

2

Complete Streets: *Infrastructure Improvements*

The City of Hollywood, Florida implemented a $7.6 million Completes Street corridor redesign project through a grant from the Broward Metropolitan Planning Organization. The goal was to improve safety and strengthen commercial activity for residents, visitors, and business owners.
https://www.safestreetssummit.org/2021-safe-streets-awards-nominees

3

Healthy Housing Mix: *Infrastructure Improvements*

Lazul North Miami Beach is located along a canal in North Miami Beach, the area's Community Redevelopment agency partnered with the developer to provide a public recreational amenity through a public access easement and the development of a landscaped canal-side walking path for the entire community.
North Miami Beach Apartments | Home | Lazul Apartments (livelazul.com)

4

Retail Center Development: *Retail /Housing / Business Attraction and Recruitment*

The Promenade at Coconut Creek is an open-air shopping center, in Coconut Creek, Florida was designed with a downtown layout in mind. It was completed in 2008 and contained retail, restaurant, and office space. Additional amenities, including a movie-theatre, were added later. The center serves as a gathering space and hosts annual community events.
Promenade at Coconut Creek
MainStreet | Economic Development (coconutcreek.net)

5

Destination Markets, Farmers' Markets, and Flea Markets: *Placemaking*

More and more, the public, planners, entrepreneurs, and public officials are learning that markets provide an opportunity to stimulate the local economy, revitalize neighborhoods, provide job opportunities for new immigrants, create socially inclusive spaces and enhance the health of the community. The key is leveraging the brand of well-known markets. They are popular local destinations, and many become significant visitor attractions.

State Farmers' Markets in Florida - Florida Department of Agriculture & Consumer Services (fdacs.gov)

APPENDIX 4

CRA Boundary Determinations and Legal Descriptions

In 2019, in order for the Village of Palm Springs to exercise the community redevelopment authority that is granted within Chapter 163, Part III, Florida Statutes, a study or Finding of Necessity (FON) was completed for each of the two (2) identified sub-areas or districts (Congress Avenue, generally north of Forest Hill Boulevard, and Lake Worth Road, between Military Trail and the E-4 Keller Canal). These studies were developed/supported with data and analysis and determined that existing conditions within the study areas are considered slum and/or blight. Such conditions include, but are not limited to, deteriorating structures, infrastructure deficiencies, traffic hazards, faulty lot layout or antiquated building density patterns leading to development hardships or underutilized properties, unsafe conditions, high vacancy rates and crime incidents or fire/emergency calls higher than the rest of the Village. This CRA Plan Update does not provide for the modification of previously approved CRA boundaries.

LEGAL DESCRIPTION

CONGRESS AVENUE DISTRICT, PALM SPRINGS CRA

A parcel of land lying in Sections 5, 6, 7, 8, and 18, Township 44 South, Range 43 East, Palm Beach County, Florida, described as follows:

BEGINNING at the Southwest corner of Tract "A" _of the Plat of CHILDREN'S HOME SOCIETY, MUPD, according to the plat thereof as recorded in Plat Book 97, Pages 49 and 50 of the Public Records of Palm Beach County, Florida; said Southwest corner lying on the North right-of-way line of Forest Hill Boulevard (120 feet wide);

run thence Northerly, along said Westerly line of Tract "A", to the Northerly line of said Tract "A";

thence Easterly along said Northerly right-of-way line of Forest Hill Boulevard to the Westerly right-of-way line of Florida Mango Road;
thence Southerly, across Forest Hill Boulevard along the Westerly right-of-way line of Florida Mango Road to the Southerly right-of-way line of Forest Hill Boulevard;
thence Westerly along said Southerly right-of-way line of Forest Hill Boulevard to the Easterly line of lands described in Official Record Book 12073 Page 556 of the Public Records of Palm Beach County, Florida;
thence Southerly along said Easterly line to the Southerly line of Parcel 1 of lands described in Official Record Book 26535, Page 1743, Public Records of Palm Beach County, Florida;
thence Westerly along the Southerly line of said Parcel 1 to the Westerly line of said Parcel 1;
thence Northerly along the Westerly line of said Parcel 1 to the Southerly right-of-way line of Nelson Drive;
thence Easterly along the Southerly right-of-way line of Nelson Drive to the Easterly terminus of Nelson Drive;
thence Northerly along the Easterly terminus of Nelson Drive to the Northerly right-of-way line of Nelson Drive;
thence Westerly along the Northerly right-of–way line of Nelson Drive to its intersection with the Easterly right-of-way line of Prairie Road;
thence Northerly along the Easterly right of way line of Prairie Road to the Easterly extension of the North line of Lot 5 Block 7, of the plat of MEADOW PARK as recorded in Plat Book 22, Page 7 of the Public Records of Palm Beach County, Florida;
thence Westerly, along the Northerly line of said Lot 5, Block 7 and its Easterly and Westerly extensions, to the Westerly right-of-way line of Choctaw Road;
thence Southerly, along said Westerly right-of-way line of Choctaw Road to the Easterly extension of the North line of lands described in Official Record Book 24912, Page 232 of the Public Records of Palm Beach County, Florida;
thence Westerly, along said North line and its Easterly extension to the Westerly line of lands described in Official Record Book 24912, Page 323 of the Public Records of Palm Beach County, Florida;
thence Southerly along the Westerly line of lands described in Official Records Book 24912, Page 323 to the Northerly line of lands described in Official Records Book 26649, Page 23, of the Public Records of Palm Beach County, Florida;
thence Westerly, along said Northerly line to the Northwest corner of said lands described in said Official Records Book 26649, Page 23 Public Records of Palm Beach County, Florida;

thence Southerly along said Westerly line and its Southerly extension to the Southerly right-of-way line of Apalachee Road;
thence Easterly along the Southerly right-of-way line of Apalachee Road to the Westerly line of that certain 20 foot wide Service Alley adjoining Tracts "A and "B" _shown on the plat of CONGRESS HEIGHTS as recorded in Plat Book 25, Page 192 Public Records of Palm Beach County, Florida;
thence Southerly along said Westerly line to the Northerly line of the Lake Worth Drainage District's L-8 Canal;
thence Westerly along said Northerly line and it's Westerly extension to the Westerly right-of-way line of South Congress Avenue;
thence Southerly along said Westerly right-of-way line of South Congress Avenue to the Northerly line of The Lodges of South Congress Avenue, a Condominium, as recorded in Official Record Book 4966, Page 1233, Public Records of Palm Beach County, Florida;
thence Westerly, along the Northerly line of said THE LODGES OF SOUTH CONGRESS AVENUE, a Condominium, to the Westerly property line of said THE LODGES OF SOUTH CONGRESS AVENUE, a Condominium;

thence Southerly, along said Westerly line, to the Northerly line of Block 1, FROST PARK, according to the plat thereof as recorded in Plat Book 23, Page 188 of the Public Records of Palm Beach County, Florida;
thence Westerly, along said Northerly line of Block 1, and the Northerly line of Block A of said Plat of FROST PARK, to the Northeasterly corner of that parcel of land described in Official Record Book 5019, Page 1771 of the Public Records of Palm Beach County, Florida;
thence Southerly, along the Easterly line of that parcel of land described in Official Record Book, 5019, Page 1771, to the Southeasterly corner of that parcel of land described in Official Record Book 5019, Pg. 1771;
thence Westerly along the Southerly line of that parcel of land described in Official Record Book 5019, Pg. 1771 to the Southwest corner thereof;
thence Northerly along the Westerly lines of those two parcels of land described in Official Record Book. 5019, Page 1771 and Official Record Book 1693, Page 1273 its Northerly extension to the Northerly right-of-way line of the Lake Worth Drainage District's L-8 Canal;
thence Westerly along said Northerly right-of-way line of the Lake Worth Drainage District's L- 8 Canal to the Southwest corner of Fairview Villas Condominium as recorded in Official Record Book 2672, Page 1 and amended in Official Record Book 11735, Page 1390, Public Records of Palm Beach County Florida;
thence Northerly along the Westerly line of said Fairview Villas Condominium and its Northerly extension to the Northerly right-of-way line of Forest Hill Boulevard;
thence Westerly along the Northerly right-of-way line of Forest Hill Boulevard to the POINT OF BEGINNING.
LESS AND EXCEPTING THEREFROM said lands described in Official Records Book 13474, Page 668 of the Public Records of Palm Beach County, Florida.
Said herein described Congress Avenue District – _Palm Springs CRA containing 221.0 Acres more or less.

LEGAL DESCRIPTION

LAKE WORTH ROAD DISTRICT, PALM SPRINGS CRA

A parcel of land lying in Sections 19, 20 & 30 Township 44 South Range 43 East and in
Sections 24 & 25 Township 44 South, Range 42 East, Palm Beach County, Florida.
Beginning at the intersection of the Northerly right-of-way line of Lake Worth Road with the Westerly right-of-way line of South Congress Avenue, thence Southerly, along the Westerly right-of-way line of South Congress Avenue, to the Southerly line of Lot A, Block 32 of PALM BEACH FARMS CO. PLAT NO. 7, according to the plat thereof as recorded in Plat Book 5, Page 72 of the Public Records of Palm Beach County, Florida;
thence Westerly, along the Southerly line of said Lot A, Block 32, to the Northeast corner of Lot B, Block 31 of said PALM BEACH FARMS CO. PLAT NO. 7;
thence Southerly, along the Easterly line of said Lot B, Block 31, to the Southeast corner of said Lot B, Block 31;
thence Westerly, along the Southerly line of said Lot B, Block 31, to the Southwest corner of said Lot B, Block 31;
thence Northerly, along the Westerly line of said Lot B, Block 31, to the Easterly extension of the Southerly line of Lot A, Block 30 of said PALM BEACH FARMS CO. PLAT NO. 7;
thence Westerly, along said Easterly extension of the Southerly line of Lot A, Block 30 and along the Southerly line of Lot A, Block 30, to the Southerly right-of-way line of the Lake Worth Drainage District L-12 Canal;
thence Southwesterly, along said Southerly right-of-way line, to the centerline of that certain 30 foot wide roadway lying between Blocks 28 & 29 of said PALM BEACH FARMS CO. PLAT NO. 7;
thence Northerly, along said centerline, to the Easterly extension of the Southerly line of Lot A, Block 5 of said PALM BEACH FARMS CO. PLAT NO. 7;
thence Westerly, along said Easterly extension of the Southerly line of Lot A, Block 5 and along the Southerly line of Lot A, Block 5, to the Easterly right-of-way line of Mar Mak Drive;
thence Northerly, along the Easterly right-of-way line of Mar Mak Drive, to the Southerly right-of-way of line of Lake Worth Road;
thence Westerly, along the Southerly right-of-way line of Lake Worth Road, to the Westerly right-of-way line of Mar Mak Drive;
thence Southerly, along said Westerly right-of-way line of Mar Mak Drive, to the Southerly line of the North 216 feet of Block 6 of said PALM BEACH FARMS CO. PLAT NO. 7;

thence, Westerly along the Southerly line of the Northerly 216 feet of Block 6 and its Westerly extension, to the Westerly line of Block 6 of said PALM BEACH FARMS CO. PLAT NO. 7;
thence Northerly, along said Westerly line of Block 6 to the Southerly right-of-way line of Lake Worth Road;
thence Westerly along said Southerly right-of-way line of Lake Worth Road to the Easterly line of Block 7;
thence Southerly along the Easterly right-of-way lines of Blocks 7 and 26 of said PALM BEACH FARMS CO. PLAT NO. 7, to the Southeasterly corner of Lot C of said Block 26;
thence Westerly, along the Southerly line of said Lot C, Block 26 and along the Southerly line of Lot C, Block 25 of said PALM BEACH FARMS CO. PLAT NO. 7, to the Easterly right-of-way line of Davis Road;
thence Northerly, along the Easterly right-of-way line of Davis Road, to the Southerly right-of-way of Lake Worth Road;

thence Westerly along the Southerly right-of-way line of Lake Worth Road to the Westerly right-of-way line of Davis Road ;
thence Southerly along the Westerly right-of –way line of Davis Road to the Northeasterly corner of lands described in Official Record Book 13379, Page 498 of the Public records of Palm Beach County, Florida;
thence Westerly, along the Northerly line of said lands described in Official Record Book 13379, Page 498 of the Public Records of Palm Beach County, Florida, to the Northwesterly corner of said lands described in said Official Record Book 13379, Page 498;
thence Southerly, along said Westerly line of lands described in Officials Record Book 13379, Page 498 to the Northerly right-of-way line of the Lake Worth District's L- 12 Canal;
thence Westerly along said Northerly right -of-way line to the Easterly right-of-way line of Coconut Road;
thence Northerly, along the Easterly right-of-way line of Coconut Road to the South right-of-way line of Lake Worth Road;
thence Westerly, along said Southerly right-of-way line of Lake Worth Road to the Easterly line of lands described in Official Record Book 23455, Page 1724;
thence Southerly along said Easterly line to the Southeast corner thereof;
thence Westerly along the Southerly line of lands described in said Official Record Book 23455, Page 1724 to the Easterly line of lands described in Official Record Book 27416, Page 1568;
thence Southerly, Westerly and Northerly along the boundaries of said lands described in Official Record Book 27416, Page 1568 to the Southerly right-of-way line of Lake Worth Road;
thence Westerly along said Southerly right-of-way line of Lake Worth Road to the Northerly extension of the East line of lands described in Official Record Book 29124, Page 1085;
thence Southerly along said East line and its Northerly extension to the Southeast corner of lands described in Official Record Book 29124, Page 1085;
thence Westerly, and Northerly along the boundaries of lands described in Official Record Book 29124, Page 1085, to the Southerly right-of-way line of Lake Worth Road;
thence Westerly along said Southerly right-of-way line of Lake Worth Road to the Northeast corner of lands described in Official Record Book 25162, Page 175;
thence Southerly, Westerly and Northerly along the boundaries of said lands described in Official Records Book 25162, Page 175 to the Southerly right-of-way line of Lake Worth Road;
thence Westerly along said Southerly right-of-way line of Lake Worth Road to the Northerly extension of the Westerly right-of-way line of Kirk Road;
thence Southerly along the Westerly right-of-way line of Kirk Road to the Southeast corner of lands described in Official Record Book 10066, Page 1573 of the Public Records of Palm Beach County, Florida;
thence Westerly along the Southerly lines of lands described in said Official Record Book 10066, Page 1573 and Official Record Book 27513, Page 896 of the Public Records of Palm Beach County, Florida, to the Southwest corner of lands described in said Official Record Book 27513, Page 896;
thence Northerly, Westerly, and Northerly, to the Southerly right-of-way line of Lake Worth Road;
thence Westerly, along said Southerly right-of-way line, to the Northeast corner of lands described in Official Record Book 30559, Page 47 of the Public Records of Palm Beach County, Florida;
thence Southerly, Westerly and Northerly along the boundaries described in said Official Record Book 30559, Page 47 to the Southerly right-of-way line of Lake Worth Road;
thence Westerly, along said Southerly right-of-way line of Lake Worth Road to the Easterly line of lands described in Official Record Book 30707, Page 1892 Public Records of Palm Beach County, Florida;
thence Southerly, along the Easterly lines of those parcels of land described in Official Record Book 30707, Page 1892 to the Southeasterly corner thereof;
thence Westerly along the Southerly line of that parcel of land described in Official Record Book 30707, Page 1892 to the Southwest corner of said parcel;
thence Northerly along the Westerly line of the parcels described in said Official Record Book 30707, Page 1892 to the Southerly line of that certain parcel of land described in Official Record Book 30123, Page 59, Public Records of Palm Beach County Florida;
thence Westerly along said Southerly line to the Westerly line of lands described in Official Record Book 30123, Page 59;
thence Northerly along said Westerly line to the Southerly right-of-way line of Lake Worth Road;
thence Westerly along said Southerly right-of-way line to the Easterly line of that parcel of land described in Official Record Book 15021, Page 1441 of the Public Records of Palm Beach County, Florida;

thence Southerly along said Easterly line of lands described in Official Record Book 15021, Page 1441, to the Southerly line of lands described in Official Record Book 15021, Page 1441;
thence Westerly, along said Southerly line of lands described in Official Record Book 15021, Page 1441 to the Westerly line of lands described in Official Record Book 15021, Page 1441;

thence Northerly, along said Westerly line of lands described in Official Record Book 15021, Page 1441 to the Southerly line of that parcel of land described in Official Record Book 28718, Page 864, and its Easterly extension;
thence Westerly along said Southerly line of lands described in Official Record Book 28718, Page 864 to the Easterly right-of-way line of South Price Street;
thence Northerly along the Easterly right-of-way line of South Price Street to the Southerly right-of-way line of Lake Worth Road;
thence Westerly along said Southerly right-of-way line of Lake Worth Road to the Westerly right-of-way line of Price Street;
thence Southerly along said Westerly right-of-way line of South Price St. to the Northerly right-of-way line of Cross Street;
thence Westerly along said Northerly right-of-way line of Cross Street to the Easterly right-of-way line of Military Trail;
thence Northerly along the Easterly right-of-way line of Military Trail to the Southerly right-of-way line of Springfield Street;
thence Easterly along the Southerly right-of-way line of Springfield Street to the Easterly line of lands described in Official Record Book 28530, Page 1370;
thence Southerly along said Easterly line of lands described in Official Record Book 28530, Page 1370 and its Southerly extension to the Southerly right-of-way line of Lakewood Road;
thence Easterly along the Southerly right-of-way line of Lakewood Road to the Westerly right-of-way line of 43rd Dr. South;
thence Southerly along said Westerly right-of-way line of 43rd Dr. South to the Westerly extension of the Northerly line of lands described in Official Record Book 29979, Page 1901 of the Public Records of Palm Beach County, Florida;
thence Easterly to the Northeast corner of lands described in Official Record Book 29979, Page 1901, also being the Easterly line of the Plat of Mc. S Acres, as recorded in Plat Book 21, Page 81, Public Records of Palm Beach County, Florida;
said Easterly line also being the Easterly line of the West Half of the East Half of the Southeast Quarter of the Southeast Quarter of Section 24, Township 44 South, Range 42 East;
thence Southerly, along said Easterly line of the lands described in Official Record Book 29979, Page 1901 to the Northerly line of lands described in Official Record Book 29928, Page 662, Public Records of Palm Beach County, Florida;
thence Easterly along said Northerly line of lands described in Official Record Book 29928, Page 662 and its Easterly extension across Beverly Drive, to the Westerly line of lands described in Official Record Book 11605, Page 509;
thence Northerly along said Westerly line of lands described in Official Record Book 11605, Page 509 to the Northerly line of lands described in Official Records Book 11605, Page 509;
thence Easterly along said Northerly line to the Easterly line of lands described in Official Record Book 11605, Page 509;
thence Southerly along said Easterly line to the Northerly line of lands described in Official Record Book 27105, Page 638, Public Records of Palm Beach County Florida;
thence Easterly to a point on the Easterly right-of-way line of Kirk Road, said point also being the Northwest corner of lands described in Official Record Book 11182, Page 1779 Public Records of Palm Beach County, Florida;
thence Easterly, along the Northerly lines of lands described in Official Record Book 11182, Page 1779 and Official Record Book 27823, Page 780 to the Northeasterly corner of lands described in Official Record Book 27823, Page 780;
thence Northerly along the Westerly line of lands described in Official Record Book 2534, Page 377 to the Northwest Corner of lands described in said Official Record Book 2534, Page 377;
thence Easterly along the Northerly line of lands described in Official Record Book 2534, Page 377 to the Westerly right-of-way line of Serubi Avenue;
thence Northwesterly across Serubi Avenue to the Northwest corner of lands described in Official Record Book 25757, Page 1228;
thence Easterly along said Northerly line of lands described in Official Record Book 25757, Page 1228, to the Westerly line of lands described in said Official Record Book 25143, Page 314, Public Records of Palm Beach County Florida;
thence Northerly along said Westerly line to the Northwesterly corner of lands described in Official Record Book 25143, Page 314;
thence Easterly along the Northerly line of said lands described in Official Record Book 25143, Page 314 and across Corrigan Court, and along the North lines of lands described in Official Record Book 30509, Page 1289, and Official Record Book, 27235, Page 1781, and its Easterly extension to the Northeasterly corner of lands described in Official Record Book 11816, Page 1302 Public Records of Palm Beach County, Florida;
thence Northerly along the Westerly lines of lands described in Official Record Book 22880, Page 798, and Official Record Book 10507 Page 700 to the Northwesterly corner of lands described in Official Record Book 10507, Page 700;
thence Easterly along said Northerly line of lands described in Official Record Book 10507, Page 700 to the Westerly right-of-way line of Davis Road;
thence Southerly along the Westerly right-of-way line of Davis Road to the Westerly extension of the Northerly line of the lands described in Official Record Book 15838, Page 1636 ;
thence Easterly along said Northerly line of lands described in Official Record Book 15838, Page 1636 and its Westerly extension to the Westerly line of lands described in Official Record Book 29308, Page 1881;
thence Northerly along said Westerly line to the Northwesterly corner of lands described in Official Record Book 29308, Page 1881;

thence Easterly along the Northerly line of lands described in Official Record Book 29308 Page 1881 to the Northeasterly corner of said lands described in Official Record Book 29308 Page1881;
thence Southerly along the Easterly line of lands described in Official Record Book 29308, Page 1881, to the Southerly right-of-way line of 2nd Avenue North;
thence Northeasterly and Easterly along the Southerly right–of–way line of 2nd. Avenue North to the Southerly extension of the Easterly right-of-way line of Elizabeth Street;
thence Northerly along the Easterly right-of-way line of Elizabeth Street and its Southerly extension, to the Northwesterly corner of lands described in Official Record Book 24336, Page 812, Public Records of Palm Beach County, Florida;
thence Easterly along said Northerly line and its Easterly extension to the Easterly right-of-way line of Riedel Avenue;
thence Northerly along said Easterly right-of-way line of Riedel Avenue to the Northerly right-of-way line of Scanlan Avenue;
thence Easterly along the Northerly right-of-way line of Scanlan Avenue to the Westerly right-of-way line of South Congress Avenue;
thence Southerly along said Westerly right-of-way line of South Congress Avenue to its intersection with the Westerly extension of Northerly line of lands described in Official Record Book 27864, Page 24, Public Records of Palm Beach County, Florida;
thence Easterly along said Northerly line of lands described in Official Record Book 27864, Page 24, and its Westerly extension, to the Northeast Corner of said lands described in Official Record Book 27864, Page 24;
thence Southerly along the Easterly line of lands described in Official Record Book 27864, Page 24 and its Southerly extension to the Southerly right-of-way line of 2nd Avenue North;
thence Easterly along the Southerly right-of-way line of 2nd. Avenue North to the Southerly extension of the Easterly line of Block 19 of the plat of Englewood Manor as recorded in Plat Book 24, Page 52, of the Public Records of Palm Beach County, Florida;
thence Northerly along said Easterly line of said Block19 and its Southerly extension to the Southerly line of that certain 30 foot alley shown on said plat of Englewood Manor;
thence Easterly along said Southerly right- of- way line of said 30 foot wide alley to the Westerly right-of-way line of the 200 foot wide Lake Worth Drainage District's E-4 Canal;
thence Southeasterly along the Westerly right- of-way line of said 200 foot wide Lake Worth Drainage District's E-4 Canal to the Southerly right-of-way line of 2nd Avenue North;
thence continue Easterly and Southwesterly along said Lake Worth Drainage District's E-4 canal right-of-way (110 ft. wide) to the Northerly right-of-way line of Lake Worth Road;
thence Westerly along said Northerly right-of-way line of Lake Worth Road to the POINT OF BEGINNING.
LESS AND EXCEPTING THEREFROM said lands described in Official Record Book 28707 Page 20 and Official Record Book 12607, Page 1070 of the Public Records of Palm Beach County, Florida.
Said herein described Lake Worth Road District – _Palm Springs CRA containing 291.0 Acres more or less.

Florida Statutes Title XI Chapter 163 Requirements

Section 163.361 Modification of community redevelopment plans.

(1) If at any time after the approval of a community redevelopment plan by the governing body it becomes necessary or desirable to amend or modify such plan, the governing body may amend such plan upon the recommendation of the agency. The agency recommendation to amend or modify a redevelopment plan may include a change in the boundaries of the redevelopment area to add land to or exclude land from the redevelopment area, or may include the development and implementation of community policing innovations. ***This CRA Plan Update does not include boundary changes.***

Section 163.362 Contents of community redevelopment plan.

(1) Contain a legal description of the boundaries of the community redevelopment area and **the reasons for establishing such boundaries** shown in the plan. ***See Appendix: CRA Boundary Determinations and Legal Descriptions. This CRA Plan Update does not include boundary changes.***

(2) Show by diagram and in general terms:

(a) The approximate amount of open space to be provided and the street layout.
See Section: Executive Summary – Land Use and Zoning Map.

(b) Limitations on the type, size, height, number, and proposed use of buildings.
See Appendix: Market Assessment, Section E. Regulatory Review.

(c) The approximate number of dwelling units.
See Appendix: Market Assessment, Section A. Real Estate Analysis.

(d) Such property as is intended for use as public parks, recreation areas, streets, public utilities, and public improvements of any nature. ***See Section: Executive Summary – Land Use Map.***

(3) If the redevelopment area contains low- or moderate-income housing, contain a neighborhood impact element which describes in detail the impact of the redevelopment upon the residents of the redevelopment area and the surrounding areas in terms of relocation, traffic circulation, environmental quality, availability of community facilities and services, effect on school population, and other matters affecting the physical and social quality of the neighborhood. ***See Section: Neighborhood Impact.***

(4) Identify specifically any publicly funded capital projects to be undertaken within the community redevelopment area. ***See Section: External Agency Projects.***

(5) Contain adequate safeguards that the work of redevelopment will be carried out pursuant to the plan. ***See Section: Goals, Objectives, and Strategies and Section: Implementation Plan.***

(6) Provide for the retention of controls and the establishment of any restrictions or covenants running with land sold or leased for private use for such periods of time and under such conditions as the governing body deems necessary to effectuate the purposes of this part. ***See Section: Executive Summary – Land Use Map: The County governs land development regulations and zoning.***

(7) Provide assurances that there will be replacement housing for the relocation of persons temporarily or permanently displaced from housing facilities within the community redevelopment area. ***See Section: Neighborhood Impact - Relocation.***

(8) Provide an element of residential use in the redevelopment area if such use exists in the area prior to the adoption of the plan or if the plan is intended to remedy a shortage of housing affordable to residents of low or moderate income, including the elderly, or if the plan is not intended to remedy such shortage, the reasons therefore. ***See Section: Goals, Objectives, and Strategies.***

(9) Contain a detailed statement of the projected costs of the redevelopment, including the amount to be expended on publicly funded capital projects in the community redevelopment area and any indebtedness of the community redevelopment agency, the county, or the municipality proposed to be incurred for such redevelopment if such indebtedness is to be repaid with increment revenues. ***See Section: Proposed Five-Year Capital and Operating Budgets.***

(10) Provide a time certain for completing all redevelopment financed by increment revenues. Such time certain shall occur no later than 30 years after the fiscal year in which the plan is approved, adopted, or amended pursuant to s. 163.361(1). However, for any agency created after July 1, 2002, the time certain for completing all redevelopment financed by increment revenues must occur within 40 years after the fiscal year in which the plan is approved or adopted.
See Section: Proposed Five-Year Capital and Operating Budgets.

Section 163.370 Powers; counties and municipalities; community redevelopment agencies.

(1) Counties and municipalities may not exercise the power of eminent domain for the purpose of preventing or eliminating a slum area or blighted area as defined in this part; however, counties and municipalities may acquire property by eminent domain within a community redevelopment area, subject to the limitations set forth in ss. 73.013 and 73.014 or other general law.

(2) Every county and municipality shall have all the powers necessary or convenient to carry out and effectuate the purposes and provisions of this part, including the following powers in addition to others herein granted:

(a) To make and execute contracts and other instruments necessary or convenient to the exercise of its powers under this part.

(b) To disseminate slum clearance and community redevelopment information.

(c) To undertake and carry out community redevelopment and related activities within the community redevelopment area, which may include:

1. Acquisition of property within a slum area or a blighted area by purchase, lease, option, gift, grant, bequest, devise, or other voluntary method of acquisition.

2. Demolition and removal of buildings and improvements.

3. Installation, construction, or reconstruction of streets, utilities, parks, playgrounds, public areas of major hotels that are constructed in support of convention centers, including meeting rooms, banquet facilities, parking garages, lobbies, and passageways, and other improvements necessary for carrying out in the community redevelopment area the community redevelopment objectives of this part in accordance with the community redevelopment plan.

4. Disposition of any property acquired in the community redevelopment area at its fair value as provided in s. 163.380 for uses in accordance with the community redevelopment plan.

5. Carrying out plans for a program of voluntary or compulsory repair and rehabilitation of buildings or other improvements in accordance with the community redevelopment plan.

6. Acquisition by purchase, lease, option, gift, grant, bequest, devise, or other voluntary method of acquisition of real property in the community redevelopment area which, under the community redevelopment plan, is to be repaired or rehabilitated for dwelling use or related facilities, repair or rehabilitation of the structures for guidance purposes, and resale of the property.

7. Acquisition by purchase, lease, option, gift, grant, bequest, devise, or other voluntary method of acquisition of any other real property in the community redevelopment area when necessary to eliminate unhealthful, unsanitary, or unsafe conditions; lessen density; eliminate obsolete or other uses detrimental to the public welfare; or otherwise to remove or prevent the spread of blight or deterioration or to provide land for needed public facilities.

8. Acquisition, without regard to any requirement that the area be a slum or blighted area, of air rights in an area consisting principally of land in highways, railway or subway tracks, bridge or tunnel entrances, or other similar facilities which have a blighting influence on the surrounding area and over which air rights sites are to be developed for the elimination of such blighting influences and for the provision of housing (and related facilities and uses) designed specifically for, and limited to, families and individuals of low or moderate income.

9. Acquisition by purchase, lease, option, gift, grant, bequest, devise, or other voluntary method of acquisition of property in unincorporated enclaves surrounded by the boundaries of a community redevelopment area when it is determined necessary by the agency to accomplish the community redevelopment plan.

10. Construction of foundations and platforms necessary for the provision of air rights sites of housing (and related facilities and uses) designed specifically for, and limited to, families and individuals of low or moderate income.

(d) To provide, or to arrange or contract for, the furnishing or repair by any person or agency, public or private, of services, privileges, works, streets, roads, public utilities, or other facilities for or in connection with a community redevelopment; to install, construct, and reconstruct streets, utilities, parks, playgrounds, and other public improvements; and to agree to any conditions that it deems reasonable and appropriate which are attached to federal financial assistance and imposed pursuant to federal law relating to the determination of prevailing salaries or wages or compliance with labor standards, in the undertaking or carrying out of a community redevelopment and related activities, and to include in any contract let in connection with such redevelopment and related activities provisions to fulfill such of the conditions as it deems reasonable and appropriate.

(e) Within the community redevelopment area:

1. To enter into any building or property in any community redevelopment area in order to make inspections, surveys, appraisals, soundings, or test borings and to obtain an order for this purpose from a court of competent jurisdiction in the event entry is denied or resisted.

2. To acquire by purchase, lease, option, gift, grant, bequest, devise, or other voluntary method of acquisition any personal or real property, together with any improvements thereon.

3. To hold, improve, clear, or prepare for redevelopment any such property.

4. To mortgage, pledge, hypothecate, or otherwise encumber or dispose of any real property.

5. To insure or provide for the insurance of any real or personal property or operations of the county or municipality against any risks or hazards, including the power to pay premiums on any such insurance.

6. To enter into any contracts necessary to effectuate the purposes of this part.

7. To solicit requests for proposals for redevelopment of parcels of real property contemplated by a community redevelopment plan to be acquired for redevelopment purposes by a community redevelopment agency and, as a result of such requests for proposals, to advertise for the disposition of such real property to private persons pursuant to s. 163.380 prior to acquisition of such real property by the community redevelopment agency.

(f) To invest any community redevelopment funds held in reserves or sinking funds or any such funds not required for immediate disbursement in property or securities in which savings banks may legally invest funds subject to their control and to redeem such bonds as have been issued pursuant to s. 163.385 at the redemption price established therein or to purchase such bonds at less than redemption price, all such bonds so redeemed or purchased to be canceled.

(g) To borrow money and to apply for and accept advances, loans, grants, contributions, and any other form of financial assistance from the Federal Government or the state, county, or other public body or from any sources, public or private, for the purposes of this part and to give such security as may be required and to enter into and carry out contracts or agreements in connection therewith; and to include in any contract for financial assistance with the Federal Government for or with respect to community redevelopment and related activities such conditions imposed pursuant to federal laws as the county or municipality deems reasonable and appropriate which are not inconsistent with the purposes of this part.

(h) To make or have made all surveys and plans necessary to the carrying out of the purposes of this part; to contract with any person, public or private, in making and carrying out such plans; and to adopt or approve, modify, and amend such plans, which plans may include, but are not limited to:

1. Plans for carrying out a program of voluntary or compulsory repair and rehabilitation of buildings and improvements.

2. Plans for the enforcement of state and local laws, codes, and regulations relating to the use of land and the use and occupancy of buildings and improvements and to the compulsory repair, rehabilitation, demolition, or removal of buildings and improvements.

3. Appraisals, title searches, surveys, studies, and other plans and work necessary to prepare for the undertaking of community redevelopment and related activities.

(i) To develop, test, and report methods and techniques, and carry out demonstrations and other activities, for the prevention and the elimination of slums and urban blight and developing and demonstrating new or improved means of providing housing for families and persons of low income.

(j) To apply for, accept, and utilize grants of funds from the Federal Government for such purposes.

(k) To prepare plans for and assist in the relocation of persons (including individuals, families, business concerns, nonprofit organizations, and others) displaced from a community redevelopment area and to make relocation payments to or with respect to such persons for moving expenses and losses of property for which reimbursement or compensation is not otherwise made, including the making of such payments financed by the Federal Government.

(l) To appropriate such funds and make such expenditures as are necessary to carry out the purposes of this part; to zone or rezone any part of the county or municipality or make exceptions from building regulations; and to enter into agreements with a housing authority, which agreements may extend over any period, notwithstanding any provision or rule of law to the contrary, respecting action to be taken by such county or municipality pursuant to any of the powers granted by this part.

(m) To close, vacate, plan, or replan streets, roads, sidewalks, ways, or other places and to plan or replan any part of the county or municipality.

(n) To organize, coordinate, and direct the administration of the provisions of this part, as they may apply to such county or municipality, in order that the objective of remedying slum and blighted areas and preventing the causes thereof within such county or municipality may be most effectively promoted and achieved and to establish such new office or offices of the county or municipality or to reorganize existing offices in order to carry out such purpose most effectively.

(o) To develop and implement community policing innovations.

(3) The following projects may not be paid for or financed by increment revenues:

(a) Construction or expansion of administrative buildings for public bodies or police and fire buildings, unless each taxing authority agrees to such method of financing for the construction or

expansion, or unless the construction or expansion is contemplated as part of a community policing innovation.

(b) Installation, construction, reconstruction, repair, or alteration of any publicly owned capital improvements or projects if such projects or improvements were scheduled to be installed, constructed, reconstructed, repaired, or altered within 3 years of the approval of the community redevelopment plan by the governing body pursuant to a previously approved public capital improvement or project schedule or plan of the governing body which approved the community redevelopment plan unless and until such projects or improvements have been removed from such schedule or plan of the governing body and 3 years have elapsed since such removal or such projects or improvements were identified in such schedule or plan to be funded, in whole or in part, with funds on deposit within the community redevelopment trust fund.

(c) General government operating expenses unrelated to the planning and carrying out of a community redevelopment plan.

(4) With the approval of the governing body, a community redevelopment agency may:

(a) Prior to approval of a community redevelopment plan or approval of any modifications of the plan, acquire real property in a community redevelopment area by purchase, lease, option, gift, grant, bequest, devise, or other voluntary method of acquisition; demolish and remove any structures on the property; and pay all costs related to the acquisition, demolition, or removal, including any administrative or relocation expenses.

(b) Assume the responsibility to bear any loss that may arise as the result of the exercise of authority under this subsection, in the event that the real property is not made part of the community redevelopment area.

(5) A community redevelopment agency shall procure all commodities and services under the same purchasing processes and requirements that apply to the county or municipality that created the agency.

RE: Finding of Consistency – Palm Springs CRA Community Redevelopment Plan

Dear Honorable Mayor and Councilmembers:

The Local Planning Agency for the Village of Palm Springs considered the draft Palm Springs CRA Community Redevelopment Plan on September 8, 2021 and found it to be in conformance with the Village of Palm Springs Comprehensive Plan.

Sincerely,

Beverly Smith
Chair

RE: Notification of Intent to Modify Community Redevelopment Plan - Palm Springs CRA

Dear Honorable Mayor and Commissioners:

The Palm Springs Community Redevelopment Agency Board will be considering draft modifications to the Community Redevelopment Plan and transmitting its recommendations on Wednesday, September 8, 2021 at 6:30pm in the Council Chambers within Village Hall, located at 226 Cypress Lane, Palm Springs, Florida.

An effort was initiated last December to modify the Community Redevelopment Plan to incorporate economic and market analyses, to include additional stakeholders' input, and to refine strategies to promote reinvestment and revitalization within the CRA. The Palm Springs CRA Board's recommendations and the draft itself will be forwarded to your attention after its September 8th meeting.

It is anticipated that the Village Council will consider a modified Community Redevelopment Plan for the Palm Springs CRA on Thursday, **September 23, 2021** at 6:30 p.m.

We are thankful for our partnerships with the County and thank you for your ongoing support.

Sincerely,

Kim Glas-Castro, AICP LEED AP
Assistant Village Manager

Village of Palm Springs

Executive Brief

AGENDA DATE: September 23, 2021

DEPARTMENT: Administration

ITEM 9.3: Ordinance No. 2021-10 - Establish FY 2021-2022 Millage Rates - Operating & Debt Service *(SECOND READING)*

SUMMARY:

The Village Council is requested to establish the final operating and debt service millage (property tax) rates for the Village of Palm Springs for the upcoming Fiscal Year (FY22) beginning October 1, 2021, and ending September 30, 2022. Additionally, the Council is requested to consider certifying the Village's taxable values to the PBC Property Appraiser as well as other related financial information:

- The gross taxable value for all properties within the Village for FY 2022 is $1,485,175,520 - an increase of $51,106,897 over FY 2021
- The rolled-back rate is calculated at $3.4042 per 1,000 of taxable value
- The Village's proposed FY 2022 operating millage for the General Fund is $3.50 per $1,000 of the taxable value or an increase of 2.81% over the rolled-back rate (At 100% collection, the operating millage is expected to generate $5,198,114 in ad-valorem tax revenue; however, the Village budgets at a 96% collection ratio; thus, the proposed budgeted revenue is expected to be $4,990,190).
- The total taxable value within the Village to calculate the debt service millage rate is $1,488,367,161; thus, the proposed millage rate required to pay the Village's general obligation debt for FY 2022 is $0.2994 per $1,000 of taxable value
- The gross taxable increment value for Palm Springs Community Redevelopment Agency (CRA) for FY 2022 is $26,227,102. This is the second year that the Palm Springs CRA will receive TIF funding from both the Village of Palm Springs and Palm Beach County at the Village's approved millage rate - proposed $3.50 per $1,000 of taxable value (At 100% collection, the total increment/revenue expected to be generated is $183,590; however, the Village budgets at a 95% collection ratio; thus, the proposed budgeted increment/revenue is expected to be $174,410).

- The proposed operating millage rate of $3.5000 per $1,000 of assessed valuation and the voted debt service millage rate of $0.2994 per $1,000 of taxable value provide for a total millage rate of $3.7994
- The combined proposed millage rates for FY 2022 (3.5000 operating + 0.2994 debt = 3.7994 total mills) is 0.0110 mills lower than the combined approved millage rates for FY 2021 (3.5000 operating + 0.3104 debt = 3.8104 total mills)

As a result, the proposed Ordinance establishes the final millage rates for the Fiscal Year 2022.

The proposed total millage rate is proposed to be decreased for the 9th consecutive year, with the operating rate proposed to remain constant, and the debt service rate is expected to be decreased in FY 2022.

The proposed ordinance was approved by the Village Council on September 8, 2021, and is being presented for consideration on the 2nd and final reading.

Note: Following final approval, staff will submit the required Form DR-420 - Certification of Taxable Value and the Form DR- 420Debt - Certification of Voted Debt Millage to the PBC Property Appraiser, the PBC Tax Collector and, the State of Florida.

FISCAL IMPACT:

The proposed total millage rate is proposed to be decreased for the 9th consecutive year, with the proposed operating rate to remain constant and the debt service rate is expected to be decreased in FY 2022.

The combined proposed millage rates for FY 2022 (3.5000 operating + 0.2994 debt = 3.7994 total mills) is 0.0110 mills lower than the combined approved millage rates for FY 2021 (3.5000 operating + 0.3104 debt = 3.8104 total mills).

The gross taxable increment value for the newly created Palm Springs Community Redevelopment Agency (CRA) for FY 2022 is $26,227,102. This is the second year that the Palm Springs CRA will receive TIF funding from both the Village of Palm Springs and Palm Beach County at the Village's approved millage rate - proposed $3.50 per $1,000 of taxable value (At 100% collection, the total increment/revenue expected to be generated is $183,590; however, the Village budgets at a 95% collection ratio; thus, the proposed budgeted increment/revenue is expected to be $174,410).

ATTACHMENTS:

ORDINANCE NO. 2021-10

AN ORDINANCE OF THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA, ADOPTING THE FINAL LEVY OF AD VALOREM TAXES IN AND FOR THE VILLAGE OF PALM SPRINGS, FLORIDA FOR FISCAL YEAR 2021/2022; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the Village Council of the Village of Palm Springs, Florida adopted Fiscal Year 2021 / 2022 final millage rates following a public hearing as required by Florida Statute 200.065; and

WHEREAS, the Village of Palm Springs, Florida, held public hearings as required by Florida Statute 200.065; and

WHEREAS, the real property tax roll for the current calendar year has been certified by the Palm Beach County Property Appraiser for nonexempt valuation of $1,410,052,742 and the tangible personal property for nonexempt valuation of $75,122,778, for a total gross taxable value for operating purposes of $ 1,485,175,520.

NOW THEREFORE BE IT ORDAINED BY THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA, AS FOLLOWS:

Section 1. The Fiscal Year 2021/2022 operating millage rate for the Village of Palm Springs is hereby levied in the amount of $3.5000 mills which is 2.81% increase over the rolled-back rate of $3.4042. The general obligation debt service millage rate is hereby levied in the amount of $0.2994 mills, for a total of $3.7994 mills of nonexempt valuation of real and personal property within the Village.

Section 2. Repeal of Conflicting Ordinances. All Ordinances, Resolutions or parts of Ordinances and Resolutions in conflict herewith are hereby repealed.

Section 3. Severability. If any word, clause, sentence, paragraph, section, or part thereof contained in this Ordinance is declared to be unconstitutional, unenforceable, void, or inoperative by a court of competent jurisdiction, such declaration shall not affect the validity of the remainder of this ordinance.

Section 4. Effective Date. This ordinance shall become effective immediately upon adoption.

Council Member _____ offered the foregoing Ordinance and moved for adoption. The motion was seconded by Council Member_____, and upon being put to a vote, the vote was as follows:

Instructions on page 3

CERTIFICATION OF TAXABLE VALUE
INSTRUCTIONS

"Principal Authority" is a county, municipality, or independent special district (including water management districts).

"Taxing Authority" is the entity levying the millage. This includes the principal authority, any special district dependent to the principal authority, any county municipal service taxing unit (MSTU), and water management district basins.

Each taxing authority must submit to their property appraiser a DR-420 and the following forms, as applicable:

- DR-420TIF, Tax Increment Adjustment Worksheet
- DR-420DEBT, Certification of Voted Debt Millage
- DR-420MM-P, Maximum Millage Levy Calculation - Preliminary Disclosure

Section I: Property Appraiser

Use this DR-420 form for all taxing authorities except school districts. Complete Section I, Lines 1 through 9, for each county, municipality, independent special district, dependent special district, MSTU, and multicounty taxing authority. Enter only taxable values that apply to the taxing authority indicated. Use a separate form for the principal authority and each dependent district, MSTU and water management district basin.

Line 8

Complete a DR-420TIF for each taxing authority making payments to a redevelopment trust fund under Section 163.387 (2)(a), Florida Statutes or by an ordinance, resolution or agreement to fund a project or to finance essential infrastructure.

Check "Yes" if the taxing authority makes payments to a redevelopment trust fund. Enter the number of DR-420TIF forms attached for the taxing authority on Line 8. Enter 0 if none.

Line 9

Complete a DR-420DEBT for each taxing authority levying either a voted debt service millage (s.12, Article VII, State Constitution) or a levy voted for two years or less (s. 9(b), Article VII, State Constitution).

Check "Yes" if the taxing authority levies either a voted debt service millage or a levy voted for 2 years or less (s. 9(b), Article VII, State Constitution). These levies do not include levies approved by a voter referendum not required by the State Constitution. Complete and attach DR-420DEBT. Do not complete a separate DR-420 for these levies.

Send a copy to each taxing authority and keep a copy. When the taxing authority returns the DR-420 and the accompanying forms, immediately send the original to:

Florida Department of Revenue
Property Tax Oversight - TRIM Section
P. O. Box 3000
Tallahassee, Florida 32315-3000

Section II: Taxing Authority

Complete Section II. Keep one copy, return the original and one copy to your property appraiser with the applicable DR-420TIF, DR-420DEBT, and DR-420MM-P within 35 days of certification. Send one copy to the tax collector. "Dependent special district" (ss. 200.001(8)(d) and 189.403(2), F.S.) means a special district that meets at least one of the following criteria:

- The membership of its governing body is identical to that of the governing body of a single county or a single municipality.
- All members of its governing body are appointed by the governing body of a single county or a single municipality.
- During their unexpired terms, members of the special district's governing body are subject to removal at will by the governing body of a single county or a single municipality.
- The district has a budget that requires approval through an affirmative vote or can be vetoed by the governing body of a single county or a single municipality.

"Independent special district" (ss. 200.001(8)(e) and 189.403 (3), F.S.) means a special district that is not a dependent special district as defined above. A district that includes more than one county is an independent special district unless the district lies wholly within the boundaries of a single municipality.

"Non-voted millage" is any millage not defined as a "voted millage" in s. 200.001(8)(f), F.S.

Lines 12 and 14

Adjust the calculation of the rolled-back rate for tax increment values and payment amounts. See the instructions for DR-420TIF. On Lines 12 and 14, carry forward values from the DR-420TIF forms.

Line 24

Include only those levies derived from millage rates.

Complete and submit this form to the Department of Revenue with the completed DR-487, Certification of Compliance, within 30 days of the final hearing.

Instructions on page 3

MAXIMUM MILLAGE LEVY CALCULATION
FINAL DISCLOSURE
INSTRUCTIONS

General Instructions

Each of the following taxing authorities must complete a DR-420MM.

- County
- Municipality
- Special district dependent to a county or municipality
- County MSTU
- Independent special district, including water management districts
- Water management district basin

Voting requirements for millages adopted by a two-thirds or a unanimous vote are based on the full membership of the governing body, not on the number of members present at the time of the vote.

This form calculates the maximum tax levy for 2021 allowed under s. 200.065(5), F.S. Counties and municipalities, including dependent special districts and MSTUs, which adopt a tax levy at the final hearing higher than allowed under s. 200.065, F.S., may be subject to the loss of their half-cent sales tax distribution.

DR-420MM shows the maximum millages and taxes levied based on your adoption vote. Each taxing authority must complete, sign, and submit this form to the Department of Revenue with their completed DR-487, *Certification of Compliance*, within 30 days of their final hearing.

Taxing authorities must also submit DR-487V, *Vote Record for Final Adoption of Millage Levy*. This form certifies to the Department of Revenue the vote on the resolution or ordinance stating the millage rate adopted at the final hearing.

Specific tax year references in this form are updated each year by the Department.

Line Instructions

Lines 5-10

Only taxing authorities that levied a 2020 millage rate less than their maximum majority vote rate must complete these lines. The adjusted rolled-back rate on Line 10 is the rate that would have been levied if the maximum vote rate for 2020 had been adopted. If these lines are completed, enter the adjusted rate on Line 11.

Line 12

This line is entered by the Department of Revenue. The same adjustment factor is used statewide by all taxing authorities. It is based on the change in per capita Florida personal income (s. 200.001(8)(i), F.S.), which Florida Law requires the Office of Economic and Demographic Research to report each year.

Lines 13 and 14

Millage rates are the maximum that could be levied with a majority or two-thirds vote of the full membership of the governing body. With a unanimous vote of the full membership (three-fourths vote of the full membership if the governing body has nine or more members) or a referendum, the maximum millage rate that can be levied is the taxing authority's statutory or constitutional cap.

Line 16

Check the box for the minimum vote necessary at the final hearing to levy your adopted millage rate.

Line 17

Enter the millage rate indicated by the box checked in Line 16. If the adopted millage rate is equal to or less than the majority vote maximum millage rate, enter the majority vote maximum. If a two-thirds vote, a unanimous vote, or a referendum is required, enter the adopted millage rate. For a millage requiring more than a majority vote, the adopted millage rate must be entered on Line 17, rather than the maximum rate, so that the comparisons on Lines 21 through 25 are accurate.

Instructions on page 3

MAXIMUM MILLAGE LEVY CALCULATION
PRELIMINARY DISCLOSURE
INSTRUCTIONS

General Instructions

Each of the following taxing authorities must complete a DR-420MM-P.

- County
- Municipality
- Special district dependent to a county or municipality
- County MSTU
- Independent special district, including water management districts
- Water management district basin

Voting requirements for millages adopted by a two-thirds or a unanimous vote are based on the full membership of the governing body, not on the number of members present at the time of the vote.

This form calculates the maximum tax levy for 2021 allowed under s. 200.065(5), F.S. Counties and municipalities, including dependent special districts and MSTUs, which adopt a tax levy at the final hearing higher than allowed under s. 200.065, F.S., may be subject to the loss of their half-cent sales tax distribution.

DR-420MM-P shows the preliminary maximum millages and taxes levied based on your proposed adoption vote. Each taxing authority must complete, sign, and submit this form to their property appraiser with their completed DR-420, Certification of Taxable Value.

The vote at the final hearing and the resulting maximum may change. After the final hearing, each taxing authority will file a final Form DR-420MM, Maximum Millage Levy Calculation Final Disclosure, with Form DR-487, Certification of Compliance, with the Department of Revenue.

Specific tax year references in this form are updated each year by the Department.

Line Instructions

Lines 5-10

Only taxing authorities that levied a 2020 millage rate less than their maximum majority vote rate must complete these lines. The adjusted rolled-back rate on Line 10 is the rate that would have been levied if the maximum vote rate for 2020 had been adopted. If these lines are completed, enter the adjusted rate on Line 11.

Line 12

This line is entered by the Department of Revenue. The same adjustment factor is used statewide by all taxing authorities. It is based on the change in per capita Florida personal income (s. 200.001(8)(i), F.S.), which Florida Law requires the Office of Economic and Demographic Research to report each year.

Lines 13 and 14

Millage rates are the maximum that could be levied with a majority or two-thirds vote of the full membership of the governing body. With a unanimous vote of the full membership (three-fourths vote of the full membership if the governing body has nine or more members) or a referendum, the maximum millage rate that can be levied is the taxing authority's statutory or constitutional cap.

Line 16

Check the box for the minimum vote necessary at the final hearing to levy your adopted millage rate.

Line 17

Enter the millage rate indicated by the box checked in Line 16. If the proposed millage rate is equal to or less than the majority vote maximum millage rate, enter the majority vote maximum. If a two-thirds vote, a unanimous vote, or a referendum is required, enter the proposed millage rate. For a millage requiring more than a majority vote, the proposed millage rate must be entered on Line 17, rather than the maximum rate, so that the comparisons on Lines 21 through 25 are accurate.

Title : Richard R. Reade, Village Manager	Contact Name and Contact Title : Rebecca Morse, CFO	
Mailing Address :	Physical Address : 226 CYPRESS LANE	
City, State, Zip : PALM SPRINGS, FL 33461	Phone Number : 5619654010	Fax Number : 5619650899

TAX INCREMENT ADJUSTMENT WORKSHEET INSTRUCTIONS

Property appraisers must complete and sign Section I of this worksheet and provide it with form DR-420, *Certification of Taxable Value*, to all taxing authorities who make payments to a redevelopment trust fund under:

- s. 163.387(2)(a), Florida Statutes, or
- An ordinance, resolution, or agreement to fund a project or to finance essential infrastructure.

"Tax increment value" is the cumulative increase in taxable value from the base year to the current year within the defined geographic area. It is used to determine the payment to a redevelopment trust fund under:

- s. 163.387(1), F.S. or
- An ordinance, resolution, or agreement to fund a project or finance essential infrastructure. In this case, the taxing authority must certify the boundaries and beginning date to the property appraiser.

"Dedicated increment value" is the portion of the tax increment value used to determine the payment to the redevelopment trust fund. (See s. 200.001(8)(h), F.S.) Calculate the dedicated increment value on this form and enter on either Line 6b or Line 7e.

"Specific proportion," used to determine whether to complete Line 6 or Line 7, refers to the calculation of the tax increment payment. Examples:

- Example 1.

  Section.163.387(1), F.S., states the payment made by the taxing authority should equal 95% of the millage levied times the tax increment value. The specific proportion in this case is 95%. The ordinance providing for the payment may set a percentage lower than 95%. In these cases, the lower percentage would be the specific proportion.

- Example 2.

  Some required tax increment payments are not directly related to the tax increment value. A constant dollar payment is a payment not based on a specific proportion of the tax increment value. Line 7 converts these payments into a proportion based on the prior year's payment and tax increment value to reach the current year's dedicated increment value.

Section I: Property Appraiser

A. Complete Section I of this form for each county, municipality, independent special district, dependent special district, and MSTU that:

- Has a tax increment value and
- Is not exempted from making payments to a community redevelopment trust fund based on tax increments (s. 163.387(2)(c), F.S.).

If a taxing authority has more than one tax increment value, they must complete a separate form for each tax increment value. Send a copy to each taxing authority with the DR-420 and keep a copy. When the taxing authority returns the completed forms, immediately send the original to:

Florida Department of Revenue
Property Tax Oversight Program - TRIM Section
P. O. Box 3000
Tallahassee, Florida 32315-3000

B. Enter only tax increment values that apply to the value located within the taxing authority indicated.

Section II: Taxing Authority

Complete Section II of the form, keep one copy, and return the original and one copy to your property appraiser with DR-420 within 35 days of certification. Send one copy to your tax collector.

Additional Instructions for Lines 6 and 7

Complete Line 6 if the payment into the redevelopment trust fund is a specific proportion of the tax increment value.

Complete Line 7 if the payment is based on a calculation other than a specific proportion. Do not complete both Lines 6 and 7.

INSTRUCTIONS

Property appraisers must complete and sign Section I of this form with the DR-420, *Certification of Taxable Value*, and DR-420S, *Certification of School Taxable Value*, and provide it to all taxing authorities levying a

- Voted debt service millage levied under Section 12, Article VII of the State Constitution or
- Millage voted for two years or less under s. 9(b), Article VII of the State Constitution

Section I: Property Appraiser

Use a separate DR-420DEBT for each voted debt service millage that's levied by a taxing authority. The property appraiser should check the Yes box on Line 9 of DR-420, *Certification of Taxable Value,* or Line 8 of DR-420S, *Certification of School Taxable Value*. The property appraiser should provide the levy description and complete Section I, Lines 1 through 4 of this form, for each voted debt service millage levied.

Enter only taxable values that apply to the voted debt service millage indicated.

Sign, date, and forward the form to the taxing authority with the DR-420.

Section II: Taxing Authority

Each taxing authority levying a voted debt service millage requiring this form must provide the proposed voted debt millage rate on Line 5.

If a DR-420DEBT wasn't received for any
- Voted debt service millages or
- Millages voted for two years or less

contact the property appraiser as soon as possible and request a DR-420DEBT.

Sign, date, and return the form to your property appraiser with the DR-420 or DR-420S.

All TRIM forms for taxing authorities are available on our website at http://dor.myflorida.com/dor/property/trim

CERTIFICATION OF FINAL VOTED DEBT MILLAGE
INSTRUCTIONS

SECTION I: Property Appraiser

1. Initiate a separate DR-422DEBT, *Certification of Final Voted Debt Millage*, for each DR-420DEBT, *Certification of Voted Debt Millage*, submitted.
2. Complete Section 1 and sign.
3. Send the original to the taxing authority and keep a copy.

SECTION II: Taxing Authority

1. Complete Section II and sign.
2. Return the original to the property appraiser.
3. Keep a copy for your records.
4. Send a copy to the tax collector.
5. Send a copy with your DR-487, *Certification of Compliance*, to the Department of Revenue at the address below. Send this form separately if the DR-487, *Certification of Compliance*, was previously sent to the Department.

NOTICE OF PROPOSED TAX INCREASE

The Village of Palm Springs has tentatively adopted a measure to increase its property tax levy.

Last year's property tax levy:

A. Initially proposed tax levy	$ 5,033,685
B. Less tax reductions due to Value Adjustment Board and other assessment changes	$ 7,548
C. Actual property tax levy	$ 5,026,137

This year's proposed tax levy $ 5,198,114

All concerned citizens are invited to attend a public hearing on the tax increase to be held on:

September 23, 2021
6:30 p.m.
at
Village of Palm Springs Council Chambers
226 Cypress Lane
Palm Springs, FL 33461

A FINAL DECISION on the proposed tax increase and the budget for Fiscal Year 2021/2022 will be made at this hearing.

Village of Palm Springs

Executive Brief

AGENDA DATE: September 23, 2021

DEPARTMENT: Administration

ITEM 9.4: Ordinance No. 2021-11 - Adopt FY 2021-2022 Budget *(SECOND READING)*

SUMMARY:

In accordance with the Village Charter and state law, the proposed ordinance establishes the balanced annual budget for the Village of Palm Springs in the amount of $70,479,113 for the Fiscal Year (FY) beginning October 1, 2021 and ending September 30, 2022. The proposed FY 2022 Budget is comprised of the following funds:

General Fund Budget	$ 27,581,106
American Rescue Plan Fund	$ 5,025,000
Palm Springs CRA Fund Budget	$ 3,337,140
Debt Service Fund Budget	$ 427,716
Water and Sewer Enterprise Fund Budget	$ 31,910,182
Stormwater Enterprise Fund Budget	$ 2,197,969

The Village Council held a budget workshop on July 29, 2021 to discuss the proposed budget and review staff recommendations. The proposed ordinance establishes the budget for the upcoming fiscal year.

Attached to the proposed ordinance is a summary of proposed revenues by source and proposed expenditures by function, as they will appear in the budget summary advertisement that will be published in the Palm Beach Post on September 20, 2021, and posted on the Village's website - www.vpsfl.org - in accordance with state law.

The proposed ordinance was approved by the Village Council on September 8, 2021 and is being presented for consideration on 2nd and final reading.

FISCAL IMPACT:

The proposed ordinance establishes the operating budget for the General Fund, American Rescue Plan Fund, Palm Springs CRA Fund, Debt Service Fund, Water and Sewer Enterprise Fund, and the Stormwater Enterprise Fund for the fiscal year beginning October 1, 2021 and ending September 30, 2022.

ORDINANCE NO. 2021 - 11

AN ORDINANCE OF THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA, ADOPTING AN ANNUAL BUDGET FOR THE YEAR BEGINNING OCTOBER 1, 2021, AND ENDING SEPTEMBER 30, 2022; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, Section 166.241(3), Florida Statutes (1997) requires a municipality to make appropriations for each fiscal year that do not exceed the amount to be received from taxation and other revenue sources; and

WHEREAS, municipalities are required to adopt their budget "by ordinance, unless otherwise specified in the municipality's charter;" and

WHEREAS, all of the TRIM compliance measures have been achieved, including the two required public hearings, and all advertising requirements.

NOW THEREFORE BE IT ORDAINED BY THE VILLAGE COUNCIL OF THE VILLAGE OF PALM SPRINGS, FLORIDA, AS FOLLOWS:

Section 1. Budget Adopted. The appropriations for the fiscal year beginning October 1, 2021, in amount of $70,479,113, are further described in Exhibit "A" attached hereto and incorporated herein by reference.

Section 2. Repeal of Conflicting Ordinances. All Ordinances, Resolutions or parts of Ordinances and Resolutions in conflict herewith are hereby repealed.

Section 3. Severability. If any word, clause, sentence, paragraph, section or part thereof contained in this Ordinance is declared to be unconstitutional, unenforceable, void or inoperative by a court of competent jurisdiction, such declaration shall not affect the validity of the remainder of this ordinance.

Section 4. Effective Date. This ordinance shall become effective immediately.

Council Member _____ offered the foregoing Ordinance, and moved for adoption. The motion was seconded by Council Member_____, and upon being put to a vote, the vote was as follows:

	Aye	Nay	Absent
BEV SMITH, MAYOR	□	□	□
GARY READY, VICE MAYOR	□	□	□
DOUG GUNTHER, MAYOR PRO TEM	□	□	□
JONI BRINKMAN, COUNCIL MEMBER	□	□	□
PATTI WALLER, COUNCIL MEMBER	□	□	□

The Mayor thereupon declared this Ordinance approved and adopted by the Village Council of the Village of Palm Springs, Florida, on second reading, on this _____day of_____, 2021.

REVIEWED FOR LEGAL FORM AND SUFFICIENCY

BY: _____
GLEN TORCIVIA, VILLAGE ATTORNEY

Village of Palm Springs
Office of the Village Manager

July 29, 2021

Honorable Mayor and Members of the Village Council:

In accordance with the Village Charter [Section 4.04(f)], I hereby submit for your review and consideration, the proposed operating and capital budgets for the General, American Rescue, CRA, Debt Service and Enterprise funds for the fiscal year beginning October 1, 2021 (FY 2022). This budget document is intended to establish an operational and financial plan for the delivery of Village services, programs and projects during the upcoming fiscal year. Additionally, the proposed budget serves as an aid to our residents, businesses and stakeholders in providing a better understanding of the Village's operating and fiscal programs and how their tax dollars will be spent.

Village Goals and Past Year Highlights:

This past year has been another exciting year of challenges and change for the Village that has resulted in new growth along our commercial corridors and within our residential neighborhoods, increased assurance that we are receiving the lowest feasible cost for all purchases and redefining our organizational responsibilities and structure to ensure that the highest levels of productivity are achieved. Although our Village has faced several significant issues (i.e., COVID-19 pandemic and the ongoing concern of storm events) that have currently (and may further) impacted our community, our primary focus continues to be ensuring the Village remains a vibrant community filled with neighborhoods that foster a "small town feel" and values our various cultures and

our natural environment. We have an incredible staff, and every day they strive to provide customer service that is second to none. At the same time, we work to provide facilities, services, programs, activities and projects to our community that support a high quality of life.

To clearly identify the expectations and accountability for the Village's governmental activities, six (6) goals have been identified to be considered in all Village operations and activities:

. Financial Stability/Sustainability
. Grow Our Community (Annexation)
. Promote Economic (Re-)Development within Our Commercial and Residential Areas
. Ensure We Provide a Clean and Safe Village
. Maintain Our Small-Town Feel within Our Diverse Community
. Maintain the Village of Palm Springs as an Excellent Place to Work

Financial Stability/Sustainability: The Village continuously seeks to obtain financial sustainability through diverse and stable revenues as well as through good planning, consistency and cost awareness. By achieving our financial goal, the Village will be able to maintain/provide the highest levels of municipal services to our residents and stakeholders, while maintaining the small town feel that has made Palm Springs unique among municipalities in Palm Beach County. Some of the areas where the Village has improved our financial condition this past year include:

. Reduced total millage rate paid by all property owners within the Village for the 9th consecutive year – 0.28% reduction
. No increase in Garbage Rates were provided to Village customers in FY 2021 (previous year – 0% increase)
. A zero percent (1%) increase in Utility Rates were provided to Village Customers in FY 2021 (beginning in January 2021 rather than October 2020) (previous year – 0% increase)
. Maintained 32% of General Fund expenditures in Unassigned Fund Balance to assist with unexpected/unplanned as well as assigned fund balance of $3 million for disaster recovery (i.e., emergency issues, severe storms) and $1.5 million for large capital needs.

- Continuously maintained and implemented consistent, reliable standard operating procedures for internal control and financial sustainability.
- Received numerous grant awards (i.e., CDBG - $187,691, Library State Aid - $16,624, FDOT Street Lighting - $114,504, PBC Interlocal Agreement - $113,500, FMIT Safety Grant - $3,462, PBC $12.50 Funds - $26,958, SWA Beautification Grant - $35,932, Hazard Mitigation - $6,902, NLC Census Grant - $5,000, etc.)

  Note: Staff has worked with local, state, and federal agencies to supplement cost of park renovations and various development projects and we have received notification of numerous approved/recommended grant funding awards of an estimated $1,430,823 in FY 2021 [Solid Waste Authority of Palm Beach County - $122,068, Community Development Block Grant - $154,205, Land Water Conservation Fund Grant - Lakewood Gardens Park - $200,000, Florida Recreation Development Assistance Program - Sabal Palm Park - $50,000, Florida Recreation Development Assistance Program- Sago Palm Park - $50,000, US representative Lois Frankel's recommended Surface Transportation Reauthorization Bill funding - Park Connector Pathway System - $854,550].
- The Village received and/or is expected to receive approximately $150,000 as reimbursement for various COVID-19 expenditures as well as FEMA reimbursements resulting from Hurricane Irma and Hurricane Dorian expenditures in the amount of $36,828 (federal share) and $10,462(state share)
- Property valuations increased 3.56% (approximately $51.1 million in new taxable assessment value). This is the 9th consecutive increase in Village-wide property valuations.
- The Village collected $1,349,098 in One-Cent Sales tax revenues in FY 2021 (and a total of $7,354,688 since this collection was approved). In November 2016, the one-cent sales tax was approved by 56.63% of the voters of Palm Beach County. As a result, the Village will receive approximately $14,839,500 million over a 10-year period to support various capital improvement projects and equipment. A three (3) member Infrastructure Surtax Citizen Oversight Committee was established to review and confirm that the proposed projects met the requirements of the voter approved one-cent infrastructure surtax
- In an effort to assist with the projected lost revenue in FY 2020 due to the COVID-19 pandemic, the federal government approved the American Rescue Plan Act (ARP), which is a $1.9 trillion economic stimulus bill, that includes $350 billion dollars for state, tribes, territories & counties, and local government to help with the COVID impact within our communities.

The Village has been notified that we are expected to receive approximately $12 million and this funding would be eligible for the following uses:

- To respond to the pandemic or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries
- Premium pay to eligible workers performing essential work (as determined by each recipient government) during the pandemic, providing up to $13 per hour above regular wages.
- The provision of government services to the extent of the reduction in revenue due to the pandemic (relative to revenues collected in the most recent full fiscal year prior to the emergency)
- To make necessary investments in water, sewer, or broadband infrastructure

Note: The Village Council provided direction on the types of uses for this funding (on June 10, 2021) and a portion of this funding is provided/recommended within the proposed FY 2022 Budget to support sewer and stormwater improvement projects in accordance with the Council's direction.

Note: From the beginning of the COVID-19 pandemic, the Village immediately decided not to charge utility fees and late fees and to suspend shut-offs due to lack of payment for those in need. Further, as the pandemic continued, the Village provided assistance in obtaining CARES Act funding as well as payment plan opportunities (with zero interest rates) to help customers through this difficult time. The Village also experienced a significant reduction in state revenues (i.e., sales tax, gas tax, etc.); however, it was determined that our local government organization would continue to provide a full staff to support the needs of our community and to promote local jobs and continued investment within our Village. Additional (and unexpected) financial consequences have been taken on by the Village to support the continued development/growth of our community as well as our staff through this difficult time (Please see below for additional financial responsibilities taken on by the Village).

Annexation: This past year, the Village did not contribute to our annexation initiative; however, this initiative is fluid and is intended to continue at a manageable pace to attract quality businesses, enhance surrounding residential neighborhoods and expand our tax base. The Village has continued to grow within our identified future annexation area, and we are currently the 12th largest city

in Palm Beach County with an estimated 23,867 residents. Although the Village is moving ahead with this initiative, we continue to proceed in a more conservative manner to ensure resources are available to continue the delivery of the superior services that our community has become accustomed to receiving at the lowest possible cost. In fact, the Village did not complete any annexations this past year and has not annexed (or incorporated) a significant area of property into the Village since 2016 (south of Lake Worth Road involuntary annexation).

Additionally, the Village has continued to establish partnerships with neighboring cities with the intent of growing the Village, eliminating gaps/pockets of unincorporated areas to promote a "clean and safe" community and encouraging investment (i.e., re-development).

Finally, the Village has continued to hold discussions with Palm Beach County regarding the opportunity/possibility of developing an Interlocal Service Boundary Agreement (ISBA) and a Joint Planning Agreement (JPA) to promote consistent land uses between the Village and the County upon annexation. Potential future or priority annexation areas that have been discussed with the County as part of a JPA include: Military Trail (Forest Hill Boulevard south to Tenth Avenue), 6th Avenue and Davis Road (north to Lake Worth Road) and Congress Avenue (the Village's northern boundaries north to Southern Boulevard).

Note: Although the Village maintains a number of priority areas to be incorporated into our community, the Village has not undertaken significant annexation initiatives since 2016. This has enabled the Village to focus on the livability of our Village as well as to promote economic (re-)development and create investment and jobs, enhance public safety and promote retail and commercial uses throughout our community.

Promote Economic (Re-)Development: The Village Council previously committed to slowing our annexation efforts and to begin focusing our efforts on economic development and re-development opportunities to help create jobs, grow our tax base and increase our overall quality of life by making the Village a more attractive community. A primary goal of the Village is to enhance the quality of life within our residential communities as well as to promote a vibrant business environment within our commercial corridors - Congress Avenue, Forest Hill Boulevard, Lake Worth Road, 10th Avenue North and Military Trail. The Village utilizes

our utilities (i.e., water and wastewater) and our annexation initiative to assist with meeting this goal. Following annexation, the Village works to enhance the appearance and livability of our community for all stakeholders and to meet our goal of providing a "clean and safe" Village through our policing, code enforcement and building/inspection services ("three-legged stool approach").

The Village has continued our efforts to aggressively amend our land development code, reduce chronic code violations, remove unsafe structures and annex unincorporated areas just outside of our Village to eliminate undesirable activities from occurring. To assist in achieving this goal and ensure that the Village remains a great place to live, work and play, we will continue to work to create and promote a positive pro-business and residential image, continue to install/provide necessary infrastructure and offer/promote grants and other financial opportunities to stimulate economic (re-)development within our residential and commercial communities. Thus, resulting in a desirable business climate where quality businesses want to be and/or expand, new jobs will be created, and family/community-based neighborhoods will be found throughout our Village.

We are proud of the progress that has occurred within the Village this past year and are excited about the growth and economic development/re-development opportunities that are available to our community. This year the Village completed several initiatives to facilitate future economic (re-)development activities, including:

. FY 2021 was the first year that Tax Increment Funding (TIF) ($68,307) was received to support the newly approved/established Palm Springs Community Redevelopment Agency (CRA), which includes two (2) CRA Districts within the Village (1. Congress Avenue District – generally north of Forest Hill Boulevard to Summit Boulevard and 2. Lake Worth Road District - E-4 Canal west to Military Trail). The CRA was created to assist with funding necessary infrastructure, safety improvements and incentives to promote economic (re-)development opportunities and improve the overall quality of life within the designated areas

. Completed six (6) amendments to various sections of the Village's code of ordinances (including our Land Development Regulations) to ensure the Village maintains its small town feel, safety and livability while also promoting our business community and providing for improved development and investment opportunities (i.e., local amendments to the Florida Building Code, special events definition, special assessments procedures, created a new overlay district - Gulfstream Road

Overlay, Capital Improvements Element, traffic calming procedures and measures, etc.)

- Partnered with the Florida Department of Transportation (FDOT) and the Palm Beach Transportation Planning Agency (TPA) to begin the engineering/engineering process to improve the safety and infrastructure within the Lake Worth Road corridor [i.e., wider sidewalks, mid-block pedestrian cross walks, separated bike lanes, roadway paving and striping, stamped pavement within medians, , directional medians (peanuts) to reduce turning options, potential future signalized intersection at Davis Road and Lake Worth Road, , etc.]. This project is now also expected to include drainage improvements (which were not originally included within the scope of this project) to provide additional capacity for Village stormwater improvements as provided within the Village's Stormwater Master Plan (Funding will be provided by the Village of Palm Springs and the expected American Rescue Plan federal funding). Construction is expected to begin in Spring/Summer 2022 with an expected completion date of approximately 18 to 24 months. This project is expected to cost more than $6 million and will be funded by the FDOT
- Completion of new residential construction as well as new and/or renovated retail and professional office spaces throughout the Village, including: Defy (Circus Trix) Trampoline Center (Congress Avenue), Humana Insurance Office (southeast corner of Military Trail and Forest Hill Boulevard – Shoppes of Forest Hill), Ed's Food Store (northwest corner of Congress Avenue and Emerson Avenue), Cancer Center of South Florida (west side of Congress Avenue – Greenwood Shopping Center), A Place For You Adult Care & Rehab Center (west side of Congress Avenue north of 2nd Avenue), Walmart (on 10th Avenue),USA Auto Wash Inc (Walmart outparcel on 10th Avenue), AC Pediatrics and Orthodontics (southwest corner of 10th Avenue and Congress Avenue – Palm Springs Plaza), La Ranchera (northeast corner of Military Trail and Sussex Avenue), Church of God (Southwest corner of Lillian Road and Congress Avenue), Palm Beach Family Physicians (southeast corner of Forest Hill Boulevard and Alice Avenue), multiple new single-family residential homes (various locations throughout the Village)
- Continued to provide owners of vacant properties with the opportunity to finance various utility infrastructure (expense) improvements with the Village as utilities become available within their community and to facilitate infill development
- Continued to provide customer service within all areas of our Village throughout the COVID-19 pandemic to ensure the continued development of properties and investment into our community, which assisted in maintaining, and in some cases, creating new jobs

- Awarded nine (9) Property Improvement Program (PIP) re-development matching grants (up to $5,000 each), totaling $24,900 to help Village property owners make needed improvements within our residential and business communities – Resulting in total projects cost of $112,714.02 that are expected to increase property valuations

  <u>Note</u>: To date, the Village Council has awarded 96 grants to residential and business properties totaling $401,618.19 with total projects cost of $967,351.46. This Program has contributed to an increase in the Village's total valuation that is utilized to calculate ad-valorem taxes to the Village annually
- Continued the process of branding the Village by installing new "Welcome to Palm Springs" signage placed are at various entrances into the Village as well as wrapping our new passenger buses with Village-related information. These projects promote community pride, home ownership and property and business investment
- Approximately 45 jobs, during FY 2021, were(are) associated with the construction and/or operation of various new residential and commercial developments as well as the development of new businesses within the Village
- Expected to complete the process to develop (revise) the Palm Springs' Community Redevelopment Agency (CRA) Redevelopment Plan and Economic Development Strategic Plan to ensure a unified vision for the development of the two (2) CRA districts (Lake Worth Road District and the Congress Avenue District)
- Amended the Village's (police and parks and recreation) impact fees that are required for new development to assist in providing funding for the new impacts related to policing and parks and recreation services provided by the Village
- Began the process to work with Palm Beach County on the development of new 6-inch wastewater force main along Congress Avenue (from Forest Hill Boulevard north to Summit Boulevard). A proposed Interlocal Agreement with PBC is being negotiated currently and is expected to be presented to the Village Council in FY 2022 with funding to be provided by the American Rescue Plan federal funding (1/2 of the total project cost paid by the Village and the other half by Palm Beach County)

<u>Note</u>: Throughout the COVID-19 pandemic, our staff continued to offer in-person inspection services, instituted electronic plan (ePlan) review for minor permit applications (i.e., A/C change-out, electrical service panel or meter repairs, water heater/water or sewer tie-in, fence, re-roof, shutters, stucco/lath, driveways, windows/doors, shed, tree removal, etc.), deferred submittal of recorded Notice of Commencements until final inspections (instead of prior to 1st inspection),

deferred special magistrate proceedings for business license program (delinquent license renewal or lack of Village license), developed temporary outdoor seating allowances for restaurants, processed and issued development permits and utility applications to ensure the continued growth of our Village while enabling our citizens to continue to work as well as even to grow the number of jobs with our community. Although Village Hall was closed for a considerable amount of time during FY 2021 in an effort to maintain the health and safety of our community and our staff, we have offered a number of customer service opportunities to meet with our customers including communications via telephone, E-mail, Zoom and/or GoTo Meeting, created a drop box and pick-up box for all submittals and issuance of permits, provided in-person meetings on an "appointment only" basis and/or within our drive-up window, met with customers on an appointment basis, etc.

Ensure a Clean and Safe Village: This initiative is designed to ensure that the Village provides safe and clean places, for the entire community to enjoy including public spaces, commercial corridors and residential neighborhoods. To achieve this goal, our staff (i.e., Police, Code Enforcement, Planning and Building Official/Inspectors, Public Service, Parks and Recreation, etc.) have been focused on programs and activities to assist in making the Village a more livable community. This year we have taken the following steps to meet this goal:

. Began the process to ensure that Village is FDOT Local Agency Program (LAP) Certified, which would enable to the Village to qualify and apply for numerous state and federal transportation funding/grants to improve the mobility of our residents and visitors and ensure a safer transportation system throughout the Village. If approved, the Village would be considered a LAP agency, which would enable the Village to prioritize and fund local projects (through the Palm Beach Transportation Planning Agency) and we would then be eligible for federal funding (reimbursement) for the services provided to the traveling public through compliance with applicable Federal statutes, rules and regulations

. Partnered with the Palm Beach Transportation Planning Agency (TPA) to begin the process to develop a Transportation/Mobility Plan to evaluate and the need to undertake pedestrian/bicycle and "Complete Streets" improvements within the Village to enhance safety and provide enhanced facilities for multi-modal transportation within the Village

- Completed/began various critical stormwater related projects to manage, but also attempt to eliminate, flooding in several of our neighborhoods to improve the livability of our community – 1. Carol and Rex Avenue Stormwater Improvement Project, 2. Davis Road Stormwater Improvement Project, 3. Lakewood Road Stormwater Improvement Project and 4. Gulfstream Road Stormwater Improvement Project (Lake Worth Road to 10th Avenue) **(Stormwater Funded)**
- Expecting to mill and resurface six (6) roadways to extend the road's service life and to provide safe roadways for our residents and visitors. Over the past 10 years, the Village has invested more than $2,351,715 into the milling, paving and striping existing roadways and $875,641 to improve previously unpaved roads
- Completed the engineering and design for the Vacuum Station #1 improvements that will enhance the safety of Village staff and ensure the proper collection of wastewater from customers
- Expecting to complete the approved lift station improvements at Fountain View, Mediterranean and Woodlands stations
- The emergency generators for Well's 11 and 15 as well as Lift Station #9 are anticipated to be installed prior to the end of FY 2021
- Utility construction has been completed as part of the County's Prairie Road and Kudza Road improvement projects
- Engineering and design began on the utility relocation work along Florida Mango Road that will be included as part of Palm Beach County's Florida Mango Road widening project
- Continued the process to design the 14,000 sq.ft. expansion of our Police Department building to better support our staffing and operational needs due to an increase in the total number of Police Department staff as a result of annexation and growth within our community. Construction is expected to begin in the Summer of 2022 (**General Fund Reserves & Sales Tax Funded**)
- Purchase two (2) drones (small, unmanned aircraft) to ensure the public safety (i.e., searches, rescues, etc.) within the Village
- Ordered nine (9) new Police Department vehicles, equipment (i.e., in-car cameras, light bars, etc.) and graphics to support our department's efforts to maintain the safest community possible. To date, the Village has purchased/replaced all vehicles within our fleet - 67 vehicles within our Police Department have been purchased/replaced over the past 9 years with no marked cars on the road today that are older than 2015 (all Ford Crown Victoria vehicles have been removed from active service)

x

- Purchased a new Body Worn Camera system (i.e., expected 50 new cameras, storage of video in the Cloud, software, multi-year warranty, etc.) to provide the highest levels of safety to our officers as well as to our community. This new system is expected to be implemented within FY 2022
- Completed various technology equipment and software upgrades from old unsupported versions to better protect and provide increased security of the Village's network while also providing significant savings to the Village
- Implemented a full hardware and operating system upgrade for the MIEX at both the Main WTP and the Pratt WTP
- Began the requirement for dual factor authentication for all Village staff/users to better ensure the safety of our network and data
- Completed an IT Audit as part of the Village's overall financial audit process to ensure the overall safety of the Village's network and data
- Completed a full Enterprise Resource Planning (ERP) upgrade within our Munis software, which better integrates our human resource activities, financial data and reporting and operations activities
- Working to complete the conversion/migration of the Village's phone system to a new Voice over Internet Protocol (VoIP) phone system, which will include moving to a new phone service provider and deployment of new phone numbers for Village staff/offices

Note: Throughout the COVID-19 pandemic, the health and safety of our community and our staff was (and continues to be) a priority. Thus, our staff worked to continuously inform our community on the need to follow the CDC guidelines through all of our communication tools (i.e., announcements during in-person and virtual public meetings, events, programs and/or activities, E-newsletters, created a separate COVID-19 information page as well as provided a number of news briefs on the Village's website – www.vpsfl.org – an our social media accounts, utilized our LED message boards, posted signage on all buildings, staff handed out flyers at numerous residential and business properties, worked with various partners, churches, local governments, etc., included notices on monthly utility bills, etc.). As stated previously, although Village Hall has been closed in an effort to maintain the health and safety of our community and our staff, we have offered opportunities to meet with our customers through electronic media, dropping of documents in drop boxes and/or within our drive-up window, met with customers on an appointment basis, installed plexiglass separators within

all areas of the Village where there would be difficulty in meeting the CDC's social distancing guidelines as well as offering masks, increased public hand sanitizer options and cleaned/sanitized the Village's indoor facilities. Further, we instituted a new opportunity for our residents and businesses to make police reports by telephone as well as assigning one (1) officer per shift to serve as a transport officer to reduce potential contamination of our front-line workers. Take home vehicles, which were recently approved for all officers with more than one (1) year of service (with some exceptions as provided with the union agreement), provided our officers with a safer and more isolated environment from exposure to the COVID-19 virus.

Maintain Our Small-Town Feel within Our Diverse Community: The Village is located within the 12th most populous urban area within the county. However, we maintain a unique small town feel that many communities work very hard to duplicate. Our residents throughout the Village know each other and our governmental staff maintains a strong emphasis on providing the highest levels of customer service and highest quality events, programs, services and activities to ensure that the Village remains a great place to live, work and play. Some of the ways we have continued to promote this atmosphere within our Village include:

. Continue the process of installing new Village welcome (monument) signage at up to 4 locations at various entrances to the Village, which would continue our branding and promotion efforts (in addition to our previously completed projects - installing new Welcome to Palm Springs signage placed are various entrances into the Village, new street signs with the Village seal, LED monument messaging sign, wrapping our new passenger buses with Village-related information, etc.)

. Completion of the new Foxtail Palm Park, located on the northeast corner of Kirk Road and Park Lane, is expected by the end of FY 2022 and construction has included turning a borrow pit lake into a focal point lake with a walking/fitness trail around its perimeter and fountain in the center, playground equipment, shade shelter, site amenities (i.e., benches, water fountain, trash receptacles, etc.), landscaping and irrigation system and paved parking lot with an ADA walkway

. Completed the engineering and design for four (4) of the five (5) Sub-Phases (with the remaining Sub-Phase to be designed following the purchase of property to construct a new park on the east side of the Village). Also, the 1st Phase of this project (Alemeda Drive, from the existing trail intersection west to Davis Road) has been completed and Phase IIB (Davis Road, from Greenbrier Drive/Park Lane south to Royal Palm Park) is currently under construction and planned to be completed

by November/December 2021. This new Village-wide pathway park connector pathway project is expected to connect nine (9) of the Village's eleven (11) parks (Christmas Palm Park and Greenbrier Park will not be connected due to the residential character of the area) with a wide sidewalk (where possible) enhanced with pedestrian amenities, such as benches, water fountains, distance markers, trail information boards, etc. (**Sales Tax Funded**)

- Began renovations to various Village Parks, including Lakewood Gardens Park and completed the renovations to Royal Palm Park (i.e., new playground equipment) and Village Hall Complex Ballfields (i.e., replaced the irrigation system, stripping all existing sod from the fields, spraying and debris removal of existing soil, a rough grade, adding a new topsoil mix (to stimulate turf growth), laser grading of the fields and installing new bermuda sod [all existing clay areas will be replaced with sod (except for the pitching mound and home plate areas)] to continue to provide the highest quality sports turf and playing fields for Village residents and participants (**Sales Tax Funded**)
- Began the redevelopment of Village Hall Complex Playground areas to provide our children with the opportunity to learn/experience balance, climbing, education, sliding, sensory, colors and sounds. (i.e., climbing options, open tunnels, slides, swings, etc.); this project will be built within the existing playground area (Village Hall Complex will include the installation of shade structure) and will incorporate English and Spanish to assist our children and our community to better communicate and learn about various cultures (**Sales Tax Funded**)
- Awarded six (5) $1,000 scholarships to selected high school seniors who live in the Village as part of the annual Village scholarship program, which was named in memoriam for Palm Springs resident and library volunteer Joseph Fallon, who died suddenly during his senior year at John I. Leonard High School
- Resumed offering various enrichment programs to our community by our Library [i.e., approximately three (3) children's programs per month with an average attendance of 15 people, approximately six (6) adult programs per month with an average attendance of sixteen (16) people per month as well as approximately two (2) Family Programs per month with an average attendance of 67 people]
- Prior to the COVID-19 pandemic requiring Village facilities to be closed to the public, our Library continued to assist the community by offering free tax assistance through the VITA and AARP programs as well as free driver's license practice exams
- Held several community events, including the Village's annual Santa's Sleigh Ride, Stuff-A-Cruiser, 4th of July Celebration,

Easter Egg Hunt, Trunk or Treat, Mayor's Bike Ride and Watch-A-Truck events that promoted our diverse, family-oriented Village and community relationship building. The Police Department's 10th Annual Stuff-A-Cruiser event was our most successful ever and we raised more money and received more toys than ever and during the COVID-19 pandemic. In fact, more than $11,000 in donations were received and provided to local non-profits (i.e., Salvation Army and Adopt-A-Family) to help our community during the holidays and the on-going pandemic

. Due to the continuing COVID-19 emergency, the Police Department was not able to hold a Family Movie Night event (generally four movie events are held annually) for our community to enjoy; however, we are expecting these events to continue within the upcoming fiscal year

. Reinstated the Travel Club meetings and programs (due to the COVID-19 pandemic) and continued to offer athletic/sports programming (i.e., flag football, basketball, youth soccer, etc.) that included social distancing guidelines/recommendations/practices

<u>Note</u>: Throughout the COVID-19 pandemic, our staff continued to work tirelessly to maintain the small town feel within our community by offering a number of events, programs and/or activities to our citizens: weekly food distribution (partnership with the Salvation Army and Palm Beach Harvest); distributed handmade masks made by the members of Palm Springs Baptist Church (at almost every Village event), partnered with Christ Fellowship Church to provide toiletries and personal care products to those with financial needs during the height of the number of positive cases with our community, worked with PBC to offer multiple mobile testing opportunities at different locations throughout the Village (staff distributed flyers to businesses and residents in both English and Spanish prior to each testing event), distribution of grocery store gift cards (funding donated by Soma Medical Center and El Bodegon Supermarket), directly distributed Census information and outreach materials to encourage increased response rates, held the Village's annual 4th of July fireworks celebration and virtual "stay at home and watch" events, staff dropped of candy-filled eggs at a number of residential and business properties to celebrate Easter, offered summer camp and back to school camp to ensure that parents have the opportunity to continue to work and support the economy within the Village and our County, provided curbside checkout for library materials, offered virtual story times as well as adding online magazines and a new eBook platform to provide children's and youth materials, assisted with the G-Star School of the Arts Senior High

School Class Graduation Parade, offered drive-by parades for those celebrating birthdays and anniversaries to commemorate important personal dates, installed plexiglass separators within all areas of the Village where there would be difficulty in meeting the CDC's social distancing guidelines as well as offering a various assortment of masks, gloves, face shields, increased public and personal hand sanitizer options and other requisite PPE, purchase a disinfecting fog gun/equipment to safely sanitize the Village's indoor facilities, etc.

Maintain the Village of Palm Springs as an Excellent Place to Work: Our staff is our most important asset that we maintain as a Village. We have a dedicated workforce that works very hard to meet the goals of our Village. As a result, it is important to ensure that we are able to offer competitive wages, benefits and a work life that is comparable with larger organizations who continue to look to our organization to fill their vacancies. Thus, the Village has continued to maintain its commitment to offering excellent work-related opportunities to our staff this past year (in a manner that is affordable to the Village):

. Offered the highest levels of benefits (i.e., health, dental, retirement, etc.) to ensure retention of our workforce and attract the best candidates for open positions. An employee survey was distributed to all Village staff (electronically) in determining the level of satisfaction with the Humana medical and dental plans. The survey provided that 77% of those who responded had an overall positive or somewhat positive experience with Humana. We experienced a 0% annual premium increase for medical coverage (a premium discount was provided for bundling health and dental together). As a result, Village employees did not experience a cost increase for medical and dental benefits. This is the Village's 4th year with Humana.
. Implemented the new NeoGov electronic hiring platform that has automated our entire hiring/application including qualification/screening process. Further, this option has enabled the Village's job/position announcements to be seen by more prospective job candidates than ever before
. Continued providing opportunities for training, education and networking throughout our organization to ensure our staff is apprised of the most up-to-date work-related practices as well as ensuring the highest levels of safety and increased productivity
. Completed the implementation of a new employee digital time & attendance system (for all non-sworn staff positions) to modernize the existing paper-based employee timekeeping approval process (i.e., hours worked, overtime, time off

requests, etc.) in an effort to provide a more efficient process for all employees (when documenting their time - time clocks, phone apps and web console) as well as our departments when submitting payroll requests and to ensure accurate and proper payroll payments are made to Village employees

- Partnering with Palm Beach State College (PBSC) to develop a Leadership Academy to promote a full understanding of the customer service expectation and the responsibilities (education) as a manager and/or leader within the Village as well as to prepare our staff for succession opportunities. The Academy's curriculum has been established and is expected to begin at the beginning of the upcoming FY 2022 (depending on the COVID-19 pandemic). Further, staff is working with other local municipalities to partner with them to participate in this program
- Continued to meet monthly with the Village's Leadership Team, which includes all Village employees in leadership positions (i.e., department directors, supervisors, managers, crew leaders, etc.), to provide training on how we can serve our community, customers and staff better. Videos, articles and discussions have been utilized to learn together on how we can provide the highest levels of service possible to our employees, customers and stakeholders
- Continued the Employee Roundtable meetings with 15 to 20 (randomly selected) employees, which has been a great opportunity to discuss operational issues within the Village as well as to provide Village-related information to our staff (become ambassadors to other staff throughout the organization and to our community) and ensure they are informed about the direction of the Village (i.e., annexation, growth – redevelopment, Village goals, etc.) as well as current issues (i.e., budget, benefits, operational changes, etc.)
- Directors are continuing to being held accountable for improved communication with their employees to ensure the highest levels of moral by immediately addressing issues/concerns and providing information regarding the direction of the Village, employee benefits, budget and how the Village can improve working conditions, processes and procedures
- Departments have begun to hold similar-type Roundtable meetings with their staff to address department-specific operational and morale issues as well as to provide attendees with information related to the Village and their department
- To date, we have held six (6) Employee Recognition BBQ's to recognize employees for their years of service and to thank our staff for all their hard work. The pandemic has forced us to hold off on many of our activities including the BBQ. Our 7^{h} BBQ will be held prior to the end of the fiscal year or the early beginning of the new fiscal year as our goal is to have Employee Recognition BBQ's at least twice a year.

- Continued to promote succession planning and encouraged department management teams to identify and provide new opportunities and experience (i.e., attend meetings, training, planning, re-organization, responsibilities and accountability) for our next generation of leaders to be prepared to step up and serve our community
- Continued to develop positive employee union relationships with the Village's three (3) unions - Police Benevolent Association (PBA) – Officers & Sergeants and Lieutenants - and the Service Employees International Union (SEIU). The Village and the SEIU are currently discussing a new three (3) year contract expected to begin in FY 2022 that is expected to address several issues including uniforms, higher educational funding, various pay and salary proposals.
- Hired a new Assistant Village Manager during FY 2022. We have an expectation that all new leadership staff are expected to join the Village with significant experience and knowledge while enhancing the chemistry within our management team and emphasizing a strong work ethic, excellent communication skills and a desire to provide the highest levels of customer service to our community and staff
- Developed and offered a virtual school option for our staff's children to attend due to the COVID-19 pandemic. This program was offered at the beginning of the 2020/2021 school year until December 2021 and assisted with the significant stress that parents/staff were experiencing due to the pandemic concerns and the difficulty in completing educational assignments due to virtual learning issues

Note: Throughout the COVID-19 pandemic, our Village supported our employees in a number of ways to keep them safe as well as to provide financial assistance and support, including: meet all guidance and/or requirements as provided by the Centers for Disease Control and Prevention (CDC) as well as the federal, state and county governments regarding social distancing, wearing masks and/or personal protective equipment (PPE) and testing, immediately implemented the federal government's Families First Coronavirus Response Act (FFCRA) that provided an additional 80 hours of COVID sick time to all employees through June 2021 (Note: this Act provided that various positions may be exempt from receiving this additional 80 hours of time; however, the decision was made immediately that the all of our staff, particularly our police, utilities, public works, etc., would be eligible for this additional time) as well as 10 weeks of paid Family Medical Leave Act (FMLA) would be available for child care, the Village Council unanimously supported an additional Pandemic Pay for all employees in the amount of $100 per pay period for four (4) pay periods, offered

additional working opportunities for part-time employees to keep them employed and assist departments with projects that have not been completed, provided flexible working schedules to reduce the risk of infection as well as to assist with home/personal issues, implementing a new "Back to School Camp" in partnership with the School District of PBC and the City of Greenacres to ensure that our employees' and our citizens' children have a safe and healthy place to learn virtually while also enabling our employees/community parents with an opportunity to maintain a consistent work schedule and, in some cases, keep their jobs, etc.

Goals and Objectives for FY 2022:

The Village will continue to work towards meeting our identified priorities and objectives to meet the Village's six (6) Goals, as outlined above. Additionally, we will work to facilitate new residential and commercial construction projects that will result in new jobs and significantly contribute to an increase in our taxable valuation. Further, these new opportunities will assist with our community image and livability, resulting in an increase in the viability of home ownership (rather than investment and rental properties) within the Village.

Budget Objectives:

The following budget objectives have been considered during this budget process:

1. Reduced the total millage rate for FY 2022 (9th consecutive year)
2. Balanced the proposed budget while providing for needed non-recurring capital projects and equipment expenditures. Fund Balance is requested to be appropriated to support the cost for twenty (20) one-time projects i.e., Capital, Sales tax, Contracted Planning Services, etc.):

    . Virtual Desktop Infrastructure (VDI) to enable secure work-from home and reduces hardware costs ($60,000) - **Fund Balance - Unassigned**
    . Build out of north flex area in Village Hall ($232,200) - **Fund Balance - Unassigned**

- Repair/Replace Village Hall A/C system ($400,000) - **Fund Balance - Unassigned**
- Re-flooring within Village Hall department offices ($50,000) - **Fund Balance - Unassigned**

  Continue implementation of MaintStar software for permitting solutions ($88,500) - **Fund Balance - Unassigned**
- Police Department Building Expansion Task Order #269 ($1,529,662) **Sales Tax**

  Purchase and outfit 5 Police Vehicles ordered in FY2021 expected to deliver in FY2022 ($215,500) - **Fund Balance - Unassigned**
- Purchase new 60-foot bucket truck ($220,000) - **Fund Balance - CIP**

  Repaint Village Hall Complex Roofs ($260,000) - **Fund Balance - Unassigned**
- Storage Building for Maintenance Equipment Task Order #261 (175,818) - **Fund Balance - Unassigned**

  Install Street Lighting for numerous roadways in the Floweva area ($28,500) - **Fund Balance - CIP**

  Conversion of Library North Entrance area to a study room/studio ($35,000) -- **Fund Balance - CIP**

  Improvements at Sago Park Task Order #254 ($1,365,000) - **Sales Tax**

  Park Connector Pathway Subphase 2A Task Order #255 ($724,035) **Sales Tax**

  Cover contractual increase in WastePro (garbage collection services) due to CPI increase of 5.84% ($21,560) - **Fund Balance - Unassigned**

3. Evaluated current staffing levels in all departments to ensure the best service delivery
4. Ensured that Village equipment is replaced in a timely and consistent fashion to allow staff to achieve and maintain high levels of quality and services
5. Provided funding to maintain the Village's infrastructure, roadways and facilities
6. Explored "outsourcing" opportunities as a cost savings measure
7. Ensured sufficient training and educational opportunities are available for staff

Significant Financial Factors:

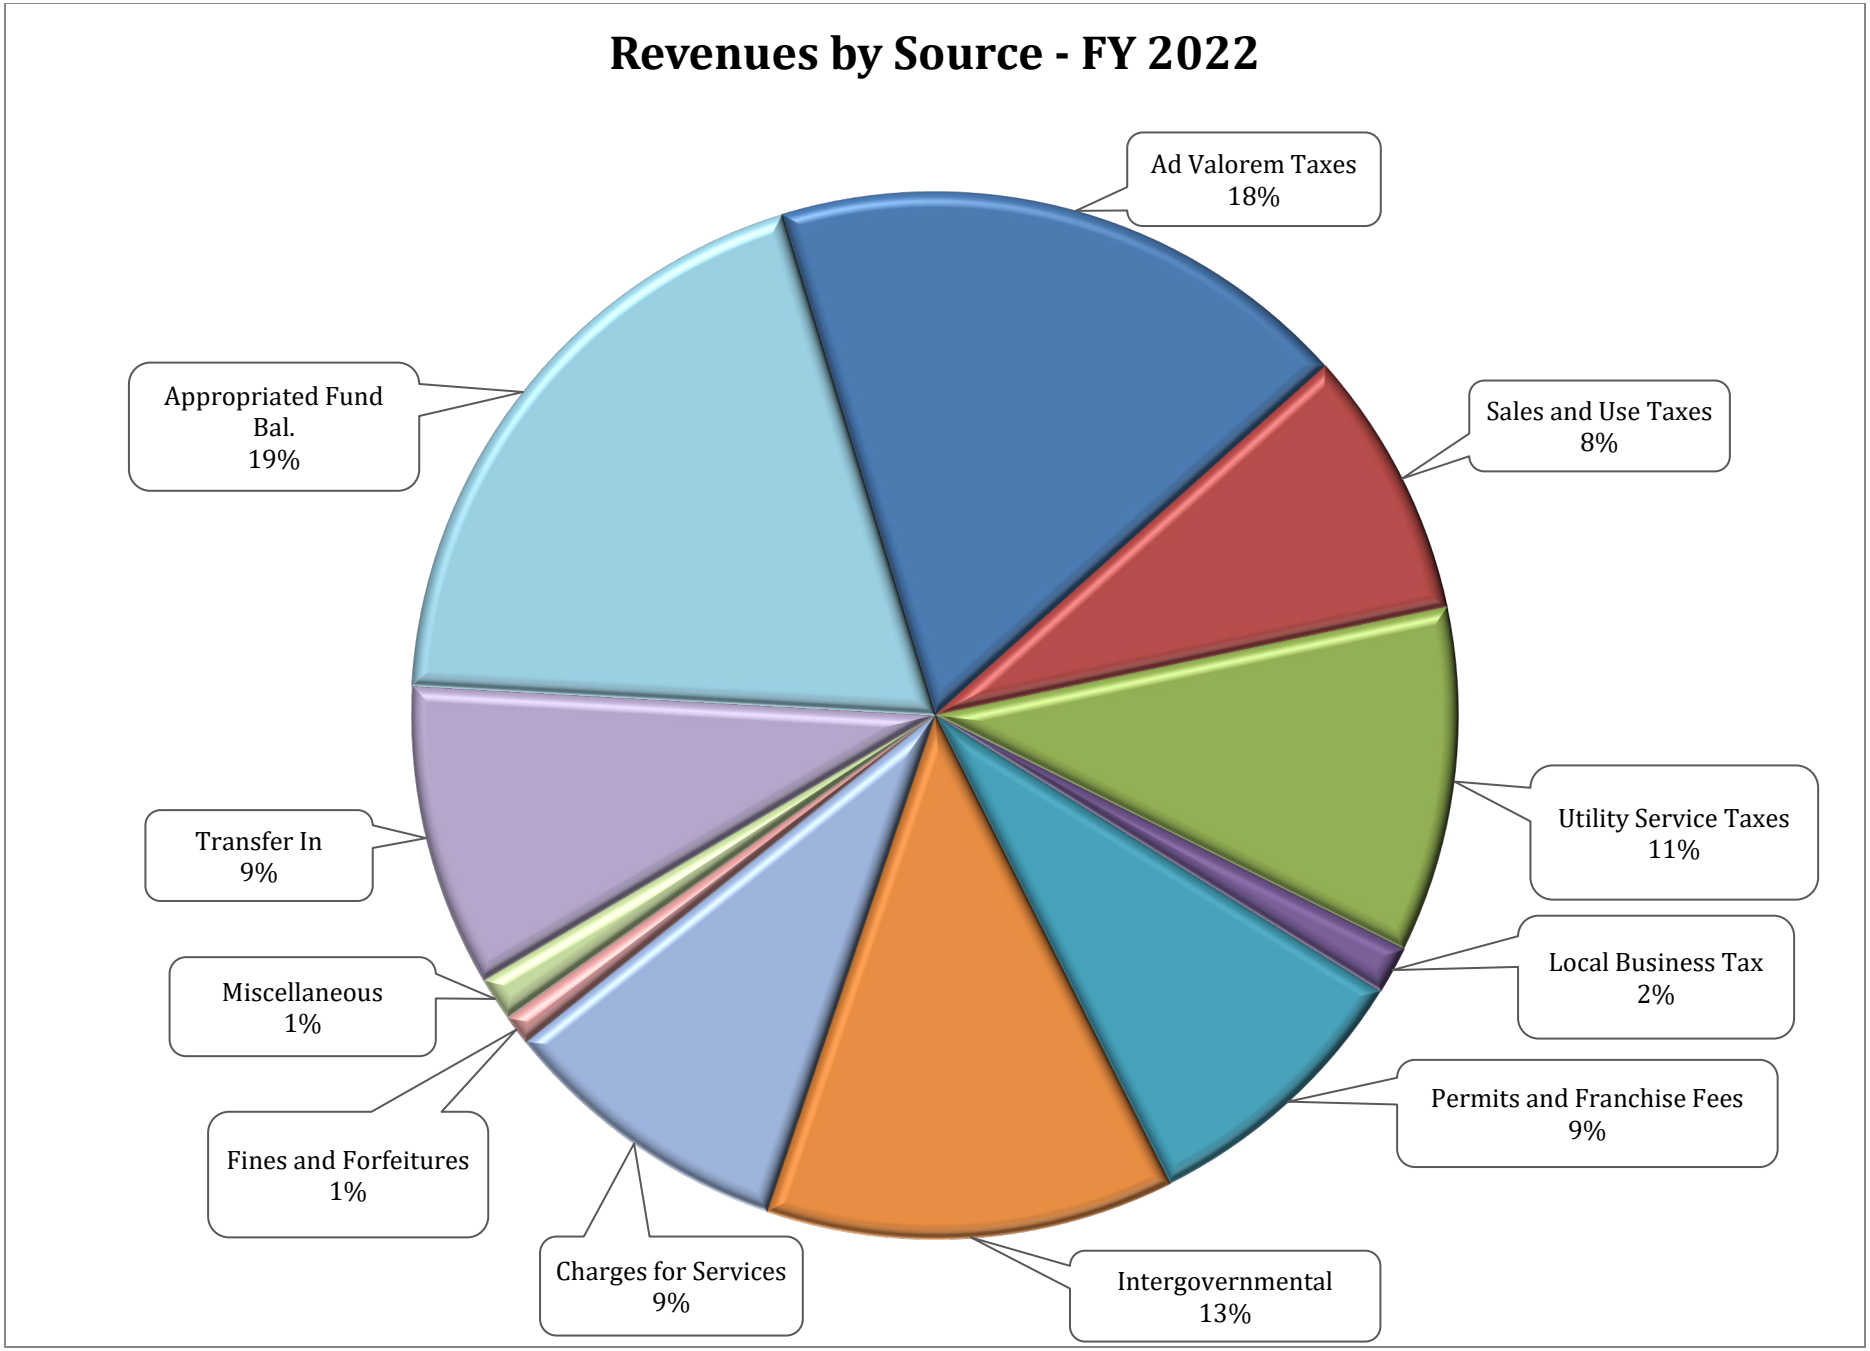
The Village obtains a major portion of its' annual General Fund financial resources (18%) from property taxes. Over the past ten years (since FY 2011), this revenue has increased by approximately 88.6% as we are continuing to experience a recovery from the recession. We are expected to experience an 3.6% increase in property valuations from $1,434 billion in FY 2021 to $1.485 billion for FY 2022 - a continued sign that we are moving in a positive direction. In addition to increased ad-valorem revenues, the Village will expect to receive a larger share of state revenues (i.e., half-cent sales tax, local option gas tax, state revenue sharing, etc.) in FY 2022.

This year the Village's increase in taxable value was among the lowest in the county this year but that is after multiple years of leading the county in terms of valuation increases. We are ranked 12th in terms of population, and our total taxable valuation ranks 17th of 39 municipalities in Palm Beach County. This is indicative of the continued need to maintain a strong focus on economic (re-)development to promote increase taxable valuations to fund municipal services that citizens have become accustomed to receiving in the Village.

Note: Due to the financial oversight and prudence that the has been provided by the Village's Finance Department as well as each of the Department Directors and their staff over the past nine (9) years has enabled the Village to be financially prepared to weather this difficult time and to continue to provide the highest levels of customer service while also proceeding with significant capital projects that will enhance the quality of life within our community and continuing with the same number of employees (unlike many other local governments within our County and around the state and country).

The Village continues to refine and develop our organizational structure to help shape and focus staff's responsiveness, accomplishments, training, supervision and performance. Our employees are our most asset, and they also contribute to the most significant cost associated with the budget, accounting for roughly 54% of the Village's General Fund expenditures (or $14,907,022). Many of the costs associated with the personnel side of our proposed budget are essentially fixed and/or based upon salaries. Although these costs make up for more than half of our operating budget, they are vital to meeting our goal of

maintaining the Village as an excellent place to work and ensuring retention of our staff. It should be noted, however, that this amount limits and/or reduces our spending flexibility as it makes up such a significant portion of our overall budget.

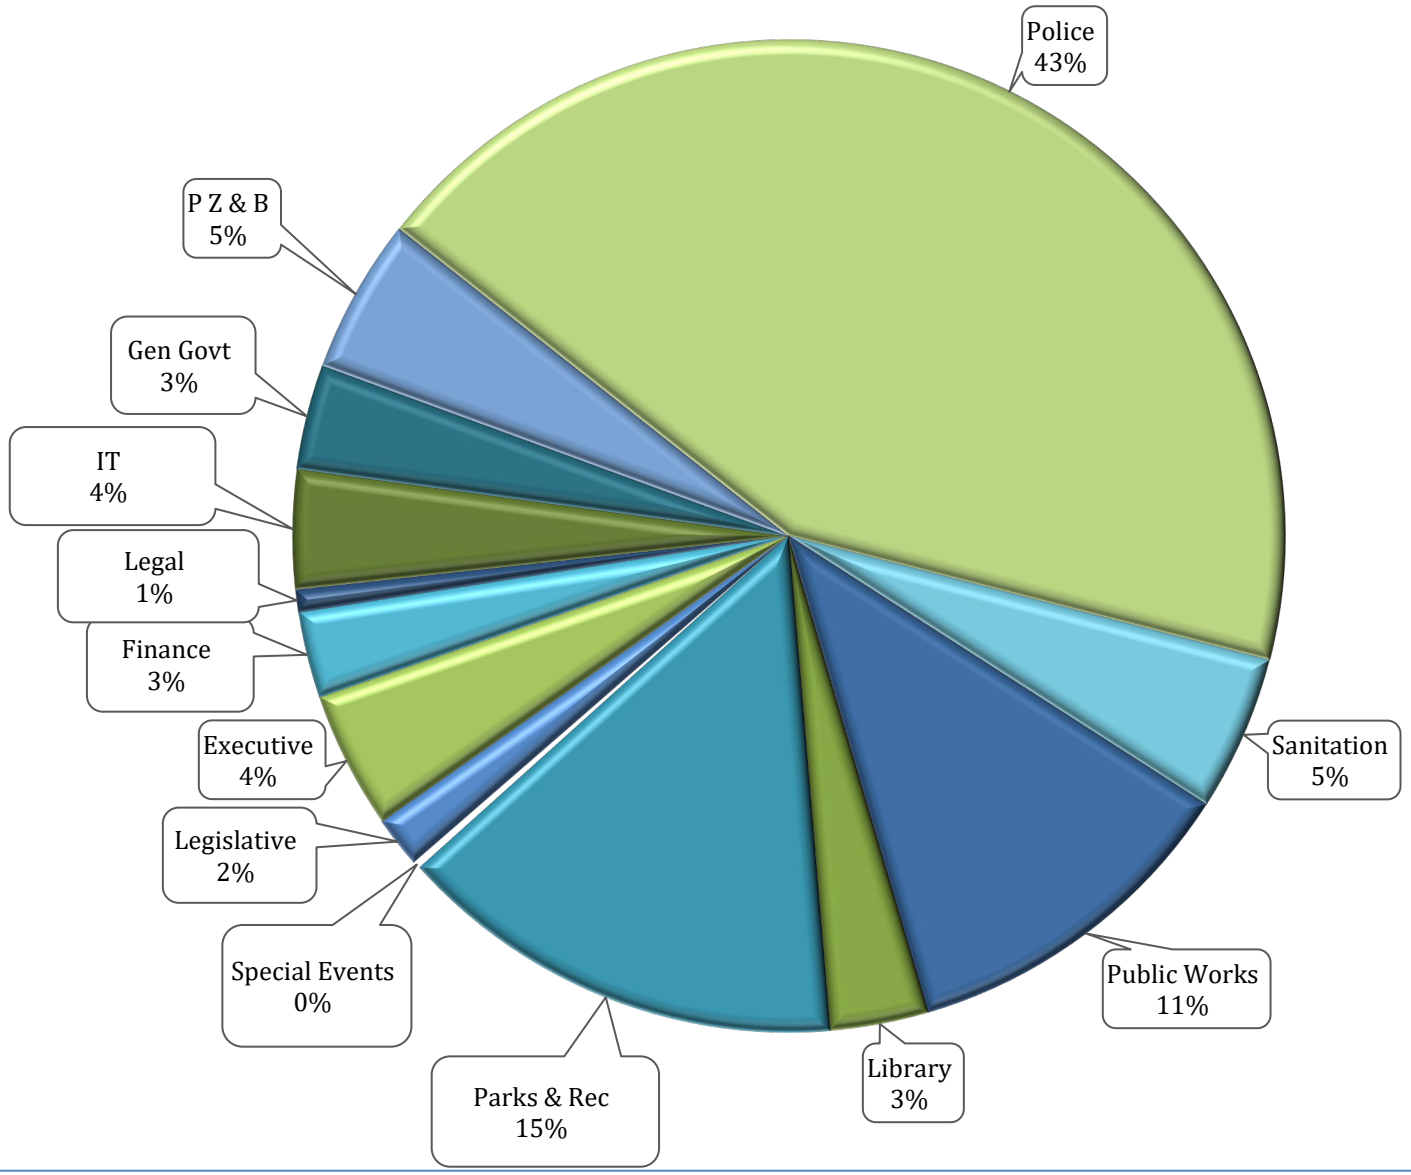


Village Budget:

The Village has established a budget with six (6) separate funds within the FY 2022 Budget: General, American Rescue Special Revenue Fund, CRA Special Revenue Fund, Debt Service, Water and Sewer Enterprise (Utilities Fund), Stormwater Management Enterprise (Stormwater Fund),

1. General Fund: This Fund provides the majority of services available to Village residents.
    a. Revenue Summary - General Fund Revenue sources are projected to generate $27,581,106 in FY 2022

PROPOSED REVENUE BUDGET BY SOURCE -- FY 2022



Revenues by Source - FY 2022

b. Expenditure Summary - The proposed budget reflects expenditures necessary to provide operations at their present (and elevated) levels of service.

PROPOSED EXPENDITURES BY DEPARTMENT -- FY 2022

Expenditures by Department - FY 2022

2. American Rescue Special Revenue Fund – This fund was created in fiscal year 2021 to record the anticipated revenues that will be received from this new funding source. We have anticipated that the Village will receive the first payment of $5,025,000 (estimated based on projected total of $12M) by fiscal year end of 2021 and then appropriate those funds to spend on projects in FY2022.

3. Palm Springs Community Redevelopment Agency (CRA): This new Fund supports the costs associated with the redevelopment of the two (2) established districts (Congress Avenue and Lake Worth Road Districts). A Redevelopment Trust Fund has been established to receiving and/or spending any Tax Increment Financing (TIF) funding (provided by the Village of Palm Springs and Palm Beach County) and is a major fund in the Village's annual FY 2022 Budget and will be audited within the Village's comprehensive annual financial report (CAFR).

   Although the Palm Springs CRA maintains a single Redevelopment Trust Fund, the accounting for each District will be contained within separate funds (one for each district), in keeping with the CRA "best practices" advice from the Florida Redevelopment Association (FRA). All tax increment revenues from each district will be deposited in the respective account to be spent on capital projects, programs and activities within that district. The proposed budget for this Fund is proposed to be $3,337,140, which includes the transfer of $3 million (American Rescue Plan funding) to the CRA to support the proposed construction of new wastewater force main on Congress Avenue as well as drainage improvements as part of the FDOT’s upcoming RRR roadway improvement project

4. Debt Service Fund: This Fund accounts for the current principal and interest payments due on outstanding general obligation debt for the Village Center complex ($3.8 million total outstanding principal remaining). The millage rate necessary to generate sufficient funds to pay our debt obligations for FY 2022 is $ 0.2994.

5. Utilities Fund: This Fund provides funding for water treatment and distribution as well as sewage collection and disposal

for Village residents as well as the Town of Lake Clarke Shores and unincorporated areas of Palm Beach County within our utility service area. FY 2022 utility fund revenues and expenses are budgeted at $31,910,182. The proposed budget reflects expenses necessary to maintain operations at the present (and elevated) levels of service.

6. Stormwater Fund: This Fund supports the costs related to our storm water management program (i.e., drainage improvement projects, maintenance, comprehensive planning and understanding of all drainage needs within the Village) to manage stormwater and eliminate flooding throughout the Village, which is critical to improving the livability of our community. The proposed budget for this Fund is proposed to be $2,197,969.

FY 2022 Recommendations:

Ad-Valorem (Property Tax) Rate:

I am proposing to maintain the operating millage (property tax) rate at its current position of 3.5000 mils per $1,000 of taxable value, which I have utilized as the basis to support personnel, operational and capital expenses within the proposed FY 2022 Budget. Further, the proposed debt service millage rate is proposed to be lower - 0.2994 mills – and when combined with the operating millage rate results in .0110 mills decrease in the total property tax rate to the property owners within the Village of Palm Springs from the FY 2022 property tax rate.

Revenues:

Notable projected revenue changes within the proposed budget include:

. Community Development Block Grant (CDBG) funding (7th year) to support the cost of designing a new trail system throughout the Village that will connect nine (9) of the Village's eleven (11) parks and provide our entire community with accessible recreational opportunities

- Grant funding (including Land Water Conservation Fund Grant and General Fund dollars) will be provided to assist with the revitalization of Lakewood Gardens Park, which will reduce the total funding needed to re-develop this park by the Village

- Ad-valorem (or property taxes) revenue increased 3.24% due to new development throughout the Village (including annexed areas), an improved economy and an increase in construction and development activity within the Village (including improvements as a result of the Village's PIP program). Further, this is the 8th year that our assessed value has increased after six (6) years of a declining tax-base. The Village serves an estimated population of 23,867 and with our new proposed taxable valuation, the Village's ad-valorem revenue on a per capita basis (at the proposed millage rate of $3.50) is $209 as compared to $230 per capita in 2009

- Contribution from the Water & Sewer Enterprise Fund will remain at 12% of FY 2020 gross audited revenues

Expenditures:

Some of the more notable expenditures that are provided for within the proposed budget are as follows:

. Pension Costs – Village Actuarially Required Payments and Staff Contributions:

Pension Plan Name	Projected FY 2022 Village Contribution	Projected FY 2022 Village Contribution %	Projected FY 2021 Village Contribution	Projected FY 2021 Village Contribution %	Estimated % Inc/(Dec) in Village Contribution from FY 2021	Actual Village Contribution FY2013	Estimated % Inc/Dec in Village Contribution from FY 2013
Village - General	$ 694,787	36.00%	$ 1,057,689	57.20%	-34.31%	$ 1,027,980	-32.41%
Village- Police	$ 584,547	36.20%	$ 501,903	32.00%	16.47%	$ 1,343,382	-56.49%
FRS - Regular	$ 783,502	10.82%	$ 706,852	10.00%	10.84%	$ 159,169	392.25%
FRS - Special Risk	$ 727,410	25.89%	$ 681,770	24.45%	6.69%	$ 173,509	319.23%
FRS - Elected Official	$ 3,488	51.42%	$ 3,336	49.18%	4.56%	$ 1,051	231.87%
FRS - Sr Mgmt	$ 59,360	29.01%	$ 53,756	27.29%	10.42%	$ -	100.00%
Total	**$ 2,853,094**		**$ 3,005,306**		**-5.06%**	**$ 2,705,091**	**5.47%**

. Village Insurance Costs & Employee Benefit Costs – Health, Dental & Life Insurance:

Type of Insurance	Projected FY 2022 Expenditures	Estimated FY 2021 Expenditures	Estimated % Increase in Expenditures from FY 2021	Actual Expenditures FY 2013	Estimated % Increase in Expenditures from FY 2013
Worker's Compensation	$ 463,931	$ 393,762	17.82%	$ 163,070	184.50%
General Liability	$ 497,628	$ 426,998	16.54%	$ 280,274	77.55%
Employee Health, Dental & Life	$ 2,274,863	$ 2,320,173	-1.95%	$ 1,251,497	81.77%

Note: The General Liability projected cost includes property and auto liability projections. The proposed projections were determined based on historical projections as the quotes from the provider have not been provided at this time. A budget amendment may be required (from Contingency) to support any costs above the projected amounts within the FY 2022 Budget.

Note: The Village remained with Humana this year (4th year) and experienced a 0% increase for employee medical benefits, thus, we did not impact our staff and monthly rates paid by employees did not change

. Sanitation Collection Revenues & Costs (Charged by the Village's franchised hauler):

Village's Franchised Hauler	Projected FY 2022 Revenues	Projected FY 2022 Expenditures	Estimated FY 2021 Revenues	Estimated FY 2021 Expenditures	Estimated % Increase in Expenditures from FY 2021	Actual Expenditures FY 2013	Estimated % Increase in Expenditures from FY 2013
WastePro of Florida & VPS	$ 1,160,288	$ 1,394,420	$ 1,153,211	$ 1,317,350	5.85%	$ 893,293	56.10%

Note: Includes a 5.84% rate increase that has been applied at the request of the contracted hauler as provided within the approved franchise agreement

Information Technology (IT):

. Implement new Virtual Desktop Infrastructure (VDI) that would replace desktops with thin clients (dumb terminals) to enable remote and secure work-from-home (i.e., natural disasters, storm events, pandemic, etc.) and is expected to provide a savings on expensive desktops/equipment - $60,000 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
. Complete the replacement of the Village's outdated telephone system [Voice Over Internet Protocol (VOIP) system], which is expected to provide the Village with a more consistent and reliable telephone system - $6,500
. Provide Village-wide camera system upgrade and maintenance - $20,000
. Install an A/C system within the Village Hall IT Data Center to ensure all computer equipment is properly maintained (and does not experience issues due to high temperatures) - $7,000
. Purchase new OnBase digital, document management solution to replace our current (and more costly) Laserfiche environment to provide increased customer service and enhanced public services (i.e., creation of digital forms and digital signatures, storage and audit trail of forms, ability to enable the public to search and review stored forms and improved internal workflow) - $40,000
. Purchase and implementation of new MUNIS Contract and Project Ledger Accounting modules to provide improved financial processes within the Village - $12,924

xxx

<u>Note</u>: As a result of the COVID-19 pandemic within the second half of FY 2021 as well as the real possibility/potential of a experiencing a natural disaster (i.e., hurricane), we have identified some vulnerabilities related to our workforce and our ability to conduct Village business remotely from locations other than at Village Hall and related buildings. As a result, the IT department developed a "Mobile Workforce" mindset and accompanying strategy beginning in FY 2021 that is positioning the Village to better serve the needs of the community in the event of another pandemic or other disaster using remote meeting software and increased mobile devices (i.e., phones, laptops and tablets).

Finance Department:

. Replacement of heavy-duty printer utilized within the accounts payable and employee/retiree payment processes - $900

Planning, Zoning & Building (PZ&B) Department – Economic (Re-) Development & Palm Springs CRA:

. Engineering and design and construction to support the construction of a proposed 6-inch wastewater force main pipe and related utility equipment to be installed along Congress Avenue (Forest Hill Boulevard north to Southern Boulevard) within PBC's utility service area to support our economic (re-)development goals of creating new jobs and promote investment, improve safety, provide retail/commercial services and improve infrastructure (i.e., wastewater and stormwater) as stated within the Palm Springs CRA Redevelopment Plan, Finding of Necessity Study and Economic Impact Analysis - $3,000,000 (**<u>ARP & CRA TIF Funding</u>** is requested to partially support this initial, one-time purchase and installation cost)

<u>Note</u>: This proposed utility project has been previously identified as a priority project within the newly established Palm Springs CRA and is expected to require an Interlocal Agreement with PBC. Previous discussions with County staff have included the Village's desire that although the initial funding may be provided by the Palm Springs CRA and the Village of Palm Springs to design and construct this project within the County's utility service area (possible bonding and/or borrowing of funding may be required to complete construction until sufficient TIF funding is generated), PBC customers who access this new utility pipe would reimburse the CRA and/or the Village a determined pro-rated amount (the availability to receive pro-rated reimbursement funding would be for an extended time period) and would execute a Voluntary Annexation Agreement with the Village. With regards to funding, PBC staff have agreed to support a recommendation to pay for one-half (1/2) of the total cost of this project utilizing the American Rescue Plan (ARP) federal funding with the Village paying the other one-half (1/2) of the project cost (also utilizing ARP funding that would be moved/transferred into the Palm Springs – Congress Avenue CRA budget. This project, including engineering and design, would not begin until an Interlocal Agreement was approved by both the County and the Village

- Funding to support the Florida Department of Transportation's (FDOT) upcoming Lake Worth Road RRR improvements to support our economic (re-)development goals of creating new jobs and promote investment, improve safety, provide retail/commercial services and improve infrastructure (i.e., wastewater and stormwater) as stated within the Palm Springs CRA Redevelopment Plan, Finding of Necessity Study and Economic Impact Analysis. The following projects are proposed to be funded utilizing CRA TIF Funding and American Rescue Plan (ARP) funding:
  - Funding to install stamped pavement on the concrete medians to provide an appearance of installed paver bricks along this important, major roadway to provide a sense/feeling of something important is on this roadway (or worth really paying attention to in this area). This option (rather than paver bricks), which is extremely durable, looks aesthetically pleasing and requires little maintenance, would be completed when FDOT completes this important safety project (Construction is expected to begin in Fall/Winter 2021 with a planned completion date of approximately 18 to 24 months) - $31,173 (**CRA TIF Funding** is requested to support this initial, one-time purchase and installation cost)
  - Provide funding to assist in resolving the drainage problems that exist along the Lake Worth Road corridor or within the L-12 drainage basin, which is within the Palm Springs CRA - Lake Worth Road District. These significant drainage issues have been on-going for a number of years and resolve/address a major concern that is identified within the CRA's Finding of Necessity - Construction (Master Plan - Project #3 & 4) - $146,557 (**ARP & CRA TIF Funding** is requested to partially support this initial, one-time purchase and installation cost)
- New Village Welcome (Monument) Signage (up to 4 Locations) to be located at various entrances into the Village and continue our Village branding and promotional efforts - $60,000 (**CRA TIF Funding** is requested to support this initial, one-time purchase and installation cost)
- Consulting services to complete an update/re-write to the Village's Comprehensive Plan - $110,000 (**CRA TIF Funding** is requested to support this initial, one-time purchase and installation cost - $10,000)
- Review and revise the Village's current Impact Fees (i.e., Library Impact Fee) that are paid by new development to support needed infrastructure within the Village - $30,000
- Funding to support the development of an Interlocal Service Boundary Agreement (ISBA) and a Joint Planning Agreement (JPA) with Palm Beach County to promote consistent land uses between the Village and the County upon annexation within the Village's potential future or priority annexation areas, including: Military Trail (Forest Hill Boulevard south to Tenth Avenue), 6th Avenue and Davis Road (north to Lake Worth Road) and Congress Avenue (the Village's northern boundaries north to Southern Boulevard) - $100,000

- Continued partnership with a GIS Consultant to provide services required by various departments within the Village - $80,000 (Public Service - $30,000; PZ&B - $50,000)
- Continue to implement new land use planning, permitting, enforcement case management and inspections software and related hardware to automate PZ&B operations to provide streamlined process for developers, investors, contractors, stakeholders and citizens - $88,500 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
- Continue the Village's successful Property Improvement Program (PIP) to provide up to $5,000 in matching grants for approved property improvements - $100,000
- The following new projects/developments are expected to be completed and/or started during FY 2022:
  - **New Residential Construction** - Fontana Townhomes (59 fee-simple townhomes)
  - **New Residential Construction** - Boatman Townhomes (54 fee-simple townhomes)
  - **New Residential Construction** - Patio Court Townhomes – Patio Court – North of Lake Worth Road (10 townhome units)
  - **New Residential Construction** - Lakewood Apartment Complex – Lakewood Road – East of Military Trail (90 apartment units)
  - **New Residential Construction** - Gulfstream Road Apartments – 3901 Gulfstream Road – North of Lake Worth Road (8 residential dwelling units)
  - **New Residential Construction** - Coconut Road Multi-Family Units – 3673 Coconut Road – North of Lakewood Road (12 single family homes)
  - **New Residential Construction** - Jacob's Garden Assisted Living Facility – Congress Avenue – South of Lake Worth Road (behind Congress Plaza)
  - **New Residential Construction** - Prince Place – 3075 Prince Place (21 rental townhomes)
  - **New Residential Construction** - Park Lane Townhomes – Park Lane – East of Kirk Road (8 townhome units)
  - **New Residential Construction** - Prairie Road Townhomes – Prairie Road – South of Meadow (16 townhome units)
  - **New Residential Construction** - Palm Springs Residences – Congress Avenue – South of Lillian Road (current YMCA property) (264 apartment units)

- **New Residential Construction** - Belmont – Kirk Road – North of Forest Hill Boulevard (currently Holy Cross Lutheran Church) (53 fee-simple townhomes)
- **New Commercial Construction** - Soma Medical Office Building – Forest Hill Boulevard and Alice Drive (previously Cushman's fruit store)
- **New Commercial Construction** - Integrity Commons Medical and Office Building and Apartment Complex – Forest Hill Boulevard and Forest Avenue
- **New Commercial Construction** - Dental Office - Military Trail & Lake Worth Road (previously a Payless Shoes store)
- **New Commercial Construction** - (To Be Determined) Fueling Facility –10th Avenue – West of Florida Mango Road (previously Chase Bank building)
- **New Commercial Construction** - Soma Medical Center – Congress Avenue – North of 10th Avenue
- **New Commercial Construction** - Bethel Assembly of Lake Worth – Congress Avenue – South of Lake Worth Road (adding new 25,788 sf sanctuary and parking spaces)
- **Commercial Renovation** - Penuel Evangelical Church – 2nd Avenue & Davis Road (previously a Veterinarian Clinic)
- **Commercial Renovation** - Starbucks – Forest Hill Boulevard – East of Military Trail (previously Boston Market Restaurant)
- **Commercial Renovation** - Brave Little Stars child day care – Congress Avenue – North of 10th Avenue (previously Tapper's restaurant)

Police Department:

- Design, permit and begin construction of a building expansion of the Village's Police Department facility to accommodate our growing department - $1,529,662 (**Sales Tax Funded**)
- Annual Body Worn Camera services to provide a higher level of safety for our officers and community through increased accountability and transparency. This cost supports the warranty for all equipment as well as provide redaction software, technical/customer service and unlimited cloud storage of all video - $62,980
- Provides for ten (10) replacement laptops and six (6) replacement computer workstations - $51,400

- Replacement of garage bay doors (2 Bay Doors) - $25,000
- Continue the vehicle replacement program and purchase related safety tools within the Police Department – twelve (12) new vehicles ($466,000), lights and decals for five (5) new vehicles ($47,000) and six (6) in-car cameras ($33,000) [Four (4) vehicles are planned to support new staff hires and specialty assignments (previously planned to be hired upon the Village completing the proposed annexation on Military Trail)] - (**Fund Balance** is requested to partially support this initial, one-time purchase and installation cost - $215,500)
- Replacement of the PD's Explorer Van - $35,000
- Purchase four (4) BolaWrap (lasso-like) restraint devices to assist with the apprehension of suspects with the potential for fewer injuries - $4,000
- Replacement of twelve (12) ballistic shields to assist in better protecting our officers from gunfire and projectiles - $28,787
- Purchase of a speed measuring trailer ($15,000) and two (2) pole mounted speed measurement signs ($10,000) to better manage the vehicle speeds through the Village and provide a safer environment for pedestrians, bicycles and property owners - $25,000
- Purchase an additional mobile message board to assist in communicating with our community - $20,000

Public Service Department - Public Works:

- Buildout of the Village Hall North Flex Area to support the need for office space for our IT staff - $232,200 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
- Modify the office space within the Finance Department and PZ&B Department to provide improved working conditions - $50,000 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
- Repaint the Village Hall Complex building roofs (i.e., Village Hall, Library, Police and LAB buildings - 26,000 sq. feet of roof area) - $260,000 000 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
- Funding to support the upgrade/repairs to the Village's A/C system and software (expected to result in reduced monthly/annual electric costs and improve productivity) - $400,000 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
- Continue the Village's milling, resurfacing and striping program - $240,000 ($3,038,317 has been spent on resurfacing and new roads since FY 2013)
- Replacement/Maintenance of existing sidewalks and asphalt throughout the Village - $20,000

- Design and construction of storage building for maintenance equipment at the Main WTP - $175,818 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
- All stormwater-related maintenance and permitting costs continue to be incorporated within the Village's General Fund
- Various stormwater pipe repairs and swale/drainage maintenance - $50,000
- Installation of new streetlighting within the east communities of the Village (who were annexed in from PBC without streetlighting), including: Apalachee Road, Laura Lane, Floweva Street, Muskogee Road, Seminole Road, Prairie Road, Choctaw Road, Dolphin Circle and Lillian Lane - $28,500
- Replacement of an existing F-250 ($38,000), new 60-foot bucket truck ($220,000), new heavy-duty pressure washer with trailer ($11,200), replacement of ice machine ($6,000) within Public Works to ensure the highest levels of customer service - $275,200 (**Fund Balance** is requested to partially support this initial, one-time purchase for the proposed bucket truck purchase cost - $220,000)

Library:

- Purchase of a new live tutoring software application that will promote learning throughout our community - $4,050
- Painting Library building exterior - $5,000
- Close to the public and convert north entrance doors into a new study room/studio - $35,000 (**Fund Balance** is requested to support this initial, one-time purchase and installation cost)
- Renovation of staff workroom to include a new staff work area/station that is expected to increase productivity - $30,000
- Replacement of staff emergency door on the northwest side of the Library building - $9,000

Note: We are planning to close the Library as part of our annual maintenance program for at least one week each year (possibly September 2021) to ensure that it remains a wonderful and clean facility.

Parks & Recreation (P&R) Department:

- Design and construction of the new Park Connector Pathway trail system throughout the Village connecting nine (9) of the Village's eleven (11) parks to provide additional recreational opportunities and promote a healthy lifestyle for community

residents - $1,179,069 (**Grant Funded – CDBG & Sales Tax Funded**) (**Sales Tax Funding** is requested to partially support this initial, one-time purchase and installation cost - $724,035)

- Funding to support the cost of the removal of various animals throughout the Village - $5,000
- Gym rental from the School District of Palm Beach County to support the Village's annual basketball league/program - $5,600
- Replacement of various water fountain stations throughout the Village (i.e., Village Center – LAB Building, Royal Palm Park and Village Center - Playground) - $6,500
- Provide camera system upgrade and maintenance within various parks throughout the Village (i.e., Areca Palm Park, Foxtail Palm Park, Lakewood Gardens Park and Ponytail Palm Park) - $28,300
- Design and engineering costs associated with the redevelopment of Sago Palm Park to include, but not limited to, installation of new playground equipment, pour-in-place protective/safety surfacing, shade structure, renovate/replace restroom and kayak launch. This project is expected to be completed within two (2) Phases totaling approximately $2.6 million – Phase I - $1,510,000 (**Sales Tax Funding** is requested to partially support this initial, one-time purchase and installation cost - $1,365,000)

  Note: This project is still only under design and the projected cost as well as the design will continue to be developed. As more information is provided/available, staff will request input from the Village Council prior to proceeding with this project.
- Completion of the improvements to Lakewood Gardens Park to include, but not limited to, new playground equipment, pour-in-place protective/safety surfacing, shade structure, resurfacing of basketball courts - $400,000 (**Grant Funded – LWCF)** - $34,000)
- Installation of a playground shade structure at Foxtail Palm Park - $80,000
- Replacement of an existing turf vacuum ($24,312) and a heavy-duty utility vehicle ($21,957) - $46,269
- Funding to support fifteen (15) community events/programs (i.e., Walk with the Mayor, Hispanic Heritage Festival, Touch-A-Truck, Wellness Festival-Bike Rodeo, 4th of July, Santa's Sleigh Ride, Christmas Decorating Contest, Snores & Smores, Bark in the Park, Fall Festival, etc.) to provide our community with an opportunity celebrate holidays, meet other residents and promote our family-oriented community – $66,550

Note: Due to the COVID-19 pandemic, staff has made the determination on when to offer organized child and adult league

play as well as all our other various events, activities and programs based on whether we can provide a safe, healthy and fun environment for our community. In an effort to plan for these opportunities, we have budgeted these costs and revenues as we would have prior to the pandemic (with some expected loss of revenue due to expected lower participation), which, at a later date, may be deemed to be valid/accurate projections or we may not be able to meet our budget estimates and we may be required to request funding from within other areas of our budget (including contingency and/or fund balance) to cover the Parks and Recreation Department's (as well as other departmental) budget(s).

Parks & Recreation (P&R) Department:

. Design and construction of the new Park Connector Pathway trail system throughout the Village connecting nine (9) of the Village's eleven (11) parks to provide additional recreational opportunities and promote a healthy lifestyle for community residents - $1,179,069 (**Grant Funded – CDBG & Sales Tax Funded**) (**Sales Tax Funding** is requested to partially support this initial, one-time purchase and installation cost - $724,035)

. Funding to support the cost of the removal of various animals throughout the Village - $5,000

. Gym rental from the School District of Palm Beach County to support the Village's annual basketball league/program - $5,600

. Replacement of various water fountain stations throughout the Village (i.e., Village Center – LAB Building, Royal Palm Park and Village Center - Playground) - $6,500

. Provide camera system upgrade and maintenance within various parks throughout the Village (i.e., Areca Palm Park, Foxtail Palm Park, Lakewood Gardens Park and Ponytail Palm Park) - $28,300

. Design and engineering costs associated with the redevelopment of Sago Palm Park to include, but not limited to, installation of new playground equipment, pour-in-place protective/safety surfacing, shade structure, renovate/replace restroom and kayak launch. This project is expected to be completed within two (2) Phases totaling approximately $2.6 million – Phase I - $1,510,000 (**Sales Tax Funding** is requested to partially support this initial, one-time purchase and installation cost - $1,365,000)

Note: This project is still only under design and the projected cost as well as the design will continue to be developed. As more information is provided/available, staff will request input from the Village Council prior to proceeding with this project.

. Completion of the improvements to Lakewood Gardens Park to include, but not limited to, new playground equipment, pour-in-place protective/safety surfacing, shade structure, resurfacing of basketball courts - $400,000 (**Grant Funded – LWCF)** - $34,000)
. Installation of a playground shade structure at Foxtail Palm Park - $80,000
. Replacement of an existing turf vacuum ($24,312) and a heavy-duty utility vehicle ($21,957) - $46,269
. Funding to support fifteen (15) community events/programs (i.e., Walk with the Mayor, Hispanic Heritage Festival, Touch-A-Truck, Wellness Festival-Bike Rodeo, 4th of July, Santa's Sleigh Ride, Christmas Decorating Contest, Snores & Smores, Bark in the Park, Fall Festival, etc.) to provide our community with an opportunity celebrate holidays, meet other residents and promote our family-oriented community – $66,550

Note: Due to the COVID-19 pandemic, staff has made the determination on when to offer organized child and adult league play as well as all our other various events, activities and programs based on whether we can provide a safe, healthy and fun environment for our community. In an effort to plan for these opportunities, we have budgeted these costs and revenues as we would have prior to the pandemic (with some expected loss of revenue due to expected lower participation), which, at a later date, may be deemed to be valid/accurate projections or we may not be able to meet our budget estimates and we may be required to request funding from within other areas of our budget (including contingency and/or fund balance) to cover the Parks and Recreation Department's (as well as other departmental) budget(s).

Public Service Department - Utilities – Water & Sewer:

. Implement numerous improvements within our Public Service - Utility Billing Customer Service Office to promote an increased customer service experience:
    . Promote the use of electronic billing and bill pay options to save printing, postage and payment/collection costs
    . Implement electronic notification process to notify customers of potential late bill payments
    . Implementation of a new Customer Engagement Portal software module as part of the AMI water meter project to enable customers to view their water usage (up-to-the-minute) to ensure accuracy of billing/metering and to assist

with possible water leaks - $35,000

- Complete various reports/studies/plans to identify improvements to the Village's water and wastewater systems to ensure the highest quality of services to customers and prevent long-term loss of service issues that may occur:
  - Septic to Sewer Engineering/Project Study - $50,000
  - Infill & Infiltration Study - $30,000
  - Emergency Response Plan - $20,196
- Purchase of new capital project management software will assist in managing the operations and costs related to Village capital projects (long-term capital-intensive projects) by enabling staff to define, plan and monitor all activities required to complete capital projects - $15,000
- Relining of manholes and sewer pipes throughout the Village's utility service area to prevent/reduce infiltration/inflow into the Village's collection system, thus, reducing annual wastewater disposal costs - $265,000
- Complete safety improvements (replace an existing ladder with a concrete stairway) within the Village's Vacuum Station No.1 Building to ensure a safer work environment for our Utilities Maintenance staff - $283,768 (**Carryover Project TO #240**)
- Construction of a utility materials storage covering at the 2400 Building to protect inventory (i.e., pipes, etc.) from weather conditions - $193,108 (**Carryover Project TO #260**)
- Remodel the Electricians workspace/office area - $40,000
- Painting both WTP's structures/facilities and aerial pipe crossings - $75,000
- Replace/Upgrade our 13-year-old MIEX Control Systems (software) and construction upgrade to the Village's 14-year-old MIEX Regeneration System at the Main WTP ($2,127,812) and the Pratt WTP ($1,803,000) [Three (3) year construction process - $4 million over (3) years at both water treatment plants] - $3,930,812 (**Carryover Project**)
- Replace Water Well No. 10 (Eastern/Main Wellfield) ($920,000) (**Carryover Project TO #242**), engineering and design to rehabilitate Water Well No. 13 (Eastern/Main Wellfield) ($80,000) and the engineering and design to replace Water Well No. 9 ($109,600) (**TO #262**) to ensure long-term supply (future water production needs) of reliable potable drinking water for Village utility customers - $1,109,600
- Continue the Village's Annual Lift Station Rehabilitation program to ensure proper operation and safety of wastewater

collection and treatment process - $900,000 (**Carryover Project TO #233)**

- Continued installation of a System Control and Data Acquisition (SCADA) system to control and ensure the operational safety of our wastewater lift stations - $820,000 [Three (3) year installation process – $1,230,000 over three (3) years] (**Carryover Project TO #284**)
- Installation of a System Control and Data Acquisition (SCADA) system to control and ensure the operational safety of our two (2) water treatment plants - $700,000 [Three (3) year installation process – $1,230,000 over three (3) years] (**Carryover Project TO #227**)
- Complete Chlorine Feed improvements at both the Main WTP ($72,000) and the Pratt WTP ($72,000) - $144,000 (**Carryover Projects TO #275 & #276)**
- Construction of three (3) material storage bays at the Main WTP - $48,225 (**Carryover Project TO #258**)
- Continue working with PBC on the water main relocation as part of their on-going roadway improvement project on Florida Mango Road - $1,372,880 (**TO #294 & 295**)
- Installation of two (2) fixed generators at Water Wells No. 11 and No. 15 within the Village's eastern/main wellfield ($300,000), one (1) fixed generator at Wastewater Master Lift Station No. 9 ($200,000), one (1) emergency generator at the Pratt WTP ($530,000) and one (1) emergency generator at Vacuum Station #1 ($82,655) - $1,112,655 (**Carryover Project TO #264, #265, #266, #267 & #296**)
- Replacement/Rehab of various utility vehicles and equipment to ensure the highest levels of productivity and service to our customers – replacement of Main WTP sand loader ($270,000), purchase two (2) F-250 trucks with utility bodies ($76,000), and purchase a replacement small crane truck ($195,000) - $541,000
- Recondition/Replace potable water and wastewater pumps, pipes and valves to ensure consistent and reliable water delivery, fire protection and wastewater collection services throughout our utility service area - $388,042
- Continue working towards implementation of a computerized maintenance management system (CMMS) to leverage our GIS database to more efficiently and effectively manage the tens of thousands of utility and general fund assets worth hundreds of millions of dollars and to contribute to increasing our service levels and provide a better understanding to work that was previously completed (may require the purchase of enhanced asset management and maintenance tracking software in FY 2023)

Public Service Department - Stormwater Utility:

. Complete various stormwater projects included within the approved master plan study to improve community drainage and public safety during significant rain events (Revenues and expenditures are being tracked within a separate enterprise fund – All stormwater-related maintenance and permitting costs have been incorporated within the Village's General Fund):
  . Lakewood Road (East of Kirk Road) Stormwater Improvements – Engineering & Construction (Master Plan - Project #19) - $91,911 (**Carryover Project TO #249**)
  . Gulfstream Road (Lake Worth Road to 10th Avenue) Stormwater Improvements – Engineering & Construction (Master Plan – Project #8) - $448,800 (**Carryover Project TO #277**)
  . Davis Road (Canal Road to 10th Ave) Stormwater Improvements – Engineering & Construction (Master Plan - Project #7) - $1,577,147 (**ARP Funding** is requested to partially support this initial, one-time purchase and installation cost - $1,495,400)
  . Lakewood Road (West of Kirk Road) Stormwater Improvements – Engineering & Design (Master Plan - Project #5) - $80,000

Capital:

I am recommending the following Capital Improvement expenditures, which totals $20,655,590 within all funds in FY 2022:

. $ 6,578,642 within the General Fund Budget, which represents 24% of the total General Fund Budget
. $11,819,090 within the Water & Sewer Enterprise Fund, which represents 37% of the total Enterprise Fund Budget
. $ 60,000 within the Community Redevelopment Agency Funds, which represents 2% of the total CRA Budget
. $ 2,197,858 within the Stormwater Utility Fund, which represents 100% of the total Stormwater Fund Budget

This proposed funding is an increase of $6,242,279 from FY 2021 and $3,628,360 from FY 2020. I firmly believe that we must continue to fund our vehicles, equipment and infrastructure to ensure that our staff has the appropriate (and safe) tools to provide the highest levels of service, programs, activities and projects that our community expects and deserves.

Further, this year, proposed FY 2022 projects to be funded utilizing the recently approved Infrastructure Surtax (One Cent Sales Tax) are included within our Annual Capital Improvement Plan (CIP) for approval by the Village Council (See projects that are italicized and bolded in CIP). These projects, following Council approval, will then be presented to the Infrastructure Surtax Citizen Oversight Committee, as required, to ensure that all expenditures are completed in accordance with County Ordinance 2016-032 and State Statute Sections 212.055(2), 163.3164, 163.3221 & 189.01.

This funding is available to the Village as a result of 56.63% of the voters of Palm Beach County approving a one-cent infrastructure surtax for capital improvement projects and equipment that were not funded due to the recent economic recession and dramatic decreases in assessed property values over the past decade. The chart below outlines the expected distribution to the Village over a 10-year period to complete various capital improvement projects:

1 Year Distribution	10 Year Distribution	10 Year Distribution (PBC Projected 3% Revenue Increase)
$1,256,754	$12,567,545	$14,839,500

Note: Based on 2015 State of Florida Sales Tax Distribution Formula. Additionally, the approved surtax includes a sunset provision that would stop collection of the sales tax once $2.7 billion of total revenue is received. Voter approval for this new sales tax increase was approved in November 2016.

In March 2017, the Village began to receive monthly sales tax revenue distributions and, to date, we have collected $7,354,688 in sales tax funding. As a result, staff developed a list of projects that were approved by the Village Council (May 11, 2017) and presented and approved by our new Infrastructure Surtax Citizen Oversight Committee (June 20, 2017). Each of the projects was confirmed (by the Committee) to ensure that they meet the requirements of the PBC Sales Tax Ordinance as well as state law.

Note: Going forward (and beginning with the FY 2019 budget), proposed sales tax funded projects are included and identified as a sales tax project within our Annual Capital Improvement Plan (CIP), which will be included and approved during our budget

process.

Please Note: The State of Florida has recently approved increasing the capitalization threshold from $1,000 to $5,000, thus, items that would have been included in Capital Outlay are now included in Operating Supplies (except within the proposed FY 2022 Budget, a new line item “55216” for IT related items has been added for those expenditures that would have previously been capitalized so we can still identify those purchases and track those items as non-capitalized assets).

Staffing**:**

The following changes are being requested to the Village’s organizational structure:

. Convert one (1) Volunteer Coordinator position within the Police Department to a Human Resources Director within the Village Manager’s Office to assist with the growing demands of managing all Village personnel, benefits, training and education and various other contractual and legal issues to assist in ensuring the highest quality of work-life for our employees as well as to assist in improving our organization’s overall productivity. Additionally, this position is expected to significantly assist with ensuring that we are compliant with all federal and state personnel related laws as well as the Village’s union contracts and personnel policies within the Village as well as assist in managing the day-to-day personnel activities within the Village. This position will report to the Village Manager.

. Addition of one (1) full-time administrative-type position (the title for this position is being determined) within the Public Service Department to maintain the Village’s Backflow Prevention Program as well as to assist with the growing administrative needs that are being experienced as the Village’s operations continues to grow (This is the only new position being requested within the FY 2022 Budget). This position would be overseen by the Purchasing Clerk.

. Convert one (1) full-time Utility Engineer position to a Project Coordinator position within the Public Service Department to assist with the Village’s growing need to prioritize and complete projects throughout the Village. This position would be

overseen by the Project Manager.

. Addition of one (1) new Code Enforcement Officer to assist with the significant code issues that are evident within the proposed annexation area. This position was previously approved in anticipation of the planned annexations within the western boundaries of the Village's future annexation area (Military Trail area); however, it is recommended to be approved to be immediately hired to assist with enhancing the public safety of the Village. If approved, this position, along with an existing Code Enforcement Officer position, will scheduled to work during evening hours and on weekends to provide improved safety and code compliance within our community at times that staff are traditionally less available to support our Village property owners.

. Re-title the Children's Librarian to Children's/Outreach Librarian within the Library to better oversee/manage the Village's children and adult outreach to our community. This position will also oversee another Library Associate I position (moved from the oversight of the Technical Services Supervisor) to ensure coordinated and appropriate adult outreach throughout the Village.

. Re-locate various (existing) positions throughout the Village to improve operations and productivity as well as customer service to our community and staff. Some of the proposed moves include:

    . Code Enforcement Officer position within the Public Service Department to Police Department

    . Utilities Analyst position within the Public Service Department to the Finance Department

    . Village Clerk's Office will directly report to the Assistant Village Manager within the Village Manager's Office

Note: The PD Chief has submitted a FY 2021 COPS Office Hiring Program Grant. This grant would provide the Village with the cost of two (2) new police officers over a 3-year period with the annual amount of funding decreasing over this time. If awarded, the Village would have up to five (5) years to make the decision to accept this funding, which may be requested during FY 2022

depending on the need within the Village and the expected ability to fill these positions (following the hiring of the existing PD positions that are currently vacant).

. Continued funding to support the Village's internship program is requested within the FY 2022 budget. This program would provide the Village with an opportunity to bring in individuals that maintain significant potential and knowledge that would assist in taking the Village to the next level and ensure that we continue to meet the needs of our community. Further, development of a formal internship program would enable our departments to train talented students and/or new individuals (without government experience) in Village practices and operations with the potential opportunity of hiring them for full-time positions. Thus, providing the Village with a training program to develop the next generation of leaders within our organization.

  Note: The Village continues to work with Palm Beach State College to bring students in to assist with various office responsibilities. These individuals, previously, have been paid by Palm Beach State College, through a school-provided work study program and/or volunteered their time. This has been an excellent opportunity for the Village to obtain additional assistance in meeting our workload needs as well as to provide a learning opportunity for each of the individuals that were brought into the Village.

There are no unfunded positions within the General Fund for Fiscal Year 2022.

Training and Education:

The proposed budget provides funding to support training and education to our greatest assets – our employees. Some of the major areas addressed included: specialized/professional knowledge, ethics, supervisory and management, employee safety, software, cyber security (IT), customer service, communication and health & wellness.

The proposed budget includes an increase of $27,802 from last fiscal year due to addition of the Leadership Academy which will be a multi-week training program, in partnership with a local university (and possibly one of our larger, sister cities in PBC), that

will give our staff who are serving in supervisory and management positions (as well as those preparing for succession planning) a consistent understanding (across all of our departments) about the type of customer service that is expected of all employees as well as an understanding of the Village's expectations on how to best serve in the manager/supervisor role. This new program is expected to also include: information regarding various communication styles that are needed to interact with the public and our staff; an understanding of the staff's personal goals and how to meet their needs, which results in higher work productivity and their desire to remain with the Village; the need to coach and support our staff; an understanding of the Council-Manager form of government and the organizational structure that we currently work under; ensuring a firm understanding of the Village's budget and our financial process; the various legal issues that we are required to uphold; the ability to identify succession planning opportunities as well as other aspects of the HR process (i.e., hiring, evaluations, dealing with different personalities, discipline, promotion, etc.).

Note: Within the proposed FY 2022 Budget, the PD Chief is planning to send another sworn officer position (e.g., Lieutenant) to attend the prestigious Southern Police Institute's (SPI) Command Officers Development course (which was completed previously by our PD Chief and our Assistant Chief and Captain – Patrol). This four (4) month leadership and education program (total of ten weeks) provides enhanced administration training that results in increased professionalism within our Police department and contributes to a safer community.

Salaries:

Our employees are our most valuable asset we have, and they continue to serve as ambassadors for the Village. We are continuing to work to ensure that the Village promotes innovative practices, tools and resources, training and other programs that result in a positive work environment at all levels of the organization. As a result, I am recommending a 2% Across the Board increase and a MERIT increase for all employees (2% based on a pre-determined evaluation score to provide an incentive to serve at the highest levels possible).

Please Note: At this time the Village is engaged in on a new 3-year contract negotiating with the Service Employees International Union (SEIU). The Village has made an initial proposal (See above) for FY 2022 and it is being considered by the union. The union may present an alternative to our initial offer that may work for both parties. As a result, I would request the opportunity to amend the Village's initial proposal to ensure a positive outcome with our new contract discussions.

It should be further noted that the Village is also planning to meet with the Police Benevolent Association (PBA) regarding issues within the existing 3-year contract (approved in FY 2019), which included the above recommended salary increase for FY 2022. As a result, I would request the opportunity to amend the Village's initial proposal to ensure a positive outcome with our new contract discussions.

Currently, the proposed budget includes funding to support the above stated pay increase for all employees that are eligible and are not topped out within their pay grade. Those who are topped out would only be eligible for the proposed Across the Board increase.

Note: It is important that we continue to offer earning opportunities for our staff while also providing the Village with the opportunity to retain our excellent staff members. As a result, we must continue to ensure that we are competitive with our salaries and are continuing to provide an excellent place to work for all of our employees.

As a result, I am requesting the ability to continue negotiating with the SEIU union on the discussed new contractual pay issues to provide for an across-the-board increase. All changes would be brought back to the Village Council.

Annual Sanitation Collection Costs:

The proposed fees for sanitation collection services are proposed to remain constant for a 6th year in a row despite the contractor's request to increase the cost to the Village in accordance with the approved contract – minimum of 3% or CPI (whichever is greater) per year. This year the hauler has increased the cost to the Village by 5.84%, so the Village will be subsidizing the garbage services in FY2022. The proposed garbage, trash and recyclables collection services costs for single family, multi-family and mobile home properties for Fiscal Year 2022 are as follows:

Single Family Homes	$151.20
Multi-Family Homes	$ 94.50
Mobile Homes	$ 94.50

Note: Residential garbage rates were increased six years ago (2015) for the 1st time in seven (7) years to assist with the reduced administrative margin to offset staff costs. As of fiscal year 2022, the Village will be subsidizing the collection and disposal of garbage by $234,132 (budgeted expenditures over projected revenues). The Village may want to consider a rate increase for fiscal year 2023.

Note: The existing hauling/collection contract with Waste Pro of Florida will expire on March 31, 2022; thus, the Public Service Department will begin the process to prepare to go to bid to select a new hauler to provide all residential, commercial and commercial and demolition (C&D) collection (i.e., solid waste, recycling, bulk and vegetation) and billing services. Additionally, the proposed new agreement, is expected to include, but not limited to, ensuring that the hauler will operate under approved financial terms [i.e., better define rate/prince increases for the vendor (e.g., CPI or pre-determined rate, whichever is lower), implement performance measures and penalties, ensure no assignment and/or sale of the Agreement without written consent from the Village, etc.], maintaining existing routes and/or pick-up schedule that the Village's residential and commercial customers receive today, continue to maintain, repair, replace, store and purchase all containers and dumpsters, provide the Village with residential, commercial and C&D collection data on a monthly basis to verify/audit vendor fees and collections as well as payments to the Village, maintain a presence within the Village and participate in Village events and programs/events, develop and provide annual

mailed and electronic public notices/information to all customers, as well as to continue to provide customer service and billing data to the Village.

Drainage & Stormwater Fee:

The proposed budget includes the new stormwater management fee (with no proposed change) that was approved last year to assist in mitigating problems caused by excess stormwater runoff (i.e., flooding) within the Village. The proposed fee is not planned to be changed during FY 2022 and continues to provide a funding mechanism for the construction and maintenance of needed stormwater management facilities. All fees collected would be used for stormwater management expenditures within the Village. These fees, as recommended within the Engineer's Stormwater Study for Justification of Interim Fees," are currently collected as an annual non ad-valorem assessment to support our stormwater issues within the Village are as follows:

	Monthly Rate	Annual Rate
Single Family Residential & Condominiums	$4	$48
Multifamily	$4	$48
Commercial (under 2 ESU's)	$4	$48
Commercial (2 to 4.99 ESU's)	$8	$96
Commercial (5 to 9.99 ESU's)	$15	$180
Commercial (10 ESU's and above	$20	$240

The Village initially created a stormwater utility (Ordinance No. 2015-43) and established interim non ad-valorem assessment rates (Resolution No. 2015-90) for stormwater management services with collections beginning on October 1, 2016. The interim stormwater management assessments were established utilizing the uniform method for collection and funding the Village's stormwater management services and projects in July 2016 (Resolution No. 2016-51). Thus, assessments were defined/provided for all parcels within the incorporated municipal boundaries of the Village of Palm Springs at that time (as well as all parcels

subsequently annexed into the Village) and were included on the 2017 property tax bills issued to property owners in November (similar to the Village's charges for solid waste collection costs) and are collected by the Palm Beach County Tax Collector (payable at the same time as all other annual property taxes and assessments).

However, since the Stormwater Utility was implemented, the Village completed a Stormwater System Evaluation & Improvement Plan ("Stormwater Master Plan"), which identified 25 areas of concern within the Village and identified several infrastructure projects that (if implemented and constructed) would help manage and improve our existing drainage problems as well as to ensure safe streets during (and following) a heavy rainfall or serious storm (i.e., hurricane, tropical storm, etc.).

As a result, the Village Council approved new assessment/rates (Resolution No. 2019-22 - July 25, 2019) and are applied/determined based on an equivalent stormwater unit (ESU) basis (rather than on an acreage basis for commercial properties) based on each applicable parcel's classification and total impervious area attributed to that parcel. One commercial ESU is equivalent to 2,700 square feet of impervious area. These fees are expected to remain constant for approximately the next one (1) to two (2) years. The projected total annual assessment for FY 2022 is expected to be $549,720 (96% of total assessment - $527,731) will be included within the FY 2022 revenue budget).

Note: Since the inception of the Village's Stormwater Utility, nine (9) capital improvement projects (which are included within the Master Plan) are either completed, currently under design and/or under construction (Total project costs expenditures today of $1,009,372). Further, the Village has completed repairs and maintenance on Village stormwater ditches, piping and catch basins to improve stormwater flow/drainage and retention while also ensuring that we are meeting annual state testing requirements. Funding for these projects, as well as improved maintenance of our Stormwater system within the Village, is being provided directly from the fees that were established in 2016.

Water & Wastewater Rates:

The proposed budget reflects the adopted rate study with an average increase of 4%, that is effective for usage in October 2021 billed in November 2021. A new utility rate study has been completed and approved by the Village Council in November 2020 to

provide for a 1% to 4% increase for future fiscal years:

FY 2020 – 0%
FY 2021 – 1%
FY 2022 – 4%
FY 2023 – 4%
FY 2024 – 4%

Economic (Re-)Development:

Finally, I am proposing to continue funding ($100,000) the Village's successful Property Improvement Program (PIP) re-development matching grants that will assist with the redevelopment of residential and commercial areas within our community. This matching grant provides eligible applicants with funding of up to $5,000 to make building related improvements that would improve neighborhood aesthetics and/or business opportunities, reduce code enforcement and policing issues, increase taxable values and contribute to Village pride and "buy-in".

Palm Springs Community Redevelopment Agency (CRA):

On September 16, 2019, the Palm Beach County Board of County Commissioners adopted Resolution No. R2019-1463 delegating the exercise of powers conferred by Chapter 163, Part III, Florida Statutes, "The Community Redevelopment Act of 1969" to the Village Council of the Village of Palm Springs, with the conditions outlined in the Interlocal Agreement.

Note: This was the Village's 2nd request to the County to create a CRA. The PBC Board of County Commissioners considered this request on August 20, 2019 and voted 4 to 3 to direct staff to negotiate an agreement with the Village to establish a partnership prior to final consideration on September 3, 2019. The County did not approve the Village's initial request in 2018 – 3 votes for and4 votes against.

As a result, the Village Council established the Palm Springs CRA (Ordinance 2019-19 - November 14, 2019) with two (2) separate districts - Congress Avenue District (generally north of Forest Hill Boulevard to Summit Boulevard) and the Lake Worth Road District (E-4 Canal west to Military Trail) - and amended the Village Code of Ordinances to create a new Chapter 35 entitled "Community Redevelopment Agency" to accomplish the following:

. Establish the Palm Springs Community Redevelopment Agency as a dependent special district
. Incorporate the CRA Finding of Necessity reports (Resolution No. 2019-09)
. Authorizes the CRA to exercise powers and allowances provided by Chapter 163, Part III, F.S.
. Designated the Village Council plus two (2) members of a CRA District, for a total of seven (7) CRA Board Members, to serve as the Palm Springs CRA Board Identifies the Village Council Mayor and Vice Mayor to serve as the Chair and Vice Chair of the Palm Springs CRA
. Established a quorum for conducting CRA business
. Designated various Village staff to assist in operating the Palm Springs CRA
. Provided for proper receipt of revenues/funding, budget approval, financial disclosure, noticing and reporting requirements

As a result, the Village Council further established the CRA Trust Fund, which is the depository for all Tax Increment Financing (TIF) revenues/dollars received by a CRA. Prior to receiving and/or spending any TIF funding, the governing body (Village Council) was required to create a Redevelopment Trust Fund for the CRA. The Redevelopment Trust Fund will be a major fund in the Village's annual budget and will be audited within the Village's comprehensive annual financial report (CAFR).

Although the Palm Springs CRA will have a single redevelopment trust fund, the accounting for each of the two (2) Districts will be contained within separate internal accounts (one for each district), in keeping with the CRA "best practices" advice from the Florida Redevelopment Association (FRA). All tax increment revenues from each district will be deposited into the respective account to be spent on capital projects, programs and activities within that district.

Finally, the Village Council approved initial Community Redevelopment Plan for the Palm Springs Community Redevelopment Agency (CRA) (Resolution No. 2019-40 – December 3, 2019) pursuant to Chapter 163.360(4), Florida Statutes. The Community Redevelopment Plan serves as the blueprint for all activities undertaken by the CRA. Thus, it is desirable to have a comprehensive redevelopment strategy that includes all projects and programs that the CRA desires.

Note: The approved Community Redevelopment Plan is not a "cost feasible" plan rather it is a "desires" plan. If a project and/or activity is not contained within the plan, it cannot be undertaken by the CRA.

The Palm Springs Community Redevelopment Plan relates only to the newly created CRA area (the Congress Avenue and Lake Worth Road districts), and therefore should only include programs or projects that are located within a district. Capital projects scheduled on a governmental capital improvement plan cannot be undertaken by a CRA.

At a minimum (in accordance with state law), a Community Redevelopment Plan must include the following:

. Legal description of CRA boundaries
. Summary of land uses within the CRA, including number of dwelling units and amount of open space
. Graphics depicting the street network and land uses Neighborhood impact element
. Identification of any capital projects to be undertaken by the CRA (including projected costs)
. Activities to be undertaken by the CRA (i.e., land acquisition, demolition and removal of structures, redevelopment or rehabilitation, comprehensive plan or zoning changes - including density changes or building requirements, etc.)
. Provision for affordable housing in the area Safeguards for carrying out the plan (i.e., a work plan)
. If property is to be acquired, provide for governmental covenants or restrictions on property sold or leased

The Community Redevelopment Plan is (and must be) consistent with the Village's Comprehensive Plan and it may specify comprehensive plan amendments to be undertaken to promote redevelopment.

This initial Palm Springs CRA Community Redevelopment Plan was drafted to meet minimum statutory requirements (Chapter 163.362, Florida Statutes), based on Village Council and community input received over the past 3 years and the two (2) Findings of Necessity Reports that have previously been completed. However, staff is currently reviewing proposals from planning/redevelopment professional(s) and is expected to recommend a firm(s) to be considered by the CRA Board and the Village Council to further engage the public about the future of the CRA, assist in developing the future direction and prioritization of identified long-term redevelopment strategies and recommend modifications to the plan, which are expected to be developed based on economic and market analyses.

Note: The Palm Springs CRA Community Redevelopment Plan may be modified at any time, following the same procedures as required statutorily for adoption of the original plan. However, the Plan should be (and is planned to be) evaluated and updated at least every 7 years (1-year after adoption of the Evaluation and Appraisal Report of the Village Comprehensive Plan).

The Interlocal Agreement between the Village and Palm Beach County Commission in September 2019 established that the County's contribution is exempt from future payments to the Redevelopment Trust Fund once a total payment of tax increment reaches $28 million. Further, the approved Agreement provides that the County tax increment shall be calculated using the same Village operating millage rate even if the County millage rate exceeds the Village millage rate.

The annual payment of tax increment funds to the CRA will be made in accordance with state statute and are calculated utilizing the base property values (or baseline year) as of January 1, 2019 (which was agreed upon by the County and the Village within the approved Interlocal Agreement). Further, and pursuant to Florida Statutes, the Palm Springs CRA, at request of the Village, the County Commission provided that the Palm Springs CRA may extend for a period not to exceed 30 years with no extensions (The Village Council approved the Interlocal Agreement on August 29, 2019).
As a result, the proposed FY 2022 Budget for the Palm Springs Community Redevelopment Agency (CRA) is expected to receive the following revenues:

Palm Beach County – FY 2022 TIF Contribution:	$87,205
Village of Palm Springs – FY 2022 TIF Contribution:	$87,205

Note: As a result of negotiating a base year (within the approved Interlocal Agreement with PBC) to be the beginning of 2019 (rather than at the end of 2019 or the beginning of 2021), the Palm Springs CRA is expected to receive $2.1 million over the 30-year term of the CRA.

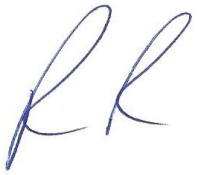
Conclusion:

The proposed Fiscal Year 2021 budget represents a continued commitment to providing a clean and safe community in a fiscally responsible manner. The budget, as presented, represents the fundamental operating tool used to guide Village operations throughout the upcoming year.

As can be expected, this year's budget had its challenges. However, due to realistic budget requests from our departments (in an effort to meet the Village's desire to deliver the highest levels of services available) and continued implementation of the Village's Capital Improvement Plan (CIP), we were able to provide you with a balanced budget that will assist in meeting our goals and ensure that the Village remains a great place to live, work and play.

Further, I want to thank each of the Departments for critically looking at their budget proposals and evaluating each line within their operating and capital budgets. As a result of their commitment and efforts, we are able to present the Village Council with a balanced budget (with the use of reserve funding for only one-time large capital needs and one-time planning consulting services). This ongoing change in (budgeting) culture will continue to enable the departments to operate throughout the year with planned funding while presenting the public with an accurate picture of the funding needed to support the operations of the Village.
I want to personally thank Rebecca Morse, Finance Director, Mariana Ortega, Assistant Finance Director, Kim Glas-Castro, Assistant Village Manager and the Finance Department's staff for the overall coordination and preparation of this FY 2022 Budget. Becky faced several obstacles during this year's budget process and I am grateful for all of her efforts to ensure that we are

proposing a budget that meets our goal of remaining financial conservative while also providing funding to our departments that ensures that we are also financially sustainable for the long-term.



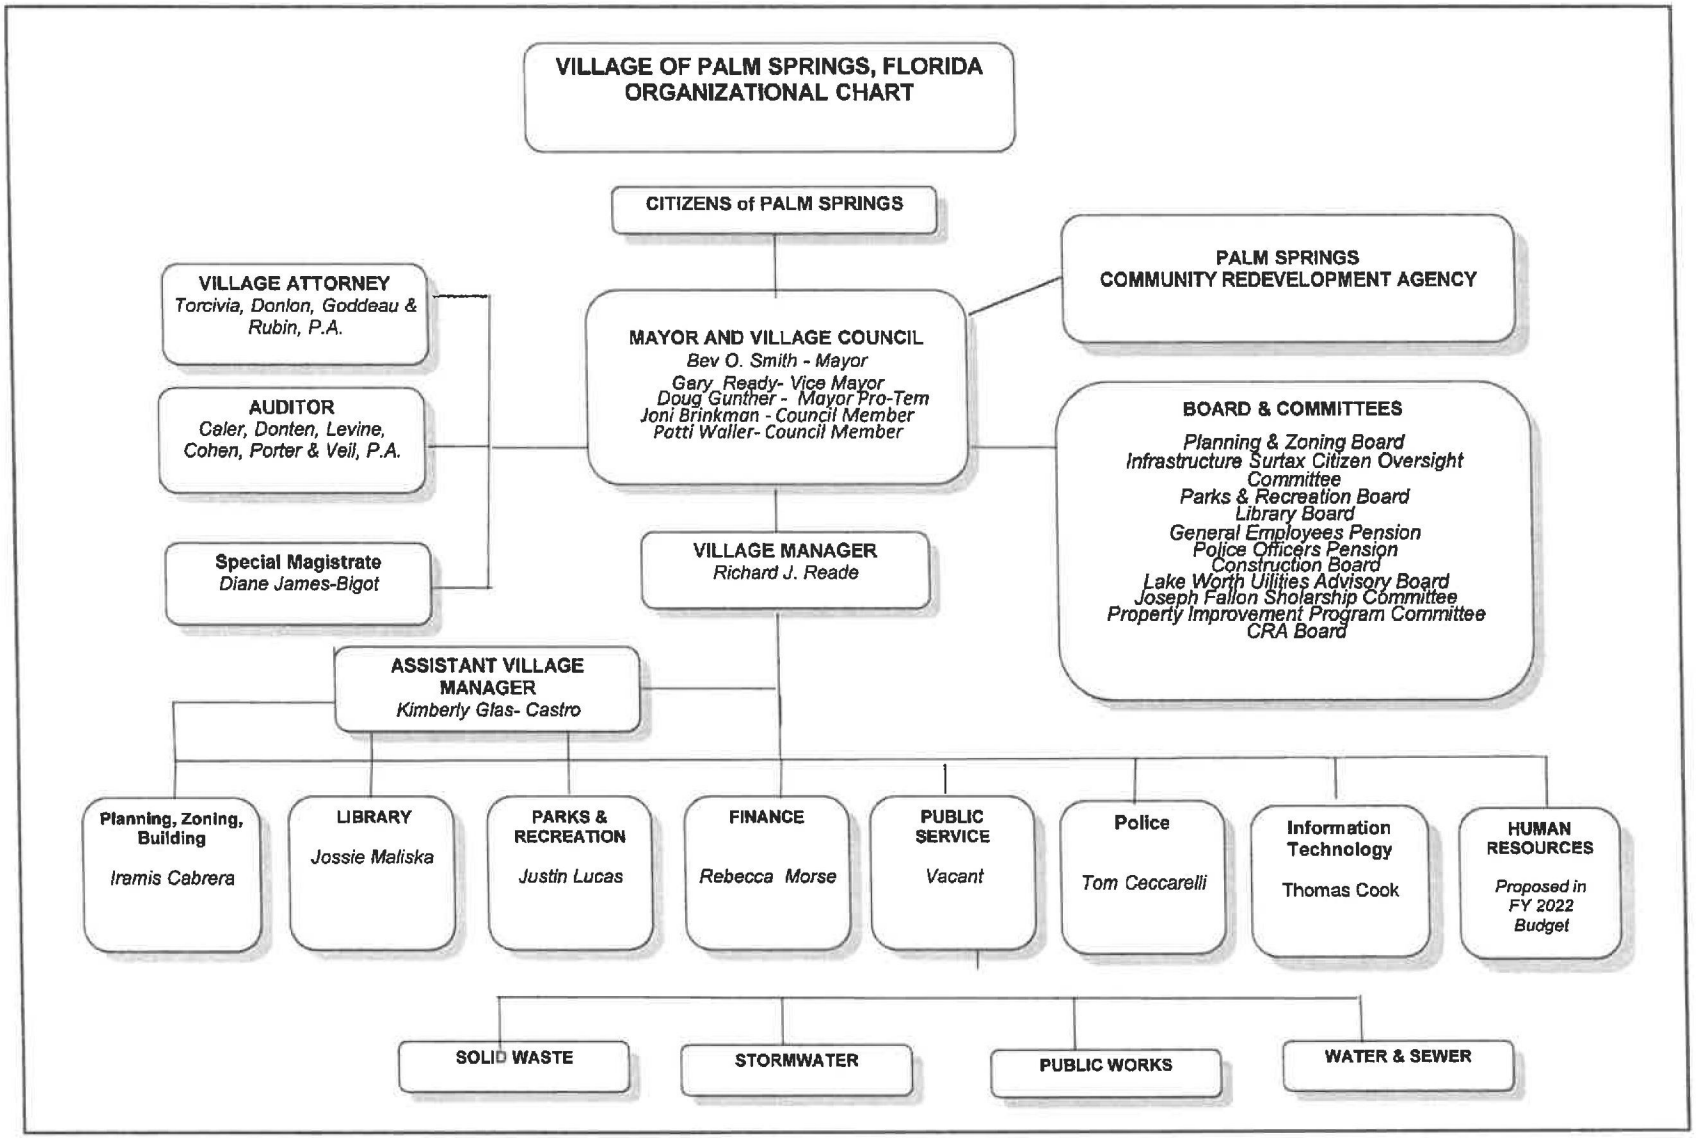
I would like to personally thank all of the Village's staff for their continued assistance and support this past year. Our staff, throughout the Village, continues to provide the highest levels of service while always considering ways to reduce our costs. We have extremely dedicated and cost-conscious staff, which has contributed to the overall success of our organization.

Additionally, I would like to thank each of the Department Directors for all their hard work this year. I value their professionalism, experience and dedication that they offer to the Village. Our neighboring communities look upon the Village favorably and our leadership is a major reason.

Further, I would like to acknowledge each member of the Council for your continuous professionalism, respect for the Village as a whole, collective guidance/decision-making and support for staff. Your efforts have served as the foundation for the success of the organization and have contributed to the Village being "A Great Place to Call Home".

Thank you for the opportunity to serve as the Village Manager for the Village of Palm Springs. I am truly honored to serve in this capacity.

Respectfully Submitted,



Richard J. Reade
Village Manager

PROPOSED BUDGET
VILLAGE OF PALM SPRINGS - FISCAL YEAR 2021 - 2022

THE PROPOSED OPERATING BUDGET EXPENDITURES OF THE VILLAGE OF PALM SPRINGS ARE 28.4% MORE THHAN LAST YEAR'S TOTAL OPERATING EXPENDITURES.

ESTIMATED REVENUES:	MILLAGE PER $1,000	GENERAL FUND	AMERICAN RESCUE PLAN FUND	PALM SPRINGS CRA	DEBT SERVICE FUND	WATER & SEWER ENTERPRISE FUND	STORMWATER UTILITY ENTERPRISE FUND	TOTAL VILLAGE BUDGET
Taxes:								
Ad Valorem Taxes	**3.5000**	$4,995,190		$87,205				$5,082,395
Voted Debt Service Ad Valorem Tax	**0.2994**				$427,716			$427,716

Village of Palm Springs

Executive Brief

AGENDA DATE: September 23, 2021

DEPARTMENT: Planning, Zoning & Building

ITEM 10.1: Approve Final Draft Transportation / Mobility Master Plan - The Corradino Group

SUMMARY:

The Planning, Zoning & Building Department is requesting approval of the final draft of the Transportation/ Mobility Master Plan. It has been identified within the Congress Avenue Corridor Study (May 2016), the Village's 5-Year Capital Improvement Budget (since FY 2017-18), and the Palm Springs Community Redevelopment Plan (December 2020) that there is a need to evaluate and undertake pedestrian/bicycle and "Complete Streets" improvements within the Village to enhance safety and provide enhanced facilities for multi-modal transportation within the Village.

To evaluate local conditions and assist in enhancing the Village's transportation network, aid multimodal connectivity, enhance connectivity to businesses, residential and public/civic facilities, support Complete Streets development and assist in guiding future investments into the community, the Village Council authorized the development of a village-wide Transportation/Mobility Master Plan by The Corradino Group on September 24, 2020. The final draft of the Transportation/Mobility Master Plan identifies a total of thirty-three (33) recommended projects, including six (6) traffic operational intersection improvements, eight (8) traffic calming improvements, the need for safety studies in six (6) high crash locations, twelve(12) bike and pedestrian network extensions and/or complete street improvements and adoption of a village-wide "Vision Zero" policy. The projected budgetary costs by the Village's consulting engineering and planning firm to complete all 33 projects totals $4,643,700.

Note: The Village Council was provided a presentation by The Corradino Group on the preliminary study findings on May 13, 2021, and provided direction on prioritization criteria for the recommendations. Most of this discussion surrounded speeding concerns and measures to reduce speeding, improve traffic flow and enhance safety.

If approved and upon completion, these 33 projects within the Transportation/Mobility Master Plan will improve connectivity and accessibility through the implementation of the physical infrastructure to establish a complete network for each mode of transportation (i.e., walking, bicycling, vehicular, transit). Improving connectivity and accessibility for pedestrians and bicyclists to various areas of the Village will establish a "First & Last Mile" network that supports transit ridership by creating safe and enjoyable connections.

The Planning & Zoning Board considered the proposed final draft of the Transportation/Mobility Master Plan during their September 14, 2021 meeting and offered the following comments: 1) In place of traffic calming measures (P&Z Board members were against speed humps), speeding tickets should be issued to violators, 2) The addition of rumble strips in proximity to Palm Springs Elementary School may alert drivers (about the school zone) better than signage, 3) At the corner of Congress Avenue and Greenbriar Drive/Greenwood Plaza, signage on the mast arms corresponding to the travel direction of each lane may be more effective than the current painting and striping.

The proposed final draft of the Transportation/Mobility Master Plan has been prepared by The Corradino Group, the Village's consulting engineering/planning firm, and reviewed by the Assistant Village Manager, the Planning & Zoning Director, and Interim Public Services Administrator.

Note: The proposed scope of services was discussed with the Village Council during its regular meeting on July 9, 2020, and the "Public Engagement" task was modified to include a Public Workshop (held on March 4, 2021) as well as the development of a Steering Committee that was comprised of twelve (12) local property and business owners. The Steering Committee met two (2) times during this effort (during the kick-off stage on November 10, 2020, and the post-data collection results stage on March 23, 2021), and were afforded the opportunity to provide comments on the initial draft in July 2021 and the draft final report in September 2021.

Note: A Stakeholders Meeting was also held on March 18, 2021, to offer an opportunity for community partners such as Palm Beach County Traffic Engineering, Florida Department of Transportation, School District of Palm Beach County, as well as Steering Committee members, to provide input on preliminary findings.

FISCAL IMPACT:

Funding to support the recommended projects will be considered in future budgets.

The Village will not expend more than the amount within the approved budget as it may be adopted/amended each year for these goods and services.

Note: The Village Council approved funding ($100,000) within the FY 2021 Budget - General Fund to support this project - the Palm Beach Transportation Planning Agency (“TPA”) agreed

to partner with the Village and committed to directly fund up to 50% or a maximum of $50,000 of the fees associated with evaluating components of the Federal-Aid Highway system (Tasks #1, 2 & 3), which included local collector roads. Thus, the remaining 50% of the total project cost (Tasks #4, 5 & 6) will be provided by the Village's General Fund [Note: only $50,000 of the total amount budgeted in FY 2021 for this project ($100,000) will be expected to be expended for this project as it was recently determined that the TPA would directly contract for engineering services and provide direct payment to their selected engineering (and sub-contracted) firm].

APPENDIX D: FDOT AND PALM BEACH COUNTY ROADWAY FACILITIES AND INTERSECTIONS

1.0 »INTRODUCTION

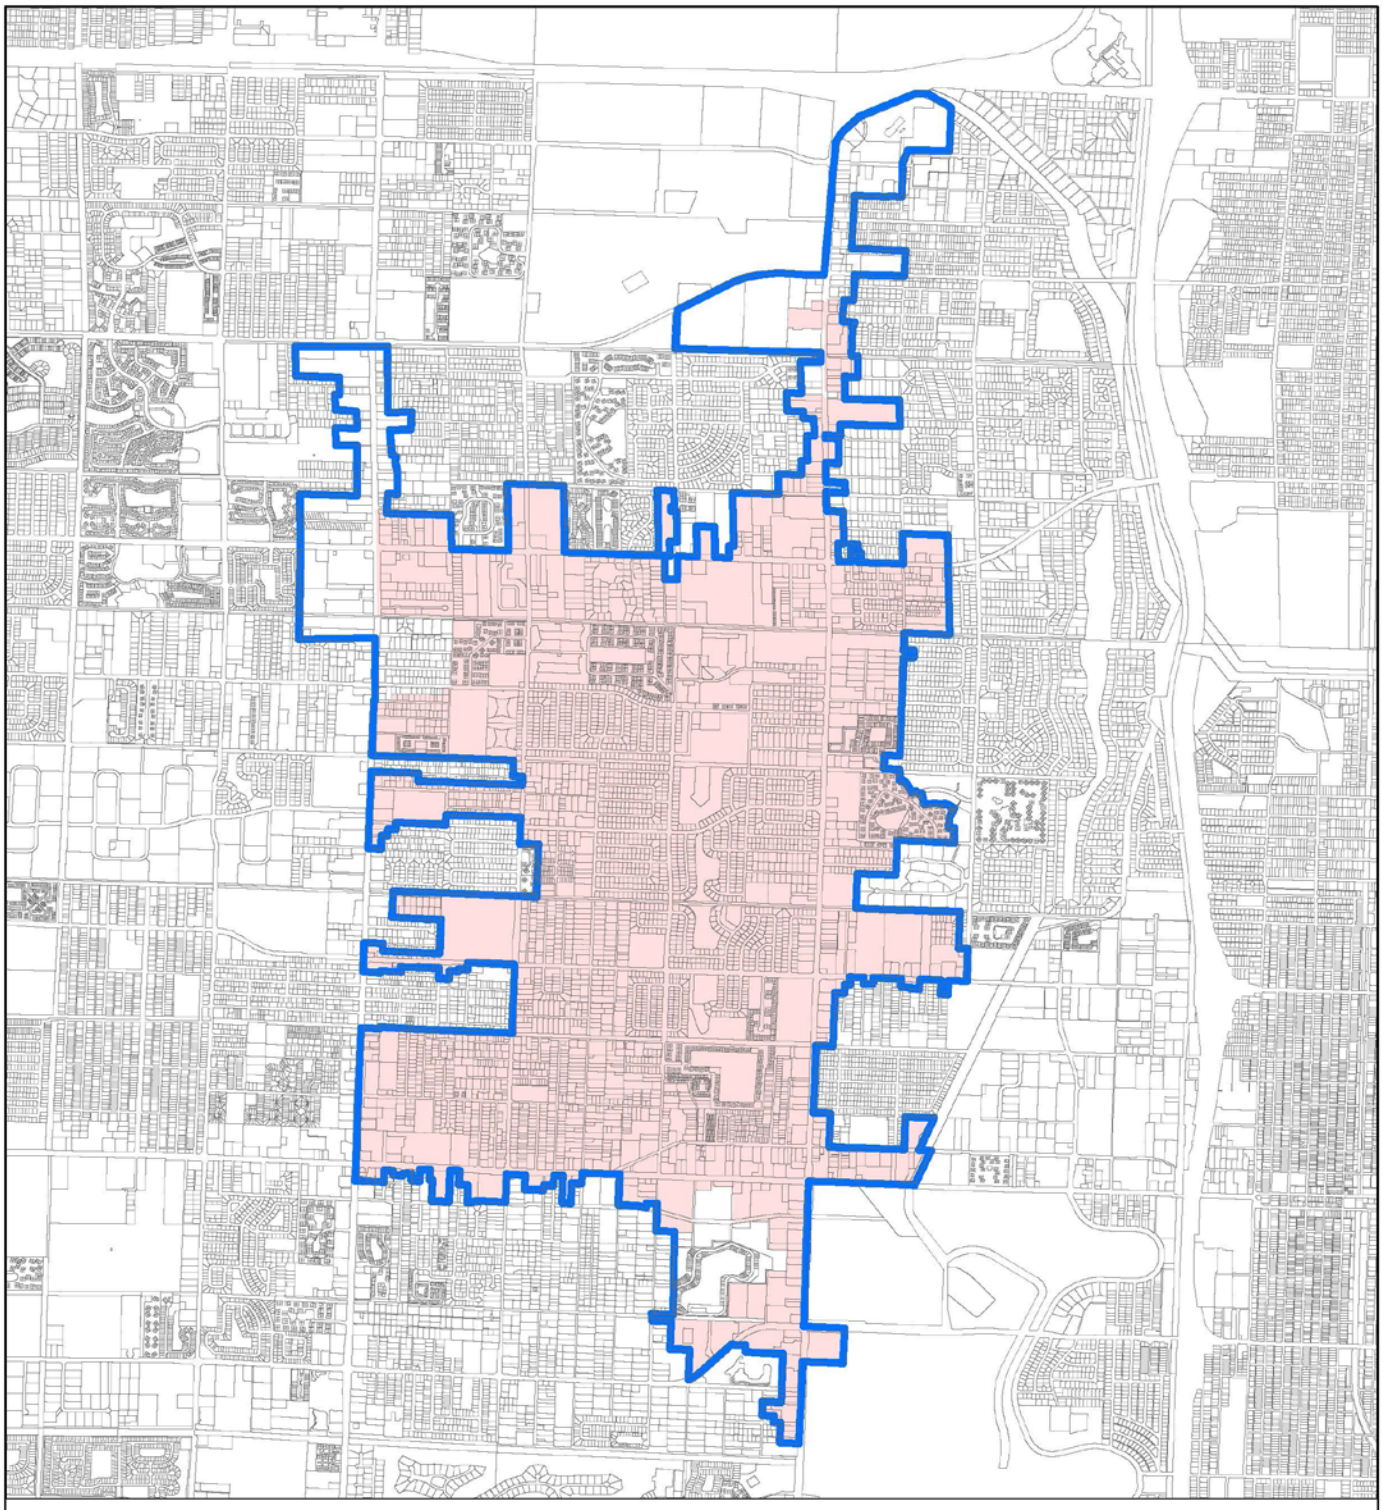
Palm Springs is a village in Palm Beach County, Florida. As of the 2010 United States Census, it had a population of 18,928. By 2018 (the most recent date for which data are available) population has grown to 24,675 (ACS 5-Year Est.). To improve local mobility, the Village evaluated local conditions and created a Mobility Plan to guide future investments to aid multimodal connectivity, thereby enhancing connectivity to businesses, residential and public/civic facilities, and supporting *Complete Streets* development.

The Village currently has pressing needs that include improving connectivity and accessibility, which can be achieved through education and implementation of physical infrastructure to establish a Complete Network for each mode of transportation (Walking, Bicycling, Vehicular, Transit). The evaluation included in this plan addresses safety through a crash analysis using traffic counts and modeling to determine current and future conditions (2030). In planning for future multimodal needs, the plan considers the final "buildout" grid of the bicycle and pedestrian networks. Improving connectivity and accessibility for pedestrians and bicyclists to various areas of the Village will establish a *First & Last Mile* network that supports transit ridership by creating safe, enjoyable connections. While the Village does not need its own municipal circulator, the steps taken to create a multimodal network with *First & Last Mile* connectivity, will allow that option to be a viable choice when the Village is ready.

This plan will accomplish the following main goals:

1. Review of current traffic issues and roadway configurations to develop recommendations for improvements, while considering future planned development opportunities.

2. Review of bicycle and pedestrian facilities and develop policy and project recommendations to improve accessibility to businesses, residential, public/civic facilities, and effect First & Last Mile connections to Palm Tran.



3. Establish local transit needs.

4. Evaluate and implement, as appropriate, Complete Streets/Complete Networks and Vision Zero approaches to facilities for travelers of all ages, and to provide a basis for future project funding and development for the Village, Palm Beach County, and the Palm Beach Transportation Planning Agency (TPA).

5. Establish an overall mobility plan for the Village with projects developed by category:
   - Roadway
   - Bicycle
   - Pedestrian
   - Transit
   - Policy

Study Area

The study area includes the municipal limits of the Village of Palm Springs and additional considerations, as appropriate, for the Village's future annexation areas (expected within the next five years). The following map depicts the study area.

Public and Stakeholder Engagement

Public and Stakeholder Engagement involved multiple workshops, beginning with a public project kickoff in November 2020. A Steering Committee was created, including interested residents and business owners, who provided feedback at two workshops, as well as by email. A separate *peer agency* workshop was also conducted in March 2021, to present the analysis and provide a forum for dialogue. The analysis and preliminary recommendations were then presented in a workshop to the Village Council on May 13, 2021, with the final report to be adopted in October of 2021.

Workshop #1 - November 10, 2020

Workshop #1 was conducted in Village Council Chambers on November 10, 2020. This meeting was a *hybrid* online and in-person meeting, due to the COVID-19 pandemic. At this meeting, staff provided information to the Steering Committee about the project's scope, schedule, and objectives. Additionally, feedback regarding specific areas of concern, including congestion, safety, areas of observed speeding, and bicycling was provided by the attendees. A major concern of the attendees was safety and how that affects the desirability of bicycling and walking. Gaps in the network were also noted for further analysis and review.

Peer Agency Workshop - March 18, 2021

A Peer Agency Workshop was conducted in Village Council Chambers on March 18, 2021. It included representatives of the Florida Department of Transportation (FDOT), District 4; Palm Beach County; and, the Palm Beach Transportation Planning Agency. Members of the public were also included. During this workshop, details of the multimodal analysis, including crash data and future traffic, were discussed to gain feedback on the methodology and generate suggestions of additional areas of interest. Information regarding available resources was requested from the agencies.

Workshop #2 - March 23, 2021

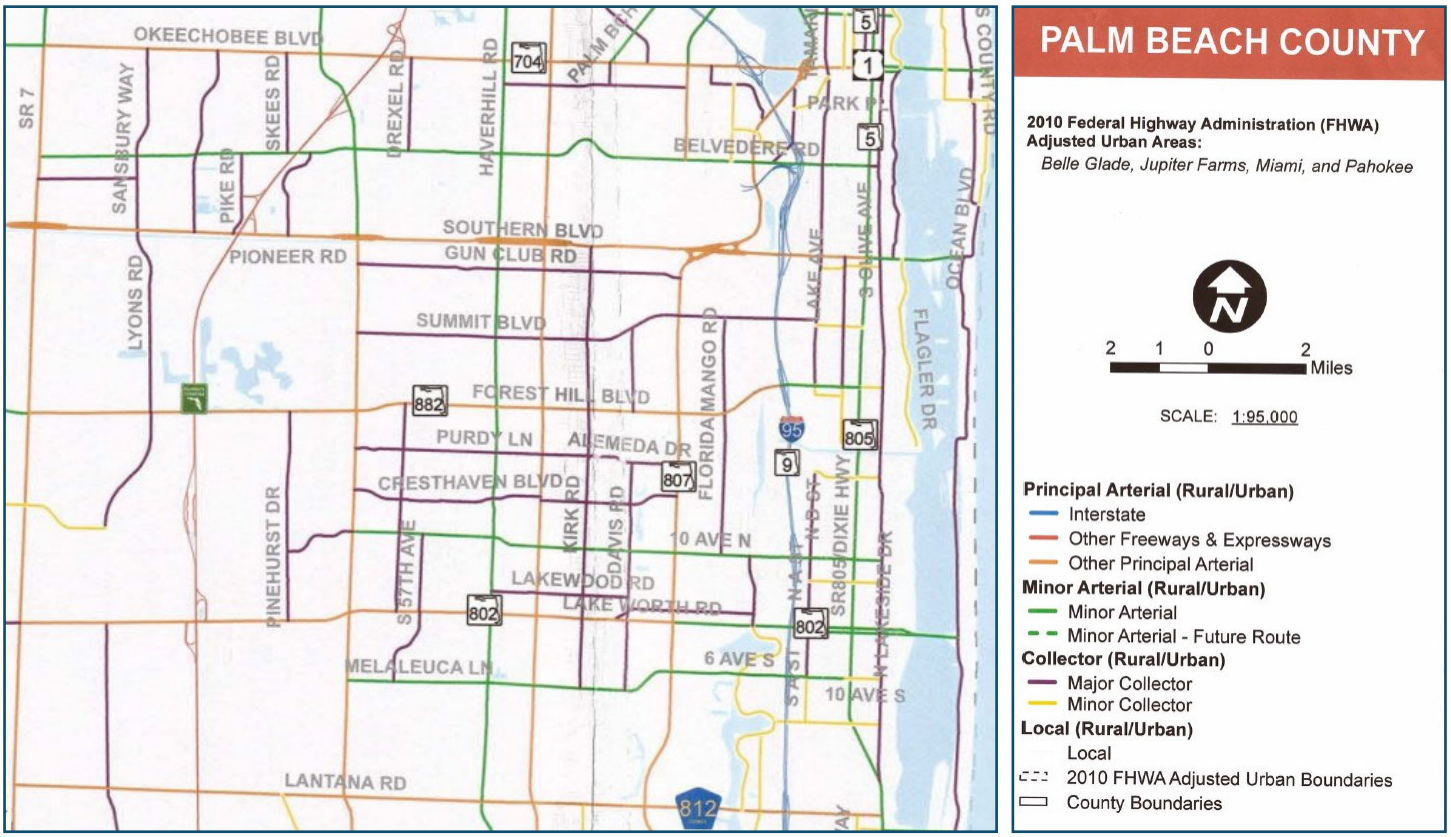
Workshop #2 was conducted in Village Council Chambers on March 23, 2021, using a hybrid of online and in-person participation. The results of the analysis, including areas of speeding, crash locations, and bicycle and pedestrian levels-of-stress were provided to the Steering Committee. Additionally, suggestions were made to use canal-side routes to bridge bicycle network gaps.

Council Workshop - May 13, 2021

A Workshop for the Village Council was conducted on the evening of May 13, 2021, as part of the regularly-scheduled meeting. The analysis and potential recommendations were discussed, and general policy direction was sought.

2.0 »MULTIMODAL EXISTING CONDITIONS AND ANALYSIS

»ROADWAY & TRAFFIC ANALYSIS



The Palm Springs Village Council desires to evaluate local conditions, improve local mobility, and create a Transportation Mobility Plan to guide future investments that will: enhance the transportation network; enhance multimodal connectivity to businesses, residential and public/civic facilities; and, support *Complete Streets* development.

The Corradino Group (Corradino) reviewed the existing conditions of the key road segments and signalized intersections in the Village. The existing roadway configuration, including number of lanes on the road segments and the number of turn lanes at the key signalized intersections, were evaluated to determine the current and future traffic operations at each location. Level-of-service (LOS) is utilized as a basis for project recommendations.

Roadway Characteristics

The 2010 FHWA Functional Classification Map for Palm Beach County (Figure 1) groups roadways into classes, or systems, according to the service provided in the year of analysis. The process considers improvements and additions identified in the State Transportation Improvement Program (STIP).

Figure 1: FHWA Functional Classification Map with Legend

The following road segments were reviewed for safety and traffic operations as part of the roadway assessment.

Military Trail - Southern Boulevard to Melaleuca Lane
Military Trail (SR-809) is a six-lane north/south Principal Arterial with a raised median and posted speed limit of 40 mph.

Kirk Road - Southern Boulevard to Melaleuca Lane
Kirk Road is a two- to four-lane north/south Major Collector with a posted speed limit of 35 mph.

Davis Road - Alemeda Drive to Melaleuca Lane
Davis Road is a two-lane north/south Major Collector with a posted speed limit that varies from 25 mph to 30 mph.

Congress Avenue - Southern Boulevard to Melaleuca Lane
Congress Avenue (SR-807) is a six-lane north/south Principal Arterial with a raised median and posted speed limit of 40 mph.

Florida Mango Road - Summit Boulevard to 10th Avenue
Florida Mango Road is a two-lane north/south Major Collector with a posted speed limit of 35 mph.

Gun Club Road - Military Trail to Congress Avenue
Gun Club Road is a four-lane east/west Major Collector with a bidirectional center left-turn lane with a posted speed limit of 40 mph.

Summit Boulevard - Military Trail to Florida Mango Road
Summit Boulevard is a four-lane east/west Major Collector with a bi-directional center left-turn lane and a posted speed limit that varies from 40 mph to 45 mph.

Forest Hill Boulevard - Military Trail to west of I-95
Forest Hill Boulevard (SR-882) is a six-lane east/west Principal Arterial with a raised median and a posted speed limit that varies from 40 mph to 45 mph.

Purdy Lane - Military Trail to Congress Avenue
Purdy Lane is a two-lane Major Collector with a posted speed limit that varies from 25 mph to 35 mph.

Park Lane/Greenbrier Drive - Military Trail to Congress Avenue
Park Lane/Greenbrier Drive is a two-lane Major Collector with a posted speed limit that varies from 25 mph to 30 mph.

10th Avenue - Military Trail to Congress Avenue
10th Avenue is a four-lane Minor Arterial with a bidirectional center left-turn lane and a posted speed limit of 40 mph

Lake Worth Road - Military Trail to just west of I-95
Lake Worth Road (SR-802) is a four-lane to six-lane east/west Principal Arterial with a raised median and a posted speed limit of 40 mph.

Melaleuca Lane- Military Trail to just west of I-95
Melaleuca Lane is a four-lane to six-lane east/west Principal Arterial with a raised median and a posted speed limit that varies from 35 mph to 45 mph.

Traffic Data Collection

The Palm Beach County Traffic Engineering Division and the Palm Beach Transportation Planning Agency (TPA) provided data for this traffic analysis portion of the roadway assessment. The Traffic Engineering Division publishes Signalized Intersection Turning-Movement Counts for key signalized intersections in the County. The 01/25/21 report was used to establish for the basis of the existing 2020 conditions. The following listing is of these signalized intersections and the date of the manual turning movement counts (MTMC's).

- Southern Boulevard and Military Trail - 2017
- Southern Boulevard and Kirk Road - 2018
- Military Trail and Gun Club Road - 2019
- Kirk Road and Gun Club Road - 2018
- Congress Avenue and Gun Club Road - 2019
- Summit Boulevard and Military Trail - 2018
- Summit Boulevard and Kirk Road - 2020
- Summit Boulevard and Congress Avenue - 2018
- Summit Boulevard and Florida Mango Road - 2019
- Forest Hill Boulevard and Military Trail - 2018
- Forest Hill Boulevard and Kirk Road - 2019
- Forest Hill Boulevard and Davis Road/Tucker Road - 2019
- Forest Hill Boulevard and Congress Avenue - 2018
- Forest Hill Boulevard and Florida Mango Road - 2019
- Military Trail and Purdy Lane - 2019
- Kirk Road and Purdy Lane - 2019
- Congress Avenue and Dolan Road - 2017
- Greenbrier Drive and Congress Avenue - 2017
- 10th Avenue and Military Trail - 2017
- 10th Avenue and Kirk Road - 2017
- 10th Avenue and David Road - 2018
- 10th Avenue and Congress Road - 2017
- 10th Avenue and Florida Mango Road - 2018

- Lake Worth Road and Military Trail - 2018
- Lake Worth Road and Kirk Road - 2018
- Lake Worth Road and Congress Avenue - 2019
- Melaleuca Lane and Military Trail - 2020
- Melaleuca Lane and Kirk Road - 2015
- Melaleuca Lane and Congress Road - 2019
- Kirk Road at Greenbrier Drive - 2019

In addition, Kimley Horn and Associates, Inc. supplemented these traffic counts by collecting new intersection manual turning-movement counts at the following intersections during the AM (7:00-9:00 am) and PM (4:00-6:00 pm) peak hours:

- Kirk Road and Melaleuca Lane (update of 09/21/15 traffic count) - 2021
- Kirk Road and Lakewood Road - 2021
- Davis Road and Lakewood Road (stop-controlled intersection) - 2021
- Davis Road and NE 2nd Avenue (stop-controlled intersection) - 2021

Palm Beach County publishes 24-hour volumes of their permanent count stations. FDOT publishes 24-hour volume tube counts on the Florida Traffic Online site. The Palm Beach County daily tube counts were used in the evaluation of the road segment link analysis and for calculating the crash rates for the safety analysis. If data were not available in Palm Beach County's data, then the FDOT data were used.

North South Road Segments (Date)

- Military Trail - Between Southern Boulevard and Forest Hill Boulevard - 2019
- Military Trail - Between Forest Hill Boulevard and 10th Avenue - 2020
- Military Trail - Between 10th Avenue and Lake Worth Road - 2020
- Military Trail - Between Lake Worth Road and Melaleuca Lane - 2020
- Kirk Road - Between Southern Boulevard and Gun Club Road - 2019
- Kirk Road - Between Gun Club Road and Summit Boulevard - 2019
- Kirk Road - Between Summit Boulevard and Forest Hill Boulevard - 2019
- Kirk Road - Between Forest Hill Boulevard and Greenbrier Drive - 2020
- Kirk Road - Between Greenbrier Drive and 10th Avenue - 2020
- Kirk Road - Between 10th Avenue and Lake Worth Road - 2020
- Kirk Road - Between Lake Worth Road and Melaleuca Lane - 2020
- Davis Road - Between Summit Boulevard and Alemeda Drive - 2019
- Davis Road - Between Alemeda Drive and Melalueca Lane - 2019
- Congress Avenue - Between Southern Boulevard and Forest Hill Boulevard - 2020
- Congress Avenue - Between Forest Hill Boulevard and 10th Avenue - 2020
- Congress Avenue - Between 10th Avenue and Lake Worth Road - 2020

- Congress Avenue - Between Lake Worth Road and Melaleuca Road - 2020
- Florida Mango Road - Between Summit Boulevard and Forest Hill Boulevard - 2019
- Florida Mango Road - Between Forest Hill Boulevard and 10th Avenue - 2019

East West Road Segments (Date)

- Gun Club Road - Between Military Trail and Kirk Road - 2020
- Gun Club Road - Between Kirk Road and Congress Avenue - 2020
- Summit Boulevard - Between Military Trail and Kirk Road - 2020
- Summit Boulevard - Between Kirk Road and Davis Road - 2020
- Summit Boulevard - Between Davis Road and Congress Avenue - 2020
- Summit Boulevard - Between Congress Avenue and Florida Mango Road - 2020
- Forest Hill Boulevard - Between Military Trail and Congress Road - 2020
- Forest Hill Boulevard - Between Congress Road and I-95 - 2019
- Alemeda Drive - Between Military Trail and Congress Avenue - 2019
- Park Lane/Greenbrier Drive - Between Military Trail and Congress - 2019
- 10th Avenue - Between Military Trail and Davis Road - 2020
- 10th Avenue - Between Davis Road and Congress Avenue - 2020
- Lake Worth Road - Between Military Trail and Kirk Road - 2019
- Lake Worth Road - Between Kirk Road and Congress Avenue - 2019
- Lake Worth Road - Between Congress Avenue and I-95 - 2019
- Melaleuca Lane - Between Military Trail and Kirk Road - 2020
- Melaleuca Lane - Between Kirk Road and Congress Avenue - 2020
- Melaleuca Lane - Between Congress Avenue and I-95 - 2019

Kimley Horn and Associates, Inc. collected bi-directional traffic speed and volume tube counts at the following roadway segments from 02/09/2021 to 02/11/2021.

- 10th Avenue - Between Kirk Road and Congress Avenue
- S. Congress - Between Forest Hill Boulevard and Summit Boulevard
- Alameda Drive - Between S. Congress and Kirk Road
- Davis Road - Between Greenbrier Drive and 10th Avenue N
- Lake Worth Road - Between Kirk and S. Congress Avenue
- Lillian Road - Between Congress Avenue and Lori Drive
- Lorene Drive east of Congress Avenue
- Melaleuca Lane - Between Kirk Road and Davis Road
- Greenbrier Drive - Between Kirk Road and S. Congress Avenue

Appendix B includes the traffic data collection sheets including the manual turning movement counts and the speed and volume ADT tube counts.

Traffic Operational Analysis (Existing 2020 and Future 2030)

The FDOT peak-season conversion factor (PSCF) was applied to the manual turning-movement counts to adjust the traffic to peak season volumes. The PSCF is used to convert a 24-hour count representing the average weekday daily traffic to peak season weekday average daily traffic for travel demand forecasting planning models. The FDOT PSCF category reports are included in Appendix B. In addition, an annual growth rate was applied to the year the count was conducted to bring the data to 2020 existing conditions. Palm Beach County Traffic Division publishes a Historic Traffic Growth table which was used to calculate a historic annual growth rate as well as future growth rates. These growth rates were used for each applicable road segment and intersection to forecast the traffic within Palm Springs.

Intersection capacity/level-of-service analysis was conducted for the thirty-one (31) intersections using software based on the Highway Capacity Manual (HCM) methodology. The analyses were performed for morning and afternoon peak hour conditions following capacity analysis/level-of-service procedures outlined in the 2010 Highway Capacity Manual (HCM) using Synchro 11 software. The traffic operational analysis scenarios included the existing conditions for 2020 and the future conditions for 2030. The results of the existing 2020 and future 2030 capacity analyses are summarized in Tables 1 and 2 on the following pages.

Exhibits that depict the traffic volumes at the intersections for the existing and background traffic scenario are provided in Appendix B. A copy of the Synchro reports for each peak hour period for this scenario has been provided in the Appendix.

LOS Delay provided in seconds for Signalized intersections. LOS Control Delay provided in seconds for Unsignalized intersections.

Road Segment Link Analysis (Existing)

In addition to the intersection analysis, a road segment link analysis was performed to determine if there is enough capacity along the north/south and east/west corridors in the Village. Palm Beach County and FDOT publish 24-hour tube counts on the Florida Traffic Online site. Palm Beach County publishes 24-hour volumes as part of their permanent count stations. The Palm Beach County daily tube counts were used in the evaluation of the road segment link analysis and for calculating the crash rates for the safety analysis. If data were not available in Palm Beach County's data, then the FDOT data was used.

These Average Daily Traffic Volumes from the daily tube counts were compared with Palm Beach County's Article 12 Traffic Performance Standards Table 12.B.2.C-1 1A (LOS D Link Service Volumes). These Palm Beach County Standards are based on the information included in the generalized service volume tables of the FDOT LOS Handbook (2009 edition). Level-of-Service (LOS) is a qualitative assessment of a road's operating conditions and is represented by the letters A through F, where A is free flow (best condition) and F is the most congested condition.

The existing 2020 conditions are based on the Average Daily Traffic Volumes from the previously referenced Palm Beach County or FDOT tube counts. The future 2030 conditions are based on traffic forecasting from the Palm Beach County Traffic Division Historic Traffic Growth Table. The growth rates used to forecast the future road segment volumes are the same rates from the Historic Traffic Growth Table applied to the manual turning movement counts for the intersection analysis. Tables 3, 4, 5 and 6 depict the road segment LOS based on the Average Annual Daily Traffic for the north-south and east-west corridors.

Speed Evaluation and Context Classification

The following discussion is highly technical but needed to assure this analysis meets standards.

The 2018 FDOT Speed Zoning for Highways, Roads and Streets, provides guidance concerning the relationship between posted speed limits and actual speed profiles along roadways. The 85th percentile speed represents the speed at, or below which 85% of the vehicles travel. The mean speed is the summation of measured speeds divided by the number of vehicles observed, which is a common measure of central tendency for speed. The 10-MPH pace represents the 10 MPH range in which the highest percentage of vehicles are traveling.

The posted speed limit is rounded to the nearest multiple of 5 MPH of the observed 85th percentile speed, or the upper limit of the 10 MPH pace, whichever is less. Speed limits of 4 to 8 MPH less than the 85th percentile speed are authorized if supported by a supplemental investigation that identifies the support of a context classification target speed. The target speed is influenced by elements of roadway design that are governed by design speed, as well as the form and function of the adjacent land uses beyond the right-of-way. When determining the speed limit based on this target speed, consideration is given to the land use context classification and allowable speed range as provided in Chapter 201 of the 2019 FDOT Florida Design Manual (FDM).

The use of context classifications to determine criteria for roadway design elements is consistent with national best practices and direction. The National Cooperative Highway Research Program (NCHRP) informs Federal Highway Administration (FHWA) and American Association of State Highway Transportation Officials (AASHTO) regarding key elements of this guidance. FDOT's Complete Streets Policy establishes the context classification of a roadway corridor which is used to determine criteria in the FDM.

Based on these principles, the speed data collected for this analysis produced 50th percentile (mean) and 85th percentile speed volumes for each of the study corridors. Standard traffic engineering principles call for the 85th percentile speed volume to be considered the free flow speed (FFS) for which the posted speed limit is set. Table 7 includes a summary of the speed/volume tube counts for each of the road segment corridors. Appendix B has the traffic data for each corridor. Table 7 depicts the relevant speed and volume data for the nine corridors evaluated for travel speeds.

Table 7: Speed/Volume Tube Count Summary

Road Segment	Direction	Percentiles				
		85th	Average	Median	Posted Speed	ADT
Congress Avenue (N-S)						
Forest Hill Boulevard to Summit Boulevard	Northbound	51	45	45	40	24,216
	Southbound	48	40	40	40	
Davis Road (N-S)						
Greenbrier Drive to 10th Avenue	Northbound	36	30	30	25	3,167
	Southbound	31	26	26	25	
Lilian Road (E-W)						
Congress Avenue to Lori Drive	Eastbound	33	27	27	20	2,859
	Westbound	30	25	25	20	
Dolan Road (E-W)						
Congress Avenue to Kirk Road	Eastbound	36	30	30	25	4,933
	Westbound	44	35	33	25	
Lorene Drive (E-W)						
East of Congress Avenue	Eastbound	30	22	22	20	171
	Westbound	28	20	19	20	
Park Lane (E-W)						
Kirk Road to Congress Avenue	Eastbound	33	28	28	25	4,416
	Westbound	32	27	27	25	
10th Avenue (E-W)						
Kirk Road to Congress Avenue	Eastbound	44	37	38	40	27,772
	Westbound	44	38	38	40	
Lake Worth Road (E-W)						
Kirk Road to Congress Avenue	Eastbound	48	40	40	40	26,697
	Westbound	46	40	40	40	
Melaleuca Lane (E-W)						
Kirk Road to Davis Road	Eastbound	49	42	43	45	24,610
	Westbound	45	38	38	45	

The 85th percentile speed along each of the corridors all exceeded 4 MPH over the posted speed limits. Additional measures to slow traffic on each of these roadway corridors is necessary as the 85th percentile speeds are in some cases above the 4-8 MPH thresholds for traffic calming measures.

Safety Review/Crash Analysis

A review of the most recent 5-year crash data, including the studied intersections and road segments, was completed. The crash data were obtained using Signal Four Analytics for the period between December 1, 2015 through December 1, 2020. A summary of the documented crash data for the 5-year review period along the road segments and intersections within the project limits is summarized in Appendix B.

»PEDESTRIAN & BICYCLE MOBILITY

Walking and Biking are known as *active forms* of transportation i.e. those modes that are self-propelled, and human-power driven. Investing in walking and bicycling assets by the Village delivers important benefits to the community. These include:

Accessibility for All: Walking and bicycling are affordable transportation options available to everyone to allow access to opportunity.

Sustainability: Increasing the proportion of travel that is made without reliance on fossil-fueled vehicles: improves personal and area-wide environmental health: reduces greenhouse gases; and helps reduce global warming. Replacing auto drivers with walkers/bicyclist can play an important part in a comprehensive strategy to improve air quality, reduce atmospheric heat, retain ozone and reduce imminent sea level rise that is critical to sustainability.

Quality-of-life and Safety: Improving the quality-of-life for Village residents will accompany decreasing roadway congestion, providing shared-use paths, improving street redesign, and making pedestrian-oriented traffic operational improvements. These actions can result in safer driving as well as fewer user conflicts.

Vision Zero: Vision Zero policies encourage walking and bicycling by improving safety with targets of zero traffic-related fatalities and serious injuries. This concept of safety is grounded in six key principles:

- Traffic-related fatalities and serious injuries are preventable and unacceptable;
- Human life takes priority over mobility
- Human error is inevitable, so the transportation system should allow for it to happen without death or serious injury
- A system-level approach to safety should be adopted to effect change
- Safe human behaviors, education, and enforcement are essential contributors to a safe system
- High speed is a primary cause of traffic death and serious injury; it should be managed with sensitivity to vulnerable road users.

Personal Health: Walking/biking helps people meet recommended physical activity levels, thereby reducing chronic disease and associated health care costs. Improved walking infrastructure for recreation and daily or purposed trips such as travel to work, to school, and shopping and making errands creates a sustained increase in physical activity, and a healthier community.

Economic Health: Business and employee relocation decisions are increasingly being made based on quality-of-life considerations that include the walkability of neighborhoods and employment centers. Active transportation infrastructure also generates tourism revenue, supports local business, and creates jobs.

Improved Transit Use: As first-last mile modes, walking/bicycling can increase the transit shed, market capture and ridership for existing and future high-capacity transit investments.

VISION

Walking and Bicycling in Palm Springs is to be safe, convenient, comfortable, and a key part of viable transportation options to: connect people to places for short distances; connect people to transit and other shared mobility options; foster recreational and economic development opportunities; improve personal health and the environment; and, elevate quality-of-life.

GOALS

» **Integration:** Integrate walking and bicycling into community planning to enhance livability, health, transportation, the environment, and economic development.

» **Network:** Integrate walking and bicycling in community planning to develop a safe, comfortable, and attractive walking and bicycling network that connects people of all ages, abilities, and from all neighborhoods to the places they want to go.

» **Maintenance:** Maintain the walking and bicycling system year-round to provide confidence and assurance that facilities provide a mobility alternative that is more enjoyable, healthy, safe and secure than driving an auto.

» **Programs:** Promote the safety and attractiveness of walking and bicycling through education, encouragement, and enforcement programs.

» **First & Last Mile - Transit Connections:** Integrate pedestrian and bicycle facilities with transit (routes, stations, and stops) to increase its use for long trips, while reinforcing a culture of walking and biking for neighborhood trips and improving the viability of shared non-motorized modes.

Concepts & Approach

Walking: is the primary mobility mode as it is the beginning and end of every trip by any mode. While it is door-to-door as a primary mode, it is door-to-vehicle, as a "first & last mile" mode for many people. To facilitate pedestrian mobility, adequate infrastructure in a complete system is necessary. The system must include universal design concepts, where possible, and ADA facilities, where necessary, to provide access for all levels of individual ability. As a "first & last mile" mode, pedestrian infrastructure must be prioritized to facilitate trips to mass transportation and personal networked transportation to allow greater freedom from self-driving automobile use to meet daily needs, i.e., employment, social and recreational travel.

Bicycle: The bicycle mode encompasses a modal group of personal travel options, generally defined as a non-motorized or electric-powered vehicle, generally for one person, intended for off-road use. There are variations of travel speeds, maximum speeds, travel time, travel range and storage/temporary parking needs. The group includes:

- Personal bicycle
- Electric E-bike
- Shared Bicycle
- Roller Blade (inline or fours)
- Skateboards
- Shared Electric Scooters and Personal Electric Skateboards

Consideration of walking and use of the bicycling group mode as a sustainable modal strategy requires discussion of two concepts: access and mobility.

Access is the ability to meet a person's daily needs with a minimum of travel and cost. Access has a strong relationship to urban design and land use, as the emphasis is satisfying needs with minimum travel.

Mobility is the ability to get around by a variety of means. Mobility does not seek to minimize travel, but to lower the time and cost of it, while making the experience convenient, safe, secure and enjoyable.

The primary concept is to develop "pathways." They are the mobility and access infrastructure network that helps reduce the distance and time it takes people to travel between their origin and destination, while simultaneously improving the user experience in qualitative ways. The core concept of the pathway is to provide a context-specific set of mobility and access improvements that extend to and from origins/destinations and other modes, particularly transit.

There are central questions to consider that frame the concepts of access and mobility for each of the modes.

- How far will pedestrians walk to their destination?
- What environmental factors influence their route, distance and choice?
- How far will bicyclists ride for purposed trips (commuting)?
- What environmental factors influence their route, distance and choice to ride?
- What environmental factors influence recreational bicyclists' choice to ride?
- How far will pedestrians walk or bicyclists ride to transit?
- What environmental and transit factors affect their choice?

Walk Distance: Personal Characteristics, Age and Disability

If environmental considerations are set aside, the answer to the question of how far people walk to their destinations or to transit has great variability by age, gender, ambulatory status, and even cultural biases. The variance from person to person can be significant. The general consensus in the field of urban planning on walking distance is that ½ mile is the maximums for the general population; however, even this can vary based on terrain, weather, time-of-day, built environments, adjacent land use, level of built environment, maintenance, and the perceptions of safety and security.

On flat terrain, without obstruction, people walk at 3.16 mph (national average, National Personal Transportation Survey (NPTS)). (The MUTCD, for purposes of intersection crossings uses 4.0 ft. /second, about 2.7 mph) On average, the consensus range of ¼ to ½ mile represents a 5 to 10-minute walk on flat terrain with sidewalks in good maintenance, and not including wait time at intersections and curb cuts.

A 1,000 ft. walking distance is recommended as general practice, and a 25% shorter distance is recommended for seniors. Average walking speed for seniors ranges widely from a low of 2.0 mph to 3.1 mph. The shorter range corresponds with the low range of senior walking speeds, again underscoring

that the key determinant from the pedestrian's point of view for walking is time more than it is distance. The planning profession uses the proxy of distance because evaluations and improvements are based on distance measurements.

For people using wheelchairs, research indicates single non-stop trip distances for people in self-propelled wheelchairs at about 600 ft, and about 1,130 ft. for powered wheelchairs. At walking speeds for average self-propelled wheelchairs and 2½ to 5 mph for most powered wheelchairs (some travel up to speeds of 10 mph), this corresponds to approximately 3-minute trip times for each.

Table 8: Pedestrian Walk Distance & Time

Walking Distance and Time Low to High Ranges			
Pedestrian Type	**Walking Speed**	**Distance in 5 Minutes**	**Minutes for 1,000 feet**
Able-bodied Adult	2.7 mph low	1,188 ft.	4 minutes, 13 seconds
	3.1 mph average	1,364 ft.	3 minutes, 40 seconds
	4.0 mph high	1,760 ft.	2 minutes, 50 seconds
Senior Person	2.0 mph low	880 ft.	5 minutes, 41 seconds
	3.1 mph high	1,364 ft.	3 minutes, 40 seconds
Wheelchair	2.5 mph low	1,100 ft.	4 minutes, 33 seconds
	5 mph high	2,200 ft.	2 minutes, 16 seconds

Comparable data for the Bicycle and related modes are shown here.

Table 9: Bicycle and Other Personal Modes Ride Distance & Time

Mode	Average Speed	Maximum Speed	Distance in 10 Minutes (Average Speed)	Quarter Mile Time (Average Speed)
Human-Power Bicycle	8 mph	20 mph	1.33 miles	1 minute, 53 seconds
E-Bicycle	20 mph	20 mph	3.33 miles	45 seconds
Skateboard	10 mph	15 mph	1.67 miles	1 minute, 30 seconds
Electric Skateboard	22 mph	22 mph	3.67 miles	41 seconds
Roller Blade	8 mph	10 mph	1.33 miles	1 minute, 53 seconds

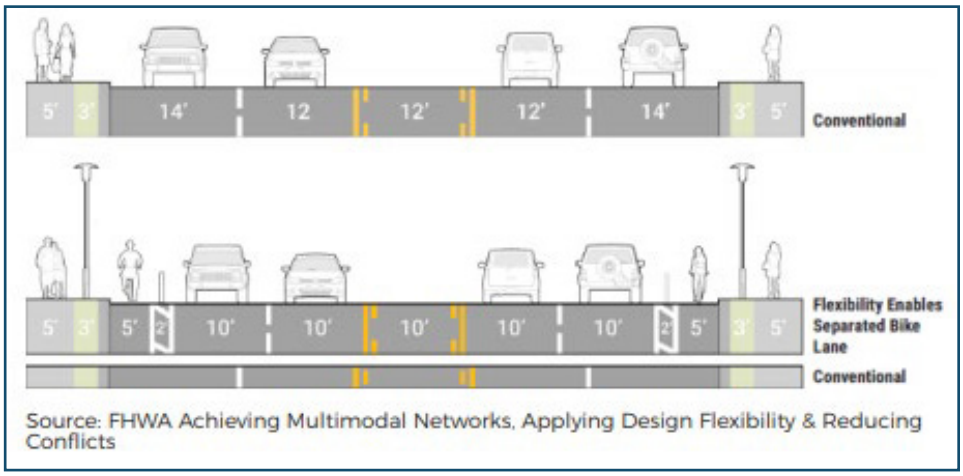
Complete Streets

The term "Complete Streets" refers to designing streets for people of all ages and abilities who walk, bicycle, use other personal modes, ride transit, use personal or shared vehicles, and drive. The Complete Streets approach is to balance the competing needs of these different transportation modes within the unique contexts of each roadway. The walking recommendations that will be developed by this plan will support Complete Streets principles. The following is excerpted from the Palm Beach TPA Complete Streets Design Guidelines.

> Flexibility in Design: The Federal Highway Administration (FHWA) and the United States Department of Transportation (USDOT) have embraced *flexibility in design*, to allow designers to use professional judgment in applying guidelines rather than applying a purely prescriptive

design approach. Consistent with that philosophy, FHWA issued a revision in the Federal Register to *23 CFR 625* on May 5, 2016. The revision reduced from 13 to two the controlling design criteria on roadways with design speeds under 50 mph - the two remaining are design loading structural capacity and design speed. For roads with design speeds of 50 mph, or greater, there are **ten** controlling design criteria. The practical effect of this change is to enhance the practitioner's ability to exercise flexibility in roadway design based on engineering judgment and local context. According to *Toward More Flexible Design (FHWA-HRT-16-003)*, Hilton and Goodman (2016) note that the change to the controlling criteria issued in 23 CFR 625 are significant steps to support FHWA's partners and stakeholders as they work to implement projects that result in better and more sustainable outcomes, such as improved connectivity and mobility for people of all ages and abilities, enhanced safety, and increased equity. The changes to the controlling criteria also demonstrate how much the focus of the U.S. federal-aid highway program has evolved since its creation. Today, FHWA focuses on the safety of all users of the transportation system and on connecting people to work, schools, and other important destinations in ways that meet the needs of all modes and are sensitive to community character, livability, and quality-of-life. Several street design elements fall within flexibility in design guidance provided by FHWA and FDOT. Flexibility is provided through ranges in design values. Design elements include:

- Bicycle facility type
- Marked crosswalks
- Through travel lane width
- Turn lane width
- Design speed
- Curb return radii



The pedestrian realm is comprised of four zones that serve complementary purposes. Many streets only have the pedestrian zone, and typically this causes an uncomfortable walking environment, having no separation from traffic and many obstructions in the sidewalk.

Sidewalk Zones excerpted from the Palm Beach TPA LRTP

- Frontage Zone is the area between buildings, fences, or yards, and the pedestrian zone. For commercial or mixed-use buildings that abut the sidewalk, this zone buffers building activities, such a door openings or window shopping from the active area of the sidewalk. This area is also for outdoor café space, and outdoor displays.
- Pedestrian Zone is the area dedicated to walking or moving along the sidewalk. Obstructions, displays, planters and street furniture should not extend into this zone. The clear width, surfaces, grades, lighting are important to welcoming users of all ability. Universal design is critical to this zone.
- Furnishing Zone is the area between the curb and the sidewalk. It contains street trees, grasses and other landscape materials, benches, transit shelters, lighting, signal poles and controllers, parking meters and trash receptacles. Locating these in the furnishing zone keeps the pedestrian zone clear for movement by pedestrians at all levels of mobility.
- Curb Zone is the area between the edge of the roadway and the furnishing zone. The curb zone should remain clear for access to parked vehicles where street parking is permitted.

Lane width is a key component in distributing available space on streets. Lane width also governs vehicle speed and effects the safety of all users. The highway standard of 12-foot lanes does not provide the flexibility needed for Complete Streets, where vehicle speed must be balanced with safety and access for pedestrians, bicyclists, and transit. By reducing lane widths to the more context-appropriate widths of 10 to 11 feet, right-of-way space can be made available for the addition of bicycle lanes and wider sidewalks. The FHWA graphic below illustrates how lane width reductions create space without reducing lane capacity for vehicles.

Excerpted from the Palm Beach County TPA LRTP

The TPA Governing Board adopted a Complete Streets Policy in March 2016 and the Complete Streets Design Guidelines in October 2017.The Palm Beach TPA promotes Complete Streets by prioritizing the funding of Complete Street infrastructure projects, providing educational opportunities, and encouraging local jurisdictions to adopt and implement local Complete Streets policies. This Complete Streets Policy is consistent with the Palm Beach TPA's adopted Long Range Transportation Plan (LRTP) goals, objectives, and values. Specifically, the LRTP seeks to:

- Improve the safety and security of the transportation system for all users;
- Maximize the efficiency of the existing system before expanding it;
- Provide multimodal access to areas with low-income and/or traditionally underserved populations;
- Support context-sensitive implementation of Complete Street principles;
- Support economic growth and development through projects consistent with local comprehensive plans and with minimal environmental impacts;
- Prioritize non-motorized facilities at all transit hubs, interchanges, bridges; and
- Invest in an efficient, convenient, and attractive mass transit system.

Approach: Pedestrian Level of Transportation Stress (LTS) Methodology

The Village's pedestrian network is defined by its inventory of pedestrian facilities, specifically the network of sidewalks, signalized and un-signalized crosswalks or stop bars, residential shared streets, and off-street paths. The pedestrian infrastructure is greatly underutilized because potential pedestrians need safe, comfortable and convenient continuous paths that are part of a well-designed and maintained network. The important point is that it is not possible to complete and improve the network without first

building a working understanding of what people need, what infrastructure it takes to attract pedestrian travel, and recognizing that attracting new pedestrians to use the network varies depending on age, health and walking experience of the population. Market research can inform the design of the product to address these issues. That product is the pedestrian infrastructure network, and the marketing concepts that have been developed are called Level-of-Transportation Stress (LTS).

Past research has demonstrated that people have varying levels of tolerance for traffic stress, which is a combination of perceived danger and other stressors, such as noise and exhaust fumes associated with walking close to and crossing automobile traffic.

While a small fraction of the population will tolerate walking along an unbuffered sidewalk with heavy or fast traffic, a large majority is "traffic-intolerant," willing to tolerate only a small degree of traffic stress. LTS is the methodology that rates components of the pedestrian network by their suitability for segments of the population defined by their ability to tolerate different levels of transportation stress. The infrastructure is classified by one of these four ratings.

- LTS 1: generally suitable for children under the age of ten who are trained to safely cross a street;
- LTS 2: tolerated by the mainstream adult population;
- LTS 3: tolerated by those characterized as confident, but still preferring better facilities; and
- LTS 4: uncomfortable for most able-bodied adults.

The criteria developed by the Palm Beach TPA use half levels to create finer gradations at seven levels.

LTS values are proposed for classifying road segments by level of traffic stress depending on traffic characteristics (e.g., road width, traffic speed, the presence of a parking lane) and the presence and quality of sidewalks on both sides of the road.

The Palm Beach TPA Pedestrian LTS methodology bases its analysis of roadway segments on the factors listed below:

- Presence of a sidewalk
- Posted vehicular speeds
- Number of adjacent vehicular lanes
- Vehicle volumes (Annual Average Daily Traffic)

The following table represents the LTS scoring for roadway segments based on the inputs in the Pedestrian LTS Analysis. Roadways with less separation from vehicles, higher traffic volumes, more lanes, and higher posted speeds generally score worse for stress than roadways with the opposite conditions.

Table 10: Pedestrian Levels of Transportation Stress and Data Inputs
Palm Beach TPA LRTP

PEDESTRIAN LTS DATA LEVELS FOR ROADWAY SEGMENTS - Palm Beach County 2045 LRTP													
Number of Lanes	Vehicle Volumes	Sidewalks on Both Sides of Street				Sidewalk on 1 Side of Street				No Dedicated Walkway

Expanded Pedestrian LTS Methodology for Roadway Links

For the purpose of defining the base-level conditions, the LTS methodology as presented is effective; however, for the purpose of determining a range of pedestrian improvements, it is limited to provide feedback on prioritizing pedestrian improvements. The LTS methodology responds to number of travel lanes, traffic volumes, posted speed limits and the presence of sidewalks. Within the scope of pedestrian improvement recommendations, the number of traffic lanes or posted speeds cannot be changed without adversely impacting roadway levels of service and we cannot change the traffic volumes with any direct effect. Therefore, completing gaps is the only variable, which is not enough for prioritizing a full range of effective improvements.

There are other factors that affect pedestrian LTS on roadway links, and even more factors that affect pedestrian LTS at intersections which are critical to using paths in safety and comfort. The LTS methodology is extended to include additional factors and an intersection analysis as well.

The complete set of roadway link factors used include:

- Presence of a sidewalk *(existing LTS methodology)*
- Posted vehicular speeds *(existing LTS methodology)*
- Number of adjacent vehicular lanes *(existing LTS methodology)*
- Vehicle volumes (Annual Average Daily Traffic) *(existing LTS methodology)*
- Sidewalk buffer from closest vehicle travel lane *(new: expanded LTS methodology)*
- Sidewalk width *(new: expanded LTS methodology)*
- Number of minor cross streets (unsignalized) *(new: expanded LTS methodology)*
- Number of commercial driveways *(new: expanded LTS methodology)*
- Number of residential driveways *(new: expanded LTS methodology)*
- Average spacing between access drives and streets *(new: expanded LTS methodology)*

- Edge of road existing land uses *(new: expanded LTS methodology)*

Including the additional factors into the LTS methodology will allow the rating system to be responsive to a greater range or recommendations for improvements, including:

A broader Range of Recommendations for Roadway Links with the Expanded Methodology

- Where there are no sidewalks, provide a sidewalk *(base LTS methodology)*
- Where there is one sidewalk, provide one on each side of the road *(base LTS methodology)*
- Where the sidewalk is of inadequate width, widen it to the ADA minimum or wider depending on edge of roadway land use *(expanded LTS methodology)*
- Where a sidewalk is close to high level-of-stress conditions, plan for a buffer if cross-sections allow *(expanded LTS methodology)*
- Where there is one or no sidewalks, prioritize the side to improve according to land use, number of minor street crossings and number of high-volume driveways for commercial or multi-family residential *(expanded LTS methodology)*
- Prioritize minor street pedestrian crossing improvements, such as enhanced crosswalks, raised crosswalks, small medians or medians with pedestrian refuge *(expanded LTS methodology)*
- Prioritize redesign of sidewalk interaction with very high-volume driveways, such as buffering sidewalk and moving farther behind driveway apron to minimize vehicles from blocking the sidewalk *(expanded LTS methodology)*
- Prioritize midblock actuated pedestrian crossings based on segment length and land uses *(expanded LTS methodology)*

Expanded Pedestrian LTS Methodology for Major Intersections

A critical location for lowering pedestrian level-of-stress in concert with roadway link improvements is to address factors contributing to stress at the intersections. Providing higher levels-of-service for vehicles often involves additional left- and right-turn lanes at multilane intersections which increase the distance for pedestrian crossing, create a confusing and dangerous sequencing of traffic coming across crosswalks from different directions, increase pedestrian wait time at the curb edge, and infrequently providing fully protected crossings. Additionally, as pedestrians often change direction at intersections, the wait time, discomfort and insecurity can be doubled.

To address these issues and provide a systematic prioritization for intersection improvements, the LTS methodology is used to rate intersections as well.

The intersection-related LTS factors include:

- Cross lanes *(new: expanded LTS methodology)*
- Pedestrian refuge in raised median *(new: expanded LTS methodology)*
- Operations: signalized with protected pedestrian phase, signalized with pedestrian permissive phases, or unsignalized *(new: expanded LTS methodology)*
- Cross traffic volume *(not in LTS intersection methodology at this time)*

- Left-turn Lanes *(not in LTS intersection methodology at this time)*
- Right-turn Lanes *(not in LTS intersection methodology at this time)*

The intersection methodology, along with LTS Levels has been developed and is provided in the following table. Including the intersection factors into the LTS methodology will allow the rating system to be responsive to pedestrian crossings at intersections:

Table 11: Pedestrian Levels of Transportation Stress and Data Inputs for Intersections
Palm Springs Transportation/Mobility Master Plan

Basis: Montgomery and Boulder and Hillsborough County fl & Charlottee NC Bike and Ped LOS at Intersection Methodology

A Broader Range of Pedestrian Recommendations for Roadway Links with the Expanded Methodology

- Enhanced crosswalks
- Narrowing turn lanes to allow for raised, protective medians with adequate pedestrian refuge
- Including signalization where there is none
- Improving signal operations with pedestrian protection

Working towards an expanded LTS methodology, an expanded data set has been assembled that includes the current and proposed LTS factors for Pedestrian Level-of-Stress analysis.

Approach: Evaluation Methodology - Bicycle Level-of-Transportation Stress (LTS)

The Village's bicycle network is also defined by its inventory of facilities, specifically the network of bike lanes, off-street paths, shared lane marking ("sharrows") and multi-purpose trails. Inadequate facilities and the lack of a complete network also affect bicycle utilization, but as with pedestrian use, the utilization is highly dependent on the user's preferences and tolerance for traffic stress on the adjacent or shared vehicular travel lanes. To complete and improve the network, it is important to first build a working understanding of what bicyclists need, what levels of infrastructure it takes to attract bike use for commuting and recreation, and to recognize that attracting bicycle use to the mobility network is different depending on the personal abilities and needs of the biker, and the purpose of the trip: recreational or destination.

Base level analysis for bicyclists is also dependent on target user groups. The differentiation is applicable among cyclists, skateboarders and foot skaters; however, for the scope of Palm Springs mobility, the initial focus is bicyclists. The user groups are:

- The "***Strong and Fearless***" comprise fewer than 0.5% of the population. These are the people who will ride regardless of roadway conditions. They are 'bicyclists'; riding is a strong part of their identity and they are generally undeterred by roadway conditions.
- The "***Enthused and Confident***" are those who are attracted to cycling after significant advances are made in developing the bikeway network and supporting infrastructure. They are comfortable sharing the roadway with automotive traffic, but they prefer bike lanes and paths. These enthused and confident cyclists are the primary reason why bicycle commuting doubled in Portland between 1990 and 2000. These are the citizens who are and could be attracted to regular riding by continuing to address the barriers of shorter trip distances and better bicycle facilities. This demographic typically comprises 7% of the population.
- A much larger demographic is the ***"Interested-But-Concerned."*** These residents are curious about bicycling. They respond to messages from bicycle culture and to participation in becoming a bicycle-friendly village. They like riding a bicycle and would like to ride more, but they are afraid to ride. They don't like the cars speeding down their streets. They get nervous thinking about what would happen to them on a bicycle when a driver runs a red light, guns their cars around them, or passes too closely and too fast. Very few of these people regularly ride bicycles. Some will ride through their neighborhoods but will not venture out onto the arterials to the major commercial and employment destinations. They typically represent about 60% of the population. They would ride more if they felt safer on the roadways.
- About one-third of the population is in the ***"No Way, No How"*** group that is currently not interested in bicycling at all.

There is some overlap between groups, but this has proven to be a reasonable way to understand existing and potential cyclists and recognize that the *Strong and Fearless* are already biking and vocal. Planning for this group is to make their travel safer and more enjoyable. The group of the *Enthused and Confident* represents the latent demand to develop a greater modal shift. This is the group of early adapters that creates the "buzz" and culture that attracts the mainstream group of *Interested-But-Concerned*. The main focus for arterial and collector streets is the *Enthused and Confident*, and the main focus for residential, local streets is the *Interested-But-Concerned* target group. For Skateboard and Foot Skates, the focus is on the *Enthused and Confident*.

As with the pedestrian network, the Village's bicycle network is defined by its inventory of bicycle facilities, specifically the network of bicycle lanes, buffered bike lanes, off-street shared-use paths, shared-rights-of-way, and crossing facilities where there are bicycle facilities. The bicycle infrastructure is often greatly underutilized because of the lack of safe, comfortable and convenient continuous paths. Where needed facilities are lacking, the *Strong and Fearless* riders vie for space in traffic lanes, causing unsafe conditions for both themselves and motorists. Where bicycle facilities are lacking or inadequate, *Enthused and Confident* riders take to the inadequate sidewalks, creating a danger for themselves at driveways and intersections, and exacerbating stressful conditions for pedestrians and especially wheelchair pedestrians as they occupy valuable space at greatly different speeds. The methodology utilized by the Palm Beach TPA for bicyclists classifies road segments by one of four Levels of Traffic Stress (LTS):

- LTS 1 roadways are suitable for all ages and abilities. The only roadways that would be classified as LTS 1 are those with either off-road bike paths or buffered bike lanes on low-speed, low-volume roads. No roadways in the Village received an LTS 1 or 1.5.
- LTS 2, the level that will be tolerated by the mainstream adult population but is not suitable for young children or elderly persons.
- LTS 3, the level tolerated by those who can be characterized as confident but still prefer better facilities.
- LTS 4 roadways are used primarily by able-bodied adults either using the roadway out of necessity, with no other option to reach a destination, or who have a high tolerance for stress. These roadways are not suitable for adolescents, or those who are uncomfortable with high stress roadways when bicycling. Sixty percent of roadways in Palm Beach County are LTS 4.

Criteria are proposed for classifying road segments by level of traffic stress depending on traffic characteristics (e.g., road width, traffic speed, the presence of a parking lane) and the presence and quality of sidewalks on both sides of the road.

The Palm Beach TPA methodology for Bicycle LTS analysis includes the factors listed below.

- Type of facility
- Posted vehicular speed
- Number of travel lanes
- Vehicle volumes (Annual Average Daily Traffic)

The following table represents the LTS scoring for roadways based on the inputs in the Bicycle LTS Analysis. Roadways with less separation from vehicles, higher traffic volumes, more lanes, and higher posted speeds generally score (worse) than roadways with the opposite conditions.

Table 12: Bicycle Levels of Transportation Stress and Data Inputs
Palm Beach TPA LRTP

Expanded Bicycle LTS Methodology for Roadway Links

For the purpose of defining a base-level condition, base LTS methodology is effective; however, to determine a greater range of bicycle facility improvements, an LTS methodology with expanded inputs provides the ability to better prioritize bike lanes, buffered bike lanes, paths and shared-use trails. Within the scope of bicycle improvement recommendations, the number of traffic lanes or posted speeds cannot be unilaterally changed without adversely impacting roadway levels-of-service and, further, changes can't be made in traffic volumes with any direct effect. Instead, reductions in vehicular lane width can accommodate new or improved on-street bike facilities, and other conditions may help better inform the choice among improved facilities.

Other factors that affect bicycle LTS on roadway links and at intersections are critical to completing paths for riding in safety and comfort. The LTS methodology can also be extended to include additional factors in an intersection analysis; however, as the granularity of detailed input data is beyond the scope of the Palm Springs Transportation/Mobility Master Plan. Therefore, the complete set of factors to be analyzed includes:

Roadway Link-Related Factors:

- Type of Bicycle facility *(existing LTS methodology)*
- Posted vehicular speeds *(existing LTS methodology)*
- Number of adjacent vehicular lanes *(existing LTS methodology)*
- Vehicle volumes (Annual Average Daily Traffic) *(existing LTS methodology)*
- Number of minor cross streets (unsignalized) *(new: expanded LTS methodology)*
- Number of commercial driveways *(new: expanded LTS methodology)*
- Average spacing between access drives and streets *(new: expanded LTS methodology)*
- Edge-of-road existing land uses *(new: expanded LTS methodology)*

Intersection Related Factors:

- Cross traffic volume *(not in LTS intersection methodology at this time)*
- Left-turn Lanes *(not in LTS intersection methodology at this time)*
- Right-turn Lanes *(not in LTS intersection methodology at this time)*

Table 13: Bicycle Levels of Transportation Stress and Data Inputs Expanded Methodology Palm Springs Transportation/Mobility Master Plan

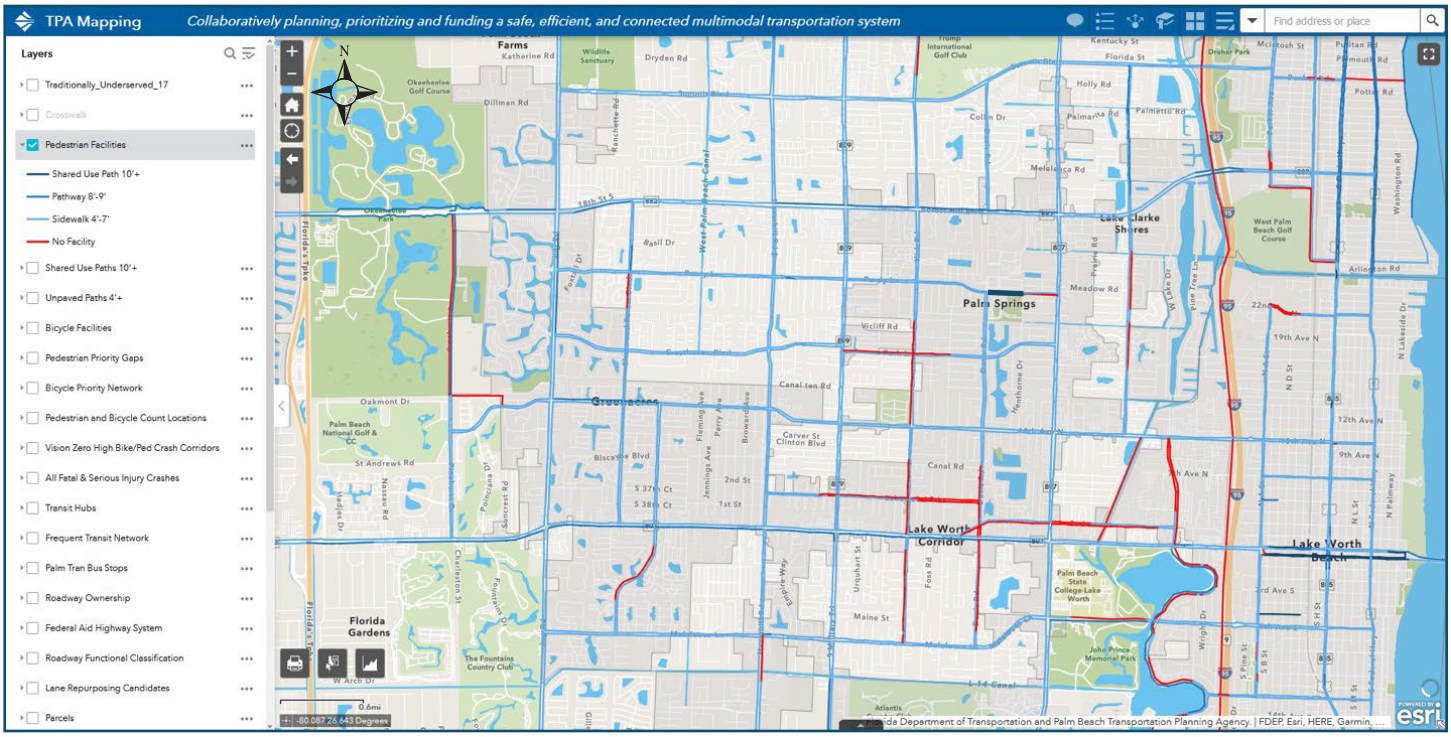
BICYCLE LTS LEVELS AT INTERSECTIONS			
Cross Lanes	Posted Speed Limit of Adjacent Travel Lanes		
	less than 30 mph	30 mph to 35 mph	40 mph or higher
Shared Auto Lane to Shared Auto Lane	2.0	3.0	4.0
Shared Auto Lane to Wide Curb Lane	2.0	2.5	3.0
Shared Auto Lane to Bike Lane	1.5	2.0	2.5
Shared Wide Curb Lane to Shared Auto Lane	2.0	2.5	3.5
Shared Wide Curb Lane to Wide Curb Lane	1.5	2.0	3.0
Shared Wide Curb Lane to Bike Lane	1.0	1.5	2.0
Bike Lane to Shared Auto Lane	2.0	2.0	3.0
Bike Lane to Wide Curb Lane	1.5	2.0	2.5
Bike Lane to Bike Lane	1.0	1.0	1.5

Basis: Montgomery and Boulder and Hillsborough County Fl & Charlottee NC Bike and Pedestrian LOS at Intersection

A broader range of bicycle recommendations with the Expanded Methodology involves these facilities:

- Bicycle lanes
- Buffered bike lanes
- Bicycle Paths (off-street)
- Multipurpose Lanes
- Bicycle channelization for right turn lanes at intersections
- Bicycle lane signalization where necessary to avoid bicycle - vehicular conflicts

To work with an expanded LTS methodology, an expanded data set was assembled that includes the current and proposed LTS factors for Pedestrian Level-of-Stress analysis.

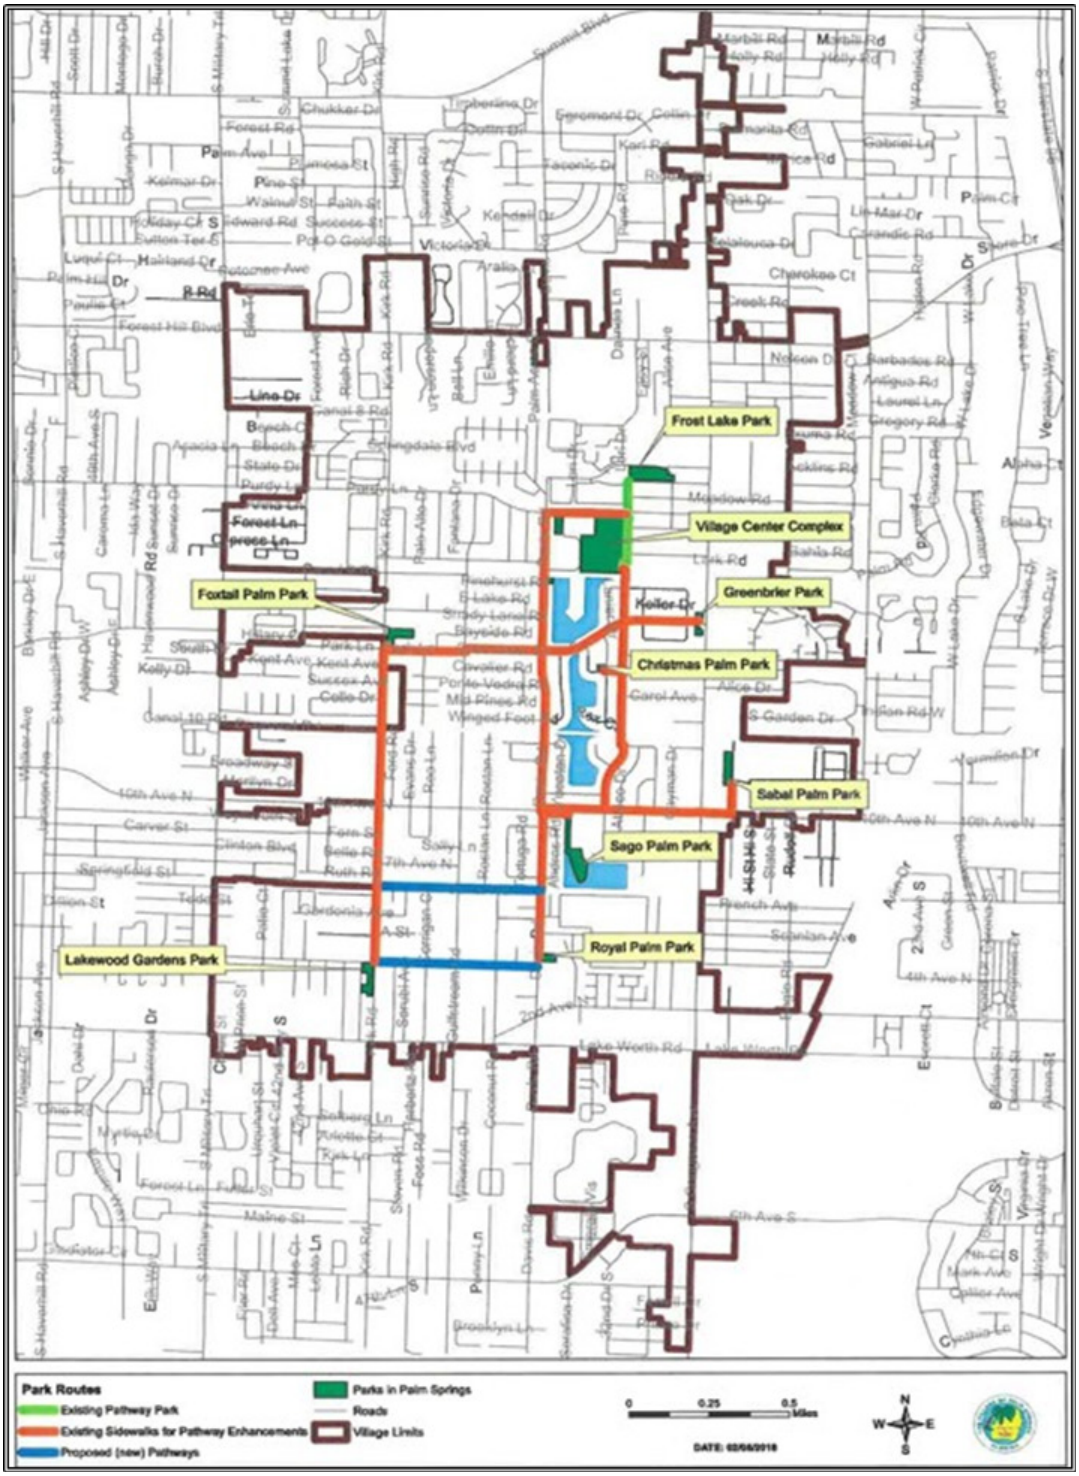


The intersection methodology correlation for factors with LTS levels will be developed in the Task 4 analysis.

Pedestrian Infrastructure: Base Infrastructure Conditions & LTS Analysis of Base Conditions

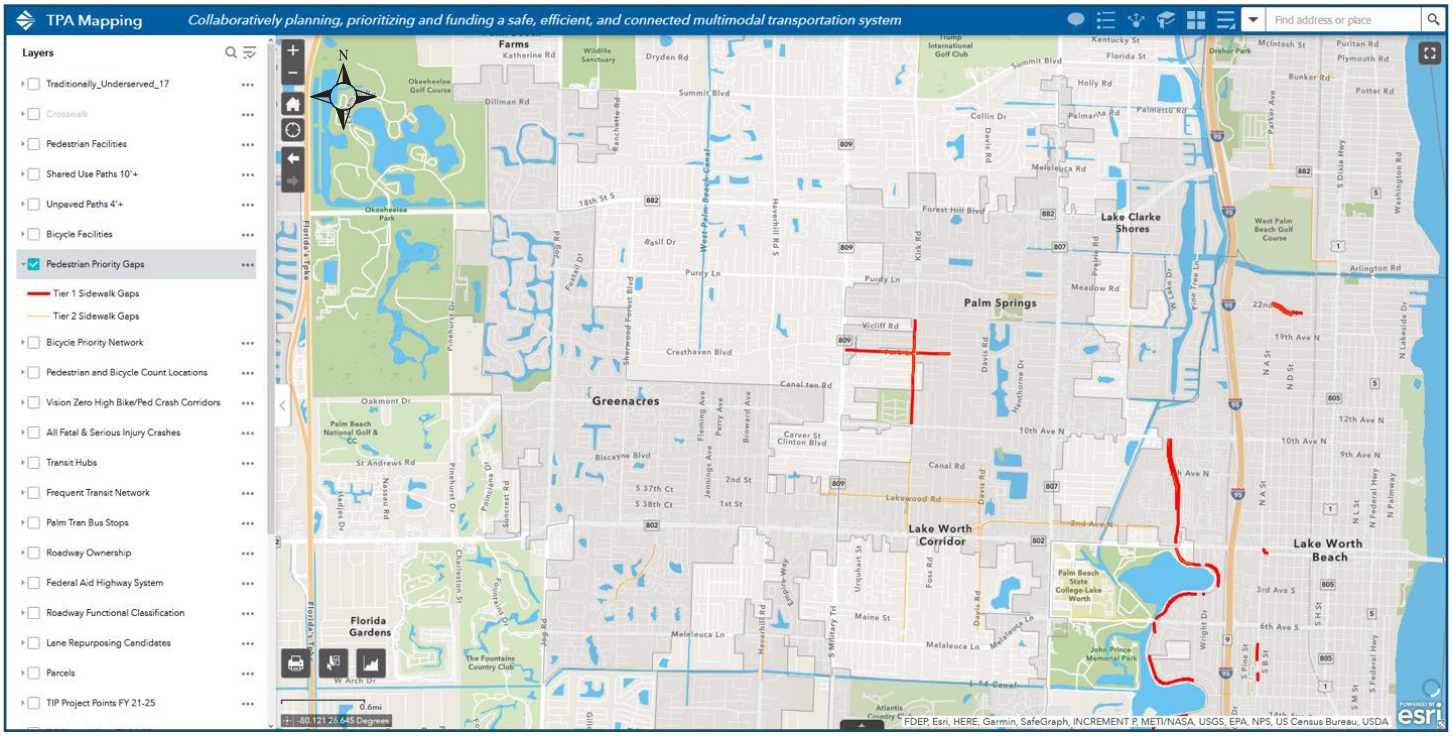
The Palm Beach Transportation Planning Agency (TPA) has taken the lead on pedestrian planning for the County and its municipalities. The TPA's Complete Streets Policy recognizes that every trip begins and end as a pedestrian. Providing safe and connected transportation facilities for users of all ages and abilities is essential to enable everyone in a community, regardless of financial means and/or physical ability, to have access to healthy foods, healthcare, jobs, education, etc. This also promotes an improved quality-of-life, including encouraging physical activity, social interaction, mental health, and safety.

Based on available databases, the Village of Palm Springs existing pedestrian facilities include the sidewalks as depicted in the map below. The TPA's Complete Streets Design Guidelines, as well as the FDOT and Palm Beach County's minimum standard for sidewalks is 6' wide; however, some existing sidewalks may be narrower. Existing sidewalks in Palm Springs are in the range of 4' to 7' wide. Most notable there are segments of major roads that do not have continuous pedestrian paths with sidewalks on both sides of the street. These include segments of:



- 2nd Avenue North
- Lakewood Road
- Dolan Road
- Davis Road
- Kirk Road

Village of Palm Springs - Pedestrian Facilities



Parks Connectors - Pedestrian

The Village began a program of shared-use path improvements for recreational pedestrians and bicyclists to connect the Village's parks. The Park Connector Pathways are illustrated in the map below, and will expand existing sidewalks, where possible, to 8' wide to foster multi-modal use. The Park Connector Pathways focus on building a recreational system for pedestrians of all ages; therefore, the design LTS of these facilities is toward the lowest LTS possible, preferring pedestrian paths, and buffered sidewalks to sidewalks that are directly adjacent to travel lanes.

Pedestrian Network Gap Analysis

The Palm Beach TPA has identified sidewalk gaps, as illustrated in the map below. In 2018, the TPA conducted an analysis of School Hazardous Walking Conditions, per Section 1006.23 Florida Statutes for all public elementary schools in Palm Beach County and found that there were 793 miles of hazardous school walking conditions. They not only create an unsafe environment for children to walk to/from school, but also discourage walking, which may result in more vehicle trips and congestion.

Village of Palm Springs - Pedestrian Facility Gaps

The Village of Palm Springs "vision grid," is the build-out for the pedestrian infrastructure in the Village, and is the part of the Village's roadway network that does not have adequate base-level pedestrian facilities, which, for this analysis is considered having a sidewalk on both sides of the street. Relative to the scope of improvements for the Palm Springs Transportation/Mobility Master Plan, the roadway network includes all arterial and collector streets that are in the Village, but not every local road through residential neighborhoods.

The gap analysis provides opportunities to evaluate the best alternative for infrastructure improvement through alternatives analysis, right-of-way availability considerations, and the presence of adjacent, connected facilities. Based on alternatives analysis, local roads are included as part of the network during the recommendation phase of the TMP. The local roads are added where conditions on arterials and collectors have significant impediments to improvement, and parallel paths provide a better opportunity for improvements that will be safe and convenient for pedestrians in the Village.

Pedestrian Level-of-Transportation-Stress Analysis

Along with LTS, the PBTPA modelled Active Transportation Demand. The analysis first quantified inputs that generate active transportation demand using a series of factors including where people live, work, play, learn, and access transit. Next, it synthesized results with a composite map that displayed the cumulative results of this analysis used to inform project recommendations and their prioritization. The analysis computed these data inputs using geographic information systems (GIS) and illustrated outputs based on density and proximity.

The Active Transportation Demand and LTS analyses for pedestrians and bicyclists led to the identification of a Tier 1 and Tier 2 priority network of pedestrian and bicycle facilities needed to create a safe, efficient and connected multimodal transportation system for all users. The prioritized Tier 1 and Tier 2 Network for Palm Springs is depicted in the map below.

Village of Palm Springs - Pedestrian Priority Network

Working towards a refined set of recommendations for short, near- and long-term implementation, using an expanded LTS methodology, and an expanded input data set that includes the current and proposed LTS factors for Pedestrian Level-of-Stress analysis were employed. These factors are provided in the following tables.

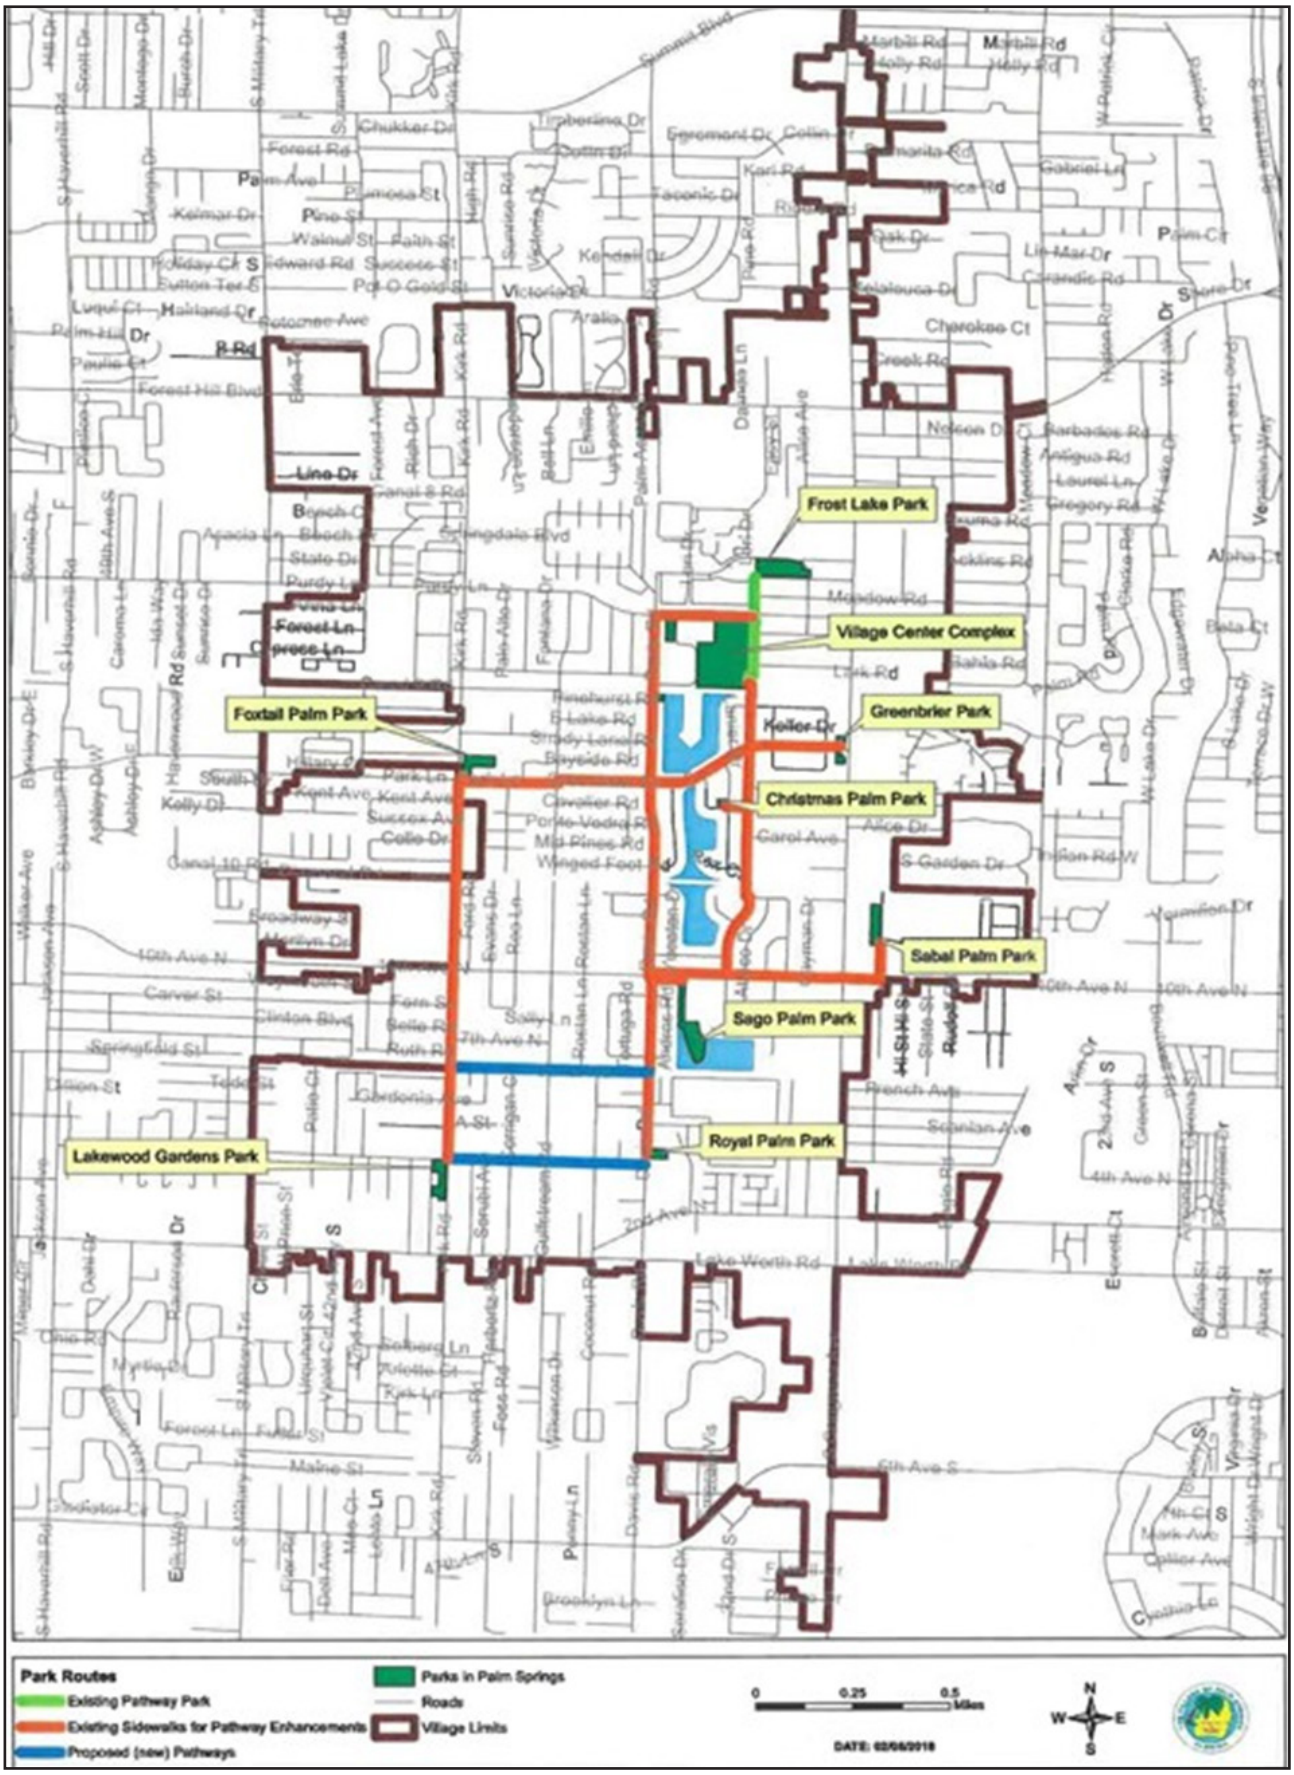
Bicycle Infrastructure: Base Infrastructure Conditions & LTS Analysis of Base Conditions

The Palm Beach TPA has taken the lead on bicycle planning for the County and its municipalities. The County has an array of bicycle facilities including:

- Shared use paths
- Buffered bicycle lanes
- Bicycle lanes
- Shared lane marking (sharrows)
- Undesignated bicycle facilities

Within Palm Springs there are designated bike lanes at the western boundary of the Village along South Military Trail, along Lake Worth Road, and a short undesignated facility on Kirk Road from Lake Worth Road to Lakewood Road. The bike lanes along South Military Trail and along Lake Worth Road are substandard in width, and neither is buffered.



Village of Palm Springs - Existing Bicycle Facilities

Parks Connectors – Bicycle

The Village has started a program of shared-use path improvements for recreational pedestrians and bicyclists to connect the Village's parks. The Park Connector Pathways are illustrated in the map below, and will expand existing sidewalks, where possible, to 8' width to foster multi-modal use. The Park Connector Pathways focuses on building a recreational system for pedestrians of all ages; therefore, the design of these facilities prefers shared paths and buffered bicycle lanes rather than unbuffered bike lanes that are directly adjacent to travel lanes.

Village of Palm Springs - Park Routes

Bicycle Network Gap Analysis

The Palm Springs "vision grid," is the build-out for the bicycle infrastructure in the Village. It focuses on the part of the Village's roadway network that does not have adequate base-level bicycle facilities. Such facilities include a bicycle lane on both sides of a collector roadway with lower traffic volumes and speeds, and a buffered bicycle lane on both sides of arterial roadways, and other major thoroughfares that have higher traffic speeds and volumes.

The Palm Springs Transportation/Mobility Master Plan roadway network includes all arterials and collectors that are in the Village, but not every local road through residential neighborhoods. The gap analysis provides opportunities for improvement, with considerations of right-of-way availability and the presence of adjacent, connected facilities. Based on alternatives analysis, local roads are included as part of the network for recommendations. The local roads are added where conditions on arterials and collectors have significant impediments to improvement, and parallel paths can provide a better opportunity for improvements that will be safe and convenient for bicyclists in the Village.

Bicycle Level of Transportation Stress Analysis

The Palm Beach TPA's Long Range Transportation Plan (LRTP) includes a bicycle facility prioritization map. The lack of existing bicycle facilities results in a disconnected bicycle network that is not inviting for users of all ages and abilities. This is especially worrisome for those who have to bicycle as a means of transportation. Connected bicycle facilities promote safety and can encourage people to choose bicycling as their mode of transportation, which in turn provides health and environmental benefits and can reduce the number of single-occupancy vehicles and congestion on roadways.

Village of Palm Springs - Bicycle Facilities Prioritization Map

Working towards a refined set of recommendations for short-term, near- and long-term implementation, using an expanded LTS methodology, and an expanded data set has been prepared to include current and proposed LTS factors for Bicycle Level-of-Stress analysis. These factors are provided in the following tables.

»TRANSIT MOBILITY

The Benefits

Growth in transit travel will foster economic, ecologic and socially sustainable urban mobility with the following characteristics.

Access for All: Public transit provides an affordable transportation option available to everyone that provides equitable access to opportunity.

Sustainability: Increases the proportion of regional travel by transit will improve the region's personal and environmental health, reduce greenhouse gases, and provide a positive impact on global warming.

Economic Health: Is a key factor in employment for the Village residents and for business to draw from a larger pool of employees. Where there are rail stations, increasing transit ridership supports investment in transit centers leading to private investment in transit-oriented developments.

Quality-of-Life and Safety: Improves the quality-of-life for the Village residents by decreasing roadway congestion.

Funding: Provides opportunity for greater access to federal funding by increasing potential transit utilization.

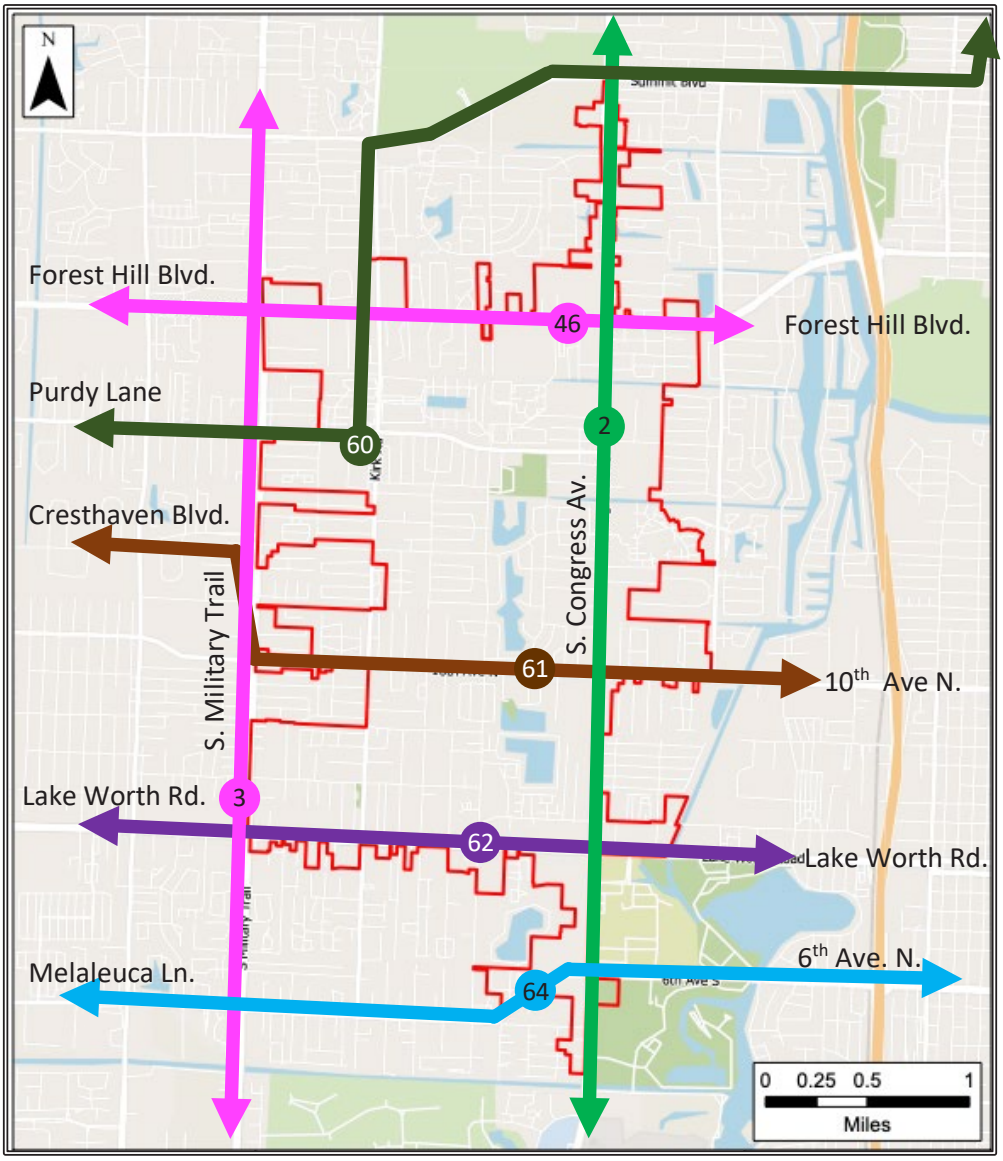
Baseline

The Village of Palm Springs is provided with regional transit service by Palm Tran, the transit agency of Palm Beach County, and is connected to Tri Rail regional rail service by the South Florida Regional Transportation Authority (SFRTA). Palm Tran provides connections both to the County's multimodal hub, the West Palm Beach Intermodal Center, transfer locations and to Broward County Transit services. Major transfer locations include: Wellington Mall, West Palm Beach VA Medical Center, Boca Town Center Mall, Gardens Mall, and six Tri Rail stations in the County.

Palm Tran

Palm Tran runs thirty-two fixed-alignment bus routes throughout Palm Beach County. Among the Palm Tran services, seven routes: 2, 3, 46, 60, 61, 62 and 64 traverse and serve Palm Springs. Palm Springs does not have a local circulator to connect housing, businesses and public/civic infrastructure with a more fine-grain service. The Palm Tran route services are shown in the following exhibit with their basic characteristics and most recent reported ridership performance summarized in the table.

Palm Tran Routes



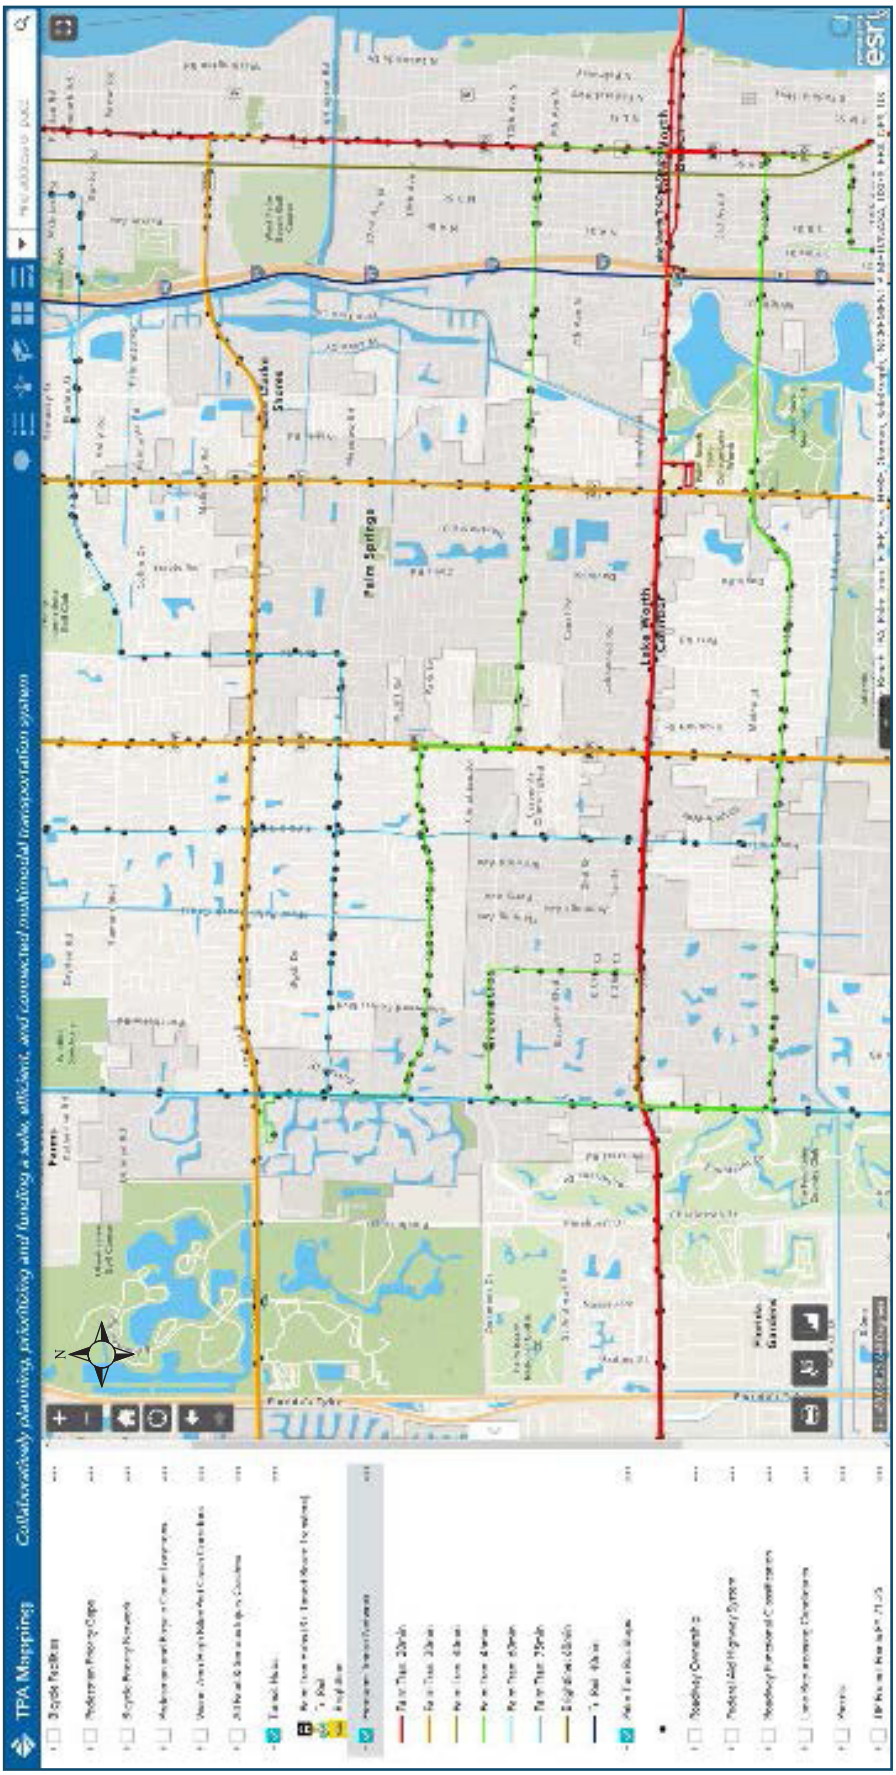


Table 20: Palm Tran Routes Serving the Village of Palm Springs Service Characteristics and Ridership

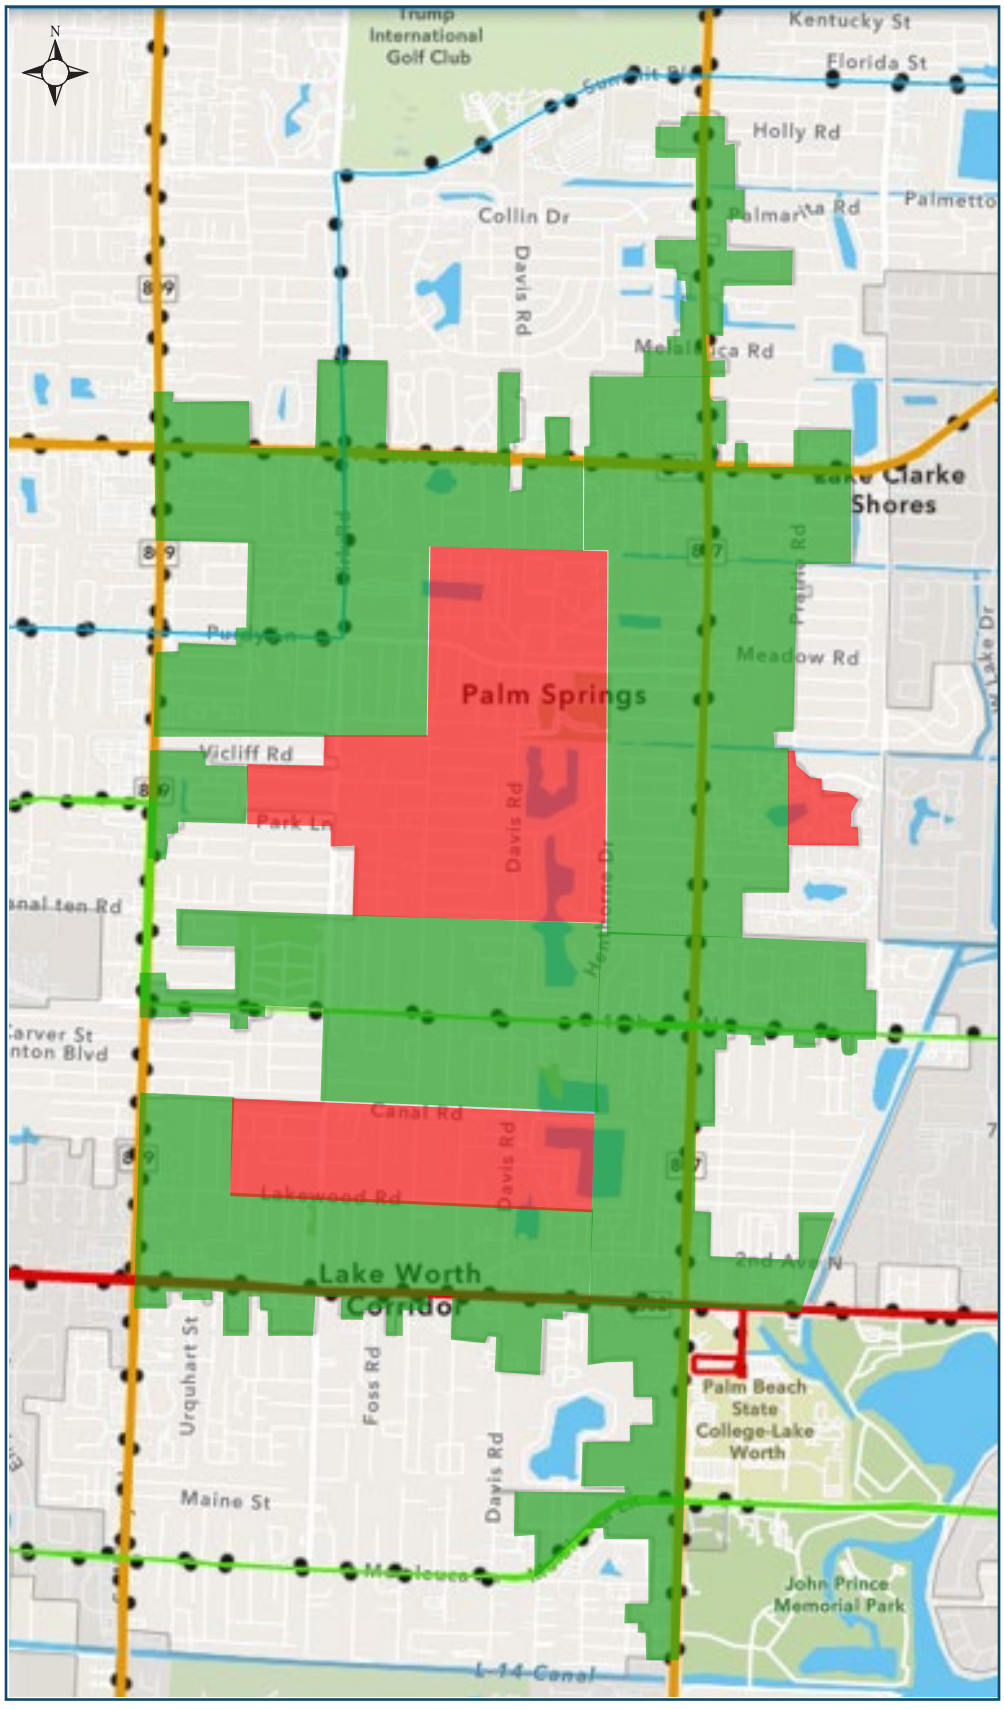
Route	Area/ Corridor	Peak Frequency	Service Days	FY 2019 Ridership	FY 2018 Ridership	Change
2	Congress Avenue	30 min.	Mon – Sun	858,960	1,164,494	-26.2%
3	Military Trail	30 min.	Mon – Sun	1,082,647	1,134,323	-4.5%
46	Forest Hill Boulevard	30 min.	Mon – Sun	209,456	219,987	- 4.8%
60	Purdy Lane	60 min. (75 min in 2018)	Mon – Fri (Mon-Fri in 2019)	66,428	32,409	+105.0%
61	10th Street/ Cresthaven Boulevard	45 min. (60 min in 2018)	Mon – Sun	186,008	180,629	+3.0%
62	Lake Worth Road	20 min.	Mon – Sun	606,103	564,463	+7.4%
64	6th Street/Melaleuca Lane	45 min.	Mon – Sat	112,355	80,269	+40.0%

Palm Tran Bus Stops and Service Corridors by Headway (time between arrivals)

Palm Tran recently completed its highest priority project, entitled the Route Performance Maximization (RPM) Initiative. Similar to other transit agency initiatives around the country, the RPM entailed an overhaul of the fixed-route network to maximize service efficiencies to current and future customers. The RPM featured an "enhanced coverage" network that improved span and frequency on key routes with minimal impact to existing customers. A critical component of the network changes involved straightening out routes to provide more direct service and improve travel times. Major Palm Tran service improvements that are pertinent to service in Palm Springs include:

- Route 62 improved frequency on weekends
- Route 64 improved 45-minute frequency on weekdays and Saturdays
- Route 64 extension to Greenacres and Lantana Public Health Unit



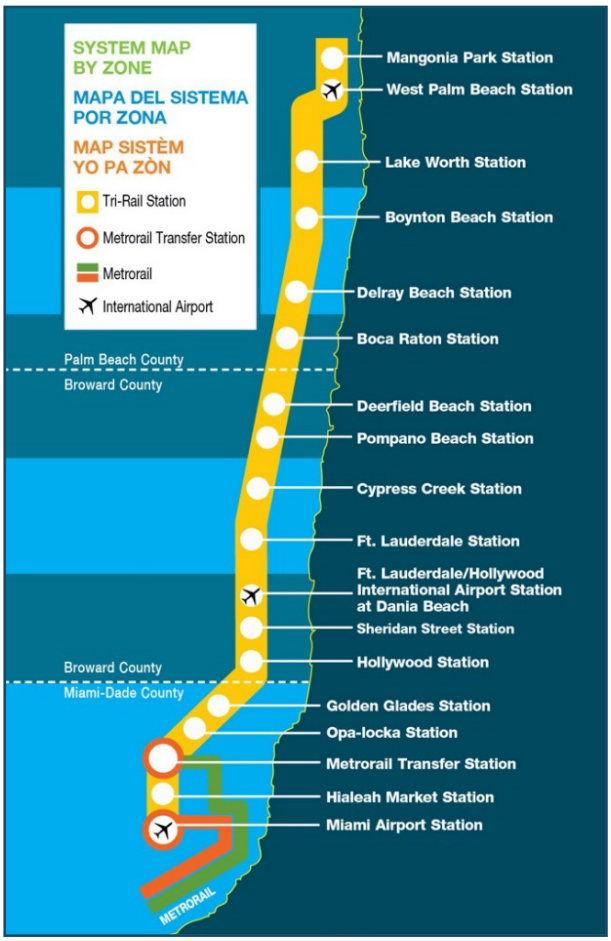
Gap Analysis

The primary transit improvements would be in the quality of service with improved headway and equipment, as well as improved bus stops and passenger information. The service coverage, defined as a ¼ -mile band on either side of a transit route shows significant portions of the Village that lack coverage. These areas are predominantly characterized by single-family residential neighborhood streets that are inefficient for even micro-transit service. Further, the provision of transit on these streets can adversely impact residents along them.

For these reasons, while the gaps in coverage exist, they do not provide areas for improvement by transit mode. The Palm Springs Transportation/Mobility Master Plan considers each mode as part of an interconnected mobility system. As such, the transit gap analysis highlights areas that are prioritized for first-and-last-mile connections to transit, focusing the improvements on the pedestrian and bicycle networks.

The transit service area coverage map provided below is partnered with the "gap" areas map which shows the places that are to be connected through pedestrian and bicycle network paths that can safely, and conveniently provide routes to the bus network stops. These are the remaining areas that are within the Village boundary that are not covered by Palm Tran Service.

Village of Palm Springs Palm Tran Bus Service Area Coverage & Gaps



*Transit service area defined by ¼-mile from bus route alignments - shaded in **green***
*Transit service gaps defined as areas outside ¼-mile transit shed - shaded in **red***

Tri-Rail

The South Florida Regional Transportation Authority (SFRTA) is a tri-county public transit agency serving Palm Beach, Broward and Miami-Dade counties. The SFRTA's goal is to expand cooperation among the Tri-Rail commuter rail service and the existing county public transport authorities: Broward County Transit, Miami-Dade Transit, and Palm Tran. The Tri-Rail commuter rail service is operated by the SFRTA. The 71-mile-long line-haul at-grade rail system has 18 stations along the Southeast Florida coast, and connects directly to Amtrak at numerous stations, and to Miami-Dade Metrorail at the Tri-Rail and Metrorail Transfer station and at the Miami Airport station. As of 2018, annual ridership was 4.3-million.

The closest station that provides service to the Village of Palm Springs is the Lake Worth Station, located at Lake Worth Road just west of I-95. Bus transit to the station is provided by Palm Tran Route 62, with 20-minute headway connections along Lake Worth Road.

Concepts & Approach

The regional bus transit network that traverses and serves the Village of Palm Springs is funded, built and operated by the Palm Beach County's Palm Tran. Transit is regionally coordinated, and as a relatively small municipal jurisdiction in a larger regional context, the Village has two possible options toward increasing transit utilization on a local level:

Micro-Transit

The Village's Palm Tran Coverage map shows that there are significant areas of the Village that are not served by the regional bus transit system. Many of these areas are predominantly low-density, single-family neighborhoods without sufficient density to warrant transit service. To serve these areas, a local, demand-responsive or route-deviation micro-transit service can be used to provide unchained, origin-destination service or service to link to regional transit.

First & Last Mile Transit Connections

The focus of First & Last Mile (FLM) transit connections in the Village integrates pedestrian facilities, bicycle facilities and other active mobility modes with transit routes, stations, and stops to increase the utilization of transit for longer trips, while reinforcing a culture of walking and biking for neighborhood trips and improving the viability of shared non-motorized modes. In doing so, the FLM connection increases the market capture area and potential ridership for high-capacity transit investments. Many residential neighborhoods, workplaces, and other major destinations will be beyond an easy walk to a transit station or stop. FLM mobility options include a wide range of modal groups and delivery models (public and private). As much as FLM innovations leverage innovative vehicles, mobile communication

technologies and sharing business models, the basics are especially important as first efforts: sidewalks with safe crossings, safe, convenient bicycle infrastructure, and comfortable, safe and convenient transit stops that are located with greater attention to the land use context.

The connections to and from transit are influential enough to encourage transit use. A transit traveler evaluates the desirability of a transit trip based on multiple criteria for the entirety of the door-to-door journey. The satisfaction of each part of the journey is not evenly weighted based on actual distance or time, but perceptually weighted based on a person's own needs and comfort levels for each part of the trip. In this way, the 5-minute walk in undesirable conditions can discourage a 15-minute transit journey, even if the person will use more total time and cost to make the journey by a personal automobile. The resulting dilemma is ubiquitous in urban areas with nearly empty transit lines and half-empty bus-rapid transit and rail lines. FLM is a critical first step to develop greater transit utilization.

Not only are the first and last legs of the trip disproportionate in their effect on transit demand, but their impact on transit providers is also disproportionate. For mass transit providers and, especially for major fixed right-of-way investments like rail, productivity and efficiency depend on large numbers of people moving along linear transit sheds of a walkable distance to transit stops. The more complete the network, the higher the utilization that can be expected. To complete the network with conventional transit, services become inefficient and difficult to sustain without higher-than-average subsidies.

Increased route coverage with fixed-route deviations or fixed-route feeder services is often not cost-effective for increasing ridership, and as a result, other FLM strategies must be used.

From a transit perspective, the goal of FLM strategies is two-fold:

1. Increase the size of the transit shed and the total number of people who transit can draw.
2. Increase the transit share within a given transit shed, further improving the viability of planned transit. By policy, the transit shed is ¼-mile on each side of a fixed-route bus line. It is possible that in many areas, the actual transit shed is smaller because of environmental conditions. FLM strategies can expand the transit shed beyond the ¼-mile.

The base level analysis incorporates the approach to analyze FLM as a way for the Village to improve transit access and use by adjusting priorities for improving pedestrian and bicycle facilities. The following table combines the LTS rating and data inputs for each roadway segment from the bicycle and pedestrian base conditions analysis along with transit stops inventory and spacing, level of corridor transit capacity and utilization and level of network transit capacity in four directions.

Table 21 (Part 1 of 2): Condition Analysis – Relevance to First & Last Mile Quality of Facilities to Pedestrian and Bicycle Level of Transportation Stress (LTS) - North-South Roadways

3.0 »RECOMMENDATIONS

»ROADWAY & TRAFFIC RECOMMENDATIONS

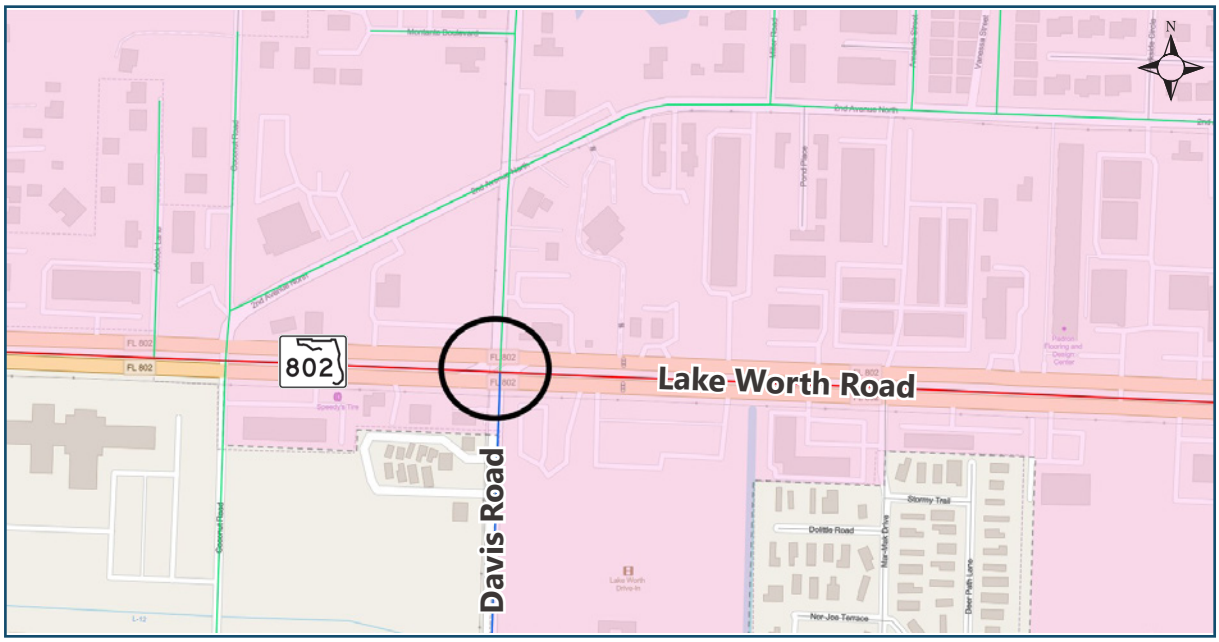
Based on the traffic operational analysis, road segment link analysis, speed evaluation, and safety review/ crash analysis from the roadway assessment, potential projects have been developed to address various deficiencies. The following is a summary of each of these potential projects.

Traffic Operational Intersection Improvements

The Roadway Assessment included an evaluation of the traffic operations at key intersections in the transportation analysis study area. Although the Roadway Assessment included a study area with potential annexation areas outside the Village of Palm Springs municipal boundaries, the improvements presented in the following Table 22 include only intersections that include a Village maintained roadway segment approach. Table 22 depicts the potential traffic operational intersection improvement projects. Additional traffic operational intersection improvement projects for FDOT and Palm Beach County intersections have been identified and documented in the Appendix.

Table 22: Traffic Operational Intersection Improvements

Traffic Operational Improvements - Intersections		
No.	**Intersection Name**	**Scope of Improvements**
1	Davis Road and Lake Worth Road	Convert the existing stop controlled intersection into a signalized intersection.
2	Lakewood Road and Military Trail	Convert the existing stop controlled intersection into a signalized intersection.
3	Lake Worth Road Pedestrian Signal	Installation of a pedestrian signal to improve pedestrian crossing spacing along the Lake Worth Road corridor either at Urquhart Street or Gulfstream Road
4	Kirk Road and Lakewood Road	Conversion from traffic signal to Roundabout if feasible
5	Davis Road and 2nd Avenue North	Conversion of all way stop to Roundabout if feasible
6	Kirk Road and Park Lane	Conversion from traffic signal to Roundabout if feasible



The following is a summary in narrative format which describes the scope of work for each of these intersection improvements. The appropriate intergovernmental coordination with FDOT and/or Palm Beach County will be required prior to moving to the design and implementation of intersection improvements that intersect with State or County facilities.

»Recommendation 1:
Davis Road and Lake Worth Road Intersection Improvements

Intersection: Davis Road and Lake Worth Road

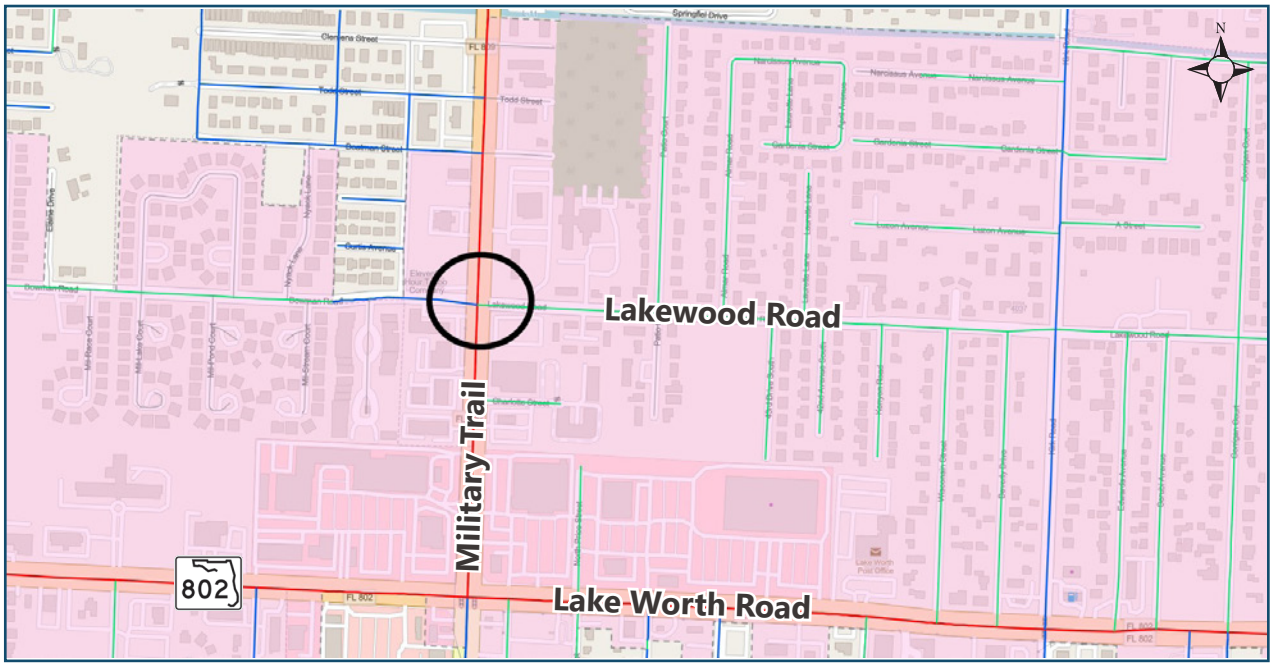
Figure 2: Davis Road at Lake Worth Road Intersection

Proposed Improvements:

- Conversion of stop-controlled intersection to a full traffic signalized intersection with mast arm assemblies. The signalized improvements would include pedestrian signal infrastructure to facilitate safe pedestrian crossings.

Expected Outcome: Improved traffic operations including safe pedestrian crossings.

Key Scope of Work Elements:



- New traffic signal infrastructure including pedestrian signal devices and equipment.
- Turn Lane Modifications.
- Raised Median Diverter removal.
- The planning level estimate assumes that no ROW acquisition will be required. Final determination of ROW clearance will be established during the final design phase.

Planning Level Estimate: $750,200.00

»Recommendation 2:
Lakewood Road and Military Trail Intersection Improvements

Intersection: Lakewood Road and Military Trail

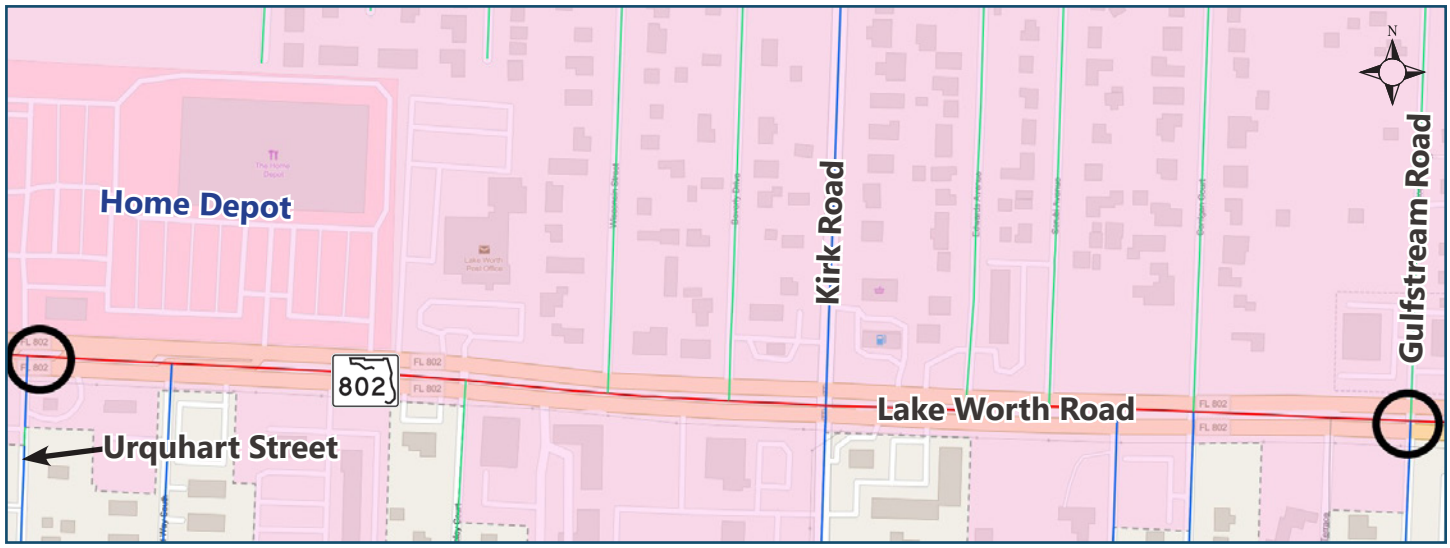
Figure 3: Lakewood Road at Military Trail Intersection

Proposed Improvements:

- Conversion of stop-controlled intersection to a full traffic signalized intersection with mast arm assemblies. The signalized improvements would include pedestrian signal infrastructure to facilitate safe pedestrian crossings.

Expected Outcome: Improved traffic operations including safe pedestrian crossings.

Key Scope of Work Elements:



- New traffic signal infrastructure including pedestrian signal devices and equipment.
- Turn Lane Modifications.
- Raised Median Diverter removal.
- The planning level estimate assumes that no ROW acquisition will be required. Final determination of ROW clearance will be established during the final design phase.

Planning Level Estimate: $675,200.00

»Recommendation 3:
Lake Worth Road Pedestrian Signal Intersection Improvements

Intersection: Lake Worth Road at Urquhart Street and/or Gulfstream Road

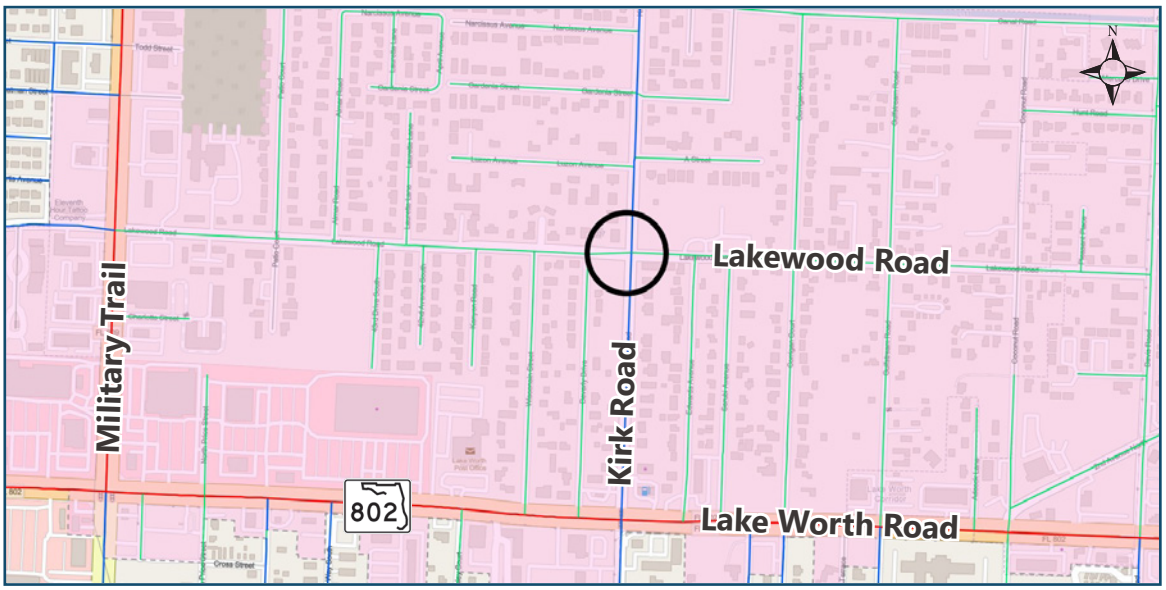
Figure 4: Lake Worth Road at Home Depot and/or Gulfstream Road Intersections

Proposed Improvements:

- Installation of Midblock Crosswalk Pedestrian Signals at up to two locations along Lake Worth Road. These additional pedestrian signals would improve the number of safe pedestrian crossing locations at this high pedestrian volume corridor. The signalized improvements would include pedestrian signal infrastructure to facilitate safe pedestrian crossings. The final location of the pedestrian mid block signalized crossing will be in alignment with the Lake Worth Road Corridor Master Plan where feasible.

Expected Outcome: Improved pedestrian safety through the addition of safe pedestrian signalized crossings.

Key Scope of Work Elements:



- New traffic signal infrastructure including pedestrian signal devices and equipment.
- Enhanced pavement markings including crosswalks and signage.
- The planning level estimate assumes that no ROW acquisition will be required. Final determination of ROW clearance will be established during the final design phase.

Planning Level Estimate: $525,150.00

»Recommendation 4:
Kirk Road and Lakewood Road Intersection Improvements

Intersection: Kirk Road and Lakewood Road

Figure 5: Kirk Road at Lakewood Road Intersection

Level-of-Service Deficiency:

- LOS B in 2030; 11.0 Seconds of Delay; AM Peak Hour
- LOS B in 2030; 11.2 Seconds of Delay; PM Peak Hour

Proposed Improvements:

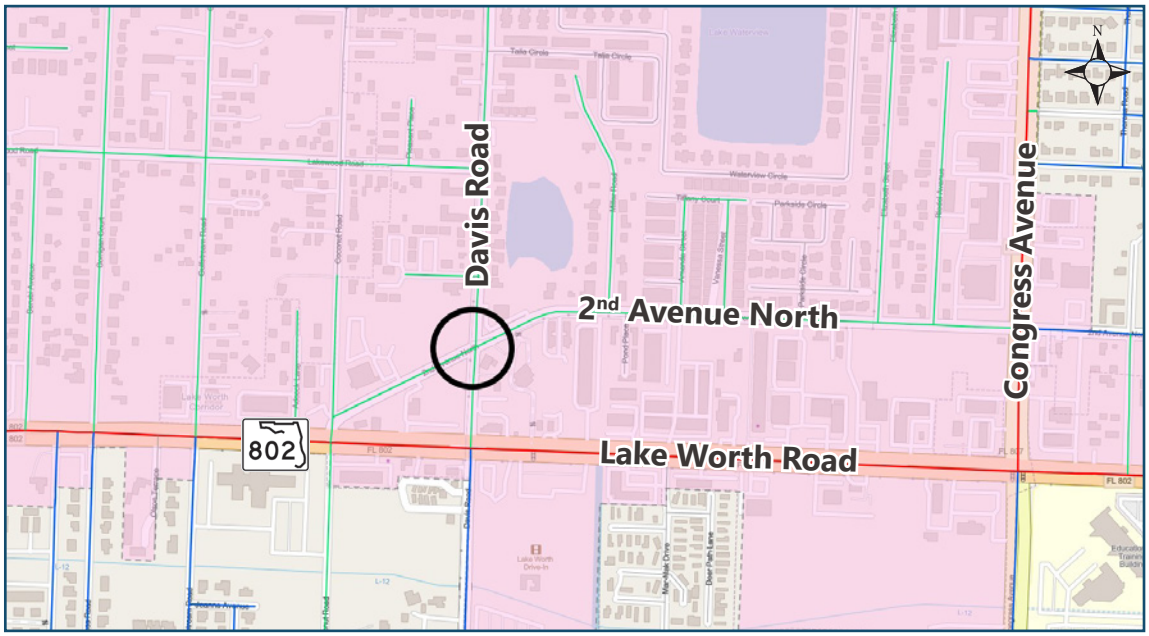
- Conversion of signalized intersection to a roundabout.

Expected Outcome: Improved level-of-service, 95th percentile vehicle queues.

Level-of-Service Improvement:

- LOS A in 2030; 7.1 Seconds of Delay; AM Peak Hour
- LOS A in 2030; 8.3 Seconds of Delay; PM Peak Hour

Key Scope of Work Elements:



- The Conversion of signalized intersection to a roundabout.
- The planning level estimate assumes that no ROW acquisition will be required. Final determination of ROW clearance will be established during the final design phase.

Planning Level Estimate: $700,300.00

»Recommendation 5:
Davis Road and 2nd Avenue North Intersection Improvements

Intersection: Davis Road and 2nd Avenue North

Figure 6: Davis Road at 2nd Avenue North Intersection

Level-of-Service Deficiency:

- LOS B in 2030; 10.4 Seconds of Delay; AM Peak Hour
- LOS B in 2030; 11.0 Seconds of Delay; PM Peak Hour

Proposed Improvements:

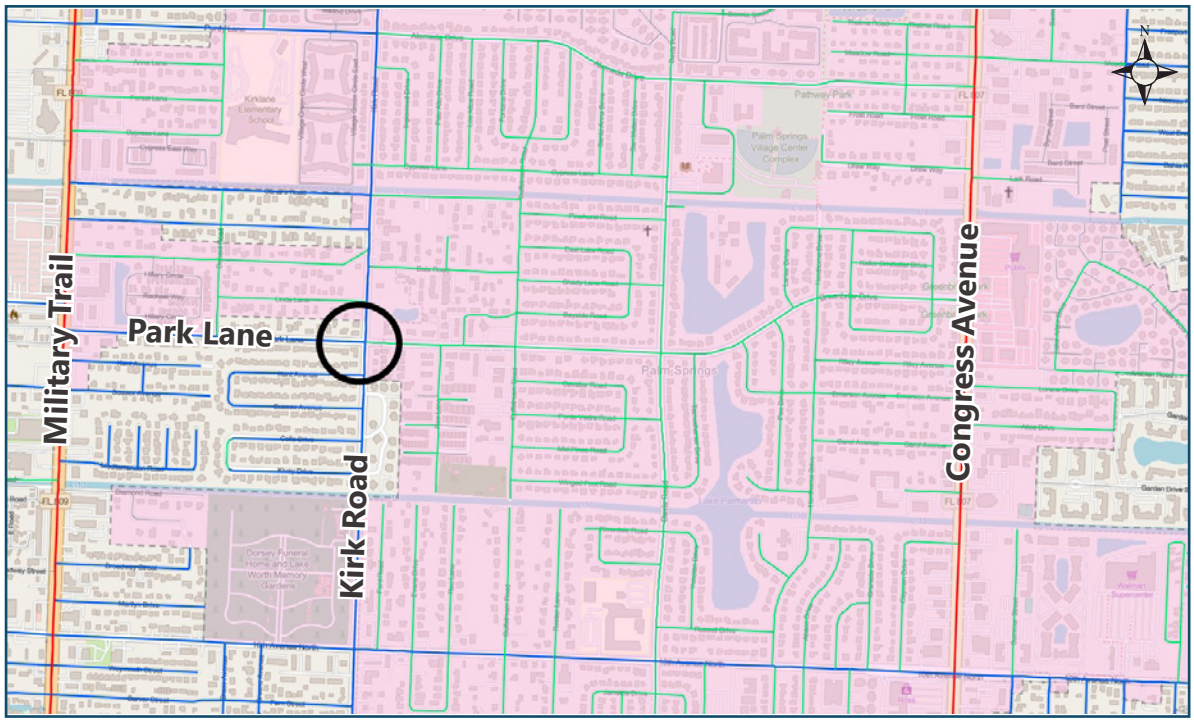
- Conversion of stop-controlled intersection to a roundabout.

Expected Outcome: Improved level-of-service, 95th percentile vehicle queues.

Level-of-Service Improvement:

- LOS A in 2030; 6.3 Seconds of Delay; AM Peak Hour
- LOS A in 2030; 6.7 Seconds of Delay; PM Peak Hour

Key Scope of Work Elements:



- The Conversion of stop-controlled intersection to a roundabout.
- The planning level estimate assumes that no ROW acquisition will be required. Final determination of ROW clearance will be established during the final design phase.

Planning Level Estimate: $610,300.00

»Recommendation 6:
Kirk Road and Park Lane Intersection Improvements

Intersection: Kirk Road and Park Lane

Figure 7: Kirk Road and Park Lane Intersection

Level-of-Service Deficiency:

- LOS C in 2030; 20.7 Seconds of Delay; AM Peak Hour
- LOS C in 2030; 28.4 Seconds of Delay; PM Peak Hour

Proposed Improvements:

- Conversion of signalized intersection to a roundabout.

Expected Outcome: Improved level-of-service, 95th percentile vehicle queues.

Level-of-Service Improvement:

- LOS A in 2030; 8.2 Seconds of Delay AM Peak Hour
- LOS C in 2030; 20.8 Seconds of Delay PM Peak Hour

Key Scope of Work Elements:

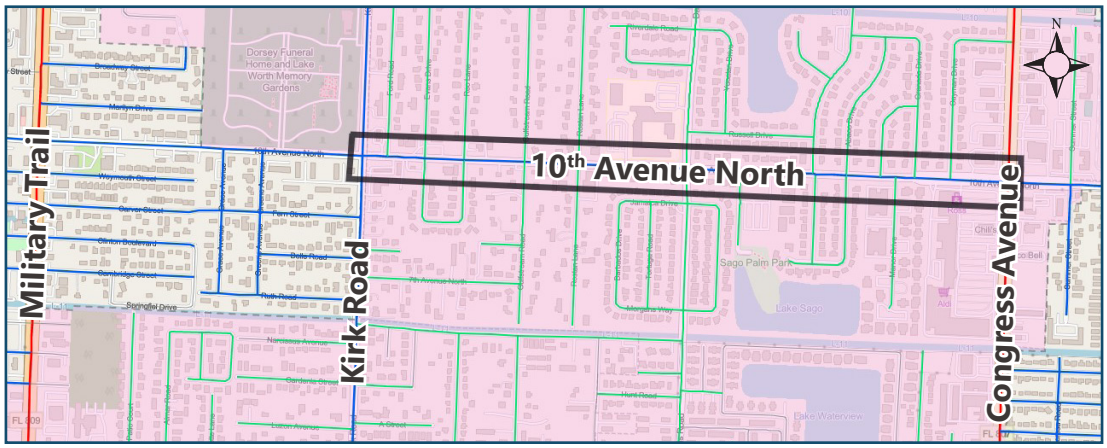
- The Conversion of signalized intersection to a roundabout.
- The planning level estimate assumes that no ROW acquisition will be required. Final determination of ROW clearance will be established during the final design phase.

Planning Level Estimate: $661,500.00

Traffic Operational Road Segment Improvements

The Roadway Assessment included an evaluation of the traffic operations at key road segments in the transportation analysis study area. There are six Palm Beach County and FDOT roadway corridor segments that exceed a level-of-service D threshold in the existing and/or future conditions. The Village of Palm Springs does not own or maintain these roadway segments and, therefore, improvements have not been included as part of the Transportation/Mobility Master Plan recommendations. Detailed information regarding these corridors have been included in the Appendix for reference.

Traffic Calming Improvements



The Roadway Assessment included an evaluation of the traffic calming improvements in the transportation analysis study area. A traffic calming study and public outreach process will need to be completed prior to implementation of each project. Table 23 depicts the potential traffic calming improvement projects.

Table 23: Traffic Operational Road Segment Improvements

Traffic Calming Improvements - Road Segments/Intersections			
No.	**Road Segment/Intersection Name**	**Year**	**Scope of Mitigation Improvements**
1	10th Avenue - Between Kirk Road and Congress Avenue	2020	Installation of speed radar signs pending traffic study approval
2	Congress Avenue - Between Forest Hill Boulevard and Summit Boulevard	2020	Installation of speed radar signs pending traffic study approval
3	Alemeda Drive - Between S. Congress and Kirk Road	2020	Evaluate a neighborhood traffic circle at Davis Road and Alemeda Drive; Evaluate speed tables along Alemeda Drive
4	Davis Road - Between Greenbrier Drive and 10th Avenue N	2020	Evaluate a neighborhood traffic circle at Davis Road and Riverdale Road or Winged Foot Road; Evaluate speed tables along Davis Road
5	Lake Worth Road - Between Kirk and S. Congress Avenue	2020	Installation of speed radar signs pending traffic study approval
6	Lillian Road - Between Congress Avenue and Lori Drive	2020	Evaluate speed tables along Lilian Road
7	Lorene Drive east of Congress Avenue	2020	Evaluate speed tables along Lorene Drive
8	Park Lane/Greenbrier Drive - Between Kirk Road and Congress Avenue	2020	Evaluate neighborhood traffic circles at the intersections of Davis Road and Gulfstream Road; Evaluate speed tables on Greenbrier Drive

10th Avenue - Between Kirk Road and Congress Avenue

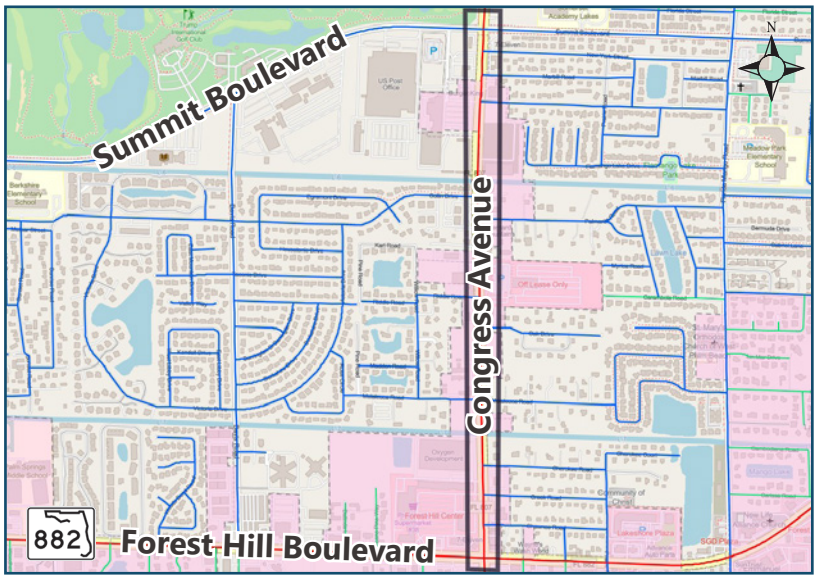


Figure 8: 10th Avenue Traffic Calming Corridor

10th Avenue between Kirk Road and Congress Avenue has an 85th percentile speed of 44 mph eastbound and 44 mph westbound. The posted speed limit is 40 mph. The 85th percentile speed is defined as the speed at or below which 85 percent of vehicles travel. Therefore the 85th percentile speed is 4 miles over the posted speed limit of 40 mph. The installation of electronic radar driver feedback signs is recommended for this road segment pending the preparation of a traffic study that warrants the installation of these signs.

Congress Avenue - Between Forest Hill Boulevard and Summit Boulevard

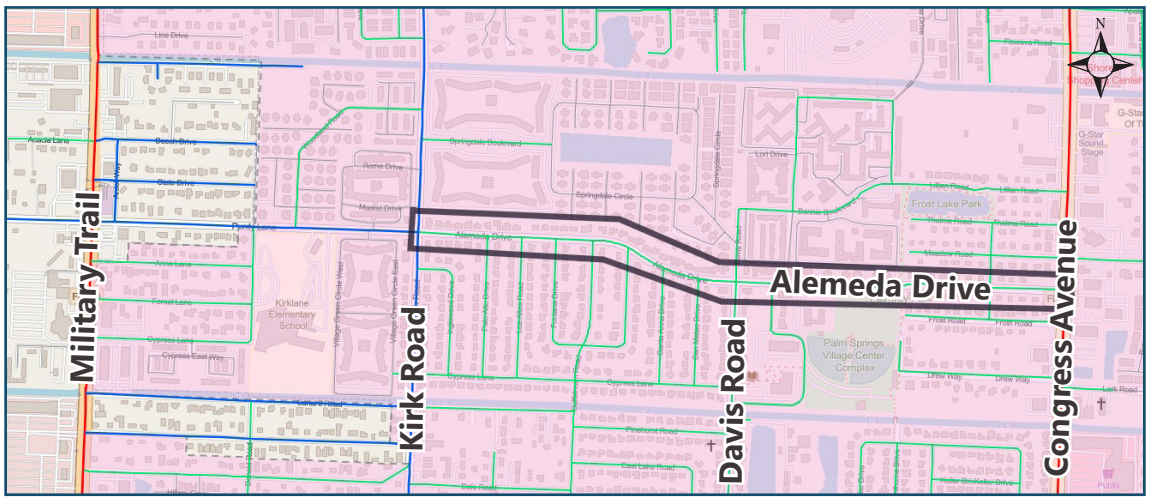

Figure 9: Congress Avenue Traffic Calming Corridor

Congress Avenue between Forest Hill Boulevard and Summit Boulevard has an 85th percentile speed of 51 mph northbound and 48 mph southbound. The posted speed limit is 40 mph. Therefore the 85th percentile speed is 8 to 11 miles over the posted speed limit of 40 mph. The installation of electronic radar driver feedback signs is recommended for this road segment pending the preparation of a traffic study that warrants the installation of these signs.

Alemeda Drive - Between S. Congress and Kirk Road

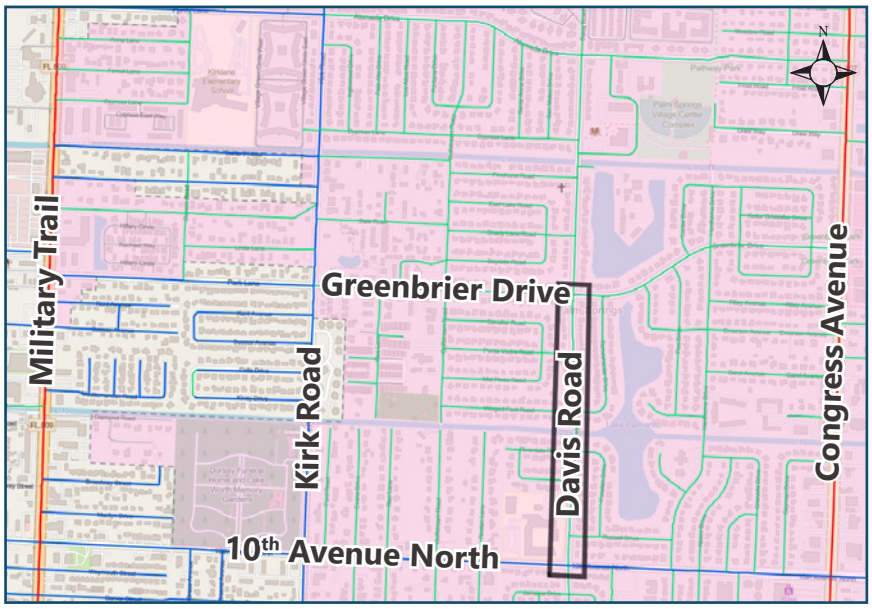

Figure 10: Alemeda Drive Traffic Calming Corridor

Alemeda Drive between Congress Avenue and Kirk Road has an 85th percentile speed of 36 mph eastbound and 44 mph westbound. The posted speed limit is 25 mph. Therefore the 85th percentile speed is 11 to 14 miles over the posted speed limit of 25 mph. The installation of a neighborhood traffic circle at Davis Road and Alemeda Drive and/or a speed tables along Alemeda Drive is recommended.

Davis Road - Between Greenbrier Drive and 10th Avenue N.

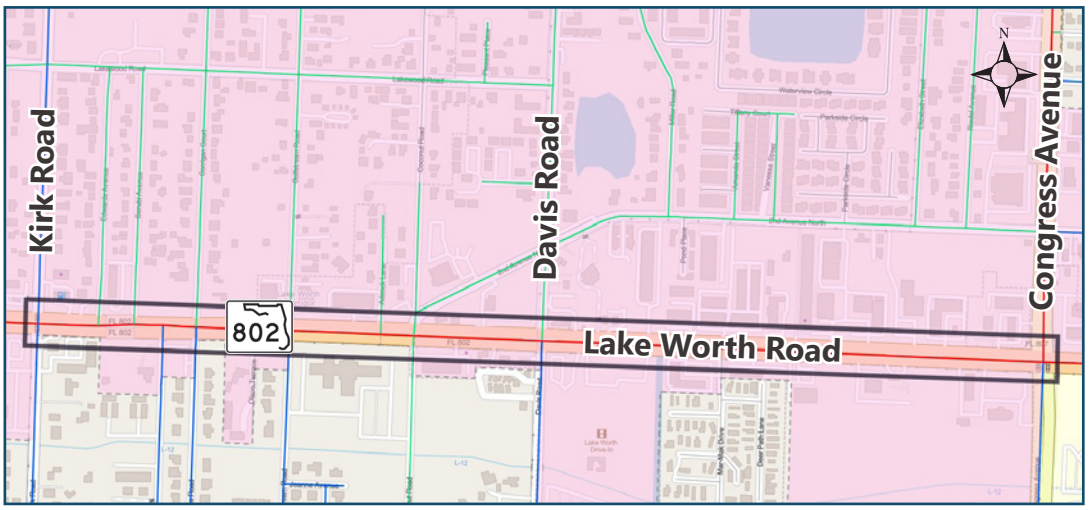

Figure 11: Davis Road Traffic Calming Corridor

Davis Road between Greenbrier Drive and 10th Avenue N has an 85th percentile speed of 36 mph northbound and 31 mph southbound. The posted speed limit is 25 mph. Therefore the 85th percentile speed is 5 to 11 miles over the posted speed limit of 25 mph. The installation of a neighborhood traffic circle at Davis Road and Riverdale Road or Winged Foot Road and/or a speed tables along Davis Road is recommended.

Lake Worth Road - Between Kirk Road and S. Congress Avenue

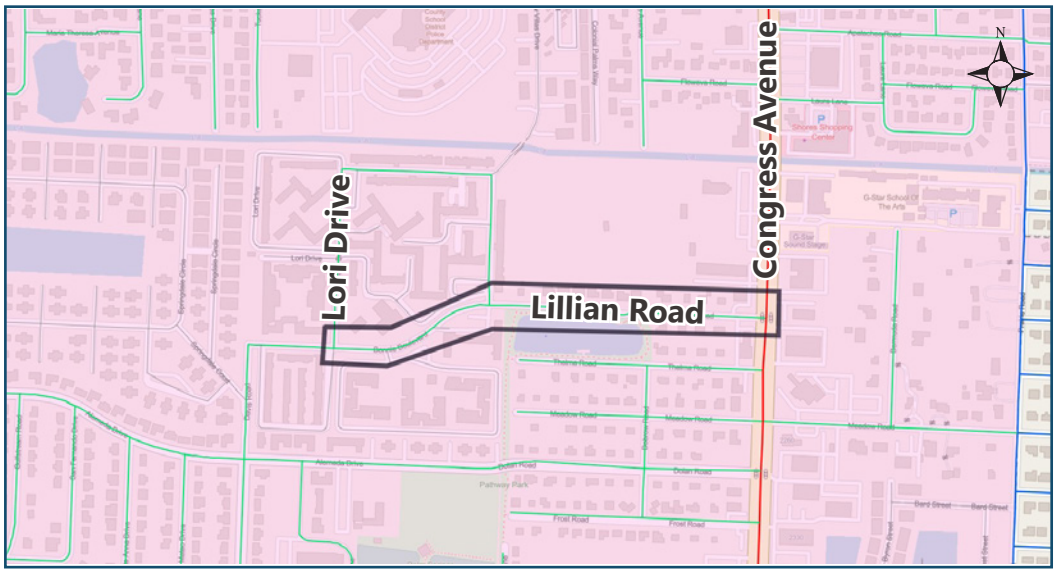

Figure 12: Lake Worth Road Traffic Calming Corridor

Lake Worth Road between Kirk Road and S. Congress Avenue has an 85th percentile speed of 48 mph eastbound and 46 mph westbound. The posted speed limit is 40 mph. Therefore the 85th percentile speed is 6 to 8 miles over the posted speed limit of 40 mph. The installation of electronic radar driver feedback signs is recommended for this road segment pending the preparation of a traffic study that warrants the installation of these signs.

Lillian Road - Between Congress Avenue and Lori Drive

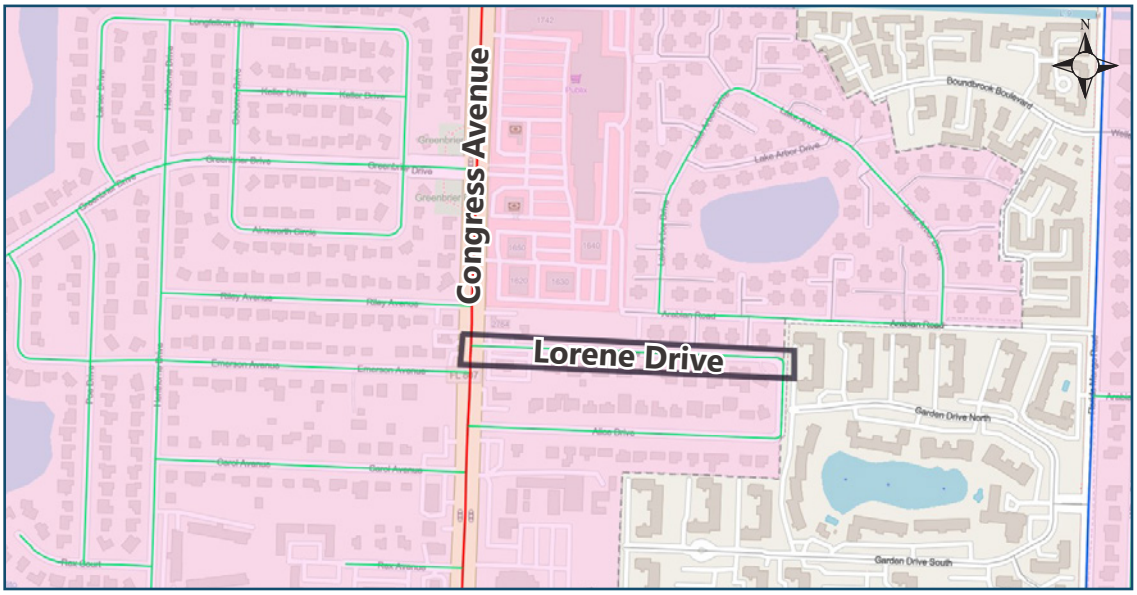

Figure 13: Lillian Road Traffic Calming Corridor

Lillian Road between Congress Avenue and Lori Drive has an 85th percentile speed of 33 mph eastbound and 30 mph westbound. The posted speed limit is 20 mph. Therefore the 85th percentile speed is 10 to 13 miles over the posted speed limit of 20 mph. The installation of speed tables along Lillian Road is recommended for this road segment pending the public outreach process for this potential traffic calming improvement.

Lorene Drive - East of Congress Avenue

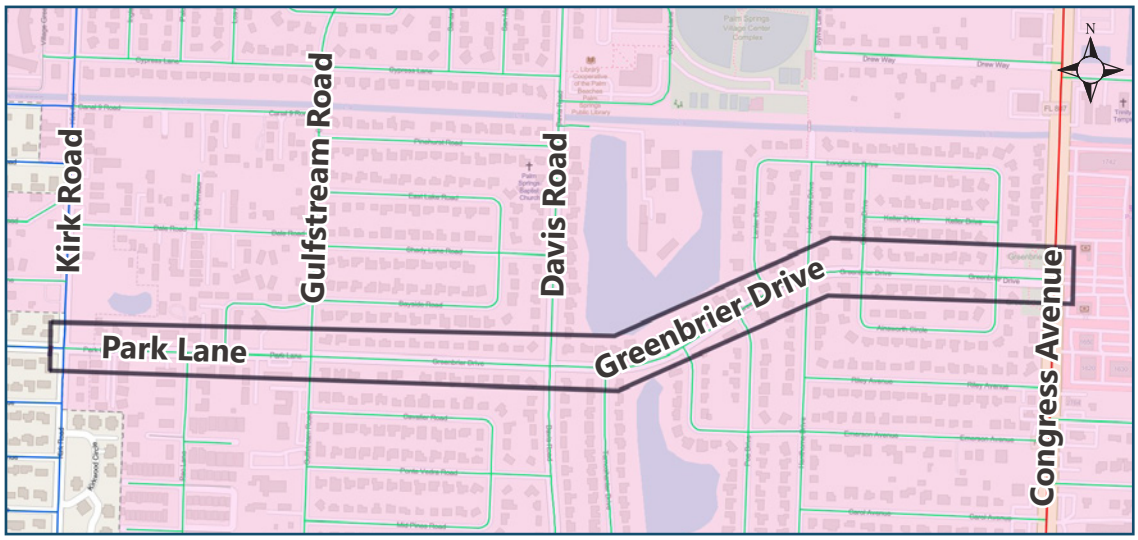

Figure 14: Lorene Drive Traffic Calming Corridor

Lorene Drive east of Congress Avenue has an 85th percentile speed of 30 mph eastbound and 28 mph westbound. The posted speed limit is 20 mph. Therefore the 85th percentile speed is 8 to 10 miles over the posted speed limit of 20 mph. The installation of speed tables along Lorene Drive is recommended for this road segment pending the public outreach process for this potential traffic calming improvement.

Park Lane/Greenbrier Drive - Between Kirk Road and Congress Avenue

Figure 15: Greenbrier Drive Traffic Calming Corridor

Park Lane/Greenbrier Drive between Kirk Road and Congress Avenue has an 85th percentile speed of 33 mph eastbound and 32 mph westbound. The posted speed limit is 25 mph. Therefore the 85th percentile speed is 7 to 8 miles over the posted speed limit of 25 mph. The installation of a neighborhood traffic circle at the intersections of Davis Road and Gulfstream Road and/or a speed tables along Greenbrier Drive is recommended.

Safety Improvement Projects

A Safety Study would be prepared by the maintaining authority of the roadway segment and related intersections whether it will be the FDOT, Palm Beach County or the Village of Palm Springs. A Safety Study would include a detailed evaluation of the crashes identified along a road segment including intersections. The intent of a Safety Study is to assess the safety and operations of motorists and pedestrians to identify possible improvements to mitigate crash patterns at a road segment and/ or study intersection. A Safety Study would include the following key elements: Intersection Inventory including preparation of a Condition Diagram; Crash Review, Collision Diagram & Crash Analysis for the defined 3 to 5 year period; intersection delay study; traffic data collection including 4 hour manual turning movement counts and 72-hour bidirectional speed/volume counts; Safety and Operational Field Assessments; Level-of-service Analysis; Recommendation for Improvements, Preliminary Opinion of Probable Costs for the Improvements; and final Technical Memorandum.

The completion of a Safety Study is recommended at the High Crash Location road segments. The top High Crash Locations are shown in Table 24.

Table 24: Safety Improvements - High Crash Locations

Safety Improvements - High Crash Locations			
No.	**Road Segment/Intersection Name**	**Year**	**Scope of Safety Improvements**
1	Alemeda Drive - Military Trail to Congress Avenue	2021	Perform Corridor Safety Study to mitigate for high crash location
2	Kirk Road - 10th Avenue to Lake Worth Road	2021	Perform Corridor Safety Study to mitigate for high crash location
3	Kirk Road - Summit Boulevard to Forest Hill Boulevard	2021	Perform Corridor Safety Study to mitigate for high crash location
4	Summit Boulevard - Between Congress Avenue to Florida Mango Road	2021	Perform Corridor Safety Study to mitigate for high crash location
5	Kirk Road - Forest Hill Boulevard to Greenbrier Drive	2021	Perform Corridor Safety Study to mitigate for high crash location
6	Congress Avenue - 10th Avenue to Lake Worth Road	2021	Perform Corridor Safety Study to mitigate for high crash location; high pedestrian and bicycle crash location

»PEDESTRIAN & BICYCLE & TRANSIT RECOMMENDATIONS

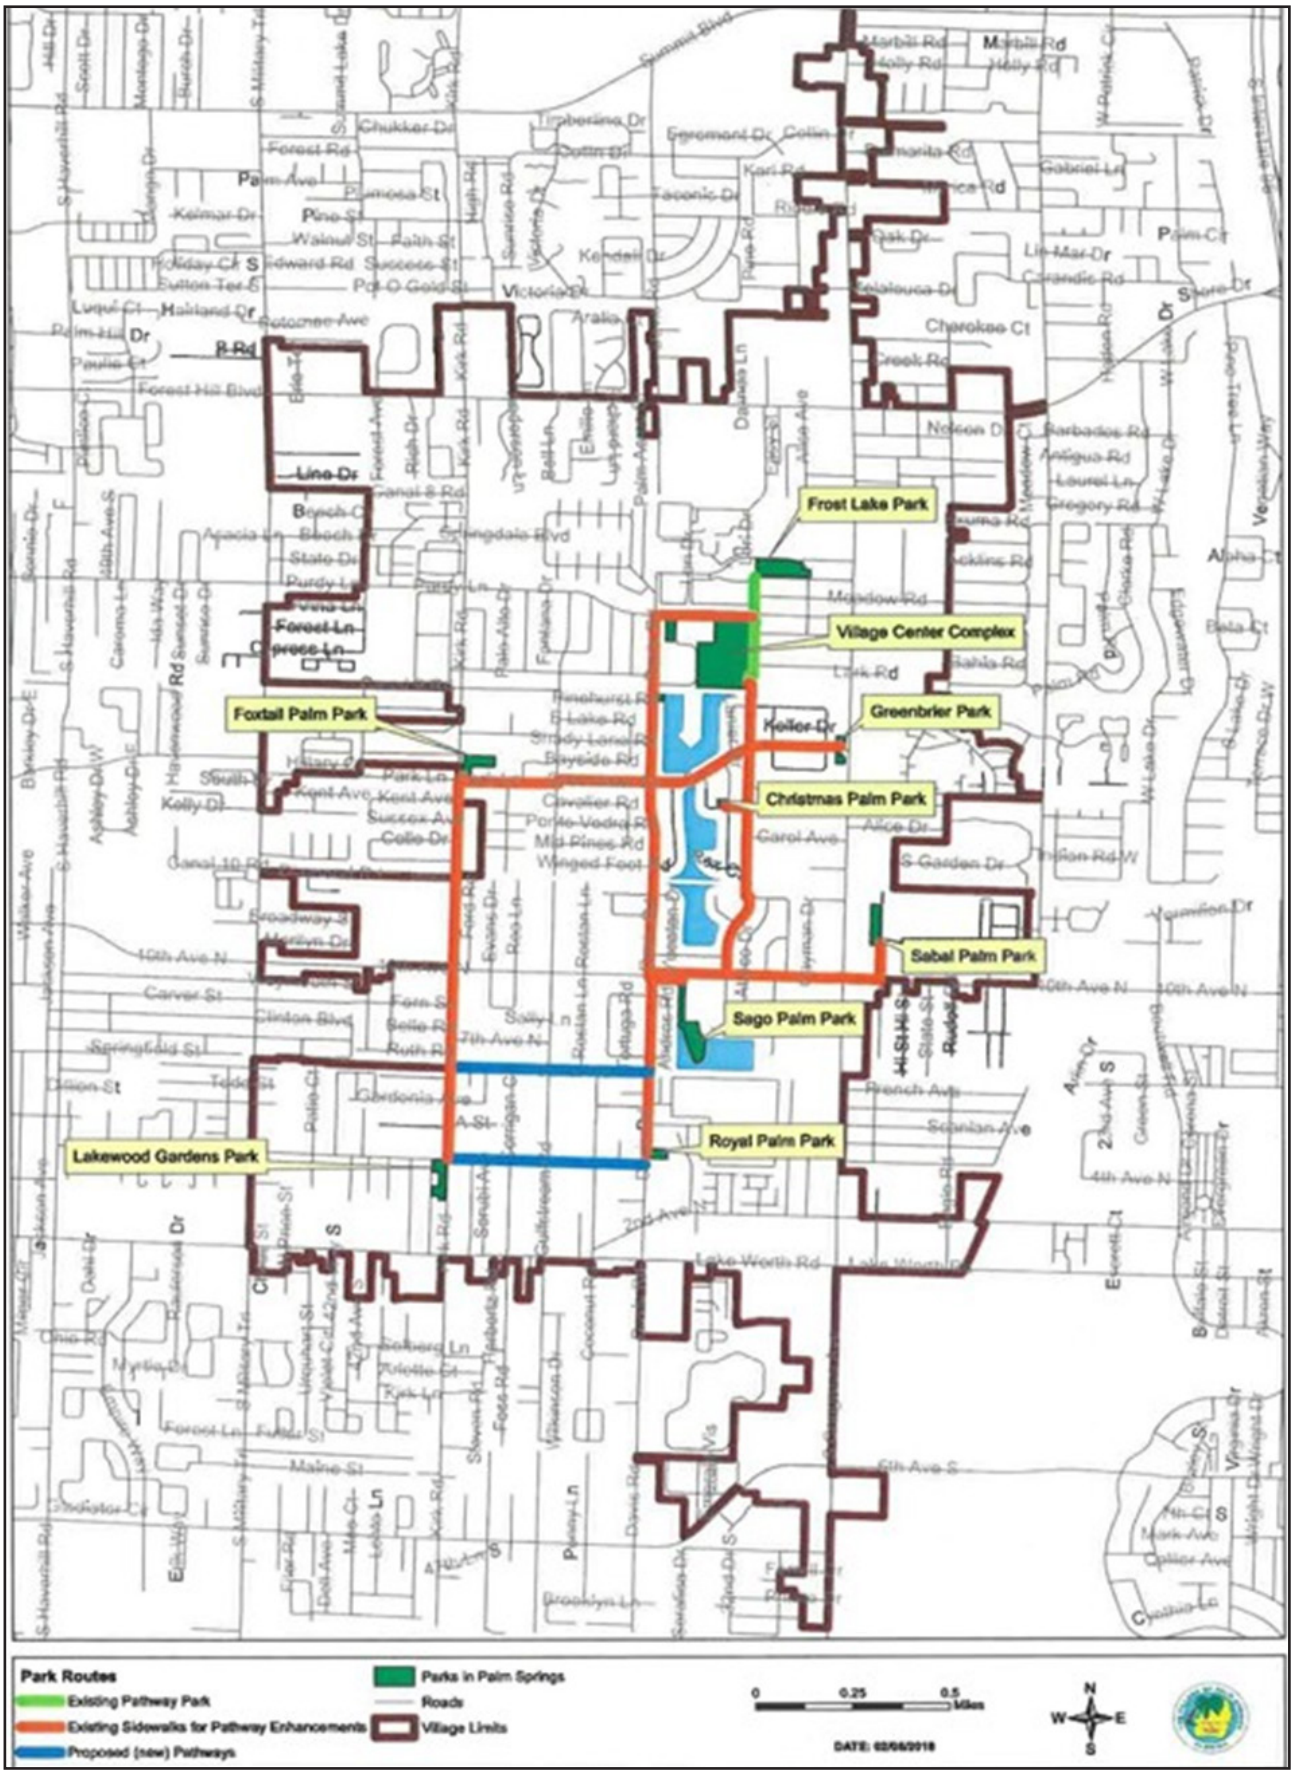
Progression and Prioritization - Bicycle and Pedestrian Network

The recommendations for bicycle, pedestrian and transit mobility improvements for the Village of Palm Springs are addressed through recommendations that progressively build a system of pedestrian and bicycle facilities. One way to address progressing improvements is by identifying physical gaps in basic infrastructure, such as sidewalks, then progress to higher-order improvements, such as multi-use paths, bike lanes, etc. It is recognized that much infrastructure needs to be built in Palm Springs to achieve a complete system. Therefore, rather than prioritize improvements based only on severity-of-need, the method used is to grow to a complete network from the center out, examining the following elements:

- **Type of User:** The pedestrian and bicycle networks will initially focus on supporting greater recreational use and then progress to locations intended for more "destination" trips, such as connecting to transit, shopping and work. Experience that shows that significant increase for pedestrian and bicycle travel is not achieved until residents first enjoy safe recreational rides or walks using high-quality infrastructure.
- **Existing Network:** The recommendations progress towards a network by starting with the Village's planned, programmed, and recently-constructed improvements, particularly, the Park Connector Pathways. The pedestrian network in the Village is mostly complete, with some gaps as depicted in the gap analysis map. The bicycle network is mostly incomplete, with some bike lanes.
- **Geography:** Continuity of facilities is critical to developing a successful network. The progression of the recommendations is to work outward from the Village's Park Connector Pathways while, at all times, maintaining the continuity of pedestrian and bike facilities.
- **Gaps:** As the recommendations work outwardly from the Parks Connectors as a geographic core, existing sidewalk gaps will be addressed, and bicycle facilities will be added, where needed, or improved where existing bicycle facilities are inadequate.
- **Traffic Impact:** Recommendations prioritize lower-traffic roads first, where the impact of pedestrian and bicycle improvements have minimal impact to the vehicular network throughput, and with lower potential safety conflicts. As the recommendations progress, and greater support for bicycle and pedestrian mobility is built, the possibility to effectively compete with traffic capacity becomes more likely. The result is to choose parallel local roadway alternatives, where possible (with continuity). This also generally results in progressing from local and collector streets to arterials, and from Village roadways first, then toward County and State roads.
- **Level of Transportation Stress (LTS):** The emphasis of the near-term recommendations is to create improvements on low-traffic-volume streets where the level-of-stress is lower. This also provides for earlier implementation of facilities where better LTS (numerically lower) can be attained. LTS is strongly affected by traffic volumes, number of lanes and traffic speed, so by favoring improvement on lower volume roads, the resulting network will be safer and more enjoyable. Typically, for residential two-lane streets, improvements are simple and low cost, amounting to completing sidewalks, and providing markings and signage for shared lanes.
- **First & Last Mile Connections:** Where choices are available for pedestrian crossings, or which side of a street a shared-use path will be along, priority is given to connections for transit stops. The emphasis for improving transit ridership for the Village will support Palm Tran regional services with improved First & Last Mile connections.

Transit Network

Transit exists and grows as a *networked* system. The network includes transfers to more regional transit systems such as TriRail; and to more localized mobility systems or networks. Palm Tran provides the regional bus network in the County, and traverses the Village with seven of its routes. Together, the five east-west routes and two north-south routes served 3.1million passengers (not all in Palm Springs) in 2019 (more recent data are affected by the Covid19 pandemic so they are not reported here). In Palm Springs, as with many suburban areas, transit ridership and mode split are low, in part because these areas are not conducive to walking, which is the primary mode by which people reach a bus stop. This is the area of "First & Last Mile" improvements. The Village is *too suburban* to realize cost-effective transit ridership through increased transit capacity, whether by additional bus route frequencies or by municipal circulator service. Instead, the recommendations that follow, combine the location of transit stops to first build a comfortable and convenient pedestrian and bicycle network. Palm Tran buses include bike racks on the front. Bike racks are greatly favored by bicyclists instead of bike storage at stops; therefore, many of the recommendations include wayfinding signage that should include directions to bus stops and bus route information.



Park Connector Pathways

Work on the Park Connector Pathways is already underway with Phase 1 built, Phase 2B under construction, Phase 2A to start construction in 2022, and Phases 3 and 4 in planning and design. It is a network of shared-use path improvements for recreational pedestrians and bicyclists to connect the Village's parks, and includes expanded sidewalks, from a minimum of 8 feet in width to 10 feet. Because the network focuses on building a recreational system for people of all ages, the design of these facilities is toward the lowest (best) LTS possible.

The Park Connector Pathways system is the core of pedestrian, bicycle and First & Last mile recommendations of the Palm Springs Transportation/ Mobility Master Plan. For this reason, the four programmed phases are summarized on the pages that follow. They are not titled as recommendations, but as their Phases in the Village's program, and the title backgrounds are **green** to further differentiate them from the titles of recommendations which are **blue**.

Recommendation 1 is the completion of the Park Connector Pathway into a single, connected network, by linking the isolated Phase 4 Sago Park/Sabal Palm Park, and the rest of the network. Phases 1 through 4 are programmed, and Recommendation 1 is titled as Phase 5, to indicate that it completes the network to the overall concept plan shown on the following page.

Village of Palm Springs - Park Routes

» Palm Springs Park Connector Pathway Phase 1 | Complete

Facilities:
- 8-ft. wide multi-purpose path
- Enhanced crosswalk (pavers) across Alemeda Drive
- Trailhead signage and directional signage
- Enhanced landscaping: silver buttonwoods, live oaks, crepe myrtles, sabal palms
- Amenities: benches, water fountain, recycling and trash receptacles

Roadway: Alemeda Drive from Davis Road to park crosswalk

Limits: Crosswalk at east edge of the Palm Springs Park
Davis Road

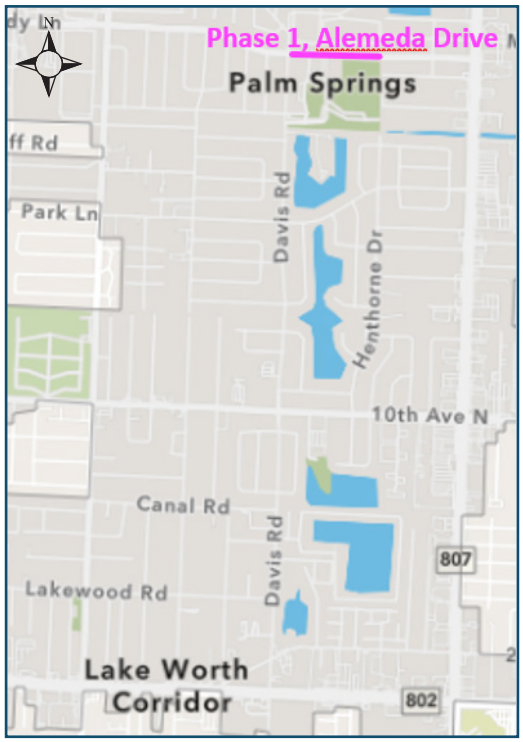
Major Destinations: Palm Springs Park, Public Library and Village Hall

Distance: 1,400 ft.

Expected Outcome: Safer and higher quality pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.5 before, LTS = 1.5 after
(to complete path on 2 sides w only bridge one-sided)

Bicycle LTS Change: LTS = 2.5 before, LTS = 1.0 after



Transit First/Last Mile: None

Cost Impact: $466,368, funded using Community Development Block Grant (CDBG) and One-Cent Sales Infrastructure Tax

Actions: Village Council approved a construction contract on April 8, 2021

Roadway Capacity Impact:
No adverse impact

Right-of-Way Impact:
Within public right-of-way and Village park

»Palm Springs Park Connector Pathway Phase 2A | Pre-Construction

Facilities:
- 8-ft. minimum shared-use path
- Directional signage
- Enhanced landscaping

Roadway: Davis Road from Alemeda Drive to Greenbrier Drive, along west side
Park Drive from Davis Road to Foxtail Palm Park

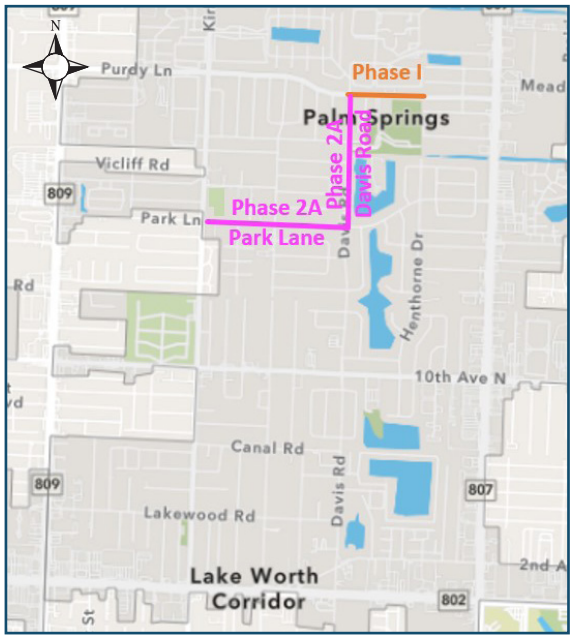
Major Destinations: Foxtail Palm Park

Distance: 5,000 ft.

Expected Outcome: Safer and higher quality pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.0 before, LTS = 2.0 after

Bicycle LTS Change: LTS = 3.0 before, LTS = 1.0 after



Transit First/Last Mile: None

Cost Impact: $854,550, funded using Community Development Block Grant (CDBG) and One-Cent Sales Infrastructure Tax

Actions: Construction award February 2022, constructed September 2002

Roadway Capacity Impact: No adverse impact

Right-of-Way Impact: Within public right-of-way

» Palm Springs Park Connector Pathway Phase 2B | Under Construction

Facilities:
- 8-ft. minimum shared-use path
- Crosswalk
- Directional signage
- Enhanced landscaping

Roadway: Davis Road from Greenbrier Drive to Canal 11 Road, west side
Davis Road from Canal 11 to Royal Palm Park, east side

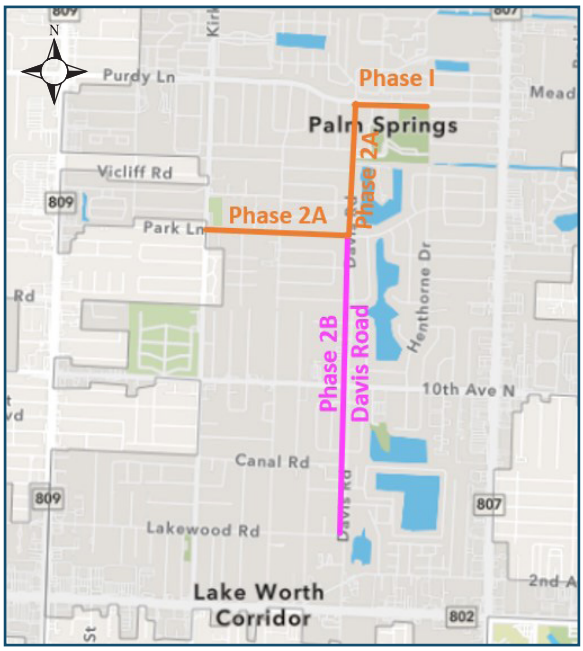
Major Destinations: Palm Springs Elementary School, Royal Palm Park

Distance: 5,400 ft.

Expected Outcome: Safer and higher quality pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.0 before, LTS = 2.0 after

Bicycle LTS Change: LTS = 3.0 before, LTS = 1.0 after



Transit First/Last Mile: Improved connections between civic uses and Palm Tran Route 61

Cost Impact: $505,066, funded using Community Development Block Grant (CDBG) and One-Cent Sales Infrastructure Tax

Actions: Construction started June 2021, complete December 2021

Roadway Capacity Impact: No adverse impact

Right-of-Way Impact:
Within public right-of-way

» Palm Springs Park Connector Pathway Phase 3 | Planning & Design

Facilities:
- 8-ft. minimum shared-use path, Kirk Road
- Shared-use Parkways along Canal 11 and Lakewood Road
- Directional signage
- Enhanced landscaping

Roadway: Canal 11 north side, from Davis Road to Kirk Road (Part 1)
Lakewood Road, from Davis Road to Kirk Road (Part 2)
Kirk Road, from Canal 11 trail to Lakewood Road (Part 2)

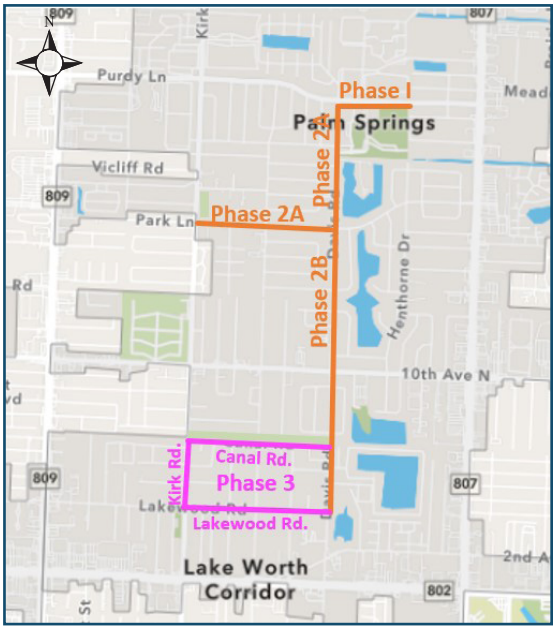
Major Destinations: Canal 11 as linear park

Distance: 6,700 ft.

Expected Outcome: Safer and higher quality pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 3.0 before, LTS = 2.0 after

Bicycle LTS Change: LTS = 3.0 before, LTS = 1.0 after



Transit First/Last Mile: None

Cost Impact: $100,000 for Part 1, $381,866 for Part 2: to be funded using Community Development Block Grant (CDBG) and One-Cent Sales Infrastructure Tax

Actions: Part 1: FY 2024
Part 2: bidding Dec. 2022, construction through September 2023

Roadway Capacity Impact:
No adverse impact

Right-of-Way Impact:
All improvements within public right-of-way

» Palm Springs Park Connector Pathway Phase 4 | Planning & Design

Facilities:
- 8-ft. minimum shared-use path along west side of Davis Drive
- Directional signage
- Enhanced landscaping

Roadway: Kirk Road, from Canal 11 trail to Park Lane (Foxtail Palm Park)
10th Avenue North, from Sago Park Road to Summer Street
Summer Street from 10th Avenue North to Sabal Palm Park

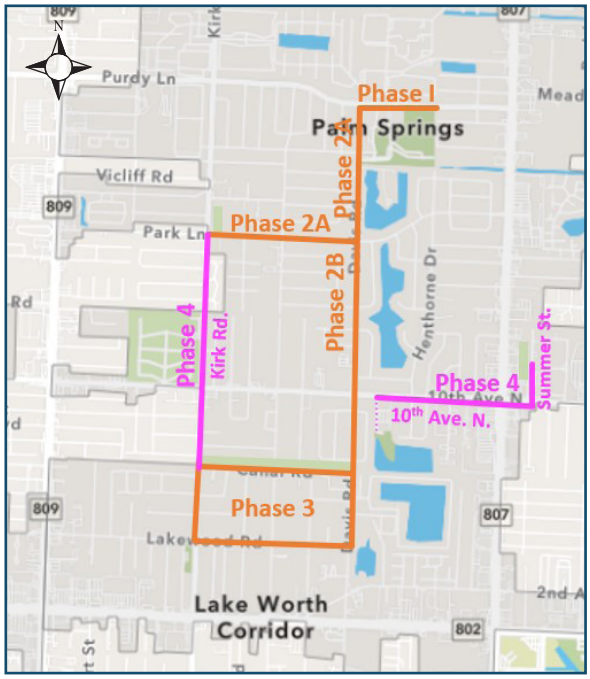
Major Destinations: Sago Park, Sabal Palm Park

Distance: 4,000 ft., Kirk Road;
3,400 ft. 10th Avenue N. and Summer Road to parking

Expected Outcome: Safer and higher quality pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.5 & 3.5, before, LTS = 1.0 after

Bicycle LTS Change: LTS = 3.0 & 4.0 before, LTS = 1.0 & 2.0 after



Transit First/Last Mile: Improved connections between parks, school, civic uses, and Palm Tran Route 61

Cost Impact: $100,000 to be funded using Community Development Block Grant (CDBG) and One-Cent Sales Infrastructure Tax

Actions: Bidding December 2022, construction through September 2023

Roadway Capacity Impact:
No adverse impact

Right-of-Way Impact:
All improvements within public right-of-way

» Recommendation 1: Palm Springs Park Connector Pathway Phase 5

Facilities:

- 8-ft. shared-use path along 10th Av. N. with enhanced landscaping
- Shared right-of-way markings along Henthorne Drive
- Pedestrian crossing markings along Henthorne Drive
- Enhanced pedestrian crossing at crossing with Greenbrier Drive,
- Sidewalk extension along church
- Crossing markings along Hawthorne Drive
- Pedestrian actuated crosswalk on 10th Avenue North
- Tertiary directional signage

Roadway:

10th Avenue North from Davis Road to Sago Park Road
Henthorne Drive from Canal 9 pedestrian bridge to 10th Avenue North

Major Destinations:

Completes connection between the continuous network of Phases 1 through 3 and the Phase 4 Sago Park and Sabal Palms Park connector

Distance:

500 ft. 10th Avenue North; 4,050 ft. Henthorne Drive

Expected Outcome:

Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change:

LTS = 2.0 before, LTS = 2.0 after

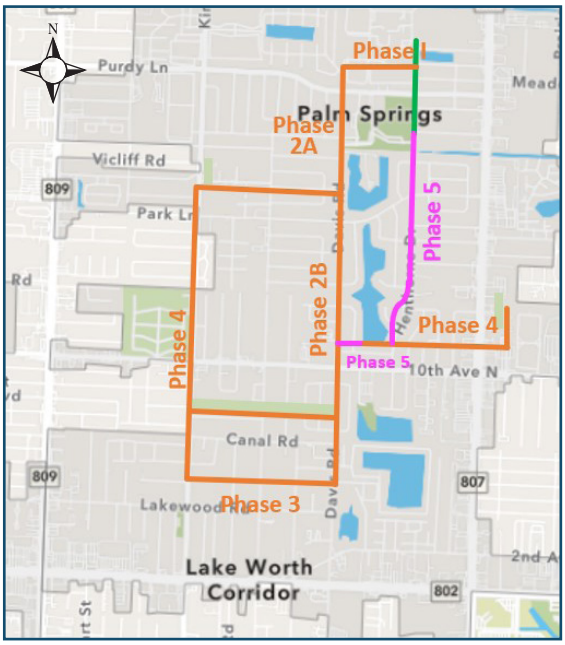
Bicycle LTS Change:

LTS = 2.0 before, LTS = 2.0 after

Transit First/Last Mile:

Improved connections between parks, school, civic uses and Palm Tran Routes 61 (10th Avenue N.) and Route 2 (Congress Avenue)

Cost Impact:



Planning level cost estimate: $134,000

Roadway Capacity Impact:

No adverse impact

Right-of-Way Impact:

All improvements within public right-of-way

» Recommendation 2: Bike & Pedestrian Network Extensions - Greenbrier Drive

Facilities:
- 8-ft. shared-use path along north side of Greenbrier Drive
- Marked crosswalks (4) with bike crossing signage
- Directional signage
- Resod and replace landscaping

Roadway: Greenbrier Drive from Davis Road to South Congress Avenue (north side)

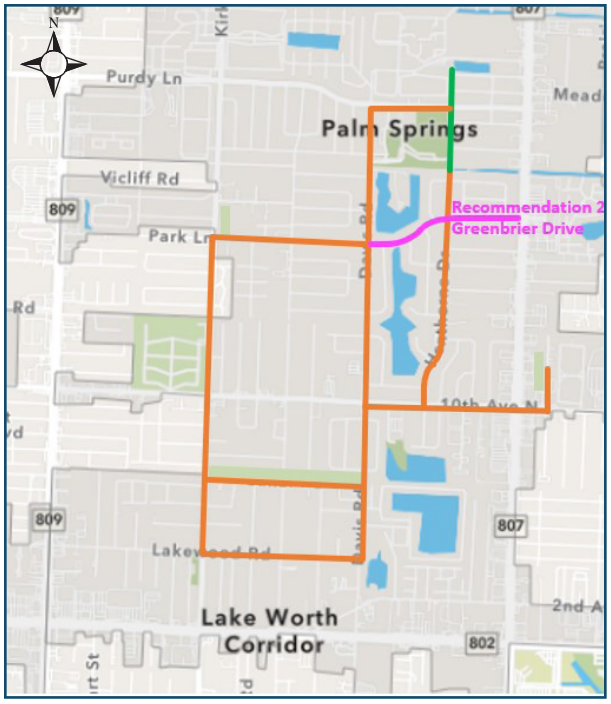
Major Destinations: Greenbrier Open Space (at Congress)

Purpose: Completes bicycle connection between the continuous network of the Park Connector Pathway and Congress Avenue at a signalized intersection with crosswalk

Distance: 2,750 ft.

Expected Outcome: Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.0 before, LTS = 2.0 after



Bicycle LTS Change: LTS = 3.0 before, LTS = 1.0 after

Transit First/Last Mile: Improved connections between parks, civic uses, and Palm Tran Route 2 (Congress Avenue)

Cost Impact: Planning level cost estimate: $230,400

Roadway Capacity Impact:
No adverse impact

Right-of-Way Impact:
All improvements within public right-of-way

» Recommendation 3: Bike & Pedestrian Network Extensions - Alemeda West

Facilities:
- 8-ft. shared-use path along north side of Greebrier Drive
- Marked crosswalks (4) with bike crossing signage
- Directional signage
- Resod and replace landscaping
- Improved landscaping along school edge

Roadway: Greenbrier Drive from Davis Road to Donald Road (south side)
Donald Road from Greenbrier Drive to Cypress Way (east side)
Cypress Way from Donald Road to South Military Trail (north side)

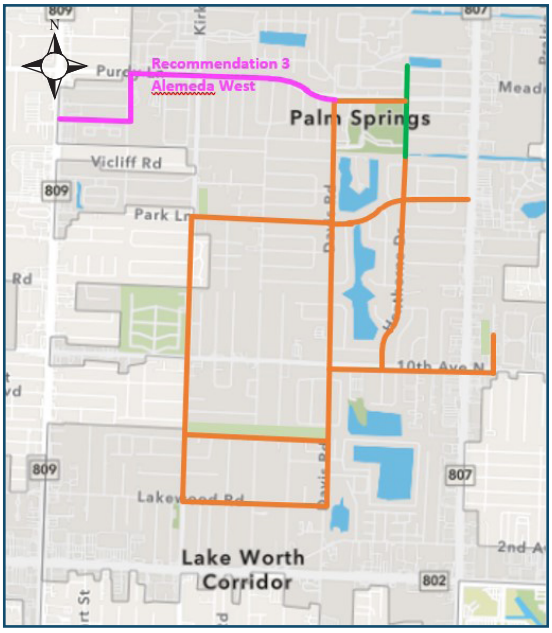
Major Destinations: Kirklane Elementary School

Purpose: Completes connection between the continuous network of the Park Connector Pathway and South Military Trail with shared use path

Distance: 4,050 ft. (Alemeda), 900 (Donald), 1,300 (Cypress)

Expected Outcome: Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 3.0 before, LTS = 2.0 after



Bicycle LTS Change: LTS = 3.0 before, LTS = 1.0 after

Transit First/Last Mile: Improved connections between parks, school, and Palm Tran Route 60 (Alemeda Drive) and Route 3 (Military Trail)

Cost Impact: Planning level cost estimate: $262,000

Roadway Capacity Impact:
No adverse impact

Right-of-Way Impact:
All improvements within public right-of-way

» Recommendation 4: Bike & Pedestrian Network Extensions - Dolan East

Facilities:
- 8-ft. shared-use path along north side of Dolan Road
- Marked crosswalk (1) with bike crossing signage
- Directional signage
- Resod and replace landscaping

Roadway: Dolan Road from crosswalk to South Congress Avenue (south side)

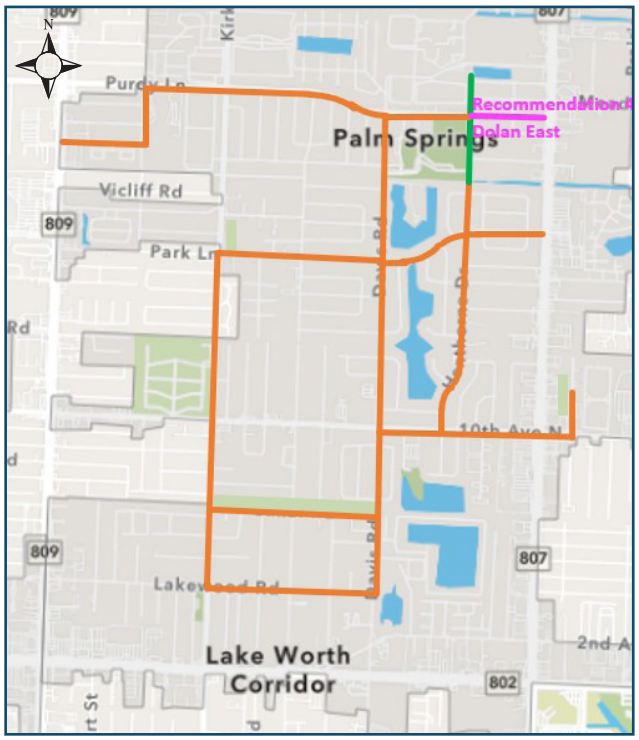
Major Destinations: South Congress Avenue signalized intersection

Purpose: Completes connection between the continuous network of the Park Connector Pathway and Congress Avenue with shared-use path

Distance: 1,300 ft.

Expected Outcome: Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.5 before, LTS = 2.0 after



Bicycle LTS Change: LTS = 3.0 before, LTS = 1.0 after

Transit First/Last Mile: Improved connections between parks, school, and Palm Tran Route 2 (South Congress Avenue)

Cost Impact: Planning level cost estimate: $147,600

Roadway Capacity Impact:
No adverse impact

Right-of-Way Impact:
All improvements within public right-of-way

» Recommendation 5: Bike & Pedestrian Network Extensions - Lakewood West

Facilities:
- Shared right-of-way along Lakewood Road
- 5-ft. sidewalk along north side of Lakewood Road
- 8 ft. shared use path along west side of Kirk Road
- Pedestrian crossings (4) at Lakewood and Kirk intersection
- Directional signage
- Resod and replace landscaping

Roadway: Lakewood Road, and Kirk Road (west side)

Major Destinations: Lakewood Gardens Park, Military Trail and Lake Worth Road signalized intersections

Purpose: Completes connection between the continuous network of the Park Connector Pathway and Congress Avenue with shared-use path

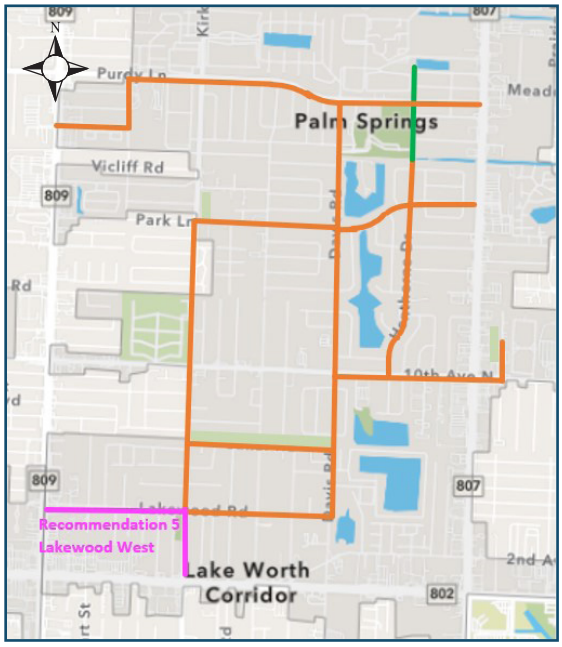
Distance: 2,600 ft. Lakewood, 1,300 ft. Kirk

Expected Outcome: Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.0 before (2.5 Kirk), LTS = 1.5 (2.0 Kirk) after

Bicycle LTS Change: LTS = 2.0 before (3.0 Kirk), LTS = 2.0 (1.0 Kirk) after

Transit First/Last Mile: Improved connections between parks, civic uses, residences, and Palm Tran Route 3 (S. Military Trail) and Route 62 (Lake Worth Road)



Cost Impact: Planning level cost estimate: $195,200

Roadway Capacity Impact:

No adverse impact on Kirk, de minimis impact on Lakewood Road

Right-of-Way Impact:

All improvements within public right-of-way

» Recommendation 6: Bike & Pedestrian Network Extensions - 2nd Avenue East

Facilities:

- 8-ft. wide shared use path along Davis Road (east side)
- Sidewalks on both sides of 2nd Avenue North (existing condition, incomplete on one side)
- Sidewalks on both sides of Bellevue Avenue
- Buffered bicycle lanes on both sides of 2nd Avenue North
- Bicycle lanes on both sides of Bellevue Avenue
- Enhanced pedestrian crossings at intersections at Davis Road and 2nd Avenue N, 2nd Avenue N. and S. Congress Avenue, and across Lake Worth Road at Palm Beach State College north entrance.
- Zebra crossing at 2nd AvenueN. and Bellevue Avenue
- Directional signage

Roadway:

Davis Road: Lakewood Drive to Lake Worth Drive – 1,300 ft.
2nd Avenue North: Lake Worth Drive to Engle Road – 4,000 ft.
Bellevue Avenue: 2nd Avenue North to Lake Worth Road – 650 ft.
Lake Worth Road Bellevue Avenue to crossing to campus – 450 ft.

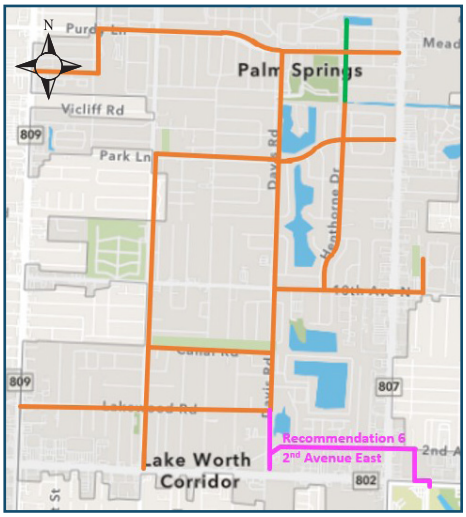
Major Destinations: Palm Beach State College

Distance: 6,400 ft.

Expected Outcome: Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change:

Davis Road: LTS =3.5 before, LTS = 2.0 after
2nd Avenue North: LTS = 3.5 before, LTS = 2.0 after
Bellevue Avenue: LTS = 3.5 before, LTS = 2.0 after
Lake Worth Road: LTS = 3.5 before, LTS = 3.5 after



Bicycle LTS Change:

Davis Road: LTS = 3.0 before, LTS = 1.0 after
2nd Avenue North: LTS = 3.0 before, LTS = 1.5 after
Bellevue Avenue: LTS =2.5 before, LTS = 2.0 after
Lake Worth Road: LTS =4.0 before, LTS = 2.0 after

Transit First/Last Mile:
Improved connections to Palm Tran Route 62

Cost Impact:
Planning level cost estimate = $522,700 (right-of-way acquisition, if any is not included in estimate)

Roadway Capacity Impact:
De minimis along 2nd Avenue N. and Bellevue Avenue, none along Davis Road

» Recommendation 7: Bike & Pedestrian Network Extensions - Kirk North

Facilities:
- 8 ft. shared use path along east side of Kirk Road
- Pedestrian crossings along 6 Kirk intersections with bike signage
- Directional signage
- Resod and replace landscaping

Roadway: Kirk Road (east side)

Major Destinations: Forest Hill Boulevard signalized intersection

Purpose: Completes connection between Park Connector Pathway and Forest Hill Boulevard via bike lanes along Kirk Road north of Purdy Lane

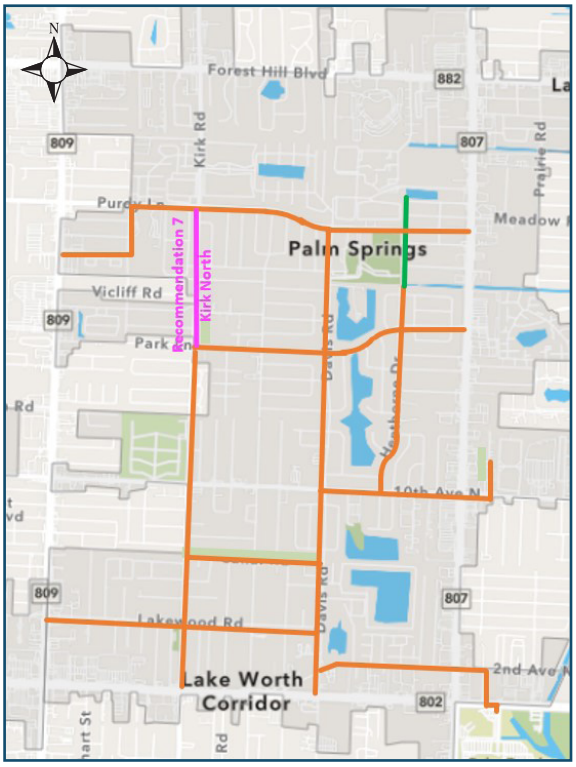
Distance: 2,700 ft.

Expected Outcome: Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.5 before, LTS = 2.0 after

Bicycle LTS Change: LTS = 3.0 before, LTS = 1.0 after

Transit First/Last Mile: Improved connections between parks, civic uses, residences, and Palm Tran Route 60 (Kirk Road) and Route 46 (Forest Hill Boulevard)



Cost Impact: Planning level cost estimate: $218,900

Roadway Capacity Impact:

No adverse impact on Kirk Road

Right-of-Way Impact:

Within right-of-way

» Recommendation 8: Bike & Pedestrian Network Extensions - Meadow Prairie

Facilities:

- 5 ft. sidewalks on both sides of Meadow Road
- Bike lane on both sides of Meadow Road
- 8 ft. shared-use path along west side of Prairie Road with crossings
- Buffered multi-purpose path along South Congress Avenue west of sidewalk from north crosswalk at Dolan Road to Meadow Road. (requires an easement, right-of-way dedication or purchase)
- Directional signage

Roadway: Meadow Road from Congress Avenue to Prairie Road
Prairie Road from Meadow Road to Forest Hill Boulevard

Major Destinations: Forest Hill Boulevard intersection at Prairie Road

Purpose: Completes connection between Park Connector Pathway and Forest Hill Boulevard and completes sidewalk gaps

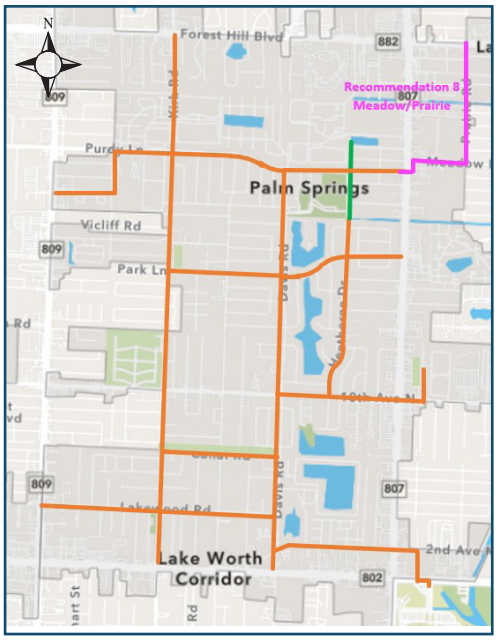
Distance: 1,300 ft. Meadow, 2,600 ft. Prairie

Expected Outcome: Unified and continuous pedestrian and bicycle recreational network

Pedestrian LTS Change: LTS = 2.0 before (2.5 Kirk), LTS = 1.5 (2.0 Kirk) after

Bicycle LTS Change: LTS = 2.0 before (3.0 Kirk), LTS = 2.0 (1.0 Kirk) after

Transit First/Last Mile: Improved connections with Palm Tran Route 2 and Route 46



Cost Impact: Planning level cost estimate: $294,300

Roadway Capacity Impact:

De minimis impacts

Right-of-Way Impact:

200 ft. along Congress Avenue on west side

» Recommendation 9: Buffered Bike Lanes and Complete Streets – Forest Hill Boulevard

Facilities:

- Provide improved pedestrian and bicycle facilities on both sides, based on one of two options to be determined based on design and construction of future capacity improvements:
  - A. Buffered bicycle lane of 6 to 8 ft. in width, whether from reduced travel lanes or part of capacity enhancements (roadway widening project).
  - B. Buffered multi-purpose shared facility on each side, each one-way and 8-ft. wide, with minimum 3-ft. landscape buffer to curb. Each additional cross-section is 3-5 feet per side, whether from reduced travel lanes or part of capacity enhancements (roadway widening project).
- Enhanced crosswalks (10 intersecting streets)
- Landscape enhancements
- Directional signage

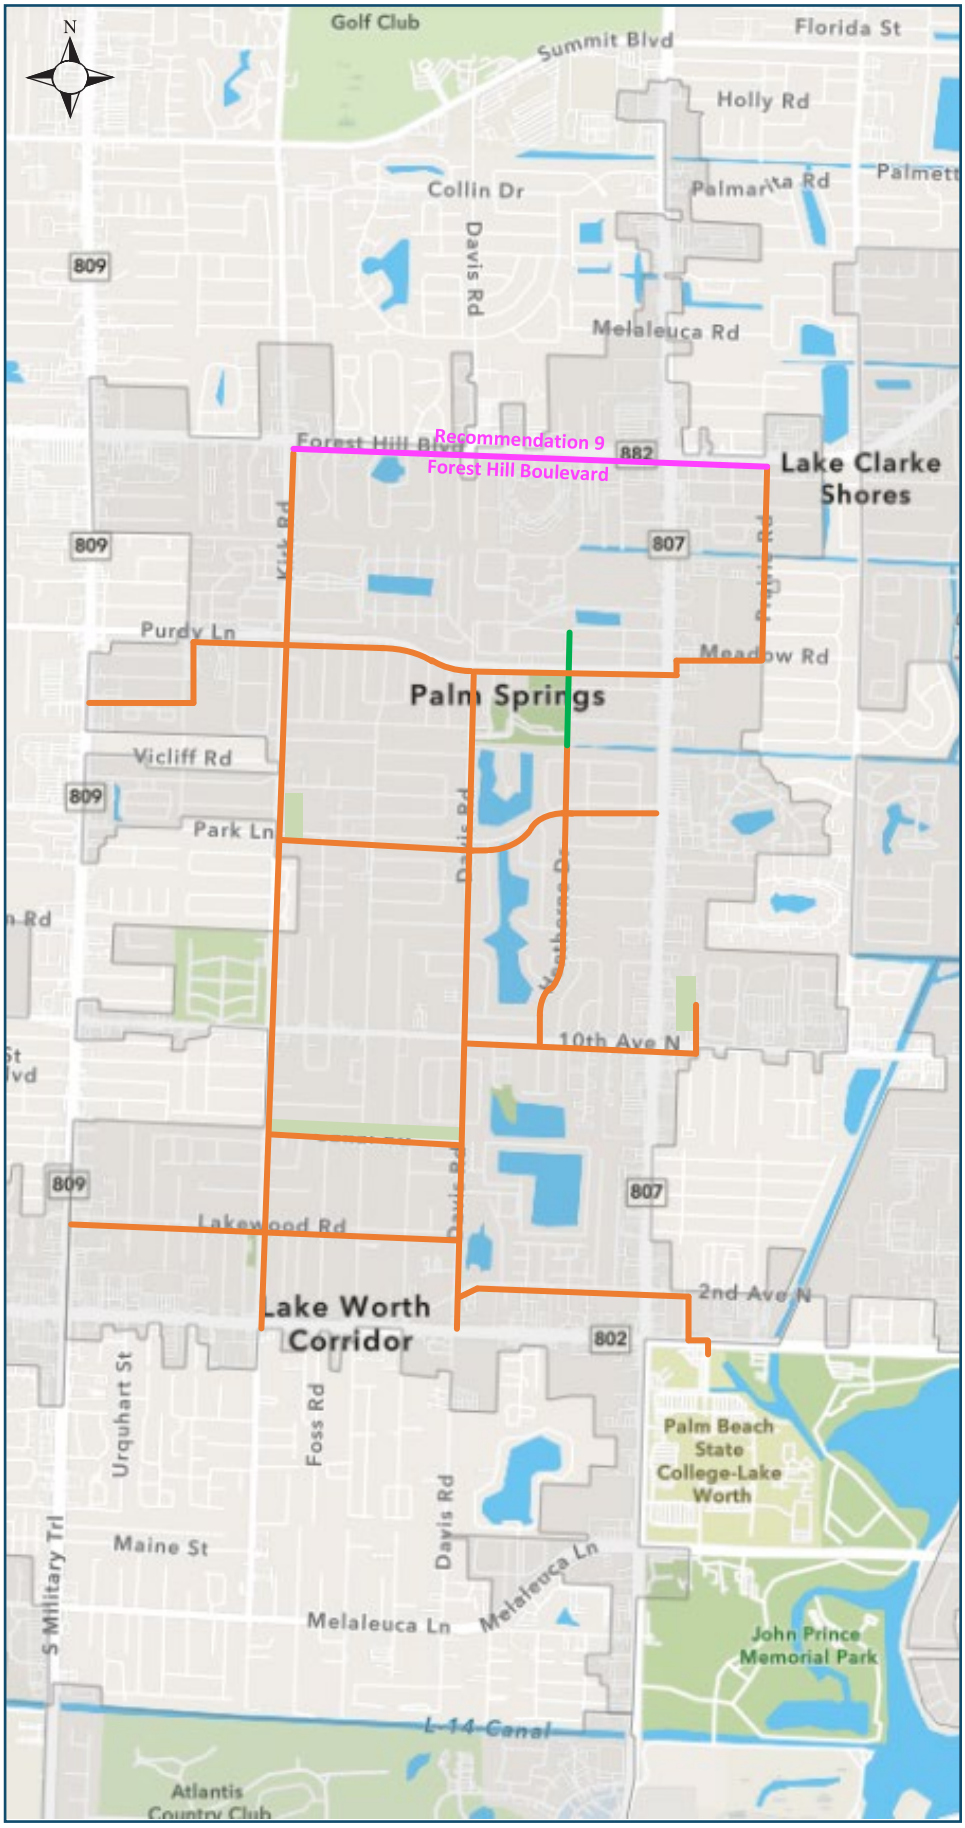
Roadway and Limits: Forest Hill Boulevard: South Military Trail to Prairie Road

Distance: 9,300 ft.

Purpose: Recommendations 1 through 8 focused on creating a network among lower volume streets with less constraints for competing for traffic capacity. Recommendations 9 through 12 are to complete the network along major streets to provide commuter functionality and access to businesses and employment centers.

Expected Outcome: Safer and higher quality pedestrian and bicycle network for commuters and non-recreational riders

Pedestrian LTS Change: LTS = 4.0 before, LTS = 4.0 after (LTS does not incorporate sidewalk buffer)



Bicycle LTS Change: LTS = 4 before, LTS = 4.0 with buffered lane, 2.0 with separated lane

Transit First/Last Mile: Improved connection between among Palm Tran routes 46 (Forest Hill Boulevard), 3 (S. Military Trail), and 2 (S. Congress Avenue)

Cost Impact: Planning level cost estimate: $595,900 for Option "A", $1,470,100 for Option "B" (ROW acquisition not included)

Actions: Meetings with stakeholders and adjacent land owners, determine coordination for timing and design, program, continue to work with state and MPO. Timing is to be determined by coordinating project.

Roadway Capacity Impact: Reduces capacity if roadway cross-section is used. Requires right-of-way and/or easements if a buffered multipurpose lane is planned.

» Recommendation 10: Buffered Bike Lanes and Complete Streets – 10th Avenue North

Facilities:

- Provide improved pedestrian and bicycle facilities on both sides, based on one of two options to be determined based on design and construction of future capacity improvements:
  - A. Buffered bicycle lane in place of 2-foot existing bike lanes. Net additional cross-section is 6 feet per side, whether from reduced travel lanes or part of capacity enhancements.
  - B. Buffered multi-purpose shared facility on each side, each one-way and 8-ft. wide, with minimum 3-ft. landscape buffer to curb. Each additional cross-section is 9 feet per side, whether from reduced travel lanes or part of capacity enhancements (roadway widening project).
- Enhanced crosswalks (7 intersecting streets)
- Landscape enhancements
- Directional signage

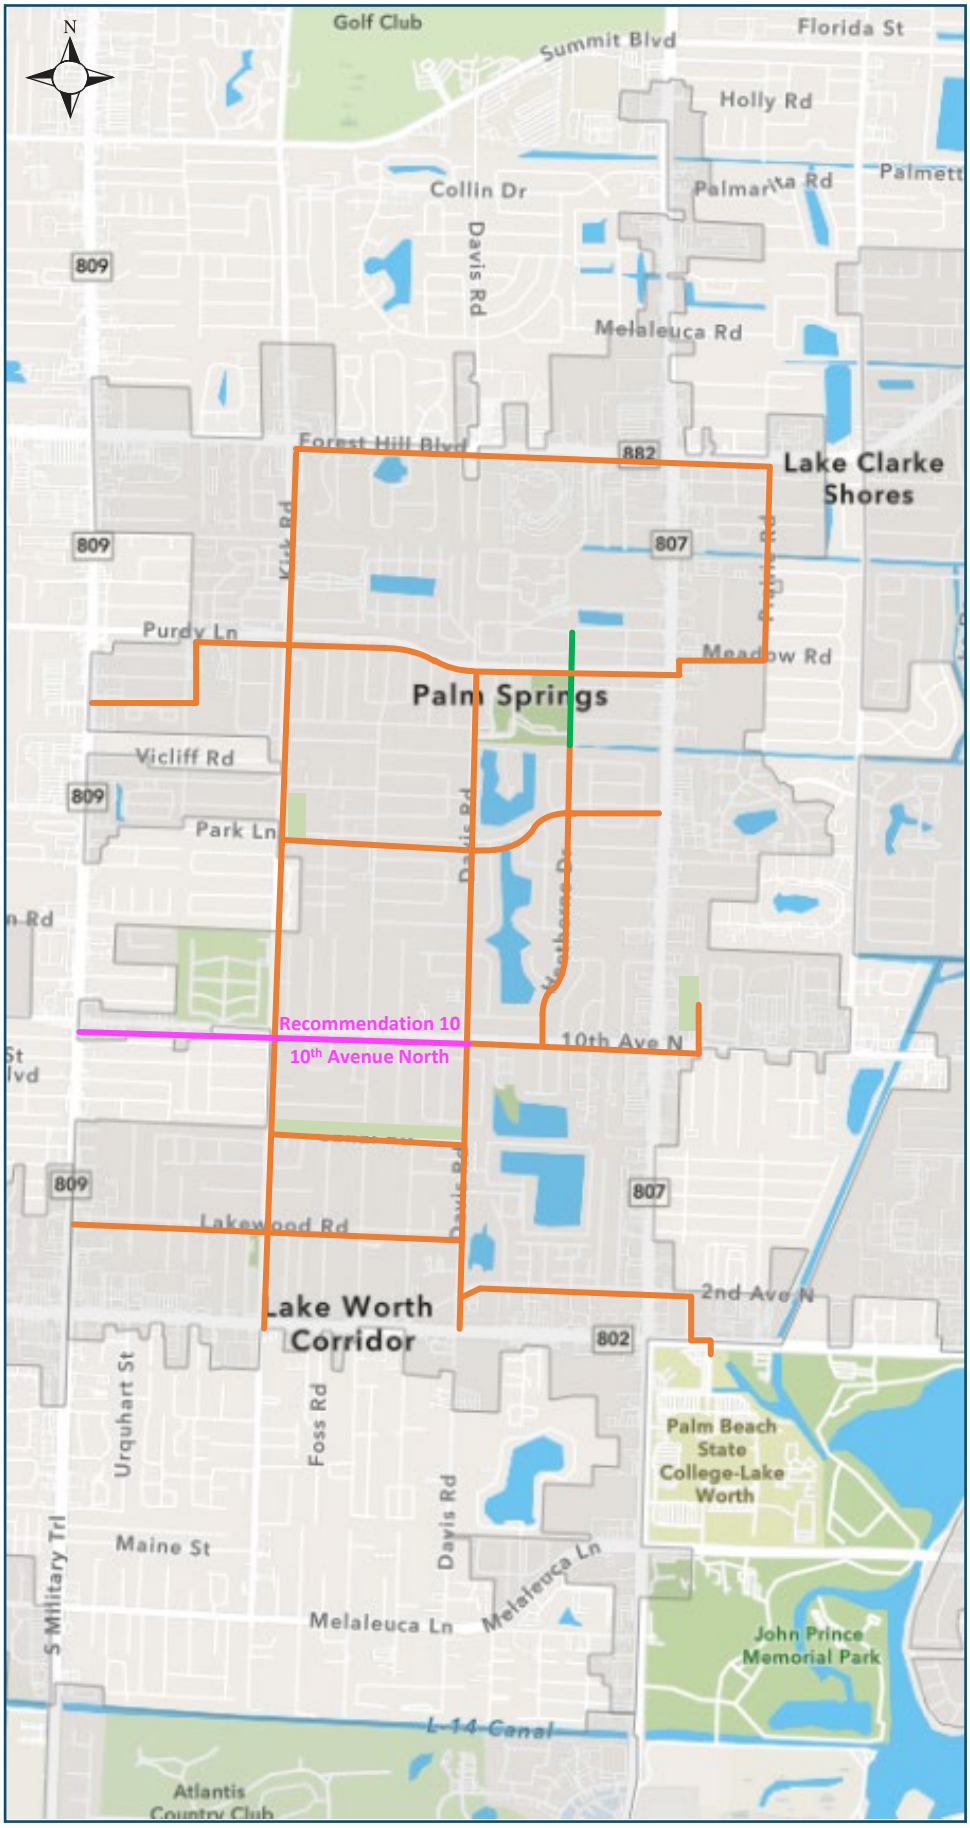
Roadway and Limits: 10th Avenue North: South Military Trail to Davis Road

Distance: 5,300 ft.

Purpose: Recommendations 1 through 8 focused on creating a network among lower volume streets with less constraints for competing for traffic capacity. Recommendations 9 through 12 are to complete the network along major streets to provide commuter functionality and access to businesses and employment centers.

Expected Outcome: Safer and higher quality pedestrian and bicycle network for commuters and non-recreational riders

Pedestrian LTS Change: LTS = 4.0 before, LTS = 4.0 after (LTS does not incorporate sidewalk buffer)



Bicycle LTS Change: LTS = 4 before, LTS = 4.0 with buffered lane, 2.0 with separated lane

Transit First/Last Mile: Improved connection between civic uses and Palm Tran routes 61 (10th Avenue North), 3 (S. Military Trail) and 2 (S. Congress Avenue)

Cost Impact: Planning level cost estimate: $346,300 for Option "A", $844,500 for Option "B" (ROW acquisition not included)

Actions: Meetings with stakeholders and adjacent land owners, determine coordination for timing and design, program, continue to work with state and MPO. Timing is to be determined by coordinating project.

Roadway Capacity Impact: Reduces capacity if roadway cross-section is used. Requires right-of-way and/or easements if a buffered multipurpose lane is planned.

» Recommendation 11: Buffered Bike Lanes and Complete Streets – Lake Worth Road

Facilities:

- Remove substandard bike lane along Lake Worth Road
- Provide improved pedestrian and bicycle facilities on both sides, based on one of two options to be determined based on design and construction of future capacity improvements:
  - A. Buffered bicycle lane in place of 2-foot existing bike lanes. Net additional cross-section is 6 feet per side, whether from reduced travel lanes or part of capacity enhancements (roadway widening project).
  - B. Buffered multi-purpose shared facility on each side, each one-way and 8-ft. wide, with minimum 3-ft. landscape buffer to curb. Each additional cross-section is 9 feet per side, whether from reduced travel lanes or part of capacity enhancements (roadway widening project).
- Enhanced crosswalks (21 intersecting streets)
- Landscape enhancements
- Directional signage

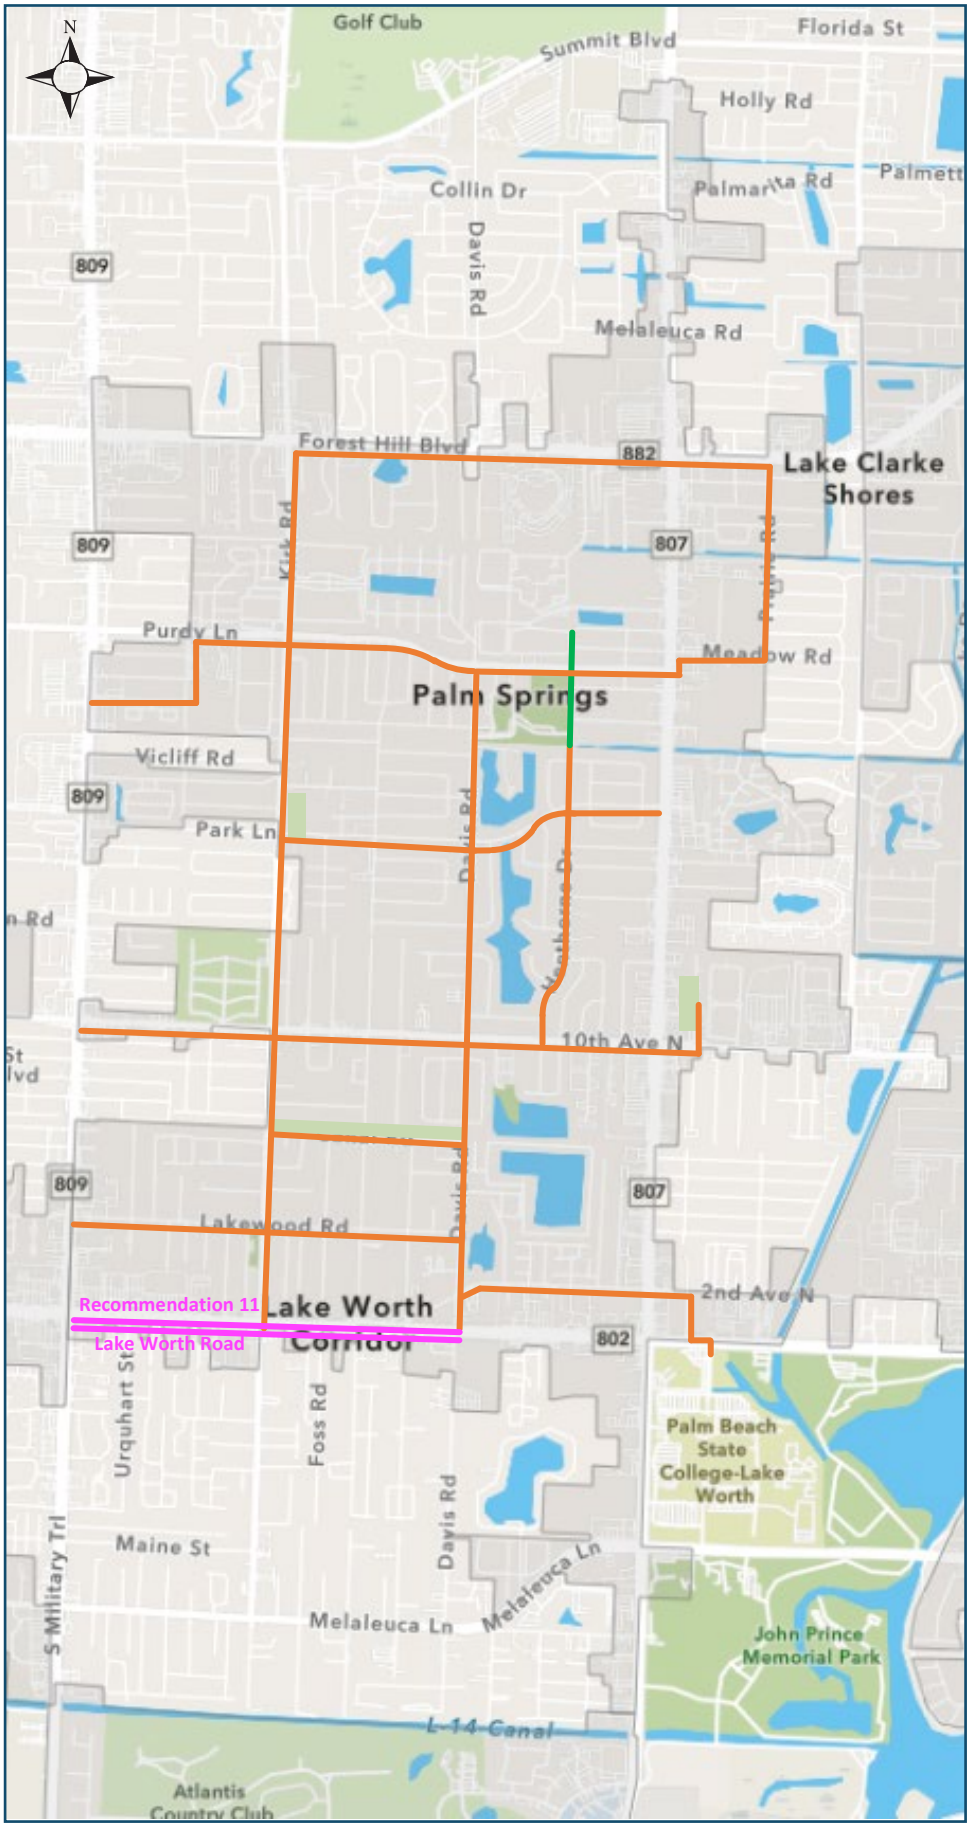
Roadway and Limits: Lake Worth Road: South Military Trail to Coconut Road and NE 2nd Avenue

Distance: 4,700 ft.

Purpose: Recommendations 1 through 8 focused on creating a network among lower volume streets with less constraints for competing for traffic capacity. Recommendations 9 through 12 are to complete the network along major streets to provide commuter functionality and access to businesses and employment centers.

Expected Outcome: Safer and higher quality pedestrian and bicycle network for commuters and non-recreational riders

Pedestrian LTS Change: LTS = 4.0 before, LTS = 4.0 after (LTS does not incorporate sidewalk buffer)



Bicycle LTS Change: LTS = 4 before, LTS = 4.0 with buffered lane, 2.0 with separated lane

Transit First/Last Mile: Improved connection among Palm Tran Routes 62 (Lake Worth Road) and Route 3 (S. Military Trail)

Cost Impact: Planning level cost estimate: $333,400 for Option "A", $775,200 for Option "B" (ROW acquisition not included)

Actions: Meetings with stakeholders and adjacent land owners, determine coordination for timing and design, program, continue to work with state and MPO. Timing is to be determined by coordinating project.

Roadway Capacity Impact: Reduces capacity if roadway cross-section is used. Requires right-of-way and/or easements if a buffered multipurpose lane is planned.

» Recommendation 12: Buffered Bike Lanes and Complete Streets – South Congress Avenue

Facilities:

- Provide improved pedestrian and bicycle facilities on both sides, based on one of two options to be determined based on design and construction of future capacity improvements:
  - A. Buffered bicycle lane of 6 to 8 ft. in width, whether from reduced travel lanes or part of capacity enhancements (roadway widening project).
  - B. Buffered multi-purpose shared facility on each side, each one-way and 8-ft. wide, with minimum 3-ft. landscape buffer to curb. Each additional cross-section is 3-5 feet per side, whether from reduced travel lanes or part of capacity enhancements (roadway widening project).
- Enhanced crosswalks (40 intersecting streets)
- Landscape enhancements
- Directional signage

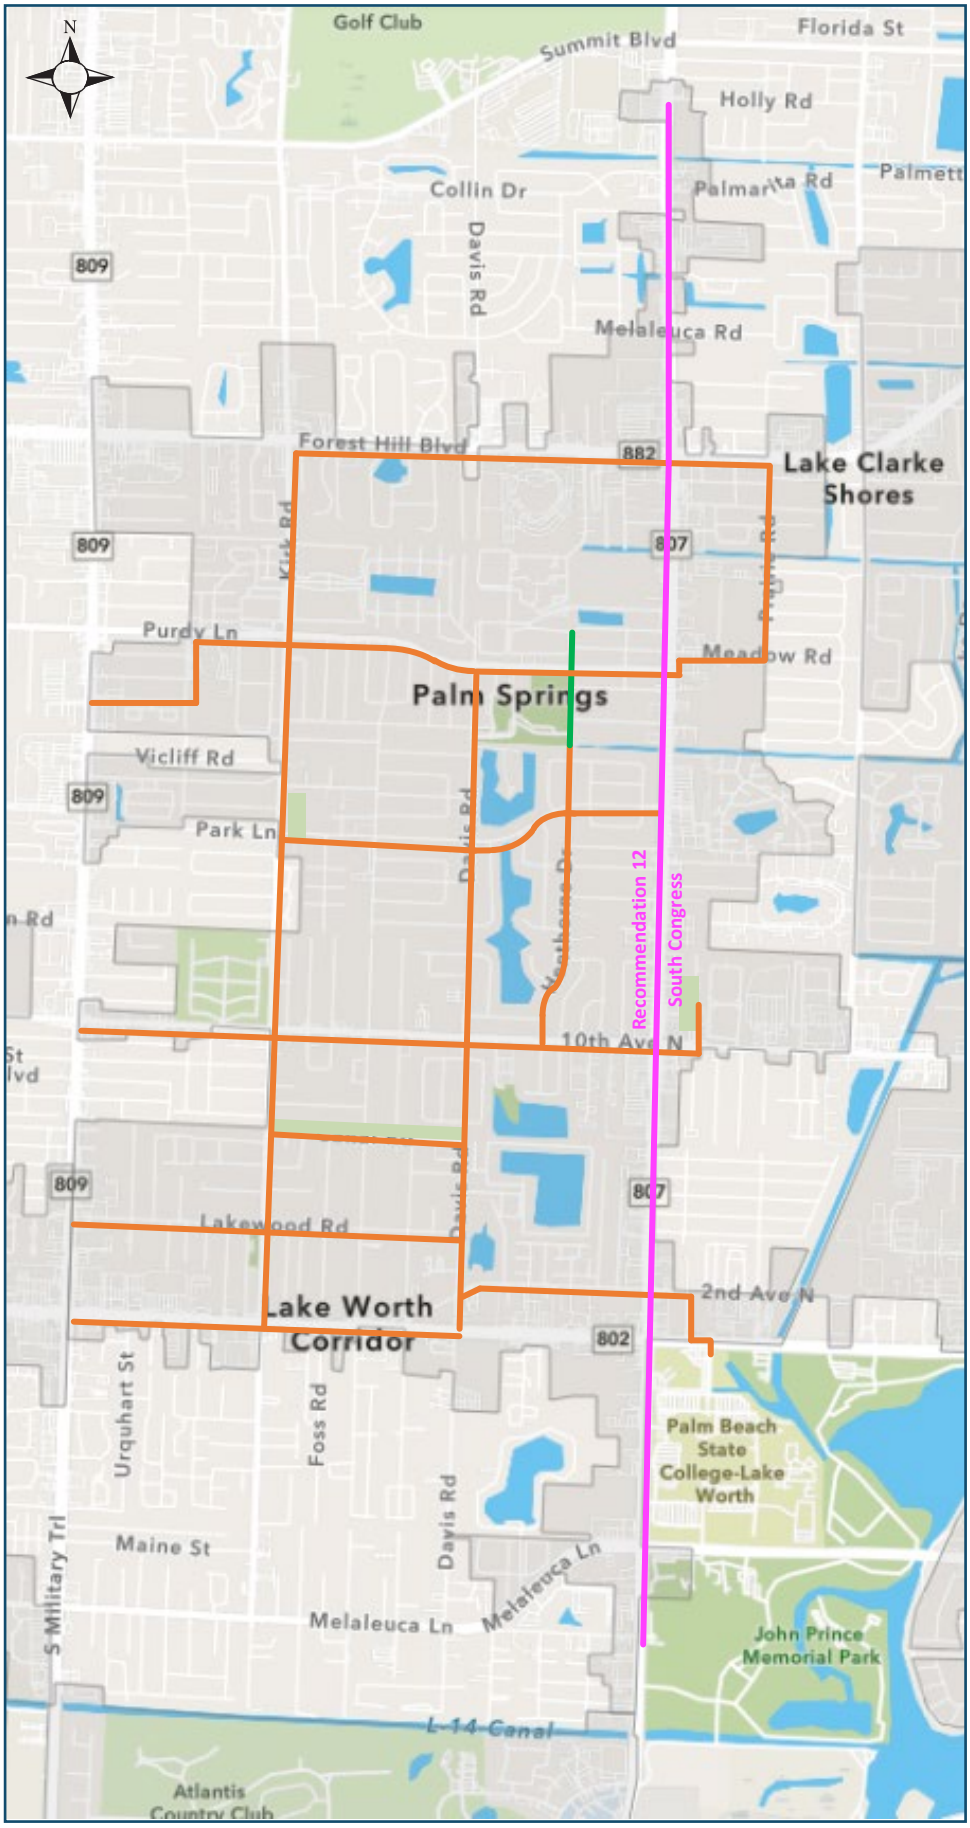
Roadway and Limits: South Congress Avenue, from Holly Road to Melaleuca Lane

Distance: 20,700 ft.

Purpose: Recommendations 1 through 8 focused on creating a network among lower volume streets with less constraints for competing for traffic capacity. Recommendations 9 through 12 are to complete the network along major streets to provide commuter functionality and access to businesses and employment centers.

Expected Outcome: Safer and higher quality pedestrian and bicycle network for commuters and non-recreational riders

Pedestrian LTS Change: LTS = 4.0 before, LTS = 4.0 after (LTS does not incorporate sidewalk buffer)



Bicycle LTS Change: LTS = 4 before, LTS = 4.0 with buffered lane, 2.0 with separated lane

Transit First/Last Mile: Improved connection among Palm Tran routes 2 (S. Military Trail), 46 (Forest Hill Boulevard), 60 (Alemeda Drive), 61 (10th Avenue N.), 62 (Lake Worth Road) and 64 (Melaleuca Lane)

Cost Impact: Planning level cost estimate: $1,363,400 for Option "A", $3,309,200 for Option "B" (ROW acquisition not included)

Actions: Meetings with stakeholders and adjacent land owners, determine coordination for timing and design, program, continue to work with state and MPO. Timing is to be determined by coordinating project.

Roadway Capacity Impact: Reduces capacity if roadway cross-section is used. Requires right-of-way and/or easements if a buffered multipurpose lane is planned.

4.0 »IMPLEMENTATION

Implementation of the recommended projects will require a combination of policy and financial planning. Sixty-seven projects resulted from the multimodal analysis. While these projects are recommended to the Village as a menu of options, they have been prioritized as a recommended approach for implementation purposes. However, from time-to-time, the Village will find that special funds or grants are available. In those cases, the Village should take full advantage of these opportunities, and allow for flexibility in project implementation. This project list should be reviewed annually by Village departments of Planning, Public Works, and the Village Manager's office, and, as funding becomes available, programmed into the 5-year Capital Improvements Program.

Furthermore, the Village should utilize its prioritized list and work with the Palm Beach TPA to ensure that projects on major corridors, such as Congress Avenue, and 10th Avenue, are incorporated into the regional Long Range Transportation Plan. This will help secure funding for these projects in the Village, as noted in the Funding section, presented later.

The following criteria were used to establish a priority ranking of the recommended projects:

- Complete Streets Implementation/Network Completion, specifically:
  - o Prioritize First & Last Mile connections to transit, and
  - o Fill network gaps
- Congestion Relief/Improved Traffic Operations
- Improved safety
- Level-of-Stress relief
- Cost/Cost Effectiveness
- Ease of Implementation

Each criterion was scored on the basis on a 5 point scale (1 being low/poor, 5 being high/good), to rank the projects. The following chart provides for the final scoring and ranking of each recommended project. Full scoring details are provided in the Appendix of this report.

Table 26: Final Scoring and Ranking of Each Recommended Project

Recommended Projects			
Project Ranking	**Location**	**Project**	**Total Score**
1	10th Avenue North from Davis Road to Sago Park Road; Henthorne Drive from Canal 9 pedestrian bridge to 10th Avenue North	Palm Springs Park Connector Pathway Phase 5	23
2	Greenbrier Drive from Davis Road to South Congress Avenue (north side)	Bike & Pedestrian Network Extensions - Greenbrier Drive	23
3	Citywide	Adopt Vision Zero Policy	23
4	Greenbrier Drive from Davis Road to Donald Road; Donald Road from Greenbrier Drive to Cypress Way (east side); Cypress Way from Donald Road to South Military Trail (north side)	Bike & Pedestrian Network Extensions - Alemeda West	22

Recommended Projects (continued)			
Project Ranking	**Location**	**Project**	**Total Score**
5	Lake Worth Road Pedestrian Signal	Installation of a pedestrian signal to improve pedestrian crossing spacing along the Lake Worth Road corridor either near Home Depot or Gulfstream Road	22
6	Lakewood Road and Military Trail	Convert the existing stop controlled intersection into a signalized intersection	22
7	Davis Road and Lake Worth Road	Convert the existing stop controlled intersection into a signalized intersection.	21
8	Lakewood Road, and Kirk Road (west side)	Bike & Pedestrian Network Extensions - Lakewood West	20
9	Congress Avenue- 10th Avenue to Lake Worth Road	Perform Corridor Safety Study to mitigate for high crash location; high pedestrian and bicycle crash location	20
10	Forest Hill Boulevard - South Military Trail to Prairie Road	Buffered Bike Lanes and Complete Streets - Forest Hill Boulevard	19
11	Alemeda Drive - Military Trail to Congress Avenue	Perform Corridor Safety Study to mitigate for high crash location	19
12	Dolan Road from crosswalk to South Congress Avenue (south side)	Bike & Pedestrian Network Extensions - Dolan East	18
13	Davis Road: Lakewood Drive to Lake Worth Drive; 2nd Avenue North: Lake Worth Drive to Engle Road; Bellevue Avenue: 2nd Avenue North to Lake Worth Road; Lake Worth Road Bellevue Avenue to crossing to campus	Bike & Pedestrian Network Extensions - 2nd Avenue East	18
14	Kirk Road (East side)	Bike & Pedestrian Network Extensions - Kirk North	18
15	Lake Worth Road: South Military Trail to Coconut Road and NE 2nd Avenue	Buffered Bike Lanes and Complete Streets - L ake Worth Road	18
16	Lake Worth Road- Between Kirk and South Congress Avenue	Installation of speed radar signs pending traffic study approval	18
17	Summit Boulevard- Between Congress Avenue to Florida Mango Road	Perform Corridor Safety Study to mitigate for high crash location	18
18	Meadow Road from Congress Avenue to Prairie Road and Prairie Road from Meadow Road to Forest Hill Boulevard	Bike & Pedestrian Network Extensions – Meadow Prairie	17
19	10th Avenue North from South Military Trail to Davis Road	Buffered Bike Lanes and Complete Streets - 10th Avenue North	17
20	10th Avenue- Between Kirk Road and Congress Avenue	Installation of speed radar signs pending traffic study approval	17
21	Congress Avenue- Between Forest Hill Boulevard and Summit Boulevard	Installation of speed radar signs pending traffic study approval	17
22	Lorene Drive east of Congress Avenue	Evaluate speed tables along Lorene Drive	17
23	Kirk Road- 10th Avenue to Lake Worth Road	Perform Corridor Safety Study to mitigate for high crash location	17
24	Kirk Road- Summit Boulevard to Forest Hill Boulevard	Perform Corridor Safety Study to mitigate for high crash location	17
25	Kirk Road- Forest Hill Boulevard to Greenbrier Drive	Perform Corridor Safety Study to mitigate for high crash location	17

Recommended Projects (continued)			
Project Ranking	Location	Project	Total Score
26	South Congress Avenue	Buffered Bike Lanes and Complete Streets - South Congress Avenue	16
27	Kirk Road and Park Lane	Conversion from traffic signal to Roundabout if feasible	15
28	Lillian Road- Between Congress Avenue and Lori Drive	Evaluate speed tables along Lilian Road	15
29	Alemeda Drive- Between South Congress and Kirk Road	Evaluate a neighborhood traffic circle at Davis Road and Alemeda Drive; Evaluate speed tables along Alemeda Drive	13
30	Davis Road- Between Greenbrier Drive and 10th Avenue N	Evaluate a neighborhood traffic circle at Davis Road and Riverdale Road or Winged Foot Road; Evaluate speed tables along Davis Road	13
31	Kirk Road and Lakewood Road	Conversion from traffic signal to Roundabout if feasible	12
32	Davis Road and 2nd Avenue North	Conversion of all way stop to Roundabout if feasible	12
33	Park Lane/Greenbrier Drive- Between Kirk Road and Congress Avenue	Evaluate neighborhood traffic circles at the intersections of Davis Road and Gulfstream Road; Evaluate speed tables on Greenbrier Drive	12

Additional considerations

Vision Zero Policy Implementation

Vision Zero originated in Sweden in 1997, when the Parliament instituted it as official road policy. Vision Zero places the core responsibility for crashes on overall system design, vehicle technology, and enforcement. Sweden aims to reduce all fatalities and serious injuries to zero. Vision Zero has been adopted by multiple countries and is widely used in the United States, as more and more cities are adopting this concept.

A core principle of Vision Zero is that human life and health can never be exchanged for mobility. It acknowledges that even one serious injury or traffic death "is one too many". A value is placed on life and health, then that value is used to determine how much money is to be spent on a road network to decrease the potential for life-threatening traffic crashes. Vision Zero relies on a partnership among government, community groups, and individuals.

Creating a successful Vision Zero network, involves these core elements: **Political Commitment of local officials** to achieve zero traffic fatalities and severe injuries among all road users within a set timeframe. **A Multi-Disciplinary Leadership team to create and lead the planning effort.** Within one year of initial commitment, **this team should develop an action plan to achieve the goals set forth**. The Action Plan must be implemented with: clear strategies, "owners" of each strategy, interim targets, timelines, and performance measures. Realistic thresholds are to be based on available resources. The Vision Zero team should meet regularly to lead and evaluate efforts. It should include representatives from the Village Manager's office, the Village Police, Public Works and Planning Departments, The team should meet quarterly, at minimum, and data on crashes and other safety concerns, as well as results from enforcement initiatives, are to be reviewed at these meetings. It is also recommended that the

team coordinate with Palm Beach County, the Palm Beach TPA, and the County School District, inviting members to be on the VZ Team.

While developing the action plan, the team should commit to an equitable approach, as well as equitable outcomes, to provide safe transportation options for all road users in all parts of the Village. The action plan should also encourage meaningful cooperation and collaboration among relevant governmental agencies and community stakeholders to establish shared goals and focus on coordination and accountability. The plan should focus on the built environment, systems, and policies that influence behavior. It should be data driven to ensure the needed information is gathered, analyzed, and used to understand traffic safety issues and prioritize resources based on evidence of the greatest needs and impact. Also needed is **community engagement** for Vison Zero to be successful. Meaningful community engagement through public meetings or workshops, online surveys, and other feedback opportunities will ensure that the program is transparent. This can be achieved by having regular updates on the progress and performance measures of the Action Plan, and a yearly report to the Village Council.

Funding

Several available financial options for implementing projects by the Village are presented next.

Local Funding

Local funding is generated from within a municipality or county, generally relying on property taxes, and special programs, such as concurrency or impact fees. As communities continue to seek new sources of revenue (such as in the pending federal infrastructure bill), it is advised that they consider a form of mobility fee, which requires that developments fund their fair share of the infrastructure needed to support a MULTIMODAL transportation system. For the Village of Palm Springs, any mobility fee will require coordination and negotiation with Palm Beach County on their Roadway Impact Fee as provided for under Article 13 of the County's code.

Florida Department of Transportation (FDOT) Programs

FDOT Safety Office Programs

The FDOT Safety Office funds grants that address traffic safety priority areas including:

- Aging Road Users
- Community Traffic Safety
- Impaired Driving
- Motorcycle Safety
- Occupant Protection and Child Passenger Safety
- Pedestrian and Bicycle Safety
- Police Traffic Services
- Speed and Aggressive Driving
- Teen Driver Safety

- Traffic Records
- Traffic Record Coordinating Committee (TRCC)

Awards to state and local safety-related agencies are used as "seed" money to assist in developing and implementing programs that address traffic safety deficiencies, or expand ongoing safety programs. Funding for these grants are apportioned to states annually from the National Highway Traffic Safety Administration (NHTSA) according to a formula based on population and road mileage. Funding may be available for projects in other program areas, if there is documented evidence of need.

Through public rule making processes conducted in 1982, 1988, 1995 and 1998, it has been determined that certain highway safety program areas have proven to be more effective than others in reducing traffic crashes, injuries, and fatalities. These programs, designated as National Priority Program Areas are: Impaired Driving, Police Traffic Services, Speed Control, Occupant Protection/Child Passenger Safety, Pedestrian and Bicycle Safety, Motorcycle Safety, Traffic Records, and Community Traffic Safety.

It is expected that programs funded through these grants will become self-sufficient and continue when grant funding terminates. To promote self-sufficiency, agencies are expected to provide a local funding match when personnel costs are included in second- and third-year projects. The local match is normally 25% of eligible costs for second-year projects and 50% for third-year projects.

Government agencies, "political subdivisions" of the state, local city and county government agencies, state colleges, universities, school districts, fire departments, public emergency services providers, and certain qualified non-profit organizations are eligible to receive traffic safety grant funding. Grants are awarded on a Federal fiscal year basis, and can be funded for a maximum of three consecutive years in each priority area.

Florida Shared-Use Nonmotorized (SUN) Trail Program

The Shared-Use Nonmotorized (SUN) Trail Program, administered by FDOT, was created to fund the design, right-of-way acquisition and construction of a statewide connected network of shared-use bicyclist and pedestrian facilities. Developing a statewide nonmotorized trail network will increase mobility and recreational alternatives for Florida's residents and visitors, enhance economic prosperity, enrich quality-of-life, enhance safety, and reflect responsible environmental stewardship.

Pursuant to s. 339.135, F.S., the SUN Trail Program provides a minimum of $25 Million annually to develop the Florida Shared-Use Nonmotorized Trail Network, a statewide network allowing nonmotorized vehicles and pedestrians to access a variety of origins and destinations with limited exposure to motorized vehicles. The call for applications is usually issued in September and applications are due to FDOT in December.

Federal Funding

Federal programs make up the bulk of the funding for large projects. Florida is a "donor" state, which means it receives less than it contributes to Federal transportation programs each year. The US Department of Transportation (USDOT) helps communities fund transportation projects by issuing grants to eligible recipients for planning, vehicle purchases, facility construction, operations, and other purposes. The USDOT administers this financial assistance according to federal transportation authorization known

as the *Fixing America's Surface Transportation (FAST) Act* (Pub. L. No. 114-94). The FAST Act focuses on safety, keeps intact the established structure of the various highway-related programs, continues efforts to streamline project delivery and, for the first time, provides a dedicated source of federal dollars for freight projects. Programs include:

- Surface Transportation. The bill expands the existing Surface Transportation Program (STP) into a "Surface Transportation Block Grant Program (STBGP)". The bill rewrites and simplifies the list of uses eligible for program funds and increases the ways that STP funds can be used for local roads and rural minor collectors.
- Highway Safety Improvement Program (HSIP). The legislation ends the ability of states to shift funds designated for infrastructure safety projects to behavioral or educational activities, ensuring resources remain in construction-related programs.
- Transportation Alternatives. MAP - 21 combined the Transportation Enhancement Program.
- Safe Routes to School and the Recreational Trails Programs.

The Village should monitor pending legislation from the Federal government regarding new infrastructure authorizations, and work with both the Palm Beach TPA and FDOT accordingly to secure funding as available for projects in its Master Plan.

Local Initiatives (LI) Program

The adopted LRTP allocates the TPA's federal Surface Transportation Block Grant funds to the Local Initiatives (LI) program - an annual application process to identify and fund *Complete Street* projects identified by local agency partners on local federal-aid eligible roadways that can be implemented without right-of-way acquisition. Approximately $20M is available annually for projects under this program. The Local Initiatives (LI) program is a competitive process by which projects are submitted to the TPA and prioritized for funding. Funded projects are either implemented by the applicant and funded through a grant reimbursement agreement or they are implemented by FDOT. Eligible entities include local governments, regional transportation authorities, transit agencies, natural resource or public land agencies, school districts, local education agencies, and tribal governments. Eligible projects include: *Complete Streets*, including lane narrowing, lane repurposing, bicycle and pedestrian facilities; Intelligent Transportation Systems (ITS), operational improvements, signing and lighting; transit vehicles and facilities, including paying up to 50% of a 3-year turn-key contract for new transit service; and, freight efficiency improvements, including airport and seaport off-site capacity improvements, truck movements, and railway capacity.

Transportation Alternative Set-Asides

The Transportation Alternative Set-Asides, formerly known as the Transportation Alternatives Program, was developed as a result of the Moving Ahead for Progress in the 21st Century Program (MAP-21) in the FAST Act. Eligible activities for funding include:

1. Planning, design and constructing on- and off-road facilities for bicyclists, pedestrians, and other forms of non-motorized transportation;
2. Planning, design and constructing infrastructure-related projects/systems that provide safe routes for non-drivers;
3. Converting and using abandoned railroad corridors for non-motorized use;

4. Constructing turnouts, overlooks, and viewing areas under community improvement activities;
5. Inventory, control or removal of outdoor advertising;
6. Historic preservation and rehabilitation of historic transportation facilities;
7. Vegetation management in transportation rights of way;
8. Archaeological activities related to impacts from transportation projects eligible under Title 23; and
9. Environmental mitigation activities.

This fund is administered by the Palm Beach TPA to help fund connected infrastructure for non-motorized users. This federal program, in agreement with the FDOT, is an annual competitive application process where projects are submitted to the TPA and then ranked and prioritized for funding of approximately $3.3 million annually. Eligible entities include local governments, regional transportation authorities, transit agencies, natural resource or public land agencies, school districts, local education agencies, and tribal governments.
Eligible projects include non-motorized infrastructure, such as, sidewalk facilities, bicycle facilities, trailways, *Complete Streets* projects, *Safe Routes to School (SRTS)* projects, lighting, and safety-related infrastructure. The application process is generally in the beginning of each calendar year, with an application due in February and a workshop presentation in April.

Safe Routes to School and Recreational Trails Program

The Safe Routes to School (SRTS) Program and Recreational Trails Program (RTP) were both consolidated within the nine (9) activities under the TAP. Planning, designing, and constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes, or other divided highways, are also eligible. Municipalities in the region have bundled bicycle and pedestrian master-planned project segments into their Safe Routes to School and Recreational Trails Program, when applicable. It is recommended that Village explore this opportunity further. Applications are submitted to the local FDOT District Safe Routes to School Coordinator, reviewed for compliance with SRTS Guidelines, and awarded through a competitive process at the local FDOT level. The call for applications is usually issued in September and applications are due to FDOT in December.

Americans with Disabilities Act (ADA) Requirements

The Palm Beach TPA and FDOT are required by federal agencies to sign assurances that all recipients of federal funds allocated by the TPA have ADA transition plans in place. ADA transition plans outline a jurisdiction's efforts to its infrastructure into compliance with the requirements of the ADA. Further, these plans are necessary to maintain Local Agency Program (LAP) certification for usage of funding through FDOT. The Village should ensure that it has an ADA transition plan in place. ADA transition plans should also be updated every 3-5 years.

»APPENDIX A: CRASH DATA

SAFETY REVIEW/CRASH ANALYSIS

A review of the most recent 5-year crash data of the project limits including the studied intersections and road segments was completed. The crash data was obtained using Signal Four Analytics for the period between December 1, 2015 through December 1, 2020. A summary of the documented crash data for the 5-year review period along the road segments and intersections within the project limits is summarized in the following figures. Figure 1 depicts the project limits and identifies the extents of the crash locations at the road segments and intersections.

The following crash summary is defined based on the east-west and north-south roadway corridor segments within the project limits. A network screening for all vehicular crashes was first completed for each corridor. In addition, pedestrian and bicycle crashes were screened for each corridor.

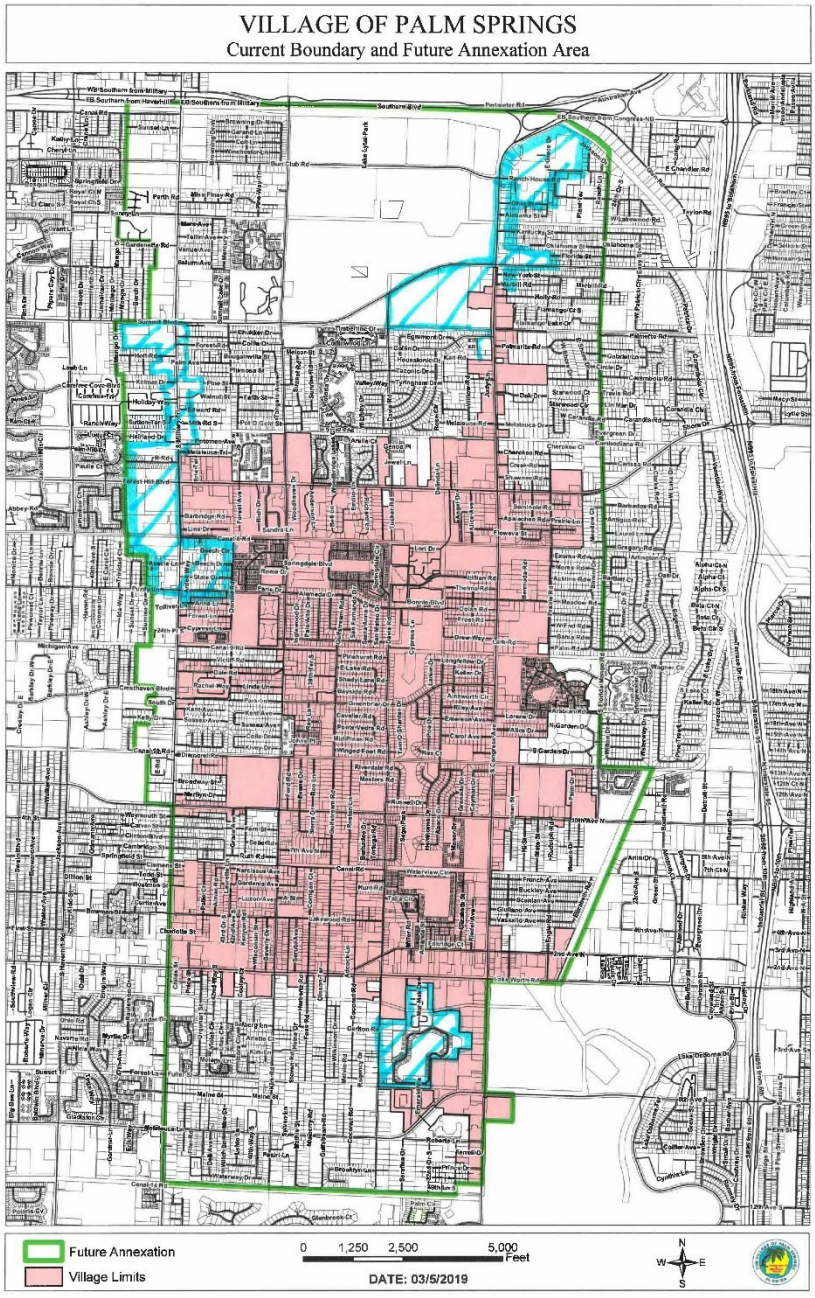

Figure 2 Project Limits including Village Annexation Areas

Military Trail- Southern Blvd to Forest Hill Blvd.

Figure 2 depicts this corridor segment limits and the location of the overall crashes. Figure 3 depicts the pedestrian and bicycle crash locations. Figures 4 provides an overall summary of the crash type and severity. The crash network screening resulted in 1,300 crashes over the 5-year period. The predominant crash pattern observed was rear end crashes followed by sideswipe crashes. There were 309 injury crashes and 8 fatalities observed within the 5-year period. There were 16 documented crashes that involved pedestrians and 12 documented crashes that involved bicyclists in the 5-year crash network screening.

Figure 3 Military Trail Segment 1 Five Year Overall Network Screening Summary

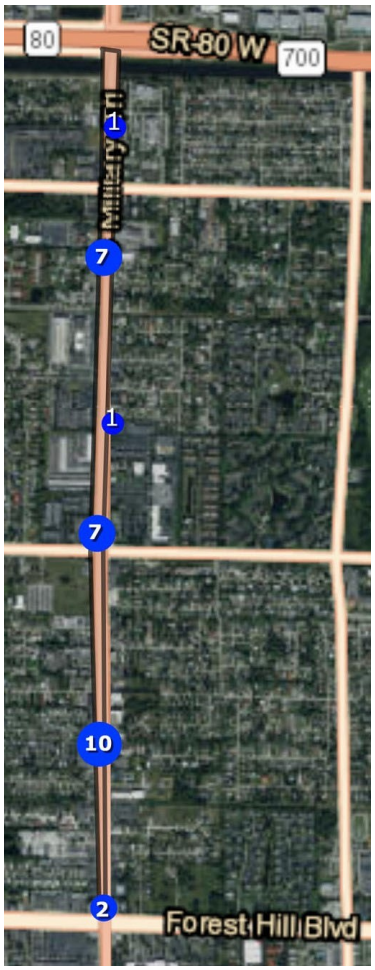

Figure 4 Military Trail Segment 1 Five Year Pedestrian and Bicycle Network Screening Summary

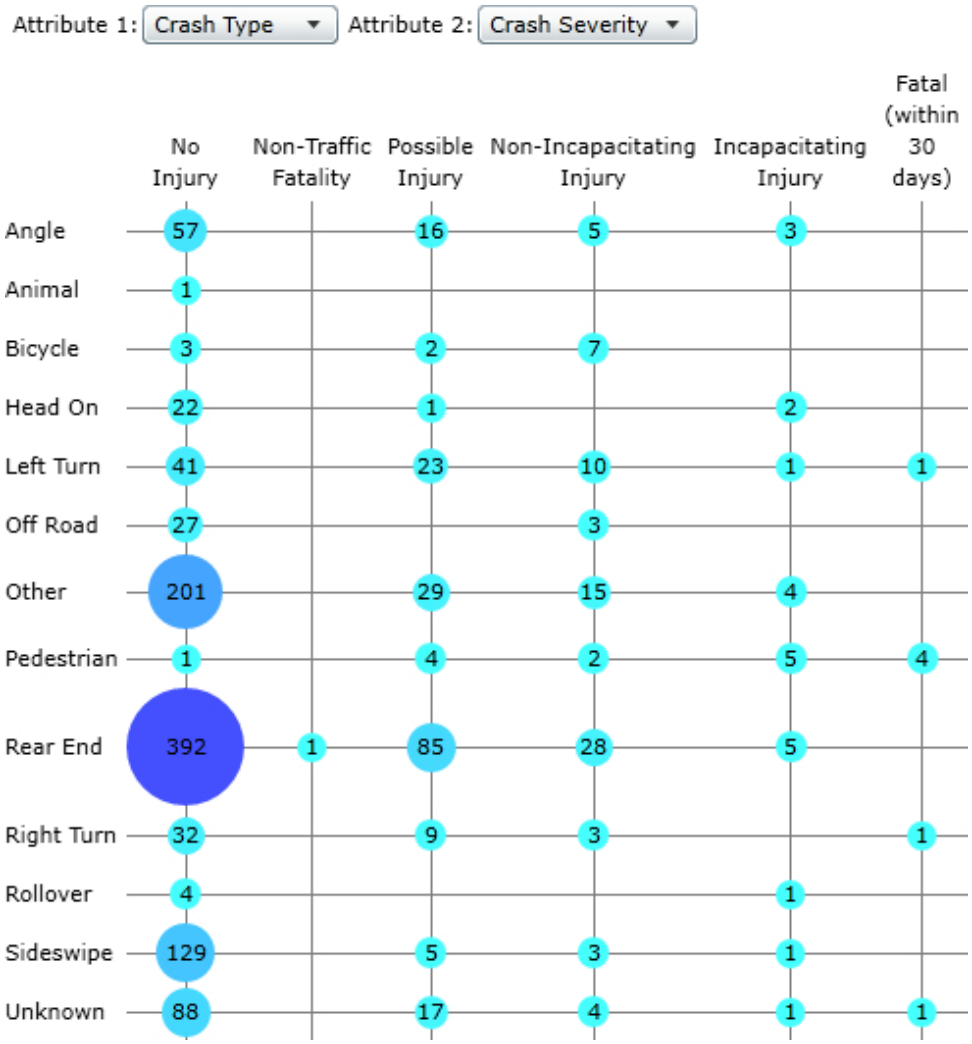

Figure 5 Military Trail Segment 1 Crash Type and Crash Severity Summary

A detailed crash summary table of the historical crashes within the project limits identified in Signal Four Analytics can be found in the Appendix.

Military Trail- Forest Hill Blvd. to 10th Avenue

Figure 5 depicts this corridor segment limits and the location of the overall crashes. Figure 6 depicts the pedestrian and bicycle crash locations. Figures 7 provides an overall summary of the crash type and severity. The crash network screening resulted in 889 crashes over the 5-year period. The predominant crash pattern observed was rear end crashes followed by sideswipe crashes. There were 211 injury crashes and 5 fatalities observed within the 5-year period. There were 10 documented crashes that involved pedestrians and 14 documented crashes that involved bicyclists in the 5-year crash network screening.

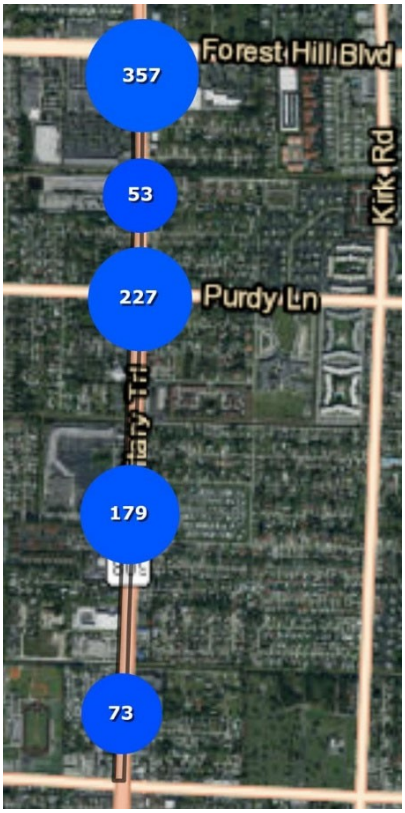

Figure 6 Military Trail Segment 2 Five Year Network Screening Summary

Figure 7 Military Trail Segment 2 Five Year Pedestrian and Bicycle Network Screening Summary

detailed crash summary table of the historical crashes within the project limits identified in Signal Four Analytics can be found in the Appendix.

Forest Hill Blvd- Congress Avenue to I-95

Figure 77 depicts this corridor segment limits and the location of the overall crashes. Figure 78 depicts the pedestrian and bicycle crash locations. Figures 79 provides an overall summary of the crash type and severity. The crash network screening resulted in 684 crashes over the 5-year period. The predominant crash pattern observed was rear end crashes followed by sideswipe crashes. There were 127 injury crashes and 4 fatalities observed within the 5-year period. There were 5 documented crashes that involved pedestrians and 8 documented crashes that involved bicyclists in the 5-year crash network screening.

A detailed crash summary table of the historical crashes within the project limits identified in Signal Four Analytics can be found in the Appendix.

Purdy Lane- Military Trail to Congress Avenue

Figure 80 depicts this corridor segment limits and the location of the overall crashes. Figure 81 depicts the pedestrian and bicycle crash locations. Figures 82 provides an overall summary of the crash type and severity. The crash network screening resulted in 281 crashes over the 5-year period. The predominant crash pattern observed was rear end crashes followed by left turn crashes. There were 60 injury crashes and 1 fatality observed within the 5-year period. There were 4 documented crashes that involved pedestrians and 2 documented crashes that involved bicyclists in the 5-year crash network screening.

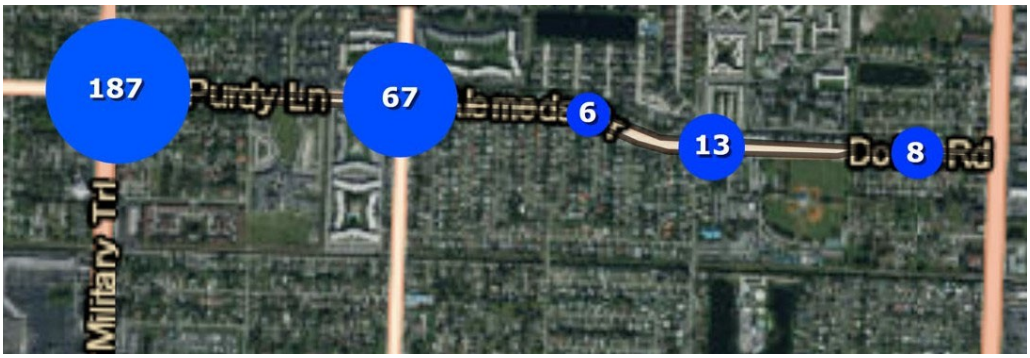

Figure 81 Purdy Lane Segment 1 Five Year Network Screening Summary

A detailed crash summary table of the historical crashes within the project limits identified in Signal Four Analytics can be found in the Appendix.

Greenbrier Drive- Military Trail to Congress Avenue

Figure 83 depicts this corridor segment limits and the location of the overall crashes. Figure 84 depicts the pedestrian and bicycle crash locations. Figures 85 provides an overall summary of the crash type and severity. The crash network screening resulted in 126 crashes over the 5-year period. The predominant crash pattern observed was left turn crashes followed by rear end crashes. There were 22 injury crashes and 0 fatalities observed within the 5-year period. There were 2 documented crashes that involved pedestrians and 0 documented crashes that involved bicyclists in the 5-year crash network screening.

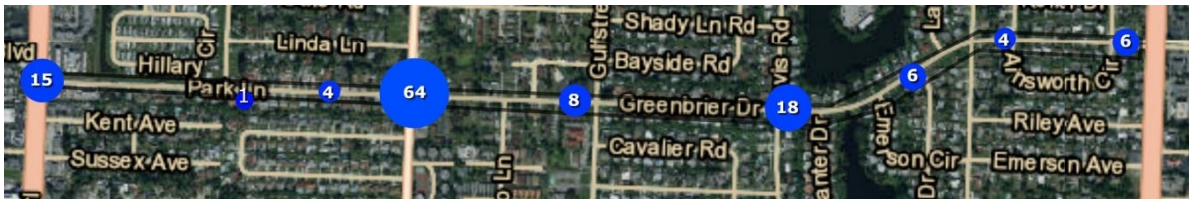

Figure 84 Greenbrier Drive Segment 1 Five Year Network Screening Summary

A detailed crash summary table of the historical crashes within the project limits identified in Signal Four Analytics can be found in the Appendix.

10th Avenue- Military Trail to Davis Road

Figure 86 depicts this corridor segment limits and the location of the overall crashes. Figure 87 depicts the pedestrian and bicycle crash locations. Figures 88 provides an overall summary of the crash type and severity. The crash network screening resulted in 477 crashes over the 5-year period. The predominant crash pattern observed was rear end crashes followed by sideswipe crashes. There were 115 injury crashes and 2 fatalities observed within the 5-year period. There were 9 documented crashes that involved pedestrians and 4 documented crashes that involved bicyclists in the 5-year crash network screening.

10th Avenue- Davis Road to Congress Avenue

Figure 89 depicts this corridor segment limits and the location of the overall crashes. Figure 90 depicts the pedestrian and bicycle crash locations. Figures 91 provides an overall summary of the crash type and severity. The crash network screening resulted in 195 crashes over the 5-year period. The predominant crash pattern observed was rear end crashes followed by sideswipe crashes. There were 38 injury crashes and 2 fatalities observed within the 5-year period. There were 1 documented crash that involved pedestrians and 5 documented crashes that involved bicyclists in the 5-year crash network screening.

Figure 90 10th Avenue Segment 2 Five Year Network Screening Summary

Lake Worth Road- Military Trail to Davis Road

Figure 92 depicts this corridor segment limits and the location of the overall crashes. Figure 93 depicts the pedestrian and bicycle crash locations. Figures 94 provides an overall summary of the crash type and severity. The crash network screening resulted in 727 crashes over the 5-year period. The predominant crash pattern observed was rear end crashes followed by sideswipe crashes. There were 146 injury crashes and 5 fatalities observed within the 5-year period. There were 13 documented crashes that involved pedestrians and 13 documented crashes that involved bicyclists in the 5-year crash network screening.

Overall Village of Palm Springs Crash Summary

The crash history based on the network screening has been reviewed and summarized in Table 8 below. Table 8 summarizes the number of crashes observed in the 5-year network screening including the number of crashes involving vehicles, pedestrians, and bicycles. The number of fatalities and injuries per road segment have been identified. A crash rate was calculated using the below equation:

Road Segment Crash Rate = (# crashes) x (1,000,000)/(ADT x 365 x Segment Length x # of years)

Table 8 Overall Village of Palm Springs Crash Summary

North-South Roadway Corridors	Length (miles)	Number of Crashes (Overall)	Volume (AADT)	Crash Rate	Number of Crashes (Injury)	Number of Crashes (Fatal)	Number of Crashes (Pedestrian)	Number of Crashes (Bicycle)

Melaleuca Lane- Military Trail to Davis Road	1.00	341	26,500	7.05	97	2	7	7
Melaleuca Lane- Davis Road to Congress Avenue	0.60	139	28,500	4.45	44	2	4	1
Melaleuca Lane- Congress Avenue to I-95	1.25	317	34,574	4.02	85	3	7	3

The crash rate was color coded with crashes summarized in ranges of crash rates (0 to 5 crash rate being yellow, 6-10 crash rate being orange and crash rate over 10 being red).

The highest overall crash rates occurred at the following 10 road segments:

1. Purdy Lane- Military Trail to Congress Avenue
2. Gun Club Road- Military Trail to Kirk Road
3. Kirk Road- Lake Worth Road to Melaleuca Lane
4. Summit Blvd.- Military Trail to Kirk Road
5. Kirk Road- 10th Avenue to Lake Worth Road
6. Kirk Road- Summit Blvd. to Forest Hill Blvd.
7. Summit Blvd.- Between Congress Avenue to Florida Mango Rd
8. Kirk Road- Forest Hill Blvd. to Park Lane/Greenbrier Drive
9. Davis Road- Summit Blvd. to Purdy Lane
10. 10th Avenue- Military Trail to Davis Road

The highest number of fatalities occurred at the following road segments:

1. Military Trail- Southern Blvd. to Forest Hill Blvd- 8 fatalities
2. Lake Worth Road- Military Trail to Davis Road- 5 fatalities
3. Military Trail- Forest Hill Blvd to 10th Avenue- 5 fatalities
4. Forest Hill Blvd.- Between Congress Road to I-95- 4 fatalities
5. Forest Hill Blvd.- Military Trail to Congress Road- 3 fatalities
6. Melaleuca Lane- Congress Avenue to I-95- 3 fatalities

The highest number of pedestrian and bicycle crashes occurred at the following road segments

1. Military Trail- Southern Blvd. to Forest Hill Blvd- 28 bike and pedestrian crashes
2. Lake Worth Road- Military Trail to Davis Road- 26 bike and pedestrian crashes
3. Congress Avenue- 10th Avenue to Lake Worth Road- 25 bike and pedestrian crashes
4. Military Trail- Forest Hill Blvd to 10th Avenue- 24 bike and pedestrian crashes
5. Forest Hill Blvd.- Military Trail to Congress Road- 20 bike and pedestrian crashes
6. Lake Worth Road- Congress Avenue to I-95- 15 bike and pedestrian crashes
7. Melaleuca Lane- Military Trail to Davis Road- 14 bike and pedestrian crashes
8. Congress Avenue- Forest Hill Blvd. to 10th Avenue- 13 bike and pedestrian crashes
9. Forest Hill Blvd.- Between Congress Road to I-95- 13 bike and pedestrian crashes
10. 10th Avenue- Military Trail to Davis Road- 13 bike and pedestrian crashes

* PEAK SEASON

PALM BEACH COUNTY
TRAFFIC DIVISION
HISTORIC TRAFFIC GROWTH TABLE

CURRENT YEAR – 2020

2020 counts must be used in traffic studies received by the Traffic Division on or after July 6, 2020

For the year 2020 counts, only the counts believed to be unaffected by COVID-19 pandemic have been published

This document was developed as supporting data for use in traffic impact studies seeking to demonstrate compliance with Article 12 of the Unified Land Development Code, the Traffic Performance Standards. This table shows historical peak season traffic counts, Daily and Peak Hour, from 2015 to 2020 (peak hour only for the latest year) as well as a calculated growth rate for each count station. A 3-year timeframe was used to calculate the historic growth rate shown.

Please note that the counts, in most cases, reflect a snapshot of just one full day mid-week volumes. Though great caution was exercised to avoid impacts of construction/road closures in the immediate vicinity on these traffic counts, there is no guarantee that a faraway event has not influenced the counts indirectly. Engineering judgment should be exercised in the use of counts where growth rates are out of the ordinary, particularly in cases where the growth rates are negative, too high, etc. For a lengthy build out date (generally more than 5 years), use of an area wide growth rate might be more appropriate. Consult Article 12 of the ULDC regarding use of traffic counts and historical growth rates in the traffic impact studies.

If current year count is not listed in this document (or through FDOT's yearly Count Program) but is required for the Traffic Impact Study, a consultation with the County must be done before commencing the study to determine how those counts may be collected.

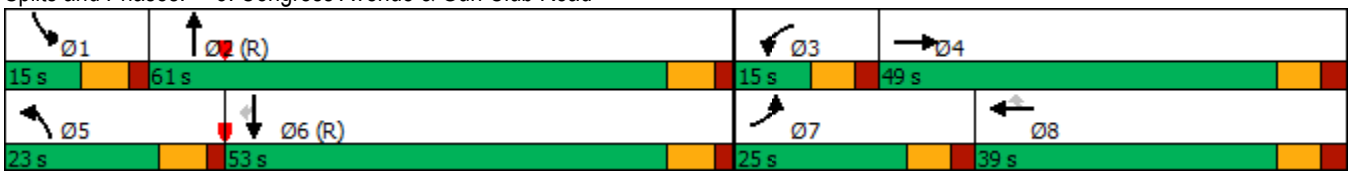
Intersection Summary			
Area Type:	Other		
Cycle Length: 140			
Actuated Cycle Length: 140			
Offset: 90 (64%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 140			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.02			
Intersection Signal Delay: 37.8		Intersection LOS: D	
Intersection Capacity Utilization 78.4%		ICU Level of Service D	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 3: Congress Avenue & Gun Club Road

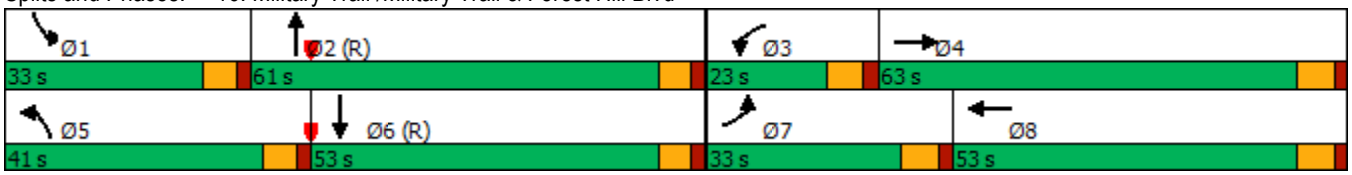
Offset: 27 (15%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 180			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.01			
Intersection Signal Delay: 68.6		Intersection LOS: E	
Intersection Capacity Utilization 94.4%		ICU Level of Service F	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 16: Military Trail /Military Trail & Forest Hill Blvd

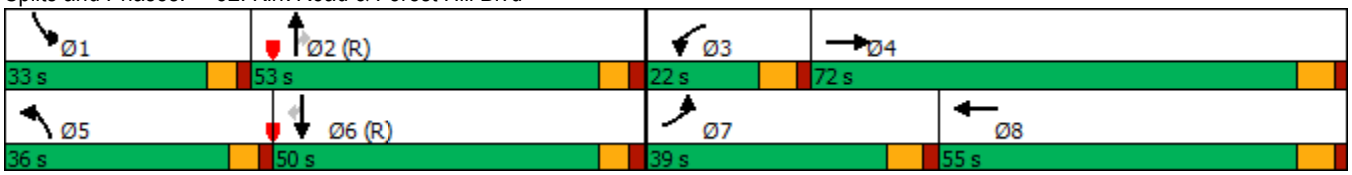
Offset: 156 (87%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 180			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.00			
Intersection Signal Delay: 64.5		Intersection LOS: E	
Intersection Capacity Utilization 87.9%		ICU Level of Service E	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 32: Kirk Road & Forest Hill Blvd

Intersection Summary			
Area Type:	Other		
Cycle Length: 105			
Actuated Cycle Length: 105			
Offset: 45 (43%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green			
Natural Cycle: 105			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 0.96			
Intersection Signal Delay: 30.3		Intersection LOS: C	
Intersection Capacity Utilization 73.8%		ICU Level of Service D	
Analysis Period (min) 15			

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

Intersection Summary			
Area Type:	Other		
Cycle Length: 160			
Actuated Cycle Length: 160			
Offset: 154 (96%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 160			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.01			
Intersection Signal Delay: 66.8		Intersection LOS: E	
Intersection Capacity Utilization 96.7%		ICU Level of Service F	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 44: Military Trail & 10th Avenue

Intersection Summary			
Area Type:	Other		
Cycle Length: 160			
Actuated Cycle Length: 160			
Offset: 46 (29%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green			
Natural Cycle: 160			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 0.96			
Intersection Signal Delay: 24.1		Intersection LOS: C	
Intersection Capacity Utilization 66.1%		ICU Level of Service C	
Analysis Period (min) 15			

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 60: Congress Avenue & Purdy Lane/Dolan Road/Plaza

Intersection Summary			
Area Type:	Other		
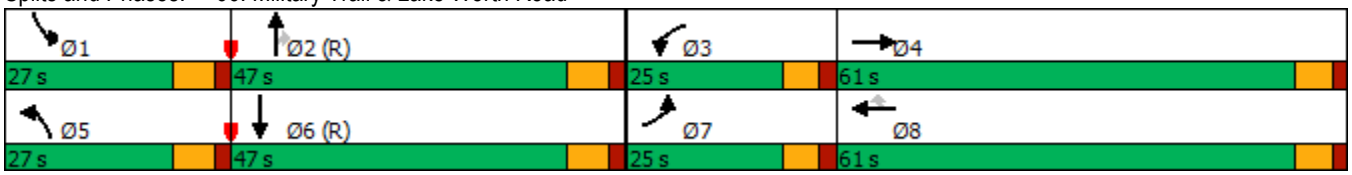
Cycle Length: 160			
Actuated Cycle Length: 160			
Offset: 99 (62%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 160			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.39			
Intersection Signal Delay: 100.6		Intersection LOS: F	
Intersection Capacity Utilization 103.6%		ICU Level of Service G	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 66: Military Trail & Lake Worth Road

Intersection Summary			
Area Type:	Other		
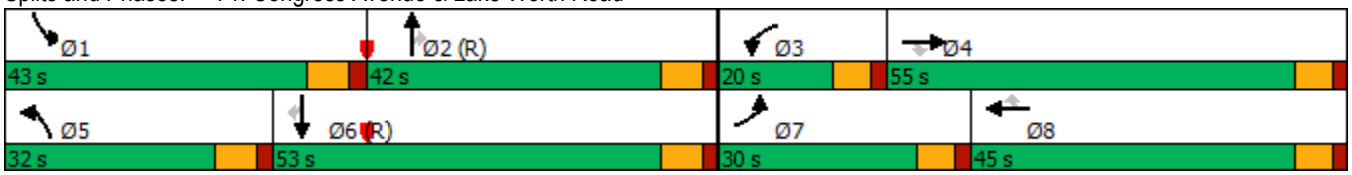
Cycle Length: 160			
Actuated Cycle Length: 160			
Offset: 16 (10%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 160			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.20			
Intersection Signal Delay: 73.9		Intersection LOS: E	
Intersection Capacity Utilization 95.8%		ICU Level of Service F	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary			
Area Type:	Other		
Cycle Length: 180			
Actuated Cycle Length: 180			
Offset: 141 (78%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green			
Natural Cycle: 180			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 0.94			
Intersection Signal Delay: 57.8		Intersection LOS: E	
Intersection Capacity Utilization 87.8%		ICU Level of Service E	
Analysis Period (min) 15			

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 91: Florida Mango Road & Forest Hill Blvd

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary			
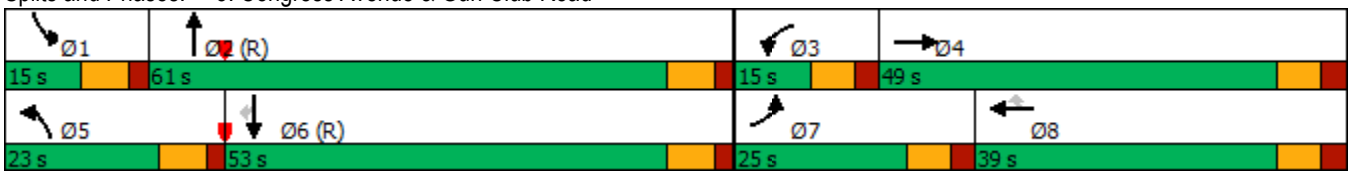
Area Type:	Other		
Cycle Length: 140			
Actuated Cycle Length: 140			
Offset: 90 (64%), Referenced to phase 2:NBT and 6:SBT, Start of Green			
Natural Cycle: 140			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.07			
Intersection Signal Delay: 47.1		Intersection LOS: D	
Intersection Capacity Utilization 80.7%		ICU Level of Service D	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Splits and Phases: 3: Congress Avenue & Gun Club Road

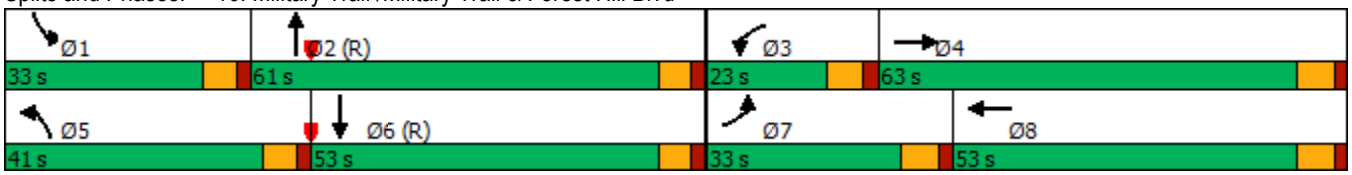
Intersection Capacity Utilization 98.0%		ICU Level of Service F	
Analysis Period (min) 15			

~ Volume exceeds capacity, queue is theoretically infinite.



Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary			
Area Type:	Other		
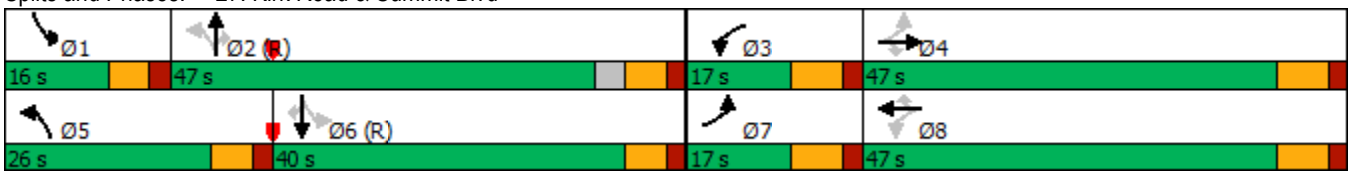
Cycle Length: 130			
Actuated Cycle Length: 130			
Offset: 0 (0%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green			
Natural Cycle: 130			
Control Type: Actuated-Coordinated			
Maximum v/c Ratio: 1.12			
Intersection Signal Delay: 56.7		Intersection LOS: E	
Intersection Capacity Utilization 89.2%		ICU Level of Service E	
Analysis Period (min) 15			



~ Volume exceeds capacity, queue is theoretically infinite.

Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.

Queue shown is maximum after two cycles.

Splits and Phases: 27: Kirk Road & Summit Blvd
